

Cassiopeia - A Brief History of Earth's Civilization
,17,000,000,000 years ago. The origin of the physical Universe. 547 (13:00). ,, 420 (22:07); 459 (33:40); 496 (18:40); 526 (28:10); 537 (4:30); 547 (13:00). 635 (1:08:00)," The Universe. The size of the Universe in diameter is 1*10^240 light years. The shape of the Universe is close to a sphere. The Big Bang in the science of MS is the compaction of matter from energy. 547 (5:00). Galaxies in the Universe are distributed in clusters of various geometric shapes. 547 (9:00), 459 (12:00). 840*10^15 galaxies are known in the Universe. 547 (11:00). The age of the physical Universe is about 17,000,000,000 years. 547 (13:00), but from the moment of the beginning of formation, it can be about 20,000,000,000 years, 537 (4:30). After the appearance of the plasmoid world, all plasmoid worlds, several more billion years passed, and only then the centers of the Galaxies appeared, i.e. what is called the dense-material Universe in the MS began to form. #420 (22:07). Plasmoid worlds in the Universe are distributed over 59 density levels, 459 (31:50). To reach the boundaries of the Universe, one must pass into another dimension, into a more subtle plane. 547 (14:00). The number of humanoid civilizations in the galaxies of the Universe ranges from 15 to 350 or more. 547 (21:30). Other Universes, as a physical world, do not exist. The Big Bang of the Universe was diffuse, not point-like. 547 (22:30). There are 6048 material energies in the material world of the Universe, and only 9 of them are physical, 526 (28:10), 459 (33:40). In the Universe, the dense material world makes up 7-8% of the entire material world, 496 (18:40), 459 (33:40). In terms of duration of existence, the Universe (Manvantara) has not yet reached half of its time of existence. 635 (1:08:00). Other Universes, as a physical world, do not exist. The Big Bang of the Universe was scattered, not point-like. 547 (22:30). Humanoid civilizations in the galaxies of the Universe range from 15 to 350 and more. 547 (21:30). "
,The emergence of the Milky Way galaxy after the emergence of the physical Universe,,166 (6:24); 170 (5:23); 399 (4:42); 521 (5:10); 547 (13:00; 44:00); 601 (22:10); 618 (48:30); 620 (4:30); 630 (5:30);,"The Milky Way Galaxy. According to the MS, there are about 230,156,300,000 stars in the Milky Way galaxy. 547 (32:50). According to MS astronomers, there are more than 300,000,000,000 stars. 601 (22:10). Plasmoids live on any star and planet. 601 (22:00). For communication and an analogue of the Internet in the Milky Way galaxy, they use instant Quantum-Gluon (quark-carbon) communication, used by MS civilizations, based on a certain type of energy waves that make up the energies in an atom. 166 (6:24), 170 (5:23), 521 (5:10), 620 (4:30). Quantum-Gluon Communication 150,000 times faster than the speed of light. 547 (44:00). There are

727 intelligent humanoid civilizations in the Milky Way galaxy. Of these, 117 are part of the MS, 23 are part of the GFS. 4 civilizations are part of the MS and the GFS simultaneously. 591 intelligent humanoid civilizations are not included. Of these:
- 16 civilizations have interstellar flights and do not want to join the MS for their own reasons;
- 396 civilizations, or 67%, are at the stage before mastering interstellar flights;
- 21 civilizations are under control regarding the issue of joining the MS and negotiations are being conducted with them so that they can regulate their internal conflicts and bring their laws in line with the requirements of the MS. There are mass contacts;
- 158 civilizations are just beginning their development, have not reached any machines, although they may have a high spiritual level, but are far from space.
Of the 591 civilizations, 258 are anthropomorphic. Of these, 43 civilizations are at the planet Earth stage, which is around 16-17%. Of the 258 civilizations, there are 3 hybrid civilizations with other races, including Earth. 399 (4:42).
The worlds known to the MS in the Milky Way galaxy are all in one place. The MS originated in one location. 610 civilizations are not in the MS. The rest of the galaxy is unexplored. It is assumed that there are many thousands of worlds there. It is easier to fly to another galaxy using a vacuum engine than to explore the Milky Way galaxy using a gravity engine. 618 (48:30). Mammals make up 23% of civilizations in the Milky Way galaxy. 630 (5:30)."
,,, 547 (11:00);,"The Intergalactic Union is the Intergalactic Community of Worlds, includes 58 galaxies. They have Treaties between the MS of the galaxies on the exchange of technologies. The conditions for joining the Intergalactic Union are similar to the MS. If there are wars, the communities are isolated from communication. 547 (18:00). The Intergalactic Union owns the energies of 25% of the galaxy. 547 (11:00)."
Ancient alien civilizations - creators of the human race, 15,000,000 years ago. Creation of the Interstellar Union,,27 (1:08:56); 44 (43:15); 144 (36:00); 161; 218 (7:50); 270;,"Interstellar Union - The Interstellar Union (ISU) is the main body regulating relations between the civilizations of the Milky Way galaxy, which, according to established tradition, includes civilizations of only the humanoid type. The civilizations of Burkhad and Tumesout about 15,000,000 years ago created the ISU together with four other space civilizations: Shimor from the constellation Andromeda, Lusdupar from the Pleiades cluster, Raomis from the constellation Lyra and Etes-Mior, located at that time in the Sirius star system. A necessary condition for the functioning of

the ISU was the discovery of the laws of physics that allow rapid movement in interstellar space, which was found in the solution of knowledge, what the atom consists of. The area of the solution to this problem is beyond the material world. The emblem of the ISU is a three-dimensional yellow seven-pointed star with a white ball in the center. In Ether # 218 (00:26) for the first time voiced The motto of the Interstellar Union is: "All the beginnings of reason in any of these worlds are manifestations of the Divine reason. All the aspirations of the multiple worlds of the Interstellar Union are manifestations of the Divine will of embodied entities, the Divine light." Further on it is listed: "Reason, will, light, knowledge, the desire for knowledge - this is the manifestation of the expanding consciousness of Divine energy, which knows itself in all its manifestations."
On air 27 (1:08:56) the conditions for accepting the planet into the MC were given. On air 270 (2:43) information was given that for the first time in the history of the Galactic Federation of Light (GFL), a decision was made to unite the GFL and MC into one organization. The unification itself will take another 5 years. This new community will be called the United Community of Civilizations of the Milky Way Galaxy.
"
,755,000 years ago. Creation of the Galactic Federation of Light,,682 (27:30);,"The Galactic Federation of Light (GFL), an ancient union of civilizations, which was radically rebuilt several times. Changed capitals. The current form with the capital on Futiss, was created in the 1st century AD, as the successor to an older union of civilizations, which was also called the GFL and was created 755,000 years ago. 682 (27:30). Currently, the GFL includes 27 humanoid civilizations. Associate members, 14, with whom negotiations are underway on joining. Plasmoid civilizations, 567. 682 (31:30). The goal of the GFL, the Union of Free Worlds. 682 (32:30)."
,300,000,000 years. Age of the Burkhad civilization,,"7 (8:20); 10 (1:30); 18 (16:23); 22 (1:05:12); 125 (57:08); 286 (11:31); 334 (1:36); 501 (18:00);","Burkhad is the basic planet of habitation. Self-name in the native language is Pikran.
Anthropomorphic, look like people of Aryan European appearance. The color of the blood is pale red, since there is a lot of oxygen in the atmosphere of Burkhad, 501 (18:00). The average life expectancy is 15,000 years. Average height is 2.6 m
Constellation, name in Earth astronomy - Cygnus-λ. Distance from Earth - 670 light years.
The land is called Shed-saf.
The civilization is 300,000,000 years old. It is the first intelligent anthropomorphic civilization in the Milky Way galaxy.
"

,300,000,000 years. Age of the Tumesout civilization,,18 (16:23); 129; 219 (part 2) (00:16); 501 (18:00);,"Tumesout is the base planet of habitation. Self-name in the native language is Fusour.
Anthropomorphic, look like people of European appearance. Blood color is red-brown, blood is thick as jelly, 501 (18:00). Average lifespan is 18,000 years. Average height is 5-8 m.
Constellation, name in Earth astronomy - Orion-p. Distance from Earth - 1050 light years.
The Earth is called Atinat (Blue World).
The age of civilization is 300,000,000 years.
"
,33,000,000 years. Age of the Selbet civilization,,18 (16:23); 32; 176 (1:01:36); 238; 501 (18:00); ,"Selbet is the basic planet of habitation. Self-name in the native language is Haroh.
Reptilians. Blood color is dark brown-black, due to nitrogen oxides in the atmosphere of Selbet, 501 (18:00). Average lifespan is 700 years. Average height is 2.3 m.
Constellation, name in Earth astronomy - Canes Venatici. Distance from Earth - 730 light years.
The land is called Pikhmirs.
The age of civilization is 33,000,000 years.
"
Discovery of Earth. Creation of human race hybrids, 5,000,000 years ago. Discovery of Earth by the Tumesout civilization,,18 (11:20); 83 (50:19); 459 (13:10); 511 (1:01:40); 537 (4:30); ,"Discovery of Planet Earth. 5,000,000 years ago, the Tumesout civilization discovered an inhabited planet Earth in the Solar System, 459 (13:10), immediately established contact with the subtle-material plasmoid civilizations of the Earth, 511 (1:12:00). It was closer to the Sun. The tilt of the Earth's axis was, but not the same as now, but less. Therefore, the climate was more uniform, there were no strong winds, there was uniform precipitation, everything was more uniform. There were no climatic periods: autumn, spring, summer, 511 (1:01:40). A rich variety of plant and animal life was discovered on Earth and dinosaurs and primates were found, which began to be observed in their natural evolution, 83 (50:19). Information about the state of flora and fauna on Earth at that time is stored in the MS archives right up to the origin of life on Earth under the influence of plasmoid civilizations, 511 (1:11:32). The age of the origin of the Earth according to MS chronoscopy is about 7,500,000,000 years. 537 (4:30). The origin of the Earth as a planet occurred about 6,000,000,000 years ago, after 1,500,000,000 years life arose - the cradle of life, 511 (1:23:00)."
,3,000,000 years ago. The Creation of a Hybrid Human Race,"18 (16:00); 19 (39:25); 178 (25:58); 195; 259 (00:21); 422 (10:12); 433

(21:00); 439 (28:00); 446 (16:54); 450 (37:20); 459 (16:30); 481; 495 (11:40, 13:40); 501 (11:40, 16:00); 511; 516 (11:00); 519 (5:00); 581 (53:00); 653 (14:00); 669 (7:30); 680 (28:00);","The Creation of Hybrid Human Race. 3 000,000 years ago, a decision was made to create a hybrid after 2,000,000 years of observing the evolution of primates on Earth, which did not give a result for the natural evolution of reason due to the lack of need. Primates had no natural enemies, climbed trees well, swam and dived, there was enough food, 511 (1:25:40), 653 (14:00);. Representatives of the primate order, similar to modern chimpanzees, were suitable for hybridization. Many humanoids in the galaxy have DNA structures similar to those on Earth, and oxygen breathing. When creating a person, the most compatible ones were selected, 495 (11:40, 13:40), 501 (11:40). The aliens studied them in detail and began to experiment, introducing their genetic material into their cells. 3,000,000 years ago, a hybrid was created consisting of the following DNA: Primates of the Earth - 45%; Burkhad - 35%; Tumesout -15%; Selbet - 5%. 669 (7:30). Selbet's genes were needed to create connections in the hybrid's brain that would affect the neurotransmitter exchange, which would allow survival in stressful situations. Selbet proposed to increase his genes up to 15%, but in experiments, a stable organism capable of passing on such a genotype by inheritance did not result. 669 (9:30). The original primate of the Earth, due to mutations, disappeared as a species approximately 500,000 years ago and is most pronounced in today's chimpanzees, 511 (1:10:10). 18 people were created, 459 (17:30), not in primate organisms, but in special devices where there was better control over the growth of embryos. 669 (12:30). In the first group of 18 incarnated people, there were: ten with a Spirit awareness level higher than 18, two with 6 and 7, the remaining six, with average levels, 450 (37:00), 511 (59:40). An agreement was reached on the incarnation of intelligent Spirits on the Spiritual level. Archangel Michael gave his consent. 669 (13:00). They were not adults right away, but first an embryo, then a child. In terms of nutrition, the species was herbivorous. Outwardly, the hybrids resembled modern people of the Caucasian race, but their height was about 4 meters, 501 (17:00), since the genes of the tall Tumesoutians turned out to be dominant over the genes of the other participants in the hybridization. Since the moment of creation, 3,000,000 years ago, the human race has changed in height. Initially, the height was 3 - 4 m. 656 (21:30). The skin color was light, white with a tan, the blood was red, the eye color was dark, light blue, greenish-brown. Hair of different colors. 501 (16:00). 656 (42:00). The age of people was from 600 to 900 years. 656 (22:30). Tumesout specialists taught the first people language, 669 (14:00), communication skills, work. 581 (53:00). 250 years after creation, a mutation occurred, and people began to shrink

due to the gravity of the Earth, as an adaptation to a smaller body mass,516 (11:00). At the base, there were trees that were needed by the Tumesout representatives to ensure metabolism. These fruits were poisonous to the earth, due to falling into a coma. 669 (15:30). The Selbetians - representatives of the reptilian civilization, having failed to reach an agreement with the other two races on the issue of greater participation of their genetic material in the creation of the human race and on some other issues, tried to cunningly destroy the people created with great difficulty. Lucifer (Iblis) 669 (24:30) incarnated in the body of a Selbet member who offered those we know as Adam and Eve (from the group of the first 18 earthlings) to taste the forbidden fruit of the Horo tree, which was used for representatives of the planet Tumesout as a stimulant of mental activity, but deadly for earthlings, 519 (6:10), 178 (25:58), 259 (00:21), 669 (22:30). The Selbet members wanted to destroy the first earthlings. 669 (21:30), in order to then create a hybrid with the desired combination of genes, 519 (5:00). People were already adults at that time, there were 5 victims, among them were 3 women and 2 men, 519 (9:00). There were 6 people, 4 men and 2 women, 669 (23:00), Fortunately, the Selbet people did not succeed. It took several months of rehabilitation. They learned to speak again. 669 (32:30). Almost immediately, a mutation occurred due to gravity and a decrease in the production of somatotropin hormones, the height of people in each offspring, after 500 - 600 years, 511 (1:03:20), began to decrease, 656 (22:00), skin color changed to dark, as a protective reaction, under the tropical sun, 511 (1:00:40). As a result, people settled all over the Earth, acquired external regional differences due to adaptive mutations and, by the time of 400,000 years ago, looked approximately like modern people, 511 (1:06:50). In terms of nutrition, before the war 12,000 years ago the species was vegetarian, some people lived in nature and their contacts with the outside world were limited, 511 (1:08:30). 511 (1:08:30). All human capabilities have not yet been revealed, 511 (8:40). The Earth civilization was not accepted into the MS for 3,000,000 years after its creation, because they wanted to live in nature. 680 (28:00)."to then create a hybrid with the desired combination of genes, 519 (5:00). People were already adults at that time, there were 5 victims, among them were 3 women and 2 men, 519 (9:00). There were 6 people, 4 men and 2 women, 669 (23:00), Fortunately, the Selbet people did not succeed. It took several months of rehabilitation. They learned to speak again. 669 (32:30). Almost immediately, a mutation occurred due to gravity and a decrease in the production of somatotropin hormones, the height of people in each offspring, after 500 - 600 years, 511 (1:03:20), began to decrease, 656 (22:00), the skin color changed to dark, as a protective reaction, under

the tropical sun, 511 (1:00:40). As a result, people settled all over the Earth, acquired external regional differences due to adaptive mutations and, by the time period of 400,000 years ago, looked approximately like modern people, 511 (1:06:50). In terms of nutrition, before the war 12,000 years ago, the species was vegetarian, some people lived in nature and their contacts with the outside world were limited, 511 (1:08:30). 511 (1:08:30). All human capabilities have not yet been revealed, 511 (8:40). The civilization of Earth was not accepted into the MS for 3,000,000 years from the moment of creation, because they wanted to live in nature. 680 (28:00)."to then create a hybrid with the desired combination of genes, 519 (5:00). The Education of the Hybrid Human Race, 3,000,000 years ago. The Education of the Hybrid Human Race,,8; 18 (31:50); 67 (11:49); 156; 461 (18:30); 511 (1:36:50); 519 (12:30); 669 (12:00);,"Eden. From the moment the human race was created 3,000,000 years ago until the war 12,000 years ago, there was a single continent on Earth, which is today called Pangea. At the base that existed on the site of today's desert, the Sahara, 669 (20:00). At the site where the Mediterranean Sea is now, which was not there then, since it appeared after the war, closer to today's Turkey, there was a base for the creation of man (the place that we now call "Eden"). There was not just a scientific base, but also what we call a testing ground, for training our ancestors to go through the social path of development. They wanted to create the human race and let them go through all the difficulties themselves, give them independence. The creators were interested in further communication with full-fledged employees, that is, representatives of

the civilization that went through all the stages that they themselves went through earlier. In this "Garden of Eden" was created a testing ground for the training of the first 18 children, 511 (1:38:30), since people were created at the embryonic level and were born from earthly female primates using genetic modification or artificial insemination. They were also taught language, 511 (1:38:40), that is, a simplified Tumesout language, without any complex terms, in the simplest version. From this language, Hebrew later emerged, which in turn also underwent changes. The children perceived their creators as their parents, they were taught to dress, take care of their bodies, 511 (1:38:50). They did not have such concepts as "gods", 511 (1:39:10). The Eden base became under the bottom of the Mediterranean Sea after the war 12,000 years ago, 461 (18:30). Initially, the further development of the Earth's civilization was planned as independent, with the advent of art, science, with subsequent, in the long term, entry into the MS or GFS, 511 (1:36:50). It was allowed to transfer tools, knowledge, information, 511 (1:38:14, 1:39:40). The first generation of people, after the attempt to kill them by a Selbet man, 669 (12:00), were transported to prepared log dwellings in nature so that they could develop themselves and not live at the base, 511 (1:40:00). In the settlements, people were taught to cultivate the land, grow something, collect fruits, 511 (1:41:20), 519 (12:30). In the second generation, due to a conflict between two brothers, who are called Cain and Abel, on the topic of the benefits of fruits for people and the benefits of animals, in anger, the first murder occurred by a blow to the head with a stone, 511 (1:42:20). All the parents from the first group were still alive before this and everyone saw the death of a fellow tribesman for the first time. From the resulting shock, the brother who killed his brother went crazy, 511 (1:47:50)."

The Settling of Venus, 200,000 years ago. The Settling of Venus by the Human Race,,18 (42:30); 26 (21:40; 58:00); 217 (17:45); 249 (12:55); 402; 426; 511 (1:03: 50); 511 (1:37:10);,"Settlement of Venus. About 200,000 years ago, 20,000 volunteers from Earth were resettled to Venus (the name of the goddess of love) to develop different civilizations with a single genetic code, 426 (33:24), 511 (1:03: 50, 1:37:10). The structure of the Solar System at that time was different. Venus (Alliyara in the Tumesout language ""First from the star"") was the first from the Sun, 402 (3:40). Mercury was its satellite, 402 (4:00). Venus did not have such a dense toxic atmosphere, there 150,000 years before the resettlement, they carried out the process of terraforming, sprayed photo-synthetic bacteria, brought in ferns, which in a few decades created an oxygen atmosphere, using special technologies they created reservoirs there, planted forests. On Venus, a year lasted 295 days, a day was 14 hours long. There was no winter.

There were dry and rainy periods of the year. Plants were brought to Venus and Mars from Earth. These were ancient conifers, like fir trees, only very tall and thick. In addition, there were their own species, like multi-colored moss on stones and their own primitive life forms: small insects, bugs and microorganisms, plants. In total, more than 580 species of plants and animals were brought to Venus, including fish, insects, birds. Thanks to the measures taken, Venus became a real sister of the Earth. The social system was a community of free owners who lived in communities at the expense of subsistence farming. They knew metals and navigation. They had a written language. The language was uniform with dialects. Life expectancy was within 400-700 years. Construction was carried out only from stone. They took care of the wood. They did not manufacture weapons. They did not allow conflicts, 426 (49:40). They mastered prototypes of steam engines on peat, which corresponds close to the 4th level of technological development according to the MS classification. There was not a single major intertribal military conflict on Venus, 426 (41:20). "

The Settlement of Mars, 200,000 years ago. The Settlement of Mars by the Human Race,,18 (42:30); 26 (21:40; 58:00); 217 (17:45); 249 (12:55); 402; 426; 511 (1:37:10); ,"Settlement of Mars. About 200,000 years ago, 20,000 volunteers from Earth resettled on Mars (the name of the god of war) to develop different civilizations with a single genetic code, 426 (33:24), 511 (1:37:10). The inhabitants of Mars themselves called their planet Eltorar, which means "perfect world", 426, (2:15). The structure of the Solar System at that time was different. Plants were brought to Mars from Earth. These were ancient conifers, like fir trees, only very tall and dense. In addition, there were their own species, like multi-colored moss on stones and their own primitive life forms: small insects, bugs and microorganisms, plants. The social system was a community of free owners who lived in communities at the expense of subsistence farming. They knew metals and navigation. They had a written language. The language was uniform with dialects. Mars was closer to the Sun, but there was a change of seasons, 426 (28:04), and the climate was colder, snow fell. There was a single ocean. Mars was located at a distance of 170,000,000 km from the Sun. There were already reservoirs and oxygen on Mars. A large base was built on Mars and a community of people of free ownership was formed. There were separate conflicts between them because of herds of animals as sources of milk and wool. There were 42 countries on Mars with their own language dialects. The population of Mars was 250,000,000 - 270,000,000 people, 426 (41:20). Without taking into account the death of warriors, the natural life expectancy began to decrease rather quickly after the resettlement to Mars due to the fact

that people destroyed themselves with their negative blocks, and, approximately, by the end of Mars' existence, it reached 90-120 years, and before people were brought to Mars, the average was around 700-800 years. 426 (01:14:39). The inhabitants of Mars were quite tall - more than two and a half meters due to the small gravity of Mars, quite dense build. There were many overweight men who weighed around 200 kilograms, 426 (01:15:56). "

The continent of Pangea. Antediluvian civilizations, Before the war 12,000 years ago. Geography of the Earth. The continent of Pangea ,,8 (00:01); 18 (31:50); 41 (38:14); 67 (11:49); 156; 210; 256; 501 (25:00); 545 (2:10); 656 (15:00);,"Earth. The Earth was located at a distance of 130,000,000 km from the Sun. The Moon was located just over 150,000,000 km from the Sun, almost at the site of the modern Earth. A day on Earth was just over 25 hours long. The angle of inclination of the axis of rotation was different. A year was about 9 months. 656 (15:00). There was more oxygen and helium in the atmosphere, less nitrogen. 656 (19:00). The climate on Earth was stable. 656 (1:10:30). Hyperborea, Atlantis, Lemuria - these were parts of that single continent on Earth or its cities - metropolises. They arose about 800,000 years ago. 545 (2:10). The modern name of this continent is Pangea. Atlantis was a very ancient large city on the ocean coast in the south of the single continent. Arkhy is the capital of the Earth, the city that Tumesout helped build, Burkhad, Shimor. It was built long before people migrated to Mars and Venus, about 620,000 years ago. The population was 50,000 - 60,000 people, a lot of space was occupied by temples, schools, something like stadiums, observatories. That is, there were scientific institutions where people studied. The inhabitants were priests and flew to other planets, there were many alien bases there. Lemuria was to the south. Before the war, earthlings openly communicated with aliens, 501 (25:00). Therefore, contactees could come openly, without hiding, there was no need to hide contacts, and they could fly away and fly back in front of everyone. The priests who contacted plasmoid civilizations created their own religions. When the Selbetians attacked, the city of Atlantis was the first to be destroyed. When the single continent was torn apart, its remains were buried under soil southwest of the southern coast of Africa, several hundred kilometers from the city of Cape Town on the ocean floor. Hyperborea or Daaria was located further than the Arctic Ocean. It was an extension of the single continent, like a peninsula. There was no winter on the continent at all. People on Earth spoke dialects of a single language. Simplified Tumesouth. 656 (32:30)."

,12,000 years ago. Selbet's attack on the Solar System ,,18 (24:43); 32 (25:29); 426 (1:28:49); 450 (46:20); 485; 494 (19:30); 495 (21:00); 504

(1:18:50); 509 (1:09:20); 517 (1:07:30); 527 (50:20); 645 (21:30); 669 (8:00); "War 12,000 years ago. 12,000 years ago, there was a major conflict between the inhabitants of the planets Burkhad and Selbet, on the issue of distributing the reptilian and anthropomorphic races in the Galaxy. There was a war with Selbet. The members of the MS trusted each other and did not expect an attack, 527 (50:20). Selbet's goal in the Solar System in the war 12,000 years ago is to completely erase the human race from Earth, as a colony of Burkhad for 3 reasons and because of the genetic rebelliousness of the human race and a tendency to crime, 426 (1:28:49-1:32:04):

1. Potential danger to people due to DNA composition;
2. Selbet's denial of Selbet's DNA share in the human race being greater than 5%, 495 (21:00);
3. Refusal to create a separate reptilian form on planet Earth. In the beginning, there was a scientific conflict between scientific groups on the composition of the genotype of the human race, 3,000,000 years ago. Selbet believed that the primate gene was too large. They introduced the term "Genetic explosive mixture". 669 (8:00). Selbet motivated this by the fact that people are dangerous hybrids. In addition, Selbet had personal grievances against Burkhad due to the fact that when new planets were discovered, more anthropomorphic hybrids were created, rather than reptilians. on 669 (34:30). The main reasons for the war arose on the spiritual level on Burkhad, Selbet and Earth, 450 (46:20). On Earth, tribal division began. A hierarchy was built on Earth. There were military clashes. They began to attract negative plasmoids. Sacrifices began. Enslavement of people by priests. Persuasion did not help. Rebellions against aliens. 669 (36:00). In many ways, this catastrophe occurred due to the liberal attitude of the MS towards scientific ideas of this kind. 669 (41:00). The commander-in-chief of the Selbet forces during the war 12,000 years ago was Rentigon. Rentigon survived the war, which lasted 130 years, and was then isolated, sent to a planet of criminals, already excommunicated from the MS.

There were opponents of the war with Burkhad on Selbet, but they did not influence the situation. 12,374 years ago. A surprise attack on the Solar System. At first, there were 87 Selbet ships, and later 602 more arrived. Many had biorobots. 669 (44:30). The extremist movement on Selbet that led the planet to war with Burkhad 12,000 years ago is called Haljarpi. In Selbetian it means "Indestructible", 125 (57:08); 249 (15:36). Selbet was excluded from the MS. The planet was blocked. All these events took 130 years. 669 (53:00). Selbet's exclusion from the MS for 250 years allowed them to appreciate and realize as a civilization that they wanted to return to the MS. 504 (1:18:50), 509 (1:09:20) handed over the instigators of the war to the MS and sent

them to the planet of criminals. 669 (1:29:00). After winning the war, the victors from the MS and the GFS underwent a system of psychological and spiritual cleansing to improve their etheric fields. 517 (1:07:30). Selbet explained that in this way they wanted to save the galaxy from potentially dangerous hybrids. 645 (21:30). About 60,000 humanoids died among the defenders of the Solar System. About 40,000 Selbetians died in the Solar System. 669 (55:00). Only 42 Selbetians were taken prisoner. The rest chose to die in battle. 669 (58:30). Selbet was accepted back into the MS, accepting their regret, 250 years after the events of 669 (1:30:30)."
War 12,000 years ago. Selbet's attack on the Solar System,12,000 years ago. Selbet's attack on the Solar System,,18 (24:43); 32; 57 (14:54); 95 (34:21); 414 (53:22); 433 (18:00); 509 (59:00); 517 (1:07:30); 589 (53:30); 645 (1:56); 669;,"Selbet's attack on Phaeton, Mars, Earth and Venus. Selbet's ships launched a surprise attack with gravity bombs on the Burkhad bases, the main one of which was on the sixth planet from the Sun, which was approximately 420,000,000 km from the Sun and was called Phaeton. Phaeton was attacked first. 669 (47:30). At that time, there were no permanent residents on Phaeton, there were only alien bases, including the Tumesout and Sirius bases. 589 (53:30), 669 (47:30). Phaeton was larger than Mercury. The Tumesout people called the planet Phaeton and the main base on it - Nibiru. Now this is the well-known asteroid belt (Phaethon debris), located in orbit between Mars and Jupiter - these are the consequences of this attack. In the Solar System, there are no There were guard posts, no one expected an attack. Having reached the Solar System, after Phaeton, Selbet's warships split into three formations, the first of which headed for Mars, the second for Earth, and the third for Venus. The first of the three, they destroyed Mars. The scientific ships of Brkhad and Tumesoutan had no weapons, blocked the way and perished. 669 (48:30). The Selbetians had a geophysical gravitational weapon capable of moving continents, blowing away the atmosphere, or turning oceans into steam. Almost all inhabitants of Mars were destroyed, but the inhabitants of Venus were taken to the planet Disaru, located near the core of the Galaxy. Of the people of Earth, the Burkhadians and Tumesoutians managed to save about 10,000 people. About 500 people were saved on Earth on their own in caves. After the disaster, the appearance of the Earth and the conditions on it changed greatly. The Earth acquired the Moon, became located further from the Sun, the angle of the Earth's axis changed, the single continent split into parts, many cities and islands sank, winter appeared. Gravitational bombs, these are white balls about 5 m in diameter with electronic filling, dropped 184 gravity bombs on the Earth, which interacted with the Earth's core. Planets

from the Sirius-B system. Phaeton. Reached the Earth's core in minutes. 645 (1:56). "
,12,000 years ago. Selbet attack on Mars,,18 (1:02:35); 318; 426; 645 (1:00:00); 669;,"The aftermath of Selbet's attack on Mars. The planet Mars suffered much worse, almost all of its inhabitants died. 669 (1:22:00). Only a children's camp of 120 people was saved from Mars. In total, 200 people. 669 (1:22:30). Of these, several dozen agreed to fly to Earth, the rest flew to Disaru. 645 (1:00:00), 669 (1:22:30). Both people and representatives of Tumesout lived on it, who had an entire city there. The population was 1,200,000 people. There were 45 alien bases. There were 42 countries. The population of Mars was 270,000,000 people, in accordance with the resource capabilities of the planet, 426 (42:12). A water supply system was created. There were carts on wind engines, 462 (43:14). Before the war, more than 5,000 aliens and biorobots lived on them. The colonists settled in small towns, scattered mainly in the equatorial and temperate zones. There were more than 4,000 such settlements, and many smaller villages along the river banks. The rivers were large. The capital of Mars was the city of Penfir with a population of 250,000 people. The political system resembled a tribal one under the leadership of chiefs, 426 (44:50). Shamanism was developed among religions, 426 (1:08:50). Language dialects arose. The natural life expectancy after resettlement was 700-800 years, and closer to the war, it was 90-120 years. The height was more than 2.5 m, weight, about 200 kg., There were tribal differences. Herbivores with limited consumption of milk and bird eggs. There were animals, deer, yaks, riding armadillos. 426 (1:15:20). They were engaged in agriculture, buildings, mostly wooden. 426 (1:23:15). As a result of the war, Mars was left without water and atmosphere. There are still remains of that civilization on Mars. Against the background of low oxygen and oxidation, you can still find skeletons of its inhabitants there. According to Burkhad's technologies, the repeated terraforming of Mars will take 50 years. 6"
,12,000 years ago. Selbet's attack on Earth,"18 (1:02:55); 200; 414 (51:02); 426 (35:57, 37:11); 645 (19:00); 656 (25:00);668 (1:24:00); 669;","The consequences of Selbet's attack on Earth. Orbit change. Moon shift. Selbet's attack on Earth was carried out with a geophysical weapon - gravitational bombs aimed at the Earth's core. The Earth's orbit shifted further from the Sun. There was a threat of a collision with the Moon. The Selbetites fired several energy-gravitational bombs at Earth from a distance of the orbit of Mars outside the plane of the ecliptic (the circle that the Earth passes around the Sun through the constellations). During the bomb attack, the continent began to split and volcanoes erupted. We can see the consequences of these blows now, looking at map of the Earth, since before the Great Flood the

Earth had a single continent. As a result of the use of this weapon, the Earth began to fly away from the Sun further (after which snowy winters appeared on Earth) and moved towards the planet, which is now called the Moon. Before the impact, the Earth was at a distance of 128,000,000 km from the Sun. After the impact, it became at a distance of 150,000,000 km from the Sun. The Earth came into the trajectory of the Moon. 645 (19:00). Before this war, the Moon as a satellite of the Earth did not exist, it was a planet located between Mars and the Earth, with a large alien base, 414 (51:02). The collision would have been inevitable (with another asteroid belt), if not for the intervention of the Burkhadians, with the gravitational fields of 17 of their ships, which stopped this convergence, which had already increased to 4 times the size of the Moon. After the rest of their ships arrived, they were able to position the Moon in the orbit it is in now. Due to the artificial intervention of the ships, the Moon is always turned with one side to the Earth, and the bases are located on the other side. 669 (1:17:00). When the Moon approached, the water began to overflow the banks, the coastal areas sank. There was a shift in the planetary crust, which brought the Great Flood. Winter appeared in the Earth's climate. The previously united continent split into 7 parts. The resulting oceans were previously small inland seas of the continent. About 200 Earth years passed from the moment the bombs hit until the complete split of the continents. On the surface, waves, floods. Volcanic eruptions. 645 (10:00), 668 (1:24:00). 96% of the Earth's population - 55,000,000 earthlings were destroyed, including those who died from cataclysms, in a few days. 656 (25:00), managed to take out about 8,000 people. 669 (55:30). There were a lot of species of plants and animals on Earth. Many species died during the attack and from cataclysms. They didn't manage to take everything out. The Selbetites burned the Earth with lasers. 669 (56:30). After the war, the diversity of animal species perished, 56%, plants on Earth perished, about 70%. 669 (59:00). The gene pool of plants and fauna of the Earth exists on Burkhad. 669 (1:00:30). Of the plants, we managed to save and return the gene pool, 324,000 species. Of the animals, including insects, we managed to save and return 520,000 species.Biorobots and drones the size of a dragonfly were used to collect tissue from the animals being saved for about 4 hours. Marine animals were not taken. 669 (1:06:30). The rapid split of the continents occurred from within over the course of months. 669 (1:13:00). The return of animals and plants grown in special devices occurred after 10 months. 669 (1:14:00). The war saturated the Earth's noosphere with negativity, 426 (35:57), directly, about 1,000 people survived on Earth, 669 (56:00), whose descendants became the Yeti. 656 (25:00). They started practically from scratch 12,000 years ago, 426 (37:11). People

were told about the attack of one of the races. The energy of hatred towards all aliens in general emanated from people. 669 (1:19:00). People were resettled into tribes. People were returned to Earth, about 10,000, more than were taken from Earth, 8,000, because some, 2,000, were from Venus. 669 (1:21:00). Those returned were divided into 3 groups: Tapsim; Tampitel; Tefel. It was given to Moses as the 3 sons of Noah. 669 (1:23:00). The following civilizations took part in the resettlement of people: Tashig; Disnit; Esler; Sirius-B; Burkhad; Tumesout, Lira. 669 (1:27:00). Fear of attack by reptilian races is now transmitted among earthlings through DNA, as an instinct for self-preservation, but more in the egregor. 669 (1:32:30)."
,12,000 years ago. Selbet's attack on Venus,"41 (1:08:08); 163 (4:13 - 9:18); 193; 247 (20:00);
286 (30:57); 402; 426 (1:27:38); 645 (39:30; 43:11);
668; ","Consequences of the attack on Venus. Relocation to Disaru. On Venus, the Selbet people, after hitting Venus with gravity bombs that moved Venus closer to the Sun, additionally sprayed chemical weapons that converted oxygen into carbon dioxide in order to prevent future repopulation of the planet, 426 (1:27:20). Those who were saved on Venus were resettled to the planet Disaru. Disaru was accepted into the MS 300 years after the resettlement and formation of civilization and the creation of the Council. All the laws of the MS were adopted. 668 (1:21:30). Ashtar Sheran was a member of the commission for the adaptation of Disaru to the MS. The adaptation process of Disaru was easy. 645 (39:30; 43:11). The inhabitants of Disaru are genetic relatives of earthlings. They had their own civilization on Venus. Settlers from Venus, Mars and a small part from Earth about 12,000 years ago in the war with Selbet. In the MS, as a civilization, were accepted 300 years after the resettlement to Disaru. Not included in the GFS. In terms of nutrition, lacto-vegetarians, that is, they can eat milk and plants. The society on Disaru is united and does not have separate states. There is one language of communication. The diameter of the planet Disaru is approximately 20-22% larger than the Earth, but its mass is almost equal to the Earth's, due to this, gravity is slightly less. The climate is similar to the subtropical on Earth, almost on the entire planet, but near the poles there is a strip of glaciation. The length of the day on Disaru is 38 hours, the length of the year is about 11 Earth years. The climate is mild. Lots of greenery. The radiation spectrum of the star Hercules-θ does not resemble the Earth's, but is shifted towards the blue-violet spectrum. Hercules-θ is closer to the core of the galaxy. It has a brighter night sky. The core of the galaxy is visible. The Disaru civilization has a plan to restore life on Venus. Attempts are being made to spray special microbes into the atmosphere that convert acids into safe compounds. For global

terraforming of Venus, it is necessary to change its orbit, move it further from the Sun, and for this it is necessary to rebuild the entire Solar System. The project did not receive approval from the MS before Earth joined it. According to Burkhad's technologies, the repeated terraforming of Venus will take 120 years. There are bases on Venus deep underground. The pressure on the surface of Venus is about -95 atmospheres and the temperature is very high. "
,12,000 years ago. Ashtar Sheran - commander of the guard ships,,41 (57:23); 95 (33:27); 125; 222; 230; 276; 414 (58:00); 416 (1:01:23); 449 (32:55); 471; 502 (45:20); 509 (1:12:40); 589 (55:00); 645 (22:00).;,"Ashtar Sheran. Ashtar Sheran was the commander of 17 security ships 12,000 years ago, 471 (2:55). Each had from 38 to 52 crew members. The detachment arrived in the Solar System 15 minutes after the start of Selbet's attack. Selbet attacked Ashtar Sheran's planet in the Sirius-β system later than Earth, out of revenge, after the start of hostilities, as defenders of the Earth. 645 (22:00). 35 ships with people were shot down by Selbet's ships, the rest were saved. During the 130 years of war, about 55,000 representatives of the MS and about 40,000 representatives of Selbet and their colonies died. Ashtar Sheran, after the war, wished all those who died on all sides, bright incarnations, asked God for this, 509 (1:13:30). Ashtar Sheran made a decision to leave the incarnation and go to the next one only when the Earth is accepted into the Interstellar Union. In the incarnation of his race, humanoids live 25,000 years, Ashtar Sheran is now approximately 15,200 years old. He himself can make a decision to leave the incarnation, but he set a goal to protect the borders of planet Earth so that no aggressive civilizations attack, and to tell other representatives of his civilization, who are born again, about this cruel war. Ashtar Sheran is on a huge ship of dark golden color, 60 km in diameter, located on the outskirts of the Solar system, 471 (0:50). There are only 9 such ships of this fleet in the Milky Way galaxy. Ashtar Sheran's ship is called Nibiru in memory of the lost planet Phaeton, which the Tumesouts called in their language - Nibiru, 95 (33:27). Ashtar Sheran can simultaneously provide up to 520 phantoms for the transmission of information, 502 (45:20)."
Repopulation of Earth, 12,000 years ago. Repopulation of Earth, 43 (46:24); 67 (44:20); 397 (26:00); 433 (25:00); 501 (23:00); 504 (54:10); 509 (59:30); 645 (1:00:00); 656;,"Repopulation of the Earth. Many people on Earth died from volcanic eruptions, and from toxic gases coming out of the Earth, from earthquakes, and from a flood. About 3,000 people were taken to Mars, which the Selbetites attacked a little later, from which people were taken to the Moon base, under a glass dome. They remained there until the cataclysms on Earth ended (volcanic eruptions, continental movement, increased radiation), and it

became habitable. They stabilized the situation on Earth for 6 years, after they managed to stabilize the orbit, magnetic field, core of the Earth, and the entire Solar System, 509 (59:30) and stop volcanic eruptions, earthquakes and floods. MS was engaged in eliminating the consequences of the use of weapons, excess radiation, 509 (1:00:30). It became possible to transport people after 34 months after the start of the work. 656 (14:00). The Earth was repopulated with rescued earthlings, who had been kept at the base on the Moon all this time. The total number of people saved directly on Earth was about 3,000. Including residents of Venus. Only a children's camp of 120 people was saved from Mars. Of these, several dozen agreed to fly to Earth, the rest flew to Disaru. A total of about 10,711 residents, including about 8,000 native earthlings. 645 (1:00:00), 656 (4:00). Settled in a round city in the vicinity of Babylon (Nardthi, (Renewal of Hope) in the Tumesout language). 656 (5:30). The climate in this area was the same as it is now. 656 (51:00). On dozens of planets, they saved the Earth's gene pool and grew crops in devices and returned to Earth, animals from 7 to 14 species, insects, plants. 656 (6:30). At first, for 25 years, people were brought food in the form of concentrates. They were taught self-sufficiency. 656 (18:00). The age of people, by decision of the Spiritual world, with the participation of Archangel Michael, and the negavina Noosphere of the Earth, was established, 120 - 150 years. 656 (33:30). DNA correction was made, consisting of: Primates of the Earth-45%; Burkhad-30%; Tumesout-20%; Selbet-5%, 501 (29:00, 34:40), 656 (12:30). In terms of nutrition, the species became omnivorous. The height of people was about 1.8 m. 656 (43:00). Human DNA changed smoothly at the level of the sex cell, 656 (49:00), over 300 years due to external directed radiation from the Earth's orbit 656 (49:30) at the conception and birth of each new child, as well as from the addition of genes from aliens using compatibility technology (in mythology - children of the gods). In this way, the previously single race was adjusted, 501 (23:00) and the emergence of additional Negro and Mongoloid races with varieties of Chinese, Japanese, and others, corresponding to the climatic zones of the settlement of earthlings on the new continents of the Earth. Civilizations from the constellations of Lyra, Sirius, Pleiades (colonies of Tumesout) participated in this.501 (29:40). Life expectancy was shortened more at the request of the Spiritual World, Archangel Michael. 645 (1:04:30). After an attempt was made on Earth to fly to the Moon, 600 years after the settlement of people, new races were created for them. 656 (44:44). Races on Earth were created to overcome xenophobia and hostility towards other forms of life. 4 different races, black, white, yellow, red. 656 (46:00). Caucasians were the result of subsequent mixing. 645 (1:17:30). Initially, all resettled

inhabitants of the Earth were recorded through a helmet (neurolinguistic apparatus), a single language. 656 (35:30). To create in people the concept of a plurality of inhabited worlds, they were taught through the neurolinguistic apparatus six main languages, which became the progenitors of all the others 645 (1:04:00), 656 (48:30):
Proto-Slavic - a simplified language of the planet Shimor. 656 (1:09:00).
Кельтский- упрощённый язык планеты Бурхад. 656 (1:08:00).
Hebrew is the simplified language of the planet Tumesout. 656 (34:30).
African - a simplified language of the planet Tashig.
Japanese-Chinese - simplified and adapted language of the planet Sho-Hareki.
Australian - simplified and the language of the planet Fismor. After the re-reading of the Earth, there was no nea on it for 5 years in a row, so that there would be no war, 504 (54:10). The resettlement on the planet Earth was carried out 600 years after returning to Earth, when the population of the Earth was 128,000 people, dividing into 4 groups of 30,000 people with a change in genetics for local conditions. The groups were from 500 people to 1,000 in ready-made settlements. The curators of the groups flew to them every day. 656 (52:00). "
Sumerian civilization, 10,000 years ago. The Sumerian Civilization,,343;,"The Sumerian Civilization. The civilization that was later called Sumerian consisted of the descendants of people who came to the valley between the Tigris and Euphrates rivers 11,000 years ago, that is, 1,000 years after the war with Selbet. The descendants of these people remembered the events before the war. The city of Urak (Uru) existed many thousands of years ago, even before the war. Annunaki means "came from the sky." They were drawn in unusual costumes, on heavenly chariots surrounded by Light. There was Light around their heads, hands, and heavenly chariots. They appeared when it was dark. They were described as "appearing from the night." Khairane is a reptilian race. Reptilians are very peaceful. They never fought with anyone, members of the MC, taught the peoples who lived there before the Sumerians. They taught how to build cities, practice medicine, They taught astronomy, natural history, how to communicate with nature, increase the fertility of the earth, how to take care of your Soul, how to observe moral laws."
New Era, Before the War 12,000 Years Ago. Construction of the Pyramids ,,95 (14:41); 129; 142; 403 (27:55); 404 (20:05); 437 (1:23:30); 491 (1:14:30);,"Pyramid complex. Before the war 12,000 years ago, the pyramids on Earth, including Giza in Egypt, Mexico, China, and probably also the Crimean pyramids, were built by representatives of Tumesout and their assistants from other planets - it

was like a repetition of their houses and ships, since their pyramidal shape, for the Tumesoutians, allows them to feel better in space - physically and energetically, 95 (14:41). The pyramids have a shape that allows them to better feel the energies of space, earthlings also feel this. When in a pyramid, a person, even an insensitive one, can feel more, because the structure itself acts on the energies that are in space, in your opinion they are called ethers. Thus, they strengthen the etheric and astral field of the person himself. Pyramids are not only on Earth, they are also on the Moon, and on Mars and on the satellites of the planets - gas giants. Pyramids affect energy, because they are located at a certain distance from each other - opposite, along one line. People who built them in ancient times gathered around them. They could gather at the same time at different pyramids, for example, during a holiday, and direct their thoughts and energy along the edges of the pyramid to its top. This strengthened their thought flow, and gave birth to etheric swirls in all space. If they are on the same line along the earth's meridian, then this can cleanse the planet, saturate it with new energies, give it new vibrations. At the tops of the pyramids there are often portals to plasmoids, since they were built not by materialistic people, but by people who were in contact with plasmoids. And they built in those places that the plasmoids showed them. If people look at the pyramid, the plasmoids feel the call, and also send their strengthening energy. But these are most often plasmoids of earthly forms, which are responsible for the core of the planet, its magnetic field, atmosphere, etc. What you call spirits of the elements and places of nature. All this was used and is used now on Tumesout, and on some of its colonies, and on other planets that want to act in this way on their planet - this strengthens the mental message. The more people gather around the pyramid and look at the top, the stronger the impact. Depending on what thoughts they will look with - creative or destructive, if with destructive - then it is possible to cause a violation of the energy fields of the Earth."
,,,129; 142; 403 (35:33); 491 (1:14:30);,"Sphinx. The Sphinx Lion is a symbol of royal power. The Sphinx was built about 15,000 years ago on a single continent. This was before the war. There were two of them. The body of a lion, originally the head of a Tumesoutan. A molecular destructor was used to make and move granite blocks. When the pyramids and the sphinx were built, the priests, together with the representatives of Tumesout, whom they considered gods, really built structures that looked like basements or caves. But not under the pyramids themselves, but a little to the side, in a passage that looked like a mine in which artifacts from other planets were stored. They could have left a spaceship there, and parts from it, and books, and much more. This was a long time ago. And to what extent have the

priests preserved these artifacts to this day, and whether they got to them after the Arabs came to power in Egypt - all this needs to be clarified now, visiting Egypt and these pyramids in the physical body. There was also a room under the sphinx - a warehouse of the most important things of this civilization and attributes of religion. If aliens passed these attributes to contactees, then they took them there. The head of the sphinx, in the course of history, was changed 6 times. Excavations confirm many facts, 491 (1:14:30)."

 ","The Beginning of Christianity. The founder Jesus Christ is our elder brother, and he incarnated many times on different planets in order to create a form of religion there that would be accessible to those beings to come to the Light. And in order for such a high vibrational Spirit to incarnate on Earth, it had to do this through the egregor of a certain people and through a certain woman. They could take him physical and with him. another planet, but mom had to be with this one in order to accept her nature and vibrations. He didn’t find a woman at that moment who could embody his high-vibration Spirit and not destroy itself. He incarnated on the planet of one of our creations and flew in a Tumesout and flew in the planet of one of our creations and flew in the body of a Tumesout 4,000 years a spaceship to Earth to create a religious national egregor he could incarnate he on a egregor That Yahweh, who incarnated on Tumesout and flew to Moses, giving him laws for the Jews, first forming a monotheistic system instead of a polytheistic one, which did not meet his goals, was Christ, but in the body of a Tumesoutian. Naturally, he conveyed this to Moses in his language and in his concepts. He had assistants - Tumesoutians and Burkhadians, who were called Angels, in Hebrew Malach. He worked with Abraham, who was suitable for him in vibrations. He created the Jewish people, in order to incarnate in them himself later. 656 (1:01:00). Jesus Christ called the apostles after he retired to the desert to undergo the experience of communication with Lucifer for the manifestation of the divine will and confidence in his spiritual truth, despite the incarnation in the body, and underwent the rite of baptism in the Jordan River by John the Baptist, 516 (31:50). The number 12 apostles + 1 teacher, as God Absolute, was chosen by Jesus Christ not by chance, but as a symbol of the implementation of spiritual energy, the number 3 in matter, the symbol of which is the number 4, 70 apostles came to Christ later, 516 (15:30, 22:50). The ministry of the apostles was not only to study, but also to preach to pagan peoples, which was very dangerous, so women were not involved, 516 (26:10). Jesus refused to punish people, since he came to save them.

535 (1:03:10). Jesus taught the Apostles individually in images, explaining the meaning of parables, about the Universe and the human Spirit. 535 (1:03:30). The word Apostle means - a disciple sent to preach. 642 (17:30). On the day of the 50th day, the Spirit of Archangel Metatron appeared to the Apostles, who revealed to the Apostles the memory of languages for preaching the teachings of Christ. 642 (16:00). After the crucifixion of Christ, the Apostles communicated and went their separate ways,to spread the teachings of Christ on Earth. 535 (1:05:10). Most of the apostles, not only of the 12, but also of the 70, ended their lives in violent death, 516 (27:25). The incarnation of Christ continues, as he has returned to the body in which he came and his tasks, which were 2,000 years ago, have not changed, 516 (17:50). Jesus Christ plans to fly to Earth when civilization is ready to enter the MC, 439 (1:25:00), 535 (1:00:00)."
,560g. BC,,241 (1:00:46);,"The beginning of Buddhism. Founder Siddhartha Gautama. He was the son of the head of the Shakya tribe, born in 560 BC in northeastern India. Buddhism originated in the middle of the first millennium BC in northern India as a movement in opposition to the then dominant Brahmanism. In the middle of the 6th century BC, Indian society was experiencing a socio-economic and cultural crisis. The clan organization and traditional ties were disintegrating, class relations were being formed. At that time, there were a large number of wandering ascetics in India, they offered their vision of the world. Their opposition to the existing order aroused the sympathy of the people. Among the teachings of this kind was Buddhism, which gained the greatest influence in society. The name Buddha means "enlightened one." Jesus Christ visited Buddhist religious monasteries in Ladakh, lived for several days where he was shown their ancient books. Christ lived in India for about two months and there he met with representatives of various castes, with the highest Brahmins, with the lower castes. Christ pointed out to them that in their own books it was said that their castes were equal, but he did not understand, 241 (1:00:46)."
,Beginning of the 7th century,,36 (12:47); 75 (6:13); 204; 243 (36:27); 260; 261 (1:13:38); 270 (9:51); 293; 509;,"The Beginning of Islam. Founder Mohammed. Islam arose at the beginning of the 7th century in Western Arabia, in Mecca. There were many religions on the Arabian Peninsula before the birth of Mohammed, where paganism reigned. Each tribe had its own gods, whose idols were in Mecca. Mohammed was born into a religious family. These religions provided for the worship and veneration of many gods, Spirits of nature, Spirits of ancestors. Traditional for the Earth connection with the Spirits of nature, which your ancestors revered as gods. For this reason, it was decided to unite the Arab peoples and the peoples who lived nearby,

under the rule of a single religion. It was for this reason that the Koran said that there is only one God - Allah, and whoever believes in him is submissive to him, follows his path. Allah is understood only as the Creator of the Universe, the Creator of all worlds. The Koran says that Mohammed received all knowledge from the Archangel Gabriel. The role of the 12 imams in religion of Islam in that they have brought benefit as an example to other Muslims in preaching and pure living, 509 (9:20). "
,,, 305; 326;,"The Beginning of Hinduism. Hinduism, a collective name for a large group of religions that developed in India and are practiced by the majority of its population. The term "Hinduism" is derived from the word "Hindu" from the Persian name of the Sindhu River, now the Indus. Hinduism is not a single religion: there is not a single doctrinal position, cult action or everyday ritual that is understood by all Hindus in the same way. The original forms of belief (magic, fetishism, animism, veneration of animals and impersonal forces, belief in demons) coexist in it with the cults of personal deities and the Trimurti (an image that unites Brahma, Vishnu and Shiva), as well as with the belief in the impersonal Absolute-Brahman, present as pure world consciousness, or the World Soul - Atman in all individual souls. Hinduism does not fit into any classification scheme of religious studies, since the to him, religions can have mutually exclusive characteristics: belief in a single Supreme God in an attributeless form and at the same time in many of his personified incarnations, belief in many gods."
,5871 years ago. The countdown starts from the time of Abraham's life,,195; 243; 261 (1:01:33); 299; 439 (46:30); 509 (6:20);,"The beginning of Judaism. The founder Abraham, 509 (6:20), was in contact with Yahweh, 509 (1:24:10). The souls that came here and incarnated into the nationality that is now called the Jews, were some special souls that came from special levels. From them this nation was formed, which later brought Jesus according to his plan. At the present moment of earthly history, the mission of the Spirit, which incarnated through the Jewish national egregor, is to integrate the ancient knowledge of the Torah with new spiritual Teachings and practices. To take all the best from the ancient religious egregor, the teachings of all its prophets and secret mystical Teachers. To bring this to other nations, at the same time, not suppressing them, but taking the best from there and creating some synthesis. Here you need to focus on the Torah, since it was written much earlier than the Koran. It is written Moses. There was a divergence with Christianity regarding dietary prohibitions, the rite of shaping, and other reasons, 439 (46:30). Moses (Moisha) was honored with contact with Yahweh and led the Jews out of Egypt near the Red Sea, 509 (34:00). Moses was taught in Egypt,

as the son of Pharaoh, including the theory of prophecy (sacred rites), 509 (45:10)."
,Intelligent civilizations of the Milky Way galaxy,,238; 399; ,"Intelligent civilizations of the Milky Way galaxy. There are 727 intelligent humanoid civilizations in the Milky Way galaxy. At the present time, 117 civilizations of them are part of the MS. 23 of them are part of the GFS. 4 civilizations are part of the MS and the GFS simultaneously. Thus, out of 727 intelligent humanoid civilizations, 591 intelligent humanoid civilizations are not part of the MS and the GFS, including the civilization of planet Earth. Of these 591 intelligent civilizations:
- 16 civilizations have interstellar flights and do not want to join the MS for their own reasons;
- 396 civilizations, or 67%, are at the stage before mastering interstellar flights;
- 21 civilizations are under control regarding the issue of joining the MS and negotiations are being conducted with them so that they can regulate their internal conflicts and bring their laws in line with the requirements of the MS. There are mass contacts;
- 158 civilizations are just beginning their development, have not reached any machines, although they may have a high spiritual level, but are far from space.
Of the 591 civilizations that correspond to the 12th level of planet Earth according to the 30-level classification of technological development of the MS, 258 are anthropomorphic. Of these, 43 civilizations are at the stage of planet Earth, which is around 16-17%. Of the 258 anthropomorphic civilizations, there are 3 anthropomorphic civilizations that are hybrid with other races, including Earth. There are 37 known reptilian civilizations in the Milky Way galaxy, not counting their colonies. There are more than 7,000 known plasmoid civilizations in the Milky Way galaxy."
,Earth,,29; 70; 95; 218 (03:00); 318; 244; 532 (37:20); 537 (4:30); 547 (53:00); 592 (1:46:30); 596 (39:00); 622 (17:00). ,"Earth. It is located in the Solar system. The age of the Earth, according to MS chronoscopy, is about 7,500,000,000 years. 537 (4:30). The distance of the Earth from its star called the Sun is 150,000,000 km. The diameter is 12,742 km . Mass, 6*10^24 kg. Duration: Day - 24 Earth hours; Year - 12 Earth months. Atmosphere composition: Nitrogen - 78%; Oxygen - 21%; Carbon dioxide, argon, neon, radon, helium, krypton, hydrogen, methane, nitrous oxide and ozone - 1%. The age of intelligent civilization on Earth is 3,000,000 years. There are 8,000,000,000 people and 1,500 subtle-material civilizations living on Earth. On Earth, 25 years ago, intelligent spirits from levels 1 to 12 were incarnated, in the amount of 73%, and from levels 12 to 24, in the amount of 27%, 29 (16:05). Other civilizations call the Earth: Esler - Arramiya-Tumr;

Burkhad - Shed-saf; Tumesout - Atinat (blue world); Selbet - Pikhmirs; Daraal - Billena (blue diamond); Shimor - Sunebii; Hamilia - Gaia. There are a total of 128 alien bases on Earth, including underwater ones, subtle-material portals - some kind of transport There are more than 1,500 plasmoid nodes, they are more common over large cities, mountains, volcanoes, 95 (9:25). A large base in Antarctica belongs to the State Federal Service, whose main representative is Futissa, and there are also from the MS: Tashig and Burkhad, but any researchers can fly to the base, even those not included in the MS. That is, it is open to everyone, like almost any base in the Solar system, 95 (06:35). 42 civilizations, 532 (37:20) are in constant contact with earthlings, of which only 6 have permission for physical contact. One of them is Burkhad. The rest are in contact at the level of mental, astral and telepathic contacts. They were allowed one-time or episodic contacts (usually no more than 3 times) to install chips on contactees. For example, the planet Esler falls into this category. The curators of the planet Esler have about 20,000 contactees on Earth. In total, according to MS calculations, there are about 200,000 contactees with humanoid life forms on Earth. There are 10-15 times more contactees with plasmoid civilizations, that is, approximately 3,000,000, 70 (15:55). In all countries, governments of the Earth there are contactees. Many of them prove themselves to be healers, writers. They do not go beyond the social framework. 596 (39:00). The authorities of the Earth are aware of the rules for joining the MS, but they rejected them. 547 (53:00). In the Solar System, including Including around the Earth, there are 72 automatic gravity probes MS, which are used for navigation, 95 (04:23). According to information from Archangel Michael, on Earth, the number of Spirits of consumers and creators is embodied in the ratio: 80%: 20%. 622 ((17:00). The role of an earthling in our Universe is to become a mediator for communication between different civilizations. 592 (1:46:30)."

Our real story from alien civilizations - Cassiopeia-0 - Irina Podzorova - Google translated from Russian

https://proza.ru/2021/10/19/1953

The creation of a race of people, basic prehistoric events and some key principles of the structure of the Universe based on information transmitted to me - as a contactee - from representatives of the civilizations of the Interstellar Union of our galaxy during physical and astral contacts that have occurred on a regular basis since 1999.

The text was written by Vladimir G.

What will be discussed below:

- WHO, WHEN AND WHY CREATED US

- WHAT THE STORY OF THE “FALL” OF THE FIRST HUMANS REALLY WAS

- WHO IS LUCIFER AND HIS ROLE IN THE HISTORY OF HUMANITY

- EXPLANATION OF THE GLOBAL CATASTROPHE OF 12 THOUSAND. YEARS AGO, KNOWN TO US AS “THE FLOOD”

- ORIGIN OF THE MOON AS A SATELLITE OF THE EARTH

- WHERE ALL RELIGIONS COME FROM. WHAT IS GOD IN THE UNDERSTANDING OF ALIENS

- THE TRUE MEANING OF THE MISSION OF JESUS CHRIST

- OBJECTIVES OF ALIENS – WHY DO THEY NEED CONTACT WITH US AND THIS TRANSFER OF INFORMATION

PREFACE from the author of the article.

Lately, many friends and acquaintances have been asking me in surprise: “Why are you spending so much time on these aliens? Do you really believe in all this?!”

Dear friends and simply sympathizers -:), you are right - I would not have spent so much effort presenting the information given here if I had not been convinced today - yes, it’s true. And that's why.

For decades, I have been studying issues related to ufology, anomalous phenomena, and contacts with extraterrestrial intelligence. There are now a great many different messages from contactees “with anyone” on the Internet. HOWEVER, none of these contacts provides a complete picture of the universe, in which spiritual knowledge, knowledge from religious sources from various spiritual egregors - and the structure of physical alien civilizations looking after us from space - would be combined into a single system.

As a rule, all sources provide some abstract (albeit impressively presented) highly spiritual information that is divorced from our realities, or, on the contrary, they lead to contact with aliens, more like classic science fiction. For the first time in my life, I am faced with a systemic long-term contact, where an absolutely integral picture of the world is presented in all its aspects - historical, cosmogenic, physical, spiritual, and so on. In addition, we are talking not only about astral contact, but also about multiple contacts on the physical level. Since the age of 13, Irina Podzorova has traveled many times with her curators on ships of the Interstellar Union, visiting both the planets of the Solar System and the planets of our mentors. All this is described in detail in her personal diary, which she has been keeping since the very first contact (summer of 1999) and scans of pages of which are at my disposal. The diary, in the teenager’s handwriting, describes, among other things, the physical characteristics of the visited planets in numbers, provides an alien alphabet and dictionary, diagrams of the design of alien ships, and much more.

In addition, repeated personal communications with Irina over the Internet and my personal contacts through her with extraterrestrials (including personal medical diagnosis and recommendations that were given to me) convincingly proved to me that we are dealing with an intelligent force of the highest level. With a power that truly loves us and treats us with the utmost patience, understanding and care - imbued with hope for our reasonableness and sincerity in response.

That is why I try to convey to you the transmitted knowledge, making every effort and using all my modest capabilities.

This is the very contact that many have been looking forward to. True, we have had it since the moment of our creation - as hybrids of three ancient alien races and earthly primates.

I wish all of us to finally understand that it’s time for us to grow up and prove (first of all, to ourselves) that we are ready to become a full member of the galactic community, where they have been waiting for us and believing in us throughout our difficult history.

With respect and love to everyone,

Vladimir G.

So, let's begin.

WHO, WHEN AND WHY CREATED US?

About 5 million years ago, our planet was discovered by representatives of the planet Tumesout, an ancient humanoid civilization from the constellation Orion (all extraterrestrial names in the article reflect the pronunciation in alien languages). In appearance they are very similar to earthlings, but have a height of 5-8 meters. The distance from the planet Tumesout to the Sun is 1360 light years, but ships of highly developed alien races overcome such distances almost instantly, using so-called gravitational engines based on quantum particles of gravitons, the speed of which is many times greater than the speed of photons (particles that carry light). The physical laws known to us are not violated, since instead of moving at superluminal speeds, another process takes place, a detailed description of which is beyond the scope of this article.

Our discoverers flew to Earth on a ship that looked like a giant pyramid. Millions of years later they arrived on ships of a similar shape. Because of this, some of the pyramids on the planet were then built by earthlings in the hope that, by repeating the shape of alien ships, they too would be able to fly to the stars on similar structures. The most famous pyramids were created under the leadership and with the participation of the Tumesoutians, primarily for energy exchange between the Earth and space. It was the Tumesoutians, due to their phenomenal growth for earthlings, who entered our legends, myths and sacred scriptures as fairy-tale giants; it was they who became the prototypes of the giant statues on Easter Island and other famous statues of giants.

Having examined the planet, Tumesout scientists discovered that there

is no intelligent life on Earth (as we later called it), but there is a unique diversity of animal and plant life, which significantly distinguishes our planet from other planets in the galaxy on which an organic form of existence of matter is possible. At that time, the Earth's orbit was closer to the Sun than it is now, so there was no winter on the planet at all, there was a single continent and very favorable conditions for the rapid development of organic life. The Moon was a separate planet in the solar system, that is, it was not a satellite of the Earth - so it had no direct influence on the planet.

Tumesout biologists decided to create a hybrid intelligent being on the planet by combining their genetic material and the genetic material of suitable terrestrial animals for these purposes. Having studied in detail the animal world of our planet, the geneticists of our ancestors selected for experiments representatives of the order of primates, similar to modern chimpanzees. (At first, the aliens wanted to wait for the results of the natural evolution of primates and their transformation into an intelligent race, but for a very long time this never happened). At the same time, the discovery of the planet was reported to the community of civilizations of our galaxy, which is called (in our translation) the Interstellar Galactic Union. It now includes 116 of the 727 intelligent civilizations in our galaxy, which we call the Milky Way. Soon, representatives of two more very ancient civilizations arrived on the planet - a humanoid one from the planet Burkhad (constellation Cygnus, 670 light years from the Sun) and a reptilian one from the planet Selbet (constellation Canes Venatici, 730 light years from the Sun). Moreover, the planet Burkhad was and is the official capital of the Interstellar Union. However, for the next million or so years, experiments to create new intelligent beings on Earth were carried out only using genetic material from Tumisoutans and terrestrial primates. (Here it is necessary to keep in mind that the life expectancy in developed alien worlds is orders of magnitude longer than ours - for example, the Burkhadians live 10-15 thousand years, and this is far from the limit).

But, despite all the efforts and a long period of genetic experiments, it was not possible to create an intelligent creature - the DNA of primates did not combine with the DNA of the inhabitants of Tumisout. Therefore, approximately 4 million years ago, scientists Burkhad and Selbet actively participated in the experiment. The genes of the inhabitants of Burkhad and the reptilians of Selbet were added in a certain combination to the DNA of the future hybrid. It was after a significant proportion of Burhad's genes were introduced into this

genetic code that, approximately 3 million years ago, it was finally possible to develop the planned genetic hybrid. Thus, his DNA contained a combination of genes from 4 creatures - 3 extraterrestrial races and terrestrial primates. Subsequently, this hybrid developed into a human. At the same time, the main achievement of alien scientists was precisely that they managed to breed a creature with physiology and energy that was suitable for the embodiment of a rational soul from the spiritual world - which, in fact, is the criterion for declaring any creature intelligent. That is, as a result, the arrival of intelligent souls into the bodies of created hybrids began to occur - in the same mode that exists with us now (during the process of conception and pregnancy).

You can read in detail about the structure of the spiritual world - our original “home” - in a special article by Irina Podzorova on this topic (unfortunately, the direct link to this article is removed from the text when posted here - write to me in the comments, if anyone is interested, I will give this link) .

And now about the proportions in which the genes of our ancestors were included in the DNA of the originally created earthly people:

Terrestrial primates - 45%

Gods - 35%

Tumesoutki - 15%

Selbet residents - 5%

These are the things... So now, dear readers, we know who we really are from a genetic point of view. We have a total of 55% alien genes and 45% genes from the ancestors of modern apes. This means that both traditional scientists who insist on our origins from monkeys and esotericists who believe in our alien roots are partly right. As often happens, the truth is in the middle... But there is still a little more “alien blood” in us. However, 5% of it are specific reptilian genes, which, in particular, gave our race a certain toughness (and sometimes cruelty), will, courage, determination and other qualities that are sometimes called fighting qualities. So, our genetic age is now also known - 3 million years. Outwardly, we then resembled modern people of the Caucasian race, but with a height of about 4 meters -

since the genes of the tall Tumesoutians turned out to be dominant over the genes of the other participants in hybridization. The life expectancy of the first people was approximately exactly the same as described in the Old Testament (which came from the Torah handed down to Moses - more on this below).

However, let's continue and answer the last question in this chapter - WHY did they do it? The goal of the aliens was to create a race of their conscious assistants - intelligent, humanistic beings who had absorbed the best from several civilizations and were ready to further develop to the level of joining the Interstellar Union as not even an assistant, but an equal participant and partner in the study of the Universe and the universe generally. The entry of our civilization into the Interstellar Union is their goal even now, for the sake of this they maintain all contacts with us. This will be discussed in more detail at the end of the article.

WHAT WAS THE STORY OF THE “FALL” OF THE FIRST MEN REALLY?

WHO IS LUCIFER AND HIS ROLE IN THE HISTORY OF HUMANITY.

First of all, let's say here that, purely “technically,” the first humans were produced through a process that today is called in vitro fertilization. The embryo of a new creature, bred “in vitro”, the DNA of which contained genes in the above proportions, was implanted in a female primate, who then gave birth to a baby in the usual way. That is, she became a “surrogate mother.” As has already been said, the nervous and energetic system of the fetus attracted a rational soul from the spiritual world to incarnation - this finally happened, like with us, during pregnancy.

Aliens created 9 pairs of primordial people - the first men and women. That is, only 18 individuals (not 2). However, first, male individuals (or individuals) were born, and then the genetic material was taken from them and the whole process was carried out again - but with a change in the chromosome set to obtain female representatives. This is the explanation of the very biblical “rib of Adam” and the creation of the first woman. The names Adam and Eve (as well as Lilith, who, according to legend, was the very first woman even before Eve), are most likely both a symbol for the entire “team” of the very first people, and the names of specific entities adapted for us, perhaps born

the very first in this "team". But please keep in mind that, starting with the word “names” in the last sentence, this is my personal assumption, because such information has not yet been directly conveyed to Irina. It can also be assumed with a high degree of probability that Lilith, whom, according to the same legends, God later destroyed and created Eve, was, for some reason, not viable or did not attract a reasonable soul to incarnation from a sufficiently high (in the opinion of our creators) plane of the Spiritual world .

Well, what about the “apple”?

All the action to create a new race took place at a huge alien base, located in the place where the waters of the Mediterranean Sea now splash, and then there was the central part of a single earthly continent. The base was isolated from the outside world, the aliens themselves lived there (representatives of 3 races of our creators), they flew there on ships, there were large quantities of plants they brought (including for their own purposes), breeds of animals and , so to speak, scientific complexes that ensure the conduct of all these studies and experiments. As you may have guessed, this was the same “Paradise”. Its size, together with the cosmodrome and the giant semi-artificial forest (garden) surrounding it, was as much as 480 square meters. kilometers.

This is how it is said about this in verses 15-17 of the second chapter of the book of Genesis (the name of this chapter in the Torah is Be-reshi;t, which means “In the beginning”):

“The Lord God took the man and put him in the Garden of Eden to cultivate it and keep it. And the Lord God commanded the man, saying: Of every tree of the garden thou shalt eat, but of the tree of the knowledge of good and evil thou shalt not eat of it, for in the day that thou eatest of it thou shalt die.”

It says here that representatives of the planet Tumesout (Yah-veh in Hebrew - was translated into Russian as “Lord”), one of those who came from heaven (Elo-him in the original text means not the singular, but the plural, but in Russian translated this became the word “God”), settled the created people (in Hebrew Adam can mean either an individual person or all representatives of our species) in the “Garden of Eden” - this, as we have already said, is the name of a large alien base where man was created . At the same time, let us

remind you once again that climatic conditions then allowed plants to bloom and bear fruit all year round.

Well, here we come to the main thing in this chapter.

The famous “Tree of the Knowledge of Good and Evil” is a Tumesout plant, which in their language is called “Kho-rol”. It was necessary to activate the mental and intuitive activity of the inhabitants of this planet. Local scientists bred it through genetic engineering specifically for this purpose, and the Tumesoutians constantly carried its seeds with them on ships in order to always have access to fresh fruits. Due to the peculiarities of metabolism in the bodies of earthlings, the fruits of the horol were deadly poisonous for them (that is, for you and me), therefore those aliens, whose responsibilities included caring for the born hybrids and their upbringing, told them many times about dangers of eating these fruits. No one could have imagined that grown-up earthlings, who had idolized their creators since childhood, could disobey them. And how could one not idolize them when they had a gigantic stature (if we talk specifically about the Tumisout people), flew on “saucers” and other devices, and showed other technical “miracles” that would still cause us complete shock today!

What could have made our first ancestors violate the strict prohibition of the Creator Gods so revered by them?

Here's what. Among these very Gods, despite their non-humanoid appearance, were the Selbetites on equal terms. As talented astro-geneticists and xeno-biologists, they also took an active part in the creation of hybrids, not to mention the fact that a percentage of their genome was included in the DNA of people. It was the representatives of the Selbetites located at the base who persuaded the first people to “taste the forbidden fruit”!

The Bible in verses 1-6 of the third chapter of the book of Genesis speaks about what happened like this:

“The serpent was more cunning than all the beasts of the field that the Lord God created. And the serpent said to the woman: Did God truly say: You shall not eat from any tree in the garden?

And the woman said to the serpent: We can eat fruit from the trees, only from the fruit of the tree that is in the middle of the garden, God

said, do not eat it or touch it, lest you die.

And the serpent said to the woman: No, you will not die, but God knows that on the day that you eat of them, your eyes will be opened, and you will be like gods, knowing good and evil.

And the woman saw that the tree was good for food, and that it was pleasant to the eyes and desirable because it gave knowledge; and she took of its fruit and ate; And she gave it also to her husband, and he ate."

It is the representative of the planet Selbet who is called the snake here, due to the fact that he belonged to the reptilian race, that is, he was very similar in biological properties to terrestrial reptiles. The words "he was more cunning than all the beasts of the field that the Lord God created" is an explanation given to Moses of how the snake known to him from his life experience can speak, and the specific meaning of the phrase "created the beasts of the field" (Hebrew "asa hai sadah") they say that we are not talking here about the creation of the entire earth's fauna, but about the preparation of animals for a specific purpose in one area of the Earth, in a separate country or region. Notice the words "...you will be like gods, knowing good and evil." That is, by eating a Tumesout plant, designed to enhance the special qualities of the "gods" (in reality - energy, metabolism, and most importantly - intuition, foresight, etc.), you will become like them.

Now why did the Silbet man (in fact, one of our creators) act this way? Why was there a direct attempt to kill the people so laboriously created?

The fact is that from the very beginning, the reptilians of Selbet expressed dissatisfaction with the too small representation of their genes in the genotype of the hybrid being created. They, together with scientists Burkhad and Tumesout, worked on this problem for a very long time and hoped for a proportional distribution of genes. But the Burkhadians and Tumesoutians - as more ancient and more powerful civilizations - made a common decision to reduce reptilian genes to a minimum, since they considered some reptilian traits dangerous for the hybrid being created. Then Selbet asked to allow them to experiment on creating an intelligent creature based on earthly reptiles, the species of which were then numerous. But this was also

denied - our humanoid creators were convinced that two young and so different civilizations would not live on the same planet in peace and harmony, and would fight among themselves.

As a result of all this, a group of Selbet scientists, without informing the government of their planet, made an unauthorized decision to stage, so to speak, an accident. That is, secretly persuade the first earthlings to taste the poisonous fruit, and then present the consequences of this as disobedience to the creators. They probably hoped that such a death of our ancestors would allow the reptilians to put forward a convincing argument - the hybrids grossly disobeyed their creators and behaved so inappropriately because the proportions of their genes were incorrect. Therefore, in future experiments (which will have to start all over again), the percentage of reptilian genes should be significantly increased.

But that is not all…

As we have already said, the rational basis of every intelligent living being is the soul, which incarnates in this body, coming from the spiritual world. So - in the body of one of the scientists Selbet, in the body of a reptilian who took an active part in the “seduction” of the first people, the soul of the entity we know as Lucifer was embodied. This is what is meant when the Scriptures say that “the Devil took the form of a serpent.” Lucifer (meaning "Lightbringer") was indeed one of the very first higher beings created by that omnipotent intelligent force that we call God. However, using the law of free will, which applies to everyone, he decided to separate himself from the divine source. Now we will not delve into the reasons and consequences of this choice - this is the topic of a separate article. For now, it is important for us that this separation began precisely in one of the previous lives on the planet Selbet in the body of a reptilian - when the temptations of material embodiment (power and others) turned out to be “more convincing” for this spiritual personality than the primordial light.

So, let us repeat once again - in the “Garden of Eden” (on the earthly alien base) there was an attempt to kill newly created people by one of their creators. As you know, people succumbed to persuasion and tasted a fruit (or fruits) that was poisonous to them. According to the information given to us, not all of the 18 first people managed to do this, but only a few, and, probably, we know exactly two of them as Adam and Eve. Perhaps these were precisely those who were once

created first. In addition to the purely physical, material understanding of this whole situation, it also had a deep spiritual meaning. It turned out that Adam and Eve really “knew good and evil.” Firstly, they have obviously never encountered deception or negativity in any form before, that is, they have dealt only with “good”. Now, having decided to become “like the Gods” (having eaten a plant intended for the “Gods”), they fell into a trap skillfully set by Lucifer, who had departed from divinity, in the body of a reptilian of the Selbet civilization.

Secondly (and this is the main thing), with their decision they made essentially the same choice as Lucifer himself (who encouraged them to do this) - they chose not to follow the Light (the will of God, if you want), but the selfish aspiration to be the same, as God himself, while being separated from him. In Christianity this is usually called pride. Apparently, this was the spiritual plan of the incarnate Lucifer, who found such important allies.

Well, then what happened was what we would call today a rescue operation. The Old Testament says that Adam, having sinned, hid from God and did not answer his call. In fact, having tasted the fruit, which was poisonous to them, those who ate it found themselves in a state that we would now call a dying coma - the poisoning did not lead to instant death, several hours had to pass. Representatives of Tumisout and Burkhad found our poisoned ancestors in time and managed to cure (or reanimate) them. When they came to their senses, they, of course, told all the details of what happened. The truth has been revealed. The forces were unequal, so the Selbet criminals were isolated and everything was reported to their planet. The authorities of Selbet took away the potential killers, after which they were severely punished. As we managed to find out, they were forever separated from their families and exiled to a special planet of criminals located on the outskirts of the galaxy in the constellation Aries. There they spent the rest of their lives in toil, hardship and without hope of liberation. As you remember, one of these Selbetites was Lucifer incarnate. One can only imagine how this affected him - especially considering that concepts such as remorse or simply guilt were unlikely to have anything to do with him...

There is something else... In the context of this whole story, it would be logical to assume that some very high light souls were embodied in the bodies of one or many of our main (humanoid) creators - since Lucifer himself was among the Selbetites. This turned out to be the

case, but we will talk about this in the penultimate chapter of our article.

But what happened next to the people?

In principle, everything further is also described in the Bible, although, of course, again in terms suitable for Moses and his contemporaries. The Burkhadians and Tumisoutians decided to evict people outside the base to the earthly world. It was decided that since they once violated the ban and disobeyed, then anything could happen, including an attack on their creators using technologies available in, so to speak, “Paradise.” This “eviction” was the biblical “expulsion from Paradise.” Representatives of Burkhad and Tumesout, although they remained Gods for our distant ancestors, but no longer evoked the same love, trust and understanding. People were given the opportunity to live and develop independently. However, despite this, our creators, of course, did not leave people completely without their care. They conveyed to them information about the correct social order, about moral values, about God, about the spiritual world and much more. All this became the content of various chapters of the Old Testament, including the messages of the prophets, who were these contactees - conscious or unconscious. However, the biblical prophets already lived in the era of loss of knowledge that came after the cataclysms on the planet, which we will talk about in the next section.

EXPLANATION OF THE GLOBAL CATASTROPHE OF 12 THOUSAND. YEARS AGO, KNOWN TO US AS THE FLOOD

Over the next approximately 2 million years, human civilization on Earth actively developed with the support of our creators, who in many cases acted openly. It was during this huge historical - more precisely, prehistoric - period that the legendary earthly super-civilizations arose and reached perfection, fragmentary information about which has reached us (first of all, Lemuria and Atlantis, which represented the late stage of the development of Lemuria). This was the era of the heyday of earthly humanity, which was accompanied by grandiose achievements in all spheres, cyclopean structures on the planet (we know some of them as “Wonders of the World”), as well as an understanding of all the bright spiritual truths. This era is called in ancient Indian literature Satya Yuga - the era of Light. The Vedic texts that have come down to us from the ancient Hindus also talk about vimanas flying ships (even their diagrams are given), about medicine, which we are far from, about the structure of the atom, the structure

of the cosmos, and about many other things, later completely forgotten or rediscovered. About 200 thousand years ago, colonies of earthlings, with the help of alien technology, appeared on Venus and Mars, which at that time were suitable for protein life, being in different orbits relative to the Sun and having atmospheres comparable to the earth's. A more detailed description of this long and very eventful era represents, to put it mildly, a very large amount of information, which will certainly require completely different forms of presentation than this article. Therefore, here we will immediately move on to the event included in the title of this section.

If you look at materials on the Internet, you will find information that, based on completely scientific data, there is a hypothesis about some kind of extraordinary catastrophe on the planet that occurred approximately 12 thousand years ago. This, in particular, is confirmed by the found mass graves of different species of animals dating back to just the indicated period.

What happened then according to the information we received from aliens?

At that time, on the reptilian planet Selbet, already known to you, an extremist (as we would say) group came to power. Its representatives began to pursue a policy of aggressive denial of the values of the Interstellar Union, which still included their civilization. Obviously, the long history of people created contrary to the genetic wishes of Selbet scientists also haunted them. Eventually, Selbet started a war, which first took place in another part of the galaxy, far from the solar system. In our system, for a long time everything was still calm, people and aliens collaborated, communicated and, so to speak, carried out various joint projects. The aliens' main base in the solar system was located on the planet we know today as Phaethon, it was located between the orbits of Mars and Jupiter at a distance of approximately 2.8 astronomical units from the Sun. Another, more correct (original) name for this planet is Nubiru, and we know it under the name Phaethon, since this name was taken from Greek mythology, where it was used to name a mythical character who disobeyed the gods. There were also bases on other planets, including the Moon, which was in a separate planetary orbit, more distant from the Sun than Earth's. The center of earthly civilization and at the same time the central base of the Interstellar Union on Earth was a metropolis (let's call it that), located on a huge mountain in the place where the notorious Bermuda Triangle is now located. There was dry

land there then. 12 thousand years ago the population of the Earth and its colonies reached approximately 55 million people. Our planet was still dominated by an essentially heavenly climate, summer temperatures all year round, and there was practically no snow or ice anywhere. Such a life did not in any way imply the presence of any serious military structures capable of repelling external aggression. Apparently, this was what the Selbetites, who had become aggressive, were counting on when their military fleet completely unexpectedly invaded the Solar System. Movement on gravitational engines, which were already available then, makes it possible to almost instantly appear at a given point in space without preliminary physical signs of the ship moving to this point for an outside observer. Naturally, Selbet's fleet struck the first blow against Phaeton - in order to immediately destroy the main center of possible resistance. We were talking about the massive use of geophysical and at the same time space weapons, of which we (fortunately) have no trace. Apparently, nuclear weapons are simply “resting” in comparison. Based on what we have been told, this weapon is based on the same gravity and causes fast-moving irreversible cataclysms on a relatively small planet of such power that they very quickly lead to the disintegration of the planet into fragments. This is exactly what happened to Phaeton. Now in the area of this destroyed planet, the existence of which was suspected by a number of terrestrial astronomers, there is a known belt of asteroids of various sizes. These are its remains. All,those who were on Phaeton died. Immediately after this terrible blow, representatives of the Interstellar Union, located on ships in space and at other bases, quickly calculated the entire situation with the attack on Phaeton and realized what was happening. It became clear that Selbet's next targets would be the Earth (as the cradle of humanity), as well as Mars, Venus and the Moon. It must be borne in mind that we are not talking about some long time here - everything happened in minutes and even seconds of earthly time. Naturally, a call for urgent military assistance was immediately sent from the Solar System to the MS. For communication, aliens do not use low-speed radio waves, but completely different means (the so-called gluon communication), which actually convey information almost instantly. However, it was still necessary to send warships to us capable of stopping the aggressors. Therefore, the unarmed ships of Burkhad and Tumesout, located in space near us, essentially sacrificing themselves, tried to disrupt Selbet’s plans or at least gain time until the battle fleet of the Interstellar Union appeared. I’ll make a special reservation at this point - I perfectly understand that many of those reading this chapter have already drawn an analogy with “Star Wars” and are ready to treat everything exclusively as science fiction. I ask you to understand

that, firstly, it is impossible to come up with anything from scratch, including Star Wars and any other “fiction”, “fairy tales”, “myths” and “legends”, and secondly - please consider all information in this article as a single whole - without tearing out fragments from the overall context.and any other “fiction”, “fairy tales”, “myths” and “legends”, and secondly - please consider all the information in this article as a whole - without taking fragments out of the overall integral context.and any other “fiction”, “fairy tales”, “myths” and “legends”, and secondly - please consider all the information in this article as a whole - without taking fragments out of the overall integral context.

Let's continue. In parallel with the confrontation in space, our creators did everything possible to save earthlings - both on our planet, and on Mars, and on Venus. From Venus, almost all the colonists managed to be evacuated to lunar bases and alien ships before the Silbet weapons were used on it. On Mars, unfortunately, almost everyone died. Since they could only destroy a small planet using the method described above, other types of weapons were used on Mars, Venus and Earth. So, on Mars, the Selbet weapons caused a collapse of the atmosphere; in fact, cities and bases on the surface were swept away from the planet along with the atmospheric shell. However, their traces can still be found in the region of one of the polar caps of Mars. However, Selbet’s initial plan to destroy everyone on all planets at once was thwarted, as far as we were able to understand, for two reasons - Selbet’s people did not expect that unarmed ships would resist them, taking the blow themselves, and in addition, they underestimated Burkhad’s capabilities and Tumesouta. In the Solar System, already about 1 Earth hour after the strike on Phaeton, the first warship appeared, called for help, and this gave a chance to save some of the people - although this ship itself was soon destroyed by the superior forces of Selbet. However, Selbet still managed to deliver a massive blow to the Earth. These were geophysical weapons, which were bombs that were launched from space. They looked like huge white balls falling onto the planet, connecting with the earth's core and causing a number of global cataclysms - from unprecedented floods to massive volcanic eruptions. The power of this weapon was such that the single earthly continent split. Tectonic plates diverged, Africa and South America were formed from a single continent, as well as other parts of the land, many islands, and so on. Other types of alien weapons were also used, which caused the effect of fiery rain and other phenomena on the surface that could destroy all living things. One of the first terrible blows was deliberately struck against the mentioned capital of earthly civilization on the site of the current Bermuda Triangle. As a result, not only a deep depression was formed

there, then filled with sea water, but also a serious interdimensional portal to plasmoid worlds, which is the cause of the massive anomalous phenomena observed in this area. This portal arose, in particular, due to the fact that a very large number of earthlings and aliens from different civilizations died here at the same time.

I hope that behind the dry lines of the article you realize the scale and tragedy of this entire planetary catastrophe... But everything was even more serious. The Selbetites, with the help of the gravitational field of their ships, shifted the Earth's orbit, and it began to move away from the Sun. The climate on the planet began to change sharply, what we now call winter appeared, snow began to fall... And most importantly, the Earth's orbit approached the orbit of the Moon, which, as already mentioned, was a separate planet at that time. This was the goal - to collide the Earth with the Moon, completely destroying both planets. At some point, the Moon found itself at a distance from the Earth 4 times smaller than it is now. Naturally, giant tidal waves arose (before this there were no ebbs and flows at all), as well as other disturbances in the atmosphere and, in general, the same Great Flood or a whole series of floods occurred. The Burkhadians and Tumesoutians tried to save as many earthlings as possible on their ships, taking them to extraterrestrial bases and other planets. The same thing happened with samples of the earth's flora and fauna. Representatives of earthlings themselves helped save people and the gene pool of the planet by organizing an emergency evacuation of the population and animals on alien ships. This is reflected in the story of Noah and his ark. Noah, obviously, was one of these earthlings, and at the same time, this is a collective image of all such rescuers.

At the same time, the spaceships of Burhad and Tumesout, opposing Selbet, jointly managed to create a gravitational field that stopped the approach of the Earth and the Moon. They were able to install the Earth in a new – current – orbit, and the Earth captured the Moon with its gravity, "making" it a satellite. After additional adjustments, our space situation became the current one. It is the artificial rapprochement of the Earth and the Moon with the subsequent "capture" of the Moon by our celestial body, and subsequent artificial adjustments of the orbits that explains why the Moon is always turned to us on the same side.

According to the information transmitted, after the use of weapons from space, there were also cases of armed Selbet troops landing on the surface of the Earth for the purpose of, so to speak, cleansing.

These were not massive operations, but on the surface there were also open clashes between Silbet and our other creators. We don't know the details yet.

Thus, a global war occurred in the Solar System and directly on Earth, which essentially changed the appearance of our part of the Solar System, not to mention the Earth. This was the “War of the Gods”, which has come down to us in various ancient legends and fairy tales. Ultimately, the forces of the Interstellar Union, at the cost of heavy losses, managed to cope with Selbet, who was aggressive at that time. The civilization of this planet was isolated and excluded from the Interstellar Union, as it later turned out, for 250 Earth years. From the moment of the first strike on Phaeton until the complete cessation of hostilities, approximately 130 years passed. However, the most active phase of the war with attacks on planets from space lasted only a few Earth days. On Earth and other planets, approximately 10 thousand earthlings out of the mentioned 55 million were saved. People died directly from the use of terrible weapons, and from the cataclysms they caused, and from the consequences of sudden climate change, for which they were completely unprepared. Together with earthlings, a total of approximately 20 thousand friendly aliens died on the planet and in the solar system. Selbet's losses amounted to approximately 5 thousand - since the Selbet men were on well-protected warships and did not fall victim to an unexpected attack. Ancient civilizations with all their achievements were literally wiped off the face of the Earth. Among them is the legendary Atlantis, the approximate dating of the destruction of which exactly coincides with the time given by Plato in his famous dialogues.

After several decades - after the catastrophic processes on Earth had calmed down somewhat - the surviving earthlings were returned to the planet. Some of our ancestors were taken to the distant planet Disara, the location of which is also known. There now exists a highly developed civilization that has joined the Interstellar Union. Outwardly, its representatives are practically no different from us.

After several hundred years, the situation on Selbet changed. The extremists lost power, and the reptilian civilization, at their request, was readmitted to the Interstellar Union. The Selbetites admitted their war against other civilizations was a mistake. Currently, Selbet reptilians are active participants in many studies conducted by the Interstellar Union. At the official level, they treat earthlings with respect and friendliness, including the astral contact of Irina

Podzorova with the reptilian scientist Selbet. Among ordinary Selbet residents, as we understand, the attitude may be ambiguous, but in any case, there has been no aggression towards the Earth on the part of Selbet for a long time. They currently do not have their own bases on our planet (unlike several other civilizations). Military actions with Selbet in our part of space received a special name in the galaxy - in the Interstellar Union these events are called “The War of Selbet with the colonies of Burkhad in the Solar System.”

As for the Earth, here, several hundred years after the war, a group of people made an attempt to reach their creators on the Moon by building a spaceship using nuclear fuel, the secrets of which had been known since pre-war times and passed on from generation to generation . The ship they built was imperfect, dangerous for earthlings and for the ecology of the planet, so our older star brothers decided to intervene and explain to people that the time for flying into the sky had not yet come, and there was still a lot of unknown on their native Earth. This is exactly what the myth of the Tower of Babel, transmitted to Moses, tells about. The aliens argued that people must first populate the Earth, learn to build cities, begin to make perfect ships themselves, and most importantly, live in peace and harmony among themselves, and only then will they acquire the right to explore the Universe on spaceships in cooperation with their creators. People agreed with the fairness of these proposals and asked those whom they considered Gods to help them explore the greatly changed planet and arrange life on it. Leading psychologists and physiologists of the Interstellar Union decided to create several different ones from the previously single race of earthlings - with the goal, on the one hand, of adapting them to the climate that had become different in different parts of the globe, and on the other, to begin the fight against xenophobia as the main obstacle to joining the Interstellar Union. A union for many young races. Thus, through small artificial genetic mutations, four main races were created from the formerly single race of earthlings, from the mixture of which, in turn, the modern peoples gradually emerged.

After all the described events on Earth, but somewhat later, our era began, the history of which has partially reached us in a more or less distorted form. It was already a completely different era on, in fact, another planet - the planet that we know now. We humans, on a subconscious level, no longer trusted aliens as before, having absorbed all the horror of what happened. Fear gradually became one of our main feelings, which largely eclipsed love. Not just specific fear, but

fear as a general concept and general motivation for actions. All this was one of the reasons why open contacts with aliens gradually ceased, giving way to their communication with individual contactees who matched them in their vibrations - vibrations, first of all, that did not contain fear.

WHERE ALL RELIGIONS COME FROM.

WHAT IS GOD IN THE UNDERSTANDING OF ALIENS.

THE TRUE MEANING OF JESUS CHRIST'S MISSION.

Most likely, you have already understood that religions came to us from our creators - the alien civilizations of the Interstellar Union of our galaxy, who were for us those very Gods without any quotes, who created us from their genes (in the image and likeness...), and then , so to speak, have been curated for millions of years.

Judaism (the Torah, on the basis of the historical part of which the biblical Old Testament was then created), Christianity (the Gospel or New Testament), Islam (the Koran) and Buddhism (this is more of a philosophy than a religion) were transmitted to specific representatives of humanity at different times, taking into account the specifics of this given time, the characteristics of this given people with their traditions and beliefs at that time, as well as the specific situation on the planet as a whole. Therefore, all spiritual teachings, although somewhat different from each other, however, in essence, at their origins speak about the same truths in different words. In addition, each subsequent teaching (for example, in the chain of Judaism-Christianity-Islam) is, as it were, an update of the previous one, not denying, but transforming past truths, taking into account the new stage of development of society and new socio-cultural conditions when transmitting the updated teaching.

All the enmity of their followers among themselves is caused not by differences in basic postulates, but (intentionally or not), but still introduced distortions, fragments that were taken out of linguistic or historical context - as a rule, in order to serve certain, not very spiritual the goals of different groups of representatives of these movements.

SO WHAT IS GOD, ACCORDING TO ALIENS? They consider God our

common Creator of all things, the Creator, who created from himself all souls, and then all worlds, including the spiritual and later the material. We will now try to describe all this very, very briefly and in as simple to understand words as possible.

All souls were created instantly and forever. This really happened at a certain moment, but time itself did not exist then, so we can assume that you and I have always been in time (which appeared later) - just like God himself. That is, despite this specific, yet timeless moment of creation, each of us has always been and always will be. This is the real “always in both directions” - without any reservations. Moreover, the soul cannot be destroyed or dispersed under any conditions - otherwise the same could be done with God, since each rational soul is his full-fledged manifestation, which is connected with him into a single whole. The Creator (Absolute, God, Supreme Mind, etc.) develops (if such a term is even appropriate here) cyclically. In Hinduism, these cycles are figuratively called the Day of Brahma and the Night of Brahma, hinting at the manifested and unmanifested state of all things. At the end of the manifested state (also called Kalpa in the Indian Vedas), everything that exists in all worlds returns to its unmanifested form - there is nothing, but this “nothing” exists in its potential and can manifest itself again. At the end of the unmanifested part of the cycle (also called Pralaya), an impulse arises, which then leads to the manifestation of all things. Speaking figuratively and again in the most simplified way possible, this can be considered the first “thought” of the awakened Almighty (Absolute, God, Logos, etc.). Our eternal intelligent souls, however, do not completely disappear when everything dissolves - they also remain in a state fused with the Absolute, in order to then manifest and take their places exactly at the level where they completed development in the previous manifested cycle.

All this is described in more detail in the works of Helena Blavatsky, as well as directly in the Vedas.

According to the Interstellar Union, the global manifest cycle of the Universe (Maha-Kalpa) lasts approximately 125 billion years (recall that according to scientific data, the Earth is about 6 billion years). But there are also sub-cycles that are parts of the global cycle, after each of them there is only a partial dissolution of the Universe. The duration of the global unmanifested cycle (Maha-Pralaya) cannot be assessed in time, because the scale for assessment itself disappears - the concept of time no longer exists. That is, it can be either a second

or billions of years. These cycles replace each other forever, they have neither beginning nor end - although our limited mortal mind (namely the mind, not the soul) is not able to comprehend this, logic does not work here.

Now that we, albeit at the most simplified level, have dealt with the cycles of the Universe, let's return to our topics. However, here I want to immediately warn you all additionally - now there will be information that will certainly come into conflict with the dogmatic stereotypes of many believers.

So, the special status of the soul known to us under the name Jesus Christ is associated with the fact that this soul was born by God (the Absolute, the Most High, the Creator, God the Father, Logos...) the very first, that is, before all other souls. This was, as it were, the very first mental impulse of the Creator. It is possible that we are talking here not only about the beginning of the current cycle of the manifested Universe, but also about some timeless beginning beyond all cycles. This is all that can be said here in words - that is, from the level of logic. Then, at one moment, all the other souls were created, including you and me. However, it is this first soul that is unique - since it was precisely the first creative impulse of the Almighty, who, because of such primacy, has a special, so to speak, primordial status of closeness to the Creator. One can say – a greater degree of affinity with the Creator than all other souls. An important note: this does not mean that other spiritual movements not associated with Jesus are somehow worse than Christianity. Each of them has its own founder with his own very high goals, who also came from the highest divine (spiritual level) - see the link to the article about levels above. But the soul of Jesus was still the very first soul created.

At the same time, one of the very strong (so to speak) souls who were at one of the highest levels of development accessible to us (above which for us "from here" everything merges into divine infinity) was the notorious son of the same one God, Lucifer , who, from time immemorial in our manifested cycle, made the choice known to us to separate from the Creator.

Now attention.

At the very base-paradise where the first people were created and where Lucifer, embodied in the reptilian scientist Selbet, was, Jesus

was there! HOWEVER, Jesus, as it turned out, was there (unlike Lucifer) not in the physical, but in the astral body. That is, he seemed to be present at all events invisibly, perhaps (but this is still only an assumption) - and personifying the very Holy Spirit spoken of in the Bible. But that's not all. Many scientists from the planets of our creators lived on the base-paradise. So, one of these scientists, representing Burkhad, was that incarnate spirit, whom (or which) we now know under the name of Mary - the Virgin Mary, the physical mother of Jesus Christ from the Gospel... This scientist (Mary in the physical body of the Burkhad) accepted active participation in the creation of the first people based on genetic experiments. And next to him (or her) - in the astral body - Jesus constantly resided. This, in many ways (according to representatives of the Interstellar Union), could be the reason for all his further actions on Earth, as well as for that sacrifice of the highest level for the sake of people (we are not talking about crucifixion here), which will be discussed below.

After the “expulsion” of people from the territory of the paradise base, Jesus decided to incarnate at a certain moment in the human body - since this path was the best for helping people in their spiritual development. However, the level of energies (vibrations) of this highest spiritual personality was so powerful that none of the peoples, none of the emerging cultures of rapidly developing humanity could provide the energy (let's call them that) conditions necessary for such an incarnation. Therefore, while on the spiritual plane between physical lives, Jesus developed a grand plan. Here we must keep in mind that at its spiritual level, in fact, complete merging with the Almighty occurs, when the soul does not separate itself from God in all its manifestations. Thus, this plan can safely be considered divine. This plan included forming a special nationality on Earth, possessing a culture, religious beliefs, knowledge (and therefore collective energy) capable of realizing its physical embodiment. This was the Jewish people. All further “miracles” described in the Old Testament (i.e., the Torah) occurred with his direct participation or under his leadership. It was he, embodied in the omnipotent representative of civilization (and the planet) Tumesout Yahweh, who appeared to Moses, for whom, taking into account the perception system of this contactee, the effect of the famous “burning bush” was created. That is, he was the very “God Yahweh”... It was he who then led the Jews out of Egypt, choosing Moses as his contactee. All the so-called “Egyptian plagues”, the division of the waters of the Red Sea and other Old Testament miracles were performed on the basis of alien technologies for controlling the elements, flora and fauna of the planet. If we consider that the age of the civilizations that created us is an order of

magnitude greater than ours (tens of millions of years), then this is quite understandable, although no less surprising than the capabilities of the weapons described in this article above. The Egyptian priests could not resist these technologies, because their “patrons” were the so-called plasmoid civilizations (“spirits of nature”), located at vibrational levels lower than Yahweh (Jesus).

In this context, it becomes clear who, why and how transmitted the tablets with the commandments to Moses, selected by vibrations (an alien ship, surrounded by a cloud of plasma, actually hovered over Mount Sinai, as some esotericists suggest); what was manna from heaven (a balanced nutrient mixture of artificial origin that was sprayed from ships over the Jewish camp at night); what the Ark of the Covenant was (a generator of high-frequency radiation, serving for various purposes and made by the Jews using the technology exactly transmitted to Moses) and so on. Let’s make a reservation right away - all this is not at all an attempt to explain “divine miracles” in a technological way. For you and me (not to mention the peoples of antiquity), these miracles are actually just that – divine, because they were truly revealed by our “creator gods” for our salvation and development. There really was a divine will in this from the highest levels and, it is quite likely that spiritual luminous beings - angels - who partially or completely materialized their subtle bodies actually took part in all this. Let us add one more detail, despite the fact that it may further shock supporters of orthodox Christianity. The wife of the Tumesoutian Yahweh was Mary, the future Mother of God, embodied in the body of a woman on the planet Tumesout... She was even on Earth for some time, but then flew away to Tumesout. Sorry, I don’t want to offend anyone’s beliefs, but I am writing what was handed down to us and of which I am confident for many reasons.

Thus, the entire history of the Jewish people, starting from Abraham, Isaac and Jacob, was the history of the creation of an ethnic egregor, designed at a certain moment to ensure the physical embodiment on Earth of the highest spiritual essence - the “first Son” of the Most High, whom we know under the name Yeshua or Jesus. It is not surprising, dear readers, that the above is rejected by both adherents of Christianity and convinced materialists - although for completely different reasons. The former defend the dogmas to which they are accustomed, so they declare the information they receive to be heresy; the latter are, in principle, not satisfied with explanations of our history linked to spirituality and spiritual personalities - no matter how convincing they may be. So for atheists, this is a “fiction” aimed

(on the contrary!) at promoting “dying Christianity.” You should put a smiley face here. My personal conclusion is that the truth always does not suit radicals from opposite sides, but for diametrically opposed reasons. This is one of the “litmus tests” of truth – especially Truth.

BUT WHAT HAPPENED NEXT IN JESUS' PLAN, AND WHAT REALLY WAS HIS SACRIFICE?

Having prepared the cultural and energetic egregor of the Jewish people, he was born to a woman whom we know as the Virgin Mary or the Mother of God - around the time indicated in the Gospel. The conception was indeed “immaculate,” but it was not a dove that took part in this, the dove is an image. Maria, with her consent, was taken onto Burkhad's ship. What happened there was what today we would call an artificial insemination procedure based on genetic material taken from a representative of Burhad, whose soul came from a very high spiritual level. After the birth of Jesus, events took place that were, in general, correctly described later by his disciples - the future apostles. Jesus indeed, as many are convinced, traveled to a variety of countries (including India, as well as the territory of present-day Russia), learning there from the sages, and, perhaps, teaching them, but he did this not with caravans, but on his alien ship Burkhad physical father - that is, the movement was very fast. Unlike you and me, when he became incarnate, he remembered almost everything about himself, without losing touch with our Heavenly Father.

The meaning of his whole life was to bring a new teaching - more precisely, an update of the knowledge given by him (when incarnated as Yahweh as a resident of Tumesout) to Moses on Mount Sinai. This renewal was necessary because the goals of the previously transmitted spiritual teaching had already been fulfilled - among the enemy environment, a Jewish people was created who knew the highest truths inaccessible to others and therefore had the opportunity to bring the Messiah whom they had been waiting for. A Messiah who already carries higher truths than the ideology of “an eye for an eye,” which is really necessary at the beginning to create a separate national egregor, energetically different from others.

Here, apparently, is the time to make a retreat from the earthly life of Jesus and answer in more detail the logical question - why is there so much seemingly cruelty, punishment, death, and so on in the Old Testament? God prohibits, frightens and punishes all the time. Where is the love fully demonstrated in the New Testament (Gospel)? The

fact is that, as you remember, the entire history of the Jewish people connected with the transmission of the Torah took place after the terrible war with Selbet, which, among other things, left a genetic imprint on all people. Obviously, after this brutal war that destroyed most of humanity, the activation of Selbet genes occurred in our ancestors, carrying within them the struggle for survival at any cost, and distrust of our creators who allowed the “War of the Gods”, and the already mentioned fear and disobedience these same gods or God. In addition (and this is important!), before the war, during the Age of Light - (in Sanskrit Satya Yuga) - our gene code lacked genes responsible for the production of enzymes in the body that are necessary for the digestion of protein products of animal origin - meat, fish and so on. This was due, on the one hand, to the fact that the key “suppliers” of our genes - representatives of Burkhad and terrestrial primates - also do not have such enzymes. On the other hand, on the flourishing “paradise” planet of that time, we had no need for animal protein. That is why before the war 12 thousand years ago we were indeed complete vegetarians, as the Indian Vedas claim! However, after the Earth found itself in an orbit more distant from the Sun (which led to the appearance of the cold season, as well as a change in the energy of the planet as a whole), plant food became insufficient for human survival. Therefore, the creator civilizations changed our gene code, adding 5% of the genes of the Tumesout people, who also consume animal proteins. Accordingly, the share of genes of highly spiritual representatives of Burkhad was forced to be reduced. But thanks to this, we developed digestive enzymes, which made us omnivores! At the same time, due to this change in the gene code, as well as energy and climate changes on the planet, the height of people decreased from 3-4 meters (before the war) to 1.5-2 m (shortly after this 130-year war).

Vedic knowledge about vegetarianism, transmitted even before the war to the rishis (ancient Indian sages - contactees with plasmoid civilizations), could not take into account the situation after the war - simply because this war happened much later. This explanation gives a clear understanding of the whole situation around the debate between vegetarians and meat eaters - the truth is again “in the middle”. In addition, the souls of animals, according to the information we have received, are fundamentally different from rational souls - you and me. They are not immortal, although they can be reincarnated - also in animals and for a limited number of lives. But the main thing is different. The souls of animals created and are creating those very plasmoids! That is, intelligent subtle-material entities whose civilizations transmitted Vedic knowledge. They have

their own specific views on the material world and physical embodiment in it, which they consider only an erroneous distance from God. (In contrast to the civilizations of the Interstellar Union, which regard incarnations in physical bodies as the most important part of understanding the Universe, but most importantly, as a unique opportunity for the development of the soul). Plasmoids consider the animal souls they created to be their “children” and, naturally, by all means they convinced and are convincing earthly contactees not to touch animals, not to eat them, and so on. In many cases this is completely justified, but, as we now understand, it has a specific reason, which is not always associated with the inevitable “lowering of spiritual vibrations due to eating meat.” As for, for example, the prohibition in both the Torah and the Koran on the consumption of pork, here everything is still more pragmatic - pigs are carriers of the severe parasitic disease trichinosis, caused by small roundworms Trichinella. They can only be destroyed by heat treating (cooking) the meat for many hours. Neither the ancient Jews, nor much later the Arabs could have done this under their living conditions. This is why pork was strictly prohibited to prevent infection. Too frequent consumption of coarse meat products, however, can really cause harm on a variety of levels - that is why in Christianity and Islam there is a system of cleansing fasts, “tied” to the specifics of a given people and culture. In addition, as is known, in Judaism and Islam there are also systems of rituals that cleanse the food itself (especially meat) from various kinds of negativity (kosher and halal, respectively).

As far as I understand, it was precisely in order to rebuild the spiritual teaching that was new in the time of Moses from the “pagan” traditions coming from plasmoids and associated with the veneration of animals (it was not for nothing that the Jews made the notorious Golden Calf and worshiped it in the absence of Moses, causing his anger and forcing the tablets to be broken), and the entire system of animal sacrifices to the god Yahweh was introduced. At the same time, the killing of living beings associated with eating meat really coarsens the consciousness. This is another reason that explains the much harsher approach in the spiritual instructions given to people at that time - as well as the very harsh consequences of disobedience. And one last thing. It was after the war, due to a decrease in the spiritual vibrations of people, that microorganisms that were previously “responsible” for the utilization of dead biomass (decomposition into constituent elements) mutated, giving rise to colonies of modern pathogenic bacteria and viruses. Well, all the additional tools for implementing this principle “like attracts like” have, of course, been found in the Universe.

If we summarize all this, it becomes clearer why in “post-flood” times (after war and cataclysms) such a very harsh teaching was needed, conveying high truths in precisely this form, which is not always pleasant to us now. In a different, more “humanistic” way, it was simply impossible to form in those days the egregor of the Jewish people, called later to accept the incarnate Jesus. It was a spiritual teaching, relevant in exactly this form in the era of loss of knowledge, loss of light that followed the war - Kali Yuga, the beginning of which dates back to the Bhagavad Gita with the arrival of Krishna (about 5 thousand years ago). According to the Interstellar Union, Krishna was the incarnation on Earth of a soul who is the coordinator of our galaxy, a soul located on a very high spiritual level, and therefore truly perceived (by both us and ourselves) as the “Supreme Personality of Godhead,” as the Bhagavad Gita says. Well, later, 3 thousand years after that - during the time of Jesus - much of what was necessary before lost its relevance and required, at a minimum, updating.

Now let's talk about the antagonism on the part of the Jewish sages, and indeed the majority of the “chosen by God” (that is, in fact, precisely by Jesus!) of the Jewish people towards Jesus himself. At the same time with great opportunities, as always happens, this people had (and still has) a high responsibility to humanity, which implies, first of all, any chosenness. As we know, the Jews ultimately could not believe in the divinity of Jesus, despite his wisdom from a very young age, which the Jewish sages - those same scribes and Pharisees, so called in the New Testament for their dogmatic attitude - could not deny. adherence to the outdated norms of the old teaching. Jesus did not hide from them the path of his soul and the specifics of his mission, directly saying that he was the very “God Yahweh” - especially since the Jews had a complete understanding of reincarnation, which in Judaism is called the term “gilgul”. But the Jews for the most part did not believe that there was a Mission (Moshiach) before them, because they expected something completely different from their Savior - not a call to love even in response to evil, but an uprising, a way out of Roman slavery through his power and miracles, followed by complete restoration of the destroyed Jerusalem Temple.

It was with these expectations, as it turned out, that the betrayal of

Judas Iscariot was connected. Judas actually offered to reveal the location of the Teacher to the Romans and received his 30 pieces of silver for this. However, he had a very clear motive, and he did not at all want Jesus to die. Judas also sincerely hoped that the Teacher, who before his eyes had repeatedly performed miracles, would restore justice and sweep away the hated pagan Roman ego. But this did not happen for too long. Then Judas decided to take extreme measures. He was convinced that, under the threat of terrible torture and death, his beloved Teacher would finally be forced to show everyone his strength - instead of preaching about “turning one cheek instead of the other.” When this did not happen, Judas could not understand that the Teacher and his teaching were an inseparable whole, and therefore Jesus could not break any of the commandments he proclaimed. Unlike the Teacher, Judas violated this teaching - but not by betraying Jesus, but by the fact that instead of sincere deepest repentance for what he had done and the same request to God for forgiveness, he only found the strength to return the money and commit suicide, by sending this (primarily this, and not the betrayal of Jesus!) his soul to the low levels of the spiritual world.

Of course, both Jesus himself and his, so to speak, “support group” from Burkhad, if desired, could easily prevent terrible suffering and death on the cross. But no one could go against the divine plan, in the “development” of which he himself took part (so to speak). The full significance of this martyrdom is beyond the scope of this article, so here we will only say that it was the Burkhadians, having lulled the guards, who took the body of Jesus onto their ship at night, and then the most important thing happened in this whole story - and not only in this one.

During the time that passed between physical death and coming to the future apostles, Jesus, being in the spiritual world, made the very choice that is his supreme sacrifice. More precisely, it was timeless, because everything happened in the spiritual world, where there is no time. Possessing essentially divine powers, Jesus completely erased information about physical death as such from the DNA of his body. This is what led to the fact that the body was not only restored on the material level, but was also able to once again become the container of his soul - that is, a real resurrection from the dead occurred. However, this process is absolutely irreversible; Jesus can never again die in this body physically - “by his own death”, if we mean old age or illness. Precisely never, if by never we mean the manifested part of the development cycle of the Universe, which, as we know, takes many

tens of billions of years. By doing this, Jesus deprived himself of the possibility of permanent presence in the spiritual world, as well as the possibility of physical embodiment in the infinite number of manifested worlds of the Universe, where conditions, to put it mildly, are much more pleasant than in our physical reality. In fact, he consciously tied himself to our material world.

BUT WHY DID HE DO THIS?

It turns out that only by being in our physical world in a material body can one maintain such a level of connection with one's spiritual egregor (Christianity), in which, through the rite of communion, Jesus can unite with everyone who truly believes in him. And not just to connect energetically - but to take on and dissolve all the negativity of this believer, that is, all that we call sins. This is how Jesus cleanses our world, leading it to the Light. This has nothing to do with "propaganda of Christianity" and "religiosity" in the abstract sense, being a completely clear energy technique. But this works - once again - only if the believer sincerely, and not formally, accepts the teachings of Jesus and his very personality. Through each communicant, Jesus uplifts humanity in this unique way, preparing it for the planned event discussed in the last section of the article. At the same time, connecting with the negative energy of everyone who undergoes the rite of communion, Jesus experiences (to put it mildly) spiritual and energetic discomfort, which can be understood from our level of perception as suffering. This is what is meant when Christianity says that we continue to crucify Jesus with our sins. As we were told through Irina, his spiritual Mentors, located at levels of the spiritual world that are beyond us, tried to dissuade him from this exceptional, unique sacrifice for the Universe. Jesus' mentors told him so - they have already crucified and killed you, and now they will crucify and kill you constantly with their sins... But Jesus still made his sacrificial choice for us. We were also told that many in the Galaxy do not understand why he did this in relation to our planet. One of the explanations is that he stood at the origins of our creation; for him, we are like his children. The second explanation is obviously deeper - he has his own special plan for humanity. We will also talk about this plan at the end of the article.

Now Jesus is in a physical body on the planet Burkhad - the capital of the Interstellar Union, that is, in the homeland of his physical father. We can hardly imagine the level of vibrations and capabilities of his body. A special artificial island with an area of approximately 20

square kilometers, surrounded by a huge body of water, was created for Jesus. There, Jesus receives selected disciples from different parts of the Universe, being in constant communication with our Creator and in constant energetic contact with the spiritual egregor he created on Earth, supporting and guiding it. Such voluntary isolation is caused by the fact that even the highest vibrations of the inhabitants of Burhad contrast too much with the spiritual level of Jesus and, being among them, he would experience constant strong discomfort, feeling, and therefore dissolving (or burning, as you prefer) all the negative manifestations of them vibrations

To leave the physical body, Jesus would now have to either be killed by someone or take his own life - the latter would lead to a fall into the very low vibration levels of the spiritual world. But, if someone in the Universe even dared to try to kill him (which is hardly imaginable), then this could only happen with his consent and with complete inaction - given his divine capabilities. So that would also be suicide, which Jesus, of course, would never agree to.

Now a few words about the temptation of Jesus in the desert by Lucifer. To the corresponding question we were told that this temptation took place in the astral world. If Jesus had worshiped Lucifer, tempted by the power over the world that he offered him in exchange for abandoning his plan, then this would have been worshiping the idea of \u200b\u200bdeparture from divinity, the idea of \u200b\u200bseparation from the Supreme Creator, which Lucifer himself realized. Then Jesus would have become the same as Lucifer and, as the firstborn son of God, most likely would have received power over Lucifer himself - that is, in fact, would have taken his place. But Jesus chose first physical suffering and death over this tempting kingdom over the material world, and then the eternal sacrifice for all of us, which was discussed above.

AND AT THE CONCLUSION OF THE SECTION – BRIEFLY ABOUT OTHER SPIRITUAL TRADITIONS.

We have already found out about the sources of Hinduism and Judaism. Now about Islam and Buddhism. Prophet Muhammad was a physical contactee of the planet Tumesout (like Moses). The teaching that was passed on to him was aimed at the formation of a single spiritual-national egregor from disunited Arab tribes that were actively at war with each other. Anyone who finds the time and desire to look at least at Wikipedia (not to mention the Quran itself) will

easily be convinced that the basis of this knowledge is the same biblical truths, not much different, in fact, from those transmitted earlier, but adapted and updated taking into account the new time (several centuries after the birth of Jesus), as well as the specific geographical and historical situation around the Arab world at that time. At the same time, Muslims worship the Kaaba - a sacred building with a sacred stone inside, which, they believe, was recreated after the flood by the same progenitor of the Jewish people, the prophet Abraham (Ibrahim). At the same time, Islam fully recognizes the existence of the Virgin Mary (Miriam) as the mother of Jesus and Jesus himself as one of the great prophets (Issa). At the same time, Muhammad made, so to speak, certain “creative changes” (let’s call them that) to the transmitted teachings, some of which were then, as always happens, used by religious fanatics from Islam to realize their own goals. We will not develop this topic further here.

Prophet Muhammad actually made a night journey (Mi'raj) to Jerusalem, as described in the verses (verses) of the Qur'an's Surah Al-Najm. In Jerusalem he actually met Abraham (Ibrahim), Moses (Musa) and Jesus (Issa). It was an astral journey - without moving the physical body, and everything happened in the astral world.

Currently, Muhammad incarnated has already left the incarnation in which he recently stayed on one of the planets outside our Galaxy, and is in the Spiritual world, still supporting the spiritual egregor he created on Earth. As creators of spiritual egregors, Jesus and Muhammad are in contact with each other on a spiritual level.

Guatama Buddha was the embodiment of a spiritual personality (soul) from one of the highest (accessible to our understanding) spiritual levels. Buddhism conveyed and conveys a certain view of divinity, more characteristic of plasmoid civilizations, prone to a non-personal perception of the Creator (which is also part of the Truth). Now Buddha is in the spiritual world, from where he also supports his egregor.

OBJECTIVES OF ALIENS – WHY THEY NEED CONTACT WITH US AND THIS TRANSFER OF INFORMATION.

The main goal of our creators is to raise the consciousness of people to a level that will allow our civilization to enter the Interstellar Union.

To do this, a number of conditions must be met, including:

- cessation of all military conflicts on the planet, absence of any military action for at least five Earth years

- a complete rejection of the death penalty for crimes, which only harms all participants in this situation on a spiritual level and is, in fact, simply revenge with a lack of understanding that the entire society as a whole is responsible for what was done

- refusal of abortion - first of all, because they do not take into account the plans of souls coming for incarnation from various spiritual levels and who have been waiting for their turn for incarnation for a long time

- respect and care for our Planet and everything connected with it, the gradual restoration of all the disharmony in this area that we have already allowed

- full respect for the opinions of all people, freedom of speech and opinion

- the will of a clear majority of the capable population of the planet (at least 70%), expressed in a universal vote.

These conditions are the main ones.

We are expected in the Interstellar Union - as full partners and assistants, so that we can then together explore our amazing, infinitely diverse Universe in which we live together with our alien friends and creators. The Universe, consisting of the physical (material), astral and spiritual worlds, through the experience of being in which rational souls develop to the highest divine levels. This applies to both the souls of earthlings and the souls of aliens - especially since we and they can incarnate on different planets of the physical world, as well as in the bodies of thin-material plasmoids. In this sense, there is absolutely no difference between us. That is, in the next life, any of us can incarnate on one of the planets distant from Earth, and vice versa.

Highly developed alien civilizations (Tumesout, Burkhad and Selbet) created earthly people as hybrids designed to combine the best

features of the representatives of these planets. Now our ancient parents, who gave us the basic spiritual teachings, are ready to accept us, so to speak, into the “bosom of the star family.” After this, we will be able to receive all their accumulated knowledge, technologies, experience in treating diseases and rejuvenation, and much more. Joining the Interstellar Union (which, let me remind you, currently includes 116 civilizations of our galaxy, out of a total number of 727 in it) presupposes full-fledged mass contact with us and the opportunity to freely visit all these planets. However, all this cannot be revealed to us as long as the spiritual level of our civilization is so low that it could very quickly reduce the use of most of this knowledge for military or other aggressive purposes aimed at destruction rather than creation.

Vivid evidence of this approach of ours is the repeated aggressive actions of the military of different countries, which led to the accidents of unprotected (usually tourist) alien ships, as well as to the death or capture of pilots or innocent passengers. We know the exact dates of such events, all the details, and we also know the approximate locations of the secret bases where the downed or fallen alien ships were secretly delivered. According to the information provided to us, the governments of leading countries are well aware of the existence of the Interstellar Union. Moreover, secret agreements were concluded between specific political leaders and representatives of the Interstellar Union in the last century stipulating the non-use of nuclear weapons on the planet, since this would not achieve anything - the “aliens” firmly stated that in order to save humanity they would destroy launched military missiles with nuclear charges. We were told that such cases had already taken place.

At the same time, our creators are doing everything possible so as not to deprive us of freedom of choice, freedom of development along the path that we ourselves choose. This, as well as the physical safety of contactees, who will immediately fall “under the hood” of our “humane” intelligence services, are the main reasons why we are not given publicly available material evidence of contacts, so desired by many. Even if there was such evidence at the official level, they would try to disavow it with all their might. If they were massive, then with our level of collective consciousness this would not lead to reconciliation within society, but to its disunity due to attempts to use “contact with aliens” for their own selfish purposes, including, again, military . Well, their opposition to such use would lead to mutual violence - that is, the implementation of our favorite blockbusters,

where (quite deliberately) aliens are often presented to us as an aggressive hostile force. In other words, they will not “force us to be happy” through imposed mass contact. Instead, throughout our history, they act through individual contactees, who, to the best of their strength and capabilities, bring us knowledge from the Interstellar Union. Among these contactees (quite consciously) there were good personalities known to us, for example, the entire Roerich family, Helena Blavatsky, Konstantin Tsiolkovsky, Wolf Messing, Vanga and many others.

The entry of the Earth into the Interstellar Union, as it turned out, is also the goal of Jesus himself - as we remember, who is in a physical body on the planet Burkhad, the capital of the Interstellar Union. When this happens (after the above conditions are met, essentially reflecting the meaning of several commandments of the New Testament), Jesus will come (fly) to Earth in a physical body. This will be that same Second Coming - as a celebration of our achievements. And then a key moment should happen according to Jesus’ plan - he is convinced that the earthlings themselves will offer him to become the ruler of the planet. Then the Age of Love and Light will come again, similar to the one that existed before the war 12 thousand years ago - but on a different turn of the development spiral.

Thus, the entire “puzzle” of information comes together, explaining in a single knowledge both spiritual and religious truths, historical aspects, and a completely material picture of the alien accompaniment of human civilization by our creators from the Interstellar Union of the galaxy.

And the last thing in this article. We also managed to find out that, in addition to the Interstellar Union, there are other communities of civilizations in the galaxy. Their participants do not always agree with the ideas of the Interstellar Union, but there is no open confrontation between these communities of civilizations. We know one of the most famous communities of this kind as the Galactic Federation, which is “based” in the constellation of the Pleiades. It includes 17 physical civilizations and about 700 subtle-material (plasmoid) civilizations. Moreover, 3 out of 17 material civilizations are simultaneously included in the Interstellar Union, which does not contradict the rules of both communities. Earth contactees often call the Galactic Federation the “Federation of Light” - since it contains many high-vibration plasmoid worlds.

A number of members of the Galactic Federation are more determined to change the situation on Earth. They are ready to intervene and help us “clean up order” in society and on the planet. However, they cannot and will not do this without the permission of the Interstellar Union, which includes the civilizations that directly created our ancestors.

The Interstellar Union currently ensures the security of our civilization - first of all, from attempts of unauthorized influence on us by individual representatives of different planets who violate the laws of the Interstellar Union (in fact, these are criminals or, if you like, pirates). For this purpose, there is a special unit of the Galactic Security Service, which deals with our planet. In addition, thanks to the presence on Earth and under the surface of the Moon of many bases (including military ones) of several civilizations of the Interstellar Union, a system has been created that is capable of preventing or repelling an attack on our planet from space - as was the case with Selbet.

So, dear friends, everything depends only on you and me. Including, and specifically from YOU - dear reader.

Thank you for reading this post.

The above information was transmitted to all of us through contactee Irina Podzorova (Voronezh), mainly by these specific representatives of the civilizations of the Interstellar Union:

MidgasKaus (humanoid) – biologist, psychologist, specialist in alien life forms. Planet Esler, constellation Boötes, 36 light years from the Sun;

Raom-Tiyan (humanoid) is a specialist in the history of interaction with young space civilizations. Planet Burkhad, constellation Cygnus, 670 St. years from the Sun;

Te Per Hredours (reptilian) – biologist, ecologist, transformer of genetic information of reptilians into cells of humanoid races. Planet Selbet, constellation Canes Venatici, 730 St. years from the Sun.

The author expresses personal gratitude to MidGaskaus, Raom-Tiyan,

Te Per Hredours, as well as Kirchiton (planet Daraal), Saint-Germain (planet Disaru), Mirakh-Kaunt (planet Burkhad), Li-Shioni (planet Shimor) for the invaluable knowledge they passed on to us. , Oal-Maraumsu (planet Futissa, not part of the Interstellar Union) and other aliens are outside this list.

!!! ADDITIONAL INFORMATION RECEIVED LATER:

FUNCTION OF GENES OF EACH OF THE PARENTAL RACES IN THE HUMAN GENOME.

Man is a combination of biological and spiritual nature. His physical body contains the genetic information of four different races, completely different from each other.

Most of all, representatives of earthly civilization contain genetic information from the primates of their home planet. This made it possible to stabilize the genetic information of three races that came from outer space and decided to participate in the Great Mystery of creating a creature in which a rational spirit could incarnate from the eternal and common home for all - the world of disembodied spirits.

Forty-five percent of the genetic information of terrestrial primates allows intelligent earthlings to easily adapt to the natural world of your planet, but, due to the peculiarities of the evolution of these animals, the human brain is designed in such a way that the intelligent spirit that manifests itself through it easily forms habits - even to automatic reflexes, sometimes replacing truly spiritual thinking.

At the same time, in the cerebral cortex of an earthly person, stable connections between neurons are formed like a network. The energy of the nerve cells involved in these connections is always aimed at their preservation, which is carried out by activating the instinct of self-preservation when faced with a situation that contradicts the usual course of events or the formed worldview.

This is a useful Divine mechanism that helps the spirit adapt to earthly reality very quickly and productively. But with a disharmonious upbringing and living in a society of low-vibration people, this feature contributes to the preservation of negative experiences of interaction with people and includes the instinct of self-preservation when trying

to go towards Light and Faith, Kindness and Love.

The emotion of fear is precisely the earthly form of avoiding danger - real or imaginary.

It occurs when the instinct of self-preservation is activated.

The genetic information of the inhabitants of Tumesout influences mainly the digestive and movement systems. It was the genes of the Tumesoutians that made you omnivores, since after the War of Burkhad with Selbet, the Earth became different, and the conditions on it required a large amount of animal protein food to preserve and develop intelligent life than it was before.

Also, the genes of the Tumesoutians helped you become upright, flexible creatures, practically devoid of hair.

The information embedded in your DNA from the representatives of Burhad affects your immunity, as well as the hormonal and nervous systems.

It is thanks to the genes of Burkhad representatives that your lymphocytes have the ability to permanently remember the proteins of microorganisms that are dangerous to the body. This is the basis for preventive vaccination and treatment of infectious diseases by administering serum from the blood plasma of people who have successfully survived this disease.

In addition, Burkhadian genes allow the human brain to quickly memorize diverse information and store it in neural connections for a long time using the release of special proteins.

The bodies of representatives of the earthly race contain the least amount of genes from representatives of the planet Selbet - cold-blooded oviparous reptilians.

Despite the small percentage of these genes, they are very important for you. It is they who encode the formation of synapses in the brain, which are capable of responding to an increase in the level of stress hormones (for example, adrenaline) with a surge of energy activity in the frontal and parietal regions of the brain, through which the

consciousness of the rational spirit, as well as its will and thinking, manifests itself.

Thanks to this, in situations of discomfort and danger, instead of the usual activation of brain receptors for aminobutyric acid derivatives, which is usual for primates, which leads to fear, depression and flight, there is an increase in the activity of the dopamine-serotonin system with the subsequent release of endorphins of various natures, restoring the biochemical balance of neurons.

This allows people in stressful situations to adequately perceive the world around them, think productively, and act effectively and in accordance with the circumstances.

Every earthly person contains a genetic complex that allows him to live and develop on this planet as a harmonious biological, social and spiritual being, and the energy components of human DNA contain the potential of all the creators of your race.

The DNA of primates contains the energy of the earthly plasmoids that created the souls of these animals, and the DNA of the 3 galactic races contains the energy of their planets and star systems.

Thus, the paths are open for intelligent spirits embodied in earthlings for contacts with humanoids, plasmoids and the spiritual world.

These opportunities should be used by you for good - if you are interested in developing Divine qualities in yourself, without which true love, wisdom and happiness in the Light of the One God, the Creator of the Universe and our common Father are unthinkable.

About the laws of the quantum world - from extraterrestrial intelligence

Irina Podzorova

ATTENTION TO SERIOUS SCIENTISTS WHO PROFESSIONALLY RESEARCH THE LAWS OF THE UNIVERSE!

The most important DETAILED information from the field of QUANTUM PHYSICS!

Scientists of extraterrestrial civilizations of the Interstellar Union of the Galaxy reveal the secrets of the Universe, talking about the fundamental laws of the quantum world and the structure of elementary particles that form all natural and artificially created elements!

In the scientific institutes of planet Earth in recent decades, quantum physics has been actively studied, stimulating the development of scientific theories about the structure of matter and active knowledge of the world of energy vibrations (or wave disturbances of space), from which all physical reality is built. Each quantum of physical energy is created from finer matter, which in some teachings on Earth is usually called ether.

The ethereal membrane envelops every atom; it helps quanta at all energy levels to interact with each other, as well as to influence space, creating various physical fields, and then transmitting them along chains of atoms, ions and larger structural particles of physical dense matter. At the same time, according to the science of the Interstellar Union, physical space makes up only 7% of the space of the entire material world, which contains many millions of worlds at finer levels of density. Each such level of density is a degree of manifestation of the Divine Light, which is in continuous rhythmic movement, generating vibrations or vibrations of the entire set of spaces and the matter filling them. The frequency of these vibrations is different at each level of density, which allows many spaces with corresponding material content to occupy the same volume. Spaces of different dimensions are separated from each other by ethereal fields designed to structure and stabilize these spaces. Thanks to this effect, all material worlds are isolated from each other and for their "inhabitants" embodied in each of them.

The science of the Interstellar Union and the Galactic Federation of Light knows 6048 types of material energies, 9 of which are considered physical energies. The remaining material energies are distributed among the levels of plasmoid worlds.

All material worlds are collected in clusters, which contain 3 levels of density. The first cluster is called physical. The space of this cluster is relatively homogeneous and in the language of your science is called a vacuum. Between the vacuum and the next cluster of the material world, containing the fourth, fifth and sixth levels of density, there is a vast ethereal field containing 700 times more potential energy than all the quanta of the physical Universe combined! This energy is needed to stabilize the structure of the spaces of two clusters and contains material for the creation of new material structures of six density levels and systems from them. The use of energies from this source by any civilizations of the first and second clusters is possible only with the permission of non-incarnate spirits of the 17th level of the Spiritual World and under their direct guidance. Piercing a vacuum without special training and supervision of the Angels of Nature is dangerous for matter of all six density levels that make up the first two clusters. This can cause enormous destruction and corresponding karmic consequences for Intelligent Spirits who decide to undertake such experiments without coordination with the Spiritual World.

In physical space, all substances consist of nine physical types of energies, rotating according to certain rhythms and trajectories. They are collected into 94 natural elements, which differ in the distribution and amount of energy in each of them.

Each element includes a special type of dense material structures synthesized from the energies of the etheric elements and called atoms. The peculiarities of the laws of compaction of energies in atoms create 3 energy levels in them, nested within each other in the form of vector-directed spirals of rotation. Different types of atoms contain different numbers of quanta. Energies are collected in the atom, following the law of the priority of energies of the internal structures of the atom over external ones.

The third energy level of an atom contains 55% of its energies, the second 33%, and the first 12%. At all energy levels of the atom, the energies are heterogeneous: the third and second levels each contain two types of energies, and the first external level contains five types of energies in various combinations with each other. This gives rise to a wide variety of properties of elements, as well as their ability to interact with each other, giving rise to a wide variety of natural and artificially created substances. All natural elements are divided into 5 types - in accordance with the five types of energies at the first atomic level, one of which predominates in percentage terms over the rest in the atoms of each type.

In earthly language, these types of elements have the following names:

1. Active metals.

2. Medium metals.

3. Semi-metals.

4. Non-metals.

5. Inert gases.

The properties of these types of elements differ from each other, which is due to the predominance of different types of energies at the first, external energy level of the atom:

1. In active metals, magnetism predominates.

2. In medium metals, electricity predominates.

3. In semimetals, radio waves predominate.

4. Non-metals are dominated by heat.

5. In inert gases, light predominates.

When creating an atom of the same element from the ethereal energies of the elements of the Universe, the same number of quanta is invested. The ratios of other energies in the atoms of different elements also differ, which determines the difference in their physical and chemical properties and the identity of the properties of atoms of one element. The energies of the first atomic level are located in it according to the formula of a stepped pyramid, the same for all types of atoms. The formula for a step pyramid is as follows:

The predominant physical energy at the first atomic level is always 40% of the energy content of the first atomic level or 4.8% of the total number of quanta of the atom. All other energies of the first atomic level always follow in the same order according to the law of stepwise decrease.

The order of energies at the first atomic level is as follows:

heat - light - magnetism - electricity - radio waves.

But what is the order of the percentage of energies at the first atomic level:

40% - 30% - 20% - 6% - 4%.

For example, let's look at the quantum composition of the hydrogen atom.

Hydrogen belongs to the group of non-metals, therefore, at the first energy level of the atom, heat will prevail in it, and there will be less

radio waves.

Quantum composition of the hydrogen atom:

Total number of quanta – 1600

The third energy level is 880 quanta.

The second energy level is 528 quanta.

The first energy level is 192 quanta.

Distribution of physical energies at the first energy level of the hydrogen atom:

Heat – 77 quanta.

World – 58 quantum.

Magnetism – 38 quantum

Electricity – 11 quanta.

Radio waves – 8 quanta.

Due to such a number of quanta distributed at three atomic levels, hydrogen is the lightest element that is found in a gaseous state under normal conditions. This happens because 85% of quanta at the third energy level are aimed at macrogravity, and the remaining 15% do not provide attraction between atoms.

When gaseous hydrogen is cooled, its heat quanta move into the surrounding space or into the atoms of a colder object, as a result of which the redistribution of quanta at the third atomic level changes due to the law of compensation for energy losses, and more than 60% of the quanta at the third atomic level switch to microgravity. Thanks to this, the atoms are attracted to each other, and a liquid is formed from the gas, and with a further decrease in temperature, a solid.

When calculating the number of quanta in different elements, it is necessary to multiply the number of hydrogen quanta by the relative atomic mass of the element. The result obtained will be the number of all quanta in an atom of a given element.

The function of the genes of each of the alien races

Irina Podzorova

FUNCTION OF GENES OF EACH OF THE PARENTAL RACES IN THE HUMAN GENOME.

The information was conveyed to me by representatives of the Interstellar Union of our galaxy.

Man is a combination of biological and spiritual nature. His physical body contains the genetic information of four different races, completely different from each other.

Most of all, representatives of earthly civilization contain genetic information from the primates of their home planet. This made it possible to stabilize the genetic information of three races that came from outer space and decided to participate in the Great Mystery of creating a creature in which a rational spirit could incarnate from the eternal and common home for all - the world of disembodied spirits.

Forty-five percent of the genetic information of terrestrial primates allows intelligent earthlings to easily adapt to the natural world of your planet, but, due to the peculiarities of the evolution of these animals, the human brain is designed in such a way that the intelligent spirit that manifests itself through it easily forms habits - even to automatic reflexes, sometimes replacing truly spiritual thinking.

At the same time, in the cerebral cortex of an earthly person, stable connections between neurons are formed like a network. The energy of the nerve cells involved in these connections is always aimed at their preservation, which is carried out by activating the instinct of self-preservation when faced with a situation that contradicts the usual course of events or the formed worldview.

This is a useful Divine mechanism that helps the spirit adapt to earthly reality very quickly and productively. But with a disharmonious upbringing and living in a society of low-vibration people, this feature contributes to the preservation of negative experiences of interaction with people and includes the instinct of self-preservation when trying to go towards Light and Faith, Kindness and Love.

The emotion of fear is precisely the earthly form of avoiding danger - real or imaginary.

It occurs when the instinct of self-preservation is activated.

The genetic information of the inhabitants of Tumesout influences mainly the digestive and movement systems. It was the genes of the Tumesoutians that made you omnivores, since after the War of Burkhad with Selbet, the Earth became different, and the conditions on it required a large amount of animal protein food to preserve and develop intelligent life than it was before.

Also, the genes of the Tumesoutians helped you become upright, flexible creatures, practically devoid of hair.

The information embedded in your DNA from the representatives of Burhad affects your immunity, as well as the hormonal and nervous systems.

It is thanks to the genes of Burkhad representatives that your lymphocytes have the ability to permanently remember the proteins of microorganisms that are dangerous to the body. This is the basis for preventive vaccination and treatment of infectious diseases by administering serum from the blood plasma of people who have successfully survived this disease.

In addition, Burkhadian genes allow the human brain to quickly memorize diverse information and store it in neural connections for a long time using the release of special proteins.

The bodies of representatives of the earthly race contain the least amount of genes from representatives of the planet Selbet - cold-blooded oviparous reptilians.

Despite the small percentage of these genes, they are very important for you. It is they who encode the formation of synapses in the brain, which are capable of responding to an increase in the level of stress hormones (for example, adrenaline) with a surge of energy activity in the frontal and parietal regions of the brain, through which the consciousness of the rational spirit, as well as its will and thinking, manifests itself.

Thanks to this, in situations of discomfort and danger, instead of the usual activation of brain receptors for aminobutyric acid derivatives,

which is usual for primates, which leads to fear, depression and flight, there is an increase in the activity of the dopamine-serotonin system with the subsequent release of endorphins of various natures, restoring the biochemical balance of neurons.

This allows people in stressful situations to adequately perceive the world around them, think productively, and act effectively and in accordance with the circumstances.

Every earthly person contains a genetic complex that allows him to live and develop on this planet as a harmonious biological, social and spiritual being, and the energy components of human DNA contain the potential of all the creators of your race.

The DNA of primates contains the energy of the earthly plasmoids that created the souls of these animals, and the DNA of the 3 galactic races contains the energy of their planets and star systems.

Thus, the paths are open for intelligent spirits embodied in earthlings for contacts with humanoids, plasmoids and the spiritual world.

These opportunities should be used by you for good - if you are interested in developing Divine qualities in yourself, without which true love, wisdom and happiness in the Light of the One God, the Creator of the Universe and our common Father are unthinkable.

The structure of the Spiritual world through the eyes of aliens

Irina Podzorova

According to information from representatives of the Interstellar Union, who constantly travel to the Spiritual world, being in the so-called astral bodies, after the final separation of the Spirit from the material body (physical “death”), it first finds itself in the Astral world, which is a kind of vestibule or “waiting room” "for all disembodied Spirits. Usually he is met there by Guide Angels, who, together with his own Guardian Angel, explain to him what happened and escort him to his eternal home - the World of Disembodied Spirits. It is located a little “further” from the Astral World from manifested matter in terms of the level of its vibrations, being the next dimension of the Spiritual World.

The world of disembodied Spirits is divided into 24 levels, a detailed description of which will be given below. It is there that all Spirits await their turn to incarnate, and their life there is no less bright, rich and interesting than life in bodies in the material world. But why do we come here again and again? To manifest the accumulated experience, radiate our energy, show feelings, share thoughts, and gain new experience that allows us to become closer to that Source of Life, the power of which we so clearly feel in the Spiritual world, where we are no longer distracted by the needs of material bodies. Only when incarnated in a material body is spiritual development possible - through trials and various life situations. In the Spiritual world there is no development, there is no concept of time, there is only comprehension, elaboration of the experience of past incarnations, as well as planning for the next.

So – the World of disembodied Spirits consists of twenty-four levels. The spirits living above are perceived by us from here as living on the twenty-fourth, because above we can only discern the continuous brightest Divine Light, which we are not able to divide either into levels or into separate spiritual entities.

We will begin our story with the levels of the Spiritual World, where Spirits with the lowest spiritual vibrations are located. This means that they consciously separated themselves from the awareness of the Almighty in past incarnations, as if they blocked His Light within themselves, which is the basis of every Spirit. This Light itself has not gone away, but the Creator, due to the boundless and unconditional Love for all His creatures, gives each Spirit the opportunity to make absolutely any personal choice.

By transmitting this information to me, the specialists of the Interstellar Union tried to find in my mind concepts and names that were as close as possible to the essence of Spirits at each level. They are used in the description.

World of "evil" Spirits

In this part of the World of non-embodied Spirits, according to the terminology of the Interstellar Union, there are 6 levels, each of which is occupied by Spirits with corresponding vibrational characteristics.

1. Bhoots are the lowest vibrational of the disembodied Spirits. They closed their Light so much with greed, lust and envy that they completely forgot about the existence of God, suppressed their rational mind, closed their hearts from all goodness and rejoice only in one thing - when other entities experience pain and mental anguish. Then they feel that they are not the only ones who feel so bad and calm down for a while, moving away from chronic dissatisfaction with everything and from the more or less constant mania of persecution inherent in them.

2. Rakshasas - Spirits who are so filled with the energies of anger, hatred and vindictiveness that they carry out all their activities with the goal of violence against others, believing that this is the best way to protect and promote their ideas. They forget about the freedom of choice given by God to others, and recognize the right to it only for themselves. They easily enter into any form of conflict, sincerely believing that a good (in their understanding) goal justifies any means.

3. Asuras are Spirits who, because of their pride and arrogance, do not see the needs of other people. All their activities are aimed at satisfying their various desires, the fulfillment of which replaces them

with the joy of being in God's Love. In the heat of their passions, they do not pay attention to the manifestation of Light in themselves through intuition and the voice of conscience.

4. Demons are spirits who are so absorbed in the pleasures they receive through the material body that they forget about the law of conservation of energy. They want to endlessly enjoy various material energies and become very irritated when obstacles arise in their path - even if they are living people. They often do not comply with God’s law about waiting in line for incarnation and simply “inhabit” the bodies of embodied spirits that match their vibrations.

5. Demons are Spirits who are so disillusioned with life in the material world that they come to completely deny its value and accuse God of creating it and maintaining it with their energy. The degree and reasons for this denial are different for everyone. What remains common is visible asceticism and perverted religiosity, combined with a sharp condemnation of dissenters and a certain disgust towards any form of matter or material activity.

6. Archons - Spirits with similar demonic beliefs and actions, but differing from demons in a special character structure, slightly higher vibrations and a sense of inspiration and sincerity with which they commit evil deeds. Thanks to well-developed strategic thinking and glimpses of intuition, which are sometimes available at this level, they become leaders among other evil spirits - like the well-known Lucifer, who now lives on the sixth level. These leaders form unique societies from demons, based on strict obedience and veneration of leaders with fairly harsh punishments for disobedience and apostasy. Such “societies” resemble military brigades or bandit groups, which, however, are located in the World of disembodied Spirits.

World of Natural Spirits

This part of the World of non-embodied Spirits has two gradations.

7. Elementals - Spirits who strive to incarnate in plasmoid (subtle-material) worlds, responsible for certain natural elements. They emerged from the world of demons and devoted their energy to controlling nature, as well as creating animal souls. Their own power

still attracts them to such an extent that they can ignore the needs of their family (when incarnated in the material world), oppose society as a whole and do not want to sincerely turn to God. But they have already moved away from demonic egoism and now, by creating animal souls and controlling them, they are learning to selflessly love someone other than themselves.

8. Jinns - these Spirits are very similar to elementals, but unlike them they have a broader outlook, greater outward focus, greater organizational abilities and friendliness. They also strive to incarnate in subtle-material worlds, but unlike elementals, they often do this not in plasmoids that control the elements, but in their immediate leaders, who look after certain places in the material world: fields, forests, reservoirs, houses, etc. They also take part in the creation of animal souls and help the elementals control natural elements.

World of Medium Spirits

Levels from 12 to 16 are located here, and now it is mainly Spirits with vibrations related to one of these levels who incarnate on Earth.

9. Disciples are Spirits who learn to direct their attention and energy to other individuals around them. They incarnate in order to learn from their often bitter experience the moral laws of the society where they were born. Often these are skeptics who do not believe in anything or anyone except their own eyes and ears. They usually believe that it is impossible to deceive their senses. Life debunks this delusion of theirs, and sometimes quite harshly. It is very important at this level not to become embittered by the blows of fate and not to fall even lower - this sometimes happens when realizing the fact that absolutely everything happens according to the will of God and, due to an insufficiently pure and limited perception, may seem “wrong” or “unfair” .

10. Warriors - Spirits whose main goal is to restore justice as they understand it. Indifference to the suffering of others and their own allows them to achieve fairly high vibrations, but the implementation of their plans is often associated with the condemnation of dissidents and the use of violent methods of influence. Unlike rakshasas, warriors fight not for their ideas, not for the selfish strengthening of

their power, but for ideas that they sincerely and passionately consider socially useful. These are rebels and revolutionaries, burning with a dream of social well-being, but losing sight of the law of similarity, according to which negativity, even manifested for good purposes, can only give rise to another negativity.

11. Consumers - Spirits who have learned the beauty of the material world in receiving various sensual pleasures and who spend their energy working for money, which can give them things that are pleasant to them. Unlike demons, they will not transgress moral standards, much less the laws of the society where they live, but their hearts are occupied with the desire for material wealth, and their minds are occupied with thoughts of how to acquire them and what to spend them on for greater pleasure. Busy with such worries from morning to evening, they often have neither the time nor the desire to think about their spiritual development, much less make any efforts in this direction.

12. Builders are Spirits whose main goal is to create comfortable conditions for living in the material world for themselves and their loved ones. They are ready to work hard for this, both physically and mentally, but often consider matter, if not the only reality, then the most important condition for mental peace and harmony, which they call “happiness.” Spiritual quests are often incomprehensible and boring to them. Although they most often do not condemn all this in other people, they are closer to the joy of a job well done than from music or a book read, and even more so from prayer or meditation. As you may have already guessed, the most significant part of the Spirits who make up the population of the Earth today can be attributed by vibration to the 11th and 12th levels of the World of non-incarnated Spirits.

13. Aesthetes - Spirits who begin to understand that the level of happiness does not depend on material well-being. Many of them still doubt this, but feeling a surge of Light in their soul from works of art, they can be moved to tears or fall into an enthusiastic state, completely incomprehensible to the Spirit-consumers who watch, read and listen to the same thing, but do not experience such delight and depth of emotions. For aesthetes, the pleasure from literature, music, painting and other manifestations of the creativity of other people exceeds the pleasure from pleasures received through the body.

14. Researchers - Spirits who see joy in knowing the laws of the

material world in all its diversity. They can understand nature, society or themselves, they can see God behind all this, but... they also want to know Him entirely, sorting out His laws and energies. However, they are not always able to “check harmony with algebra,” because they often cannot understand the difference between faith and knowledge. And yet, their innate logic and analytics help them feel that the world is much more complex than they think.

15. Inventors - Spirits for whom the highest happiness lies in creativity, in creating something that has not yet existed. It doesn’t matter what it is: new recipes for pies, perpetual motion machines or programs of political parties. The main thing for them is to make other Spirits happy with the truth that has been revealed to them and in the usefulness of which for everyone and at all times they sacredly believe. Inventors passionately share their Light with everyone they meet and are very upset when they are not understood. True, with experience they come to wisdom and the realization that it is impossible to prove to a person truths that he is not ready to comprehend, and when this readiness comes, the need for proof disappears by itself...

16. Seekers - Spirits whose task is to find a way to the World of good Spirits (below), to the World of Angels, where the Light shines much brighter than in the World of average spirits. Seekers see reflections of this Light everywhere. The main thing for them is not to fall into dogmatism and not to limit their thinking. They have already outgrown such experiences and now see good beginnings in all religions and spiritual teachings. A characteristic feature of Seekers is dissatisfaction with their spiritual development and a constant striving for perfection.

Many of them already feel that all books about spiritual development, all religious scriptures will not bring any benefit if they do not see and recognize the Light in themselves. Their hearts often tremble before the great mystery of existence, while vaguely realizing that darkness is unrecognized Light, and evil is only misunderstood and misdirected good.

World of Good Spirits

All Spirits of these eight levels are angelic, since, to one degree or another, they have cognized the Supreme Light of the Creator and try

to fill everyone else with this Light and Love.

17. Angels of Nature are Spirits whose service in the Spiritual World consists of teaching fine-material plasmoid civilizations the correct control of natural elements in the Light of God, the birth of animal souls and the assembly of their energies into one whole. They incarnate in the worlds of plasmoids in order to guide them on the true path, and in the worlds of humanoids - in order to more fully feel natural energies and learn to work with them.

18. Guardian Angels - Spirits whose main mission in the Spiritual world is to care for embodied Spirits from various levels. The Light of Love, which they realize, allows them to tolerate, forgive and protect even the most ungrateful and evil spirits. The guardian can sincerely and lovingly care for the demon, rejoicing at the slightest sprouts of goodness in his soul, and, more importantly, he is able to understand and forgive if the demon suddenly tramples these sprouts and throws them to his benefactor. Every incarnated Spirit who, during incarnation, wished to have him, has a Guardian Angel. One incarnate Spirit may have several Guardian Angels, and a Guardian Angel, especially an experienced one, may also have several wards. The task of the Angels is to protect their wards from “evil” Spirits, drive away bad thoughts, and instill good and bright images that help them go to God.

19. Angels-Prophets - Spirits whose main task is to convey the Word of God and His laws to the minds and hearts of all Spirits. The word “Prophet” here designates a messenger of the Will of God, not a clairvoyant. We must remember that the future has many options, so it is impossible to accurately predict what will happen next. Any, even the most negative, forecast is a reason for reflection and attempts to move events into a more constructive direction. The task of the Prophets is to teach embodied and non-incarnate Spirits of that true spiritual, selfless Love that shines in them with infinite Light and spreads to everyone who falls into their field.

20. Healing Angels are Spirits whose work in the Spiritual World is to heal other Spirits - incarnate and non-incarnate. The word “healing” is understood by them in the broadest sense – as restoration of the integrity of the body, energy, consciousness, etc. Healers do not tolerate any disorder or chaos; it gives them almost physical pain and the desire to bring everything into line with the understanding of the world order that they have achieved at the moment. And Spirits from

this level feel very well the pain of others, both physical and mental.

21. Angel Guides are Spirits whose task in the spiritual world is to meet Spirits who have forever left their material bodies and accompany them through the astral plane to the World of disembodied spirits, to the level they reached during their life in the body. Also, the task of the Guides is to accompany the Spirits, whose turn to incarnate has come, into the material world and help in connecting with the future body. Guides very often walk through the astral plane, meet with different spiritual entities at different levels of spiritual and intellectual development, and therefore have flexible thinking and consciousness that can adapt to different circumstances. They know how to quickly navigate their surroundings and find a common language with a wide variety of intelligent creatures.

22. Consultant Angels are spirits whose main task is to help other Spirits in selecting the best conditions for incarnation for spiritual development. They have well-developed symbolic thinking, knowledge of all the intricacies of karmic psychology, the laws of existence in material worlds of different densities, and have access to Divine knowledge about each Spirit who turns to them for help in selecting an incarnation. They must take into account many factors that contribute to the development of a particular Spirit in the Light of Love and correlate these factors with astrological and numerological data in the material world, adequate to the description of the Spirit that is incarnating, its tasks, as well as the ability to recognize it during incarnation by individuals prepared for this.

23. Arhats are Spirits who, while living in the Spiritual World, help to form and develop high-vibration egregors in the material world. They understand the importance of the right ideology for the development of social and family relationships that contribute to the spiritual growth of all those who incarnate in this family and in this society. For them, any law written on paper or other material media will have no meaning if it is not reflected in the minds and hearts of intelligent beings. Arhats are the creators of reality, inspirers and ideologists of political, religious and informal folk communities, whose goal is to carry the Light of God in a form that is close and understandable to them at this stage of development.

24. Devas are spirits who have fully realized their potential and united their energy with the Divine. There is nothing in them anymore except Love and the potential to degrade as their vibrations decrease. This

possibility is embedded in all intelligent spirits without exception - as a necessary condition for freedom and personal responsibility, thanks to which we can spiritually grow and improve, learning the unconditional Love of our Heavenly Father. Only then will He be able to completely calmly give us His abilities to create and change material worlds. This possibility is realized at the 24th level of the Spiritual World, upon reaching which Spirits see before them an endless “enfilade” of even higher levels of greater and greater fusion with the Divine Light. Spirits who incarnate into the material world from this level consciously go to misunderstanding and rejection of others in order for everyone to discover the Light shining in their souls. It is at this highest vibration level in our understanding that Jesus, the Mother of God, the Archangels, Krishna and other highest Spirits are located.

Each Intelligent Spirit - each of us at a given moment in time corresponds in vibration to one or another level of the Spiritual world. This level of vibration can be estimated in hertz, but we do not yet have instruments capable of directly measuring the vibrations of the Spirit. All Spirits are incarnated in the material world from the level of the World of Disembodied Spirits to which they arrived after leaving the “past” material body. At the moment of the death of the body, all the choices made by the Intelligent Spirit during the past incarnation, all thoughts, emotions, decisions, actions, deeds, desires and intentions are “imprinted” in the final (after this life) vibrational characteristic of the Spirit. In exact accordance with it, the Spirit then enters a certain level of the World of non-incarnate Spirits. In fact, no one “judges” him, “punishes” him or “rewards” him. Well, or you can say that he does it all himself. Ultimately, the universal Law of affinity or attraction of like by like is triggered. The spirit finds itself exactly where it is most comfortable according to its vibrations, which take place at the very end of the next incarnation. If the final vibrations of the Spirit are very light, pure and aimed at the common good, then it will be “pulled” to one of the highest divine levels of the World of Good Spirits. In Christian terminology this is called Paradise. If everything is the other way around, then the Spirit, like a magnet, will be attracted to one of the lower “hellish” levels. The same is true with “intermediate” Spirits, corresponding in vibration to the World of Natural Spirits and the World of Average Spirits. The Guide Angels only help the Spirit “get” to its destination - one might say, they simply assist each Spirit in realizing his final choice, which was the result of all previous free choices in a past life. With all the desire, even if there is one, Spirits of lower levels cannot rise higher, because, taking into account their objective vibrational level, the Divine Light,

the flow of Divine Love will become an unbearably burning fire for them - as they do many times during their lives made the choice to separate from the Light of the Creator, or rather, to block it inside ourselves. That is why “Hell” is described in religious sources as a place where “sinners” are tortured with sizzling heat - after all, the manifestation of Divine energy, although in a reduced form, is absolutely everywhere! For “sinners”, who essentially denied divinity by their choices, the same brightest Divine Light, which at the highest levels is a desired manifestation of the immense happiness of merging with the Almighty, turns into long fiery suffering...

However, fortunately, these sufferings are not eternal, and the Reasonable Spirit, as we remember, is unconditionally eternal - since it is a personified piece of the eternal immortal Creator. Whatever level of the World of Non-Incarnated Spirits the Spirit finds itself at after its next incarnation, it can always call on Consultant Angels who will descend to it from the 22nd level and, if it has made such a decision, will help it plan its next incarnation in the material world – the plasmoid one (subtle-material) or physical (dense-material). Which one will depend on the goals of the new incarnation, which are always individual. The goals and preliminary plan for life in a new incarnation are discussed jointly by the Spirit, his spiritual Guides from one of the highest levels, who usually accompany him through many lives, and the Consulting Angels. As has already been said, both Spirits located at low levels of the Spiritual world and high-vibration Spirits can develop to higher spiritual levels (get closer to full awareness of the Creator, becoming happier) in only one way - by passing through lives in material bodies. Therefore, at different levels of the World of disembodied Spirits there are always a lot of people who want to come to the material world as quickly as possible. As a result, the Spirits have to wait a long time for their turn - so that the best conditions for their embodiment in accordance with the goals and objectives of the new life are created in the material world. Sometimes the waiting period is many hundreds, or even thousands of Earth years. And, although, in the Spiritual world, as we remember, there is no time in our understanding (since time is also a manifestation of matter), this period is perceived there as a very, very long wait. This is one of the reasons why it is unacceptable to destroy, often, the hard-won plan of the Spirit for incarnation by artificially terminating a pregnancy (at any stage) without valid medical reasons! Even if to you, dear future parents, the conditions for the birth of your child now seem completely unsuitable, there is a very high probability that it was precisely such conditions and it was you in these conditions that were consciously chosen by the Intelligent Spirit, its Mentors,

Consulting Angels and, ultimately, by the Creator himself for the coming of this Spirit to Earth precisely at this time and precisely with you! Of course, no one has canceled your free will in the Light of the Almighty's Love for you. However, please, when making decisions that can no longer be corrected, take into account the knowledge about the path of the Spirit conveyed to you above.

When the Spirit from any vibrational level is ready for incarnation, and the conditions in the material world also correspond to its plans (the consent of the Spiritual Selves of its future parents, and so on), it partially resides in the astral body next to its parents even before the moment of conception of its future body. Directly at the moment of conception, it partially introduces its vital force into the very first cell of the embryo - otherwise further development of the embryo would be impossible. That is why abortions, even at the earliest stages, no matter how dramatic it sounds, can be considered "murder" - from the point of view of violating the plans of the Intelligent Spirit to come to our material world. However, the fully Intelligent Spirit merges with the body of the child in the 7th month of pregnancy. True, a very important clarification needs to be made here. The fact is that the word "completely" here is a kind of convention. In fact, the main part of our Spiritual (Higher) Self always resides in the Spiritual world. Moreover, regardless of what level the Intelligent Spirit incarnated from, its, so to speak, "core" is always connected with the divine levels of the Spiritual world, located even above the 24th level of vibrations. If we talk about the presence of the Spirit (Higher or Spiritual Self) in the material body, then the percentage of its fusion with the body varies depending on the planet on which it is embodied. On Earth in the current era, the Intelligent Spirit of each of us is present in us by approximately 30% - accordingly, approximately 70% of our Spirit (Higher Self) is constantly located at that level of the World of non-embodied Spirits from which we came to this body. For enlightened or holy people, this proportion can change significantly towards a much more complete presence of their Spiritual Self with them. On other planets of the galaxy, the percentage of the Spirit's "residence" in the aura of the physical body may be different. So it is much larger than ours, on the planet Burkhad (Pikran) - the capital of the Interstellar Union and is about 60% there. At the same time, for example, on the planet Selbet (a civilization of reptilians) this figure is approximately 17%. I would also like to remind you that the Intelligent Spirit, in accordance with the plans of life, can incarnate into the body of an inhabitant of any planet, becoming a representative of any physical or subtle-material (plasmoid) civilization. Moreover, this can happen in absolutely any place in the

manifested Universe, and not just in our galaxy - since the Spiritual World is one for the entire Universe, and there are no restrictions there.

It is important to understand one more thing. The level of vibrations or the level of the Spiritual world from which the Spirit came into a given life is, one might say, only the starting point in this incarnation. During life, this level can change in different directions depending on a series of choices of the embodied part of the Spirit - our current personality. As a result, at the end of life, the Spirit can theoretically "move" vibrationally to any number of levels. That is, in principle, you can come from the 24th level, but significantly lower the vibrations and go to the 1st, or vice versa - from one of the lowest levels rise to the 24th. The goal of every Intelligent Spirit coming into the material world is precisely to increase spiritual vibrations by several levels - the higher, the better. But this is not always possible, taking into account all the trials and temptations of materiality. From the Spiritual world, where everything is so clearly seen in the Divine Light (if we are talking about fairly high levels), it seems to the Spirit not at all difficult to pass the tests in the material world with dignity and fulfill its incarnation plan with an "A". However, when during incarnation the memory of everything is almost completely blocked (this, of course, is not a secret in the Spiritual world - there is an understanding that this is the only way the development of the Spirit in the body is possible) - then very often the Spirit lowers its vibrations in harsh earthly ones (for example) conditions of material life. At the same time, it is our planet Earth - and even in the current era of the Quantum Transition during the transition stage of Kali Yuga - that is one of the most potential places in the galaxy for very rapid spiritual growth. But such growth is possible only through a variety of trials and difficulties, of which, as we all know, there are more than enough on Earth! Considering this potential, the "queue" of Spirits wishing to incarnate on Earth now is especially large. Well, what is the general purpose of all Spirits? Why do they, in principle, need this growth, increase in vibrations, and so on? We have already mentioned this, but we can say it in a little more detail. All living things have only one main goal - to become happier, more joyful, and to receive more pleasure from their existence. This is the very "meaning of life" - there is simply no other! But real happiness (s-part) means being a conscious part of the One Whole, that is, being fully aware of the Almighty and, above all, within yourself. And if this happens, then the embodied or non-embodied Intelligent Spirit inevitably demonstrates to the maximum the main quality of the Creator - unconditional Love for everything that exists, starting with itself. Only then can he be

truly happy in this unity and general feeling of wholeness, in this flow of selfless Love with the desire to help absolutely everyone experience it.

Journey to the planet Ticht

Irina Podzorova

On September 9, 2018, Kirchiton and I visited the planet Tikht, which is located near the star Zeta Sculptor, at a distance of 550 light years from the Sun. This planet is located quite far from the star and is quite

cold there.

Kirchiton said that the temperature on the surface was minus 38 degrees Celsius, so before leaving we put on protective suits. When we left the “plate”, I saw drifts of snow that intersected at different angles.

Large square vehicles without windows and doors moved along the roads, and white balls were spinning on the roof of these vehicles. It turned out that most of the dwellings of this planet are underground. We approached a black circle on the surface, stood on it, and it began to descend like an elevator. While slowly descending, I looked up and saw a cloudy sky and several black dots flying in a triangle.

The circle on which we stood descended into a huge cave, ten times the size of a football field. It was light there. Kirchiton pressed something on the side of the door, and after a few seconds the door went up. On the threshold stood a humanoid shorter than me, with a square head, large blue eyes and white skin. Kirchiton said something to him, and he stepped aside to let us through.

We went inside and found ourselves in a small rectangular room with brown walls, in which white veins of a substance unknown to me were visible, reminiscent of abstract patterns. The furniture there was a long table, and in the corners of the room there were seating areas that vaguely resembled triangular chairs.

There was a screen on the wall showing a snowy valley and moving humanoids that looked like the one who opened the door to us. Another humanoid stood up from the chair and said:

— I welcome you to Tichta. My name is Natyemrau, I am the coordinator for contacts with the earthly race.

I also greeted him and asked him to tell him about his planet. Here's what he said:

— 14 billion intelligent beings live here, we have many colonies in the galaxy. Quite recently we made contact with your world, although we still have few contactees, we have something to tell your race.

- Like what? - I became interested.

— We have extensive experience in restoring the ecology of planets after technological disasters and wars using various types of weapons, still unknown in your world. I think that our experience will be useful to your planet.

Kirkhiton asked:

— How many contactees does Ticht have now?

- Only twenty-three, few people in your world match us in terms of the vibrational characteristics of the brain and the state of the energy fields of the aura.

- Do you make physical contact? - I asked.

— It depends on the capabilities of the contactees, but we can easily do without physical contacts. The physical form of contact is more important for you, not for us. This is due to some limitation of non-physical forms of perception, which occurs due to the materialistic setup of your consciousnesses and the ways of working through the central nervous system.

— How do you assess the current environmental situation on Earth?

- How extremely alarming. Your power structures almost do not support the study of the influence of urban, technogenic civilization on global processes in the biosphere of your planet. This is extremely short-sighted on their part, as it can easily lead to the depletion of the planet's resources, disruption of the regulation of its natural processes, and even to a series of cataclysms that threaten the existence of your species. Such an attitude towards one's own planet comes from a lack of understanding of the spiritual processes that shape the material world.

— What do you advise us to do to get out of this situation?

— First of all, you need to change the current paradigm of your social ideology by daily and widely covering the environmental and other problems of your civilization. Silencing these problems does not lead

to their elimination. The second very important point is to build a priority for the spiritual values of the worldview system, based on which every spirit embodied in your world will be able to find happiness in the development of their spiritual qualities, in the growth of the creative potential of the individual, and not in the acquisition of material wealth by disrupting the ecological balance of the planet and violations of the Divine Laws on which the existence of the material world and all its energies rests.

Then Kirchiton said that it was time for us to return, and we followed the same path out of the room into the cave and took the elevator to the surface of the planet, where nothing had changed during our absence. Within a few minutes I was on Earth. Having thanked Kirchiton, I left the “plate” and went home, following with my gaze the luminous star into which it almost instantly turned...

All the way home I thought about the words of the Tikhtian. All the nature around seemed to me like a living organism, the same Light of God that I always feel within myself! It was completely incomprehensible to me at that moment how one could pray to God while destroying what He had created?! How can you develop your Spirit by humiliating and not accepting your body, which gives us the opportunity to develop it by taking lessons in the material world?

These questions often arose before me later, until the realization came that each embodied Spirit thinks and feels as best he can at a given level of his development. Therefore, there is no need to waste time and energy on condemning someone, but it is better to spend both on the manifestation of the Light of Love, which is in each of us.

This will allow many Spirits to awaken from that sleep of egoism and arrogance, which causes an attunement to a materialistic type of perception - with all the ensuing processes listed above.

Journey to the insectoid planet Sho-Hareki

Irina Podzorova

The report was made 1.5 hours after contact and flight on a flying saucer with Kirchiton to the planet SHO-HAREKI. Prepare your imagination and let's go...

The other day I had another, obligatory, physical contact with Kirchiton. This time he took me to the insectoid planet - Sho-Hareki, which is located in the constellation Pegasus. The representative of

this planet, Shpaashi, already answered our questions when he came in the astral body.

The contact took place in the same place as before. My friend stayed waiting in the car, and I went to the appointed place.

I didn't have to wait long, raising my eyes to the sky once again, I saw Kirchiton's "plate" hovering above me. Quickly climbing up the lowered ladder, I found myself inside the apparatus and, seeing Kirchiton, conveyed greetings to him from the members of our Cassiopeia group.

He said that he was very glad that earthlings were not just interested in the information of the Interstellar Union as if it were just another science fiction, but were trying to apply the acquired knowledge in life. This suggests that our society is developing and preparing for mass contact and entry into the Interstellar Union.

Time flew by unnoticed while talking about our group. At the edge of my consciousness, I noted that weightlessness had ended, and I was sitting steadily in a chair. Kirchiton invited me to stand in the middle of the cabin next to him. Two halves of a protective suit descended from the ceiling onto each of us and converged on our bodies. We found ourselves inside soft, comfortable and absolutely safe spacesuits.

Coming to the surface of the planet, I saw a plain, on which rocks were visible here and there and our spaceship stood. In the white sky one could see a white sun and three or four yellowish moons, slightly smaller in size than our Moon. Being on the surface, I felt that the force of gravity was greater than what I was used to.

The illumination from the Sun and moons was so uniform that there were practically no shadows on the gray rocky ground. There was also no noticeable vegetation, not even moss or anything like that. It is not surprising, because the radiation on the planet is so high that the survival time of a person on the surface is 15-20 minutes.

In the air, at different heights, hung structures that served as homes for local residents. They were of different sizes and shapes, most were spherical and in the shape of two cones without sharp corners, connected by their bases. As a result, objects were obtained that resembled peculiar three-dimensional rhombuses.

All the structures were gray, steel-colored, and local residents flew around them, looking like huge brown beetles. A group of ten to fifteen insectoids sat down on the ground next to us and I was able to get a good look at them.

Their height was about two, two and a half meters: they were taller than me, but slightly shorter than Kirchiton. They had surprisingly small, triangular-shaped heads, from which protruded two short antennae, consisting of two segments. The two eyes resembled those of a dragonfly, they were light brown with a greenish tint and could extend slightly from the head and rotate up and down and to the sides, increasing the viewing angle. I didn't notice the nose, but the mouth resembled a slit covered with three plates: one on top and two below.

The inhabitants of Sho-Hareki had six limbs, divided by joints into several segments. They walked on two of them, and when they stood, they leaned back a little and leaned on the hard bases of the wings. If necessary, they spread thin black wings folded behind their backs and flew into the air. The wings rotated so quickly that their movements could not be caught by the eye. I didn't notice any clothes on them.

They hissed and crackled loudly, talking to each other, and this hissing and crackling could be heard even in protective suits. Suddenly they all quieted down and I heard the same crackling and hissing from a small box on Kirchiton's chest and realized that he was talking to them through an auto-translator.

Suddenly, two of the local residents, flying into the air, took me by the hands with four limbs and began to lift me to one of their homes, hanging in the air at the height of about a three-story building. Looking to the right, I saw three or four insectoids lifting Kirchiton, taking him by the hands. I was able to get a good look at their limbs, and I saw that they were not like the paws of our insects.

The inhabitants of Sho-Hareki had eight flexible, multi-jointed fingers on their four "hands", almost equal in length to the fingers of an adult. With their help, they are able to grab even small objects and manipulate them freely.

Thanks to their powerful wings, the huge intelligent insects quickly

took us to one of their homes. The part of the solid wall that we approached became, as it were, liquid before my eyes and began to spin like a whirlpool, very quickly forming a hole in the wall through which we were brought inside. It was dim there, especially compared to the bright sunny day outside, but my eyes quickly adjusted to the new light and I looked around.

The insectoids placed Kirchiton and me on the floor of a high hall, the walls of which gradually expanded upward, forming a cone with its apex facing downwards. Overhead there was a dome about ten meters high, formed by a second cone with its apex pointing upward.

There was no furniture in the hall; insectoids were placed on the walls, not paying visible attention to us, there were many of them. The creatures that brought us into this building stood next to us and again began to hiss and chirp, addressing Kirchiton.

While they were talking, I went to the nearest wall to take a closer look. Although the floor was hard, I had the feeling that it was quite springy under my feet.

Walking up to the wall, I touched it. Through the protective suit I could not understand what it was made of, but the material springs a little when pressed hard.

Kirchiton called me and I went up to him. He said that we are in space flight control, and the insectoids that “sit” on the walls are scientists negotiating with specialists working in space. All equipment is located within the walls of these structures and in the bodies of the specialists themselves.

Then Kirchiton and I were lowered to the ground of the planet in the same way and my curator told me about the peculiarities of the life of embodied Spirits in the bodies of insectoids.

They have a group mind, but in each of them one Intelligent Spirit is embodied. Thanks to the presence of a group mind, their nervous systems are connected at the electromagnetic level into a kind of noosphere of the planet. And the Spirits embodied in these bodies unite into the likeness of a group soul, which exists as long as the Spirit is embodied in the body of the insectoid.

Then Kirchiton said that it was time for us to go back. We returned to the ship and the two halves of the protective suit separated, rose to the ceiling and disappeared. I sat down on a chair, Kirchiton turned to the control panel, and weightlessness began again in the ship.

On the way back, Kirchiton told me how insectoids from Sho-Hareki can use large asteroids instead of spaceships. Their robots can quickly create a cavity in an asteroid and place devices there to travel between stars. Outwardly, it will be a completely ordinary asteroid, but inside it there will be representatives of the insectoid race.

By the way, there are several similar races in our Galaxy, but so far only the Sho-Hareki civilization is included in the Interstellar Union.

Insectoids differ from other intelligent species by the presence of an external rather than an internal skeleton, which allows them to withstand large doses of radiation and temperature changes that are fatal to many other forms of intelligent life.

A few minutes later the weightlessness stopped, I said goodbye to Kirkhiton, went down the stairs to the same clearing from where he picked me up and went to the car where my friend was waiting for me.

Kirchiton conveyed greetings to all members of the Cassiopeia group and advised us not to be afraid of anything, do good deeds, learn new things and develop the energy of love - the most powerful medicine for physical, mental and spiritual ailments.

Visiting the planets of the solar system

Irina Podzorova

I continue to tell you about the events of 1999. And although more than twenty years have passed since then, the events of the summer of that year are still before my eyes, because it was then that I left our planet for the first time, and it is impossible to forget this, no matter how many years have passed.

After the flight to the lunar base, Kirchiton began showing me the planets of the solar system. We visited the planet Mercury first. It was like this: when I got out of the ship, I immediately saw the Sun. It surprised me so much that for several minutes I looked only at it.

It seemed to me that it was five times larger than seen from Earth and of some strange white color. Huge tongues of flame burst out of it. Dark spots were visible on the solar disk, which moved across it as if

the wind was blowing there.

Kirkhiton said:

- Look around, this is the planet Mercury, and then we will fly closer to the Sun, and you will get a good look at it.

I looked around and saw many gray stones scattered on the lighter soil, they cast sharp black shadows. Looking back, I saw a “flying saucer” standing on supports.

We were in a huge valley littered with stones. To the left were high mountains, which, by eye, were about two kilometers away. Kirchiton told me the characteristics of the planet, and I walked around the “plate” a little, feeling an amazing lightness in my body, and then bent down to pick up a stone.

It unexpectedly turned out to be heavy, despite the clearly lower gravity than on Earth. I threw the stone to the side, and it flew away about twenty meters. Then we entered the ship. I wanted to sit on a chair, but Kirchiton told me to stand next to him.

Then he pressed something and the floor disappeared from under my feet. I hung between the floor and the ceiling, and he remained standing. Then he turned me to face the window and began to hold me in this position. Outside the window, the Sun was quickly approaching until it began to take up half the sky. The flames became large and curved and moved all the time.

It seemed to me that the surface of the Sun was boiling, and the dark spots looked like

swirling whirlpools. The ship stopped, and Kirchiton talked about its mass, size, etc.

After that, he brought me back, and I went home, but for a long time the deserted landscape of Mercury and especially the huge “boiling” Sun, which seemed to be just a stone’s throw away, stood before my eyes.

https://proza.ru/2023/02/21/1249

Travel to the planet Disnit in the constellation Aquila

Irina Podzorova

In July 2019, I was in physical contact with Kirchiton and he showed me the very interesting planet Disnit, which is located in the constellation Aquila, at a distance of 110 light years from us. When we arrived there, Kirchiton said that we should put on protective suits, because the atmosphere contains about 6% of methane gas, which is dangerous for earthlings, and in addition, it is quite cold there: outside the ship the instrument showed minus 26 degrees, in terms of the scale we are used to Celsius.

Almost all of Disnit is covered with a frozen ocean. Local residents have long lacked space on land to live, and several centuries ago they began to actively build underwater cities under special domes. Special installations on the shores of a few islands melt the ice, so that the connection between cities and the surface of the planet is never lost.

Kirchiton and I went into the water near the shore and swam a little. In a protective suit, you don't feel the temperature of the water or its flow at all, but you can dive without thinking about how much air you have and examine everything underwater through a special window in the protective suit, located opposite your eyes.

True, I couldn't see anything except black water. Kirchiton told me to press the elbow of my left hand, I did so, after which a very bright beam of white light appeared above my eyes, piercing the dark thickness of the water for many meters. But this didn't improve the situation much; at least, I didn't see a single fish or sea animal. There were also no plants in the water, but this is not surprising, because the water was too cold for the active life of multicellular organisms.

After swimming and diving a little in the ocean of Disnit, Kirchiton and I returned to the plate, which sank into the water and, like a real submarine, soon reached one of the underwater cities. A huge yellow beam emerged from its dome and pulled the ship inside.

There the temperature was more comfortable for us, 14 degrees Celsius, but the atmosphere still contained a dangerous concentration of methane for earthlings, so Kirchiton and I did not take off our protective suits and walked through the streets of the underwater city right in them. The houses of the Disnitites are similar to our one-story country houses, standing on three "pillars," but their walls consist of blocks of different colors, in the most bizarre combinations for our eyes.

As we walked around the city, in the distance we could see a greenish dome that rose very high above the city. A diffuse yellowish light came from it, but I didn't notice any lamps or lanterns. Near many of the houses grew small bushes with brown trunks and branches, densely covered with very small white flowers.

There were many local residents walking along the streets, as tall as

my chest, with white smooth skin, black eyes like coals, located on an oval, egg-shaped head too large for the body, and with thin arms and legs. They paid almost no attention to Kirchiton and me.

Kirchiton told me that one of the oldest colonies of Disnita is a planet with the same name, located in the constellation Aquarius.

Disnitians often fly to Earth, contact our people, but having an unusual appearance for us, they often do not do this themselves, but send their biorobots, created in our image and likeness and from our own genetic and cellular material.

These biorobots are practically indistinguishable from earthly people. They can only be recognized by a person who is able to see or otherwise perceive the energy structure of living people. Biorobots do not have a biofield, which immediately becomes noticeable on a subtle level for anyone who is able to understand what is happening there.

After a walk through the underwater city of Disnita, Kirchiton brought me back. I really liked this contact, because in regression I remember my life on Disnit. True, nothing I saw there seemed familiar to me, but it's still nice to visit the planet where I once lived.

https://proza.ru/2023/01/02/1157

Journey to Planet Esler

Irina Podzorova

Description of physical contact with Kirkhiton on August 14, 2018. A spaceship in the form of a saucer hovered about four meters above

me, and a staircase with railings on both sides instantly descended from there. I climbed it inside. It was light there, but there were no lamps. The hatch was in the floor of a small semicircular room. No one met me and I went straight down the corridor to the pilots' room. Kirkhiton was there.

I sat down on a chair against the wall, and he turned to the control panel and said that we were flying to the planet Esler. Then weightlessness began and I sat, holding myself in place, holding the handles on the sides of the chair. Then the weightlessness ended and Kirchiton went to the exit, and I followed him. The hatch in the floor was open.

We went downstairs and the first thing I saw was that it was day outside. The sun and sky looked completely earthly, there were no strange smells, and I began to look around. The plate stood on the edge of a strange forest, where the trees were in the form of white trunks with green tops, there were no leaves on them. Ahead, about a hundred meters away, I saw several large white domes, and we went towards them. Kirchiton entered one of them through the open door, and I followed him in.

There was a large round room, in the middle of which there was a round table. Behind him sat human-like creatures dressed in dark blue robes. They all looked at us, and several stood up and came towards us. They looked like this: about 170 cm tall, brown wrinkled skin, pointed ears at the top, dark short hair and large yellow eyes with a vertical pupil. One of them had a round, white, shiny object hanging on his chest, on which something similar to the sun was drawn.

He said:

- Greetings to you Kirchiton and you, his contactee. I am Odus and have been to your planet many times.

I said Hi".

Kirchiton turned to me and said:

“You mentioned mystics, now I’ve brought you to real mystics.”

Then he turned to the Eslerite and said:

- Odus, tell my contactee what Shambhala is?

The Eslerite looked at me and said:

- You are now in Esler's capital, Champ, and "loa" in our language means "arrived." There is an Esler base on Earth, which you named as Kirchiton said. Kirkhiton asked:

- How many contactees does Esler have on Earth now?

Odus replied:

- More than twenty thousand.

Kirkhiton asked:

- And you?

He replied:

- An eighth of all.

- And all physical? - I asked.

He replied:

- The first contact is always like this, but it is necessary. Communication in the Spirit is much closer than physical meetings.

Then Kirchiton said that it was time for us to go and we returned to the ship. I sat down on a chair, and weightlessness began again. Kirchiton said that the Daraalian brain consists of two parts: the right is responsible for the perception of the external world, and the left for memory and internal mental dialogue. Therefore, during mental contact they do not need to disconnect from the outside world. Then the weightlessness ended and Kirchiton said:

- A contactee is waiting for me, who has only been in contact with me for three months. We are studying the solar system. Your impressions of new discoveries make me very happy and confirm the correctness of my chosen goal - to work with you.

I went out into the corridor and saw an open hatch in the floor. I went down the stairs in the place where they took me from and went home.

https://proza.ru/2023/01/02/1101

Second contact with Kirchiton

Irina Podzorova

The second contact with Kirchiton occurred a few days after the first. It was about ten in the evening when I went to run errands with my

neighbors. They were not at home, but standing in their yard, I felt that there was something above. Raising my head, I saw that a classic dark-colored flying saucer was hanging right above me, without a single light. I immediately realized that this was Kirchiton and began to wait with interest for the development of events.

The plate floated silently through the air in the direction of the neighbor's garden, and I hurried after it, burning with curiosity. The plate soon stopped and a ladder instantly extended from there, along which I quickly climbed inside. To my surprise, it was very light there, although there were no lamps anywhere.

Kirchiton was waiting for me inside and led me to the pilots' room. I sat down on a chair there, and Kirchiton said that we were flying to the lunar base and turned to the control panel.

After a few seconds, I felt as if the chair beneath me was giving way and I was falling. Frightened by this sensation, I tried to jump to my feet, but suddenly flew up to the ceiling, which was about four meters away, and hit the top of my head painfully. Instead of falling to the floor, I remained hanging in the middle of the room, swaying slightly from side to side.

Immediately realizing that there was zero gravity in the ship, I tried to reach the chair with my hand, but nothing happened. Kirchiton turned around, quickly came up to me, took my right hand just above the elbow, sat me on a chair and said:

- Hold on.

I grabbed the handles on the sides of the chair, and he walked back to the drawers. The top of my head hurt from hitting the ceiling, my head was spinning, nausea was creeping up, everything was blurry in my eyes, and my heart seemed ready to jump out of my chest. I felt like my pulse was beating like hammers in my temples and throat.

Finally, the feeling of falling ended, and I felt that I was sitting in a chair quite normally.

The dizziness still remained, but the nausea went away.

“Let’s go,” said Kirchiton, and left the room.

I got up and followed him. It was very easy to walk, I felt as if I had been pumped with some kind of light gas, and I was about to take off like a balloon. The hatch in the floor was open, and Kirchiton and I quickly went down the stairs.

I saw a huge cave with stone walls and a dark gray floor. It was light and quite cool in the cave. I looked at the plate, it stood on two supports, it was gray metallic in color. White light emanated from its circumferential windows and open hatch.

- Where are we? - I asked.

- This is a lunar base on the side of the Moon invisible from Earth. This cave maintains a normal temperature and the composition of the atmosphere familiar to us, so we can be here without protective suits.

I looked up. The ceiling of the cave was very high, probably twenty meters away. Surprised by the unusual feeling of lightness, I jumped on the spot and flew about five meters above the floor, rising above Kirchiton and the plate. I descended very slowly and, touching the floor, jumped up again, enjoying the lightness of my body and the delightful feeling of flying.

“It’s time for us,” said Kirchiton, and with a quick bouncing step he headed towards one of the walls of the cave.

I hurried after him, jumping at every step. In the wall I saw a large brown door, which lowered as we approached, becoming part of the floor. We found ourselves in a long narrow corridor with black doors on both sides. Kirchiton pushed one of them, the second from the entrance on the right, and we entered a large oval room with greenish walls, in the middle of which stood a table without legs, integral with the floor, as high as my chest. There was another humanoid in the room, indistinguishable in appearance from Kirchiton.

“This is Pirzhiton, he is a biologist and physician on our planet, a specialist in alien life forms,” said Kirkhiton, “he does not know Russian, so if necessary, I will translate his words for you, and yours for him.”

I nodded.

“Tell me,” Kirchiton continued, “do you agree to be our contactee?”

- How is it?

- I will fly to you twice a week at the appointed place and time and show you different planets.

- What is needed for this?

- This will be possible if you agree to three conditions.

- Which?

- The first condition: go to contacts twice a week, excluding the winter period, while there is snow on the ground. Instead of every missed physical contact, you and I will have five mental ones.

- What is this?

- Mental contacts.

“I agree,” I nodded.

- Second condition: do not tell anyone about contacts with us.

“No one at all,” I was surprised, “not even my mother?”

- It is advisable to keep contacts secret, because if you talk about them, you will encounter people’s distrust and suspicion, and I wouldn’t want that.

“I see,” I nodded again, “I agree.”

“And the third condition,” Kirchiton continued, “contact is established for life, so think carefully before agreeing.” If you refuse, I will now take you back and we will never see each other again.

I imagined how many interesting things I would see and learn if I agreed to become a contactee and without hesitation I said:

- I agree.

- Fine. Then we will now give you a chip and from now on you will become our contactee.

- What is a chip?

- This is a micro-device for observation, it is completely harmless to your body and will allow me to always be aware of your affairs, and will also make mental contact between us possible.

“Put it on,” I shrugged.

“Lie down here,” he pointed to the table.

I walked over to the table, jumped onto it quite easily and lay down on my back. The table felt warm to the touch, like silicone, and elastic, springing a little under me. Pirzhiton, who had not uttered a word during all this time, said something in an incomprehensible language, Kirkhiton answered him. Then they came to the table and stood on either side of me. Their gazes were directed at me. Pirzhiton passed his palm in front of my eyes, and I instantly fell asleep or passed out, and when I opened my eyes, I saw myself lying on the same table. The aliens were still standing next to the table.

“Get up,” said Kirchiton, “everything is ready.”

I sat down on the table and looked around myself. There were no visible wounds or injuries, nothing hurt, and the clothes were in order.

- And where is the chip?

“Here,” Kirchiton pointed to the upper left part of the abdomen, “it is shaped like a hair, two millimeters long, made of organic materials, permeable to all types of radiation and cannot be rejected by the defense system of your body.” Over time, the chip will become part of

your body.

“I see,” I said, jumping onto the floor, “thank you.”

- My pleasure. Thank you for trusting us and for agreeing to become a contactee,” Kirchiton replied.

“This is very interesting to me,” I smiled.

- I will try to justify your trust in the future, but now it’s time for us to go.

Kirchiton and I left the room and, after passing through a short corridor, we again found ourselves in the cave where the plate stood. While we were flying back, in order to distract myself from the unpleasant sensations in zero gravity, I asked him about the lunar base.

“It belongs to many civilizations in contact with the Earth,” said Kirchiton, standing with his back to me and pressing some buttons on the box.

- Why don’t you openly communicate with all people? - I asked.

- Your planet is not yet ready for mass contact.

- Why?

- People for the most part are aggressive and short-sighted. They care only about immediate benefits, and for the sake of bodily pleasures, many of you neglect spiritual values. Trust, understanding, love and compassion are an empty phrase for many earthlings, and all this does not allow your mind to open to the knowledge of the universe and other forms of life in it that are unusual for you.

I was ready to bombard him with questions, but then the weightlessness ended, and he said:

- It's time for you. I brought you to the designated place for contact. Come here every Tuesday and Thursday at half past nine in the

evening.

- How do you know our days of the week and time? - I was surprised, - You're from another planet.

His lips stretched into a thin line, and I realized that he was smiling.

"We have studied your ways of counting time very well," he replied.

Going down the stairs to the ground, I found myself in a pine forest. The plate rose up very quickly, I heard a quiet whistle and felt a gust of wind. In place of the plate, a star flashed for a moment and everything disappeared. I looked around. There was a dark pine forest around, I stood in a small clearing and had no idea where to go. Fortunately, I well remembered the location of our village and knew that the pine forest could only be to the north of it. I decided to go south, reasoning that sooner or later I would reach the village.

Having found the North Star in the sky, I turned my back to it and walked through the forest as quickly as possible. I carefully looked at my feet so as not to fall, because it was dark, and there was no road or path under my feet. I felt very uneasy, it seemed that I had been walking for a long time, and this forest still did not end. Mentally encouraging myself with the words that nothing threatens me here, about ten minutes later I left the forest. My heart was beating wildly. I immediately recognized the area, jumped for joy and quickly ran home.

First contact with Kirchiton from the planet Daraal

Irina Podzorova

I was 13 years old, it was 1999.

One evening in July I was playing ball with the guys near the park. It was about nine o'clock in the evening, it was getting a little dark, and we began to disperse. The guys left, and I decided to walk a little more.

I walked through the park and decided to go home, but not through the main entrance, but through the back gate, which opened onto an unlit, rather dark street. I went out through the gate and walked along the street where the lights were not on. Although our village is quite large - about five thousand people, I noticed that there were no cars visible, I couldn't even hear people's voices or laughter - there was some kind of calm.

I was walking along the side of the road and, raising my face up, I saw a strange black triangle standing in front, which was not located vertically, like a rocket, but horizontally. It stood on three supports, and near it there were five people, as I then thought, five dark figures.

In this triangle there were round white windows, the door was open, and even the stairs were visible. I stopped and thought:

"But nothing like this has ever happened during the day; I passed here. What it is? Is construction starting or has the attraction been installed?"

Then I became interested, and I thought: "There are five people standing there - let me go up to them and ask what kind of triangle this is."

I went to them. Coming closer, I saw that they were much taller than people, about three meters. Dark figures that had no neck, and had three eyes on their faces: two eyes - round yellow and a little higher - red. When I saw such figures, I stopped, trying to understand what it was, who it was.

I was just a little surprised when one of them asked in an ordinary male, low voice in Russian:

- Who are you?

When I heard a human voice, I thought that some people were making a film, and these were actors in disguise, obviously men. I automatically asked:

- And who are you?

He said: “I am Kirchiton.”

“And I’m Irina,” she introduced herself.

He asked me: “Will you fly with us?”

When he said “you will fly,” I immediately compared the triangle, the appearance of these people and the word “you will fly” and realized that these were aliens. Who else could look like that and ask such questions? I answered: “I can’t fly with you, I need to go home, my mother is waiting for me there, if I don’t come for a long time... she will worry.”

Of course, I wanted to look, but I understood that it was very far away, where they could live, and if I was gone for a long time, my mother would look for me. That's what I answered him. To which he told me: “Mark the time - in exactly two minutes you will be here.” I really wanted to... I thought that if I’m here in two minutes, then I’ll be able to get home on time... I want to see where they live. And I said:

- Okay, then I agree.

FLIGHT ON AN ALIEN SHIP

He silently turned and walked up the stairs to the “triangle”, I followed him. The other four, they were silent the whole time, followed me. We went inside the “triangle”, and the first thing I saw

was white light, everywhere, as if from bright light bulbs.

There were no lamps or lanterns themselves. Just light. I took a special look: gray walls, a semicircular ceiling, grayish-dark. And I was also surprised, how can there be light without lanterns, without light bulbs?

I walked in, turned to the right, there were five or six chairs along the wall. They (the aliens) are three meters tall, and the chairs should be under them, but then it would be difficult for me to sit on them. And the chairs were under me, that is, I calmly sat down on one of them, and those four stood opposite me.

Above their height, round windows were visible, but they were high up, I couldn't see anything there. It was dark and that was all. Kirchiton went a little further, deeper. There was a table there and lights and some buttons were blinking, but I didn't look.

He came up and blocked the view. Before that, he said: "Sit down and count." I sat down and began to count to myself: "One, two..."

I didn't feel any special sensations, I sat and counted. When I said "fifteen" to myself, he (Kirchiton) came up to me again and said:

- That's it, we've already arrived.

When I turned my head to where the door was, it was not visible. It's not that it closed, there wasn't even a gap left. There was just a wall. Well, when he said: "We have arrived," I turned my head again, the door appeared there again. He went through this door, I got up and followed him.

We went out, and the first thing I saw was day on the street. It was already dark at home, evening. I look - it's day! I raised my head up and saw that the sun was almost at its zenith, but it was not yellow, but white with a purple tint.

It was quite hot. I was wearing summer clothes, but it was still quite hot. There was a smell in the air, similar to a lit sulfur bomb or matches that had been burned in the room for a long time. I looked around and saw that our "triangle", near which we were, stood on a

flat round area covered with asphalt, but there was not a single bump as smooth as a table.

There were no trees visible. I took a special look and there was asphalt everywhere. Even when we walked through this square, we went down, there was a threshold, and we continued along the road. I didn't see a single blade of grass there, not a single green tree, everything was simply covered with asphalt.

A little to the right, in the distance, I saw houses, but it was not a street, they were standing in disarray. It seemed to me that it was twenty floors high. They were black, but there were no windows visible, just some towers. And not square, like we have at home, but cylindrical. We have water towers like this, only these ones are dark in color. And not from brick, but from something completely unknown. It was far away. We didn't approach them.

We walked in silence and suddenly I saw several people just like him (three meters tall with three eyes) walking towards us. They stopped near us and we stopped. They looked at me and said something to him. He answered them. I looked at them, then at him - if you told me, look away, and then turn around and find where Kirchiton is, I wouldn't be able to tell him apart. They were absolutely the same.

Kirchiton said something, the words were incomprehensible, they answered briefly and went back to where we came from, and we headed further. I breathed this unusual air, and it made my eyes water a little and my throat began to sting. I asked:

- Kirchiton, what does it smell like here?

I was only thirteen years old. And he tells me:

- This is sulfur oxide in the atmosphere, but its concentration is safe for you.

I didn't really understand it then, but that's okay. We walked a little more meters and stopped near a square building, about two floors. Such a long barrack. Also without windows - dark. There was a door

with a handle, he opened it and walked in, I followed him and saw that it was again a large room, like a hall, empty, only in front there was a high table, taller than me, right across the whole room. And again there is light, and there are no lamps. There is a smell, but it is very weak. And in that “triangle” it was not there at all. Kirkhiton said:

- This is our store.

In the light, I looked at him: he was in a dark overall, and his face and hands were open. But his skin is gray and smooth. Five fingers, only they are thin and long. Gray smooth skin, no wrinkles, no hair anywhere. We approached this table. He continued:

- Our goods are on it.

I speak:

- But I can’t see anything, I’m too tall.

Kirchiton came up behind me, lifted me by the arms and said:

- Look.

In fact, there were many objects lying there, under glass or plastic, but I only managed to see two objects. There lay a plucked bird, similar to our ostrich. This reminded me of how they sell chickens in our stores, but in ours they sell them without heads and paws, while they were simply plucked, with a head, with limbs, and even had a wide beak.

Why do I call it an ostrich: a long, large neck, a curved beak, and otherwise a bird reminiscent of ours. And next to it, a little further away, lay a stick, black, like a long pencil. I saw these two objects, and he put me down. I asked:

- What is this you have lying around?

- This is our food, we eat this.

- What kind of stick is this?

He took it out, but not from there, but from himself, although I didn't see his pockets - he just stretched out his hand and took out exactly the same one.

- And this is our kind of thing - a flashlight.

He clicked on something, and a beam appeared, like our laser pointers, only there the beam was brighter and white. Thin white beam. Even with this light (the light in the hall) he was clearly visible. He removed it.

Then he took out an object from somewhere else and said:

- This is our coin.

It was not round, but in the shape of a diamond, about half the size of a palm, even a little larger. Yellow color. He handed it to me - it felt kind of metallic to the touch.

"I said, I'll bring you home in two minutes." Let's go to. I'll take you.

And while we walked to the square where the "triangle" stood, I asked him a little:

-Where are we now?

- We are now in the city of Kuuli, and this is the capital of Daraal.

- What is the capital of Daraal?

- Daraal is our planet.

- How? - I say. - The capital of the entire planet?

- Well, yes. We don't have countries. And only one capital.

- Where is it?

- We are now in a constellation that is visible from your planet as the constellation Cassiopeia. 150 light years from the Sun.

We have entered this "triangle". The four accompanying people were no longer there. I sat down on the chair myself and didn't count anymore. She turned to the door - it was closed again and had already disappeared. I looked at the wall and thought: "Where is there, what kind of gap? No, just a wall." He went to the remote control and pressed something. I sat silently. Two minutes passed - not much time, he came up to me and said:

- That's it, you can go home. In the near future I will fly to you again, we will talk.

Kirchiton said nothing more during this contact. I got up. The door was already open. I went down the stairs and saw that I was standing in the same square near the park. Again, no people, no cars. It was already dark, and I didn't have a watch with me.

I took a few steps, heard a whistle behind me and felt a gust of wind that shook my hair. I looked around - the "triangle" was no longer there, just a bright star flying. 1-3 seconds and she disappeared.

The sky was starry. Well, I went home.

Abortion

Deliberate deprivation of the life of a rational spirit, disregard for its life. After all, he will no longer be able to be born in this body and fulfill his tasks in this incarnation, which he has been waiting for for many years.

It is impossible to atone for this. You will no longer resurrect a murdered child. You can only make sure that the sacrifice of his soul is not in vain. If you understand why this is unacceptable, you will love him. You will love and forgive yourself for it. If you do not love and forgive yourself, and lower your vibrations, then his sacrifice will be in vain.

He endured his torment and is in the Spiritual world. Forgive yourself for it and admit to yourself why you did it. Imagine yourself in the same situation you find yourself in. What would you do now? Would they repeat this act or not? If not, think about what way you could find to avoid doing this. Did you have it then or not? We need to analyze it.

From

Rejection from Love. This is not a place, this is a state. Hell is a symbol of the suffering that occurs without God. This is a state of spiritual death, staying in low vibrational states of hatred, anger, resentment, condemnation. Man himself creates hell for himself already on Earth. The state of hell is a mismatch, an imbalance of the vibrations of the human spirit and the vibrations of Divine energies, which are so different that when high vibrations come into contact with lower vibrations, the lower vibrations experience a complete imbalance of their own essence, which is expressed in sensations of burning, pain and other unpleasant painful feelings. Spirits that were at low vibrations at the time of death end up in hell - these are anger, fear, envy, hatred, jealousy, resentment, i.e. some negative emotions. And if their number exceeds the number of positive energies, the spirits fall lower, as if drowning. Because the spirit itself is in a state of anger, resentment, fear, etc., it has a deficiency of its inner Light. He did not realize it during his lifetime. The demon in Hell will unite, in any case. with the spirit that was previously his Higher Self and will become a complete being. He will understand, realize why he came into incarnation, that he did not fulfill his task, since he got to the demonic level. He lowered his vibrations, this happens in most cases. He has a double feeling - regret for that life, for the actions that he did, that they lowered his vibrations and made him suffer. And at the same time, he has a sense of the justice of what he did and the injustice of this suffering. The demonic consciousness is ready to make anyone guilty of its suffering, but not itself. Because in order to make himself guilty, he must look inside himself, and it hurts him to look inside himself. He doesn't want to see these blocks there, these little demons that made him this big demon. And in this state he is in a certain space of the Spiritual world at his level.

Adenoviruses

A large group of viruses that cause ARVI in humans and animals - an acute respiratory viral infection: runny nose, sore throat, lacrimation, cough, inflammation of the upper respiratory tract. There are quite a lot of strains, about 80 of them.

#390, 21:49

Adrenochrome

A substance that is formed as a product of adrenaline metabolism. Every person who experiences stress releases adrenaline, which is then converted into adrenochrome and excreted from the body.

When adrenaline levels rise, it is processed in the liver into adrenochrome, just like in a chemistry laboratory. This happens before it is removed from the body. But this is regardless of how much adrenaline gets into the blood - a lot or a little, it will still be processed, including into adrenochrome.

In a state of very great horror there will be a lot of this substance. If it is not horror, but aggression, for example, the same thing - there will be adrenochrome. It can be obtained in any stressful situations.

#146, 52:18, #258, 17:03, #374, 48:08

Hades (Pluto)

The image of death, behind which are the spiritual entities of death - guide angels who come to take the soul to the spiritual world after the completion of incarnation.

#288, 47:20

Solar battery (alien device)

Removable batteries that were charged from the Sun. They could operate for 12 hours, then had to lie on the roof of some temple all day and charge. These rechargeable solar panels that were in the scrapers can withstand a virtually infinite number of charge and discharge cycles. They contain a material that does not collapse.

Two plates of very thin shiny material, this shiny material was usually a

compound of equal parts tantalum, tungsten or with the addition of molybdenum, not more than 13%. But this is not the main part, it is just a holder, a holder of this field inside the battery itself. There was a cotton-like thing inside that held the solar charge. This cotton wool consisted of ring-shaped structures. Molecules are like threads that are twisted into rings and spirals around each other. For every five carbon atoms there was a sixth—germanium. This is called molecular adhesion.

#403, 01:08:50, 01:12:45

Chakra activation with essential oils

Not an automatic opening, but bringing to the person's memory those situations that may have blocked this chakra. To feel this, you need to mentally distract yourself from everyday affairs. Even if a person massages himself, he should relax and clear his mind. A memory that comes to mind can come suddenly - you need to pay attention to it and direct the Light of Love there. You can also concentrate mentally on the coccyx area - imagine the Light there. This will also increase the impact.

To cleanse and open the first chakra, it is good to massage the whole body, especially the feet with ylang-ylang oil. Bergamot oil is also suitable . The soles of the feet are in contact with the ground , and the energy of plasmoid terrestrial civilizations comes from the ground into the middle of the feet. In the middle of the foot, like in the palm, there is a mini-chakra - an energy center. On the feet there are two channels in two legs, and on the subtle etheric plane it is one large funnel. When you massage your feet with this oil, the work of the first chakra is activated, all its petals, all the structures that are in the first chakra begin to open.

Citrus fruits suit the second chakra. They have an antidepressant effect. The second chakra is responsible for emotions and its activation brings a feeling of joy and optimism. Use essential oils of grapefruit, tangerine, and orange.

Lemon oil is more for the third chakra, its activating moment, here is

lemon and eucalyptus.

The fourth chakra is lavender. She is also approaching the sixth. Myrrh oil – to activate the fourth and seventh at the same time. Each oil can affect several chakras.

For the fifth chakra, different oils can be used here: thyme, basil, coriander and other spices.

The sixth chakra is more suitable for coniferous oils: cedar, juniper, pine, that is, woody scents.

And the seventh chakra contains smells of a special group, “noble” (which are sprayed near temples). These are frankincense, myrrh, sandalwood. All sandalwood scented oils activate the seventh chakra.

In order for spiritual vibrations to increase, it is very important that the aroma of the oil is subjectively pleasant to a person, so that he can experience joy and not experience discomfort.

The purer the oil - without impurities, the more vibrations of the plant it contains.

#492, 14:01, 23:15, 25:17

Alan Chumak

Contactor with plasmoid civilizations. He also contacted the planet Burkhad in the Astral.

#427, 39:16

Alkalosis

A condition that occurs in a person when the acid-base balance is disturbed in the direction of increasing from its norm (7.30-7.35 to 7.45) and causes serious disturbances in human metabolism, respiratory failure and a tendency to convulsions. These are the first symptoms. The person will begin to experience attacks similar to bronchial asthma and convulsions. If it reaches 7.7 or 7.8, it may die. This is if you look at blood plasma and capillary blood.

#171, 00:20

Allah

God is the creator of the Universe. Allah, according to the teachings of Islam, did not incarnate. He cannot incarnate because he is a spirit and fills the entire Universe.

#270, 09:51

Allergy

Intolerance to any substances caused by 3 main reasons:

- poor slow functioning of the excretory systems (liver, kidneys);
- various infectious parasitic diseases that cause severe allergization to foreign proteins;
- psychosomatic causes (energy blocks, various emotions, thoughts, etc.) that begin to destroy the structure of the physical body.

#80, 26:25, #86, 40:18, #427, 23:59

Alcohol

Natural substance. Now it is created by man. But there are conditions in nature for the natural formation of alcohol: metabolism, for example, of various bacteria that feed on glucose, sugar and release this substance as by-products. It is created by some living organisms created by plasmoids. Moreover, in every human body, a cell or group of liver cells also produces some amount of alcohol. It is needed for internal biochemical processes.

#427, 23:59

Alchemy

The science of the spiritual and material worlds. Deals with the consideration of the material laws by which chemical substances operate from the point of view of the spiritual world.

#207, 01:00

"Amen", "Om"

Words coming from one word that has become a root in many modern languages. This word was still in the Proto-Indo-European language. Both "Om" and "Am" consist of two letters. Many letters consisted of runes, and runes could represent a combination, like a syllable.

The syllables “Om”, “Am”, as well as “Im” originally denoted such a concept as mind, and not even just mind, but Divine Mind.

For example, the word “Amen”, at the end there is now a soft sign; in the past there was no soft sign, but it was not accidentally placed there later. There is no simple word “amine”, which could be decomposed simply as “AM” and “IN”. At the end there is a soft sign, which shows us that we need to lay it out differently: the syllable “AM ”, then the letter “I”, separately the letter “N”. If all this is deciphered to the modern understanding, then the word “Amen” meant at that time: the mind

manifested in energies, or, more specifically, the Divine Mind manifested in energies.

The word “Om”, with which many mantras began, meant an appeal to the Divine Mind. One of its weak reflections was the human mind that pronounces this mantra.

#446, 53:55

Ana Bae - Koah

Prayer in Judaism.

#243, 04:22

Ananda

Bliss, state.

#33, 46:53

Angels

“Messengers” translated from Greek. They, indeed, carry the News and not just like communications workers on Earth, but they carry the News with their very presence about the Light that shines in their world at their level.

Spirits from the 17th to 24th levels, which, one might say, have found Light in themselves, have found Love in themselves, and can incarnate into any world in order to help others in this. Light is understood by them not only as the Light of Love, but is understood, for example, as the Light of knowledge, as the Light of healing, and so on. These are some high-vibration “good deeds” that lead everyone to perfection, and the highest perfection is precisely in becoming like God, because it is

believed that He is selfless and unconditional Love. And at the same time, this Love allows Him to possess all qualities in absolute measure.

Any spirit at a higher level can visit a spirit at a lower level, but the opposite cannot happen. Demon levels are located in the world of disembodied spirits from 1st to 6th. Any Angel, including those from the 24th level, can visit the levels of demons, but for this he needs to slightly reduce his vibrations, not the vibrations of his essence, but the vibrations of his spiritual, astral body, and the vibrations of the essence, naturally, remain angelic.

An angel does not become a demon when he descends to their level, but he gets there at will in order to tell them about God, for example.

Angels, if they are disembodied spirits , have no gender. This is simply an image that reflects the body in the last life before leaving incarnation.

#41, 01:00:23, #177, 04:11, #239, 30:56, #344, 39:20, #486, 55:53

Consulting angels

Spirits from the 22nd level of the World of non-embodied spirits, whose main task is to help other spirits in selecting the best conditions for spiritual development for incarnation. They have well-developed symbolic thinking, knowledge of all the intricacies of karmic psychology, the laws of existence in material worlds of different densities, and have access to Divine knowledge about each spirit that turns to them for help in selecting an incarnation. They must take into account many factors that contribute to the development of specific spirits in the Light of Love within themselves, and correlate them with astrological and numerological data in the material world, adequate to the description of the spirit that is incarnated and its tasks, for its recognition by individuals prepared for this.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”,

#20, 15:40, #33, 46:53

Angels of nature

Spirits from the 17th level of the World of disembodied spirits, whose service in the spiritual world is to teach fine-material plasmoid civilizations the correct, in the Light of God, control of natural elements, the birth of animal souls and the assembly of their energies into one whole. They also often incarnate in the worlds of plasmoids in order to guide them on the true path and often incarnate in the worlds of humanoids in order to more fully feel natural energies and learn to work with them.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

Angel guides

Spirits from the 21st level of the World of disembodied spirits, whose task is to meet spirits who have forever left their material bodies and accompany them through the astral plane to the world of disembodied spirits, to the level they reached while living in the body. Also, the task of the Guides is to accompany the spirits, whose turn has come to incarnate into the material world, and to help in connecting them with the future body. Guides very often walk through the astral plane, meet with different spiritual beings who are at different levels of spiritual and intellectual development, therefore they have flexible thinking, a consciousness capable of adapting to different circumstances, they can quickly navigate the environment and find a common language with a wide variety of intelligent beings . They have developed tolerance for the opinions of others, the ability to persuade and courage in the face of life changes.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”,

#20, 15:40

Prophet Angels

Spirits from the 19th level of the World of disembodied spirits, whose main task is to convey the Word of God, His laws to the minds and hearts of all spirits. The word "prophet" here means a messenger of God's will, not a seer. We must remember that the future has many options, so it is impossible to accurately predict what will happen next. Any, even the most negative, forecast is a reason for reflection and attempts to move events in a more constructive direction, and not a reason to fold your arms and passively wait for the negative forecast to come true. The task of the Prophets is to teach embodied and non-incarnate spirits that true spiritual unselfish Love that shines in them with infinite Light and spreads to everyone who falls into their field. They do this not for the sake of understanding, glory or reward for their labors, but for the sake of the happiness that increases in them with each new spirit that has learned through their service all the beauty of Divine Love.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

Guardian Angels

Spirits from the 18th level of the World of non-incarnate spirits, whose main mission in the spiritual world is to care for embodied spirits from various levels. The Light of Love, which they realize , allows them to tolerate, forgive and protect even the most ungrateful and evil spirits. The guardian can sincerely and lovingly care for the demon, rejoicing at the slightest sprouts of goodness in his soul and, more importantly , he is able to understand and forgive if the demon suddenly tramples these sprouts and throws them to his benefactor. Every incarnated spirit has a guardian angel who, during incarnation, wished to have one. One embodied spirit can have several Guardian Angels, and a Guardian Angel, especially an experienced one, can also have several wards. The task of the Angels is to protect their wards from evil spirits, drive away bad thoughts and instill good and bright images that help them go to God. You can communicate with them mentally, telepathically. Guardian angels believe that independence is the best

condition for the development of the embodied spirit.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”,

#59, 38:05, 39:00

Healing angels

Spirits from the 20th level of the World of non-incarnated spirits, whose work in the spiritual world is to heal other spirits, incarnated and non-incarnated . The word “healing” is understood by them in the broadest sense of the word, as restoration of the integrity of the body, energy, consciousness, and so on. Healers do not tolerate any disorder or chaos; it gives them almost physical pain and the desire to bring everything into line with the understanding of the world order that they have achieved at the moment. Spirits from this level feel very well the pain of others, both physical and mental. If they do not learn to protect themselves from this and recover, they can exhaust themselves and gain so much of someone else’s pain that they will begin to instinctively close themselves off from it, artificially lowering their vibrations, which will cause inevitable degradation and a drop in spiritual level.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

Andara

A group of civilizations united into a single stream, directing from different levels or civilizations a single stream of energy, which we can transform through our thoughts, charging crystals.

#131, 04:38

Anesthesia of the senses

A state when a person cannot say what he feels and cannot experience any vivid emotions. He goes through life in an emotionless state, simply recording certain phenomena without feelings towards them, much like an automatic robot program. But this does not mean that this soul becomes a robot.

The so-called anesthesia of the senses is a common symptom and frequent accompaniment of depression.

#477, 18:45

ankh (symbol)

A symbol denoting a person's connection with God, with the Sun. The circle is the Sun; God was designated by the Sun as eternity, a sign of eternity.

Ankh structured the space in such a way that the one who took it to him immediately felt connected with God, connected with the Sun, his aura increased and became stronger, which structured the space.

#403, 01:06:00

Annunaki

Any aliens from heaven, translated from the language of the Chaldeans in Babylon. A synonym for this word is "elohim" - alien, translated from Hebrew.

Common name for aliens. An approximate translation is heavenly inhabitants. Any of their coalitions, individual civilizations, or even detachments of scientists in different systems of mythology could be called; even the priests of two neighboring temples could be called Annunaki, that is, completely different creatures.

"Coming from Heaven." An image of humanoid aliens.

#68, 29:23, #112, 44:25, #234, 01:22:15, #313, 39:47, #343, 11:05

Antiverse

That part of the universe in which there are also planets and stars, but it is located beyond the space of our Universe and consists of antimatter, also dense, having an energy charge opposite in the direction of rotation of the torsion fields from the direction of rotation of the torsion fields of our Universe.

Parallel universe. The spiritual world is the basis for the matter of this world and the home of entities that temporarily come to incarnate in this world.

This is a dense Universe. In it, atoms are built in such a way that their energy levels are different, on the contrary.

Humanoids originally descended from lizards, but they were flying. At first, the ancestors were flying (like a bat, only its wings are more like a bird, but there are no feathers, some strange creature covered with smooth dark green skin). Then these flying ancestors began to live on earth. Their gene code changed: they gradually lost the ability to fly. They then evolved into intelligent beings because they were exposed to conditions that were contrary to their instincts. Because of this, they began to use their brains to recreate situations in which they could survive. Their brains began to improve

Bodies are built differently; they imply a very large possibility of possessing energy. And if a spirit is embodied that has not eliminated its negative qualities, it can, using these energies, destroy our Universe.

Slow type of metabolism with the environment. The body is slowly destroyed by constant cell division, it consumes little oxidizing substance, oxygen (they also breathe oxygen), but they consume less of it, and this causes the cells to be destroyed less. Oxygen has a different molecule structure: six atoms that occupy a circle. The

analogue is an oxidizing gas.

Such energies in the body that can slow down and speed up time processes in the body, and even influence the processes of change in the material world outside the body.

Different types of substance. The substance may be the same, but the structure itself is different. Due to the fact that the structure is different, these Universes are not located in each other, but in parallel. If different types of matter meet each other, they will collapse due to the fact that their energies do not match, and there will be a release of energy.

Energy capabilities allow you to control matter.

#22, 34:40, #155, 22:10, #401, 52:14, #406

Antigravity

A special gravitational field, but directed in the opposite direction.

The liberated graviton field, which is embedded in a rotating electromagnetic field, is modulated by a special signal, a special vector, which is directed downward towards the Earth. It turns on due to the fact that the energy contained in the anti-gravity device is accumulated by a special material.

Anti-gravity platforms and anti-gravity devices were used not by earthlings of ancient civilizations, but by aliens who flew to them. Not

always, but in those cases when help was needed in the construction of a large facility. Aliens provided assistance in relocation. An object the size of a pack of cigarettes was placed on a large stone. They pressed a button (a place on the body), an anti-gravity field appeared, which made it possible to lift the stone above the ground and further move it using ropes and other means. This was before the war that happened 12,000 years ago.

There are various devices (a battery, for example) that accumulate energy, including from the Sun, stars, and geomagnetic fields located on Earth. When turned on, they quickly convert it into anti-gravity.

#437, 01:22:12

Antibodies

Substances that are produced by lymphocytes to protect against the virus.

#296, 23:40

Antichrist

Any spirit that goes against Christ, against God, against the laws of unconditional Love. It is not one specific spirit, there are different spirits that put themselves against God, Christ, unconditional Love.

#83, 35:31, #215, 00:22

Anthropomorphic

A creature shaped like a human.

From the Greek " anthropo " - man, "morpho" - form.

#238, 36:20, #324, 38:18

Anthropomorphic civilizations

Civilizations that have a biological development of the body similar to earthlings: body shape, height, basic metabolism, warm-bloodedness, childbearing, and so on. These are representatives of the dense material world, not plasmoids.

#33, 38:50, #149, 04:20

Apocalypse

Revelation translated into Russian. A special form of literature that describes the mystical experiences of the author and his teacher.

#206, 01:54:50

Apollo

Deified man, earthling, priest, poet. Physical contact with representatives of Burkhad , visited their base under Mount Olympus. Zeus (Cephaestis) patronized this.

#288, 39:29

Apostle Peter

#261, 12:41

Apshetarim

The representative of the planet Tumesout , in Islam is known as the Angel Gabriel. Currently controls the Muslim egregor.

#293

Arakhsi

Planet. Inhabitants are oviparous amphibians. The head is a narrow ellipse, a thin long body, long arms, 3 long fingers and short legs, 2 black round eyes, there is a third eyelid. 14 main chakras. The skin is light green, glowing from within. The arms and legs are closer to a yellowish color. Representatives of their civilization have no families. They meet women only for the duration of reproduction to exchange DNA, and then live separately.

#257, 21:57

Arjuna (the essence of his service to God)

Protecting the laws and the weak. It was his duty to protect the order of God. If he allowed this order to be disrupted, he would fall in his vibrations and would not fulfill the purpose of incarnation.

#305, 28:45

Ares (Mars)

Defender of the Earth in a war 12,000 years ago. There are many reasons to believe that this is one of the names of Ashtar Sheran.

#288, 41:38

Tarot deck

Energy-informational spatial modules or matrices, which contain certain images or a certain meaning, the interpretation of which depends on the specific situation and on the nearby arcana. And the same lasso, which fell out in different situations, can mean different things.

#418, 33:06

Arcturus

The star around which the planet revolves, with the Khomureta civilization inhabited on it (something between “x” and “g”, Gomuret) of a humanoid type. Its representatives are anthropomorphs , they look like earthlings, only they have light skin color and ears, like the Eslerites , they are a little like them. They have large dark eyes. The Khomureta civilization is also part of the Interstellar Union.

#427, 11:52

Arkha

The capital of the ancient Earth. Translated from the ancient language - “white fortress”, because its walls were lined with white material similar to marble.

#210, 01:11

Aromatherapy

Phytotherapy section. Its peculiarity is due to the fact that plant aromas and special essential oils are used here. Substances that have

a strong odor are collected in a liquid such as plant concentrate, and are used more through the respiratory system. Although aromatherapy involves the use of essential oils internally, the name itself suggests that it is the inhalation of aromas. Aroma is a certain pleasant smell. Aromatherapy is healing through the air, through breathing.

In cases of functional disorders, as well as diseases such as acute conditions of the gastrointestinal tract, respiratory tract, respiratory system and exacerbation of chronic diseases in this area, you can get by with essential oils alone. But each person is individual, for some this is suitable, for others they need support with other drugs.

This is a very promising direction to improve people's health, reduce the dosage of medications they take and the occurrence of side effects. There are great prospects for the use of essential oils in psychology, psychotherapy and even psychiatry. Because using them, spraying them in rooms where patients of this profile are located, will contribute to emotional calm and harmonization of all their spiritual states.

#492

Fragrances (action)

Attracting at the energy level high-vibration plasmoids, which with their presence begin to cleanse the space of all low-vibration forms. There are fragrances: aromatic resin, such as frankincense, sandalwood, myrrh and so on. When they are sprayed with smoke, when the substance burns and the smoke begins to spray, then this smoke produces such an effect at the energy level.

#344, 01:23:00

Artemis (Diana)

A man, the deified ancestor of a tribe of female warriors and hunters who lived in the South-West of Greece. Contactor with plasmoid worlds.

#288, 45:34

Rheumatoid arthritis

Violation of energy, blocks in the first chakra.

#124, 32:12

Archangel

A creature that is on the 22nd, 23rd, 24th levels of the Spiritual World and higher. Already the 22nd level can be called the level of Archangels. There are Angels who can enter the Divine world, that is, from the Spiritual world they can enter the Kingdom of Heaven - the world of Light.

The Divine World, that is, the Kingdom of Heaven, which is beyond all spiritual levels, can include Angels of the 22nd, 23rd and 24th levels according to the terminology of the Interstellar Union of the Milky Way Galaxy. And these Angels can already be called Archangels.

The word “Arhi” means power, beginning, strength, ability to control. Archangels can manage the training process of other Angels. Therefore, there are a lot of them, if you take into account all the galaxies of the Universe, there is an unimaginable number of them, that is, several billion, so to speak.

#446, 39:50

Archangel Gabriel

Embodied spirit. Incarnated on the planet Burkhad from the 16th level. This was 6026 years ago.

He incarnated on Earth 32 times, but at different levels of density. If we take the physical plane, he was incarnated 3 times. Before the war, he incarnated on Earth 12 thousand years ago, three million years ago. Incarnated as Teraxis . This was a man who lived about 600 thousand years ago. He was a city builder, an architect, on the territory of the Kola Peninsula. This was on the site of the Arctic Ocean. There used to be a lithospheric plate there, it sank later (the Kola Peninsula is part of it), there was no ocean.

The second incarnation on Earth was approximately 210 thousand years ago. Incarnated as a girl who lived in the area where the peak of the Himalayas is now located. Back then the mountains were much lower, like hills. They rose due to the impact on the core of Selbet's special weapon , which destroys the cores of planets. This girl lived among nature, carrying water in a jug.

The third incarnation was literally before the war. A little over 13 thousand years ago. Was embodied in the city of Atlantis. He lived a fairly long life, about two hundred years at that time. He was a priest who served the gods.

The previous incarnation was on Venus at the 19th density level. This happened about nine thousand years ago after the war with Selbet . At the 19th level of density, he participated in the primary cleansing of the planet’s atmosphere by influencing the elements that caused degradation of the atmosphere (deterioration of its quality for living organisms), by directing ethereal energies to these elements, which disassembled these atoms into quanta.

Currently at level 23. Some part of his Higher Self has moved to the 24th level and is in transition to it. There is a family, a wife. Lives with her for about four thousand years, has four children .

There are 185 thousand plasmoid creatures in contact with him . They help provide assistance to people.

He is a disciple of Jesus Christ, we know him under the name Mirakh Kaunt, he meets him physically on the island, on the planet Burhad (Pikran).

#239, 00:22, #424, 08:08, #486, 18:28, 37:10

Archangel Jophiel

Curator of the financial egregor of planet Earth in the Spiritual world.

#424, 28:16

Archangel Metatron

Representative of the Spiritual World. One of the main Hierarchs of the Milky Way Galaxy, who is responsible for the spiritual development of all spirits, for creating events that create conditions for the spiritual development of all spirits that incarnate in our Galaxy.

He is the Head of the Council of Hierarchs of the Milky Way Galaxy (the Council consists of 28 Spirits), which deals with the incarnations of intelligent spirits at all levels of density of all worlds in this Galaxy.

He is precisely the Hierarch of the Spiritual World who teaches Consulting Angels who and why to embody in all the Worlds of our Galaxy - this is more than 150 billion stars at all levels of density. He himself has incarnated and has a long experience of incarnations in different worlds and not only in our Galaxy, but mainly in ours, because he is responsible for it .

Arranges Councils with other Devas , that is, with the Archangels of the 24th level in the terminology of the Interstellar Union. Together with them, they advise on how to teach and how to correctly present to Consultants, that is, spirits from the 22nd level of the Spiritual World, how many spirits need to be embodied in a particular world, what events they can live there, what vibrations they can change and what their life tasks are. execute.

It is a multidimensional consciousness that covers the tasks of many Worlds, many generations, many tribal egregors, religious egregors, egregors of planets. This is the level when the consciousness of the spirit merges with the will of God, merges with the mind of God, that is, reads His thoughts, as if in one's memory, like an open book. Of course, there are those things that only He knows. It is in His spiritual heart. God, as a Spirit, also has a spiritual heart and memory. When you merge in consciousness with His Spirit, you merge in your memory with His memory, that is, you gain access to information, but only to that for which there is His will.

One of the incarnations was as one of the first eighteen people created by extraterrestrial civilizations. He lived in this body, if according to modern earthly time, 650 years.

Then, one of the most significant incarnations was later, in Haanokh (the prophet Enoch). He was a contactee , in contact with the Spiritual world, with a representative of the planet Burkhad, in contact with the Christ Consciousness, that is, with the Spirit of Christ. He conveyed information to those people who lived in that city, which much later, after the disaster, began to be called the island of Atlantis. The priests whom he denounced, whom he called to stop, formed a conspiracy and tried to poison him, to bring him out of incarnation. The curators decided to move him to the planet Burkhad (Pikran). And the rest of his incarnation, which is another 432 years, he lived on the planet Burkhad.

The next significant incarnation was after the catastrophe on Earth. Incarnated as King David. He was born into a simple family in that incarnation, but became a contactee since childhood with the planet Tumesout . Gradually, through seemingly random events, he began to rule Israel. It was not an easy path. Many times he was in danger of being taken out of incarnation, many times he was tested for forgiveness, for love, for accepting his enemies. And if he had allowed any feeling towards the former king and his people, he would have ceased to correspond to the place of ruler. When I was in the body of King David, I wrote many spiritual poems, many prayers, which are now tuned to his vibration, to his frequency. For example, this is the 22nd Psalm, the 118th Psalm and from the 145th to the 150th, if in the Synodal translation. You can read this not only as a prayer, but also as a guide to action. This especially applies to Psalm 119, because mental attitudes are conveyed there. If you integrate them into your

mental field, your personal vibrations will increase and will correspond to his spiritual vibrations and the spiritual vibrations of all the Archangels, and you will be able to communicate with them.

Considers this incarnation to be very important.

The last incarnation was on the planet Burkhad 400 years after leaving the incarnation of King David. He incarnated on the planet Burkhad in the body of a man who held a fairly high position in the government, his name was Endero Niil. When he was a little over 600 years old, he became the physical father of the body of Jesus Christ.

There were 155 incarnations in total, not that many, because after each incarnation he spent quite a long time in the Spiritual World and fulfilled his task.

He is a member of the Karma Council and is its Chairman.

He has a lot of contactees to whom he transmits information and helps to come to the Light in their soul. They are not only on Earth and not only in this Galaxy (he sends phantoms). He also trains many Consulting Angels and Arhats, who are responsible for the events taking place in the Milky Way Galaxy and supervise the deployment of the Time Tape in different worlds. He conveys to them information from the Divine Source, as from Heavenly God the Father, on how to do this more effectively and with greater awareness and understanding of the laws of God.

#446, #465, 07:33, 23:51

archangel Michael

Guardian of the Christian egregor, patron and curator of the Earth in the Spiritual world, one of the Higher Hierarchs of Light. He was a prophet and high priest, a judge, the penultimate judge of Israel before the reign of Saul over Israel. He was incarnated in the body of John the Baptist and Seraphim of Sarov. He did not incarnate after

Seraphim of Sarov. In the Spiritual World, he is responsible for the incarnations of spirits on planet Earth, and is the spiritual patron, one might say, of the entire planet.

#446, 00:30, 13:59

Archangel Raphael

One of the managers of the egregors of Christianity, Judaism, as well as the manager of the egregors of all healing systems and the Teacher of Healing Angels.

#243, 49:16

Archangel Uriel

One of the Guardian Spirits of the Christian egregor. Not embodied. Very rarely comes into contact with earthlings. Teaches people prayers.

#324, 37:48

Archangel

Teachers of Angels or Mentors of Angels from the 22nd, 23rd and 24th levels. Above the 24th they continue endlessly. There are millions of Archangels in the Spiritual World.

#486, 25:47

Arhat

Spirits from the 23rd level of the World of disembodied spirits, who, while living in the spiritual world, help to form and develop high-vibration egregors in the material world. They understand the importance of the right ideology for the development of social and family relationships that contribute to the spiritual growth of all those who incarnate in this family and in this society. For them, any law written on paper or other material media will have no meaning if it is not reflected in the minds and hearts of intelligent beings. Arhats are the creators of reality, inspirers and ideologists of political, religious and informal folk communities, whose goal is to carry the Light of God in a form that is close and understandable to them at this stage of their development.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”,

#393, 01:22:41

Archons

Spirits from the 6th level of the World of Unincarnate Spirits. Spirits with similar beliefs and actions to demons, but differing from them in a special character structure, slightly higher vibrations and a sense of inspiration and sincerity with which they commit evil deeds. Thanks to well-developed strategic thinking and glimpses of intuition that sometimes become available at this level, they become leaders among other evil spirits, like the well-known Lucifer from the biblical descriptions, who now lives on the sixth level. These leaders form unique societies from demons, based on strict obedience and veneration of leaders, with fairly harsh punishments for disobedience and apostasy. These societies are in many ways reminiscent of military brigades, totalitarian sects and bandit groups in the world of disembodied spirits. Such spirits can incarnate both in plasmoid and humanoid civilizations, and also on Earth.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

#129, #178

Arcamachus

A planet located at the 15th level of development, located in the constellation Taurus, not far from the Pleiades cluster.

Its inhabitants can make interstellar flights, they have highly developed medical technologies, they can grow almost all plant and animal food in test tubes and in special devices.

They can fly into space, but they rarely fly, especially to other stars. They spend a lot of energy on this, atomic energy is spent in a special particle accelerator, which improves the efficiency of the nuclear engine. With it, they can fly one light year in about 4 of our days. But they rarely use it. They had several interstellar flights . This reduces their energy potential. They focused more on their system.

#449, 49:55

Arsheron

Representative of the plasmoid civilization. A male spirit in psychological and energetic characteristics, although it has no gender in the understanding of humanoids. The diameter of the body is about 90 km. He can send part of himself through the Astral in the form of a tentacle or ball, in which one of his multidimensional consciousnesses is present. Plasma of 53rd density level.

He, if we count according to earthly chronology, is a little more than nine thousand years old, 9300 years old. All this time he has been incarnate. Its homeland is the plasmoid world. If we look at in what space-time continuum it comes into contact with our physical world, then it will be near the core of the Milky Way galaxy. This is not the

core itself, but the level of density where it is located.

Like all plasmoids of its density, it has multidimensional consciousness. The spirit that is embodied in his body can, through this body, realize himself in many realities at once, in many planes of Existence. Archeron is one of the curators of some people who dealt with tarot cards. And he also says that he participated in the transfer of knowledge about images and their use almost 9,000 years ago. He passed it on to the priests and their disciples, came into contact with them, along with an alien from another planet, a humanoid, who is now called the Egyptian god Thoth. Archeron was then a plasmoid, he was in contact with the god Thoth and, together with him, passed on knowledge.

#418, 01:13, 10:04

Asclepius (Aesculapius)

A collective image, behind which stand subtle-material representatives of the medical service, as well as people priests, contactees with them, who were engaged in healing.

#288, 39:29

Astral

The world between the material and the world of non-embodied spirits, in which there can be both spirits that have temporarily left physical bodies, and spirits in subtle-material bodies, i.e. plasmoids, and, naturally, spirits from the world of disembodied spirits can come there for meetings, for communication, i.e. some intermediate meeting area.

A more modern name for that part of the spiritual world where the souls of people go when their bodies sleep.

#1, 29:55, #177, 04:11

Astral atmosphere

The sphere of the planet where people's thoughts and feelings and emotions are collected. This is not a physical space. It gives birth to physical space, but it is higher in vibration.

#37, 39:14

Astral vision

The ability to perceive the surrounding space without the help of physical eyes. When one’s vibrations increase, the practitioner can see images of dragons or representatives of any other civilizations instead of people; this occurs due to the inclusion of astral vision and the perception with its help of plasmoids located nearby at a different density level. Plasmoids can take on any form.

#202, 01:04:55

Astral travel

A form of lucid sleep in which a person, without falling asleep, in a trance state, in a state of self-hypnosis, self-hypnosis, without disconnecting from the environment, leaves his body, observes it from the side, and so on.

The goal here is not to leave the body. If a person wants to leave the body, then he should try to do this only after he has gained the

experience that he is not only the body. If he hasn't had that experience, then it's just a waste of time. He will not believe that he will leave his body. He will block himself.

You can go to the Astral without a guide, but to the world of disembodied Spirits you must take a guide, not because it is dangerous there, but because when you cross the border between the Astral and the world of disembodied Spirits, the feeling changes. In the Astral you feel yourself in an astral body: arms, legs - everything is there, and when you cross the border, you begin to feel yourself as energy. At the same time, your consciousness is clear and it seems as if you were sleeping. Life on Earth is a dream and you woke up. There you can forget that you are still embodied. In principle, guides teach all travelers to maintain not just a critical attitude, but memory.

#64, 23:50, #177, 16:27, #185, 19:42, #324, 29:35, #401, 01:06:30

Astral body

A part of the spirit that is released from the physical body to travel. The astral body takes on the image of the physical body, unless its image is specifically changed by any thought form. Most often it appears in its usual clothes, which are in the person's subconscious. The astral body can be in any clothes, for example, in those that are currently on the physical body, and if, while in the Astral, you think about how your astral body looks to others, then it will take on this image. Including clothes, facial features and so on.

#177, 00:03, #324, 27:40

Astral battles

Attracting low vibrational entities to astral travelers who create mental images of battle and fight.

#199, 01:16:43

Astral contacts (target)

The transfer of experience is mainly for those people who have often incarnated in the worlds of the Interstellar Union and whose spirit has a strong subconscious memory of these worlds. Such a spirit realizes with his heart the truth of the information transmitted to him by the curators, and when he realizes its truth and usefulness for himself, he will carry it further in an acceptable form for earthlings who do not yet realize themselves as entities separate from the material body.

In order to guarantee the safety of contact, it is necessary to reach the Higher Self and first establish good contact with it. After this, using the channel you can check any information.

The problem with all astral contacts (this is a well-known fact) is that what was at the input of the curator will not necessarily be the same at the output of the contactee .

Astral energy levels throughout the Galaxy

The Galactic Astral World has 84 floors.

Around the Galaxy, built into the Milky Way Galaxy itself, not on any planet, but on the Galaxy in general, the astral world is superimposed.

It is called the galactic astral background.

#465, 59:00

Astral world

The area of the spiritual world that is closest not in distance, but in

vibrations to the material world. Here, most often, there are souls that have temporarily left the body, but are embodied in the material world. This can be either in a conscious journey or in that state called sleep, trance and so on. The astral world does not belong to the subtle material world, but to the spiritual one; it is higher in vibration.

#29, 00:35, #33, 25:13, #459, 18:03

Astrograph

A specialist in space mapping, which is very reminiscent of an earthly geographer, only this is a specialist not in paper and electronic maps, but in points in space that have individual characteristics.

Specialist in mapping for flights outside planetary atmospheres.

#216, 02:32

Astrology

An ancient teaching about the influence of stars and planets on character, destiny and human behavior, helping people who know astrological charts to study the characteristics of a born spirit (astrological and numerological) and understand who incarnated and for what purposes.

Astrology contains special symbols and symbolic signs. These are the planets, their positions and their distance from each other and so on. When Consulting Spirits prepare a spirit for incarnation, they, among other things, take into account its time and date of birth, latitude, longitude of the place of birth, month of birth so that when it is born, according to the signs that will be at that moment in material world (numbers, planets), those who know these teachings could understand who came into incarnation. Those. It is not the planets that influence the spirit, forcing it to act in some way, but vice versa. The planets are just showing. These are the signs.

It is not by chance that the spirit incarnates in a certain place and on a certain date. All this is selected by consultants, including taking into account future astrological and numerological data, so that there is a frame of reference for those who know how to calculate. To know who has incarnated and to act. This will already be the astrology that studies the already born spirit in life. Those. already a different type of astrology.

#41, 09:51, 11:27, #16, 08:52, #250, 34:35, #439, 01:19:55

Asuras

Spirits from the 3rd level of the World of disembodied spirits, who, because of their pride and arrogance, do not see the needs of other people. All their activities are aimed at satisfying their various desires, the fulfillment of which replaces for them the joy of being in God's Love. In the heat of their passions, they do not pay attention to the manifestation of Light in themselves, through intuition and the voice of conscience.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

Atherosclerosis (causes)

Most often, it is a feeling that the flow of your life is polluted by some external influences. You do not accept the world around you in the Divine Light. You perceive something as dirty, something you want to get rid of, and you fight against it. It doesn’t matter whether you are struggling in the outside world or within yourself. To fight within yourself, but not to say it out loud, this will even faster lead to illness, because energy will accumulate.

#292, 45:20

Athenatus

The name of planet Earth is in the Tumesout language, which means a special shade of blue, or “Blue World”. According to the rules of the Interstellar Union, a planet is named in the language of the civilization that first discovered this planet.

#218, 03:00

Atlantis

A large city on the shores of a single continent. It was destroyed 12,000 years ago during the war with the Selbetians.

#67, 12:16, #156, #256, 01:03:19

Atlantis, Hyperborea, Lemuria

The names of large cities and districts around them, regions, as they would say, regions. The city and the region were then called one word. This feature has remained in the Russian language, when a region is named after a city.

Why exactly three civilizations: Hyperborea, Atlantis, Lemuria? The mind of the embodied spirit is accustomed to dividing everything into three, including both earthly researchers and scientists of the Galaxy who study earthly history. Therefore, the Earth was conditionally divided into three regions: the northern region, the middle region and the southern region. The capital of the Earth was located in the Equatoria region.

Hyperborea is the northern zone, Lemuria is the southern, and Atlantis is between them. The names of three cities were used to designate these civilizations. That is, they transferred the names of the belts to the cities, the largest in this area. Atlantis appeared first. The first man was created 3 million years ago and the first settlement was not far from the base - Eden, on the site of the future Atlantis, it appeared about 2.5 million years ago.

Then, almost simultaneously, Hyperborea arose a little earlier, its age was about 1.5 million years, and Lemuria was about 1 million or 900 thousand years old.

These are the settlements on the basis of which these cities later arose. At first there were few inhabitants, and then they began to build cities, houses, temples, water pipelines, roads between them, etc.

They spoke the same language, which at first was simplified Tumesout. Then he began to adapt to earthly reality, people began to come into contact with representatives of plasmoids, they also began to speak in syllables, and so they developed a syllabic language. It began to differ greatly from Tumesout already 3-4 thousand years after the first people settled on Earth.

#256, 15:10, 22:05, 25:10, 54:32, 58:15, 01:03:19, 01:04:39, 01:14:01, 01:23:48, 01:24:38

Atlantic

First cervical vertebra. Its etheric structure is responsible for the connection between the etheric structures of the spinal cord and brain. At the physical level, this is support for the head, its movements, protection from injuries when turning the head, when bending. On the etheric plane, this is the transfer of information. The section of the spinal cord passes through the atlas, which is directly responsible, like the diencephalon, for all functions of the body: instinctive, such as breathing, heartbeat, and so on.

#385, 27:05

Atlanta

Residents of the ancient city of Atlantis, destroyed in a war 12,000 years ago. They lived in contact with the civilizations that created man and received knowledge from them, including spiritual knowledge. This people had very well developed psychic, brain, and energy abilities, corresponding to the control of their spirit and their body among the

Bigfoot people. In everyday life and work, they used auxiliary material means that enhanced their abilities, for example: huge crystals or copper sheets, covered with the juice of certain plants, which enhanced the properties of the metal. Unlike modern technical electronic devices, these means played a different role: as an accumulator of the psychic energy of the Atlantean using it and the energy of his mentor. The Atlanteans had very good contact with plasmoid worlds. Their religion was paganism, they believed in good and evil gods. They perceived the war with Selbet as an attempt by the evil gods to destroy them and as salvation from the good gods.

#59, 18:58, 22:10; #202, 21:00

Atman or Atmas (Superconsciousness, Higher Self, Conscience, Intuition)

6th level of the aura of an earthly person. Manifestations of the pure Light of Love that exists in every person. The state of no difference, no distinctness from God as spirit.

#14, 03:10

Atom

A dense material particle that consists of energies of three levels: electromagnetism, radiation and thermonuclear energy, gravity. The source of these energies is in the Spiritual world, their flow gradually lowers its vibrations, first making up the subtle worlds, then, as a small part of the universe, dense material ones .

A solid stable structure assembled by plasmoids, consisting of elements. That is why the concept of “natural element” includes only elements that are not created artificially, but are contained in nature itself. There are 92 of these elements. These are uranium and a few more, and all the rest are artificially created.

The smallest dynamic particle of matter of one or another element (naturally or artificially created), which consists of quanta.

A dynamic system that cannot remain in this state for a long time and changes because it begins to exchange energy with surrounding atoms from space. And, losing and gaining various energies, the atom changes. There is not only electricity, all energies change in it.

Representatives of all four elements gather in one space to provide their energies for the formation of an atom. First, the third level of manifestation is formed. What is called microgravity and macrogravity , and gravitons.

#16, 11:44, #17, 33:39, #40, 22:10, #85, 14:01, #264, 00:19, #305, 24:02, #398, 44:24, #434, 05:14, 20:55, 26:12, 29:57, 43:36

Aurabook

Equipment that takes readings from a person’s aura.

#225, 19:42

Aura (dimensions)

2.5-3.5 meters - for the aura, as for a set of energy bodies embedded in each other, for a modern person, which can be recorded in the Astral. Three, three and a half meters is the average. But the spirit that comes into the earthly body takes on a potential that is approximately twice as large, that is, in the region of 9-10 meters.

As energy develops, the aura begins to increase.

What is considered the size of the aura is the ideal size of the aura, which, among other things, exists both in the embodied part of the spirit and in the Higher Self. The aura is not in the Spiritual world, but specifically around a person, surrounding his spiritual channel (when

you go out to To the Higher Self, you rise through the channel above the top of your head, this is the spiritual channel). Around this spiritual channel, when you rise along it, you can see bright white, yellow light or any other color on the sides, this indicates that this energy is concentrated around this channel. But for it to enter the body, it must be prepared. The physical system must be prepared, the etheric system must be prepared, that is, the etheric body must be developed, the astral system must be prepared, that is, feelings, emotions must be under control.

The more a person clears himself of his blocks and loves everything around him, the larger his aura becomes. A Saint's aura can extend over tens of meters. But at tens of meters it can even exceed what was given to him at birth, because he is still charged from his Guardian Angels, from his curators. He has it all together.

The larger the size of the aura, the more the etheric body will be filled. This means that there will be more vital energy to perform your actions, the more the astral body will be filled. That is why the Higher Self treats filling the aura with energy very consciously and responsibly.

#429, 49:08

Aura of an earth type person

Energy structure consisting of seven levels:

1 Ether or Prana;

2 Astral shell;

3 Mental field;

4 Causal level;

5 Buddhi or Pure Mind;

6 Atman or Atmas;

7 Possibility of entering the state of Atman.

#14, 03:10

Autism

Disruption of connection with the spirit, between the spirit and the body through the etheric body. The structure of the spirit itself is not broken. But this development of pathology is determined not only by the state of the children’s body, but also by the state of the parents’ energy. This disorder stems from painful experiences in the body's past. The incarnated spirit is so frightened by the circumstances of its past life that any communication frightens it, and it builds its own world within itself. He has a blocked memory of what exactly happened. But the fact that someone comes up to him and starts talking causes fear and aggression in him and a reluctance to communicate, even with the closest person.

Contact, most often, with plasmoids. There may be no contact. Man has incarnated in the worlds of plasmoids and it is difficult for him to adapt to this world.

#13, 00:00, #234, 24:04, #267, 02:39, #333, 05:21

Autism is regressive

Reaction to stress associated with character type, psychosomatic illness.

#124, 34:34

Autoimmune diseases (causes)

Blocks in the first chakra, often necrotic attachments to deceased relatives.

#292, 32:23

Aphrodite (Venus)

One of the daughters of Cephastis (Zeus), visited Earth after her father flew away. She lived on Disaru for a long time , this is one of the reasons for such appeal to her.

#288, 43:57

Acidosis

A human condition that occurs when the acid-base environment in the body is less than 7.35, which leads to oxygen starvation of the body, resulting in heart attacks and strokes.

#171, 00:20

Ashtar Sheran

Embodied spirit. He is more than 12 thousand earth years old. He lives on Burkhad and Tumesout , but spends most of his time on the space station, which is now, at the moment, located at a distance of 37 astronomical units from the Solar System, specifically from the Sun. He is the head of the Fleet.

Previously, he lived on a planet orbiting the star Sirius B, but as a result of the war with the reptilians 12 thousand years ago, this planet was destroyed. Now Ashtar Sheran, together with his fellow tribesmen, lives in space on a huge base; he has not one base, but a large

spaceship. The space station has a diameter of about 60 km and is shaped like a dark sphere . On the ship there are 2.5 thousand representatives of the world of Ashtar, who have been living on ships and on other planets since the time their planet died.

#40, 00:01, #41, 57:23, #97, 10:20, #449, 32:30, #471

B

Baikal (lake)

A place that was prepared for 280 Earth years for representatives of the planet Tikht by representatives of terrestrial plasmoid civilizations. They charged it, cleansed it of harmful negative emissions from the noosphere.

The base of Fitissa appeared on Lake Baikal in the 3rd century before the birth of Christ. Later, representatives of the Galactic Federation of Light, other civilizations and not only from the Pleiades also began to fly there. According to the history of this base, on the shores of the northern part of Lake Baikal there lived a people who had many contacts with their ancestors, those who built the base.

12 thousand years ago, on the site of Lake Baikal there was another body of water, a smaller lake. People lived on its banks. As a result of the fact that the weapons of the Selbetites were aimed at this lake, a deep-rooted split occurred , a fracture of the earth’s crust, which extends from Lake Baikal in three directions. At the site of one of these faults, a hole later formed and filled with water.

All the rivers that flow into Baikal appeared later. This lake was the result of the war. It wasn't like this before. There was a lake in its place ten times smaller. All the people who lived on the shore of the lake and in the surrounding area died from the weapon, which was so strong that a dent appeared in the earth's crust.

Cracks extended from this dent: three larger ones and a network of smaller ones. Later, when earthly civilization came here, minerals

began to be mined around. This area has previously been a seismic region due to these faults. In the depths of the earth, heterogeneous processes occur that depend on solar activity. And the core of the Earth expands and contracts. Volcanic activity can also intensify and deactivate every few decades. Damage to the earth's crust caused shifts.

During those periods when mineral development was carried out around Lake Baikal and to the north, the imbalance within the Earth continued. This may subsequently lead to earthquakes becoming more frequent.

There is a fault under the bottom of Lake Baikal and there can also be tremors from there. Because one edge is higher than the other, which can creep onto it, so this is reflected on the surface.

It's become calmer here lately. We work with plasmoid civilizations of the Earth, which can also influence these processes from an energy point of view. Stop them, slow down the divergence of faults. People can also influence this if they treat each other with positive energy and love in this region. Any cataclysm, any earthquake , volcanic eruption, among others, can be provoked not only by man-made reasons, but also by energy ones.

There are water tunnels underground . They connect Lake Baikal with other bodies of water on Earth. Fish and those mammals that can swim some distance underwater can move along them.

#370, 03:27, 21:32, 31:28, 40:15, 57:41, 59:18

Baikal (plasmoid)

Plasmoid (Solar System, Earth, Lake Baikal).

Located above the surface of the water.

According to his own description, his appearance consists of 12

spheres, divided into two groups of 6 in the shape of two pyramids, which slowly rotate around each other. Curator of Lake Baikal. 38th density level.

#370, #371

Soulless people

People without conscious contact with the Higher Self, living only by the interests, needs, and instincts of the physical body. They lack the manifestation of the high qualities of the soul, their Higher Self in actions, thoughts, and contacts with others.

#165, 53:00

Beginningless beginning (God, Absolute, Absolute mind, Supreme mind, Creator of everything)

God, whom we call God, the Absolute, the Absolute Mind, the Supreme Mind, the Creator of everything. This is exactly the One who has always been. And if He was always there, He was in eternity, He was not born by anyone, He was not created by anyone , which means that He had no need for a creator or a parent. It is this Being, as if the original point of everything, that is called God. There is no endless cycle of “who created who.” It all ends with God.

#444, 45:40

Safety

The instinct of any living creature. It is one of the conditions for systematizing information, which is the main ability of the mind. Pathological forms of behavior that prevent others from growing and developing automatically hinder the development of intelligence and spiritual development, both of those around them and of the being who violates the safety of others. Even the criminals themselves are not devoid of this instinct and strive for safety for themselves and their

loved ones.

#144, 20:54

Unconditional love

The highest form of love is when they do something selflessly, without demanding anything in return.

#97, 06:18, #214, 00:21

White brotherhood

Teachers of Light (Mahatmas and their students), who came to the earthly world in the bodies of earthly people who flew from other planets. The brotherhood was called white because the color of the spiritual world is white. When a person comes into contact with his Higher Self, he usually sees a white beam.

#206, 02:09:25, #253, 04:55

Bermuda Triangle

A whole channel of portals that go to plasmoid worlds. In this place, where the Atlantic Ocean is now, there was (before the war with the Selbetites) a single continent on Earth. Almost in this place, with a slight deviation, there was a large city, one might say, the capital of the Earth, in which there were contactees and, among other things, there was an alien base. Representatives of the creators of earthlings lived on one of the alien bases: the Tumesoutians and the Burkhadians . Representatives from the entire Interstellar Union also flew to it . After the war, unfortunately, it ended up under water due to a crack at the bottom. And practically, in the same place, with a slight shift, a portal was formed, because there were contacts with various kinds of plasmoid civilizations. During the war, many people and aliens died. All this created such energy in this place that a channel of portals was created there, going to many plasmoid worlds.

#46, 25:09, #67, 28:52,

Unselfishness

The inner state of understanding that you already have everything. This does not mean “don’t take money.”

#287, 30:05

Infertility (causes)

The reason is spiritual: either this does not correspond to the life task of people, or they are simply psychologically not ready at the moment for such a responsible activity as raising a child. The cause is physical: infections, infectious diseases, hormonal disorders. A spirit in the spiritual world can choose a mom or dad to incarnate, but cannot do so due to physical defects.

#226, 01:55

Unreasonable fears in children

The reaction of the child’s energy to the negative thoughts and feelings of the parents. The child’s energy picks up their negative vibrations and activates the instinct of self-preservation.

#103, 18:02

Demons

Incorporeal energy entities. Spirits from the 4th level of the World of Unincarnate Spirits. Spirits who are so absorbed in the pleasures they receive through the material body that they forget about the law of conservation of energies. They want to endlessly enjoy various

material energies and become very irritated when an obstacle comes in their way, even if it is living people. They often do not comply with God's law about waiting in line for incarnation and inhabit the bodies of incarnated spirits that match their vibrations.

Article by Vladimir Goldstein "The structure of the Spiritual world through the eyes of aliens",

#406, 16:40

Demons of alcoholism and drug addiction

A group of disembodied spirits of thin-material plasmoid civilizations and human larvae, which become semi-conscious beings. The breakdown of alcohol in the body and the use of drugs gives them the opportunity to feed on a person's vitality. Attracted by negative vibrations similar to them, with the unconscious permission of such a person, they are inspired to drink even more and use drugs.

#165, 12:51

Betelgeuse

Space plasmoid (Constellation Orion, Star Betelgeuse). Looks like a starburst. Two cones nested inside each other, consisting of stars . Can take the form of a person. Men, for example. Guardian of the Order of Frostfire Mages of the Betelgeuse system. Teacher of the Order of Magi.

The civilization where the fourth level plasmoids are located. Red supergiant, gives a lot of energy.

#87, 57:14

Bible

Concepts about life in the Spiritual world. “Blessed are the pure in heart, for they will see God.” God will be seen because those who cleanse their spiritual heart of all frequencies incompatible with Divine love, their energy merges with Divine energy, their will becomes one with Divine will, and their love becomes infinite, as infinite as God himself is.

The purpose of the writer of the Bible is not to talk in detail about the system of the material world, but to talk about the path to God.

It tells about the path to God, about the history of the Jewish people, about the path of their mistakes and return to God, about their downfalls and ups .

In some biblical stories, Nature Spirits are mentioned under different names. For example, in the Old Testament they are referred to as “idols” or “gods.” They were deified and made into idols, which is how these creatures were mentioned. Of course, not all, but some of them. But since Judaism and Christianity are monotheistic religions, the emphasis was placed on God the Heavenly Father, on God the Creator. And all subtle-material civilizations are considered the same spirits as humans, only embodied in subtle bodies. There was no such emphasis placed as in other religions.

The first reason is that the Bible talks about the path to God. And the second reason: to support Judaism.

#68, 49:26, #345, 42:43, #439, 17:21, 25:10

Billena

The name of planet Earth in Daraal language means “Blue Diamond”. Because when approaching our planet from space, it is visible that among the vast darkness of outer space a huge blue luminous ball with small white clouds grows. This picture delights all space travelers, especially those who see it for the first time. Therefore, they have an impulse to name our planet that way.

#218, 03:00

Biometrics

Reading information about someone at the level of their cells using a scanning beam that uses pulsed ultrasound to measure an object several nanometers in size. Doesn't exist on Earth yet.

#192, 06:11

Bioresonance therapy

Treatment with physical energies aimed at suppressing the frequency of a particular microbe, at activating a particular organ. If the causes of the disease are not removed, these frequencies will become unbalanced again .

#86, 47:34

Biorobots

Robots made from tissues grown from earthly people. Only, unlike people, intelligent spirits are not embodied in them. They have a certain program from which they cannot deviate. They have no soul and etheric body. Charging of biorobots occurs due to the program. They do not need water and food, their body is artificial. It is created from artificial biopolymers. They have special batteries that accumulate the energy of electromagnetic waves from space and transfer it into the energy of movement and perception, into the energy of their pseudobiological brain.

They are used on Earth at alien bases, similar in appearance to a representative of one or another humanoid civilization (in particular anthropomorphic).

#136, 07:00, #234, 53:47, #238, 52:56, #292, 22:44,

Battle of Kurukshetra

An event that took place approximately 7000-6000 years ago, when peoples settled en masse across the Earth, and different tribes could attack each other, taking away power.

#305, 28:45, 34:38

Blavatsky Elena

Contactor of the planet Esler.

What Blavatsky described as different races, they were talking about those souls that came from different civilizations, the curators with Esler told her this. Why did she say that the 1st, 2nd and 3rd races died, and now the 5th race lives? When information was conveyed to Helena Blavatsky, they meant the cyclical nature of time, i.e. what was called the 1st race , the 2nd was a cycle. These were not bodies, but souls that came in cycles.

#42, 33:55, #256, 02:29

Gratitude

A gift of good energy, simply a free gift.

#371, 06:56

Holy Fire

A phenomenon similar to the flow of myrrh, only it is no longer myrrh that materializes from the energies of the Christian egregor, but fire.

First, in space at the level of etheric energies, while it does not burn, only then does it materialize and can leave a burn. Not only the Angels of the Christian egregor, but also the plasmoids of fire take part in the materialization of the Holy Fire.

#74, 48:36

good news

The news of the good that Christ brought with him, who called himself Light, in order to bring Light into the soul of everyone who touched his teaching.

#36, 29:42

Holy Fire

A phenomenon similar to the flow of myrrh, only it is no longer myrrh that materializes from the energies of the Christian egregor, but fire. First, in space at the level of etheric energies, while it does not burn, only then does it materialize and can leave a burn. Not only the Angels of the Christian egregor, but also the plasmoids of fire take part in the materialization of the Holy Fire.

The concentration of the energy of the Christian egregor, which contains, among other things, Christ consciousness (shows its image, which contains phantom energies, including Archangel Michael, Archangel Raphael and other Guardians of the Christian egregor, and from plasmoid civilizations). All this is concentrated through the subtle worlds to such an extent that it turns into material fire. This is done on purpose as a sign of the presence of the Holy Spirit.

These are the energies of the Spiritual world, which further transform into the energies of the subtle material world, and then they are condensed into the energy of fire here on Earth.

#74, 48:36, #439, 15:22

Wedding blessing

The transmission by the Archangels, the Guardians of the Christian religious egregor of their energy, the Light of their Love, filling the fields of men and women with this Light as much as they are able to accept so that they can further remember this Light and develop in themselves that Love that will go into eternity.

#283, 01:47:00

"Blessed are the peacemakers"

The law is not only of Jesus, not only of Christianity, it is the law, in general, of the entire Universe.

Jesus Christ said these words: “Blessed are the peacemakers, for they will be called sons of God.” He did not say that blessed are those who win an argument. He did not say that blessed are those who prove their point of view, which a person with an opposing opinion will be forced to accept under the influence of arguments.

He said, “Blessed are the peacemakers.” Who is the peacemaker? This is the one who creates the world with his mere presence, whose words do not make others want to contradict him. What words are these? These are words filled with Love and Acceptance. But at the same time, this person continues to adhere to his point of view, he makes it clear that this does not in any way interfere with the interaction and friendship of the other person with him.

Why are they blessed? "Blessed" means "absolutely happy." These are the ones who create peace around themselves, who create peace between those who are at odds and those whose souls are gnawed by negativity. If you bring peace into these hearts, a person by this action attracts Divine grace to himself, that is, energies that directly create reality and support his soul. He begins to consciously receive this flow of grace and therefore becomes absolutely happy, like God.

God is also a peacemaker. He created us all in harmony and in the desire that we be friends with each other, help each other and bring the Light together. And the one who is a peacemaker becomes like him. This means that it is likened to the Light of His Love and His Light of absolute happiness.

And why is it said: “They will be called sons of God”? We are already all spirits - sons of God, but “will be named”, this means they will be recognized as themselves. God already recognizes them as children. But not all people recognize themselves as children of God, because those who do not feel Him as their Father, but feel only as their judge or, in general, as some kind of non-existent law or energy, it is very difficult for them to call God Father. But they will be able to do this absolutely consciously and without remorse when they are peacemakers.

#426, 01:03:44

Twin flames

Spirits who walked next to each other for a very long time were familiar in the spiritual world and incarnated together many times. They feel like one. There can be not only two, but also three, four, that is, a group. They do not merge with each other, but feel so close to each other that they already know the movement of each other’s souls.

Twin flame souls mean intelligent spirits with similar vibrations, thoughts, beliefs, who have had long experiences of incarnating in different worlds next to each other and have close relationships on the same or different levels.

#49, 29:10, #253, 04:55, #274, 18:31,

Gemini (twin souls)

Two souls, embodied in bodies that develop simultaneously in the womb, this speaks to the first fact that they had a long experience of interaction in various lives, incarnations and that they were familiar in the spiritual world, and they have a lesson in passing this experience as twins. It is a generally accepted fact in the spirit world that in this way the Consulting Angels of the spirit world show these souls that they are very close. That they had already lived and interacted together.

#203, 03:14

Gemini (constellation)

A constellation within which there are four humanoid civilizations. Three of them are part of the Interstellar Union. The self-names of these planets are Samsak , Simpor.

#234, 52:40

Block (energy)

A collection of energy that could go into the aura. The man collected it in one place. Someone has blocked, closed some emotion or feeling that is unpleasant to consider.

A clot of energy that interferes with the normal flow of vital force in the human body, its saturation with nutrients and oxygen. It can appear due to resentment, fears, hatred, anger, jealousy, envy, pride, or non-acceptance of something in the world, or non-acceptance of something in oneself.

If a person clears himself of all blocks, passing all this energy through himself, he unties, including karmic knots that were associated with past incarnations, and in this incarnation they can manifest themselves as some incomprehensible, unconscious fears, some kind of repeating situations. If a person develops physically, engages in meditation or prayer, communication with God, with his Higher Self, and the more

he is full of love, the more the Spirit fills the physical body.

The more a person clears himself of his blocks and loves everything around him, the larger his aura becomes.

#183, 01:09:45, #244, 47:56, #429, 49:08

Memory blocking for contactors

Inducing special electromagnetic fields that affect the signals of brain neurons and at the same time blocking the creation of some memory proteins for a certain period of time, and erasing what has already been produced. Those protein structures that were created due to the perception of this event are destroyed.

You can ask the Higher Self whether there was physical contact, if the answer is “yes”, but the person does not remember, then his memory has been erased . The Higher Self can send memories of this because no physical devices or radiation can block anything. It is in the Spiritual world and with its consent, it can send these events back to the brain to its embodied part.

#452, 1:16:46

Fornication

Frequent change of sexual partners without creating unity of spiritual love, simply at the level of physical love.

Strengthening the animal nature in oneself due to the energies that are given by God for development. Fornication does not bring pleasure. It brings disappointment, tears, loss, jealousy. The one who enjoys fornication does not know God, does not know the Light. He thinks that the temporary tremors of the body at the moment of orgasm are pleasure. No. This is only a temporary cramp. But when it passes, all the problems come back again.

#173, 08:25, #400, 43:13

Saucer with an apple (fairytale image)

Devices reminiscent of modern cameras and telephones, through which visual information could be seen at a great distance.

#258, 30:29

God

The Absolute, the Supreme Mind, the First Cause of the Universe. You can very accurately characterize it as the Light of Love and Truth.

Matter is all around us. Everything that is, everything that can be and everything that we cannot imagine.

The Absolute, which created all matter and every second supports its existence with its energy. It is energy, personality and Supersoul at the same time. The names given by people to God never reflect the whole of God, but only some of his facets.

A being filled with absolute Love, Happiness and the selfless wish of this Happiness and Love for others. And we are all born from this spiritual Light. The main quality of God is His boundlessness, and at the same time, the simplicity in which feelings can be expressed. God has no beginning: He existed, exists and will always exist. He is not just a personality, He is a superpersonality. He is not just a person or a collection of all personalities, He possesses so-called pure perfection, unconditional Love, which cannot change in him into a different quality. He cannot lower his vibrations, become a demon, this is His universal perfection. He cannot, not because he is deprived of omnipotence, but because His perfect will will never desire this. But in this He is completely free: no one forces Him. The Superpersonality is also expressed not in the fact that He is the largest or the strongest, but in the fact that any force and any energy (whatever they may be in any of the worlds: both Spiritual and material) is only a type of His energy. The entire material world, not only the Earth, but the entire Solar

System, all the Galaxies, the Milky Way Galaxy, all the Galaxies, the billions of Galaxies that exist in the Universe, discovered and undiscovered, are only a small part of the divine energy. Saying that the whole of God is the material Universe is the same as saying that one nail is the whole person. God is an absolutely happy being. His happiness cannot be overshadowed by anything. But His loving heart is not something that suffers or is upset, it does not lower its vibrations. But it is capable of coming to a state, remotely speaking, not just bewilderment, but understanding that this choice cannot be changed. And this causes a state of slight sadness when He sees, the consciousness of God sees, that those bright Teachings that He gave through different people on Earth are becoming a subject of contention between His children. And He is ready to manifest Himself through all of Creation. And He does it. He helps every person, regardless of whether He loves him or not. He gives everyone Life, Bread, Warmth, Sun, Sky, Stars. God, the Creator, does not create the whole world Himself, but provides this creation of the whole world to His children - us, because He gave us matter. Matter is the material for creation. So that we, His children, His little parts, can become like Him. For this purpose, He gave us matter so that we could be embodied in it and use it to create our worlds. Some people build with bricks, others with molecules. God is not just energy that is scattered in space. He has his own mind. We see the manifestation of this mind in the orderliness of the entire Universe, in its unshakable laws, which we observe everywhere, from the movement of galaxies to the structure of our body and the work of each cell. God is an Incorporeal Energy Entity.

This is everything you can imagine and much more. It is called differently in different religions, in different languages and on different planets. Everything you can imagine: absolute, perfect, bright, good in the outside world or in yourself - this will be God. We understand it as the Source of everything that exists, which created this world and continues to support it. Because He is outside of time, and if you look from His point of view, the creation of the world continues endlessly. Also, from his point of view, the birth of us as spirits continues endlessly. For him, the past, present and future are all at once. As for the character of God, in your earthly terms, it can be described as absolute, bright , selfless Love. Because Love is the highest, strongest and brightest energy of the universe that can be cognized. Only she is capable of creating worlds, only she is capable of giving birth to life, only she is capable of giving birth to intelligence in living beings. Love is experienced by us, as intelligent spirits, as inner Light. When I say the word Light, I do not mean a stream of photons. I mean that mental

spiritual Light that everyone who entered into the presence of God in himself experienced.

#27, 44:16, #33, 46:53, #64, 04:00, 07:00, #104, 58:10, #177, 04:11, #180, 28:21, #202, 01:01:35, #243, 49:16, #265, 11:17, #270, 40:49, #289, 01:10:30 #326, 10:05, #344, 39:20, #358, 35:31, #390, 01:13, #406, 16:40

God the Father

The beginningless beginning of everything, the source of all matter and all spirits. A living, intelligent, infinitely bright being that consists of the energy of absolute Love. But in addition to energy, he has his essence, which also contains his mind, spiritual heart, and energy. That is, God the Father is similar to the human soul, in general, to any rational spirit only, of course, infinitely more. Not larger in size, but in capabilities, in energies, in the very structure of the essence, which is not a born spirit, but a parent of spirits.

#340, 03:44

God (word origin)

In origin, the word "god" is close to the Sanskrit word "bhaga", the word God, but inverted. “Bo” means highest, high, the letter “G” means the word “mind”, which together means “higher mind”. In some sources it was designated not just the mind, but the mind of the Earth, i.e. earthly mind. In ancient legends, the Earth was called Mother Earth; it was believed that she was also endowed with intelligence, that an unreasonable creature could not grow fruits, flowers of various shades, which were considered the children of the Earth, its fruits. The word “fetus” and the word “child” in Russian have a similar semantic connotation. Therefore, the letter “G” meant not only “mind”, but also sometimes “Earth”. “Earth” and “mind” were similar concepts. Therefore, “god” denoted not only the highest mind, but also the highest above the Earth, i.e. the one who descends from above to Earth. The Supreme One who descends to Earth, who has intelligence. In this case, God. There were many gods. The word “god” itself was coined much earlier than Christianity came. They denoted

those gods who were plasmoid civilizations , deified people, heroes and alien representatives who arrived. Later, the word “god” was used to call the God who existed in Christianity.

#256, 17:53

God the Son

That spiritual essence that was born first is called the Firstborn Son. They denoted the essence of Jesus Christ. But after his incarnation on Earth, Jesus Christ told people that the concept of “Son of God” includes not only He alone, but also everyone, because Jesus Christ conveyed a prayer that he invited people to pray, to turn to the Father, as He addresses - “Father My", "Our Father". Everyone who addresses himself with the words “Our Father” is a son or daughter of God. That is, “Son of God” - this hypostasis of the Trinity means all born spirits.

#340, 03:44

Virgin Mary

A woman named Mary, born among a certain people (Jews) in a certain egregor, through whom the high Spirit could incarnate and subsequently incarnate Christ without being destroyed . When Maria reached the age of childbearing, she was contacted by representatives of Burkhad . Christ was ready to be incarnated on Earth in the form of the Spirit, and they decided to take the physical father from Burkhad . To accept the nature of the Burkhadians, only a mother was enough. On Burkhad there live people who are 2 meters tall and have white skin. Maria did not have physical contact with the Burkhadian ; she was injected with the genetic material of the Burkhadian using IVF. But first, Archangel Gabriel, who was also a Burkhadian , asked her if she agreed. In the New Testament, the Gospel of Luke says that Mary gave birth to a son from the Lord God. Christ was the firstborn son of God and, at the same time, the son of that Burkhadian, who was also considered God.

Guardian and leader of the Russian egregor. The stage that she supervised was relatively calm. She covered the entire Russian land with her Veil. The stage of the quantum transition, which She personally supervised, ended on the Day of the Lord's Circumcision - January 14, 2022. Circumcision is dedication to God. On the last Day of the Circumcision of her son, she removed the Veil from the Russian land (the Veil is energy) so that the entire planet, including Russia, could adapt to the vibrations that were given by all civilizations at all levels of density, by all Spiritual worlds.

#21, 05:50, #241, 01:21:00, #349, #400, 20:14, #424, 53:11, #439, 25:10

God-man

An intelligent spirit embodied in a person who experiences a continuous state of unconditional love, merging his consciousness with the consciousness of God.

#234, 17:40

Divine hierarchy

The entire spiritual world. Hierarchy of Angels from the 17th to 24th level, who feel the Divine Light in themselves more than others.

#158, 59:33

Pathogenic viruses and bacteria

Animals are group souls of microorganisms that are created by plasmoid civilizations. But what kind of civilizations do these souls create? The fact is that plasmoids are also different: in their character, in their development, in whether they perform their tasks or not. They are also different, just like people. If a plasmoid has negative qualities, blocks (only they are not in its chakras, but in itself), then the group soul it creates (for example, microorganisms) also turns out to be

distorted . In the sense that he subsequently switches to parasitism and already creates distorted generations of his children .

Those plasmoid civilizations that create souls for them also have certain vibrations. They are in a space where there are a lot of these microbes. Therefore, when there is the ringing of bells or the smell of incense, or the clinking of Tibetan bowls, then these low-vibration plasmoids are uncomfortable in this space. They leave it unless they have a special, definite purpose for which they can endure this discomfort. As you know, they can even be in church. But in any case, it will be more difficult for them to be there, so the space will be cleared , including from the ringing of bells.

#344, 01:23:00

Disease

Disturbances in the physical, etheric, astral bodies. Illness of the body affects the spirit, lowering its vibrations. It can be the choice of a soul if it has chosen to go through illness in order to learn to enjoy life even in this state. The disease is formed due to the variability of the physical body. The energies that form the spirit can influence the physical body, disrupting various types of chemical and physical processes in it. In any case, this occurs due to the variability of the physical body.

#35, 31:17, #143, 17:19, #103, 01:32, #262, 20:19

Disease of the Spirit

Loss of the ability to feel Light, falling into various vices that temporarily provide artificial Light.

#265, 05:21

Parkinson's disease

Disturbance in those brain structures that are responsible for the movement of body muscles. They become little capable of carrying out the commands of the mind, the commands of that part of the embodied spirit that is in the body and gives signals and orders for movement.

Due to damage to these brain structures, not enough hormones, such as dopamine, are released to make these movements easy and fast. The person experiences partial paralysis. This can also be a result of trauma, hypertensive crisis or micro-stroke and negative blocks located in the sixth and seventh chakras.

#427, 31:23

Pain

The reaction of the nervous system to the destruction of something. The physical body has laws of its existence. If there is no pain, there are no self-preservation instincts, there will be no way to survive in this world, which can cause damage or death. An energy state that can be given to another being so that it is on our level.

#305, 45:39, #371, 50:17

Big Bang (Big Bang Theory)

The emergence of the Universe. It looked like an explosion, but it was not at a single point, but throughout the space of almost all galaxies. That is, luminous plasma appeared, interstellar gas, which began to form stars and planets.

Method of description. In general, it does not contradict what was, but it does not take into account that the existence of the material Universe is cyclical. The Universe goes through various cycles and there are traces in the material world that can be used to record that this is not the first cycle of its existence. What you call the big bang is the beginning of the emergence of the subtle world. This is the beginning of the existence of the Universe in the current cycle: the material Universe in the form of electromagnetic radiation. It was then that

plasmoid, thin-material worlds appeared. This all appeared once again for a reason, but so that in these same plasmoid worlds intelligent spirits could incarnate in the form of fine-material creatures, which in modern Russian are called plasmoids. This is a term to describe a subtle-material being and I ask you not to confuse it with plasma. There are many different types, types and varieties of them. After the appearance of the plasmoid world, all plasmoid worlds, several more billions of years passed and only then did the centers of galaxies appear, i.e. what we call the dense material Universe began to form. When we say " dense material Universe," we mean by this word any substance that is included, which is recorded in your modern periodic table. And even when we talk about the rarest gas (for example, hydrogen), when we talk about atoms, about the most rarefied gases (hydrogen, helium , etc.), then we mean precisely the dense material Universe. Despite the fact that in terms of density it is, of course, inferior to solid substances. When we talk about atoms and molecules, we mean precisely the dense material Universe. So stars, galaxies, intergalactic gas (meaning clouds of intergalactic gas) are all a dense material Universe. She appeared later. And gradually.

#40, 09:36, #264, 03:13

Fight for justice

Consciousness of duty and sympathy for those with whom this struggle is being waged for the sake of the highest Truth and justice, whose name is Love. Experiencing Love even for someone with whom there is a struggle and a struggle not with the person himself, but with the state and emotions that plunged him into low vibrations, then this struggle does not bring a decrease in vibrations. On the contrary, it brings an increase in vibrations, because it helps his brother get out of the state of low vibrations and rise higher. Sometimes this requires physical struggle.

#203, 18:52

Brahma

Plasmoid position, Angel.

#305, 26:42

Buddha Shakyamuni

One of thousands and thousands of Buddhas, that is, those embodied spirits who have achieved a state of enlightenment. He was a contactee with both plasmoid civilizations and Burkhad . For him they were Gods, but he himself, firstly, had contact with the Spiritual world, was very high in level and raised it even more when he lived on Earth.

#36, 36:37, #182, 56:03

Buddhism

It is not religion or the energy of indifference, it is energy in which the realization of a higher spiritual state is possible only in helping those who suffer. If you suffer, then help yourself; if someone else suffers, then help him.

There is no understanding of different densities in Buddhism. There is a material world with different worlds, but there is no understanding that the soul cannot enter a body that does not correspond to the mind, the rational principle.

In those incarnations that the spirits of nature had, they perceived themselves as animals, as insects. They told others about their experiences. Therefore, it was believed (and not only in Buddhism, but also in ancient Indian cults and religious movements) that the soul could incarnate not only in insects, but also in plants and trees. It was believed so because there were stories of people who remembered themselves, for example, as a tree or a flower. Then it was not considered that this was some kind of creature that created his soul; there was no such ideological attitude.

#367, 01:05:40, 01:14:33, 01:24:42

Buddhism (nutritional issue)

A matter of personal choice. The main thing is not what you ate, but how you feel about your neighbors.

If you eat something that belongs to plant foods, but at the same time you treat one of your neighbors with malice, then this act will distance you from enlightenment. Food will not make you either a saint or a sinner, it is only matter to support the body, it has the meaning that you put into it. If you ate meat and at the same time are full of love for people, then it did not bring anything bad. If food gave strength to your cruelty, you became evil, cruel, then you will go to the lower worlds. Buddhism does not prescribe that food must be either plant or non-plant . This is the choice of the person himself.

#367, 01:40:16

Buddhism (main goal)

Deliverance from the suffering of all living things, all sentient beings. Suffering is considered to be an unnatural energy generated by the spirits themselves, the souls themselves, which draws them into a cycle of rebirth without awareness.

Once you realize that you are not a material body, you have already taken the first step towards awareness. As soon as you realized that the person next to you is also not a body, but also a soul, a spirit, and that he has the same feelings, needs, thoughts and desires as you, you have taken the second step towards awareness. And as soon as you stopped distinguishing him from yourself and merged with him and with each of your neighbors into a single consciousness, you achieved Buddhahood.

#367, 01:24:42

Buddhism (three directions in Buddhism)

Three large parts of Buddhism (teachings): Hinayana, Mahayana, Vajrayana.

#350, 24:47, #371, 06:56

Future

What is not predetermined now. But in the Spiritual world it is known because there is no time there. In the Spiritual world, the past, present and future exist simultaneously. And in the material world, the past exists in the form of information records, the present - in the form of the manifested world, and the future is only being formed. But it is formed from the actions of spirits. Therefore, when they talk about a time machine, meaning that you can go to the future and the past, then this can be done in the Spiritual world. You can change the future only because you don't know about it, and therefore you can change it for yourself. But all the results of your choices, which you yourself do not know about, and the consequences that they will entail, that chain of events that you cannot know, they are known to the mind that created everything, He is omniscient. He knows all the election results of all his children, although the children themselves do not know about it. You can also call it a “space of options,” because you don’t know the result of your choice. For example, if you want to stay at home in the morning or go somewhere, you don’t know what will happen if you stay at home, and you don’t know what will happen if you go. You don't know who you will meet there and what will follow from this. This is hidden from you. But in the Spiritual world this is all open. And about the options. If you have a choice ahead of you that can influence your events in one direction or another, then when you reach that point of choice, you have different options. But the results of both are known in the Spiritual world. But initially God knows only one way - the path you will actually take, and not the one you choose. That is, you can have as many options as you like, but which one will be reality for you is already known. But no one influences your choice itself, because before incarnation we are all shown those basic life options that we will go through until death. The options naturally show those that we must focus on in order to develop. And in the Spiritual world we are shown what will happen to us if we degrade here. We can choose the option for growth and development and the option for degradation, but the fact of the matter is that when we are in the Spiritual world, it seems simple to us to come, incarnate and live our lives in the material world. That is, we already see our whole life on the screen and already think:

“This is how I will act, this is how it will follow, this is how one event will follow another.” It is similar to how a person sees a chessboard with pieces arranged. But everything is not at all simple when you find yourself in a material body with a blocked memory. But it is blocked for a reason, namely so that a person goes through this path without remembering anything, and then he will gain the necessary experience in solving problems and correcting his mistakes.

#47, 22:55, 27:25, 29:10, 31:48

Buckwheat

A set of symbols similar to tarot cards, only not in the form of pictures, but in the form of certain symbols, icons, something close to runic writing.

#206, 01:40:10

Gods

The name in the Daraal language of the planet, which is located in the constellation Cygnus at a distance of 670 light years from the Sun. The civilization inhabiting the planet is humanoid (anthropomorphic). Burkhad is the capital of the Interstellar Union (self-name Pikran). The Burkhadians are one of the three creators of the earthling race.

#59, 03:14, #272, 12:11, #185, 01:09:28, #495, 41:39

Bhuti

Spirits from the 1st level of the World of Unincarnate Spirits. The lowest vibrational spirits. They closed their Light so much with greed, lust and envy that they completely forgot about the existence of God, suppressed their rational mind, closed their hearts from all goodness and rejoice only in one thing - when other entities experience pain and mental anguish. Then they feel that they are not the only ones who feel so bad, and for a while they calm down from chronic dissatisfaction

with everything and from the more or less constant mania of persecution inherent in them.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”,

#305, 24:02

Being

Form of manifestation of God. God, by his nature, in addition to the fact that He is Light, Love, Truth, and so on, He is life, and life is absolute Being. And therefore, besides Him, nothing else really exists, and Non-Existence does not exist either.

#68, 01:14

IN

Vajrayana

The path to self-contemplation (meditation). This is not the absence of thoughts, but the immersion of the mind in considering events and recognizing their real essence.

#350, 24:47

A vaccine

Medicine. Form of protection. The vaccine acts mainly on lymphocytes, which remember information about the microbe. When it enters the body, defense systems are activated to destroy it and eliminate it before it multiplies . That is, when a microbe enters an unvaccinated body, lymphocytes need time to study it and develop a defense system. In a vaccinated body, this time is not needed.

#296, 17:55, 23:40, 26:49, 29:14

Vacuum

All the space around. It is only temporarily filled with atoms and fields. If you remove atoms and fields from it, it will become digital space.

To conduct experiments to extract the free energy of the vacuum or the field of the Universe, you need the permission and control of the Angels of Nature of the 17th level and the plasmoids of that place, otherwise you can damage both the dense material world and the plasmoid worlds. A huge amount of energy will begin to be released, which could destroy their worlds and the physical world.

#437, 01:29:00

Vaccine (composition)

An amino acid-protein complex characteristic of terrestrial organisms of the viral type, but it was a combination of two types of viruses, and one of the viruses was without its genetic part, it was replaced by the genetic part of another virus, like two in one. And neither this virus nor part of the other could reproduce in the human body, because they were deprived of reproductive organs. At the chemical level, it contained substances of alkali metals, for example, magnesium and sodium. There was a substance - a preservative of organic nature. Ethyl alcohol is added as a preservative. There are no harmful, toxic, chemical or biological substances, there are no living microorganisms, in general, none: neither beneficial nor harmful, that can multiply in the human body,

#349, 57:41, 01:03:32, 01:07:22, 01:08:11, 01:14:02, 01:15:01, 01:16:42

COVID vaccine

A drug containing a piece from the body of the virus that contains a protein specific to it. Lymphocytes react to it and develop protection against the whole coronavirus. This is the point of vaccination. In addition to a piece of coronavirus, the vaccine contains fillers that preserve it and prevent it from breaking down. Most often, these are inorganic aluminum compounds. This is usually aluminum hydroxide or aluminum salts in inorganic form.

#296, 23:40, 26:49, 33:47, 54:35, 56:32

Vaccination (meaning of vaccination)

A measure of preventive medicine, not therapeutic, when they are already being treated. Vaccination is designed to teach the immune system to recognize certain proteins, substances foreign to the body, and parasitic viruses in a timely manner. Those that reproduce in human cells, including changing its DNA. They do not have their own cellular structure to feed and reproduce.

#301,17:01

Vamphim (planet)

The self-name of one of the planets in the Arcturus system. Vanga was a contactor with the inhabitants of this planet.

#46, 12:57

Vanaras

One of the tribes that supported Rama in the fight. Why were they called monkeys? Perhaps they were somewhat shorter in stature than the people from whom Sita was taken, they did not have any hair, and were called monkeys, perhaps because they lived in the forest, like forest people. This is approximately how the forest tribes are now.

#326, 38:07, 39:26, 40:28

Basilisk

A certain type of nature spirits, representatives of subtle civilizations, who took for contact the images of animals, composed of parts of various bodies of animals and birds.

#63, 01:04:20

Vedas (Slavic-Aryan Vedas)

A religious text that was transmitted by a contactee with one of the civilizations of the Interstellar Union, or by a contactee with plasmoid civilizations (shaman, priest, and so on).

A series of books by different authors. These are not manuscripts found by archaeologists, because they, for the most part , have not been preserved, but knowledge transmitted mainly by plasmoid civilizations to new admirers of the ancient Gods. This is contact information, it is passed through the consciousness and awareness of the contactee. It must be remembered that texts received through contact are most often the joint work of the curator and the contactee . So, for example, it happened with Helena Blavatsky, and with many other contactees , with Konstantin Tsiolkovsky.

Each of the plasmoids: Veles, Svarog and so on, can transmit their own book, their own scripture. You need to take a specific text and compare it with the truth that is in everyone, which is Light. If it does not carry destructive calls for the destruction of oneself or the surrounding world, then yes, it is truthful, of course, in perception, because the perception of plasmoids is different.

#22, 01:03:33, #182, 33:15

Witches

Women engaged in magical practices.

#358, 50:09

Book of Veles (Yarila, Svarog)

Texts restored after the original books were lost in the war by modern priests in contacts with plasmoid civilizations (about 90% of the information), representatives of the Interstellar Union.

#197, 03:54

Venus

Planet of the Solar System. Venus is called Alliyara in the Tumesout language . This word means “first,” that is, the first from the star. The fact is that at the time of the discovery of the Earth and Venus, it was Venus that was first from the Sun, Mercury was its satellite. The second was the Earth, and the third was the Moon. Venus was a small planet and the solar system was different. which, after the war with the Selbetians 12,000 years ago, moved closer to the Sun. After they took people from the planet, the Selbetites, arriving there, saw that there was no population there. But they assumed that Venus would again be populated by people, and therefore they sprayed special gases into the clouds, which produced a large release of heat and almost completely destroyed oxygen, that is, they reacted with it. Oxygen turned into carbon dioxide and compounds in the soil. The atmosphere became denser and saturated with sulfuric acid and hydrogen chloride. That is, the Selbetites spoiled the atmosphere, made it unsuitable for life, including increasing the greenhouse effect, blocking the Sun, and so on. Because of this impact, Venus moved closer to the Sun.

#426, 01:25:18

Wedding

A sacrament for invoking the energy of the Holy Spirit, that is, a

blessing for the entire life that two loving people will spend together. These two spirits are given the strength and energy to love even more, to be devoted to each other, to tolerate each other's shortcomings, not to judge, to forgive. This power will be given to them to the extent that they are able to perceive it . It is intensified by the energy of the Christian egregor, which has collectively collected the energy of all believers.

#63, 40:53, 43:47, #283, 01:47:00

Faith

The main factor in managing reality, including your energy. The driving force of the intelligent spirit. A figurative mental representation of a future event that will happen without a doubt. The feeling of the existence of something that cannot be comprehended by the mind, cannot be seen with the eyes, touched with the hands, felt with all the senses. This rather relates to the sphere of feelings. This is how love is: there is an image of a loved one, towards whom love is directed, and there is an image of faith, towards which faith is directed. This is the ability to direct your energy to change the material world in a variety of forms. True faith allows you to put into practice what you believe. If you don't believe, you won't be able to love. There is no rational being without faith in something. And since the spirit can influence chemical and biological processes in the body with its spiritual structures, it means that it also influences its genotype within certain limits. Establishing a bright ideal and striving for it. This is a feeling that is located in the spiritual heart. Faith can influence both positively, raising vibrations, and negatively, lowering them.

A feeling that arises only in a person and is capable of controlling his instincts.

The driving force of the soul. If a person does not believe in something, he will not achieve it.

#33, 01:52:02, #43, 52:27, #63, 47:20, #95, 26:19, #118, 07:22, #147, 27:08, #184, 35:29, #216, 45:09, #359, 01:02:47, #391, 53:13, #444, 1:15:20

Laughing gas (nitrous oxide, dinitrogen oxide, nitrous oxide)

A compound with the chemical formula N2O. It is called “laughing gas” because of the intoxicating effect it produces, bouts of laughter. At normal temperatures it is a colorless, non-flammable gas with a pleasant sweetish odor and taste.

#238, 38:09

Old Testament

Book of Genesis, 6th Chapter.

#68, 05:25, 09:46

Eternity

Timelessness, immutability.

#140, 11:37

Vibrations

Qualities of the soul that allow you to be either in the energy of Light or without It. The property of any dense material structure, the total frequency of vibrations of the structural chemical elements included in it and the fields that surround the atoms. Vibration is strictly individual and species-specific for an animal or a person, and also strictly individual for an organism. If these frequencies are recoded in a certain way, you can convert them into audible sound frequencies and hear not chaotic sounds, but a certain sound melody. On Earth there are special devices that read the frequencies of the organs of the human body and can convert them into sound, and there are devices that generate such sound in order to restore the original energy of these organs. The higher the vibration, the closer to the Primary Source.

#92, 06:07, #104, 31:15, #123, 19:45, #202, 24:20, #344, 47:01, #345, 42:43,

Vibrations in the spiritual plane

Vibrations or waves of spiritual Light, of which the objective and subjective realities are composed. Spiritual vibrations are vibrations of feelings, emotions, will, desires, and so on, i.e. spiritual processes that occur in our Spirit. Inside is no longer the body, but the Spirit. They manifest themselves through the body. In the Spiritual world, we are also not deprived of the ability to experience feelings, emotions or desires - this time without a body.

#274, 52:38, #490, 05:54

Higher vibrations

The highest energy belonging to God. She created and is creating this world, she is outside this world, like God. According to the hierarchy, Light always controls Darkness, controls the lower.

The highest spiritual vibration is the one that gave birth to all the others, which is the primary source and this is “Unconditional Divine Love”! Without Love there is no life. It is because of Love that we were

all born from the primordial spiritual Light. It was because of Love that all the worlds, all the galaxies, all the aliens and everyone else appeared. If there were no Love, no one would have life.

It is necessary to compare all other feelings, all other desires, aspirations - what they are directed towards, and, naturally, emotions and thoughts - with Unconditional Divine Love. If we look at the spiritual heart, then the state of the spiritual heart gives rise to thoughts. What the spiritual heart is like, what it is filled with, such will be the thoughts of a person. If we are talking about which vibrations are high, these are those that are closer to Unconditional Divine Love.

#165, 20:57, #490, 05:54

Lower vibrations

Energies that are contrary to Love, low vibration energy, which is the same high vibration energy , is only misdirected and not recognized. This is also Love, but directed in the wrong direction, towards the wrong person, or shown incorrectly.

#165, 20:57

Vibrations (increased)

Increasing your qualities and bringing them as close as possible to the reference source, the very Light of unconditional Love, which is the basis of life, happiness, harmony and the absence of all opposite qualities, and therefore low vibrations. Raising your vibrations does not mean increasing the number of vibrations in the atoms of the body. These are different vibrations.

It is necessary to understand the purpose of the promotion. We need to have before us that ideal with which we will compare our vibrations. Place before yourself, before your mental gaze, that being that has the highest vibrations in the Universe, in the Universe, in the entire existing world.

The second question that everyone has to answer is: How important is this to me? How much do I need this? How much do I need to really engage in my spiritual development, even if for this I have to make certain sacrifices? Every spiritually developed person who follows the path of spiritual development, increasing their awareness, sooner or later understands that this path is not as bright and rosy as it seemed at first. It also has its own stumbling blocks, its own temptations.

#407, 02:15, 08:23

Vibrations of the Earth's egregors (from what spiritual levels are they embodied on Earth)

15% of egregors are located on levels 1-3 of the astral plane (lower astral plane)

57-62% — 4-6 levels of the astral plane (average level)

17-20% - 7th level of the astral plane, the highest level, passing into the world of disembodied spirits.

This structure reflects the spiritual levels of spirits incarnating on Earth. Most often they incarnate from the 6th to the 15th level of the spiritual world. From 1st to 5th and from 16th to 24th they are incarnated less frequently.

#218, 22:11

Types of autism

Congenital and acquired in early childhood due to the influence of parental energy.

#333, 15:15

Types of ether

Intermediate energy between the material and spiritual world.

Intermediate energy between the worlds of plasmoids and the astral plane, the so-called buffer zone or layer, and this layer is also not homogeneous. For example, there is Akasha, torsion fields, prana, the veil of the astral plane - these are all types of ether. Those energies that are contained in the subtle worlds of plasmoids are also forms of ether, but different. For a person, this is all ether, because We cannot yet detect differences in its shapes with instruments. A person does not know how to detect electromagnetic frequencies beyond gamma radiation with instruments.

#248, 00:20

Visualization

Presentation of images.

#350, 01:29:03

Imaging (in treatment)

Thought form. If you visualize how a diseased organ becomes healthy, i.e. clearly imagine that it changes its color, its structure or mentally fill it with energy, then you will create a corresponding thought form in your astral field. This thought form, as one of the types of programs, will be sent by you to the patient’s astral field. And the coincidence of your personal vibrations and the vibrations of the patient will determine how much your thought form is able to influence his energy, how much it is able to launch its own energy processes to restore this organ. In other words, the effect of the same healer will be significantly different from the vibrations of the patient himself.

#28, 04:01

Virus

Intracellular organism. The souls of viruses are created by plasmoids that live in the 15th density level, and the 10th density level also creates a lot of them . There are viruses of the 5th density level. Only 1.5-2% of all viruses can be dangerous to humans under certain conditions. It depends on the properties of the organisms where this soul has settled. Virus bodies can multiply either in bacteria or in plants, fungi, animals, and people without causing them harm. But it happens that their reproduction gets out of control. Their energy begins to be damaged. Each virus has a certain life cycle, after which it must self-destruct without causing harm to the cell. Due to some disturbances in the energy of the person himself, a disturbance in the energy of those viruses that live in him begins.

For the virus, in its perception, the human body is not divided into the hypothalamus and something else. For him, the human body is a single planet from which certain signals come to him. Viruses in one organism are connected by a connection, like an electromagnetic one, but it is much faster, it is a cellular connection. It is not chemical, but rather energetic. They seem to be talking to each other. And they don't just talk. These group souls constitute the group mind. It is not like a person's. It is instinctive, like any animal. His main task is to survive and acquire offspring. For the virus, the hypothalamus is the place where signals that are dangerous to its life come from. For example, strengthening immunity is dangerous for the life of viruses. He sends certain parts of himself there (shows threads, mycelium, only it is energetic), they seem to be connected by invisible threads. The virus sends a part of itself. This viral attack on the hypothalamus, perhaps on the thymus, reduces the body's immune response, and therefore reduces the percentage of death of its particles. The virus perceives life in the body not as penetration into something else (capture), but as life in the place where life is the only possible for it. It can no longer reproduce anywhere. For him, the struggle for survival begins.

The tendency to create blood clots, the tendency to severe lymphopenia, to thrombocytosis is the influence of certain enzymes and proteins created by one's own cells in order to reduce the number of lymphocytes that destroy it. And blood clots to reduce the speed of their flow through the blood to this place. The body's inflammatory reactions are directed against itself. This happens for a reason, but under the influence of a virus that redirects the attack of lymphocytes,

the attack of certain eosinophils that already secrete antibodies, etc., is directed against the body itself. When they hide, they secrete substances so that the lymphocytes do not release substances that stop these inflammatory reactions. It turns out that a chain reaction occurs, from which the cells of the body themselves are destroyed. Viruses only enter this gap faster. They have such a cunning mechanism that they created artificially. The very penetration of a virus into a cell releases a substance onto the surface that the cell confuses with its own, and itself captures it. He doesn't forcefully penetrate (he picks up some key), but he sticks to her and she lets him through. Because it imitates the substance that she needs. This is not called an attack method, but a virus sabotage method.

#28, 17:04, #306, 22:14, #316, 23:29, 29:56

Star of Bethlehem

An astrological phenomenon, a conjunction of planets - a parade of planets in one of the constellations, which was seen by magicians. This was a sign that they should come to Israel, since the great king of all nations was born there.

#200, 20:25

HIV (Human Immunodeficiency Virus)

A virus that first circulated among primates and then, from direct contacts of these primates with people, entered the human body, but did not survive in it. Thanks to the mutation caused in the DNA of this virus, it has become virulent for humans.

#27, 01:19:52

Inclusion of a person in several egregors

Connecting any spirit to many egregors. He can combine everything that fits in his consciousness without conflicts. There are many people

who have a broad outlook and high flexibility of thinking. They are able to combine the Orthodox worldview with magical thinking and perform magical rituals. These are two different egregors, but they exist in one person. There are also Orthodox communists. A person can combine contradictory worldviews. All religions talk about the same thing, just in a different language, depending on where this religion was formed. Therefore, if a person is able to understand what is being said, he can support all religions and not be in conflict with any egregor. There will be a harmonious content of all energies.

#21, 15:40

Lords of Karma

Non-embodied spirits, which, according to the terminology of the Interstellar Union, are called Consulting Angels and Arhat Angels, because they are the ones who select incarnation for intelligent spirits. And they are perceived as the Lords of karma, that is, they distribute who will go to what place in the material world.

#284, 06:58

Love

State of mind. It can end either in love or in mutual disappointment, resentment, and irritability towards each other. The first grace of God, the energy of Divine Light, which is given as a gift to any spirit so that from it, by his own will, through his own efforts, he develops eternal fire.

#214, 00:21, #298, 12:53

Inner Spiritual Reality

The spiritual world of man, his thoughts, feelings, emotions.

#180, 10:30

Inner silence

A state when, through an effort of will, all thoughts that at that moment disturb, frighten, or cause any negative emotions and memories are removed from the field of consciousness.

#135, 59:16

Intrauterine device

Abortive method of contraception. It disrupts the implantation of the baby's first cell into the wall of the mother's uterus.

226, 17:08

Suggestion

One of the components of faith, imagination and other psycho-emotional states of a person. Through suggestion, creating certain thoughts in your mind, you can put yourself into a state of hypnosis.

#140, 03:39

Water

One of the elements. Like all four elements, it serves as a building material. As an element, it is the energetic state of space. It has a certain fluidity, variability, and certain frequency characteristics. A symbol of various energies, elements, human etheric energy (field), subtle civilizations. The only substance in the Universe that, when ice

crystallizes and freezes, does not shrink, but expands sharply. Water is very important for the human body. It is in every cell, even in the cells of bones. Only with its help can life processes take place.

#194, 32:08, 42:10, #322, 05:29, #371, 54:20

Salty water

Fresh water

A solution of salt, or rather not just one salt, but a set of salts. Each salt, as a substance, also has its own vibration. These substances also have an impact on human energy, especially since salt is a crystalline substance that, like water, can absorb energy.

Fresh water can also absorb energy, but in a different way. Salt water, for example, can preserve it longer. Through salt water, the energy states of other people are better transmitted. They are transmitted through fresh water, but they are not stored for a long time, especially if there is flow and mixing there.

Due to these salt crystals, the energetic state of the water, which people have charged with their auras, their mental and astral fields, is preserved.

#371, 54:20

Hydrogen

The very first element, the first dense substance, which in the form of plasma and gas arose in the dense material Universe from the energies of subtle civilizations coming from the spiritual world.

#194, 04:00

Hydrogen engine

Energy source at the Tikhta base on Lake Baikal. Power is about 5000 megawatts. It extracts energy from the bonding of hydrogen and oxygen atoms, as well as the bonding of water molecules to each other, in part. By directing special fields, a chain reaction begins. Atoms repel each other instead of attracting each other. But their microgravity does not have time to return to the third level of these atoms. It accumulates in special batteries made of an iridium alloy with gold and lead, which is created using a molecular lattice. And this energy can be converted into any type of electromagnetic fields and other material energies in special devices.

#330, 00:21

Warriors

Spirits from the 10th level of the World of disembodied spirits, whose main goal is to restore justice as they understand it. Indifference to the suffering of others and to their own allows them to achieve fairly high vibrations, but the implementation of their plans is often associated with the condemnation of dissidents and the use of violent methods of influence. Unlike rakshasas, warriors fight not for their ideas, not for the selfish advancement of their power, but for ideas that they sincerely and passionately consider socially useful. These are rebels and revolutionaries, burning with a dream of social well-being, but losing sight of the law of similarity, according to which negativity, even manifested for good purposes, can only give rise to another negativity.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

War

A material process that is formed by those spirits who are in embodiment, with the help of material means that consist of the condensed energies of God. Spiritual entities, being in embodiment,

use divine energy against each other, and therefore against themselves, because in the Spiritual world everyone is one. War is not only a destructive process of material structures or killing physical bodies, it is also a process of self-destruction, self-degradation of those spirits that are involved in it. Like any material process, it is born on a spiritual level. And the spiritual cause of war is the presence of vibrations of arrogance and pride in the noosphere.

Physical war, physical battle is only the last stage of aggressive energy accumulated in the Earth's noosphere.

First, there is a long period of aggression within some people, within some group, and only after a fairly long period of time does this develop into physical actions.

#261, 01:32:10, #450, 46:43

Hair (function)

Protection from any harmful environmental factors, as in animals.

As for energy: hair consists of body substances and is charged with human energy. Removing them does not cause energetic harm to the body, but these hairs become charged. There are practices when you can influence energy through them.

#401, 41:15

Wolf Messing

The one who was a contactee of the planet Disaru and was in contact with the one who on Earth is known as Saint Germain, an inhabitant of the planet Disaru , who lived under the guise of an earthling on Earth.

He lived several lives, to put it simply , in the future. That is, in rare

cases, a spirit can be sent to incarnate back along the time scale.

#46, 14:52, #47, 22:55

Will

The energy of the spirit, which is directed by him to achieve a particular goal and to perform actions.

#14, 03:10, #59, 35:02

God willing

Demonstrated Love.

#390, 01:13

Love yourself

It doesn't mean fulfilling your every desire. Love does not consist in the fulfillment of any desire, but in the pursuit of perfection in order to become the master of one's desires.

#78, 57:28

Willful energy

Energy, thanks to which the spirit can do something in the world. The chakra responsible for it is located in the solar plexus area, this is the third chakra.

#360, 21:05

Imagination

The mind's ability to create new information in the form of images or ideas. The information that is perceived by consciousness through the brain in the form of spiritual images and thoughts enters the thinking of the spirit. And thinking compares this picture, which it received from the world, with the image that is in memory, and processes this information.

#345, 30:12

Imagination (genre)

A literary genre based on Esler that describes life on this planet or travel to other planets. The writer may be describing the experiences of his past lives or describing his astral travels to other worlds. On Earth this genre is called “fantasy”.

#51, 34:49

Embodiment

Moving the spirit into the flesh and connecting with the body with a special type of energy called life force.

The spirit decided to incarnate in order to learn something, convey something to other spirits, or achieve some of its goals or dreams. He decides to incarnate where a place has already been chosen for him, and the incarnation will go through these generic egregors. He will be escorted and he will go to the material world.

You incarnate not only for the sake of life. On the chosen planet you find yourself in a certain society, in a certain type of body that you need for development, and so on. An earthling has a certain energy, and on Earth there is a certain type of society. You choose your parents not only on Earth, but also if you are born on another planet.

All the same. Short-lived organisms also have their advantages in that they change bodies quickly and quickly adapt to different body types.

Through incarnation you need to change your vibrations in order to raise your level and come to God.

#20, 24:33, #41, 01:06:01, #105, 10:00, #243, 15:22, #259, 05:13

Incarnate Spirit

An immortal, intelligent, free-willed entity that is an integral part of God, the thought stream of his mind.

#233, 12:04

Theft (reasons)

Lack of awareness, isolation from the Higher Self, blocks.

#423, 04:44

Funnels on the surface of Lake Baikal

Formations arising under the influence of plasmoids of water and air together. This is their showing themselves that they exist. Funnels may be large, but they are not long-term, but short-term. At first the water spins, then it stops and becomes quiet in the same place. It may not produce these craters for a long time, and the craters may no longer appear in this place at all. And then suddenly they appear in another place.

Permanent funnels (there are some) are like gyres, only they move more slowly in a circle, this is due to underground currents. Baikal also has its own currents, which run along the shores and in the

depths.

A funnel, depending on what kind, if it exists for a long time, then this is possibly due to the bottom topography and the underground river. There is another example: from the mouth of a flowing river several kilometers along the bank to the side and opposite this place there can also be a funnel, because water of different temperatures and different compositions is mixed. As a result, due to different densities, the funnel begins to twist.

#371, 42:00

Inflammatory process

The body's response to the introduction of a foreign agent into it. First, the virus penetrates and acts unnoticed by the body. It is embedded either in the DNA or RNA of the cell, in the nucleus - depending on its type, or in its cytoplasmic reticulum, which consists of ribosomes.

#390, 30:35

Upbringing

Light for raising a child. Nourishment of the Soul. Food for the climb. To ascend upward, to the Light of God, nourish yourself. There is physical food, and there is spiritual food. Firstly, this is information from spiritual sources that there is a Spiritual world and its inhabitants. These are esoteric, philosophical, or religious scriptures that study the world. The second source of nutrition is that love, that Light of truth that arises in you when you selflessly help others, communicate with your spirit, forgive enemies, and show causeless mercy to all those in need. It is then that the food that is necessary for the growth of your spirit arises in you. This is spiritual food. This is the nutrition that elevates or upbringing.

Raising children begins with raising yourself. Once you find a sign that you have succeeded in raising yourself, it is that you can maintain emotional stability in all situations. This is a stable positive

background. To do this, you need to work with your settings. If you react negatively to something, then you need to identify the attitude that gives a negative result and change it. Don't try to change the world around you, but change only your attitudes.

#206, 01:45:10, #262, 00:56, 09:10, #266, 23:47, 29:25,

Education (spiritual meaning)

Nourishing the soul to ascend upward (in vibrations).

The word education consists of two components: "nutrition" and "regeneration". "Vos" comes from the word ascent. There is food for the body, and there is food for the soul. And nourishing the body is taking care of the child's body. Education has nothing to do with nourishing the body. This is precisely the nourishment of the soul. Feeding her with certain bright images so that she can adapt to this world and learn to accept everything that happens with Love. At the same time, so that this does not prevent her from actively moving towards her goals and objectives, to seek harmony between activity and humility.

#477, 16:30

Perception of the material world by a disembodied spirit

"Vision" and sensation of the non-embodied spirit of material objects or human bodies through the eyes of living people, if they are compatible with it in vibration, through their fields and through images in the human mind.

#202, 29:00

Enmity

Aggressive energy aimed at destruction.

#283, 20:35

Rotation

A type of movement generated by energy that was initially laid down during the creation of physical matter. All material objects rotate because they were originally created from etheric flows. It was the physical plane that was created from the ethereal flows of the four elements, described as the creation of atoms. All atoms are composed of the energies of the four elements. The element is an ethereal force. When they collected matter, they collected every atom, space, these fields, they were collected already rotating. When several plasmoids begin to collect an object, they release energy from themselves, and it begins to rotate. Rotation is a universal principle of collecting energy for its manifestation on a denser plane.

#420, 40:06

Rotation in the Universe

A reflection of the Divine Perfection of the One who created this world and its laws. A reflection of the Divine Law of perfection and infinity, since the ball and circle, when they spin, are infinity. The circle is a symbol of infinity because its lines never break. The sphere is infinity because its surface is a separate dimension. She is infinite in herself, she has no interruption, like other figures that go away at angles

#297, 01:48

Temporary marriage (on the planet Disaru)

Temporary partnership , which is possible until the moment when each participant in this temporary partnership gains experience interacting with the opposite person or group of individuals.

#163, 43:40

Time

The ability of material things to change.

A change in the particles of the material world, which determines all types of motion and all types of energy, kinematic energy.

A method for measuring changes occurring in space, a parameter for changing space.

A method of counting intervals of Eternity. Exists only in our perception during our incarnation.

A convenient tool for living in the material world. For convenience, time periods are selected, for example, a revolution around the Sun is a year, a revolution of the Earth around its axis is a day.

Divine energy that moves space. From the point of view of the physics of the Interstellar Union, time is energy, which is the cause of the formation of space and all its particles. But by itself, without space, without the material world, time does not exist as a physical phenomenon. Each planet that orbits a single Star, a double Star, a triple Star (there are even planets that orbit a five-part Star system) - they have completely different time patterns, which depend on their historical past, which, in turn, depends on the time of revolution of their planet around each, for example, from the Suns, around the revolution of their satellites, and so on.

Invaluable divine energy, which can be directed either towards development or degradation.

A flow of energy that is directed both forward and backward. Plus there is a Time Tape. There are variations of events along the Timeline. They can be either forward or backward.

Not just the energy of Light, but the flow of changes in material

particles relative to each other, the flow of changes in their position in space, their sizes, and so on. This is precisely change, a flow of changes caused by various energies.

From the point of view of the Spiritual world, time does not exist at all, because there is no change there. In the material world, there are continuous changes in those energy particles that enter it. It is impossible to stop these changes. Why is it impossible? Because the chain of events that is formed from changes in these particles, its stopping or its acceleration can affect many entities embodied here. Not just on people. And therefore, it is impossible for an individual spirit to influence objective time. But it is possible to speed up or slow down your subjective time by simply going into a state of eternity. When you go into a state of spirit, you find yourself outside of time. And when you find yourself outside of time, then that period of material time that is unpleasant to you for some reason simply passes unnoticed.

#250, 32:12, 15:28, #59, 47:25, #30, 02:13, #30, 03:30, #85, 24:13, #68, 02:46, 03:33, #66, 35:13, #328, 54:30, #400, 58:28, #401, 44:26, #420, 10:45, #450, 22:45

Time for plasmoid civilizations

Some kind of fractal wave that is superimposed on space and causes turbulence in it, creating atoms and so on.

#250, 32:12

Congenital diseases

Negative qualities, inclinations acquired by the spirit in past incarnations. These qualities are preserved during the transition to the spiritual world and in the next incarnation. Incarnation in a body with genetic disorders is given to pass certain lessons, namely, in this sick body.

#103, 06:22

All-seeing eye

The symbol of the “eye” in the soul of every person through which God looks. First appeared in Ancient Egypt as the "Eye of Horus". Later it was reflected in the doctrine of the “Third Eye”, as an energy structure that can observe the spiritual world. Implies that God is in the heart of each of us.

#49, 14:12

The witch's possession of animals

Contact with plasmoids in the astral plane, during which the witch is given energy and taught to influence animals. It can enter the animal's nervous system and control its body.

#165, 01:06:03

Universe

Not only the physical world, this is the etheric world, the subtle world. This world between the physical and the spiritual is the “plasmoid worlds”, of which there are a lot, hundreds of thousands of millions of them, if you take into account all the galaxies, there are very, very many of them. The Universe manifests itself from the Spiritual Light, which comes from the Divine space consistently.

The period that comes after manvantara is called the eternal period of peace, when all energies pass into the Spiritual world from all material worlds. As soon as this happens, there will be no Universe and no material world at all, but the Spiritual World will exist, which always exists, it is eternal.

Then there is a period of rest. It is impossible to determine its time correctly.

As for the duration of the rest period, if we count by subjective time, it can be either a second or several million years. No one can determine this. And then everything repeats all over again.

#450, 22:45

Universal "Law of Balance"

A law that says that the Spiritual world, planets and worlds of different levels of density are interconnected. The spiritual world is the same in all civilizations. All planets and plasmoid worlds are a small part of the Spiritual World. The entire cosmos is interconnected by its parts through the Spiritual world. A wave of a certain frequency reaches the other worlds through the Spiritual world and, accordingly, attracts the same frequency to itself, just as like is attracted by like.

249, 28:00

Flood (biblical)

A mythological account of the war with Selbet 12,000 years ago and its consequences. After the bombing of the Earth with energy-gravitational bombs, the Earth began to fly away from the Sun and move towards the Moon. As the Earth approached the Moon, water began to overflow its banks and coastal areas sank. This is called the Great Flood.

#18, 01:02:55, #59, 18:55

The second level of density of the material world

The state of matter in the form of a liquid. This is the same matter as in the 1st level of density, only the distance between its particles is greater. It vibrates faster.

#180, 17:33, #112, 34:00

Veil of the Astral

One of the types of etheric energies that separate the material world from the spiritual. The astral veil is located closest to the material world. Like a film on water, thin but durable for creatures consisting of the spiritual substance of the astral world. The astral veil covers the astral bodies of embodied spirits and one of its functions is to protect unprepared people from direct contact with the astral world, since low vibrations of people can attract low vibrational entities that they may be afraid of.

#16, 13:07, #141, 02:20, 36:32, 38:53, #180, 49:20, #223, 04:22

Miscarriage, reasons

Changing the conditions for the embodiment of the spirit. That is, mom's spiritual vibrations, her concepts of life, relationships with dad, and anything else no longer correspond to the qualities of the spirit that he must develop and that parents must invest in his upbringing. Everything no longer corresponds to what the Consulting Angels had chosen for him. In this case, the Spirit Guides come for him, interrupt his incarnation, say that he does not correspond, and that he will need to look for another body, and, perhaps, a more suitable one for incarnation has already been found. And in this case, he leaves, interrupts the thread of life for no reason, and the woman has a miscarriage.

They decide to interrupt the incarnation of the spirit at the stage of pregnancy if they found better conditions for it to incarnate and develop its qualities, or if it was needed for some time to work in the Spiritual world.

#262, 15:46

High vibration (donor) plasmoids

Plasmoid civilizations that share energy heal people. For example, the plasmoid civilization of Reiki. Kryon is also a high-vibration civilization, but with its own goals and objectives.

#222, 21:21

Higher Self (Spiritual Self)

The disembodied part of the spirit that remains in the spiritual world. This is the Supreme Essence, directly receiving the flow of energy from the Creator. The frequencies of vibrations of the spiritual and material worlds differ so much that when incarnated into a body, the spirit does not completely unite with it, leaving its highest manifestation, its particle of eternal, loving Light in the spiritual world. This is a part of a person's spirit that is not blocked by the memory of all incarnations, the person's life path, the life tasks of the current incarnation and how they are being fulfilled.

She does not have physical organs, language, or a physical voice. This is a person's thought, an image, but not a voice in the head.

The spiritual channel, which connects the embodied part of the spirit (we call us "soul") through the crown of the head, through the seventh chakra, exits into the spiritual channel - upward. And he goes to the Spiritual world to the level where our Higher Self is located.

The main condition for pure contact with your disembodied part is trust in yourself and acceptance of the answers that will come. In order not to be deceived by the play of your own imagination, you must accept. When a person asks a question, he should speak specifically to the Higher Self, and not to the void. At the moment of contact, the mind should be relaxed, that is, you should let go of your thinking.

#30, 30:14, #31, 00:00, #64, 17:33, 20:40, #76, 41:34, #89, 10:17, #137, 16:50, #199, 53:59, #206, 01:13:30, #234, 21:36, 18:45, #286, 05:37, #317, 37:16, #382, 09:38, #393, 05:40, 16:02, , 25:03, 35:04, 52:52, 01:01:15, #407, 24:33

The Higher Self of the Earth.

Plasmoid 48 (33) density level. This is more of a female image. Her subtle body occupies a volume exceeding the volume of the Earth and it is not round, like a cloud. She feels the Earth as part of her, sees everything that happens there, sees it all in energies. The name of this plasmoid is Demeter. It is already more than 4000 years old. Before this, the role of the Earth's plasmoid was performed by another creature, another entity, it was a man. His name can be found in historical reference books. They sometimes change because they can disincarnate and go into the Spiritual world to fulfill their tasks. When they say that the Earth is alive, the Soul of the Earth, Mother Earth, then these are all appeals to the plasmoid being that is responsible for the entire Earth. It observes and controls all plasmoids of earthly elements and natural places. She knows all the plasmoids, because this plasmoid of the 48th density level has perfect memory, she can remember everything, save information that is stored in all computers and libraries, and even much more.

#287, 22:45

Higher Selves of different countries

Patron of the country in the Spiritual World, usually an Angel of the 22nd, 23rd or 24th level. Most often on the 23rd, the Arhats do this. On a subtle level there is a patron, i.e. plasmoid, and the Spiritual World also has its own patron, they cooperate.

#287, 22:45

Pushing out or knocking out energies

The influence of a magnetic field on atoms, which are carriers of all three energy levels. One energy entering a substance at a certain speed, flux density, etc. can displace those energies that were contained in the substance before the moment of exposure.

#17, 24:19

D

Gas giants

Planets of the solar system whose atmosphere consists mainly of hydrogen and helium.

#17, 06:50

Galaxy "Magellanic Cloud"

Small Magellanic Cloud and Large Magellanic Cloud. These are two galaxies, these are not constellations. There are a lot of civilizations there. Our Interstellar Union is in contact with the Interstellar Union of those galaxies.

#313, 01:04:54

Milky Way Galaxy

A galaxy consisting of 727 dense-material civilizations and more than 7,000 subtle-material ones.

#272, 12:11, #354, 48:17

Galaxy "M31"

A galaxy that is 2.5 times larger than ours. According to the Intergalactic Union, it includes more than 350 civilizations that are part of their Interstellar Union, and 1,000 humanoid civilizations that are not part of it.

#219, 32:25

Galactic Security Service

A special organization in the Interstellar Union, which performs the combined functions of our FSB and the Ministry of Internal Affairs, prevents crimes and investigates those committed .

#16, 03:36

Galactic Federation of Light (GFS)

One of many communities in space, which includes both humanoid and plasmoid civilizations, and there are many more plasmoid civilizations. “Humanoid” means all dense material forms: anthropomorphs, reptilians, insectoids, and so on. “Plasmoids” are subtle life forms that exist in other dimensions, dimensions and densities of the material world. The capital of the GFS is located in the Pleiades star cluster. Any civilization of the Interstellar Union has the right to join the Galactic Federation of Light if it agrees to accept it. There are no restrictions in this regard.

The Galactic Federation of Light, like the Interstellar Union, has a Council of Rulers. It consists of 128 representatives of different planets, as well as 3000 representatives of plasmoid entities from different levels. These representatives constitute the Council of Hierarchs of the Galactic Federation of Light. By the way, it includes Ashtar Sheran, he is one of the 128.

#144, 27:00, #250, 29:25, #257, 07:22, #313, 01:01:02, # 397, 05:52

Galactic races

727 intelligent races. About 15,000 plasmoid and thin material. New plasmoid worlds are constantly being discovered on other stars, in nebulae, quasars, and pulsars.

#115, 21:28

Hallucinations

A state similar to sleep, only without the body falling asleep. At the same time, the observed images resemble images from dreams.

#50, 26:28

Ganesha

A certain entity that had many incarnations in different worlds and on Earth. He has a long history of incarnations. For the last approximately 10,000 years, he has been embodied in a plasmoid civilization of the 24th density level on the planet Jupiter. He comes to Earth, he has contactees here. Endows them with its power of harmony, luck, and so on. He has 108 names, although he had many more incarnations. He associates these names with the main incarnations in the material world.

In the subtle world he is the Curator of the financial egregor of the planet.

#279, 11:56, #424, 28:16

Harmony

Peace with yourself and with others.

#315, 02:10

Geba (Juventa in Roman)

A representative of one of the civilizations in the Pleiades cluster, with

which it is easiest to contact people who have retained the worldview of a child.

#288, 56:04

Gehenna

Image of fire. Perception of God's Love as His anger due to a decrease in one's vibrations.

#53, 01:15:12

Hemophilia type A

A recessive mutation of one of the DNA sections that is responsible for one or more units of blood coagulation in wounds. There are generally twelve of them, and each enzyme may be disrupted. And then even a high content of platelets in the blood will not save a person from bleeding at the slightest injury, because the insoluble protein fibrin, which forms blood clots from platelets, erythrocytes and leukocytes, will not be formed from fibrinogen.

In order for fibrin to be formed from fibrinogen, a chain of chemical reactions is needed, which depends on many factors that are genetically determined, that is, they are determined by genetic processes. Any protein or enzyme is produced based on DNA information. If it is not produced or is produced in insufficient quantities, or another enzyme is produced that quickly removes the first enzyme from the body, then the entire system breaks down.

#182, 02:21:45

Gen

A hereditary factor in classical genetics, which carries information about a certain trait or function of the body and which is a structural

and functional unit of heredity.

A gene is a DNA sequence that specifies the sequence of a specific polypeptide or functional RNA. Genes determine the hereditary characteristics of organisms that are transmitted from parents to offspring during reproduction.

#246, 34:51

Genetic diseases

Negative programs of the physical body, which are taken into account when incarnating a spirit with similar negative programs.

#20, 36:40

Gene modification

Any organism with altered genetics from its original origin.

#40, 59:12, #316, 04:40

Gene modification

Technologies, most often used to minimize efforts in some process. If this is a plant, then plant growing. If this is the production of insulin, then, accordingly, since the number of diabetes mellitus is growing , then the insulin that was previously extracted from the pancreas of animals is naturally not enough. You can't raise that many pigs. Therefore, they were forced to change the genes of E. coli in order to genetically modify it. So that it secretes insulin instead of its metabolic substance. And some other drugs are made this way to minimize any effort. For example, to induce some property that was absent, but which may be useful for this plant, so that it produces more fruit, greater yield, is less damaged by producers, and so on.

People who remain in villages do not have time to grow products for the urban population in the usual, non- genetically modified way. Therefore, the more the world's population grows, the more actively these technologies will be introduced. Such seeds will be used in the future, when people will learn to use them more perfectly, so that they do not lose their taste and aroma. Now genetically modified products are inferior to their natural counterparts in these organoleptic properties, as well as in the content of vitamins and microelements.

In the future, when Earth's scientists improve this technology, genetically modified seeds, due to higher yields and lower costs for the same pesticides, herbicides and other substances, which also cost financial resources, and their processing also costs financial resources, will become increasingly cheaper. And natural ones are becoming more and more expensive and due to this, the amount of consumption is decreasing. And this will happen the faster the faster the population grows. This is a natural process, they are connected to each other.

#345, 22:32

Human genome

Information contained in chromosomes at the DNA level. DNA is changed by any virus that enters a cell, ranging from the influenza virus, any acute respiratory disease, papilloma virus, all types of hepatitis: A, B, C, HIV infection, etc. Any viral agent changes the DNA of the cell into which it enters so that the cell begins to produce proteins that the virus, and not the body, needs.

#296, 22:51

Human genotype

Genes of Selbetians, Tumesoutians and Burkhadians, combined with the genes of primates. This prepared the nervous system and the receptor system of the primate body for the embodiment of a rational spirit.

There were common marriages between earthlings and aliens. There were often marriages and common offspring between the Tumesoutians and earthlings. Also between the Burkhadians , Shimorians, the colonies of Burkhad with the Pleiades, between the civilizations of the Lyran group, with the civilization of Ashtar. The earthlings themselves looked like representatives of the white race, only taller, about 3-4 meters. Their bodies were stronger and adapted to the gravity of the Earth. The composition of the atmosphere was different; the air contained more oxygen. There was another magnetic field in which this gravity was more easily tolerated. People lived from 600 to 900 years.

Closer to the beginning of the war, height changed, the Earth's gravity was high, and adaptive processes in the human genetic system allowed people of smaller stature to be born.

At first it was imperceptible, but before the war people were already 1.8-2 meters, approaching modern heights. This was not abrupt, but gradually, over centuries and millennia.

#105, 13:23, #256, 44:33

Genna (Juno)

One of the wives of Zeus, the prototype was his only wife Cephastis, a Burkhad humanoid named Agoranias. She visited her husband on the Earth base six times, and since she made visits over a period of several hundred years, on different ships and in different clothes, she gave rise to the myth that Zeus has many wives.

#288, 32:43, 42:23

Hercules (Hercules)

A collective image of heroic people who had great strength, endurance, and certain abilities: telepathy, control of animals . Such people were the children of aliens and earthlings, and their

descendants.

#288, 1:02:12

Hermaphrodites

The combination of two sexes in one being. Available in the form of hybrids. There are various experimental forms in the Galaxy. The result of crossing genes.

#52, 18:59

Hermes (Mercury)

A representative of one of the civilizations of the star from the constellation Lyra, at that time they had bases on Earth. A messenger of the gods, like an Angel from the spiritual world, when there was no Christianity yet . The person who transmitted knowledge about people to the gods came into contact with them. Modern researchers of myths believe that this is a collective image of intermediaries between people and the creatures they deify . Shoes with wings symbolized his ability to fly.

#288, 40:21, #220, 18:14

Hermes Trismegistus

Three times the wisest or three times the greatest. He was a contactee with highly organized plasmoid civilizations, whose ideas are very different from those of humanoids.

#220, 06:46

Gestia (Vesta)

A person, one of the priestesses of some god, perhaps Kronos himself. Contactor with plasmoid worlds

#288, 45:06

Hephaestus (Vulcan)

Deified man, earthling, blacksmith. Physical contact with representatives of Burkhad , visited their base under Mount Olympus, and also contacted representatives of plasmoid worlds.

#288, 38:21

Gaia

A creature from the myths of Ancient Greece, a figurative representation of a clot of matter formed during the formation of a new cycle of the Universe, part of the Chaos energy from which plasmoid civilizations created the planet Earth and all the civilizations embodied on it.

#288, 07:30

Death of Atlantis

A mythological description of the war with Selbet 12,000 years ago and its consequences, in which the cities that existed at that time were destroyed.

#59, 18:55

Death of the Universe

A process in which the vibrations of those energies that now make up

atoms increase, pass into the subtle worlds, and the subtle worlds, increasing their vibrations, pass into the Spiritual world. Only the Spiritual world remains. The material world disappears for observers from the material world, which is why they say “the death of the Universe.” But nothing from the Spiritual world can perish, because everything is the energy of the Spiritual world, and it is indestructible. This is simply the return of allocated energy to the Spiritual World to create the material world. Then a cycle of rest passes, and the material Universe arises again in order. First, the subtle worlds: the 59th density level, then the 58th, then the 57th, and so on until the first.

#326, 14:32

Hydroplasma (five-cluster water)

The fourth state of water in nature. Revitalizes, makes it clean, structured.

Water, the energy system of atoms of which is changed by the directed energy of an intelligent being or device, in which the arrangement of water molecules relative to each other changes. Consumption of such water has an effect on the etheric body.

#234, 01:08:55, #375, 00:21

Gilgul (in Hebrew)

Wheel, rebirth. The concept of metempsychosis.

#47, 16:30

Gilgamesh

Ruler. His parents were people. My father was a contactee with the Interstellar Union, and my mother was a priestess in the temple. The temple was dedicated to the lunar deity, where contact was made with

plasmoids that created the souls of animals. Mom was in very close contact with one plasmoid, which took on the image of a female goddess.

By birth, on his father's side, Gilgamesh descended from one of the branches of the descendants of the genetic experiments of the Tumesoutians 10 thousand years ago. 2 thousand years after the war, they also carried out these experiments so that humans and Tumesoutans would be a common race.

The Tumesoutians created some people who were taller in stature and they lived for a long time. Such experiments took place both before the war and after. The descendants of these people were born with Tumesoutan genes , the number of which was increased compared to other people.

Gilgamesh was not directly the son of an alien, but was a descendant of one of the branches of the tribe that descended from genetic experiments. Due to this, he had a stronger body and was more resilient. With white skin, lighter than the others, about two meters tall. He had dark , wavy hair.

He was a very brave man. He was a physical contactor , he was taken away. Due to the increased number of Tumesoutan genes , he had a body more resistant to physical stress.

He loved to swim in the sea, could swim for long hours, dive and hold his breath under water for up to six minutes. He had this peculiarity. Everyone considered him supernatural, a demigod, a special person if God had given him such power. Gilgamesh was a hunter, especially in his youth. He could shoot very accurately and run faster than a doe.

He radiated such energy that if he met a lion, the lion would lie down in front of him. Gilgamesh looked the lion in the eyes, gave orders, and the lion ceased to understand where he was. He could come up and treat the lion like a kitten, he could stroke it, absolutely wild. Because of this, people were afraid of him and considered him a sorcerer.

Gilgamesh was a very wise ruler, waged defensive wars, issued the Law of Justice, judicial laws (he is shown with scales, like a judge). His spirit was from a high level.

#343, 36:08

Child hyperactivity

The desire of the spirit embodied in the child to attract attention. To attract the attention of his parents, he does things that earn him attention.

#268

Hyperborea (Ragaria, Ragara)

An area in the north of the single continent Pangea. In the syllabic proto-language of the peoples who inhabited it , the name sounded like Ragariya, which can be translated as “an image of the path to the Divine Sun,” that is, a spiritual image of the path to God.

#288, 56:04

Hypnosis

An altered state of consciousness that is achieved by the influence of one part of the mind on another. The influence of an active zone in the human mind, consisting of certain thoughts, on the rest of the mind and on other parts of the structure of the spirit in such a way that it becomes dominant in the human consciousness. Hypnosis can occur with the help of another person or independently.

#140, 03:39

Gihor

The planet where cosmoenergy coordinators live. There is a silicon life form there. Due to this organosilicon life form, Gihorians can tolerate high temperatures. For them, a high oxygen content, like on Earth, is poisonous. Their organosilicon substances decompose from oxygen. The respiratory system does not consist of lungs. In the chest, in the stomach and even in the limbs there are transparent bubbles in which the blood is filled with certain gases.

#20, 01:05:15, #225, 01:09, #495, 41:39

The main task of education

Prepare a person for independent life without the presence of parents.

#50, 23:01

The most important act in a person's life

The path of Love and devotion in serving God

#309, 10:08

The main difference between the situation “after the quantum transition” and the situation “before the quantum transition”

The tendency of spirits embodied on Earth to highly vibrational states and the simplification of the path of Light for those who follow the path of Light. Space itself will help them, including nature, plasmoids, egregors, and so on, since they will be more charged with the energy of Light and high vibrations. And vice versa, spirits embodied with dark goals will be disturbed by everything . This is the main difference that determines all the others.

#222, 26:13

Eye (ancient Egyptian amulet)

The concentration, in general, of the entire being. This was a sign that God always sees you and that you are under His protection.

#403, 01:06:00

Gloria

Plasmoid civilization, which is located on the far side of the Sun. It is inhabited by highly spiritual spirits.

#219, 25:30

Gluon

The process of receiving and transmitting energy between atoms in microspace and macrospace , according to the law of conservation of energy.

#166, 06:24, #135, 46:13

Gluon field

The set of energy exchanges between atoms in a certain unit of time. The gluon field makes up most of the rest mass of elementary particles.

#166, 06:24

Gluten enteropathy in children

Allergies to herbicides, pesticides, antifungals, bleaching agents in grains and flour. It is intensified by the psychological state of the child ,

in which he feels rejected.

#124, 27:50

Gnomes

A plasmoid civilization that is located underground, in a three-dimensional world, but at a different level of density. For us, soil is a dense medium; we cannot exist there, but they can, because they exist in a different density.

#97, 15:40

Naked

A branch of observational astronomy related to Vedic astrology.

#354, 42:40

Calvary

A symbol that all 18 of the original humans died and were buried near that first base, Eden, which now lies at the bottom of the Mediterranean Sea. If you look geographically, then this is in the region of the Sinai Peninsula, Egypt, etc.

#239, 29:09

Goloka Vrindavana

Place of Krishna. Krishna lives there in the Spiritual world.

#305, 14:11

Blue blood

Descendants from marriages of Shimorians with earthlings. The bluish color of the skin and blood of Shimorians is due to the high content of organic copper compounds in the blood.

#105, 01:12:10

Blue sky

Perception of earthly eyes. The sky on any planet is a symbol of the spiritual world. Blue (dark blue) color reflects the vibrations of the 5th and 6th chakras, which are responsible for the manifestation of creativity and spiritual vision, i.e. The color of the sky on Earth shows people which path they need to take to become a heavenly inhabitant.

#303, 03:17

Dove as a symbol of Peace

The bird of peace, happiness, grace for any person on Earth in ancient times, since its energy caused increased vibrations in the fourth chakra, where love is. It was the dove or dove, even in the book “Lilith”, that was the only species of bird that could be sacrificed to God. One of the birds is the female pigeon.

The phrase “You will be simple as doves” just meant that simplicity is in love, which manifests itself through the heart. There is nothing simpler than love.

#259, 05:13

Homeopathy

This is not just a chemical method, it is energetic. A method of treating microdoses of substances that cause disease-like symptoms. But at the same time, there is an impact not on the physical, but on the etheric body by the radiation of those substances that cause the disease itself. But, since there are no substances in the homeopathic medicines themselves, but only a charge of energy, this charge of energy, on the contrary, suppresses the disease at the physical level.

#127, 20:21

Homogeneous race

A race in which there is no genetic interbreeding with other civilizations and there is no difference in skin color.

#163, 12:33

Homologous chromosomes

A pair of chromosomes with the same set of genes and similar morphology in the karyotype of a diploid organism. One of the homologous chromosomes is received during fertilization from the maternal parent organism, the other - from the paternal one.

#246, 34:51

Homosexuality

A developmental disorder caused by memories of a past life in a body of the opposite sex, when the spirit cannot come to terms with and accept its present body. Such a spirit cannot live with the opposite sex, considering it “its own.” For example, a woman begins to consider men as her brothers and therefore cannot have sex with them. On Esler and Shimora there is no such thing as homosexuality, since there they explain to every child that if he was born in this body, then this is his mission, and to go against it means to go against the plans of God, which you yourself agreed with when you were incarnated . No

one will do this there, since it is pointless.

#41, 02:36, #97, 22:40, #133, 59:56, #134, 42:48

Gomptembria

Worms from the planet Daraal , which are used in food.

#330, 23:47

Gopis (cowgirls)

Symbol of the soul. Gopi is not different from Krsna. Each gopi is Radharani for Him.

#305, 09:20

Gopneishi (in Daraal language)

Intelligent spirits in a physical shell.

#5, 03:12

Above

Reaction to loss.

#428, 04:44

Gorgon Medusa)

The image is either of contactees who had hypnotic abilities, or of

people who had an active gene for the so-called reptilian brain, which is located under the cerebellum.

Snakes are a symbol of reptilians. Why were they located specifically in the head area? This meant that people perceived the priests with snake (reptilian) energy around their heads. Their hair was normal, there were no snakes in it. Usually such people were considered quite wise. Naturally, they embodied special spirits with extensive experience and the ability to contact different civilizations, who passed on abilities, knowledge and wisdom to them.

#288, 01:07:19

Pride

Wrong attitude towards gifts, abilities received from God temporarily as a gift. Pride and pride always contain the fear of losing love.

#128, 00:03, 01:55, 03:38

Burning in fire (Christian concept)

The feeling of high vibrational Divine Love by a disembodied spirit with a low vibration level (below the 7th level) in the spiritual world.

#170, 19:04

Hormones

A certain protein, any enzyme. To synthesize them, you need material. Most often it is supplied externally.

#410, 23:12

Horoscope

A circle dividing the constellations, first created by the Sumerian priests. They noticed that the path of the Sun across the sky is repeated every year, that it passes through the same constellations. It was this circle that already in Greece began to be called a horoscope. It was translated as “visible sky”, as “I watch the sky.”

The priests saw that the circle consisted of 12 constellations. The number “12” was sacred to them even before, because it reflected it as 4 elemental forces multiplied by the trinity of the human spirit. They knew the laws about the trinity in man: body, soul, spirit. They called it differently. The priests saw that the sky also reflected the sacred number. The sacred number is repeated.

Every five years the priests had a holiday. That is, “5” was considered the number of a person, like all ancient peoples, because the distinctive feature of a person is that there are five fingers on the hand. This is the first reason. The image of a five-pointed star, a head, a human image is like the number of a person. A very ancient expression.

The number "12" repeated 5 times was "60". For observation, the priests divided the entire sky into 360 degrees, as they measured a circle. The circle was divided into 360 parts. And each segment of the circle was called a degree. Then their hour began to be 60 minutes. Initially, this was used specifically for the needs of astronomy. Everything was strictly tied to the solar system and to the universal earthly numerology, which reflected the secret meaning of numbers.

#343, 01:02:00

Gravity platform

Platforms of different shapes: round, oval, square. The shape doesn't matter, only the material. The outer side on which the person stands is made of one material, and the one that is turned towards the surface is made of another. Between them are microcircuits, like tubes. Around

each tube there is a spiral of very thin wire: nickel, molybdenum, something else. Energy flows through the wires, which suppresses gravity. It has energy reserves for flight , and then it will need to be charged.

#437, 01:22:12

Gravity bombs

Technical devices (round, white) in which gravitational energy, self-closed in a certain electromagnetic field of a vector configuration, is embedded.

#414, 52:44

Gravity beacons

Devices placed throughout the Galaxy that allow you to correctly exit intergalactic jumps. They are tuned only to ships of the Interstellar Union, the Galactic Federation of Light and ships from other Galaxies that have received special markings. This is done for security reasons.

#218, 34:22

Gravity drive

A type of engine that allows you to carry out gravitational jumps and move throughout the Galaxy in a few tens of minutes. The basis for the operation of a gravitational engine is one of the types of material energies inherent in atoms, namely microgravity, the carrier of which is the graviton. The source of gravitons is matter. Most often, tetravalent elements in powder form - carbon or silicon - are used to knock out gravitons with a plasma field. Typically, for a ship weighing up to 700 kg, about 6 kg of carbon is required for 30 light years.

#17, 21:38, #141, 11:53, 13:20, 14:18

Gravity jump. Instant movement

A jump that is carried out by a gravitational engine when gravitons, quanta of gravity, which are in every atom, escape from the nucleus of the atom, from the third level of energy. They first overcome the second level of energy, then the first level of energy. The nature of gravitons is to be inside the third energy level. When they were knocked out of there by some kind of energy, forced out, gravitons strive to return to the third level of this atom. They fail to do this due to the field that is created and does not allow this gravitational radiation back.

Radiations can also have a direction, because after all it is material energy (not subtle and not spiritual). This radiation begins to rotate along a specially created artificial circuit of the engine, which, naturally, consists of certain substances and can withstand the plasma field. If the speed of gravitons in a state bound by matter is practically equal to the speed of photons, then in a free state this speed exceeds the speed of photons by 50 times.

But achieving a maximum speed of gravitons is not required for a gravitational jump. When gravitons rotate in this engine circuit, the speed constantly increases, because they still strive to return, to overcome this plasma field. They strive to return to matter.

The plasma field experiences, one might say, pressure from this gravitational radiation and presses in response. There the elastic force of the plasma field is created , special indicators are on the starship display .

When the speed of these gravitational flows, which resemble a wave because there is inhomogeneity there, reaches 4 light times, this gravitational field instantly spreads to the entire ship, because this engine circuit transmits it to the entire ship. But it does not transmit through wires, but through special energy channels that are in the casing. And as soon as the speed reaches 4 light speeds, this

released energy moves the ship from one point to another, but not because it dissolves there - this will already be teleportation, this is considered dangerous, because the atoms may assemble incorrectly.

Instantaneous movement is movement when space is instantly overcome precisely due to gravitational interaction. At the moment when a ship disappears at one point in space, not at the same moment, but at the next moment (an instant is approximately equal to 1.5 of your seconds) it appears at another. It doesn't appear at the same second, otherwise the ship will exist in two places at the same time.

#452, 01:03:10

Gravity

The energy of the third level, which is inherent in every atom at the microlevel, " supermicroscopic ". It consists of gravitational quanta - gravitons. Each atom contains three levels of energy: the first is electromagnetism, the second is thermonuclear energy, and the third is gravity. At the micro level, it acts as a force that attracts atoms to each other and forms dense matter, as a force that allows all stars , galaxies, planets and even the smallest stone to move in space along their trajectories and in their orbits, that is, to be attracted to each other towards each other and not fall on each other.

There are two types of gravity: microgravity and macrogravity .

No magnetic or electric fields are used to shield gravity. This will cause too much energy loss and is ultimately ineffective. To do this, they use certain forms of gravity itself, which are directed in the opposite direction, as if into gravitational fields. That is, gravity can be shielded by gravity itself.

#16, 11:44, #79, 31:39, #258, 07:24, #284, 16:10

Graviton

The carrier of energy, which is located on the 3rd level and is called gravity. Contained in all atoms, atomic structures: molecules, monomers, polymers and others. When released from the substance in which it is contained, it has a much greater speed than level 1 energies (magnetism, light, radio waves).

Gradation of civilizations of the Interstellar Union by technical level of development

A system that determines the level of technical development of civilization on a certain scale. Each level describes a specific technical system. There are many developers of such scales. There is no one generally accepted system in the Interstellar Union . One of them is the 30-level system. On this scale, the Earth belongs to the 12th level, which is characterized by the use of nuclear weapons and space flights.

#218, 20:07

Boundaries of the Universe

Limits of the Universe that have not been found. Most likely, in our material world there is no such limit.

#22, 33:50

Borders of the Interstellar Union

Borders that end with the borders of our Galaxy. Planet Earth is included in its territory.

#16, 05:47

Graphene

An allotropic type of carbon, a very light material, it can be raised to great heights, it can be poured into various forms that harden. This has not yet been developed on Earth.

Once in the body, graphene cannot harm a person.

#337, 00:21

A sin

That which separates us from God, from His energies, belongs not to civilizations, but to those spiritual levels from which spirits come. Any conscious action of an embodied spirit that takes it away from the Light of God's love. It's not something that takes him away, but it blinds him to the vision of this Light and the understanding of Its true value.

State of mind. Actions are a consequence of sin, sin itself is much deeper, it is in the human heart when it is not filled with unconditional love.

A consequence of damage to mental attitudes and astral feelings, and emotions on a deeper spiritual level.

Low vibration energy states of the mental, astral and etheric bodies.

#1, 24:41, #63, 13:26, #196, 17:27, #239, 51:44, #241, 01:21:00, #270, 49:21, #283, 01:06:47, #341, 39:14, #400, 43:13, 46:24

The Fall

The consequences of eating the fruits of temptation on a spiritual level. There has been a fall into low vibrations from top to bottom. Thus, the Bible is written about both a spiritual event and a physical one. But to understand all this, you need to know the nuances.

#196, 14:23

Mushrooms

Microorganisms, but they reproduce differently. Firstly, they retain spores and a different metabolism, for example, Candida. It looks different and cannot spread through living cells as actively as chlamydia. Candida, like other fungi, is characterized by the metabolism that it feeds on cell debris, dead, where few enzymes are needed for digestion, this is ready-made organic material. And the frequencies also differ. Even one fungus differs from another in the same way as, for example, staphylococcus differs from Pseudomonas aeruginosa.

#410, 40:37

Hallucinogenic mushrooms , psilocybin

Mushrooms that cause the perception of those energies and spiritual entities that a person does not perceive in a normal state of consciousness. The influence occurs not on vibrations, but on the perception of the spiritual world and subtle civilizations. Substances in mushrooms act on the brain in such a way that substances are released that open up this vision. And not only him. Hearing, sensations in the body that are caused by contacts with subtle entities. A person's vibrations remain at the level they were at before taking the substance.

#292, 55:25

Blood type

Certain sets of proteins that are found in blood plasma and erythrocytes, platelets and leukocytes, in its formed elements.

#105, 01:07:43

Group animal soul

Animal souls created by the inhabitants of plasmoid worlds, embodied in the bodies of microanimals (viruses, microbes, bacteria). The more primitive animal bodies are in development and the smaller they are, the more of these bodies the soul, that is, the group soul, is embodied in. After the death of all the bodies of a group animal soul, it can be reincarnated into other animal bodies of the same group of living beings, but with each incarnation less and less vital force remains and, in the end, it dissipates in the astral plane.

#27, 01:14:18, #286, 09:23

Hive Mind

The social structure of insectoids, in which one is responsible for everyone, and everyone is responsible for one, and can also energetically and psychologically sense other representatives of its species at a distance. This feature of organisms forms the basis of the worldview of insectoids, from which the social world order follows. At the head of society is the main insectoid, who forms the core of society; from him there are connections at the energetic and psychological level with each member of society. First, he is connected with his entourage (retinue), then each associate has connections with another twenty, and so on. The structure of society has a clear hierarchical system. In practice, this means that each member of the race, no matter where he is, in space or on his own planet, has access to the mind of any other. At an early age, young representatives are even specifically taught how not to feel the suffering of other members of society, for example, their death or injury.

#35, 07:33

Humanoid

A dense material being, an intelligent spirit, embodied in a body of third density, that is, in a physical body consisting of atoms and molecules. The nervous system of such a creature is capable of embodying a rational spirit. Neither a bacterium, nor a virus, nor an amoeba, nor an insect, nor birds, nor mammals are capable of this. Their nervous system is incapable. Humanoid life forms include anthropomorphic, reptilian, insectoid, ornithoid and other races.

33, 38:50, #42, 48:19, #91, 09:55, #111, 22:57, #324, 38:18

D

David (king)

Incarnation of Metatron. He was born into a simple family in that incarnation, but became a contactee since childhood with the planet Tumesout . He wrote poems for songs about nature, about love, and there were also prayer songs, that is, spiritual ones. They taught him both in a dream and in reality. They came from the planet Tumesout and taught how to cleanse your spiritual heart, how to tune your spiritual channel to communicate with your Light, with your heart, and how to always be in high vibrations, how to always be light and pure, “pleasing to God.” What is “pleasing to God”? This is a person who matches the vibrations in the highest divine quality.

I began to do this, and began to correspond in vibration to the place of the ruler of Israel, when he was still united. There was another king there at that time. A curator from the planet Tumesout chose David through his prophet and brought him to this king. Gradually, through seemingly random events, he took his place. And he began to rule Israel.

It was not an easy path. Many times David was in danger of being taken out of the incarnation; many times he was tested for forgiveness, for love, for acceptance of his enemies, those who wanted to kill him. And if he had allowed any feeling towards the former king and his

people, he would have ceased to correspond to the place of ruler. Therefore, I considered this incarnation very important.

#243, 08:56, #446, 12:08

Tao (Taoism)

Fans of contactee Lao Tzu. They strived for physical immortality. Quickly realizing that this was impossible, they replaced it with death, but since they associated death with the decomposition of the body, it was like something disgusting. Taoist teachers believed that the most perfect care is when you leave nothing for death, for the process of decomposition. This was considered a sign of departure into enlightenment.

#367, 34:27

Sequence

Planet from the constellation Cassiopeia. Distance - 150 light years from the Sun. The capital is Kuuli. The birthplace of Kirchiton , the first curator of Irina Podzorova .

It was located in the constellation Sagittarius, when viewed from Earth, and was called Shiitlo , which roughly translated from the Daraal language into Russian means “Dark Cloud”. Because this planet was very often surrounded by clouds, which allowed little light to reach the surface of the planet. It is because of this, because of the long period of darkness on the planet, that our ancestors, when they evolved from animals, developed such an organ, the third eye.

Among the Daarals, the head comes out of the body, practically without a neck, because they did not have the part of the spine that is responsible for the neck. One eye is red and two eyes are yellow and they are round. Hands with five fingers, just below the knees. They live

from 250 to 350 years. The number of chakras is 24. There are two on the head, the others are where the hands are. There are energy centers in the limbs.

They evolved from animals, from creatures that vaguely resembled bears. The animals had an organ similar to an eye. Through it, these animals could see infrared radiation, which is emitted from warm objects. It was this function that the ancestors adopted when they evolved from these animals. They could see in the dark, in low light, and in low light as clearly as during the day due to infrared radiation. Subsequently, when they became intelligent beings, they changed their genome a lot, including by introducing alien gene structures into it in order to improve the race, increase life expectancy, increase endurance, etc. A little less than 500 years ago, their race was hybridized with a race of reptilian creatures. They share 23.8% of their genes. To be more adapted to your world, to have a longer duration of not just life, but a longer duration of youth. To postpone old age and so that the humanoid is active until the last days of its incarnation. And in order to increase strength.

Women look the same as men. There is only a difference in the internal structure. There are no sexual characteristics, no genital organs, like humans have. They are all internal.

17,200 years ago on the planet Shiitlo they learned about the existence of the Interstellar Union. But at first they did not join it, although there were no wars, injustice and other aggressive tendencies. The civilization was not suitable for joining the Interstellar Union due to its careless attitude towards nature, excessive use of its resources and indifference to environmental pollution.

Five thousand six hundred years ago, a catastrophe occurred, causing the death of almost 18 billion intelligent beings. It was possible to save a little more than 25,000 humanoids, who were gradually transported to the long-discovered planet. All the others died from the poisonous gas that escaped from the soil due to the fact that huge cavities formed under the soil, under the ground due to active mining. They burst to the surface of the earth, and no one had time to understand anything.

It was because of this that 1,000 years later, not immediately, but

1,000 years after the resettlement to Daraal , the government passed a law that limited the birth rate with a special permit, which was issued by the government after the death of one of the representatives of our race. This happened so that there would be no overpopulation and active use of resources, so that the same thing would not happen to Daraal , so that it would happen to Shiitlo .

Then the instinct of reproduction remained, and therefore the sexual attraction characteristic of it; many humanoids, especially at a young age, very easily mistook sexual desire for true spiritual Love, united with each other, and they had an unauthorized birth of children. The murder of children in the womb has been equated to the murder of an adult for a long time. Therefore, the rulers realized that many humanoids faced the impossibility of fulfilling this law. And they adopted a new law, according to which changes were made to the genome of this race, blocking the manifestation of the reproductive instinct through the hormonal system and the influence on the nervous system of humanoids

The birth of a new humanoid on the planet is possible only when someone already living comes out of incarnation. There is a law that involves the reproduction of intelligent humanoids on the planet by passing the genotype of both parents through a special apparatus that connects them into a single body and allows the Spirit to enter unhindered. This is a device that can be tuned not only to the structure of physical cells, but also to attract vibrations of the subtle body.

Recently, the ruler of the planet issued a law according to which a planet suitable for the race, where there will be a colony, was discovered in the constellation Cepheus, adjacent to the constellation Cassiopeia. Thanks to this, there will be enough resources and enough space for the free expression of their parenting qualities. This is the first such law in more than 5,600 Earth years!

Society has already passed the stage when religions were necessary. Now it is at that stage of development when the concept of God and the feeling of it occurs not through social formations that you call religions, but individually for each humanoid. Everyone is responsible for themselves. There is no need for religions because there is no need for an organized religious movement led by certain people. Everyone does this themselves. The best prayer is a kind word to your

neighbor. The best ritual is a good deed that comes not from ostentatious piety, but from true Love. There they do not call God God, as in Christianity, but call it “an absolutely expedient thought.”

The Daraalians have medical centers where humanoids are restored, for example, after injury.

#2, 19:50, #20, 46:53, #185, 36:22, #470

Gift of interpretation

The ability of a conscious contactee to receive information through thought forms, translate into Russian through your brain and receive an understandable thought image or information. The Apostle Paul wrote about this in the Bible.

#94, 10:08, 12:22, 18:52, 20:17

Intergalactic liner engine

A type of engine for moving between Galaxies, powered by free vacuum energy.

#141, 14:18

Movement (child)

The need of any child to understand the world is his ability to grow and develop quickly.

#455, 25:20

Virgin Mary (Mother of God)

An earthly woman, married, was betrothed to her husband, this is a known fact in Scripture, her husband's name was Joseph. Although he is not the natural blood father of Jesus Christ, he continued to be her husband. Therefore, none of the apostles was surprised by the appearance of children. The doctrine that she was pure, in Mead's personal opinion, arose due to the fact that they wanted to give her a certain shade of divinity, to equate her with the Angels. Not even just to the Angels, but so that in the minds of people she becomes an unearthly goddess. It was such a completely understandable technique: a goddess in a figurative sense. The fact that she did not give birth to more children means that she is not vicious and is a goddess. This is a well-known teaching. But we must understand that these were not Christians, they used Jewish logic. For them, having children was considered a virtue. The presence of children of the Mother of God could not discredit her in any way for the reason that she gave birth to them in a legal marriage, not in betrayal of her husband. The Apostle Paul in his Epistle to the Hebrews clearly wrote that marriage is honorable and the bed undefiled. And since the bed is immaculate, it means that the fruits of this bed are gifts of God, and not some unknown creatures. There is no contradiction here with the dogmas of the church, because they were formed on the basis, among other things, of the writings of the Apostle Paul. The only problem for the church is that your people will begin to find out what descendants of Mary's children remain on Earth. And since she is considered to be united with the Holy Spirit, this means that her children and further descendants can be endowed with some sacred properties. But this is not true at all. Spirits, just like you and me, incarnated from different levels, and a person's origin from one kind or another does not matter, but only his life in the body matters, that is, what he will achieve in this life.

#44, 22:40, 37:50

Motto of the Interstellar Union

All the rudiments of reason in any of our worlds are manifestations of the Divine mind.

All aspirations of the multiple worlds of the Interstellar Union are a manifestation of the Divine will of the embodied entities of the Divine light.

Reason, will, light, the desire for knowledge are manifestations of the expanding consciousness of Divine energy, which recognizes itself in all its manifestations.

#218, 06:03

Degradation blows

A decrease in the vibrations of the spirit, leading to a loss of the sense of the spiritual world and Light in oneself.

#37, 35:40

Father Frost

A spirit that was responsible for managing certain times of the year. He still answers now. In ancient times, people communicated with plasmoids, which control not only a certain place, but are also responsible for the correct passage of a certain time of year in nature.

#180, 01:00:15

Deja vu

A state of human consciousness that arises for various reasons, but the most common is when the human mind has the function of comparing similar things and situations.

#83, 26:59

Dementia

Impaired reproduction of spirit memory through the brain.

#86, 47:34

Demeter

Plasmoid of the Earth (Solar System), a fine-material being of the 48th density level (where, like at the third level of density, there are also many worlds), incarnated from the 20th spiritual level. The Higher Self of the Earth. When they say that the Earth is alive, “Soul of the Earth,” “Mother Earth,” these are all appeals to the plasmoid being that is responsible for the entire Earth. It observes and controls all plasmoids of earthly elements and natural places. The last 4,000 years have been a female image. Her body is several times larger than the Earth. She feels the Earth with herself. She is present everywhere, anyone can communicate with her. She keeps order, like a caring mother takes care of her children and gives them instructions. They are, at the same time, like children and like her employees.

Demeter is one of her names. But each contactee on the third density level who comes into contact with her may hear the name in a completely different way. Demeter is a character from ancient Greek mythology. Every nation that has its own language of communication at the physical level can call it differently. Gaia is the creature that came before her. But sometimes Demeter is also called that, because people may not know that she began to lead the Earth instead of Gaia, and they still address her that way. Also in some peoples it was called “Ceres”. In some peoples they called it simply “Earth” (as in “Mother Earth”). And in some modern languages it is called “Mother of the World”.

#287, 22:45, #288, 43:01, #292, 28:08; #353, 55:03, # 508, 17:50, 41:08, 41:20, 45:10

Demeter, her task

Responsibility for the structure and work of subtle beings of all density levels on Earth, coordination of work in information terms for the exchange of energy and information between earthly plasmoids of various levels.

She has a multidimensional consciousness that can simultaneously embrace many rapidly occurring processes in the environment, accept their significance and role in the biosphere and other shells of the Earth, and quickly direct certain processes and combine them with each other.

#508, 25:21, 32:20

Demons

Spirits from the 5th level of the World of disembodied spirits, who were so disillusioned with life in the material world that they came to completely deny its value and accuse God of creating it and maintaining it with His Energy. The degree and reasons for this denial are different for everyone; what remains common is visible asceticism and religiosity, combined with a sharp condemnation of dissenters and with a certain disgust towards any form of matter or material activity. Demons often do not want to wait for their turn to incarnate; they choose people with weak wills and forcibly occupy their body. This violates God's law, since they must wait their turn to incarnate. Demons have two goals. The first is to show that God gave absolute freedom of choice to his children. Because any coercion in this matter would not cause sincere love, and therefore would not cause such high vibrations as His. And the second goal is to show that God allowed evil deeds and evil choices to exist in His children so that His other good children, who remained in goodness, could see an example of the fact that there is suffering when they choose evil. That is, in many cases, without going through the experience of evil it is impossible to evaluate the experience of good.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”,

#33, 01:00:15, #47, 34:50, #59, 34:22, 38:35, #165, 11:03, 19:22, #19, 54:35,

Denaturation

Conversion of some proteins into amino acids. Occurs with the help of pancreatic enzymes, which are produced by the pancreas. Denaturation begins in the stomach with the help of pixin and hydrochloric acid and continues in the small intestine with the help of pancreatic enzymes. Thermal processing of protein foods helps the glands convert proteins into amino acids so that the body can later build its own proteins from them.

#81, 20:58

Summer Solstice Day

The day when the energy of the Sun on Earth is maximum for the year. The energy of sunlight and the presence of solar plasmoids (their collective name is Ra) of many civilizations of different density levels in the space of the Earth on this day are maximum.

#292, 59:21

Money

A universal tool for exchanging different forms of services. A means of assisting in the spiritual development of yourself and those around you.

A type of material energy that is equivalent to human labor. Any labor, any work in our material world is valued in monetary terms, and energy is spent on this work.

#176, 40:13, #254, 00:21, #423, 09:15

Depression

A feeling of despondency that has already affected the human brain, and hormones have already ceased to be released there

joy. In order not to experience constant negativity, the Higher Self of a person blocks it,

in general, the ability to feel so that this negativity does not further reduce the vibrations to

low level.

In order to fix this problem, it is necessary to dissolve those blocks that cause

constant negativity in a person's mind, in his consciousness. Then the Higher Self will unblock the feelings and

a person will again see the world in a new way. His soul will not be devastated, he will enjoy what

what surrounds him

#313, 33:31, #477, 18:45

Depression (causes)

Internal spiritual reasons on the astral, mental, karmic levels, or karmic nodes, that is, negative vibrations acquired in past lives and transferred to this one to learn lessons in other conditions of existence. These are mental attitudes that were placed in the mental body in childhood and accepted as truth, leading to a decrease in vibrations.

#292, 51:52

Deprivation

Disconnecting yourself from the sensations of the outside world.

#292, 14:45

Destructive forms of plasmoids

Plasmoids that, feeding on human fear, irritation, and anger, can spend their energy on destroying something in the material world. They do this to attract attention and to further intimidate people nearby.

In our Galaxy, the percentage of destructive plasmoid civilizations is 17%, in the Solar System – 22%, and on Earth – 37%. Recently it was 34%, but now it is 37%. But these are destructive plasmoid civilizations that feed on negative energies.

When a large flow of fear, anger, hatred, anger, resentment emanates from people, these emotions and feelings go to the Astral. And when they go to the Astral, they pass through subtle worlds, because at all levels of density the world of one density is embedded in another. According to the principle, not like a nesting doll, but as if inside one world there is a film of another world. It's like shells.

And when vital energy, charged with certain negative thoughts, feelings and emotions, emanates from the dense material world, it rises to the astral world, to the egregor. But before getting into the egregor, it passes through all the subtle worlds. And those plasmoids that are there shrink from this . If they are high vibrational, then they begin to experience discomfort. This cannot be called physical pain, but it is like mental oppression, that is, as if darkness is being cast over them. Some of them retreat from people, rise to another level of density so as not to be in this energy, while others feel offended, become similar to these energies and begin to feed on them.

#155, 23:25, #427, 15:20

Molecular destructor (alien device)

A special cutter (like a file) for scraping stone. The destabilizing field of the molecule was directed not in one direction along the tube, but along the blade. It was turned on by a button on the handle , had removable batteries that were charged from the Sun. They could operate for 12 hours, then had to lie on the roof of some temple all day and charge. These rechargeable solar panels that were in the scrapers can withstand a virtually infinite number of charge and discharge cycles. They contain a material that does not collapse.

#403, 01:06:00, 01:08:50, 01:18:36

A dozen

The law of the Torah is that people gave a tenth of their income, not only money, but also their fruits and products from livestock, to the Levite.

#209, 18:31

Indigo children

High vibrational children from highly spiritual levels who had experience of incarnation in highly spiritual plasmoid civilizations, the worlds of the Interstellar Union. We came to help the whole Earth, to bring them new spiritual teachings in the Light of the Creator’s Love

#277, 01:11:39

Child masturbation

A consequence of a lack of love from parents and loved ones, and not from the desire for sexual relations. Occurs as compensation for love. When you are in the energy of complete acceptance, light and trust in your parents, such desires will not arise.

#134, 58:05, 01:05:35

Child psyche

The psyche of a child up to 6-7 years old, when the spirit is still adapting to the physical body and he cannot yet separate the images within himself from external images. During the daytime, for a child, any action of parents, friends, or an image seen in a cartoon is stored in the memory and perceived as truth. When he goes to bed, he attracts entities that are similar in vibration. If the vibrations are reduced, certain entities will come to the astral plane and frighten the child. It is necessary to give the child more love and Light, to listen to him without laughing at the images he sees.

#86, 20:22

Childhood fear

The inability to identify, recognize and harmonize one's emotional sphere, which leads to a change in vibrations at the astral level of the biofield, and this can cause unconscious contact with subtle civilizations that feed on negative energy, aggression, and fears.

Aggression and fears in a teenager are signs that he does not feel the energy of love from his parents. They manifest it, but not in the form in which he can feel it.

#262, 00:56

Jiva

Connection of Atman and Prana.

#33, 20:15

Jinns

Spirits from the 8th level of the World of Disembodied Spirits, very similar to elementals, but unlike them, they have a broader outlook, greater outward focus, greater organizational abilities and friendliness. They also strive to incarnate in subtle worlds, but unlike elementals, they often do this not in plasmoids that control the elements, but in their immediate leaders, who look after certain places in the material world: fields, forests, reservoirs , houses, and so on. They also take part in the creation of animal souls and help the elementals control natural elements.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

John Kennedy

Abraham Lincoln incarnate . These two times he was President of America. Incarnated as Abraham from the 19th level at the beginning of the nineteenth century and ended up at the 19th level after disincarnation. He did not fully complete his task due to the fact that he was forcibly taken out of incarnation, he was killed both times... He also incarnated into John’s body from the 19th level, went to the 21st because he also did not completely complete the task, but he managed to do more.

#412, 05:31

Juna

The spirit incarnated from the eighteenth level, “Guardian Angel”. Birth name Evgenia. "Juna" is a spiritual name. She was embodied before coming to Earth on the planet Esler as a man, his name was OlStakr . He was a member of the Planetary Control Council of sixty Eslerites as ruler.

She left her incarnation to the seventh level. She did not complete her life’s task of developing patience, humility and the ability not to grumble in difficulties and to endure trials. I accumulated in myself a lot of energy of despondency, sadness and grumbling against God for not helping me in troubles. Why exactly on the seventh? Because she really loved nature, nature spirits, and painted them.

The seventh is considered one of the middle levels because it does not have the darkness that demons have. Of course, there is no such Light as that of Angels at the eighteenth level.

He is engaged in painting landscapes, but not with a brush on canvas, but in space. Wants to return to the angelic world to gain more strength and opportunities to help others. As the level increases, the ability to manage your own energy increases .

Being Juna, she knew how to give a massage and at the same time transfer the energies of her curators. She had spiritual curators, Guardian Angel, Consulting Angels. Nicholas the Wonderworker and plasmoid civilizations (subtle material) also came and transferred energies through their hands.

#442

Julie Poe

Contactor with plasmoid civilizations. Describes reality in the form in which it is available to her, in contact with her mentors - plasmoids. #258, 34:32

Dinosaurs

Animals that inhabited the Earth and lived nearby at the same time as people before the war with Selbet 12,000 years ago. Dinosaurs could not have been removed from Earth and subsequently did not survive the climate change that occurred as a result of post-war cataclysms.

#59, 21:55, #182, 02:47:02

Dionysus (Bacchus, Liber)

A man, the head and ancestor of one of the earthly tribes engaged in winemaking. Wine was used as medicine, and winemakers were held in high esteem .

#288, 57:18

Dionysius the Areopagite

The contactee, one of the disciples of John the Theologian, wrote a spiritual essay “On the Heavenly Hierarchy.”

#169, 55:29

Disaru

Planet. Cities are similar to those on Earth, with the only difference being that transport is not based on internal combustion engines. It is based on movements along the magnetic lines of the planet. Individual aircraft, similar to hang gliders, only with controls, have received great development. They replace earthly small vehicles like bikes.

The inhabitants of Disaru are direct descendants of earthlings and are absolutely indistinguishable from them either genetically, biologically, or energetically. The only difference is that they have a longer lifespan due to the fact that they were immediately taken to Disara after the

war 12,000 years ago and did not live after the disaster on Earth. And another difference is that their planet is part of the Interstellar Union. They have contactees on Earth.

Representatives of Disaru and representatives of the Earth can have common offspring without the intervention of drugs that correct the genome. Representatives of Disaru are shorter because they are on a planet where gravity allows them to be slightly taller than earthlings, but not 4 meters, as earthlings were originally.

They do not have genes that encode the production of enzymes for processing animal proteins, excluding dairy, and in very small quantities those proteins that are found in bird eggs, for example.

They have only one Rh factor and one blood group, the one that is considered the first on Earth.

Their epithelial cells of the respiratory tract and alveoli of the lungs are practically identical in protein composition to human cells, and their DNA is practically the same. The people of Disaru can talk to their blood cells.

The government of Disaru itself adopted a law that every father and mother, future parents of a child , undergo a genetic analysis to identify the genetic profile in order to undergo the so-called genetic recovery. DNA structures are studied in detail and a more or less accurate forecast is given: to what extent it is possible for the child to form any mutations, including in the future, as well as the relationship of genes.

Disaru medicine carried out a set of measures that were aimed at maximum prevention, that is, prevention, of cancer. The DNA was not changed. Their defense remained at almost the same level.

Education at the Disaru school , the formation of their worldview, and the ideology of society are aimed at preventing the destructive work of consciousness or instincts .

#41, 29:05, #46, 14:52, #47, 02:00, #302, 35:15, #374, 03:44, 07:25, 09:00

Disnit

One of the planets in the constellation Aquila, part of the Interstellar Union, which is located at a distance of 110 light years from Earth. Representatives of civilization look like anthropomorphic (human-like) creatures. with completely white skin. The shape of the head is like a very elongated egg, two eyes resemble black dots. They are small in stature, 1.10-1.20 m, with very thin limbs compared to a relatively large head and body. The mouth is like a gap; if closed, it is practically invisible. They live in underwater cities under a dome. They have contactees on Earth, including physical ones.

#136, 02:15, #296, 01:00:47

DNA (Deoxyribonucleic acid)

A macromolecule that ensures storage, transmission from generation to generation and implementation of the genetic program for the development and functioning of living organisms. The DNA molecule stores biological information in the form of a genetic code consisting of a sequence of nucleotides.

#246, 35:51, #256, 01:10:05

DNA (how the molecule works)

Transfer of information not only from the physical level, but also from the mental level, from the astral level, through the etheric level to the physical body. That is, DNA and the number of its genes, and the number of genes included , and their fermentation with each other is not a static system, it is a dynamic system. Moreover, in the cells of the same organism, at the same time, there may be different genetic information, which depends on spiritual understandings, on spiritual inclinations, in other words, the work of some organ can be disrupted by some emotion, for example . And then the genetic information will

be disrupted, cell mitosis will be disrupted, and so on, which can even lead to cancer.

30% of the spirit that is embodied is enough to activate approximately 70% of a person's genetic information. This can only happen with the growth of awareness in each spirit. Only by raising its vibrations in each person will his Higher Self allow him to gradually activate dormant genes. Otherwise, in an unconscious person, their activation can lead to the degradation of this person and the people around him, since the forces and energies hidden in him can be used for evil, for harm. People in whom this DNA is activated will have energetic capabilities, for example, directing their life force to move objects, to heal people, to self-regenerate, to regenerate themselves. And also they will have such a power of faith that they (of course, if they develop it, because even with activated DNA, if it does not develop in this direction, this life force will not act), if they develop it, They will even be able to learn to push away from the Earth's gravity. And with their thoughts they will also be able to easily, for example, create phantoms of various astral and mental beings that will help them in their affairs and so on.

#344, 23:17, 47:01, #495, 30:06

Good

Everything that develops life, Love and Light.

#391, 23:26

Brownies

One of the representatives of thin-material (plasmoid) civilizations, nature spirits who are responsible for houses and are usually located at the fifth to eighth density levels. There can be several of them in one house, even a whole family, if the residents of the house are attractive to them with their energies. The brownie is basically the balancer of the house, that is, the balancer of the energies of the house, the space in the house. He is the same full owner of your space, your home, as

you are, although he did not buy this house. He is there, placed by God in this place through the Angels, through his immediate superiors. Exchange the energies of Love with him, and he will never scare you, but, on the contrary, will protect you from all low-vibration entities.

These are helpers. Previously, they were called house helpers, not just spirits. Plasmoids can be different in character, they can be re-educated in one direction or another by people themselves. They get used to a certain energy of the house, and they themselves take on the character of the owners of this house. Brownies are free individuals and may either want to go with them or want to stay and wait for new residents. There are no rules or laws for them; everything is left to their wishes.

#80, 10:06, #272, 34:10, #365, 30:47, #397, 44:12

Dolmens

Stone buildings made by ancient people, both with the help of alien civilizations and independently. The stone blocks and the shape of the dolmens contributed to the reflection of radiation and the accumulation of energy inside the building. Rituals were performed in them, and not only burials: some were built as graves, and some as rooms for meditation, for rituals and for healing. These were special rooms filled with energies, where the Spirits of nature came to heal people.

#80, 11:59, #367, 01:45:42

Dragons

Animals, flying dinosaurs that lived on Earth before the war 12,000 years ago. They ate melons, especially watermelons and melons.

#234, 09:40

Draupadi

A person through the events that happened to whom the cause of the war is explained.

#305, 34:38

Ancient Egyptian gods

Common children of Tumesoutians and earthlings. Osiris and Anubis, Horus or Horus, including Isis are the crossed descendants of humans and Tumesoutians . They were trained, they went to the people and ruled there. Later they were deified. Then (millennia later), when their souls had already disembodied , plasmoids began to arrive, which were called by the same names.

#403, 16:49, 21:33

Tree of Life

The Interstellar Union system , received by its specialists many millennia ago from the spiritual world. For each planet, the Tree of Life is compiled individually depending on its conditions and the constellation where it is located, the alphabet that is widespread on the planet, and so on. For the Earth, the Tree of Life is calculated according to the so-called astrological-numerological system. A tool for recognizing vital, generic, social tasks of embodiment and those qualities that are included in the characteristics of the physical, astral and mental bodies that need to be harmonized to fulfill life tasks.

#217, 42:13, #221 23:53, 35:15, 43:50, 44:33, 46:08, 49:27

Dual thinking

Thinking characteristic of earthlings, due to the bipolar, two-way, structure of the brain.

Since childhood, earthlings have become accustomed to dividing everything into black and white, right and wrong, good and evil, pain and pleasure. All sciences, all religions of earthlings are permeated with a dual worldview.

From this there is a greater tendency to division, to wars, to conflicts with those who not only pose a danger to you, but with those who disagree, who have a different opinion. Because the consciousness of a spirit embodied in an earthly body tends to demonize or denigrate an opponent who holds the opposite opinion. It is because of duality.

This is not typical for other races of the Interstellar Union. Many races have brains that allow them to easily develop multidimensional consciousness. They see the situation from different sides.

When the two hemispheres work synchronously, harmoniously support each other, and do not interfere with each other's signals, this indicates that the spirit that is embodied in this body will easily overcome the duality of thinking and reach multidimensional consciousness. Then the world will be seen not in black and white, but in the colors of the rainbow.

#454, 15:28

Spirit

An immortal entity born by God, which is part of God, Light, aware of itself at any level from 1st to 24th... The birth of the spirit occurs in the flow of Divine Light, thought images of God, permeating the entire Spiritual world, all levels. Eternal substance, consisting of divine energy, which cannot be destroyed and is unchangeable without union with matter of any kind, that is, without embodiment in this matter, has no material dimensions, that is, cannot be measured by material means. The spirit does not occupy space in the space of the material world.

The spirit consists of 3 parts: Mind, Heart (the essence of the soul), Energy.

Spirit is an autonomous consciousness in the consciousness of God. And it is as impossible to destroy it as it is to destroy God himself.

Spirit is the mechanism of the laws of nature.

The presence of a spirit distinguishes a person from an animal. There is intelligence in the Spirit. Unlike an animal, a person can temporarily or permanently turn off any of his instincts. An animal is not capable of this. An animal is not capable of giving its life for an abstract idea. Only a person is capable of this. A person understands, analyzes, has ideas, faith, humor, etc. - what a rational spirit has.

Each spirit is guided only by its spiritual heart. And the mind is only a tool for executing the programs that are embedded in it.

The difficulties and adversities of life encourage the spirit or a person, in general, any living creature to bypass these difficulties by making plans to level out their consequences. This develops thinking and connection with the spiritual principle.

The initial energy of the spirit, which is given for incarnation, is the amount of vital energy that he received for self-incarnation from three sources. This is from the Consulting Angels. They, naturally, take from Divine sources and endow it with primary etheric energy.

The second source is when the spirit passes through the egregor of a people, a country. It is endowed with a second ethereal shell, to put it simply .

And the third - when the spirit passes through an egregor of its kind, a generic egregor. As already mentioned in the information on calculating life tasks, both the folk egregor, or political, as it is now called, and the ancestral or family egregor, offer it tasks as an energy exchange for the energy given to the spirit.

#14, 01:34, #19, 44:59, #33, 19:25, #41, 06:30, #47, 41:07, #59, 35:02, #76, 39:29, #112, 14:45, #158, 12:18, #199, 35:36, #233 01:17, #234, 06:14, #311 , 30:10, #345, 30:12, 42:43, #350, 01:22:53, #401, 01:08:38, 01:45:42, #429, 07:07, 12:56, 17:11

Spirit of Baikal

Plasmoid of 38th density level. The body looks harmonious. This structure is made up of twelve small spheres connected in a figure reminiscent of two pyramids, that is, six spheres in each pyramid and they rotate in different directions. This plasmoid moved part of its consciousness, part of its conscious attention, into the world of third density. But the main part of consciousness remained in his world. He can also move, for example, to the seventh level, to the twenty-second, to the level of plasmoids of the forest, for example, the Arctic Ocean or the same Black Sea.

#371, 13:10, 36:17, 49:30

Spirit of the Earth

Plasmoid, which is responsible for the entire Earth. His subtle body is very large. It is several times larger than the Earth. Thirty-third density level. This plasmoid is responsible for the Earth, for all Spirits, he is their boss and for all areas.

The spirit of the entire Earth in a female form is “Mother Earth”. She feels the whole Earth, the whole planet not with her body, but with her part. She can hug and stroke her. She protects and gives tasks to the plasmoids of individual countries and cities, which are responsible for specific areas, for the creation of animal souls, and the purification of nature. She is level 33 density. She is already more than four thousand years old, her name is known as Demeter.

#365, 30:47, 34:27

Spirit (energies in spirit)

The energy of consciousness, the energy of will and the energy of emotions.

#345, 30:12

Spirits of certain planets

Spirits of stars, plasmoids, which live, for example, in the chromosphere of our Sun and are an intelligent form of life. They can also incarnate, just like humanoids. For them, nutrition and food are what light or radiation is for humans. They don't have a mouth. They absorb this energy with their whole body.

#53, 01:08:59

Elemental spirits

The four elements, the four ethereal forces, which in the material world are expressed as Water, Earth, Air and Fire, are not just a mixture of some substances, they are certain elemental forces.

#398, 32:16

Spiritual group

Spirits who incarnated in one place and at one time, agreed in the spiritual world on some common task. All this happens with the permission and under the control of their mentors, each spirit has its own. And the high-vibration one has a spirit-mentor who is even higher in the hierarchy. Spirits find each other through circumstances that are shaped by their mentors. The main thing is that when the spirits from this spiritual group meet, they recognize each other and recognize this task. This is only possible if all the spirits from this group lived more of their inner life, and not the life of this world. They should ask themselves, their intuition, and not focus on immediate tasks.

#111, 08:40

Spiritual reason for war

The presence of vibrations of arrogance and pride in the noosphere.

#450, 46:43

Spiritual death

Life without energies, life in an unconscious state, without feeling the energies of happiness, grace, joy, love, all the light energies that are the creative forces of the Universe, in all worlds, spaces, planes of existence.

#68, 52:00, #169, 50:19, #181, 16:14

Spiritual name

The definition of the spiritual essence of himself, as he calls himself. Moreover, the name of a spiritual essence can be the same as that of a person (the entire spirit). The 70% (non-incarnate part), the Spiritual Self, may have the same name as the incarnate part. It happens. Sometimes a name that was in a previous incarnation remains with the spirit. There is a name of the most significant incarnation, somewhere, on some planet. And there is a name that is specifically for the Spiritual world. The spirit is always called by it, no matter what it is called in incarnations.

#332, 26:47

Spiritual cleansing

Purification and illumination of the spiritual heart of a person. Complete relief of a person from emotional pain.

#191, 01:01:55

Spiritual development (goals)

Raising vibrations to coincide in vibration with the Creator. Together with Him and in Him, create worlds and support them. Increasing your level of awareness of what is happening and seeing everything in the true Light through Love. Development of the mind, spiritual heart and development of the will. Mental development, comprehension of new things, development of the skill of expressing one's feelings and directing them into more positive dynamics. Development of spiritual knowledge. In the Christian understanding, it includes: prayer, doing good deeds, reading sacred texts. This is often called the fight against one's passions, but it is their transformation, the replacement of the negative qualities of a person, his low-vibration components of the soul, replacing them with Light, i.e. positive characteristics. And all this without pride, without any despondency.

#14, 02:26, #43, 14:11, #193, 07:18, #341, 39:14, #407

Spiritual Heart (essence)

The very essence of the core of the spirit. It has nothing to do with the physical heart, it is a spiritual structure consisting of three components:

feelings (not to be confused with emotions);

the instinctive part, for connecting with any bodies, which appears immediately after the first incarnation in any dense material body;
desires, or conscious aspirations.

The Spiritual Heart is not a material instrument that can measure spiritual vibrations. Every intelligent spiritual being has it.

#140, 18:34, #211, 20:11, #233, 01:18:07, #283, 23:16, #307, 05:24, #345, 30:12, 42:43

Spirituality

Following the ideas of spiritual development in your life. Development of the spiritual principle in oneself. There are several ways of development.

There is a materialistic path, when we develop material aspects, for example, the shape of our body or, for example, running speed. People spend their lives on this, a certain part of their lives, they train, spend strength, energy, time on it, in the end. There are those who develop the physical side or, for example, improve it so that their body looks ideal from the point of view of themselves or someone else. They spend money and time on this.

There are, for example, the goals of acquiring some material wealth. A person spends time at work not only to satisfy his basic needs, but to have a lot of these material acquisitions; a certain amount of our nervous energy is spent on this.

There is also a person who wants to dominate someone. He has an instinct for power, he wants to show it and also spends time on this, to come to it and stay there, to organize something.

There is a person who spends time on knowledge. Cognition is an increase in knowledge, a strengthening of the mind. A person reads books, studies various sciences, writes some articles, he spends his time and energy on increasing his mind. And the mind is a part of the spirit. Cognition is one of the forms of spiritual development. But this spiritual development is not of the heart, but of the mind. It will give only knowledge about the material or the Spiritual world.

If you do not develop a spiritual heart in yourself, then this spiritual development will not lead to an increase in level. This will simply increase intellectual baggage. If a person simply reads books, spends a lot of time on it or writes them, but at the same time does not develop a spiritual heart, then he practically remains at the same level. Only his knowledge increases.

And there is also spiritual development - the development of the spiritual heart. What does such development mean? Development is

bringing oneself closer to a certain ideal. What could be the ideal for a spiritual heart? The one described by Jesus Christ: “blessed are the pure in heart, for they will see God.” Seeing God is the goal of those who develop spiritually in this direction.

What prevents you from seeing? Impurity of heart. What can pollute the heart? Any feelings, desires, instincts that do not manifest themselves in the Light of Love. This means that a person who develops Love in himself through rituals, prayers, mantras in some other way, for example, helping others, compassion, follows the path of spiritual development, namely changing vibrations. And all sciences and all religions are tools for our development.

#393, 30:32

Spiritual and material causes of autism

1 Autistic children incarnated on Earth often have their last incarnation in plasmoid civilizations. They can communicate with their familiar circle of plasmoids. The child can mentally see them on a subtle plane, play with them, and he does not have the need to communicate with his parents. 2 Having a difficult experience of incarnation in any world where he passed away with very great fear. The child does not remember this consciously, but he has a sense of danger. In this case, autism will be accompanied not just by the loss of things, but by avoidance of some contacts, even physical ones.

#333, 11:04

Spiritual Guides

Spirits in the world of disembodied spirits who are at the 22nd level of spiritual development. They are called spirit consultants. They lead you along the path of spiritual development, spiritual growth.

#76, #158, 24:50

Spiritual destructive

Misunderstanding of spiritual development. Departure into spirituality with condemnation of matter in any of its forms, which makes a person a religious fanatic.

#33, 08:05

Spiritual channel (chi flow)

Energy that flows through a person from head to toe and connects the spiritual energy center with the Higher Self.

#244, 19:10

Spiritual Sword

The image of a ray of Light of Divine Love, which separates lies from truth, darkness from Light, evil from good and makes the existence of lies, darkness and evil illusory, only apparent in the Light of truth, love and kindness. When Archangel Michael pierces the darkness around with his sword, the dark beings begin to understand that this darkness is only invented by them, it is illusory, in fact, they are light beings.

#486, 37:10

Spiritual patron

Angel in the world of disembodied spirits.

#91, 28:24

Spiritual Light

A flow of energy that comes from the spiritual world through the subtle world into the dense material world.

#110, 34:48

Spiritual level 24

Vibrations that are not different from the vibrations of God the Father, from His perfection in Love, the energy of Life, the energy of Truth. A spirit whose consciousness has completely merged with the consciousness of the Creator of the Universe, and at the same time remained itself. He perceives himself as a part of God, he perceives God as a whole, which he himself is. Constantly being in the consciousness of God, vibrations of unconditional love, omnipotence, omniscience, omnipresence. At this level there is no condemnation of oneself, the world, God, spirits around, demons, awareness of complete unity with everything.

Entrance to the Kingdom of Heaven, beyond all worlds. This is a special place where only the Superpersonality of God is located, and various spirits from the 22nd to 24th levels have access there. From the 22nd and 23rd levels they come temporarily in order to talk with God and, in merging with Him, understand how to perform their service at the spiritual levels where they are. Angels from the 24th level are in a continuous state of Light, the so-called “Devas”, their function is to teach others. They teach Consulting Angels and pass on their experience to them. Training at the angelic levels of the Spiritual World does not come from the previous level, but through the level. For example, Angels from level 24 train Angels from level 22.

#20, 01:05:50, #158, 27:22, #305, 21:05

Spiritual tasks

Raising your spiritual level. This can be done at any age, every day, simply by developing within yourself Love, the desire to help others and forgive, understand, develop mercy in yourself, naturally, depending on the level.

Spiritual tasks never imply the appearance or change of any material values.

#477, 09:43

Spiritual levels in the Spiritual world

According to the terminology of the Interstellar Union - 24 levels. Everything above the 24th is just Light, that is, there are an infinite number of levels, but they will still be 24th, these levels do not differ.

From the 1st to the 6th levels are occupied by demons. From the 7th to the 8th - those who often incarnated in the subtle worlds. Why do they occupy such a level? Because they believe that they do not have enough experience to incarnate in the dense worlds. From the 9th to the 16th are the so-called “middle spirits”, where each level has its own name. They are already engaged in the construction of the material world both in the dense worlds and in the subtle worlds. This is a more versatile perfume. From the 17th to the 24th are the so-called “Angels”. These are spirits that have found Light in themselves, have found Love in themselves. And they can incarnate into any world in order to help others in this. Light is understood by them not only as the Light of Love, but is understood, for example, as the Light of knowledge, as the Light of healing, and so on. These are some high-vibration “good deeds” that lead everyone to perfection, and the highest perfection is precisely in becoming like God, because it is believed that He is selfless and unconditional Love. And at the same time, this Love allows Him to possess all qualities in absolute measure.

#344, 39:20

Spiritual level 1

The spiritual level at which spirits are located, completely unable to see even a glimpse of Light, they consider themselves Darkness, they enjoy this Darkness, i.e. absence of Light. In the Spiritual world, they try to increase this Darkness in others, that is, it is the norm for them. They do this with the absolute conviction that this is good for them, and

evil deeds and crimes are a way of life for such spirits. They can relate differently to people and other spirits.

These spirits, also by natural desire laid down by God, still want to be incarnated in the material world, but it is impossible to go through incarnation without passing through the Spirit Guides of the 22nd level. They are still forced to turn to them so that they can select the conditions for their incarnation.

And here the dispute between consultants and demons begins from the first three levels, because usually demons want to incarnate in the same conditions, where they can realize their desires to the fullest, and the Consultant Spirits, out of their love, according to their Light, want to put them in such conditions so that they also came to this enlightenment, came out of the demonic state.

Usually a compromise is found when, after all, the spirit of the first level is embodied in such conditions that will contribute to spiritual growth. And this will be reflected in the tasks for incarnation, because each spirit that has reached the first level has its own circumstances that brought it to this level, the qualities that it has developed, and they are always individual. And in order for him to get out of this state, he needs to develop opposite qualities, because only positive qualities of the spirit can help transform negative ones, and simple suppression of negativity will only lead to its accumulation and further explosion, therefore consultants always select the most favorable conditions for spiritual development , based on the qualities that brought the spirit to this state.

#182, 45:17

Soul

A spirit connected by life force (ether or prana) to the human body. After death, the soul of a person or any humanoid comes out and, for about 40 days, it remains with this soul energy. But gradually her vital energy dissipates due to the death of her body. And then she becomes a spirit. The soul develops only when incarnated in the material world, increasing or decreasing its level. She remembers her life on Earth

and all her relatives until her next incarnation in the body. Then her memory is blocked. But in the form of the Higher Self, she remembers them forever, the memory is preserved forever about all incarnations and relatives in these incarnations.

A ray of radiant light, as if emanating from the central Sun, an energy wave. Takes any body shape, depending on its incarnation.

#14, 01:34, #19, 28:14, #30, 30:20, #41, 06:30, #59, 35:02, #76, 39:29, #112, 14:45, #157, 14:10, #234, 11:32, #289, 18:50, 01:10:30, #292, 04:49, #365, 05:05, 11:51

Dhruva Maharaj

The manager of plasmoids, embodied in the world of the North Star. Responsible for the creation of new stars. It still exists.

#326, 14:32, 20:01

Holes and cavities in Siberia

Cavities formed as a result of the explosion of gas that was previously in an inactive state. Due to climate change, deforestation, and destruction of the ozone layer, which increases the heating and irradiation of the Earth's surface by hard solar radiation, the layers of the Earth that were frozen in high latitudes are thawing .

#258, 25:32

Breath of Brahma, breath of the Universe

The universe's own breathing rhythm. In Hindu legends this is referred to as the breath of Brahma. The breath of Brahma, through which He inhales and exhales millions of worlds. Brahma is understood here as the first matter from which, through the work of many plasmoids, denser worlds, including the physical one, were formed.

The breathing rhythm of the Universe constitutes entire epochs, or, as the manvantaras say on Earth, in which the spirit is embodied. Our body is a small micro analogue of the Universe, that is, a microcosm, it is an analogue of the macrocosm. There are also millions of worlds, millions of planets, galaxies in it, only we call them cells and organs. And just as God fills the Universe with his energy, so our spirit fills this body with its consciousness. When we breathe, we always remember about the spiritual component, about the fact that we inhale not only oxygen, but also energy. Plus also the oxygen, nitrogen and other gases that we inhale, they also consist of energy.

We breathe in divine energies. Every breath we take is a divine gift for life in this body and for us to do good, create our future in the light of Love.

#441, 01:07:49

Breathing practice on Esler

We concentrate on the top of the head, visualize the strengthening of the spiritual channel, as if opening a water tap more.

You visualize how narrow it was, for example. At the moment of inhalation, visualize how the channel expands, and at the same time visualize a flow of white energy that enters your spiritual heart, which is located in the middle of earthlings' two lungs. The physical heart is in the middle of two lungs, and the spiritual heart is, as it were, in its center. We imagine that we have inhaled Light, only we inhale it from the top of our heads. He descends into the spiritual heart and takes the form of the Sun there. When we exhale, we exhale this Sun into space, usually through the third eye, what you call, through the energy center responsible for the functioning of the brain, which is located in the 6th energy center in people.

We exhale and mentally imagine how this Sun flew out through the third eye. We imagine that the entire space is occupied by such puzzles, where this Sun rises. We are putting together a puzzle. We charge space with high energies. We cleanse it of all the negativity that

is here.

Scientists of the Interstellar Union conducted a study long ago that recorded the following. If 10 people in a locality do this practice simultaneously in the morning at sunrise and in the evening at sunset, filling the space for at least 15 minutes at sunrise and sunset, they are able to change the spiritual vibrations of the space that is affected by 100 negative people.

Try this practice. Not necessarily right at sunrise, but preferably no later than two hours after sunrise. It will be earlier in the summer. The Sun at this moment has a special etheric force, which it directs to the Earth, and enhances these sensations. Feelings and impact of your Light on space.

At sunset it is possible both at sunset itself and no later than two hours after it. This will contribute, as they used to say, to the conduction of the Sun. This kind of space is also created when a special etheric force helps the effect of this exercise.

#441, 57:44

Devil

A synonym for "demon", any demon. “Slanderer”, a symbol of evil in the Universe. The image of the Serpent or dragon is a symbol of the Selbetians who wanted to destroy the human race.

#36, 07:20, #59, 32:37, 33:49, #165, 35:28

Devas

Spirits from the 24th level of the World of Unincarnate Spirits. Spirits who have fully realized their potential and united their energy with the

Divine. There is nothing in them anymore except Love and the potential to degrade as their vibrations decrease. This possibility is embedded in all intelligent spirits without exception, as a necessary condition for freedom and personal responsibility, in which we can spiritually grow and improve, learning the unconditional Love of our Heavenly Father, so that He can completely calmly give us our abilities for creation and change in the future. material worlds. This possibility is realized at the 24th level of the spiritual world, upon reaching which spirits see before them an endless stage of greater and greater merging with the Divine Light. Spirits who incarnate into the material world from this level consciously accept misunderstanding and rejection by others in order for everyone to discover the Light shining in their own soul. Devas have almost no other feelings other than Love, which generates faith, hope, patience, mercy and many other manifestations.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”,

#203, 34:04

Well

Enoch, the prophet (called Hanoch)

One of the incarnations on planet Earth of Archangel Metatron, which existed long before the climate change on it, then later called the Great Flood, a global cataclysm caused by the influence of weapons of extraterrestrial civilizations. He was incarnated on Earth at a time when, according to modern chronology, it was a little more than 40 thousand years ago.

All three books of Enoch reflect the true story, because he gave these books to contactees (they were written by five men), who wrote them down, and then the two collected them into one. There were some notes, different parts of these books. But the contactees wrote it down in images, as Enoch conveyed. Recorded at your level of understanding. Information was received in the form of images, as is always the case (almost always during astral contact with a person

who has an open spiritual channel).

#446, 12:08

J

Desire

Conscious need of the spirit. Since a person is both a biological being, that is, a body and an immortal spirit, he has physical and spiritual needs. Since a person lives in society, he has social needs. Man has a spiritual heart than he desires. If the desired thing is significant for him (this desire is significant for him), he recognizes it as a high degree of need. This means that his criticality towards this thing decreases. He just wants it. And if his criticality towards this thing increases, it means he wants the opposite.

#140, 18:34, #345, 42:43, #347, 32:25

Animal sacrifice

Religious cults based on the deification of plasmoid worlds. There are plasmoid worlds that absorb the energy released when the animal dies. The cult of sacrifice in egregor is promoted on Earth by priests, shamans, and brahmans.

#115, 38:22

Animal soul (Eromes)

A soul that can only incarnate in the bodies of animals, insects, birds, reptiles, etc., that is, in irrational beings in whose bodies the nervous system is not intended for the manifestation of consciousness.

Plasmoids are responsible for the embodiment of animal souls. It is

they who collect their souls, their bodies from the elements and monitor the number of incarnations of a particular soul. The body of a cat, for example, is the body of a mammal into which a single animal soul is incarnated. There are animals that have a group animal soul, and there is a single animal soul.

A single animal soul of the type found in a cat can be incarnated in any animal, not only in the cat family, but in all carnivores. She is a fairly universal type of soul. The number of incarnations for types of this soul can start from 50 and above. Usually they have from 50 to 200 there.

Plasmoids collect souls and send them to different incarnations to maintain the planet's biosphere. If these are domestic cats, then in order to communicate with people through this body and this soul, in order to fill them with energy. And at the same time, of course, hunting mice and so on is important, this is one of the goals. Another goal is to maintain a person. An animal does not have a Higher Self, some part remains disembodied , but it cannot communicate with it, like a person, it has a different type of mind.

If a pet gets sick, but not so sick as to die or leave incarnation, but in such a way that it requires care, then it has taken over the energy of its owners.

The animal accepts the energy of its owners, it is also intended for this purpose, in order to manifest some problems on itself. Shows like a mirror. The animal soul has a very great ability to absorb energy.

If the owner's tumors disappear, but the animal's tumors appear, this does not mean that he directly passed them on, like in a relay race. Physically, no. Energetic traces of these diseases remained in his energy, in his aura, and they were reflected in the animal that lives with him and loves him. The animal soul can also love. She has a kind of spiritual heart, it can also love, strive and sacrifice itself for the sake of Love. All this is present in any animal, because it is created by the same intelligent spirits, like you and me, but from their soul, from their energies. They put Love into it too. And in this, the Earth is also a unique planet. Not everywhere there are pets of this type that are constantly next to a person in his home and communicate with him.

For the behavior of an animal, its creators, firstly, bear karmic responsibility, the karmic consequences, and secondly, those who are next to them from reasonable, freely choosing individuals, and who influence its behavior. For example, let's take dogs. If its programs, its instincts are adjusted in such a way that it becomes capable of being aggressive and attacking a person, then the dog itself does not bear any responsibility for this. Her soul is tuned to become aggressive. If she is specially trained in this way, then the person is responsible for this . Because he changes her program. Soul Animals, they are simply unrequited. And in this sense they are not responsible.

When they are reincarnated, they feel themselves immortal. They do not understand that they are mortals, because they are generally deprived of such a category of understanding as death. Even when an animal is born and lives , it does not understand that its existence will end. It feels itself eternal. And he doesn't understand that his body's existence will end. Many animals, having seen the death of another living creature, cannot distinguish it from a living, but sleeping one. They may not leave the deceased owner for a long time until they are convinced that he does not care about them, does not feed them, and so on. They believe that he is in a state of sleep.

#140, 18:34, #393, 40:00, #413, 45:27, #495, 1:06:36

Animal nature in man (instincts)

Instincts of the primate species: self-preservation instinct, sexual instinct, leadership instinct, hedonistic instinct, which is responsible for the desire for pleasure, and social or herd instinct. All of them are necessary for survival in this world and were embedded in man and every animal during his creation. These are positive energies and the spirit must control the instincts, control the body, and not vice versa. Instincts themselves do not need to be suppressed. They need to be manifested under the control and direction of the spiritual mind. This is not suppression, but a manifestation of the energy of animal instincts, which are useful energies and useful programs for a person, but only if they do not contribute to his spiritual degradation and do not lead him away from the path of fulfilling his life tasks.

#16, 01:46, #341, 39:14,

Life challenge

Raising vibrations, working on those personality qualities with which the spirit came into this incarnation. It depends on the level from which the spirit came.

#341, 39:14

Life thread

Energy cord or energy thread, beam (it looks more like a cord, because the beam is straight, but the thread is not). This thread is initially formed by the energies of the etheric plane of the spirit that is about to incarnate. The spirit that goes for incarnation separates from itself a certain percentage of energy for incarnation into a body on a particular planet. Consulting Angels and Guide Angels help him and dress him in a special pranic shell. From this pranic sheath, when the spirit introduces its life force into the first cell of its body, the primary life thread is already formed. This is a channel of communication between his first body cell and himself, who is still outside the body.

For earthlings, in the seventh week of pregnancy, the spirit itself enters its body, that is, the fetus that continues to form. In 90% of cases, while he is in the physical body, his life thread is coiled in the form of a spiral and is located in this image, in this form in the third energy center. The life thread, relatively speaking, begins from the third energy center.

And when the soul (the embodied part of the spirit) leaves this physical body to temporarily enter the astral space, then the life thread unfolds behind it. This vital thread is needed in order to freely return to the physical body, either if the spirit wants to return, or if there is danger to the body. If something threatens the body, it will wake up, that is, it will give a signal along the life thread, and the spirit will return to ensure safety.

The life thread, since it consists of subtle energy, can visit the Astral. The astral body can visit any worlds, because the life thread cannot be

interrupted; it can stretch to an infinite distance. In the Spiritual world there are no distances in the earthly sense, there is a difference in vibration. So this life thread can stretch and contract. Along this vital thread, when the soul has already gone on an astral journey consciously or unconsciously (sleep, trance, hypnosis, fainting, and so on), in any case, when the soul is not in the body, through this vital thread the soul and body continue to exchange energies.

#465, 32:40

Life force

Continuous flow of energy from the Spiritual world and from the body through breathing and food processing. Most recharging occurs in sleep, when the memory load from the brain is unloaded into the astral body, into the spiritual component, and the brain neurons rest.

Life force is a special form of energy, one of the varieties of ether, necessary to connect the soul with the physical body. It is also known as ether and prana. The spirit, incarnating into the body, brings with it this vital force. He brings with him information that is recorded in his etheric matrix. And transfers it to his physical body. Moreover, this process is two-way: the spirit affects the body and the state of the body affects the spirit. They are combined into a single whole.

The energy that allows us to exist. It is the vital force of the body that allows us to exist and act in the material body and in the world as a whole. Life force is replenished both from the Spiritual world and from the material world. From the Spiritual world it is replenished with our bright feelings, desires, thoughts, emotions. When we feel the bright, spiritual states of ourselves, a flow of spiritual energy enters us, which passes through our brain, passes through our body and, by activating metabolic processes already in the physical body, replenishes our physical energy.

How does replenishment work through the body? The body has special tools for transforming material substances that enter it into energy. This is the digestive tract, circulatory system, respiratory system. Energy is spent on the physical processes of the body and it is

also directed to emotions, that is, it is spent on those processes that the spirit produces in the body. Not the spirit itself, but an embodied part of it. The spirit itself has spiritual energy. The embodied part, the soul, which is in the body, also spends the vital energy of the body, because it is connected to it by the etheric body.

What is the biggest waste of life force energy? Naturally, for movement, for heating the body, as well as for biochemical processes in it. There are many millions of processes going on in every cell. Cell division, regeneration, immunity, and so on - this requires vital force. It also reaches perception through the senses, through the eyes, through the ears. To process information that has entered the brain through receptors. In order for the electrical signals of neurons to be developed and to be able to control the body, they were able to send this information to the spirit. This also wastes energy. When we strain, direct our attention to our vision and read something, watch something, that is, we receive information through vision, then the body also loses energy. That is, energy leaves not only when we work physically. When we strain our eyes and look, this also takes energy, a lot of energy. This is why a person gets tired when he has little energy. Replenishment required. You can get tired not only from physical work, you can also get tired from mental work, even more so.

Why is life force wasted more? Negative emotions are unpleasant. To process them into Light, you need to work on your heart, on your attitude towards this phenomenon or person who caused the emotion. But it’s easier for a person not to do that. It's easier for a person to forget about it. But if he forgot about it, his emotion is sent to the etheric body in the form of a small clot of energy. If he experiences it often, the clot begins to grow and a block is formed, which is located in some chakra or between them and begins to interfere with the circulation of vital energy in the etheric body.

#14, 01:34, #76, 39:29, #109, 11:29, #110, 34:12, #344, 25:22, #401, 1:25:23

Life

That energy that cannot be destroyed.

#74, 27:38

Priest

Initiated into secret knowledge.

One who abides in continuous expanded consciousness. Previously, prophets were called this (these are contactees), later – priests.

#78, 18:11, #450, 46:43

WITH

Misconceptions of people about the superiority of one religion over others

A person’s misconceptions are that his leadership instinct can take over his mind and want to control the lives of others, that is, command who should belong to what religion. If he is an Orthodox Christian with a strong leadership instinct and a repressed mind, he may want all his relatives to be Orthodox too. If he is one of Jehovah's Witnesses and has recently converted to this faith, then he is euphoric because he has learned everything, and he may want to command other souls, not realizing that each spirit must go through its own lessons. He can channel his energy into cruelty, showing his leadership instinct. This happens not at the level of egregors, but at the level of individual people. If it is not instincts that act, but the spiritual mind, then a Hare Krishna, a Buddhist, an Orthodox Christian and a Jehovah's Witness will get along well together. They will be friends, unite in a single Light, and then there will be no conflicts.

#21, 19:20

Disease

A certain experience that the spirit itself wished to go through, it is

also possible to be exposed to pathogenic microflora of such intensity that the immune system is not able to protect the body.

#124, 17:13

Diseases (causes)

Spiritual reason and physical reason. A purely spiritual cause causes a chain of biochemical and physical changes in the body, which will already connect to this spiritual cause and cause diseases. And if it is a purely physical reason, for example, injury, infection or poisoning, this is also a disease. This purely physical reason was also led by a complex of human actions on the physical level, which depended on his spiritual components - on his feelings, thoughts, emotions that led this body to these consequences.

#344, 54:33

Diseases after vaccination (causes)

The body's vulnerability is caused by the fact that antibodies against coronavirus are produced within approximately three weeks. After the last injection of the vaccine, the body is still producing antibodies for three weeks; it does not have complete protection. It’s not what he produces, but he sort of remembers how to produce. That is, training is still underway. If a person becomes infected during this period, the protection will not work. The immune response takes time. If a person who has been ill gets sick again, it means the first time, he did not develop the kind of immunity that was supposed to protect him from the second time. Each person’s body is individual and stores information about the virus in lymphocytes for different periods of time. And this does not depend on whether the virus entered the body naturally, or whether it overcame it and developed antibodies, or developed antibodies to proteins from the vaccine. Anyway, the memory period of lymphocytes is different for all people. It depends on the strength of the immune system, age, lifestyle, nutrition, etc.

#301, 23:15

Addiction

The state of a person's spirit when he is unable to receive satisfaction from life and be happy without any factor (chemical, physical or psychological). At the same time, a person’s inner gaze is usually directed at one thing in the material world and ignores all other opportunities for gaining experience.

#50, 01:02

Conspiracy

Directing the person’s own energy towards recovery using suggestion.

#59, 53:50

Tasks of man on Earth

When a person is born on Earth, he has three main tasks. The first task is his personal, karmic one, which he came here to solve as a task of the spirit.

The second is his generic task, the task of the generic egregor, as compensation for the energy that the race spent on its embodiment and its support until the time of independent life.

The third is a social task, that is, precisely those egregors in which he lives . This social task will be different for each person.

#250, 01:02:23

Law of nature

A reflection of the mind of the legislator.

#390, 01:13

Law of conservation of matter

A law stating that no material particle arises or disappears, but passes from one state of aggregation to another. From the point of view of the spiritual world, this is the law of the origin and continuous maintenance of matter.

#141, 46:45

Law of energy conservation

The law according to which not a single quantum of energy appears or disappears, but passes from one state to another. From the point of view of the spiritual world, this is the law of the emergence and continuous maintenance of energy.

#40, 24:01, #141, 46:45

The law of molecular formation in organic chemistry

The law according to which those substances that enter the body of a living being are arranged in certain patterns of cells, organs, etc., subject, among other things, to the influence of the etheric body through the DNA program of this body.

#141, 48:11

Legislation and judicial practice of the Interstellar Union

The Criminal Code and Rules for the Security Service, which determine the tactics of restrictive actions against criminals. The articles of criminal law of the Interstellar Union determine the dependence of the period of restriction of rights not only on the type of crime and the number of victims, but also on the reasons that led to it. They do not have a judge who applies the same article to everyone, there is no prosecutor and lawyer. Instead of a judge, the fate of the criminal is determined by a meeting in which humanoids from different planets are present, and there will certainly be a representative from the family or inner circle of the criminal, relatives of the victim and criminal psychologists who conducted the investigation and who contact the spiritual world and determine why the criminal did this. They contact the mentors of this humanoid, find out why he lowered his vibrations so much, what happened. All this information is announced at the meeting, and all representatives jointly vote to make a decision, which is always individual, because they see the reason and determine what needs to be done to correct it. The practice of law in the Interstellar Union is not formalized, as on Earth, and is aimed not at punishment, not at society's revenge for a crime committed, but at helping the offender to raise his vibrations so that he can work on himself during the period of restrictions on his rights.

#218, 11:53, 16:19

Laws of the Universe (changeable and unchangeable)

The laws of the physical Universe, the laws of the subtle worlds, the laws of social formation.

There are unchanging laws, for example, the law of gravity for the physical Universe. And there are laws that can be changed, for example, the laws of constructing civilizational egregors and their manifestation in the material world.

For the physical Universe, unchangeable laws are everything that is connected with the laws of physics and chemistry, that is, the laws of the structure of matter of the world where you are. And everything that concerns the laws of society, they are changeable.

#465, 16:30

Bury your talent in the ground

Spend the time of your incarnation and your Divine potential only on material activities. The earth here is a symbol of matter. Matter is not bad or evil. It is a tool in achieving spiritual goals. If the tool itself is taken as the goal, no awareness, no wisdom and no development comes out of it.

#490, 03:42

Zaliatar

A representative of an alien civilization from the Pleiades constellation, who is a spiritual healer on his planet.

One of Vanga's curators. Curated by Irina Podzorova . Anthropomorphic, body like that of earthlings. It differs only in skin color; it is silver with a bluish tint and glows a little. Height is about 1.70 m, white long hair. The facial structure is the same as that of humans. The eyes are gray. Incarnated from the 23rd spiritual level. He also had mental contact with Rama Krishna and Vivekananda. Spiritual healer, futurologist, specialist in time lines (or tapes).

#137, 9:55, 16:50, 26:23, 42:30, #465, 08:28

Scent

A characteristic of a dense material body, which depends on the presence of certain molecules.

#349, 01:36:58

the Forbidden fruit

Fruit of the horool tree from the planet Tumesout . These trees were grown for members of the planet Tumesout , but were poisonous to others. Adam and Eve were poisoned by the fruits of this tree.

#18, 38:10

Zarathustra

A very high incarnate Spirit who was in contact with many worlds at once. He was a universal contactee .

He was in contact with plasmoid civilizations, including the Spirits of fire, the Sun, planets, the star Vega and with the Spiritual world, naturally, and with his Higher Self.

He wrote a book called “Avesta”. In it he outlined the teachings he received from his curators, and from himself, his spiritual heart, and from his Higher Self.

#397, 07:17

Conception

The process that occurs when male and female reproductive cells unite, leading to the combination of the vital energy of the spirit and the newly formed cell, which will be the first cell of the child’s body. The method of conception does not matter for the vibrations of the spirit and cannot change its qualities. The spirit is necessarily present at the conception of its body. When male and female cells unite and the first division of this new cell begins, the spirit already has the vital force that it received from the sources of nature, from God, precisely for connecting with this new body, and the spirit can already be called the soul. He has already united with this vital force, which we call in Russian ether, the etheric body. Standing nearby, he introduces part of his life force into these cells, which have already divided. He is already connecting with them, but he himself is not entering there yet.

When the sex cells of the father and mother unite, the first exchange of chromosomes begins. At this time, the soul injects life force into this cell. And all this happens in the mother's body. But since the father's reproductive cell is also charged with her energy, and the mother's reproductive cell is charged with her energy, the three vital energies of father, mother and child are mixed. One might say, a prototype of the future etheric body is formed. This prototype of the etheric body already contains microprints of all future organs. They are written in this etheric matrix. This body does not exist yet , Human conception

A great sacred sacrament. Certain structures of the spirit depend on the time of conception.

From the Spiritual world it's the other way around. The time of conception and the gender of the child are determined in the Spiritual world. And at the moment of conception, the gender is already known to the spirit that comes to the parents at the moment of conception of its future body, and you were all present next to your parents and saw them, not physically, but energetically.

#20, 15:40, #103, 09:22, 13:33, #354, 21:21, #365, 05:05, 11:5

Contactless conception

The technique of introducing genetic information, which was beamed, was quite common. In the same way, for example, Krishna, who was a Shimorian, and some descendants of the Tumesoutians were born .

Now this technique has remained in the science of the Interstellar Union, but according to the modern law of the Interstellar Union, such crossings of humans and aliens for life on Earth, as was previously the case, are prohibited due to the fact that this will provide evidence of contacts and everything that may happen after.

Previously, representatives of the Interstellar Union were mistaken for Gods, now the consciousness is more materialistic and this will be perceived differently, therefore the consequences will be different.

Spirits from the level of the Higher Angels, no matter what planet they are incarnated on, have a completely different attitude towards, you call it fidelity, but this is a connection with one energy, let's say so, so they have a precise attunement through the body to one energy. And a connection with another energy, be it from another planet or with one's own, can lead to dissonance of their energy centers and then to an inharmonious connection with the previous physical energy.

Why do they, and especially the aliens, feel this? Because their sensitivity to energy influences develops from childhood.

If an alien decided to enter into physical contact with a representative of the Earth, then most often these were precisely those aliens who did not have a relationship on their planets, and if their contactees did not have a relationship with a loved one .

#261, 25:39

Star

Energy station.

#304, 17:42

Star Soul

The soul of a person who remembers himself in a dream, or in reality, images come to him that he was embodied in a cosmic humanoid civilization that could fly on starships , on spaceships. Some call those who remember their lives on other planets a star soul. Remembers or feels that he was there. In fact, we are all star souls, because our Earth is also located near the star Sun. Everyone who is incarnated on Earth is also star souls, all without exception. All cosmic souls.

#313, 21:52

Star Temple

Designating a gathering of people who decided to end the war and bring about peace. Their curators from the stars were also there.

#200, 38:05

Sound

The gas vibrations that we feel, if they are intense enough and cause movement, are sound waves, that is, wave vibrations of air atoms. In this case, a change occurs in the atoms of substances around, including metals. This is sound pressure. And with sufficient intensity of vibration of certain atoms, it is theoretically possible to release a small part of the magnetic energy. The vibration frequency of light waves is much higher than that of sound waves.

#17, 57:04, #304, 32:30

Sound wave

Sound is like a wave in the air - of different frequencies, different strengths, different tonality, tone. It passes through the cells. When it passes through them, the cell itself (it has such semi-liquid contents - cytoplasm) vibrates. Micro-oscillations of the cytoplasm can already change reactions. The cell at the mental level will not understand what is happening, what kind of sound it is, but this may already have an effect. Especially infrasounds, they can destroy a cell at a certain number of decibels and at a certain wave frequency. The ringing of bells and Tibetan bowls create such vibrations in space, such sounds (and not only in the audible range, but in general) that are attractive to high-vibration plasmoid civilizations.

#344, 01:08:26, 01:20:46, 01:23:00

Zeus

Supreme god, one of the most important gods. The prototype of Zeus or Jupiter was a representative of the planet Burkhad, who later founded a colony on the planet Futissa in the Pleiades. His name was Cephastis, periodically flying to Earth 5-6 thousand years ago, he lived at one of the bases on Earth under a mountain just in the area of modern Olympus, came into contact with earthlings, taught people peace, how to properly govern states. He had a single wife, Agoranias, several children, including a daughter, who became the prototype of Athena.

#288, 29:53, 32:43

Zeland Vadim

Contactor under psychotropic drugs (under mescaline).

#296, 58:22

Earth

A planet created through God and plasmoid civilizations. The same integral part of the Cosmos as the planet Burkhad. This is the beloved home of the Heavenly Father, the beloved temple of the spirits who have incarnated here. Planet Earth is the sister of Burhad and all other planets.

A transfer station for the soul to have the opportunity to go home to the Spiritual World.

A multi-level complex system of different energy layers that have different material densities, if by density we mean the frequency-vibrational range of vibrations of matter that emerged from the Divine Light.

Symbol of the dense material world.

The Earth is one of the manifestations of the Spiritual worlds and part of the Kingdom of Heaven. If you treat the Earth this way, it will respond with the fruits of joy, pleasure and ease of the spiritual path. That light energy that is invested in it reaches its core and returns with bright flowers and delicious fruits.

Low, dirty, heavy energy of rejection, negativity, envy, condemnation, anger (directed at oneself or others), settles down in a dark stream, goes to the core of the Earth and begins to be processed in the core of the Earth. Because of this process, the Earth responds with earthquakes, volcanic eruptions, hurricanes, and forest fires. This is how she processes negativity.

There is a plasmoid that is responsible for the entire Earth. His subtle-material body is very large, it is several times larger than the Earth. He has a thirty-third density level. This plasmoid is responsible for the Earth, for all spirits, he is their boss and all areas. Each area has its own plasmoid and its own spirit of nature. They are the same full-fledged earthlings, the same masters of space, just at different levels of density.

The spirit of the entire Earth in a female form is “Mother Earth”. She feels the whole Earth, the whole planet not with her body, but with her part. She can hug and stroke her. She protects and gives tasks to the plasmoids of individual countries and cities, which are responsible for specific areas, for the creation of animal souls, and the purification of nature. She is level 33 density. She is already more than four thousand years old, her name is known as Demeter.

Planet Earth is considered a very generous planet. In many languages of the Galaxy it is called “The Heart of the Generosity of the Universe.” Like a focus.

And getting to such a planet is an opportunity to learn how to manage both natural resources and biosphere resources, and correctly interact with the spirits of nature.

According to the laws of the Interstellar Union, not only the earthly civilization, but also those civilizations that are located at other density

levels are the rightful owners and inhabitants of the Earth. These are plasmoid civilizations: spirits of nature, spirits of the elements, spirits of individual places of nature, mermaids, brownies, goblins and other spirits of air and water. They are the same full-fledged inhabitants of planet Earth and its owners, who have the right to live in its space. They are also responsible for its condition to the Galactic Spiritual Council, which embodies souls here.

#20, 00:22, #158, 56:48, #194, 32:08, #256, 02:29, #270, 11:32, 25:47, #365, 23:57, 28:55, 30:47, 34:27, #417, 26:15, #429, 12:56, #508, 25:21

Earth time

The flow of changes in the energy of all earthly elements and the forms of their movement relative to each other. This is a change in energy. And not just one local change in energy, but a stream of these changes that goes from the past to the future.

#486, 30:19

Evil

Everything that hinders good.

#391, 23:26

Anger

An emotion that arises when something doesn't go our way.

#444, 01:33:33

Yellow triangle sign

Symbol of the energy of the spiritual world. When a person looks at him, he tunes into his spiritual channel and calls on the Angels. Such signs are known in the Cosmos - where they deal with contacts with the spiritual world. The yellow triangle sign , pointing upward, represents a tongue of flame. Inside the triangle, the circle is like a window into the spiritual world and at the same time an eye. This is a symbol of contact with the Light.

#223, 00:21

Zoroastrianism

A religion that was created by the prophet Zarathustra.

#397, 07:17

I

Jacob

The ancestor of the Jewish family. Son of Isaac.

#37, 12:35

Organians

A hybrid race containing Esler genes, some reptilian and Tashigan genes , that is, it contains genes from 3 civilizations and a local animal. Habitat planet Natidzon is located in the constellation Ursa Major. Its representatives made contact on Earth, but the last official contact, according to Burkhad , was in 1995. Now they have broken off contacts for now.

#40, 55:34

Hebrew

Simplified Tumesout language.

#68, 20:08

Ideal image

The goal and ideal that a person strives for, the spirit of a person, is to be happy. This desire is inherent in absolutely everyone. It is calculated by comparison, comparison of perceived images and information with the goals and aspirations of a person and the human spirit.

#120, 31:40

Ideal sexual contact

The connection in the state of soul, which is called “eternal love”, must be accompanied by the desire to love and be loved, that is, connection with a loved one. Only with ideal sexual contact, energy is released in the form of hormones that stimulate the immune system, eliminate pain, and so on. Various energies are also released at the mental, causal, astral and other levels. Such sexual contact can only bring benefits and will not cause any physical harm.

#184, 09:23

Yeshua

Name of Jesus Christ on Burkhad .

#146, 47:36

Chosenness

The position of an earthly person who is in incarnation: he looks outside from his earthly world into the spiritual world while he is in the body, that is, he is “chosen.”

#206, 01:54:50

Volcanic eruptions

A consequence of the approach of a new phase of the quantum transition. The first to begin to react are the quanta contained in the earth's crust. They raise their vibrations, and if these vibrations do not correspond to the noosphere, an outburst occurs. This is like a cleansing initiated by earthly plasmoids, the so-called gnomes, they control volcanic activity there.

#349, 01:40:41

Exorcism of Demons

An action performed by priests when, when saying a prayer, they contact the Angels, with the religious egregor. Angels direct the Light of their love to the low vibrational entity, clearing the channels and telling the demon to leave this person. The peculiarity is that the influence comes from the spiritual world. A demon may refuse to leave if the person himself decides to let him in. If, after expelling the demon, a person does not change his vibrations and does not experience true repentance, the demon may return.

#165, 01:01:59

Ishmael

Abraham's first son, born to a maidservant. The ancestor of the Arabs.

#243, 27:25

Climate change (causes)

Intensive extraction of liquid hydrocarbons and gases from the cavities of the Earth's crust, which changes its internal structure. This leads not only to climate change, but also to disasters: volcanic eruptions, floods, hurricanes, and so on. The Earth begins to oscillate on its axis, from this it receives uneven heat from the Sun, the structure of the earth's crust is disrupted, and the magma, which lies closer to the mantle, rises higher and also heats up the planet. Volcanoes become active and so on. And plus the greenhouse effect that accumulates on Earth, because a lot of fuel is burned, from which carbon dioxide is formed, but instead of planting a lot of trees so that they process carbon dioxide into oxygen, they are cut down.

#47, 45:00

The original source of the magnetic field

An atom is a small particle of matter.

#17, 33:39

Initial Spirit Level

The level at which he first became aware of himself.

#233, 49:46

Variability

Fundamental property of matter. In this way it differs from spiritual substance. Spiritual essence without connection with matter is unchanging or eternal.

#140, 11:37

Inventors

Spirits from the 15th level of the World of Unincarnate Spirits. Spirits for whom the highest happiness lies in creativity, in the creation of something that has not yet existed. It doesn't matter what it is: new recipes for pies, perpetual motion machines or programs of political parties. The main thing for them is to make other spirits happy with the truth that has been revealed to them and in the usefulness of which for everyone and at all times they sacredly believe. Inventors passionately share their Light with everyone they meet and are very upset when they are not understood. True, with experience, wisdom comes to them that it is impossible to prove to a person truths that he is not ready to comprehend, and when readiness comes, the need for proof for him disappears.

Article by Vladimir Goldstein "The structure of the Spiritual world through the eyes of aliens"

Emerald tablets

A manuscript containing ancient knowledge. That is why the tablets are emerald, because emerald is a precious stone, a symbol of precious knowledge.

These were not some books carved from the emeralds themselves, but a collection of scrolls of books that contained knowledge that was similar in value to emeralds. They were hidden under the ancient sphinx when the Egyptian priests found rooms, passages there and created their own rooms there.

#42, 45:14, #220, 06:46, #403, 01:12:45

Jesus Christ

Spirit, the Essence that God gave birth to himself first. The very first son of God, the firstborn son. Helped God the Creator in the creation of the material Universe. The greatest opportunities and knowledge were invested in it. When incarnated, I remembered all my lives, goals and tasks. The purpose of the incarnation on Earth was to bring teachings that would facilitate the rapid spiritual progress of all beings embodied here. Upon resurrection after death, he physically restored his body, reconnected with it with his energy received from God, and erased information about aging and death in every cell of his body. His body remains immortal forever and is not subject to aging and disease. This is the only immortal material Being. Now he looks like a man of average height, about 1.8 meters, he has a dark short beard, long dark hair to his shoulders, an open wide forehead, skin similar to Caucasian skin, a triangular protruding chin, a long straight nose, large almond-shaped eyes. Depending on his mood, his energy changes the color of his eyes from brown to blue, which is typical for all Burkhadians . When communicating, he uses mainly telepathic abilities and transmits thought forms. Knows the languages of almost all MS civilizations. For Christ, both the heart of the Patriarch and the heart of a child, and of any believer and non-believer are equally dear; for him there are no such divisions that are dictated by the social structure of the egregor or, in general, of this world. For him, everyone is his children, and at the same time they are his brothers and sisters . Such a theological and inner spiritual paradox, one might say, exists for Christ. And children, and brothers, and sisters at the same time, as well as parts of his body.

He helped his Apostles, his disciples, to catch fish both for food and for sale, turning to the mind of a school of fish, to the instinctive in the soul. He either approached the shore, first looking at the water for a long time, or got into the boat. There he stood up to his full height and also looked at the water for a long time, and then told the Apostles where they should fish.

On Burkhad and in the Interstellar Union, he is called a verbal construction that can be translated into Russian as the First-born Son of the Absolute Light. Not even a son, but the Primordial impulse of the thought of the Absolute Light. And not just a thought, as an excitement of the mind, but a thought, as a calm state of the Divine Mind. He can identify about ten million phantoms with a certain autonomy of

existence. The astral body has a charge of about 30% from all subtle bodies and the physical body. The percentage of phantoms' vital force charge may vary depending on the purpose of use and purpose.

Born 749 years after the founding of Rome. It was autumn, taking into account leap years, the shift of the earth's axis, it would be September 22, 749 after the founding of Rome.

There were sixty-three incarnations in this cycle, including this body. He will not come out of it until the end of the cycle of the Universe.

It was embodied in plasmoid worlds that created groups of galaxies. Was a plasmoid who led the plasmoids that collected matter to create galaxies.

He was incarnated in dense material worlds, including on the planets Shimor, Esler, Sho-Hariki, there he was a man from the lower strata of society who brought the doctrine of God to these strata. This allowed society to develop in the religion of Light and stop military and criminal actions on this planet. In the future, this helped raise the vibrations of this planet and give birth to a high vibrational spirit.

There were also incarnations in other galaxies, including the reptilian one. Incarnated on Burkhad , on Tumesout .

#7, 00:57, 03:53, #8, 06:47, #135, 47:51, #149, 42:02, #183, 09:24, 24:4, 26:56, 34:10, #199, 29:58, 01:05:32, #202, 26:55; 35:00; 48:10, #239, 51:44, #241, 06:32, 08:26, 12,17, 43:24, #270, 37:05, 53:08, #274 24:33, #400, 22:29, 49:48, #424, 39:43, #427, 28:35, 31:23

Icon

An image depicting the reality of the spiritual world through physical means.

#36, 22:28, #366, 59:05

Icon of the Savior Not Made by Hands

The icon that is closest to the physical appearance of Christ when he lived on Earth at that resurrection . It’s not that the appearance is conveyed, but the look, the eyes, his energy.

#239, 45:30

Illusions of the mind

Ideas about the world, mental attitudes about how it should be, not as it is in reality, but as it should be in your opinion. The illusion of the mind can also affect the person himself.

The word illusion is translated as delusion.

#182, 02:37:25

Immune reaction

The body's protective reaction to damaging factors.

#432, 05:17

Immunity

The main defense system of the body, directly related to its spiritual state.

The action of certain structures of the body to adapt to the environment and, one might say, to digest particles unnecessary for the body.

#124, 08:44, #409, 25:22

Immunity (reasons for decline)

Dejection, groundless fear, guilt, sadness. Chronic anxiety states, panic attacks, some specific anxiety and depressive disorders. Anger, aggression, especially directed at oneself, non-acceptance of oneself, guilt, resentment towards oneself and others. At the physical level: environmental pollution, food additives that reduce the percentage of oxygen in the blood, changing the hormonal status of the brain, etc.

#359, 49:16

Immune response

The body's reaction, which includes recognition of the antigen, its neutralization, the conversion of protein substances of microorganisms into its own and the removal of toxins, those substances that were formed during this digestion. Storing an antigen in order to initiate an immune response before a significant number of body cells are damaged. As well as restoration of tissue structure after this attack.

#359, 37:00

Impulse

The release of energy, which serves to transmit a signal to other neurons and to transmit the received information to the level of the etheric body, vital force.

#120, 19:35

Imhotep

Contactor with Tumesout . He was the architect of the very first

pyramid. All other pyramids were created on the basis of his notes, on the basis of his construction of the first structure. The priests immediately classified his records and then other architects were engaged in the construction of pyramids according to certain mathematical laws (there must be a certain height, a ratio of edges that structures the space).

#403, 48:43

Name of the Higher Self

May coincide with the name in this incarnation, may be from previous incarnations, more important for the Higher Self. May not coincide with the name in this life, may be of a different gender. Could be a name for the spiritual world.

#86, 27:08

Spirit name

A set of vibrations of a spirit that reflects it in comparison with other spirits. God gives the spirit a name. Although the spirit considers the idea of a name to be its creation, this thought is sent to it by God. This is what happens in the spiritual world.

#114, 28:57

Soul name

Many names in different incarnations. The Higher Self has a single name.

#86, 27:08

Indra

A subtle material entity that took upon itself the name of one close to Krishna in order to receive animal sacrifices from people. It was an entity of density level 15-16, responsible for atmospheric phenomena, could create weather, rain or drought, and was in charge of a large space above the village. If animals were not sacrificed, Indra would send a drought to the earth.

#310, 10:08

Inertia

The main property of matter, which allows it to be the opposite.

#263, 03:35

Engineers of dense material structures

Special alien scientists who create, for example, special nanofilms to cover ships or robots. On the surface of one metal or polymer material they create a very thin nanofilm of another.

#200, 13:15

Incarnation into the past

The embodiment of the spirit in the past is for us time and for it our present is the future. For the Spiritual world, for the world of disembodied spirits, there is no concept of time in our understanding of the material world, because there is no change there. This is why spirits incarnate, to change. Since there is no time there, since there is eternity there, then there are no changes there. And since there is no time there, then from the Spiritual world there is an opportunity to manifest in the material past, present and future.

#40, 27:44, 29:27

Incubi and succubi

Most often, these are plasmoid entities that, in the astral plane, enter into sexual relations with the human astral body. Thus, they exchange energies, because when entering the astral plane, the astral body remembers the physical body how it felt during sexual contact with a person. These feelings and desires are stored in the astral body. Therefore, some plasmoids to which this human energy matches the vibrations...

#180, 44:35

Insectoid

The first civilization in our Galaxy, near its core. Several tens of billions of years have passed since the beginning of the development of insectoids from huge insects, when they transitioned from animals to intelligent forms.

#414, 48:00, #452, 02:24

Instinct

A self-reproducing program of behavior of a living creature, aimed at its survival, reproduction and dominance over other creatures. Both humans and animals have an instinct - a program that operates independently of reason to preserve life, reproduction, and so on. It is more connected with the body, but he (a person, an animal) feels it as his desire or his feeling.

#345, 30:12, 42:43

Instincts (types)

Five basic instincts: conservation, reproduction, power, leadership, herd. And the sixth is hedonistic. Man, like animals, has instincts that originated and were inherited from animal ancestors. These instincts predominate in man, in the child , while he is being brought up to preserve his body. For any child, including a human child, the most important instinct of self-preservation is aimed at following their parents and recognizing them as the highest authority. Only they are the guarantee of security, and only from them all perceived information at an early age, without any criticism, fits into memory cells and then determines many of the feelings or conscious attitudes of an already adult person to the world around him. The instinct of self-preservation is needed for a person to fulfill his task, and not go into the spiritual world, because... it's better there. The reproductive instinct is necessary to create new life. The leadership instinct allows one to strive for power and establish laws for structure and order. The herd instinct allows people to gather in communities and love communication. The instinct of pleasure, the desire for pleasure, is necessary for the development of gratitude to God and the manifestation of joy from the incarnation.

#233, 01:26:47, #266, 10:38, 23:47

Instinctive program

A certain unity, which consists of the instinctive energy of the spirit, connected with the program in the genes of the human body.

#85, 01:17

Instrumental transcommunication

Communication using technical means with intelligent interlocutors who live beyond the perception of earthly senses.

#170, 04:50

Insulin resistance

Non-acceptance of yourself. A person does not enjoy life not only because of food, but also because he lives, sees, hears, something upsets him. A compensatory mechanism occurs: the amount of glucose in the blood increases and, conversely, the amount of insulin decreases, or the cells become unresponsive.

#189, 25:46, 48:28

Interferents

Negative entities from various lower worlds that connect to a person through his karmic nodes.

These include:

1 souls connected with a person by karmic knots;

2 bindings, connections that are already being formed in the current incarnation, and they can be formed in very early childhood only due to the coincidence in vibrations of spirits embodied in the subtle body and in a person, that is, a spirit embodied in a human body.

#450, 06:05

Intuitive knowledge of reality

A desire coming from the subconscious, from the Higher Self, that is, in the form of intuition.

#417, 00:20

Intuitive insights

Usually these are thoughts that talk about how to complete your task, increase love for yourself and the world, expand your knowledge, about everything that brings you closer to divine vibrations. All these thoughts and feelings come from the Higher Self. Anything that pulls back into judging others and thinking that you only need to love yourself is a rejection of the Higher Self.

#1, 14:34

Intuition

A communication channel through which the part of the spirit remaining in the spiritual world tries to communicate with its incarnated part.

#30, 33:26

Infectious process

The reaction of a macroorganism to a microorganism that could harm it in some way. If a microflora is encountered that is completely evolutionarily unfamiliar to the microorganism, then no infection will occur , since the microbe will not have the appropriate enzymes to penetrate the body's tissues. If a virus enters a cell, it begins to signal with special, very small molecules that something has happened to it. She does this despite the protection of the virus itself, which exposes its protein molecules throughout the inner membrane of the cell for a time so that its endoplasmic reticulum can produce the proteins it needs to assemble new viral particles. Despite this, the cell still signals. Then the whole body becomes activated, that is, special antibodies are produced that destroy its own cell so that these viral particles can escape into the external environment, into the space surrounding these cells, and can be neutralized.

When it is one or two cells, the body will not feel it. But when there are a lot of such cells, the body begins to increase the temperature in order to slow down the proliferation of viruses and remove unfavorable conditions. A person begins to cleanse. His temperature rises, he

becomes ill, he develops weakness, as an obligatory component in infectious asthenia. This is an essential component of any infection in order for a person to spend his energy on immunity and cleansing. They put him to bed so that he can be with himself and send the Light of his Love to this organ, which helps to harmonize even harmful microbes. They have been proven to become less virulent and less evil in the body if Love is consciously sent to them.

#27, 01:01:20, #365, 23:57

Information war

Influencing the consciousness and subconscious of a person with the aim of causing negative emotions in him , lowering his own spiritual vibrations and causing degradation of both the individual and society.

#295, 01:16

Information field of the Universe

The totality of all egregorial structures that are embodied in this Universe. They contain information. But it is not written in the form of some material records, it is in the form of mental images emitted by people themselves, plasmoid civilizations, and so on.

#420, 35:04

The information is false

A piece of true information that describes one facet of reality, forgetting about all the others.

#289, 10:57

Information from photo

Information from the etheric field of the one who is depicted there. Photography contains energy. When a person is photographed, his image contains information about his vital energy at the moment when he was photographed. An energy trace remains on this sheet of paper, but it is invisible, like a field. The information-energy component is read.

#344, 01:08:26, 01:19:20

Yin-Yang (symbol)

A designation that in every low vibrational energy, in every low vibrational spirit (what we call a dark spirit) there is a piece of Light. But even a light spirit has the opportunity to become dark. Freedom of choice is shown here. Two sides of the same thing. Symbols that represent opposites in all areas of life, both in the real world and in the spiritual.

#66, 01:02:32, #244, 20:48

Seekers

Spirits from the 16th level of the World of disembodied spirits, whose task is to find the way to the world of good spirits, to the world of angels, where the Light shines much brighter than in the world of average spirits. Seekers see reflections of this Light everywhere. The main thing for them is not to fall into dogmatism and not to limit their thinking. They have already outgrown such experiences and now see good beginnings in all religions and spiritual teachings. A characteristic feature of Seekers is dissatisfaction with their spiritual development and a constant striving for perfection. Many of them already feel that all books about spiritual development, all religious scriptures will not bring any benefit if they do not see and recognize the Light in themselves. Many Seekers feel it and merge with it, but not everyone can explain what it is, even to themselves. But their hearts often tremble before the great mystery of existence, while vaguely realizing that darkness is unrecognized Light, and evil is misdirected good.

Article by Vladimir Goldstein "The structure of the Spiritual world through the eyes of aliens"

Distortion (heresy)

A certain opinion of the mind based on a feeling of rejection of matter. It leads to the fact that a person begins to descend in his vibrations and comes to sin in his mind and in his feelings. Because he does not accept matter as one of the energies of God.

#206, 12:05

Sincere forgiveness

Restoring peace in your soul. Realizing that the traumatic act of another is a lesson for yourself. Awareness that if someone has acted badly in a state of unconsciousness, perhaps with a decrease in their vibrations, in the absence of love, and sending him the sincere Light of your Love, which will allow him to raise his vibrations and return to God. The wish for true happiness in God, refusal of demands for apologies, return of material things. Full acknowledgment that you have accepted this lesson and completed it. And the main thing is a feeling of Love for your opponent.

#187, 02:18:00

Redemption

To redeem from evil slavery is an image, a figurative expression taken from the 1st century AD. The Lord Jesus Christ sacrificed his life, his incarnations in billions of worlds to make us his particles, so that we could feel like Light, Truth , Life. Live as He lives and become His “slaves.”

#165, 25:07

Artificial neural network

Combined systems of artificial neural network and biological body. There are life forms on a silicon-organic basis and are responsible for storing information in an artificial environment. The organic basis is the basis for the vital force, without which no spirit can unite with the body.

#95, 01:50, 02:07

Artificial intelligence

Automated systems that can reproduce themselves, but according to a given program. They are not capable of independent choice. Their independent choice is possible only within the framework of the program. Automatic digital systems that themselves calculate, for example, the flight course of a ship. This is faster, better quality, and frees up the labor of humanoids.

#76, 23:03, #95, 01:23

Art on Esler

Raising new generations in the spirit of the Light of Love of our heavenly Father. What on Earth is divided into religions, science, and esotericism is a single knowledge. Its essence is faith in oneself, as a part of God, endowed with all his qualities to control the reality of the material world, for greater and greater improvement in Love, without which true happiness in the Light of God is impossible. Explaining to embodied spirits the meaning of freedom and the meaning of suffering in the material world. Often this is an opportunity to learn empathy and helping others, as necessary attributes of the Love of those individuals who are next to the innocent sufferer. There is no guilt here, but only the opportunity to develop Love as an invaluable energy that makes it possible to join the source of eternal life, wisdom and grace.

PiosNior, art critic, specialist in the study and application of figurative forms of perception, planet Esler.

#60, 01:45

Temptation

Thoughts that come from outside from those entities: embodied and non-embodied , who are accustomed to a certain way of life.

#53, 01:03:05

Islam

A religion created by a civilization from the planet Tumesout with the goal of uniting disparate Arab tribes into one strong, national, religious egregor. The Islamic religious egregor was formed during a period of tough struggle against polytheists, and what was formed carried a charge of anger aimed at remaking the world for oneself, the fight against dissidents. This charge is still preserved in the Islamic religious egregor, and is also present in the Christian one, but the light that exists in these religions still overcomes the angry energies that were embedded in them, because the more time passes from the formation of the egregor, the more of those people are born in it who forget about the history of formation, and they begin to develop more within. At first it was a small sect among polytheists. The pagans were of a traditional way of life, and the Muslims were a sect. From a small sect it took several centuries for a religion to emerge, a rather large entity. And now a small religion has turned into a world religion. Islam was created initially for the Arabs; then the task was to unite the Arabs. At this point in time, religion has completed this task, and now its task is not only the Arabs, but also the maintenance of religious order, in general, in the world, in the dimension where it is located. Like any bright religion, where they believe in Light, Love, Good, the Islamic religion has the same task as everyone else. For example, believers are commanded to pray five times a day, not once. The state of constant prayer is good

and beneficial for the Earth, because bright thoughts are directed into the astral atmosphere and cleanse it of negativity, push it aside, as if squeezing out this negativity. At the moment, the Islamic egregor is mainly controlled by Apshetarim , assisted by several Spirits. Now Ismail rules instead of Muhammad; he lived on Earth and was a scientist in the 13th century AD. And four more : Ali and Ibrahim - non-incarnated spirits, Apshetarim from the planet Tumesout , Liatomon from the planet Burkhad - embodied ones . They can change, some can come, others can go to incarnation or to other egregors, the composition is not constant.

#75, 06:13, #235, 52:56, #293, 11:45, 17:08

Researchers

Spirits from the 14th level of the World of Unincarnate Spirits. Spirits who see joy in knowing the laws of the material world in all its diversity. They can get to know nature or society, or themselves, they can see God behind all this, but they also want to know Him and put them into pieces. His laws and energies. They are not always able to check harmony with algebra, so such spirits often cannot understand the difference between faith and knowledge, but still, their innate logic and analytics help them feel that the world is much more complicated than it seems to them.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

The truth

And there is God himself, that is, this is that particle of God, that Light that exists in everyone, and with which everyone must communicate. That Energy that gave everyone Life, Love and Light. And Life, Love, Light, Truth are synonyms, names of the same Energy of Divine Light, to which we all strive. But Truth is in the understanding of the mind, Love is in the understanding of the spiritual heart, Life is in the energy of the body. Everything that exists around us, everything that we can see with our eyes and hear with our ears, touch with our hands, all this is Divine Light in dense material form. Every person is Divine Light.

The feeling of the truth of what is happening depends on the degree of awareness of the Energy of Love in us. The more developed the Energy of Love is, the higher the vibrations, the more true the world around you feels, the more dense the substance of Truth becomes, really influencing lives. You begin to feel all the happier from being in every moment of this Truth, feeling yourself as an eternal immortal shining spirit of the divine mind.

#26, 40:35, #63, 48:42, #126, 20:27, #188, 29:12, #289, 10:57

#303, 0:28

True Repentance

A person's awareness of why this particular action or behavior lowered the vibrations, why exactly it is a sin, a violation of the commandment of God.

#206, 01:45:10

Healing

Human integrity. The feeling of being part of the world, part of other people, nature, God, and this gives a feeling of wholeness.

Full understanding of our integrity with God. And when we become integral with God with our spirit, we merge with him, our will merges with his, our heart merges with his, we become Love. We become the Light for everyone without expecting anything in return. And then our body, our physical body becomes harmonious and merges with the elements of nature. And all of nature, all its substances are aimed at his health, at the health of this body.

#127, 11:01, #352, 50:35, #428, 38:44

Disappearance of the Universe (end of the world)

Exit from a dense state. At the same time, everything will be illuminated with white light, which will be in our perception as light, but it will be like an instant. And then there will be no more dense matter. But there will already be a 4th level of density. Then the 4th one will also disappear. It will be the 5th. And so it will be. All these levels will disappear and all this Divine energy, which made up the dense material world, will return to God, to his Divine essence. Along the way, these worlds will become less dense . He will, as it were, return her to himself. Then all matter will completely disappear, of all levels of density. Only God will remain and only spirits will remain, that is, us.

#264, 03:13

ITR (Technical Development Index)

One of the types of classifiers of civilizations among alien races. Total – 30 technical and technical equipment. At the last 30th level, the ability to rearrange planets, light stars, and use the energy of the galaxy appears. The Earth is at the 12th level of technical development.

#77, 10:10

Judas Iscariot

One of the twelve apostles of Christ, who was firmly convinced that he must show the soldiers and priests where Jesus was in order for Christ to show his Divine Power and Light. He did not doubt his divine origin, that He was the Son of God, and not just a great prophet or teacher, that He was God himself.

#36, 33:03, #239, 20:49, #241, 1:23:34

AND

Yeti

All tribes of people who separated from the civilization of the Earth after the Great Glaciation, caused by an attack on the Earth by dragons. That is, there was a legend that dragons attacked the Earth. This caused a decrease in sunlight. According to legend, it was painful for the Sun to look at this lawlessness and it reduced its light. For this reason, part of the life of the Earth disappeared. Many plants, animals, and ancestors died. And the rest hid in caves, underground passages, in some corridors, tunnels. After the glaciation, people left their inner nature and began to build their civilization on the blood and bones of the Earth itself, using its resources, while moving away from the Light, from the Spirit. Then they developed separately. They lived in nature (among nature, adapting to it, communicating with its Spirits). They hid underground, received a dose of radiation, and many of them died. But many of them were able to configure their bodies in such a way that they would reject radiation and remove radionuclides. There was some damage to genes, including in the germ cells that they passed on to their offspring. Due to mutations, hypertrichosis or increased hairiness, dark skin color and thicker skin appeared. Yeti were able to direct random mutations caused by radiation energy in their germ cells to adapt to the environment.

The history of the people shows that for a long time they lived as a small tribe, and then began to settle throughout the Earth. The tribe is divided into families. Each family member performs some kind of work that is useful for the entire tribe. But in decisions everyone is equal. An important decision is made by discussion, by the entire tribe.

A leader is one who proposes ideas but does not insist on them. Not the one who commands, but the one who suggests where to go, what to do, what new places to explore.

Thanks to cell control, yetis come out of incarnation when the spirit itself decides to do so, that is, consciously. They practically do not have most diseases. There is no medicine, no medicine. If one of the Yetis is injured in some way, then even a child can stop the bleeding by directing his gaze and mentally ordering the blood vessels to close and the blood cells to create a clot.

Yeti does not have a written language, but rather an image of language, syllables in order to convey information. The priesthood has this. Some priests, in order not to forget information about some new method, for example, of communicating with Spirits, or about some practice aimed at accelerating energy exchange in their body, can indicate this with certain signs (icons, squares). Signs can only be understood by them and those to whom they convey this knowledge.

The yeti can be punished if a fellow tribesman succumbed to the influence of dark Spirits, a dark Spirit moved into him and he began to destroy everything around him. He is banished to fend for himself because he might be evil and might hurt someone.

Plasmoids accompany each child, from 16 to 60 plasmoids.

There are 38 known yeti tribes. There are about 15,000 individuals on the planet. Their language is more image based. A certain syllable denotes a certain image. They communicate through thoughts at the level of feelings. All tribes have the same mental language. Different images can be embedded in one syllable.

Yeti have 7 main energy centers. 30% of the spirit is embodied in the body.

#433

Yoga

A universal practice that in ancient times was widespread throughout the Earth. Even before the war 12 thousand years ago, this knowledge was obtained from the Spiritual World, from plasmoid civilizations, developed by earthlings themselves and obtained through natural contacts with humanoid civilizations.

This is a kind of synthesis of practices, theories that were based on the experience of interaction with the outside world. It is well known that there is yoga that is aimed specifically at health. There is also yoga aimed at contacts with subtle civilizations. There is yoga aimed at

protecting against all harmful influences of geopathogenic zones and so on.

Some part of it is known to the modern world under the name Feng Shui. This is also a certain yoga of space, because yoga means not only those practices that a person does, but also the doctrine of the structure of space.

Let's take the word "yoga" and break it down into the syllables of the proto-language. "Yoga" consists of the letters "y" (a modified letter "i"), "o" and the syllable "ga". Proto-Indo-European was a syllabic proto-language. To convey the meaning of certain runes, both letters and syllables were used. Yoga is deciphered in this proto-language as "The Highest Path for All," or, if we add a preposition, "The path to the Almighty for all."

#441, 08:55

TO

Kailash

A mountain in Tibet (it used to be a pyramid, but now over time it has begun to resemble more of a mountain), in the area of which there is an alien base and above it there are many portals to a wide variety of plasmoid worlds. This is exactly how it was created by plasmoids. There is a place under Mount Kailash that is very energetic, there is a base where there are now about two thousand employees.

Initially, it was the base of the capital of the Interstellar Union, Burhad (Pikran). And now there are representatives from Futissa and other civilizations of the Galactic Federation of Light. Now it has come under the Galactic Federation of Light, there are Burkhadians and representatives of the Ashtar civilization.

97, 02:52, #182, 01:43:50, #403, 01:24:11

Kalachakra

Representative of the Antiverse .

00:05, #409

Callisto

Satellite of Jupiter.

#77, 00:15

Chintamani stone

Some object in the form of a crystal, charged with the energies of the Tumesoutians to cleanse the mind of various thoughts that lead to destruction , to cleanse the consciousness. It was transmitted by representatives of Tumesout , even before the birth of Christ, to rulers in India who were in contact with the base, with Shambhala, located in the Altai Mountains. Shortly before the birth of Christ, the Chintamani stone was given to Buddhist monks and was kept in their cave.

#206, 02:09:25

Stones

A mineral form, but not of life, but of the presence of a plasmoid civilization. By themselves, they are not alive, because they do not have metabolism, birth, death and any separate souls. But plasmoid civilizations can manifest themselves through them.

#495, 47:00

Geode stones

Healing stones. In nature, they are nurtured by angelic (plasmoid) and elemental beings.

#131, 37:40

Channel "Golden Pyramid"

A channel that creates vibrations in cosmoenergetics that are incompatible with the life activity of viruses, microbes and other parasites. This channel disinfects the space.

#122, 08:38

Cannabinoids

Substances that change human hormonal levels.

#50, 32:38

Human karyotype

A set of characteristics of a complete set of chromosomes inherent in the cells of a given biological species, a given organism or cell line.

A karyotype shows the complete set of human chromosomes. Each human cell contains 23 pairs of chromosomes, or 46 chromosomes in total. Each pair of chromosomes is a set of homologous chromosomes. During sexual reproduction, one chromosome in each homologous pair is passed on from the mother and the other from the father. A karyotype contains 22 pairs of autosomal or non-sex chromosomes and one pair of sex chromosomes. The sex chromosomes of both men (X and Y) and women (X and X) are

homologues.

#246, 34:51

Karl Marx, Vladimir Lenin, Plekhanov

Thinkers who had the memory, albeit suppressed, that all peoples should be in a union of equal forces, collaborating in the name of Light, in the name of development throughout the Earth. They had an understanding that all the riches of the Earth's interior, like air, water and sunlight, belong to all inhabitants. This came from their suppressed memories of the same laws on the planets of the Interstellar Union.

Their incarnation at a turning point was not accidental. 2000 years after the birth of Christ, in the period from 1900 to 2000, the last century of the 20th century was a turning point, and then your society also made the Quantum transition. The Earth was flying through a place in the Galaxy where there were energies that contributed to the unification of various forces on your planet.

#256, 05:32

Karma

The tasks that conscious spirits came to solve in the current incarnation.

A source where all actions and their consequences in previous incarnations are recorded.

Karma is formed every second of incarnation and is associated with the choices of the rational spirit. Suggested by spirit consultants.

Karma is not only the burden, not only the legacy that was brought from past incarnations, but it is also the baggage that accumulates in

this life. This is approximately like a bank account in which you can accumulate certain energies, or take them from there for your needs. But this is very approximate. Therefore, any relationship is karmic in the sense that karma can be either from a past life or acquired in this life.

#9, 06:07, #20, 57:22, #52, 12:04, #83, 08:05, #131, 02:27:20, #427, 22:20

Karma: reversal

What was called a “change of mind” by Christ. It can cancel karma if this has happened. And it can happen in one instant, which is called “satori” in the east, or it can last a lifetime if it is related to any choice that is very dear to the human soul. Can a person cancel karma? Of course it can. Because the need for karma disappears for those who have realized the reason for its formation. The purpose of karma is not punishment, not revenge, but a lesson to those spirits who have made a choice towards degradation. And if the spirit, without a lesson, has already understood why it made this choice and embarked on the path of progress, then the need for this karma disappears. He had already learned this lesson.

#47, 39:41

Karmic knots

Unprocessed situations in past lives, those situations that caused negativity in a person and which he did not have time to process, transform into positive, into positive experience before he left incarnation. These situations pass into his karmic body, into karmic memory.

#83, 08:05, #450, 06:05

Cassiopeia

An earthly woman, she was a queen, the wife of Cepheus, the ruler of one of the priestly castes. She was a priestess of Demeter. She had many children. The eldest of them was called Andromeda and she was dedicated to Demeter from childhood.

#288, 01:07:18

Character qualities

The experience of past incarnations transformed in the spiritual world.

#31, 18:26

Quantum holography

Essential matrices. That is, between the worlds: dense material and subtle material and between subtle material and Spiritual there are so-called etheric layers, torsion fields, for example, etc. They separate the world of one density from the world of another density, the material from the spiritual.

#304, 37:22

Quantum predetermination (working with the Time Tape)

Information waves that determine the reality of the material world.

#308, 02:02

Quantum transition

The period when quanta, without losing their material nature, under the external influence of the spiritual world, without losing their ability to form dense material substances, increase their vibrations to fulfill the quality of the development programs being carried out. This leads to the fact that the whole world, the whole Earth with all its shells, all the substances of which they are composed, begin to increase their vibrations.

At the same time, physically, people will remain the same, they will also be born and die. But even while in the body, they will feel themselves to be eternal beings, and that's all. And the body itself will contribute to this, because it will also raise its vibrations. Thus, the vibrations will gradually increase for everyone, and those who cannot go through this transition will simply be taken out of incarnation in different ways and only those who are ready to go through the transition will be sent to incarnation. This all happens gradually and will contribute to the awakening of dormant sections of people's DNA, but only in agreement, their harmony with the spirit. And subject to their spiritual growth.

The physical body itself will remain the same forms. At the same time, people will more consciously communicate with their Higher Self, with their curators, with extraterrestrial civilizations. They will more easily and consciously leave the body for astral travel.

These people, in whom this DNA is activated, they will have energetic capabilities, for example, directing their life force to move objects, to heal people, to self-regenerate, to regenerate themselves. And also they will have such a power of faith that they (of course, if they develop it, because even with activated DNA, if it does not develop in this direction, this life force will not act), if they develop it, They will even be able to learn to push away from the Earth's gravity. And with their thoughts they will also be able to easily, for example, create phantoms of various astral and mental beings that will help them in their affairs and so on.

The quantum transition has entered an active phase since 2012. It happens in stages. It has an active period of 90-96 days, and then 60-65-70-78 days - the adaptation period.

The transition to a new level of consciousness contributes to a change in the quantum fields of human bodies, so that people and their children being born can feel the Spiritual world more. The introduction of new laws will follow, lighter, filled with Divine love, which will allow existence on this planet at the same level as in the Interstellar Union.

Many civilizations, subtle material and Spiritual worlds are now investing energy into civilization, so that those souls who have incarnated here can have a chance to develop in more favorable conditions for themselves, in order to make their path easier. Many civilizations believe that joining other stellar civilizations, be it the Galactic Federation of Light, the Interstellar Union, or both of these interplanetary organizations, will make the path easier most of all. They will help you feel like you are in a single family, where each civilization plays its role. But in order to become ready for this, it is necessary to undergo a quantum transition, so that the vibrations of the quanta themselves will help and contribute to the purification of souls.

The era of conscious interaction with civilizations is coming. This requires preparation, the consciousness needs cleansing from all low-vibration states: fear, anger, envy, jealousy and other destructive emotions that can prevent civilizations and representatives of civilizations that carry the energies of Light from interacting with you.

To be able to receive information from a pure source and transmit it correctly, you need to cleanse yourself inside. This purification process is now underway and is called the quantum transition. And it depends on many factors.

#46, 10:55, #75, 42:19, #92, 03:27, #182, 01:41:20, #183, 41:25, #218, 25:22, #256, 12:10, #283, 48:20, #306, 22:14, #344, 47:01, #358, 18:00, #371, 01:00:52, #391, 27:46

Quantum

The smallest portions of energy that form all the substances around, including dense materials in which people are located. Each quantum

vibrates only at its own frequency, characteristic of the dense material world of 3rd density.

Designation of the smallest portion of energy. The minimum portion that can be recognized at the present stage of scientific development. Quantum is a relative concept, it can be changeable.

#75, 42:19, 12:10, #307, #434, 05:14

Quark

The state of a quantum in the form of a point or pulse disturbance, taken per unit of time, from the point of view of the observer.

#166, 06:24

Quark-gluon coupling

A certain type of energy waves that make up the vacuum energies already known to earthly science.

A device that converts the energy of radio waves in which information is encrypted into the format of quark-gluon bonds. These quark-gluon bonds also contain information, which, in turn, can be transmitted by releasing a small dose of gravitational energy, almost instantly, within our Galaxy. This form of communication is the fastest. Special gluon receivers receive these waves and translate them into the format of familiar sound, video or text, depending on what is encrypted.

#40, 06:15, #166, 06:24

Celtic runes

Runes in which the design of the Burkhad runes by the Druids of the Scandinavian countries is preserved .

#197, 12:33

Kinesiology

The science of the effects of a person's thoughts, emotions and body movements on his spirit.

The spirit works with the physical body through the etheric level. If we look at a person’s aura, at his chakras, then practically all seven levels are involved. The impact of kinesiology occurs on all levels: from physical to spiritual. Up to the seventh chakra.

Through kinesiology, you can increase immunity, improve metabolism, cleanse the body of toxins, and improve the percentage of absorption of nutrients coming from food, including glucose. Thereby helping the pancreas and liver in maintaining stable levels of blood sugar and glucose. Also suppress inflammatory processes and allergic reactions, autoimmune inflammatory processes, chronic infections by increasing immunity. The most important thing is to strengthen the belief that the spirit can influence the body.

The connection between the cerebral cortex and the nerve nodes that are located in the body is stimulated, even individual neurons that are located among the muscle fibers. Communication improves, which means the process of movement of a neurosignal along the neuron’s axon is accelerated, coordination of movements and understanding of the location of one’s body in space, and therefore control of it, improves.

After kinesiological correction, the body adapts to the new state of the body. At the physical level, this is the removal of metabolic products from muscles that have been tense for a long time. The level of acids in the blood increases slightly , so the person begins to experience mild dehydration. A person wants to drink to remove these metabolic products from the muscles. And then relaxation begins, he wants to

sleep. Because the body is restored in sleep. When the soul leaves the body and goes about its business, the body undergoes intense recovery processes, accumulating new blood cells and antibodies.

#454

Kirtan

A holiday where the energy of spiritual beings is present.

#326, 01:09

Kirkhiton

Representative of the planet Daaral. Incarnated from level 18. Curated by Irina Podzorova .

Humanoid. One eye is red and two eyes are yellow and they are round. Hands with five fingers, just below the knees. Born when it was April 4, 1844 on Earth.

Profession astrophysicist. He began to be interested not only in astrophysics, as the study of physical processes that occur in stars , planets , comets and other space objects, but also in contacts with civilizations outside the Interstellar Union. As a scientist, I studied, flew around our Galaxy, and then became interested in contacting. He underwent special training, where he was told about the Earth, about the peoples who live here. He took a course in astral travel.

He began making contacts back in the Russian Empire, in 1887, when the Soviet Union had not yet been created.

He incarnated into a man who is known on Earth as Pythagoras. There were 1362 incarnations in this manvantara .

On the entire planet, Daraal is the only humanoid who has learned the Russian language! Communication with earthlings is the goal of his incarnation on the planet Daraal . It is to convey knowledge about space to that civilization, to representatives of that civilization whose path to the Universe is closed. This is an increase in knowledge of the world. To contribute to increasing the knowledge of man and humanity about the surrounding Universe is the fulfillment of the purpose of incarnation, because this is also a form of Love.

#185, 22:03, 02:02:05, #286, 46:41, #470

Acid

A specific substance that contains either oxygen or another oxidizing element.

#398, 32:16

Chinese Wall

A wall built on the border between the tribes of the Proto-Slavs who lived in the territory north of it, and those tribes from which one of the leaders, who became the Chinese emperor, later formed a single Chinese people. But earlier these were scattered tribes that fought with the Proto-Slavs before the formation of the Chinese Wall . And after the Proto-Slavs defeated them, they obliged these nomads to build a wall against future attacks, both as protection and as a designation of certain borders.

#427, 19:29

Cells

Structures that constantly communicate with each other through micropulses. And this happens not only in nervous tissue. Any cells located next to each other communicate through micropulses through their membranes, and this is how fields are generated.

The smallest units of living things that underlie the structure and development of plant and animal organisms on our planet.

#410, 14:16

#246, 34:51

Cell in the human body

A separate living organism that lives its own life, a kind of group intelligence of individual organs. One of the components of body instinct.

#85, 01:17

Pincers (Bite Actions)

Before going out into the forest, treat your clothes with a solution of eucalyptus, lemon or clove oil. He will scare them away. And dress in light-colored clothes, where the dark tick will be visible. If you find him attacking, don't pull him away. You can cover him with a band-aid, blocking his airway, causing him to get out on his own. You can block his oxygen with polyethylene and a bandage on top. After a few minutes it will come out on its own because air will not penetrate. If you unscrew it, you can break it, because it has a rather delicate proboscis. You just need to cut off his breath. Then he will be forced to stop feeding, will begin to move, and you will feel that he is crawling, open and pull him out.

#255, 49:56

Climax

Changes in body and spirit, accompanied by a more conscious rethinking of one’s entire life, which can cause negative feelings -

despondency, guilt, irritation with oneself and with others. These conditions affect the physical body, and it releases certain hormones: adrenaline, cortisol, which constrict blood vessels and cause an exacerbation of diseases that already exist in the body.

#103, 45:48

Book of Leviticus

Third book of the Torah.

The code denoted the secret; it was laid down by the Levitical priests, who wrote it , only in Hebrew. That is, in order to get it from there, it was necessary to write down the text in Hebrew. And by counting a certain combination of numbers, it was possible to read what was encoded there. Each chapter encoded a specific message to the other Levites, which was considered a secret. But it had to do with the stages of their spiritual path. That is, the first chapter is a certain message, then the second chapter.

There the teaching was deciphered and given on how to reveal one's spiritual heart while serving in the temple. Certain psychotechniques were given , for example, those related to breathing, visualization, and so on. Once upon a time this knowledge was secret.

For example, in the fourth chapter of the book of Leviticus, the meaning of these words in Russian can be explained as follows: stand in a certain place in the temple courtyard at the hour of sunrise, visualize the rising of the inner sun from the solar plexus to the heart center and say certain words addressed to Jehovah.

#446, 53:55

The Urantia Book

A book written by a group of 15 contactees with the civilizations of plasmoids, humanoids, and the spiritual world.

#75, 01:03:37

Flying carpet (fairy-tale image)

Anti-gravity platforms on the worlds of the Interstellar Union, which can be repelled by the gravitational field from the surface. Some specialists gave such flight instruments to their contactees .

#258, 30:29

Chest

The Ark of the Covenant, described in the Old Testament, is a sacred object. It was a means of communication between the contactee Moses and his alien curator on the earth base.

#246, 13:46

Code of Relations with Young Races and Contactees

The Code that has long guided the Interstellar Union and the Galactic Federation of Light. An agreement prohibiting the transfer of information that could negatively affect the contactee , his environment or the entire earthly civilization as a whole. For example, it is prohibited to transmit information about any technologies that another civilization is not ready for. It can fall into the wrong hands and cause harm to the contactee. You also cannot transmit information that will in any way discredit the contactee in the eyes of people. It is considered incorrect to transmit information to a contactee about other contactees with the Interstellar Union or with other civilizations, regarding who they are in contact with and what kind of information it is, without asking the contactees themselves .

#486, 31:10

Knee

Surname in modern language. A meeting of several dozen families or births. At the time of Moses there were 12 of them. The tribe of Levites was supposed to be engaged only in serving as priests and transmitting the law of God to other people. They were contactees who passed on knowledge to people and performed various rituals for energy cleansing and healing.

#209, 18:31

Wheel of Samsara

The cyclical nature of incarnation into the material world. Exists throughout the dense and subtle material Universe. A figurative idea of a series of incarnations, when the spirit repeatedly increases and decreases the levels of its spiritual development, being unable to constantly be at high vibrations of the spirit.

#149, 56:26, #234, 57:35

Kolobok

Earth-type plasmoid. Home spirit, home spirit.

A fairy tale from the word "skaz". Someone said something. They talked about a plasmoid in the shape of a yellow ball that communicated with people, with its contactees . He was a house spirit, and then he abandoned them, went into the forest and joined the forest plasmoids. People told each other. This turned into the recorded fairy tale "Kolobok".

#305, 07:37

Bell

A musical instrument that has very ancient origins, it is much older than Christianity. One of its functions is to increase the vibrations of space and tune in to the vibrations of spiritual beings and to contact them. Unlike other instruments, it is not customary to sing songs to bells; they are simply listened to.

The vibrations created in the air by ringing can be low, high, or combinations of both, but in the Spiritual world it is still considered music, special, bell music. These are sound vibrations that attract

vibrations of the Highest, the angelic world, the Spiritual world.

Bell ringing can be used not only in Christian, practical spiritual life, but also by absolutely any believer, in any religion, also to raise their vibrations. This is useful for tuning into bright thoughts, feelings and for cleansing low-vibration negative blocks that exist in the subconscious. When a person listens to this, if he believes in it, he likes it, then thoughts and feelings awaken in his mind that he was not aware of before.

The vibrations of the bell ringing create sounds in space, waves that act on negatively charged, destructive, parasitic plasmoids as unpleasant vibrations (like incense), and they dissipate.

#239, 48:17, #349, 01:28:48

Colony

A planet that is inhabited by people from the so-called mother planet. But ownership of this planet passes to the society that moves to it.

#104, 01:24:13

Communist egregor

Egregor, which arose during the formation of communist ideology based on Christian ideology. It contained many attitudes of Christian society. This was undoubtedly so, because the people who accepted the ideology, who created it and continued it, themselves grew up in a Christian society. These images were all around them, and it was impossible to use any other system that was very different from them, because they knew what they knew.

Another thing is that they opposed Christianity, like any religion, but the ideology itself remained the same. The ancient principle - “Love God with all your heart, love your neighbor as yourself” in communist ideology sounded like this: “Love your people, love your ruler with all

your heart and love your neighbor, in a practical sense, as yourself.”

When the egregor of the new state had already been created, when it was materialized in the Soviet state, there were still people who were not attracted to this image, not only because they were sorry to part with some property, but also for a variety of reasons. Throughout the entire period of the existence of the Soviet Union, other images were attractive, for example, religious or images of Western countries. But for the reason that the egregor of communism, socialism of the Soviet Union was formed during the period of struggle, it contained a very large potential for rejecting other images and those people who carry it.

The reason why the Soviet Union divided and collapsed, in fact, is the influence of this egregor, although the egregor itself remained, it’s just that its influence on the minds of many people was destroyed. This influence involves the energy of every person who believes in the egregor, invests his energy in it at the mental and physical level, he exhibits actions that contribute to the materialization of his ideas in the physical world.

#235, 52:56

Computer games

A product created by specially trained people in order to attract maximum attention and make them in the form of a game with increasing difficulty levels. So that the person who plays, having completed the level, receives some reward in the form of any pictures, music, so that he feels strong, significant, and a winner. This is all for developing the leadership instinct.

#266, 23:47

The end of the cycle of the existence of the Universe

The transition of matter to the subtle material level. When the cycle of

the Universe ends, all matter from the subtle levels disappears and goes into the spiritual world. There is not a single atom left, not a radiation, not a quantum, nothing, only the spiritual world. There is no space or time in it. All spirits that are born of God will live in the spiritual world.

#53, 01:11:47

Contact

Please come to someone. And they come on their own, regardless of any active visualization of the person asking.

#350, 01:29:03

Contact

From the word "contact". One of the translations of the word “contact” is “union”. That is, this is a union, cooperation with someone, cooperation of two intelligent beings from different planets or from different levels of density, or embodied and non-embodied spirits, spiritual entities. Spirits are intelligent spiritual entities.

A person who makes contact and has the ability to communicate with representatives

subtle-material and dense-material extraterrestrial civilizations. Contact can be physical or astral. Contactors with the humanoid world perceive contact as Angels coming to them or their thoughts. Contactors with the spiritual world communicate with Angel-curators - non-incarnate spirits of levels 17-24. Often incarnated from level 19.

A person who receives information from a source located outside of his physical brain, his embodied part of the mind, which is embodied in this brain, in his personality. Every person is a conscious or unconscious contactee .

If a person has something that attracts low-vibration, non-embodied spiritual entities and plasmoids to him, they have the right to come to him in any form, because he has already invited them to contact with his vibrations. If this is a sensitive person, a medium, a contactee, then he will call for contact those who match his vibrations. This does not exclude contacts with higher vibration ones; both will come to him. Low vibration ones will present themselves as different to gain trust. This will be clear from the information. If there are blocks in you, then they distort the mental body. You will believe that this information comes from light Forces, from God, from Divine Truth. You may not be able to discern this yourself. Therefore, before starting contact, you need to cleanse your energy structure, your aura, from all energy blocks as much as possible, and completely trust God.

#94, 43:01, #281, 21:01, #304, 19:48, #183, 01:09:45, #414, 08:20

Contactor (conditions for becoming one)

Correspond with your internal vibrations to the inhabitants of other planets:

1 Openness of mind to new things, i.e. lack of the habit of thinking according to a template. Because this is a sign of a new type of consciousness that characterizes the galactic inhabitant, the inhabitant of the Galaxy. They have such vibrations because... this helps them understand the Universe and new forms of life in it.

2 Give within yourself the right to love any person, no matter what he is. Any person, no matter what terrible act he has committed, any act that even harms others, he still has the right to love, to forgiveness, to understanding, to help in correcting his shortcomings. That is, the absence of the slightest need to take revenge and punish for bad deeds.

3 Universal love should not be an obstacle to bringing Light to those who are still in darkness.

4 The ability to listen to your heart and the ability to distinguish the call of your heart, the voice of your soul, intuition, from the logical schemes of the mind.

A prerequisite is the absence of any heart disease or diseases that require medication, as well as allergic reactions, because you have to come into contact with another form of life that has a certain protein composition that differs from the earthly one. And if there is already an altered reaction of the immune system, then an unpredictable reaction may occur to contact with them. And also – the absence of infectious diseases, decreased immunity. This concerns physical parameters.

As for energetic and spiritual parameters, this is the absence of xenophobia, that is, fear of incomprehensible, alien creatures. No fear, no mistrust. And also this desire to communicate, and also respect and Love for all forms of life. Respect for all religions and, in general, for any choice of spirit, that is, the absence of the desire to argue, to prove one's own . Prove your point of view. It can be translated as the absence of active aggression. A person must be calm enough to match the vibrations so that there is no damage to his energy structures.

People who practice various homosexual relationships, which applies to both men and women, are not suitable for physical contact. Since such physical contacts with a representative of the same sex for quite a long time - sometimes from three to six months - the aura and chakras are damaged. That is, from the exchange of one's energy characteristic of this body. This will not harm the curators who fly in for physical contact. But since the representatives of other planets have a rather dense, strong aura, like a ball, and for those people it is weakened, damage to the people themselves is possible. And then various diseases can be caused.

It is also not recommended to come into contact with people with diseases of the sensory organs - such as poor vision, poor hearing, because the transition to space to other planets, the energy of other planets can cause even greater damage to the neurons of the brain and further deterioration of the condition.

#42, 29:40, #265, 00:21, 05:21, 13:31, #404, #470, 43:24

“Contract” (“union”, “agreement” in the Spiritual world)

A certain agreement between two or more intelligent entities before the incarnation of one or more of them in the material world. These can be agreements between people. Between father and mother, for example, about the birth of children. Or between children and mother that she will embody them, for example, on this planet. These could be agreements with beings from different worlds, which will later be embodied in different worlds, about contacts to achieve certain goals.

#304, 26:07

Confabulation of consciousness

A change in consciousness after consuming special herbs, under the influence of which substances bring back memories from childhood or a movie seen, and the person weaves them into reality. In particular, it is used by shamans.

#76, 20:28

Galaxy Coordinator

The one who coordinates the efforts and methods of incarnating spiritual entities on all planes of material existence. He coordinates the plans of the spiritual, subtle and physical worlds in a certain galaxy.

#310, 01:57:14

The coronavirus

Covid-19

According to the Interstellar Union, an artificially created species for conducting experiments on the creation of biological weapons. Coronavirus-19, due to the specific structure of RNA, the outer protein shell, tends to fall asleep inside the cell. And not only in the epithelial cells of the bronchopulmonary system or larynx, or something else. It can fall asleep in blood cells, in lymphocytes, for example; also in nerve cells. The program that was originally incorporated into the Covid-19 coronavirus affects the reproductive system and affects human genetics. The virus itself is capable of penetrating the germ cells of men and women and changing the DNA there, the sets of chromosomes that divide for conception. This is designed to weaken the generation that will be born later. There is also an effect on the nervous system by changing the neurotransmitters of the brain, which leads to a subsequent decrease in vibrations, and the person is more susceptible to negative emotions.

An infectious viral disease that affects the respiratory, cardiovascular and immune systems of the human body. This worldwide epidemic and the reaction of civilization to it is a clear indicator of the spiritual, moral and political-economic consciousness, the state of earthly society.

The virus was created by changing the genome, introducing genes into it that are not originally characteristic of the natural virus of this disease. It was characteristic of viruses of related species that were not considered dangerous to humans. We genetically crossed the genotypes of several viruses and did this for experimental purposes. This happened in a laboratory in China. Few people even know about this.

The virus lowers vibrations due to emotions associated with it and with measures to combat it, which cause far from bright emotions. The disease itself, the measures to contain it , all of this together greatly reduces the energy vibrations of the Earth and prevents the quantum transition from happening.

If you look at it from a physical point of view, the goal of the people who spread, sprayed this virus, made it seem like a leak, they had several goals. The first goal is to conduct an experiment on the effect of the created virus on a wide population of people of different ages. And the second goal is to improve the destructive capabilities of this virus as a biological weapon so that it can be used, first, against

enemy states and second, to reduce the population of one's own country.

#61, #316, 12:30, 15:22, #374, 40:27

Adjusting parenting

Frequent conversations with a teenager about the meaning of life, about his future profession, interests and life, plans for the future. Ideally, parents should teach their child to connect with the Higher Self. Then the child would be able to ask the Higher Self about his goals and objectives and receive the strength and energy to accomplish these tasks. Then nothing can lead him astray from this path, no external temptations of this world.

#50, 42:04

Cosmic soul

A person who lived on another planet in a past life, or a spirit who had the most alien incarnations.

#112, 10:02

Cosmic cycles

Four cycles of civilization development, which are associated with the redistribution of spirits of various levels of the spiritual world in incarnations in the material world. In one cycle more spirits from higher levels are incarnated, in another - from lower levels. The duration of one cycle is not strictly regulated and is largely controlled by the civilization itself, which exists in one place or another in space and time.

#27, 01:12

Cosmos

The entire created material world (from the Greek σύμπαν (space, universe). In the concepts of the Interstellar Union, this includes not only the physical dense material cosmos, but also subtle material worlds, portals into the world of which physical space is projected , at any level of density. Creatures embodied in this space, are called cosmic plasmoids. From this point of view, the Earth is the same part of the Cosmos as any planet included in the Interstellar Union, and earthlings are the same space inhabitants as any member of the Interstellar Union, earthlings simply live on a celestial body that revolves around it. Sun.

#202, 56:20, #332, 37:34

Cosmohilling

Energy healing, including at a distance. It is considered by many civilizations of the Galaxy to be more promising and perfect, since those initial stages of the disease and disorders that have not yet manifested themselves on the physical level are eliminated. It is the most developed system of assistance to the embodied spirit. A person is adjusted to the harmony of all chakras, all energy centers, so that he can more easily configure his spiritual channel to communicate with the disembodied part of the spirit.

#238, 50:00, #247

Cosmoenergetics

Modern energetic spiritual practice, which allows, in a fairly short time, to give good results in healing a person’s physical health and soul, to help a person improve his spiritual level, in personal and spiritual growth. Works with external energies of extraterrestrial civilizations.

Created by humanoid civilizations.

#28, 09:46, #41, 01:05:00, #225, 01:09

Nomadic Wanderers

Humanoids who may not have their own planet. They can establish temporary colonies. They consider life on a ship to be their world. They have their bases on Earth.

Insectoid civilizations that travel inside asteroids. They have long flights , including changes of generations.

#219, 24:01

Beauty

Divine uniqueness.

#111, 19:28

Dyeing eggs

A tradition that arose many centuries before Christ. The egg was a symbol of the Sun, which gives birth to life. From an egg comes life - a chicken.

The eggs were painted with various paints and dyes and eaten at the festival of spring, the rebirth of nature. This happened back in ancient Egypt. The tradition started from there.

#400, 50:56

Baptism

The energy that connects a person to the Christian religious egregor, to the church. The purpose of baptism is to introduce a person into the Christian religious egregor for his assimilation of the energies of Christ.

A promise and at the same time a request to God, manifested in one or another Teaching, to raise one's vibrations.

The baptism of a child in no way implies violence against his will. Because baptism does not oblige you to anything. This is just help for a child from a Christian religious egregor.

Baptism is given not because the person, the child who has come, is so sinful and unclean that he needs cleansing, but for the reason that he needs the energies of Christ, which He gives through the sacrament. He can give them only to those who have undergone this sacrament. Because it connects a person to the Christian religious egregor and fills him with energy. And such a person is seen by the observers of the Christian religious egregor, the Spiritual hierarchs and the Angels of this egregor. And when the priest baptizes, Angels are invisibly present nearby and invest in his field a certain access to the energies of Christ, which he will receive through communion.

Communion, which the priest gives, and Christ puts his energy, his blood and flesh there (through bread and wine), is an opportunity for the spirit, which is embodied in the child, to more easily adapt to the world. Christ will help process all the negativity that is possible during adaptation, when, for example, he does not understand why people behave this way. After all, he still has little experience.

#193, 01:09:35, #239, 37:16, #439, 59:52

Epiphany (holiday)

A great Christian holiday, which was established in honor of the baptism of the Lord Jesus Christ in the waters of the Jordan. In Israel at this time the weather was completely different and Christ did not have to swim in the ice hole. On this day, at the beginning of the

astronomical day, the egregor of Christianity releases such energy into the material world that, acting on the ethereal matrices of water molecules, fills them with Light, the Holy Spirit (Spirit of Light).

#397, 18:50

Baptism with the Holy Spirit

The believer's acceptance by God, which gives faith in the correctness of his path.

#94, 23:03

Crystal Andara

A cosmic crystal, which is an alloy of 80 types of crystals, possessing powerful positive energy.

#131, 03:00

Crystals

Certain , separate groups of minerals that have a crystalline molecular lattice through which the energy of the stone itself is distributed.

Minerals in which the atoms of substances are arranged in a specific structure that stores energy.

#256, 01:03:19, #284, 56:05

Criticism (criticality)

A natural component of thinking. Everyone has it. However, it is aimed at different things. Those people who follow someone are less critical

of the source of those orders, but they are more critical of their own ideas. They don't follow themselves.

#347, 32:25

Criticism of ideas

Absolutely correct behavior that is accepted in any scientific community. Open discussions are accepted in both the religious, scientific, and esoteric communities. They are used to criticize one idea and present the advantage of another. But as soon as the idea is transferred to the personality of those who adhere to these ideas, it lowers the vibrations of everyone and does not allow them to find the truth.

#337,04:58

Constructive criticism

Criticism with good intentions. It should not be aimed at humiliating and condemning another person for some kind of negativity, but at awakening the Light in him.

#203, 32:03

Krishna

Coordinator of the Milky Way Galaxy.

The son of Vishnu, an inhabitant of the planet Shimor, and an earthly woman. Krishna's earthly mother had her own husband on Earth, and she was faithful to him. Representative Shimora, who was Krishna's father, simply gave the genetic material. He also had a wife on Earth.

Currently, the spirit of Krishna is not embodied and is at the highest

level of the Spiritual world. From there he supports his religious egregor and the egregors of religious movements close to him.

Rama was the embodiment of that spirit, which then, much later, incarnated into Krishna.

#75, 10:40, #326, 01:09, 10:05, 25:24, 35:18, #241, 01:30:35, 1:35:15, #261, 25:39, #309, 01:52:03

Krishna (Deity Worship)

The primacy is not external form, but internal content. If the worship of the Divine embodied energy in the form of an object is such that it can make a person happy, but at the same time the person does not want to make anyone nearby happy, then this worship leads to a decrease in vibrations, to the hellish worlds. And if he gives happiness and Love to those around him, without expecting anything in return, then his worship becomes pure and elevates him to merging and communicating with the Divine.

#309, 40:28

Krishnaloka

Krishna's level (Krishna's world, Krishna's planet), the level at which Krishna and the spirits equal to him are located upon achieving Krishna consciousness, the state when a person begins to relate to others, to himself and to the world in the same way as Krishna saw through his prism consciousness, awareness and his mind enlightened by the Light of Love.

#122, 10:39

Cro-Magnons

Tribes of people who began to multiply on Earth after a war 12,000 years ago.

#202, 34:00

Kronos

A creature from the myths of Ancient Greece, a figurative representation of a number of thin-material (plasmoid) civilizations living in the atmosphere of planets and in space, controlling the interaction of the energy fields of celestial bodies with each other.

#288, 13:34

Crownoscope

Equipment with which you can take measurements from a person's etheric and astral fields and receive feedback on 50-100 sheets on astrology, numerology and much more.

#225, 19:42

Circles on Lake Baikal in winter

A natural phenomenon caused by uneven freezing of water. Due to the fact that there are different molecular lattices of the ice roof, inhomogeneities in its color are obtained, which look like circles. They can be big. There is heterogeneity in the composition of the water itself and the suspension that is in it - chemical, biological. Water freezes unevenly, so the color is different.

#371, 05:35

Crop Circles

The so-called drawing test, widespread in earthly psychology. Shapes representing symbols of certain structures: either galaxies, or symbols of planets, or the internal structure of atoms and molecules. And many, many different other things that are applied to the surface of the planet by a special type of electromagnetic fields. In order to see the level of development of consciousness and intelligence of those who will speculate about their meaning.

Esler sign. Each line means a certain plane of reality or dimension. Most often they are left by representatives of humanoid civilizations from the planet Tashig , from the Pleiades. The ship sends drones from orbit. These can be small round flying objects, which, due to changes in the plasma field, the gravitational field, create these crop circles. They have a diameter of about 30 cm. But around themselves they create a plasma field of bright white or yellow color, and it changes. When a ball hangs on a field, for example, cereals, its plasma field changes intensity. A vortex electromagnetic field is created , which changes the structure in plants. And this is why they form a pattern. This pattern is already included in the program of this ship in advance.

#23, 03:11, 02:22, 02:42, 04:07, #40, 03:05, #66, 21:10, 24:21, 25:45, 28:11, 30:31, 35:13, #272, 31:33

Water cycle in nature

A process showing the interchange of energies between various substances and entities.

#322, 05:29

Wings

A symbol that creatures can fly in the sky, similar to birds. Christian Angels were depicted with wings. They were often called aliens. Then they began to be depicted on icons with wings, which symbolizes their ability to fly. Spiritual creatures were also drawn, symbolizing their ability to instantly move in space.

#285, 10:57

Metatron's Cube

A cube, but there are two more cubes in it and they are connected to each other by lines. In one cube there is a second one, and in the second there is a third one, that is, the cube is volumetric .

Metatron's Cube represents the four sides. The four sides of the cube represent the four elements that create the material world. And three cubes, nested one inside the other, denote the three levels of energies that make up the physical atom. This is its original meaning.

The image of Metatron's Cube denotes the creation of material physical reality from spiritual reality, through the influence of subtle beings and energies.

#446, 52:05

Kundalini

Etheric energy that was transmitted to people from the reptilian race. At the energetic level, kundalini is the etheric fuel for the astral-mental plane. With the correct formation of the energy structure, kundalini from the 2nd chakra should rise to the 4th, giving a feeling of spiritual Light. The accumulation of energy in the 2nd chakra, its excess there, will give the desire to drain energy through sex. Uncorrected kundalini energy in adulthood will manifest itself in the form of aggression in sex, including towards oneself, and dissatisfaction with a partner.

#134, 01:05:35

Curator (from the Latin curare – to take care, to lead)

An energy-informational entity, an intelligent spirit, embodied at any level of density or from the spiritual world, which leads its student (

contactee) to a specific goal, transferring energy and information. A person's curator can only be a creature from another world (not incarnated in third density on Earth).

#202, 31:45, #393, 28:45

Curators of egregor of Russia

Phantoms of Archangel Michael, phantom of Seraphim of Sarov (the last incarnation of Archangel Michael). And this is like him, but in a different guise, under the image of Seraphim of Sarov. Also supervised by Sergius of Radonezh and the Mother of God. All of them supervise precisely the political egregor (there is a religious one, and there is a political egregor, like the egregor of the people, a certain egregor of the people.

#466, 17:22

Khairan

Representatives of the planet Khayran , which is located in the constellation Sagittarius. They are similar in body structure to lizards. The scales are shiny and stand on end on the back like a comb. The flat head ends in a cone. They have deep-set eyes and a brown, onion-like head.

The Khairans contacted earthlings about 8,400 years ago, arriving on Earth. The city where they located their base was called Urartu in the local language. What does "starlight village" mean? It was not on the shores of the Persian Gulf, but in a mountainous area.

This is a reptilian race. Reptilians are very peaceful. They never fought with anyone, there were only a small number of wars on their planet. They were accepted into the Interstellar Union. Their representatives flew to the ancestors of the first kings and the first tribes , whose priests had already become the kings of the first Sumerians. Khairane was taught by the peoples who lived there before the Sumerians. They taught how to build cities, engage in medical activities, taught

astronomy and natural history. They also taught how to communicate with nature, increase the fertility of the earth, how to take care of your soul, how to observe moral laws.

#343, 14:52

Kshurdayer

Plasmoid (Earth, Kryon Group). Looks like it. like a four-sided cross and a circle in the middle. Reminds me of a snowflake with patterns. Spins like a wheel. The size of a thin-material body with a diameter of up to 200 m. It can shrink to the limits of the contactee's perception . Representative of the plasmoid civilization of the Earth's magnetosphere. 15th density level.

#387

L

Frankincense (cleansing and healing properties)

Incense and its aroma have energetic vibrations that create space, cleanse it of low vibrations and create an energetic environment that is difficult to bear for entities, including plasmoids and from the world of disembodied spirits. They are vibrationally incompatible. Also, the aroma of incense helps to activate the seventh energy center and get in touch with your Higher Self, believe in yourself, your Light, and cleanse yourself of negative blocks.

#257, 46:31

Laser

One of the types of light beam that allows you to receive other types of energy or produce some kind of work (heat, etc.). The concepts of "light" and "heat" are two types of energy.

#404 , 43:15

Lama Itigelov

A high-level spirit whose life is supported by the egregor into which believers invest their energy. The egregor supports this body. Lama is in the spiritual world. His connection, the thread of life force, with the body is severed. But the body is in a state of increased energy vibrations because he has been accumulating them in the body all his life. He spent the energy of his infinite Love on his spiritual development, and distributed some of it throughout the body with the help of special energy practices. Therefore, his body emits a special energy that stops all processes of decomposition into elements that are controlled by microorganisms under the guidance of plasmoid civilizations. They are not included in this process because it has a different energy.

Pandito Khambo Lama XII Dashi-Dorjo Itigelov

Beyond the levels of any worlds for incarnating entities, according to Itigelov himself. According to Lee Shioni, Itigelov's phantom corresponds to the 22nd, 23rd, and 24th spiritual levels. It's like an Angel.

On September 15, 1862, there was physical contact with the humanoid Harshori from the planet Disaru .

He was not even 15 years old when he entered the monastery. I didn't have time to start a family, because my whole life was devoted to the service and teachings of the Buddha and healing people. He performed rituals, treated and taught people, instructed them spiritually, talked about meditation, about the emptiness of the mind, so that nothing would linger in their thoughts, so that they would not become attached to anything

In total there were 1225 incarnations in the material worlds. There were 27 of them on Earth, but they alternated with incarnations in other worlds.

The purpose of the phenomenon of the incorruptibility of his body was to demonstrate at that time the universal materialism of consciousness, that the spirit is dominant over the body. Using this example, it was necessary to show that the spirit of an enlightened person, who carried the Light and continues to carry it now, controls the body even after his death, that is, after leaving for the Spiritual world.

#292, 24:14, #169, 01:00:00, #367

Lampshin

Shimora currency unit.

#26, 15:05

Laom Street

Representative of the planet Burkhad, is a specialist in establishing contacts with young races of space, works in the contacts commission, xenobiologist, xenopsychologist. is one of those on the contact committee who approves or disapproves of physical contacts, the installation of chips, and so on. He is one of those who controls the safety of contacts for both humanoids and earthlings.

#413, 00:21

Levitation

Temporary suppression of the Earth's gravity by a person's vital force, which is achieved by the ability to create a mental image of a yellow ray directed downward, with full faith that when this ray exits through the legs (in the imagination), the body will fly up. Doubts are unacceptable.

Gravity attracts the physical body with a certain force, and the vital force of a person, which is released by him every second of time, is stronger than the force with which the Earth attracts his body.

It does not surpass the entire gravity of the Earth, but precisely that part of the gravity that attracts his body. And in order for this superiority of your life force to rise above the Earth, you only need to direct it. To do this, you need to visualize how your life force pushes you away from the Earth. For this visualization to work, it is necessary to imagine it, and doubts that the result will be achieved dispel the vital force in space and do not allow it to push away from the Earth, that is, to shield the body from Earth’s gravity.

Controlling the Earth's gravity. You can do this. This is safer than teleportation, provided you have enough vitality and one hundred percent confidence that you will not just take off and not lose control in flight.

#76, 58:08 , #261, 12:41, #309, 01:48:35

Levites

Contactees of the planet Tumesout and Burhad in ancient Israel.

Hindu priests.

#28, 17:04, #62, 01:09:25

Ice Fire

Special energy that makes cell membranes absolutely immune to harmful microbes.

#392, 01:06:11

Lenin V.I.

The spirit that incarnated from the 18th level went to the fifth. Compared to the level from which I incarnated, this is truly hell. There is very little Light and very little happiness here. Dissatisfied with the results of his implementation. I realized that I had wasted my life. Reduced energy vibrations in a large number of people. When I fought for the revolution, I didn't think about it. The task of the incarnation was to develop its business to protect the violated rights of people, to defend their rights. It was a matter for the defense. He saw so much cruelty, humiliation and injustice. I realized that our fate is in our hands, not in the hands of some God. If people hide behind God and commit injustice, then it is his job to correct it. I wanted all people to live happily. They did not destroy each other, did not exploit each other. I even thought that if there is a God, and he failed, then he will take his place and do it.

In the Spiritual World he repeatedly met the spirit of Nicholas II.

During my life I was very sick and dizzy. Then he suffered paralysis, recovered, took baths, and received massages. After the death of his body, he united with his spirit, realized that he was immortal, realized that all this was because he hated a lot. The vessels of the brain could not withstand this energy of hatred. At first I didn't realize that I had destroyed my own body. The vessels ruptured.

A person who was aware that those who disagreed must be killed, shot, and when there were a lot of such people, what happened happened. And this did not serve to stabilize the society, the country, the government under which these people were born, but led to their destruction. The accumulation of aggression in people (even if against some category of the population, according to some idea) led to destruction.

#374, 56:18, #363

Time tape (line)

Probability lines. Forms of images perceived by the consciousness of the one who observes. The timeline is located on the border of the world of disembodied spirits and the border of the astral world from the side of the world of disembodied spirits. Using it, you can move back into the past and look at those events that have already happened, and forward, but then you find yourself in one of the branches of that reality that has not yet arrived. Information is recorded in images, in impulses of information that carry different frequencies and form different forms.

Even one person can influence the Timeline of all humanity, it all depends on the strength of his thoughts and personal energy. In fact, it is not a person who influences the world, but his ideas. Nothing can resist the power of an idea whose time has come. Who then determines which idea's time will come? Determines the readiness of humanity as a whole for a particular stage of development, psychological, spiritual, physical readiness.

The Timeline in the Spiritual World consists of seven heterogeneous regions. When the Earth in the physical world passes its way around the Sun and around the center of the Galaxy, then in the Spiritual world its space passes through seven inhomogeneities along the Time Ribbon. Each of them generates the arrival of souls on Earth from different planets, from different levels, which carry out their tasks. The arrival of each soul is not accidental.

The image of time in the material world, which is visible from the Spiritual world. It is seen in the form of a tape on which the events of the past, present and all options for the future are displayed.

The most probable sequence of events is visible as a wider flow of the Time Tape, the less probable – as a narrower flow.

The flow of time from the past to the future, which began from the

moment of the emergence of the material world and which will end after the end of the existence of the material world and the transition of all energies to the Spiritual world.

Tape of Mêbius

A symbol of eternity and infinity of the Universe, as the entire totality of material and spiritual energies.

#365, 19:30

Laziness

Lack of energy, vitality, which should be directed to one action or another. Occurs due to lack of motivation .

#234, 01:14:16

Leonardo da Vinci

The spirit, which, being embodied , was a universal contactor , that is, it could come into contact with any spiritual entity that came to it. He perceived this as contact with deities, Angels, God, with his own heart. Vinci was a believer and a creator at heart. He had synthetic thinking: he could combine knowledge from different fields and synthesize them.

He lived for many years and suffered from a dangerous disease, something like the plague. He survived thanks to his high consciousness. His spirit agreed with the Mentors to leave him in incarnation. Therefore, spiritual Guides and Angels healed him.

Leonardo da Vinci was a contactee from the age of 10.

He not only painted pictures, but also conducted scientific work and wrote poetry.

He had an unhappy family life. There were several women who did not love him. He parted with them.

Towards the end of his life he had students.

His character was far from simple. He came from an above average family. Not a count, but close to that title. I was brought up in this spirit. I didn’t let myself be humiliated.

He often gave new information to the people, which led to ridicule and criticism. It was very difficult for his proud, ambitious heart to tolerate this. He went through a good school of patience and love. After disincarnation, he went to the 20th level, and incarnated from the 15th.

#266, 00:21, #440, 00:21

Sopor

The astral journey of the spirit is only longer in time for the physical body to the world that suits it in terms of vibrations. And the first reason is that he, by his will, reduced the intensity of the attraction of the life thread into his body. The second reason is a change in the physical body in which the spirit cannot return, in the case of, for example, damage to the brain structures through which consciousness manifests itself. The spirit is in the astral state, on astral travel, but cannot connect with the body.

#173, 24:01

Jacob's Ladder

An image that is taken from biblical descriptions of Jacob's dream (in the dream there was contact with a highly spiritual entity). Jacob saw in a dream a ladder that connects earth and heaven. It was an image of the spiritual and material world being united.

#37, 12:35

Sopor

A process in which the astral body does not return to the body for various reasons. This could be damage to the body or a desire from the spirit itself (the Higher Self). In this case, there is no complete break in the life thread between the astral body and the physical, therefore physical death does not occur. All processes in the body slow down extremely, there may be problems with breathing and heartbeat , but in any case it does not stop completely.

#280, 49:37

Flying saucer

One of the common forms of alien spaceships. The shape of the plate is the most convenient for moving in the atmosphere, for creating a stable magnetic field, for a gravitational jump. Other shapes are also possible, for example, cylinder, pyramid, triangle. The form depends on the preferences of a particular civilization.

#144, 42:35

Therapeutic fasting

Stopping all energy-consuming processes in the body to save energy due to stress. Stress turns on the instinct of self-preservation, the process of checking the entire body to find and suppress inflammatory processes. A person's faith in this method is also of great importance.

#81, 28:41

Lilith

According to Interstellar Union sources , a plasmoid entity that came into contact with several representatives of the first male humans. She diverted the sexual energy of these men to herself in order to feed on it. It is, rather, a certain group of group-mind entities and various levels of density that contacted the first people. Subsequently, these plasmoids began to come to children, scare them, take their life force, and so on. This is a generalized name for parasitic plasmoid civilizations.

#178, 01:11:30

Limis (in the language of the Interstellar Union, specifically Daraal)

Reasonable spirit. For all intelligent beings, it is the same, no matter where they incarnate, including in humanoid and plasmoid worlds, that is, in all worlds, as well as for non-incarnated spirits in the Spiritual World.

The rational spirit is distinct from the animal soul, which is called Eromes in the Daraal language . The animal soul can only incarnate in the bodies of animals, insects, birds, reptiles and so on, that is, in non-intelligent beings, in bodies in which the central nervous system is not designed to manifest consciousness.

Limis differ in their level of spiritual development. There are limis that are from the first to the twenty -fourth level. Everything above twenty-four is still twenty- four for us .

#140, 18:34, #352, 50:35

Lymph

A type of biological fluid in the body that does not have red blood cells. The function of the lymphatic system is to transport nutrients throughout the body, remove unnecessary ballast substances and fight against foreign microorganisms that have entered the body.

Intercellular fluid necessary to supply cells with oxygen and nutrients. A fluid similar to blood, but it does not contain hemoglobin, so it is clear in color, like water. Lymph can be called the second blood of the body.

Lymph moves mainly due to gravity. Also in the lymphatic vessels there is a kind of valve, an area that can narrow, contract and push. The movement of lymph is also facilitated by body movement.

The speed of lymph movement depends on the amount of fluid in the body, on the normal functioning of the lymph nodes, and on general metabolism.

#81, 44:32, #432, 02:58, 13:07

Lymphatic vessels (their purpose)

Vessels that permeate the entire human body, starting first with small ones, somewhere between individual cells, then they branch and flow into larger ones. They run next to the blood vessels of arteries and veins.

Their purpose is to collect lymph throughout the body and transfer it to the lymph nodes. From the lymph nodes it again enters the lymphatic vessels, but of a larger diameter.

#432, 05:17

Lymph nodes (lymph nodes)

Blood cells responsible for immunity, in which the accumulation of blood elements, so-called lymphocytes, occurs.

They are designed to cleanse, filter the blood, sort substances and destroy pathogenic flora that has entered there from the organs, as well as to turn on and off immune reactions.

There are a lot of lymph nodes throughout the body. They are small and large.

#432, 05:17, 07:18

Lingam

A figurine depicting the male genital organ, a symbol of fertility. It is used in Shaivite religious practices; it is poured over with milk, which is then drunk. The meaning of the lingam is that it is a symbol of fertility for plasmoid civilizations, which give their energy through this symbol.

#202, 01:04:05

Linguistic-wave genetics

The term introduced by P.P. Garyaev. The theory that all molecules of our body emit sign fields, with the help of which they exchange information with each other, with the environment, with the cosmos. Our cell communicates with the entire body, with cells, using special waves of energy.

#344, 04:47, 11:22

Lines on the palms

Lines on the palms of the physical body, reflecting the astrological, numerological chart at the moment of birth and are needed to recognize them. It's like a stamp on your hand. It is done by the spirit itself, which contains information, including through the karmic, causal body, by influencing the etheric body in the area where the palms of

the hands are formed and is a characteristic of the spirit that it brought to the physical plane.

#234, 36:52

Lithotherapy

One of the subtypes of physiotherapy (nature treatment). Molecules of a crystal or stone emit energy of the first level (electromagnetic vibrations), the impact of which on the physical body suppresses or activates various processes.

#26, 50:18

Liturgy (about which text most corresponds to the texts of the first liturgy)

In the ancient Christian church, until about the 4th century, such importance was not attached to the written word that it was the law and that was all; more importance was attached to the Spirit. The first Christians until the 4th century, about 400 years, tried very hard to follow the words of the Apostle Paul: “Do not quench the Spirit.” They understood this, how to give freedom to the Holy Spirit to manifest itself in their Spirit in the form of inspiration, various verses, prayers, etc. For them, in any liturgy, in any other sacred text and appeal to God, there was a noticeable element of creativity. Therefore, in the ancient world, the ancient Christians, from the very beginning of the Eucharist, depending on the priest, no longer had the same text.

#239, 24:18, 42:11

Personality

An embodied part of the spirit whose memory is blocked. It consists of the memory of the current incarnation and conscious qualities of character that are formed throughout life, but their foundations are laid in childhood in the form of a worldview. They are assimilated along

with the language and the socio-cultural norms that exist in the family. It depends on the parents how the child's character from past incarnations will manifest itself, how negative and positive qualities will develop, whether they will strengthen or weaken .

#277, 01:03:23

Personal Quantum Transition

Part of the general Quantum Transition, accompanied by an increase in the vibrations of one's own body by increasing the vibrations of one's own spirit. The Personal Quantum Transition frees one from karma and a person himself becomes the master of his destiny, his physical body. He is no longer determined by negative karmic programs.

#358, 18:00

Lilies

Representative of the planet Shimor, a specialist in the astral world and its interactions with the material world. Incarnated from level 20.

#287, 16:39, #286, 46:41

Excess weight

The consequence of energy blocks due to fears, worries, problems. The spiritual reason is fears, reluctance to let go of something from your life in a psychological sense. Fear of losing something, not even material. Restructuring the body to accumulate material elements.

#189, 01:47, 07:35

Lobsang Rampa

A curator from the Spiritual World who came to the writer Cyril Henry Hosking, an Englishman. It was one of his curators. Lobsang Rampa himself, a Tibetan monk, by that time his physical body had died, he was already disembodied . Cyril Henry Hoskin identified himself completely with the name of Lobsang Rampa, whose story he told.

#286, 01:27, 02:19

Logic

The process of processing information with unfolding and connecting it .

#345, 30:12

Local Universe

The Universe, manifested in a given time and in a given place in space, which can be explored by instruments or known by the mind.

#105, 19:39

Lie

Not a complete absence of truth, but its distortion. Truth, true knowledge, true wisdom is distorted by those emotional energy blocks that prevent it from being accepted in the Light of God. Therefore, a person begins to see lies in the world, lies in himself, and reacts with lies. Lies are one of the most important reasons for any negative manifestations of intelligent entities. Lies are the opposite of truth, just as hatred is the opposite of love. As soon as the lie disappears and the truth becomes available to a person, love also becomes available to him, because truth and love are one.

#266, 03:17, #298, 00:59

Loch Ness monster

A creature that is not specifically related to dinosaurs. Initially, people could see some kind of large fish, for example, frightening someone. And then it all became overgrown with legends and people began to see plasmoids, for example, which are spirits of the same water and can take on different forms. And in front of a person who was expecting to see something, it is easier for them to appear in that image, since he is already tuned to the vibrations that they need. The Eslerites did not conduct research on this particular lake, but according to the information that the MS has, no prehistoric animals live in the lake.

#46, 30:47

Moon

A body that was originally a planet in the solar system between Mars and Earth. After the Selbet people used weapons during the war 12,000 years ago, the Earth changed its trajectory and began to move away from the Sun, it pulled the Moon with its gravity, as a result of which the Moon almost fell to the Earth. The Burkhadians were able to stop the Moon from falling to the Earth and stabilize its orbit, otherwise, as a result of such a collision with the Moon, the Earth could have completely died, splitting into pieces. Even before the war, there were bases of Burkhadians and other civilizations on the Moon, since it was the closest planet to Earth. The moon is a symbol of mother, family, and femininity.

18:23, 20:50, #59, 14:25, #80, 51:47, #353, 27:47, #182, 02:12:15, #185, 56:17

Sleepwalking

This is a state of a person in which, when the astral body leaves the physical body during sleep, the physical body does not become

immobilized, and it does not experience sleep paralysis from the action of sleep hormones secreted in the pineal and pituitary glands. Because these hormones are not released and sleep paralysis does not occur, the physical body either partially moves or gets up without the astral body and repeats the movements of this body, which acts in its dream in the astral world.

#83, 15:33

Moon base

One large base for 18 civilizations, which exists under the surface of the Moon and belongs to the Interstellar Union. There are several of its sections in other places on the Moon under its soil.

#22, 43:44

Ray of the Chohan of Freedom

A term that describes our movement towards freedom from all prejudices and negative phenomena, primarily in our own soul.

#253, 04:55

Rays of truth

Electromagnetic radiation that suppresses those parts of the brain through which a person can invent something or lie. This is a form of control, but it was created not for control, but for finding out the truth in the investigation of crimes in the Interstellar Union.

Electromagnetic radiation that suppresses those parts of the brain through which a person can invent something or lie.

#391, 38:16

The best protection against negative entities

Full confidence in divine protection, in yourself as a part of God. Believing that you are on the right path of development. The absence of doubts, fears, negative emotions and feelings - anger, envy, aggression, resentment and other destructive emotions that are formed as a result of negative mental attitudes in the field of the person himself. The main protection is complete trust in God and high vibrations of love.

#223, 04:22, 08:52

Love

The highest divine energy, divine power and feeling, at the same time, which supports all Truth, Light in this world, all existence and makes people god-like beings, because it is the highest and purest energy of God.

State of mind. Exchange of energies of all types: physical, mental, astral with your loved one. True love is completely devoid of a sense of possessiveness, a sense of belonging to each other. Eternal true love is the one that becomes the threshold to eternal happiness and raising one's vibrations after leaving incarnation. It has the property of unconditionality. Unconditionality, eternity and the absence of a sense of belonging of a loved one to oneself, as one's own part, without having one's own individual traits. Accepting a person as he is.

The main manifestation of Love in the material world is creative activity aimed at improving the world.

For everyone who incarnates in the material world, the primary task is to develop Love in themselves.

You can develop it in yourself in various ways. Through overcoming

instinctive principles within oneself, but not as overcoming, but as harmonization and control of them. Or through creative activity, enhanced by the capabilities of civilizations that are part of the Interstellar Union.

A person who is filled with Love will not be able to keep a lot of money, even if he has it, for the reason that true Love, having money, will begin to spend it in order to help others, without thinking about himself.

Love cannot be revealed without its practical implementation in favor of those people who are close to you.

You need to understand that those people who are directly next to you, that is, your loved ones (in this case), are your best teachers of Love. You can train on them. How to do this in order to love them with active , practical, unconditional love.

It is often called sacrificial, because if it is unconditional, it does not require anything in return. And this is to some extent a sacrifice: of your energy, of your time. But only such actions can develop unconditional Love and raise your vibrations.

#33, 19:25, #42, 20:44, #51, 01:04:21, #91, 20:22, #97 , 05:13, #214, 00:21, #266, 29:25, #315, 02:10, #409, 57:04, #429, 07:07, 10:00, #475, 01:07, 03:58

God's Love

God's unconditional love for man. Even if in the eyes of God you look like his child, who went into low vibrations and did not follow the path that God wants, you have the right to this, because you are free. God wants happiness for everyone, but you have the right to take a different path. And even if you chose this path and followed it, you do not become less loved, and all the blessings in the material world that were created by God are available to such a person as well as to a saint. God respects freedom of choice to such an extent that when he gives birth to a spirit, he already sees all of his past, present and future, all of his choices, wherever he incarnates, no matter how he

lowers his vibrations. Even if he kills the bodies of his other children, he sees all this even at the birth of the spirit and still allows it to be born, because he loves this spirit in any of its manifestations, even the one that destroys the bodies of other spirits, so how without the possibility of this destruction the freedom of choice of the spirit will be taken away.

This is the highest Divine energy, the highest Divine power (and feeling at the same time), supports all life, all truth and Light in this world. And it supports the existence of all of us, makes us godlike, because this is the highest, purest energy of God.

#181, 16:14, #475, 00:25

Self love

Love that is always connected with the love of God. Full understanding that you are not separated from God, that you are part of Him, and He loves you. Admitting your imperfections. Lack of pride and arrogance and at the same time self-abasement, despondency, excessive self-criticism. Understanding that you are neither superior nor inferior, but equal. You are Divine perfection. You are the Light. Respect for yourself as an individual and for the personality of others. The right to your beliefs, your life, your desires, respect for the same rights of others.

#19, 01:02:10, #128, 08:11

Parental love

Love, which is expressed in the ordinary life of a person in such a way that those around him, including parents (especially parents), when raising a child, treat him with love and understanding in the sense that they accept him for who he is. They do not insist on their opinion if the child does not want it and do not suppress the personality.

#475, 05:31

People

Representatives of the anthropomorphic race, that is, humanoid. Humanoids.

#91, 09:55

Indigo people

High vibrational spirits from different worlds and dimensions. Their aura is dominated by indigo-colored energy flows. Due to the large number of low vibrational spirits on Earth, high vibrational angelic spirits are consciously incarnating on Earth to raise the overall spiritual level and to help build a society where low vibrational spirits are either blocked or given the opportunity for personal development.

#27, 06:37

Lucifer

An angel of the 24th level, after incarnations on the planet Selbet , who lowered his vibrations to the 6th level, becoming a demon. Tried to poison our ancestors with fruits from the Haroul tree . He never incarnated in the material world again. Believes that, due to the law of cause and effect, God's love limits his and our freedom as independent individuals when the evil committed returns in another form.

He is the Archon, the prince of demons, the owner of demons. Considers the manifestation of low vibrational emotions to be as correct as the manifestation of high vibrational ones . Now it controls one of the sectors of the Galaxy “Andromeda Nebula”. Lucifer, although he left God voluntarily, still remained his son. And, naturally, his existence and his entire army of demons is supported by the energy of God. And the energy that he uses, including for evil purposes, is also given by God. Lucifer was in our cycle of existence that we are going through now. He was the first to choose evil while at such a high level.

#165, 30:54, 33:53, #36, 06:07, #178, 20:55, 34:17, 35:52, 53:43, #47, 33:37, 35:49

Lucifer, Iblis

The image of the spirit that in Christianity is depicted as Lucifer. This is a real spiritual personality. This spirit is not the only one who calls itself by the name Lucifer. There are many other spirits, many entities that also call themselves that. Moreover, this word (means) – Bringer of Light.

At first he was very high - 24th spiritual level. He was equal with God. In one of his incarnations on the planet Selbet, from the 24th level, he dropped in his vibrations to the 18th. Then, from the 18th level, he incarnated again on the planet Selbet . And he participated in the creation of people, this Lucifer or Iblis.

When he was in the body of a Selbet man, he participated and was the initiator of an attempt to kill people. Since he hated the children of God, it means that he hated God himself. He hated God so much that from level 18 he dropped directly to level 6 in one incarnation. When he was incarnated among the Selbet people, he really believed that they were inferior to him, because they were made from earthly animals, and he considered himself a higher divine being. Fire means Light. That is, he is like Light. He believed that if he despised them, he would remain the same Light. He believed that contempt, pride, and hatred could not defeat the Light, even if he experienced these emotions. This was his mistake, his sin. And even when this Selbet man, in whom Iblis or Lucifer was embodied, was sent to the planet of criminals, even there he did not realize the reason for this sin. He did not repent, did not return to God. He remained at this 6th level until leaving the incarnation. Moreover, he still remains at level 6. According to the Interstellar Union, he did not go into incarnation again, although he has every right to do so, but only at his own request.

#259

Larvy

Negatively charged images whose sole purpose is to fulfill the desire of the person who created them. But they also need vital energy to maintain their existence.

37, 44:23

M

Maggie

People who conduct magical practices, rituals, conspiracies, various internal shamanic practices, and so on. Most often, magicians work with plasmoid civilizations, since this is an influence on nature, on the elements of nature, and various kinds of astral energies. This can be the spiritual world, as well as plasmoid civilizations of very different levels of density, low-vibration and high-vibration, depending on the soul of the magician himself.

#165, 01:06:03

Magic

Conscious interaction: contacts, various alliances to perform certain tasks in the material world with plasmoid worlds, with those called nature spirits. A system of magical rituals aimed at unconsciously causing results. Similar rituals existed in polytheistic religions and remain now in the form of esotericism. Unexplored laws of the astral world.

#140, 27:43, #12, 00:00

Magnetic energy

Radiation created by the magnetic energy of a particular cluster of atoms (strictly individual for each celestial body, for each star and planet), from which, for example, flying ships can be repelled and

attracted. It is also one of the types of energies of the first level, which is found in different quantities in all chemical elements. The interaction of energies with each other creates various magnetic fields.

#110, 28:03

Magnetic field of galaxies

The totality of magnetic fields and all its largest stars. Each galaxy, like a collection of stars and planets, has its own magnetic field, which, like segments, includes the magnetic fields of the named objects.

#17, 11:38

Magnetic fields

Magnetic lines, energy flows. The magnetic field (earthly instruments cannot detect it in full, only part of it is shown) is inhomogeneous. It has different tensions , different lines. You can calculate the influence of magnetic fields, depending on the magnetic charge of the body. Every person has magnetic material. For example, every red blood cell contains an iron atom. Iron is a magnetic material. Every atom has an open magnetic field. In total, an adult has about six to seven (or even more) grams of iron, which is found throughout the body. Therefore, different lines of magnetic fields have different effects on the movement of these red blood cells, which results in a person’s well-being. That is why many noticed that they were more comfortable on the surface of the Earth than, for example, on a high floor. Perhaps not everyone noticed, but sensitive people may notice that they need to walk on the ground. When you walk on the earth, energy rises from the Earth, and with height it falls. If you don't walk, there will be a lack of magnetic field, a deficiency.

One of the types of energy of the first level, inherent in the atoms of any substance. The magnetic field is generated by each particle and can exist in the atom itself or extend beyond its boundaries into space.

#17, 02:09, #437, 33:31

Magnetic resonance equipment

Equipment in which a person is placed in a special magnetic field with a certain vibration. It begins to restore all the functions and organs of a person, and they begin to interact correctly with each other, work correctly and secrete chemical elements correctly.

#225, 19:42

Magnetic pole

A dynamic system, the result of the influence of the magnetosphere on the Earth's core and on its surface layers of the atmosphere. It can fluctuate and move.

#148, 08:34

Magnetocaloric effect

The effect that arises from the impact of magnetic energy on atoms and causes an acceleration of their internal vibrations, thereby generating heat. The object increases its temperature and this is the energy of the first level, which is released into the external environment. Thermal energy. The magnetic field replaces the energy, and free thermal energy begins to be released.

#17, 01:11:54

Maitreya

A spiritual personality who incarnates in various worlds and helps this world move to a higher level of spiritual development.

#37, 12:35

Macrogravity

That which allows the laws of kinematics, mechanics, and dynamics to manifest themselves in our world. Everything that is called the force of movement, attraction, centrifugal force is a manifestation of macrogravity . This allows all planets, stars, galaxies and the smallest speck of dust in the universe to have their own speed, trajectory, orbit. Not to scatter in chaos, but to move according to certain laws.

#17, 14:51, #79, 13:16, #146, 17:06, #322, 05:29, #434, 39:49

Manvantara

The cycle of unfolding and collapsing of the material part of the Universe. Those particles that are in the material world will lose their density, that is, the atoms will begin to increase their vibrations so that the energies entering them will turn into the energy of radiation of electromagnetic waves, radiation, gamma radiation, and so on, until they turn into subtle material worlds. Then these subtle-material structures, the energies that make up these subtle-material worlds, will further increase their vibrations in terms of density until they move into the Spiritual world. Not a single atom will disappear, it will turn first into radiation, then into a wave of subtle energy, and then into a stream of spiritual Light, from which it originally arose. In fact, matter is still spiritual Light, but it is simply in dense form. It can lose its dense form and acquire it again.

Part of the Pralaya cycle. Part of the cycle of manifestation, non-manifestation of the Universe, the Universe. In the Spiritual world, the word Cosmos and Universe refers to all material worlds. In this manvantara there are 59 levels of density and all of them are included in the concept of the Universe or the material world. Manvantara first expands , and then the process of compression begins. Each manvantara may have a different number of density levels. There may be a different number of Earth years (a year is one revolution around the Sun), different durations of periods of existence, both individual

galaxies and the entire Universe as a whole.

#202, 51:45, #450, 22:45

Manichaeism

The division of the world into good and evil forces, which cannot defeat each other, want each other to suffer. It was born as a protest of plasmoid civilizations against God for His creation of a dense material world.

#192, 24:12

Mantra

A verbal formula that cleanses the mind of passions and vices, cleanses the heart of harmful desires, and helps to connect with your spirit.

A form of addressing God, communicating with Him through sound vibrations. The means of communication given by Krishna, connecting with his energy, just as the prayer given by Christ to his disciples, connecting with the energy of Christ. Faith provides the energy for such a connection.

Any mantra, any prayer in any language has its own energy component. This energy component consists of sound waves that propagate in space, in the air, and the sound wave is perceived as vibrations of the atoms of the substance that makes up the gas in the air. Then it moves to a subtle material level, but this sound energy is always charged with the feelings, emotions and thoughts of the person pronouncing it.

If you read it with faith, with love, then it will have a light power, if you read it just like that, then it is just a sound that will dissipate, like just the sound of, for example, a bell, which has no meaning. Therefore, the Apostle Paul said such words that without love I am “a ringing

brass or a sounding cymbal," that is, a sound that is lost without benefit.

#105, 44:49, #118, 33:22, #309, 01:09:55, #446, 53:55

Voynich's manuscript

A medieval book that was written by contactees with plasmoid civilizations, the spiritual world, and humanoid civilizations. But the contact information there was transmitted in a code that was known to its creators. This book was written not by one author, but by several. Moreover, there are also several ciphers. The information was about various plants, entities, levels of plasmoid worlds, the spiritual world - about everything that the curators gave. At the time of its creation, there was still a strong influence of the Inquisition and, in order to avoid the danger of this text being read by those people who could persecute these contactees , it was decided to encrypt this knowledge.

#199, 01:13:04

Marduk

Supreme deity of the Babylonians. It was believed that Marduk resided in the main temple of Babylon, Esagila, next to which was the famous ziggurat of Etemenanki, the prototype of the legendary Tower of Babel. The parents of Marduk himself, according to myths, were the god Ea (Sumerian Enki) and the goddess Damkina (Sumerian Damgalguna).

Initially, this was the name of a person, one of the Tumesoutians , who participated in the war with the reptilians 12 thousand years ago. He cleared the Solar System of them, protected the planet Mars, and took part in the rescue operation of some earthlings. A few years later, he transported these earthlings from a base on the Moon back to Earth, when the consequences of the disaster ended: the Earth was cleared of radiation, volcanic eruptions were stopped, the atmosphere was cleared, and so on.

Later, he flew on a ship to the builders of the first cities and taught

them. They called him Myrtux. At that time he was about four and a half thousand years old. He lived for about six thousand more years.

From time to time this Tumesoutian flew to Earth and to other planets. He was a specialist in the integration of non-sentient life forms, that is, animal life forms that had recently evolved into sentient beings, into which sentient spirits had recently incarnated.

He was a specialist in integrating these newly created civilizations into the environment, and was a sociologist-educator, that is, one who educates young races. And also in the military, fought, defended. Later he was deified by many peoples. Somewhere he was known as Thoth, somewhere as Marduk. It has had many names in different cultures. Then the word “Marduk” began to be used to refer to plasmoids and military leaders. People knew that Marduk fought. There are five known beings who were called Marduk, that is, “Great God.” This name was also given to some low-vibration plasmoids.

#238, 21:55, #343, 42:17

Maria Devi Christos

Contactor. A person who had contact with Christ and His mother. But when she contacted Him, at first she correctly transmitted information and energy, and then she became proud that people were glorifying her. What does it mean to be proud? She forgot that there is a source of all the good that came to her. She began to treat people arrogantly, get irritated with them, and take offense when they criticized her. And because of this, I lowered my vibrations. Christ, naturally, as with any person who falls into low vibrations, continued to contact. Maria did not want to continue communication, especially since then those plasmoid civilizations came to her and introduced themselves as Christ, so that she could create some organization with the help of which she could instill fear, for example, with the imminent end of the World and receive certain energies.

#439, 42:53

Mary Magdalene

A spirit incarnated in the body of a woman who was born in northern Israel and subsequently became part of a group of people who danced for someone as a dancer. She earned more through a sinful lifestyle. She came into contact with men and at the same time took up dancing. She was healed by Jesus from seven demons. Christ gave her the ability to see her soul and purify it, to cultivate the Kingdom of Heaven within herself. She didn't write memoirs. She had two daughters. She died a natural death due to heart disease, which was caused by worries about her husband, who was imprisoned for preaching Christ.

There were no more known incarnations. The current incarnation is known only to some people.

#400

Mars

The planet, which the inhabitants of Mars themselves called Eltorar, which means “perfect world,” that is, a world that has no excess, ideal.

There was a climate reminiscent of the modern earthly one, there was a change of seasons. Unlike Venus and Earth, there was a cold season when snow fell in temperate latitudes and at the poles. The climate was basically similar to that of Earth, but it was a little colder, but not the same as it is now. Approximately resembled the Earth during the so-called Ice Age. There were wide zones of temperate climate, wider than on Earth. And there was a narrow tropical belt around the equator. However, there was liquid water, there was precipitation, winds, snow, and, accordingly, there were bodies of water that froze, as happens on Earth.

Due to the fact that there is less gravity on Mars than on Earth, its atmosphere was initially more rarefied. But before people settled, it was saturated with ozone, which creates a screen both from the

radiation of the Sun and from the loss of the atmosphere. Restraining factor. Plus, carbon dioxide was added, which helped warm the planet and created an additional greenhouse effect, which in that case was beneficial. The average temperature of the planet has increased. The jungle was not the kind of jungle that grows in tropical latitudes, but forests with intertwining vines. They grew in a temperate climate and shed their leaves for the winter, that is, they are similar to terrestrial forms.

The length of day and night was around twenty-five and a half hours, which was a day, and about two years, minus two months, was the length of a year. Mars then had a different rotation speed.

#426

Masons

A secret organization created for the purpose of attempting to secretly control all economic and political matters on Earth. Initially, Freemasonry was created as a monastic-knightly order. Now there are people who are really only masking themselves with religious ideas. Among them there are many people who do not believe in anything, a lot of cynicism and hypocrisy.

#11, 00:03, 01:58, 03:29, #32, 16:50

Weight

The number of gravitons in the atoms of the body.

#146, 17:06

Master Kuthumi

A currently disembodied spirit. He is an Angel, his last life was

incarnated on Esler , where MidgasCaus now lives. Master Kuthumi comes to contact and is the guardian of egregors on the planet where he last incarnated. On Earth, he is in contact in alliance with the Eslerites and Shimorians, with similar civilizations. He is their patron.

#169, 58:56

Materialization

Creation of certain objects, a certain shape, density, mass, physical parameters, chemical parameters from the energy of subtle civilizations. They provide energy for this. A person puts in his energy, and they condense it , collect it.

Moving through walls. Disappearing in one place and appearing in another.

#258, 01:03, #309, 01:48:35, #310, 01:48:35

Materialism

Worldview, when the embodied spirit lives largely in the interests of satisfying the instincts of its body and tunes the vibrations of its spirit to the vibrations of its body completely. And for him the perception changes in the sense that he, even as a spirit, begins to consider himself a product of matter. Many people do not want to hear about spirituality because they have not yet gone through the path of materialism. They must learn that matter itself has no spiritual meaning, that is, it is finite. It breaks down into its constituent elements, which become elements for other bodies. One of the tasks of incarnation is to get rid of materialistic perception.

#181, 33:34, #33, 01:55

Material reality

What you see in the outside world: objects, people. Material reality comes from spiritual reality, gradually unfolding through the density levels of subtle reality.

#180, 10:30

Material vibrations

Various electromagnetic waves, Schumann waves, light, sound, radiation. On Earth they are measured with instruments based on the resonance effect.

#92, 06:07

Material world

A world that does not constitute the whole of reality, but one of the infinitesimal facets of the real reality of the spiritual world. If an embodied spirit lives by the interests of its body, its flesh, from an esoteric point of view, by the work of the three lower energy centers, then for it the material world becomes completely real, and the spiritual world, unfortunately, an illusion.

The material world consists of 59 levels of density. The Divine Light, or rather, one of His waves begins to lower its vibrations according to His will, and first the 56th level of the subtle-material world is obtained, then the 55th, and so on, until the entire subtle-material world, which consists of 56 levels of density, unfolds . There are no atoms there yet, there are no molecules, etc., there are only energies there, but in those worlds we can already incarnate, live our lives, gain our experience.

The material world was created so that we can, depending on our level, either develop, that is, develop Divine qualities in ourselves (love, courage, kindness, generosity, and so on), or manifest in this material world the already accumulated qualities in ourselves in other Worlds. In Worlds with more subtle bodies than ours, the physical.

#64, 07:00, #289, 07:20

Material carrier of the magnetic field

Any atom of any substance.

#17, 02:56

Material particles

Atoms, particles, quanta, etc., representing divine energy in different vibrations.

#30, 19:31

Matter

Everything that is included in matter, that is, everything that consists of atoms. Simply put, everything that is included in the periodic table. Divided into dense and thin matter. A substance that has the property of variability through a function of time. The ability of matter to change its properties makes it possible for the intelligent spirit to change through the manifestation of itself in the material world. Matter is the material for creation. So that God's children, His little parts, can become like Him. For this purpose, He gave people matter so that they could incarnate in it and use it to create their worlds. Some people build with bricks, others with molecules.

#16, 07:14, #33, 25:13, #202, 19:35, #344, 39:20

Mother (Mother) of the world

A concept that includes the definition of several entities and intelligent spirits. For example, the spirit that was embodied in the Mother of God (Virgin Mary), she also calls herself the Mother of the entire Universe.

Saraswati, the entity that is now embodied in the world of the 38th density level, in the approximate projection of the center of the Milky Way Galaxy, also calls herself the Mother of the world.

#202, 23:10

Royal jelly

A product containing substances that are produced to feed the queen and her larvae. It comes in two types: for ordinary larvae and for queen larvae. What is for the uterine larvae can be several tens of times higher in hormone content. Royal jelly contains a lot of female hormones. It can be used to stimulate metabolism, immunity, and nerve cell regeneration. For women and men it can be used as a genital stimulant for reproductive processes. It enhances reproductive ability, conception, sexual desire, pleasure and all experiences during sexual intercourse. It is advisable, of course, not to swallow it, but to keep it in your mouth under your tongue. There are many blood vessels into which all substances are absorbed, and gastric juice destroys them. It can be diluted with honey , as it has a rather specific and unpleasant taste for many. The usual dosage is 30 g per day, 5-10 g before meals. Can be placed under the tongue until completely absorbed.

#255, 35:32, 37:11

Matrix Goddess

Energy information matrix, which is intended specifically for earthlings. In order for everyone to have the opportunity, through the matrix built into the aura of a person, namely a person (with his number of chakras, with his energy structure, with genetics characteristic of earthlings) to connect at a distance to the noosphere of this planet and send questions there, receive answers, strengthen their energetic and mental capabilities. It strengthens the spiritual channel for communication with the non-embodied part of the spirit, which every humanoid, plasmoid has (it’s just present in different percentages).

#370, 35:41

Garyaev matrices

Information, sound, wave matrices, replicas; information from substances of natural origin, as well as from children's photographs in which the child is healthy and happy. Any object, any photograph, any substance contains information on the etheric level about this substance or about this person. There is a device called an “ethereal wave reader,” that is, an ethereal converter. He does this with the help of a beam of light, a certain wave and a certain intensity of glow. The beam does not just run across the surface of this object, it does not stand still. He makes moves. But these movements are only chaotic at first glance; they repeat the outlines of the ethereal matrix of this object. If we are talking about artificial substances, the same drugs, for example, then any drug has an energy component in which the effect of this substance is recorded. Photography contains energy. When a person is photographed, his image contains information about his vital energy at the moment when he was photographed.

#344, 01:08:26, 01:19:20, 01:27:43, 01:31:49, 01:34:56, 01:37:29

Maha - Mantra

A verbal formula for communication, contact of a person’s spirit with the spirit of Krishna, wherever he is, cleansing the mind from passions and vices, cleansing the heart from harmful desires, helping to unite with one’s spirit.

"Maha" means "Great".

Every word “Ha-re” is not accidental. The syllable means "Eternal Spirit", not in Sanskrit, but in an older language. "The soul is eternal."

One who chants "Hare Krishna" acknowledges that his soul is as eternal as Krishna, that they are one. If you say this constantly, you can say it mentally, then there will be no room in the mind for thoughts leading to a materialistic understanding of the world and base material

desires that lower vibrations.

This is strengthening in the Light, strengthening willpower.

#309, 01:09:55, #310, 01:09:55

Time Machine

Technology for moving a humanoid through time, which does not exist even in the Interstellar Union. So far there has been only some success in moving objects. In order to move a living person into the past, his body must be converted into wave form and moved back in the course of time. The only way to get into the past without a physical body is astral travel, in which you cannot influence what is happening, but can only observe from the outside, like a spirit.

#59, 45:05

Alien medicine

Preventive medicine. Cells are already programmed at the genetic level to resist one or another microflora, and DNA also changes. They can change individual areas themselves, upon conception. When a child is born, any pathogenic microbe that gets to him will be neutralized during the first 10 cell divisions. It is simply recognized by tissue macrophages themselves. The immune system will also protect. This will be an analogue of vaccination, only not with a vaccine, but at the genetic level and against everything at once. At the genetic level, DNA is now being changed. Also, each child is injected into the bloodstream, when he is born, with a solution that contains a suspension of nanochips. They are invisible to the eye, they are like little robots. They are distributed throughout all organs and tissues, throughout all vessels and observed. For example, they have the function of recognizing the composition of the blood where they are located. They can recognize, for example, the contamination of a vessel and clean it: emit certain impulses, and there will no longer be any congestion in it, there will be no blood clot. The penetration of

microbes can also be recognized by these chips, and a colony of leukocyte analogues will be sent there by special signals.

There are devices that can treat a person who is sick with something other than germs. If a humanoid is injured, or its immunity is weakened by some harmful factor, then the natural immune defense may also decrease, and ordinary microbes, which are harmless to everyone, may penetrate. To treat such disorders or poisoning (maybe you ate something on another planet), there are energy installations that change the frequencies of organs and reconfigure them. They can work not only with physical bodies, but even at a distance, for example, with astral bodies, directing certain energies. Each organ has its own frequency and models a special field. The vibrations increase, but they are in resonance with the organ. You can come in the mental body, in the astral body and enter this apparatus in order to receive harmonization and healing of the subtle bodies. Then return to the physical body and transfer this energy there. And let all organs be harmonized .

#316, 43:52

Medical hypnosis

Creating a certain image so that a person believes in it and heals himself. Earthlings, in official medicine, use it only as an auxiliary remedy. But it can be made the main one, especially when finding out the spiritual cause of diseases and providing a little support with medications during the acute period of the disease.

#397, 28:08

Intergalactic vacuum

A vacuum in the space between galaxies, where the emptiness is more complete than between stars within a galaxy. The chances of encountering solid matter there in the form of a comet or meteorite are approaching zero.

#141, 14:18

Intergalactic liner

A spaceship for moving between Galaxies. Powered by a special engine that uses free vacuum energy.

#141, 14:18

Intergalactic Medical Service

Special squads of astral travelers from humanoid worlds and special squads of plasmoids who visit the Earth in their subtle bodies to help the embodied spirits on it in the third level of density harmonize themselves with space, time and their body.

#257, 07

Interstellar Union

The main body regulating relations between the civilizations of the Milky Way Galaxy, which, according to established tradition, includes only civilizations of the humanoid type. It includes 116 civilizations out of 727 existing in the Milky Way Galaxy. The capital of the MC is located in the Cygnus Constellation and has existed for more than 15 million years. There is no single ruler in the MC, there is a chairman of the Interstellar Union, it changes depending on the purpose of the MC . There are currently 117 civilizations there, that is, 117 planets, not counting colonies, counting only the central planets that have colonies, but for each colony, for its view, policy in the Interstellar Union, its mother planet is responsible. Not every one of the 117 planets has decentralized power, where everyone has a say in some matters. On Burkhad , Daraal and Tumesout there is a single ruler, but he has a Council.

In the Interstellar Union there is liberalism in opinions, in religious views, there is no habit, custom of arguing with each other or

somehow convincing each other. Everyone is an individual who freely expresses their opinion. Even if they contradict each other. There is no prohibition on contact with someone; it is considered a personal matter of the humanoid. If he follows the path of destruction, psychological spiritual destruction, one can only suggest how to get out of this state, but only if there is a request for this.

It is not customary to force one to be good as long as certain certain laws of the Interstellar Union related to actions are not violated . There are no forbidden thoughts or forbidden ideologies in society. As long as a person follows the laws of the Interstellar Union, he can freely profess any faith, any ideology and adhere to them. This is personal, like freedom of conscience.

#5, 04:33, #144, 01:07, #235, 49:48, #250, 29:25, #272, 12:11, #391, 10:19

Interstellar Union (impact on humanity, their goal)

The creation on Earth of an intelligent civilization, which over time will become their employee, will then join the Interstellar Union and then, together with it, on equal rights as cosmic employees, will begin to explore the Universe.

#414, 05:55

Interdimensional energy

One of the types of subtle ethereal energy, which consists of energies of two levels.

Macro level – cubes or crystals in which part of the plasmoid worlds exists.

Micro level - microstructures on which intermolecular lattices are built in different substances.

The energy and physical properties of the substance itself depend on the type of these bonds and on the arrangement of molecules and atoms in space.

#141, 24:26, 30:32, 48:11

Meiosis (reduction division)

Division of the nucleus of a eukaryotic cell with a halving of the number of chromosomes. It happens in two stages. As a result of meiosis, gametes, spores and other germ cells are formed.

#246, 34:51

Melanin

A hormone that does not exist in the singular; there are many types. It is mainly produced by the pineal gland and pineal gland. According to the knowledge of the Interstellar Union, there are 6 types of melanin. The main function of melanin is to desynchronize the astral and physical bodies so that they can disconnect and connect back, regulating emotional processes. When the spirit experiences any emotions, certain hormones are produced in it. And in order to metabolize these hormones so that they are removed from the cells, it is necessary to release dopamine, melanin and other substances. Earth doctors use huge dosages of melanin to treat sleep deficiency syndrome. In an acidic gastric environment, melanin, like any protein, will be decomposed into amino acids. And, naturally, it can be administered through the lining of the oral cavity, in injections. The melanin that is artificially created in factories penetrates the blood-brain barrier by a few percent. And it does not have the same effect as the natural one produced by the brain itself. Because melanin, in its molecular structure and the architectonics of its molecular connections with other hormones, is completely unique to the body of the person where it is created.

#345, 19:10

Melchizedek

A very high level spiritual personality, King Salima. Incarnated into Abraham, then into Moses. Then, later, in Jesus.

#243, 08:56

Mental

The highest astral, because he is closer to the world of disembodied spirits.

#180, 49:20

Mental reality

Also reality. Your dream is a mental reality. For mental reality to become material reality, do everything that depends on you to embody this reality, but at the same time trust your Mentors, God, and yourself. If it is useful for your spiritual development, for your life, for your happiness and love, then it will definitely come into your life. It's important to believe in this. When you believe in the favorable success of a business, you increase the likelihood of its implementation by 80%. Believe in yourself and in your Light of love. Trust in space, God, the world around us.

#287, 30:05

Mental field

The third level of the aura of an earthly person, containing information from the intellectual and logical structures of consciousness.

#14, 03:10

Mental dialogue

Conscious dialogue, mental.

#191, 01:01:55

Meridian

Crossing the channels of the etheric body. There are 366 channels, chakras, in the human body.

#112, 13:20

Merkaba

A system of energy healing for restoring all structures of a person's energy field and establishing the probabilistic lines of his life on a path of development that is more positive in terms of vibrations for him. It affects the spiritual world of a person, the connection with his Mentors from the spiritual world. The system originates from contacts with representatives of the planet Burhad; this is their energy system. It is similar to cosmoenergetics, but its goals and objectives are different.

#83, 31:32

Mercury

A planet with a white Sun, which is five times larger than that of Earth, and a dark purple sky. Around the Sun there appear to be tongues of flame and spots on it that move slowly, as if the wind is blowing them away, and they are of irregular shape.

The sunny side of Mercury experiences high temperatures, around 500 degrees, while on the night side the temperature drops very low. There

are very long days and long nights. A year on Mercury is about three Earth months because it rotates very quickly around the Sun. In craters, in depressions and pits, there are even places where dry ice made of carbon dioxide lies, there are depressions where it does not melt even on the sunny side, the sun’s rays simply do not penetrate there. There is an atmosphere on Mercury, thin, but there. There is also oxygen, but only a few percent. The magnetic field is present, it is smaller than the earth's.

#185, 01:36:44, 01:46:07

Dimensions of space

The three-dimensional world is densely material .

The fourth dimension is energy without substances. Plasmoid worlds.

The fifth dimension is the astral world.

The sixth dimension is the world of disembodied spirits.

The seventh dimension is Light, the vibration that supports everything. The energy of the Creator, the kingdom of heaven, the place of control of the entire spiritual world. The divine world, in which there are no spirits, there is only God. Only spirits from the last three levels have access here if necessary.

#30, 02:13

Places of power

Places where people observed any changes in the energy background

or their own state, or often in these places there were contacts with aliens, plasmoids. Or in these places in ancient times there were temples of pagan pre-Christian religions.

#83, 16:40

Place

A certain part of space.

#387, 16:18

Metanoia

Repentance, like a request for forgiveness, if it is already expressed in thoughts and words, it must be based on something. Changing attitudes in the subconscious, in the mind, in the causal body. Repentance, change of mind. In order for a request for forgiveness, regret about what has been done to lead to a change in the mind, it is necessary to realize that what a person has done is really bad, that it leads to degradation and harmful consequences for others and himself, to a decrease in vibrations to the point of inability to feel and adequately perceive the Love and Light of God . To realize bad deeds and change the mind in a person's spiritual heart, a few minutes may be enough, or a whole life may not be enough.

#169, 52:20, #158, 18:40, #63, 11:32, #53, 01:34:34

Metida

One of the wives of Zeus, the prototype was his only wife Cephastis, a Burkhad humanoid named Agoranias. She visited her husband on the Earth base six times, and since she made visits over a period of several hundred years, on different ships and in different clothes, she gave rise to the myth that Zeus has many wives. There was a legend that Metis predicted to Zeus that she would give birth to a son who

would surpass him. When she became pregnant, Zeus lulled her with gentle speeches and swallowed her. After this, after some time, a girl was born from his head - the daughter Athena, who combined the wisdom of her father and mother. Behind the legend there is an image of dominance; if he ate it, it means that his energy absorbed someone else's. If Zeus swallowed up his wife, then Agoranias completely devoted her life to Cephastis. The daughter genetically inherited her father's intelligence, and during her upbringing, her parents passed on their wisdom to her.

#288, 32:43

Vaccination mechanism

The interaction of the vaccine introduced into the body with lymphocytes, which secrete antibodies and not only secrete them, but remember how to secrete them. Because against any microbe, against any bacterium, against any virus, not the same antibodies must be developed, but their own, because all microorganisms consist of different proteins, which means that the antibodies that neutralize them must be different. When an organism becomes infected, it receives a virulent infection, that is, one that has full power to infect cells. Then (this especially applies to viruses; a virus is characterized by the fact that, having entered the body in a small dose, it first hides inside the cells), the immune system does not recognize it. And only when the cell has already been completely destroyed, not one or three viruses that have entered, but dozens and hundreds that have formed there, come out of it.

#301, 20:02

Dead body

A body that has no connection with the spirit.

#233, 07:01

MidgasKaus

Representative of the planet Esler, biologist, psychologist, specialist in alien life forms. Incarnated several times on Earth.

There is a wife and two children. Mead has his own spaceship with a gravity engine, which he uses to travel to Esler on those days when he is not working on Earth and is not physically here.

#44, 04:40, 16:49, 34:48, #287, 16:39, #288, 00:21, #506, 07:25, 13:03, 30:25

Gut microbiota

Synthesis of various vitamins for the functioning of the immune system and protecting the body from harmful microbes that come from outside with food and water.

#189, 29:06

Microbes (their purpose as living beings)

The birth of another generation, the passage of some specific evolution. Getting food for yourself in order to give birth to the next generation, so that certain group animal souls can incarnate in them. The souls of microorganisms are called group souls.

#359, 45:03

Microgravity (internal nuclear forces)

That which allows objects that can be seen and their structure and density to be felt through the receptors of the skin, not to be a gas and in a more diffuse state. What attracts them to each other and allows molecules to be built according to certain systems. Each substance has a molecular lattice - the structure of the substance, which is built according to its own laws and individual for each substance. Energy

that allows atoms to join together into dense structures. In other words, intranuclear interaction .

Gravity, which influences space, due to which planetary systems, stellar systems are created, and every two bodies are attracted to each other by a force directly proportional to the product of their mass. This property of atoms affects space.

#17, 12:56, 14:51, #79, 13:16, #146, 17:06, #284, 16:10, #322, 05:29, #420, 13:04

#434, 39:49

Micropeace

This is its own life, which also requires food and reproduction, and solves its own problems here.

#456, 28:47

Alms

Voluntary donation of some material property to good deeds.

#63, 01:29:04

Mingyar Dondupa

An ancient teacher, one of the teachers of Lobsang Rampa, a Tibetan monk.

#286, 02:19

Mineral

A certain stone, which has a molecular structure, may not have a crystal lattice (chaotic arrangement).

#284, 56:05

World

This is reality, not an illusion. Only our perception of this world can be an illusion; the world itself is not an illusion.

#180, 01:08:20

Mirah Count

Representative of the planet Burkhad (Pikran), a disciple of Jesus Christ, who is known in the Christian religious egregor as the Archangel Gabriel.

#239, 09:35

World of good spirits

The world of disembodied spirits from 17 to 24 levels.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

World of Evil Spirits

The world of disembodied spirits from levels 1 to 6.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

The world of disembodied spirits

A single world for the entire Universe, in which there are disembodied spirits. This world consists of 24 levels and begins after the astral world. It is there that all spirits await their turn for incarnation, and their life is no less bright, rich and interesting than life in bodies in the material world.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”,

#33, 55:38, #29, 00:35

Universe

All together - the spiritual world, the subtle and dense material worlds. The process of passing a flow of energy from the spiritual world through the subtle world into the dense material world. It originates from the Source itself and, gradually reducing the speed of vibrations of its environment, passes into fine-material, and then into dense-material worlds, forming a new Universe. After which spiritual levels are formed in it.

#110, 35:20, #33, 55:38, #112, 07:41, #289, 13:29

Mirotočenie

The materialized energy of the egregor and the energy of the Mother of God, which she shares with people. The energy of the spiritual plane, through a slowdown in vibration, thickens and becomes denser, and this leads to its manifestation in the material world.

#62, 12:38, #187, 01:48:40

World of Natural Spirits

The world of disembodied spirits from the seventh to eighth level.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

World of average spirits

The world of disembodied spirits from levels 9 to 16.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

Mystical experiences

Experiences outside the physical body of a person, most often either in astral travel or in states of grace and ecstasy.

#206, 01:54:50

Wash

Representative of the planet Mantuca, Galaxy M31 Matthew Rouillon , contactee.

#270, 29:35, #276

Mitochondria

Intracellular elements that are the energy stations of the cell. They transfer the physical energy that people receive through dense substances, including oxygen and food, in order to convert this energy into etheric energy and fill it with vitality. Therefore, in this case, naturally, it contributes to human development.

#143, 00:22, #410, 28:45

Mishnah

A Jewish book containing laws and explanations of the Torah, which was founded by rabbis.

#53, 20:52

Brain ((human)

A means of expressing personality in the material world. It works almost 100%. If you look at a neural network, then to one degree or another all neurons are included in the work. But not all of it is noticeable to consciousness. Many brain cells are involved in regulating, for example, the autonomic nervous system. They are involved in the regulation of the transmission of neurohumoral signals from internal organs to the brain. And then through it to the embodied spirit, which is connected with it by consciousness, and in the opposite direction. Many neurons of the brain are busy, for example, comparing the sound picture of the world, which arises in the auditory cortex of the brain, and the visual picture of the world, which arises in the visual cortex of the brain. And this still needs to be compared with each other. To this are added the receptors of the olfactory cortex of the brain, gustatory, gravitational, and so on. There are several of them, and all this needs to be compared into a single picture of the world, in which the spirit can receive information, develop and make some decisions. 10-15% is that part of the brain's neural network that is involved in conscious activity. The rest of the part is involved in the reactions of the body and internal organs. Spiritual energy is present in

every cell of the brain. Energies in the spirit: energy of consciousness, energy of will and energy of emotions.

#182, 57:08, #345, 15:32, 30:12

Moses

A contactee with the planet Tumesout , who lived on Earth about 4 thousand years ago, to whom the Tumesouts , during physical contacts, transmitted information in a simple mythological form accessible to his level of consciousness. At the same time, a Tumesout spaceship physically descended onto the mountain . Since at that time there was no technical progress on Earth, everyone who descended from heaven was God for Moses. The Tumesoutians did not convince him of this, since it was easier for undeveloped people to give knowledge in mythological form than to explain to them about the existence of space, other planets, and so on.

#7, 00:40, 08:40, #59, 11:20

A molecule

An electrically neutral particle formed from two or more atoms linked by covalent bonds. In physics, molecules also include monatomic molecules, that is, free atoms. Recent experiments by scientists (1999, 2003 and 2019) prove that molecules also have a dual nature (wave-particle), like the elementary particles (protons-neutrons-electrons) of which they consist. This is an important discovery that makes it possible to speculatively prove that the DNA molecule can have quantum properties, such as being modulated and transmitted like a wave.

#246, 34:51

Molecular lattice

A certain structure of a substance, which develops according to its own laws, individual for each substance. This is how microgravity manifests itself .

#17, 14:51, 17:32

Molecular destructor

A device for cutting stones, donated by aliens for building houses. It was used to build pyramids. It comes in large and small sizes, with different powers.

The action occurs due to certain waves that affect the third level of energy in atoms. Microgravity begins to attract energies of the first level and from this the atoms are destabilized, they no longer attract each other, but disintegrate.

403, 32:47

Prayer

Appeal to God, as one rational entity to another rational entity, or to a saint. Energy connection to a specific egregor when reading with faith in those mentioned in the prayer and the desire for the fulfillment of what is said there. When reading a prayer, energy is invested and a change occurs in the etheric, astral, mental body and aura shell. It is not the words that are important, but the feelings put into prayer. To protect against low-vibration entities, pronounce them with faith in God, with love for people, for yourself and for the entities themselves. State of Divine Presence. When a person looks at the world around him as a manifestation of his energy.

The main thing is to say the prayer in high vibrations and with complete hope, that is, with hope in the will of God, because hope and trust in the will of God presupposes humility. But hope and trust in the will of God should not destroy one’s own efforts and actions to build one’s life and achieve one’s goals.

Prayer should be filled with Light and Love. If a person with low vibrations speaks, it can dissipate in the Astral.

#165, 30:36, #105, 44:41, #169, 39:45, #206, 01:08:50, #223, 08:52, #243, 04:22, #341, 39:14, #349, 19:00, #367, 01:02:36, #486, 47:50

Young race

A race on whose planets and colonies armed conflicts between states never cease . And its spaceships, that is, not automatic probes, but spaceships with living humanoids on board, do not leave the boundaries of the star system.

#317, 40:34

Youth

State of mind. In fact, youth is quite independent of the physical body. A person of any age can have this state of mind. This is not a state of the physical body, because youth is, first of all, optimism, the desire to explore the world and create, and create the right divine wise things in it . This is the youth of the soul.

#273, 00:20

Monad

An unchangeable particle of spirit. It is unchangeable not because there is no will in him to change it , but because it is called “godlikeness.” The Unchangeable Light is always on, it manifests itself in different ways depending on the lowering of vibrations.

#203, 43:46

A monk

Lonely hermit.

#62, 02:01

Monotheism

Monotheism, which appeared when monotheistic egregors had already begun to form. These egregors are considered energetically stronger than egregors where there is polytheism, because in them the attention of people is distributed between the priests of different gods, they fight among themselves, and this makes the egregor weak.

By calling God by one name, they are calling one of his countless energies. Therefore, all monotheistic religions are like a collection of books written about the same being, about his energies, his actions, but by different people in different eras and with different ideological combinations of meanings.

In order to form a monotheistic religion, firstly, there must be some specific contactee who will transmit information openly, despite the resistance of the priestly class, which can be quite strong, and even more so, priests are often pushed to resistance by plasmoids that are deprived their victims, because people turn to a monotheistic cult.

This new prophet of the new monotheistic faith must be from a fairly high level, naturally, not only by birth, but also by an achieved spiritual level. He must be quite sociable, courageous, decisive and in some ways even a tough person, because... a person of a different character, his egregor will quite quickly be destroyed by certain forces that will, through people, resist the introduction of a new cult of a monotheistic religion.

This is always contact at the person-to-person level. In rare cases, the main contactee is surrounded by several more contactees who can transmit information at the same level, and at the same time they will not compete with each other.

The purpose of creating monotheistic egregors in the noosphere of the Earth is to unite the people with a single idea, to direct energy to the development of spirituality and love.

#261, 38:05, 45:03, 45:53, 48:30, #326, 14:32

Music

Sound vibrations.

#184, 01:00:03

Goosebumps

A sign of increased vibrations on the physical level, for example, during prayer, as a result of increased spiritual vibrations. That is, a person passes into the Light and his physical body begins to react to this. This is also a sign of high sensitivity, since not everyone can feel this on a physical level.

#97, 07:25

Cat purring

A signal that she is making contact. Cats have very good contact with plasmoid civilizations. They can see those entities that are near you, and even spiritual and plasmoid entities. They have very good spiritual vision. That is, their animal soul can be tuned to this channel and penetrate where people who have not developed spiritual vision cannot penetrate with their gaze. When cats purr, they call their patrons from plasmoid civilizations to contact them so that they pass healing energies through them. They do the same for their children. In contact with you, they love you with the same love as their children or parents, depending on the age of the cat.

#216, 50:19

Murthy

Deities in India that are made of stone. In these deities lives the energy of those plasmoids and spiritual beings, as well as the energy and life force of believers who pray to the gods before them. And this spiritual power charges the murti by analogy with Christian icons. In Hinduism, murtis are also charged with the energy of believers and the energy of these light entities (plasmoids, spiritual beings). They have the property of increasing human vibrations, i.e. instill optimism in him, strengthen his faith, fill him with love, especially if the person himself coincides with them with his vibrations.

#326, 20:43

Mutation

Distortion of the divine image. Harmful mutations that lead to degradation of the body are always a distortion of the divine image. The distortion begins at the mental level.

#302, 22:23, 28:25, 38:37, 55:45, 01:02:19

Virus mutations

Changes in the genetic apparatus of the virus.

Speaking specifically about the coronavirus, changes in the genetic apparatus of the coronavirus do not affect those proteins for which antibodies should be produced, from which antigens for vaccinations are made. That is, even a mutated virus will still have those proteins for which antibodies will be produced. The only thing is that other proteins will be produced there , so the effectiveness of the vaccine from 90% for people may drop to 65-70%, but it will still be there.

#301,18:56

Muhammad

Spirit of the prophet. Currently at level 22. He had the task of creating monotheism and uniting tribes who spoke different dialects and believed in different gods, under the name of one God. To create a strong people so that they can develop and spirits can incarnate through them to build cities and create their own civilization.

#293

Muhurta

A section in astrology devoted to choosing a favorable time to begin any activity. Muhurta is translated as hour. The result of an activity depends on the time it began, but this understanding comes from the Spiritual world. In terms of implementation, there are certain ramifications. They are visible on the Time Tape, it is clear what events these ramifications will lead to.

#354, 06:30

Thought form

Real education. There are thought forms of resentment, anger, jealousy, envy and so on. From astral space they are visible as some dark- colored ribbons, cords or some clouds. Our rational spirit, which has embodied itself in an earthly body, is capable of creating a certain thought form with its thoughts, charging it with its own vital force, and it gives it some consciousness. In the future, if this thought form is negative, it will provoke him to similar thoughts.

#28, 29:55, #401, 01:01:12

Thinking substance in the body

An intelligent spirit that manifests itself through the physical body, through the brain. And the brain, in turn, controls the whole body. That cellular mind, which is located at the cell level, the mind of the organs, is, one might say, parts of the image of the body that is in the spirit.

By communicating with your body, you can communicate with every cell. You can ask her something, you can get an answer. You can communicate with some organ, not with the cell itself, but with that part of the soul, with that part of the Higher Self, with the part that is responsible for the functioning of the body. It simply communicates through the image of this organ. Because it is easiest to tune the consciousness of the embodied spirit through an organ, since you turn specifically to an organ or specifically to a cell, and you receive a response from them. The spirit thinks and makes decisions, but it does this through the body.

Consciousness is the energy of the spirit, where the perception of oneself and the surrounding world, where it is located. Consciousness, in order to perceive the world, one might say, charges the brain to the last cell. It charges him with itself. And through the brain, through the receptors of the body - eyes, ears, skin , tongue, nose, it reads the space where a person is, in general, through his body, through his sense of body position, sense of gravity, and so on. And as soon as consciousness reads this space, for example, through the eyes, consciousness reads information about where he is, what objects are around him, but in the form that the physical body can perceive, what are the capabilities of his receptors. Consciousness makes a decision, perceives and transmits information to thinking.

#344, 31:45

Thinking

The mind's ability to process information and make decisions. Thinking produces thoughts.

#344, 31:45, #345, 30:12

Animal thinking

The ability to fixate attention on the perception that is happening around the animal at the moment, and the direction of its behavior depending on instinct. There is no decision-making function.

An animal is capable of sacrificing its life for another instinct. For example, the instinct to protect the owner. But an animal is not capable of giving its life for an abstract idea.

The animal is determined by instincts and controlled by them.

#345, 30:12

Cassiopeia 00 - DICTIONARY OF CASSIOPEIA TERMS - N-Y - information from extraterrestrial civilizations - Irina Podzorova

https://blog.cassiopeia.center/

Information transmitted by our space friends through Irina Podzorova, a contactee with extraterrestrial civilizations.

N

Naive

The child's state of mind.

#354, 14:24

Punishment

The consequence of an act committed in low vibrations.

#283, 01:13:30

Prayer icon

An image, an icon, into which a lot of energy is invested: human thoughts, thought forms... Light thought forms: love, happiness, faith, patience. When a person does not just pronounce words mechanically, but turns to God with feeling, and these feelings on the astral level come out of his aura and charge the surrounding objects (especially the one to which the person's attention is directed at that moment).

#36, 22:47

Nargipulse

Plasmoid (Pleiades Constellation). It looks like a white hemisphere, from which rays emerge, spreading in a circle, like the Sun at sunrise. There are three horizontal parallel stripes inside . This is part of the subtle body, which is aimed at contact with people. The rays are the energies of correcting errors in the codes of human cells. Representative of a plasmoid civilization of the 24th density level.

#388

A teacher

In the classical sense, the one who instructs gives instructions of a spiritual nature. Anyone can be a mentor to another person. And any spirit that has appeared (if a spiritual being) or any subtle material entity can also be, in the broadest sense of the word, a mentor. Even if it brings some kind of negativity, some kind of damage, in any case, it instructs a person through her behavior to build his behavior and his energy in such a way as to increase him and his vibrations. In the Interstellar Union, there is a type of curator, a non-incarnate intelligent spirit from level 22 and above, who selects this incarnation

for the spirit who has incarnated into a person (contactee) and gives him instructions about the spiritual world, helping to realize the goals of the incarnation.

#63, 01:36:38, #76, 38:41, #202, 31:45

A real man

Responsible, a true warrior of the Spirit who protects the weak and at the same time has no fears for his well-being. This is a free, open, thinking person; only a person with a strong character can be truly kind.

#262, 01:03:18

The Science of Imagery

#393

Scientific satellite

An automatic observation probe containing gravity beacons that guide the ships' gravity engines and give them guidance for the correct exit from a gravity jump. There are 72 scientific satellites around the Earth. The earliest is over 12,000 years old.

#95, 03:27

Start

The first consciousness that separated from God was born from Him. This does not mean the beginning of the material world. It was beyond time and space.

#297, 12:45

Neanderthals

Tribes of people who lived on Earth up to 40,000 years ago.

#202, 34:00

Heavenly Hospital

Space in the astral plane, which was created by the thought forms of various Pleiadian civilizations, not only dense-material, but also thin-material, plasmoid , which are called rays of Light, beings of Light. This space was created in order to restore the astral bodies of not only earthlings, but also any spirits, even non-incarnate ones , in order to direct energies towards their purification and harmonization.

#137, 01:03:20

Nebadon

Local Universe in the language of the Pleiadians . Mentioned in The Urantia Book.

#105, 19:39

Unconditional love

Pure divine love, the energy of which is given depending on any conditions. This comes from the fact that a person initially, even in childhood, fences himself off with negative emotional blocks from that light of wisdom, and therefore begins to understand love incorrectly, illusory. He has the illusion that love depends on conditions. Why this is an illusion becomes clear if you imagine all manifestations of material energy in the world are also manifestations of love. For

example, a river is also a form of divine energy, namely dense material energy in the form of water. And any person can use this energy for their own benefit - to swim, get pleasure, health, catch fish, etc. This energy will be no different for any person, regardless of whether he loves God, believes in Him or not. God gives everyone the same energy from the river, sunlight, etc. All energies are given by God unconditionally. But, since a person on Earth often separates himself from God, considers himself completely autonomous, and does not strive to become like God, a person may consider that he receives energy from God unconditionally, but will give it himself under certain conditions. Often this attitude is formed in childhood , when parents raise the child in the spirit that if you don't do what I want, I will reject you. Or vice versa, children behave towards their parents or teachers in such a way that if you don't give me some thing, I won't give my love, I won't talk, etc.

#181, 16:14

Sky

Symbol of the spiritual world.

#194, 32:08

Undivine energies

Energies that contradict divine energy in structure, which depends on the choice of one or another spirit producing one or another energy. The divine energy itself can be directed against the divine Light in itself, at the choice of the spirit that has chosen Darkness. This divine energy in this case turns into its opposite.

#16, 06:11

Naevus

Large birthmark.

#444, 01:31:43

Negative energy

Emotions of resentment, hatred, fear, anger, uncertainty, mistrust and the like, far from bright states of the human soul.

#199, 50:39

Negative entities

Entities that are aggressive and destructive towards humans. These can be both plasmoid entities and disembodied spirits from lower demonic levels.

#223, 02:45

Negative block

A clot of energy with information contained within, which consists of emotions, feelings and thoughts on a certain topic.

#199, 50:39

Brain neuroplasticity

The ability of the human brain to build new neural connections and develop itself, almost until the end of the life cycle.

Adaptation of the brain to the surrounding world. The ability to develop habits, both beneficial for development and harmful.

#140, 11:37, #455, 08:59

Neutron

A certain state of elemental energies in the nucleus of an atom, where 25% of each element is present.

#307, 44:23

Unbaptized

A person who has not undergone the connection with the Christian egregor that occurs during the rite of baptism.

#234, 41:47

Necrotic Bindings

Connections with your loved ones and family that are formed when you think about them. They cause negative consequences and only those connections with the Spiritual world that are filled with negative feelings and negative emotions. It could be boredom, melancholy, sadness, despondency or resentment, anger at the departed person. If they continue for a long enough time and if the spirit to whom this is felt is similar in vibration to these emotions, the person loses strength, and diseases associated with energy deficiency may quickly begin. And also some destructive plasmoid may take the place of the spirit of the deceased, which will also form a binding. He can even introduce himself to them.

#428, 04:44

Hatred

Love for certain states. For example, the hatred of one person for another is, in fact, love for those states that are interfered with by the person you hate.

#165, 20:57

Magnetic field inhomogeneities

Various inhomogeneities, they can be called subfields , a scalar field, and a supermagnetic field. They are not separated, they are one...

#17, 01:08:30

Unconscious contact

Contact in which a person accepts messages from curators as his own thoughts.

#112, 07:12

Neptune

Another name for Poseidon, a plasmoid, the main controller of the element of water.

#194, 35:54

Human nervous system

The human system is tuned specifically to transmit an electrochemical signal, which is obtained due to the waste of adenosine triphosphate. It splits off the phosphoric acid residue from itself and because of this, energy is released, which is converted into electrical form as an impulse. And this impulse is sent along the myelin threads, which consist of a special protein, so that the body carries out the commands of the brain, and through the brain – the commands of the spirit.

No other frequency can interfere with this. It will not be able to enter this nerve, spread along the myelin, it is not electrochemical.

#374, 30:43

Nefertiti

Earthly woman, priestess and ruler of Egypt about 4000 years before the birth of Christ, that is, 6000 years ago. I contacted, came to the ships of the Tumesoutians, the Burkhadians, and the Eslerians when they arrived.

#270, 36:00

Nephilim

The Hebrew name for the hybrids of Tumesoutians and Earthlings. Giants.

#129, 42:11

Oil (education)

Oil on Earth can be formed in several ways, depending on where it is found. If any small animals, insects and plant matter, as a result of some catastrophe, for example, were covered with earth (a layer of earth turned over and fell, as in a flood). This all turned out to be without access to oxygen, air, or light. The microorganisms that were there can slowly begin to process everything into a mass where only separate chains of flammable substances exist, which you call hydrocarbons. These are chains of carbon with hydrogen attached to it in completely different modifications. There are also sulfur, phosphorus compounds, all substances that were previously in the proteins of organisms, but they disintegrated under conditions of oxygen-free decomposition. You call it “ dead organic matter”, the most diverse. There could even be bodies of living beings that died in a catastrophe or as a result of natural death. They lay on the ground,

later they were flooded with water, a swamp formed, they went into the ground, and decomposition began there. Such ways of education.

There is another option when there is a reaction between sea water and those substances that are below the seabed. They touch. There are channels under the seabed where water is poured, and reactions slowly occur there, which also collect carbon and hydrogen from these rocks. It turns out a similar substance, only not from organics, but from these substances.

That is, oil deposits are possible even where there were no living beings. For example, under the seabed. The formation of such reactions is also possible on other planets.

#371, 29:55

Obscene language

Low vibration emotions of irritation, condemnation, insult, humiliation of the dignity of other people, anger, which reduce a person's vibrations.

#165, 48:22

Nibiru

A manned ship of alien races, a fleet that orbits the solar system, named after the lost planet Phaeton (Nibiru), which was destroyed by the Selbetians 12,000 years ago. Several kilometers in diameter, spherical in shape. Externally it looks like a planet. Representatives of Sirius live on the ship.

On that planet, which was called Nibiru in Tumesoutian (which was between Mars and Jupiter then, and which was later broken), there was the main base of the Tumesoutians . So they named it in their language. When the ships attacked (and there were quite a lot of them), some of the ships flew to Nibiru. They understood that if they

simply destroyed people now, they would not be allowed to do this, because there were bases where there were other ships that could protect them. Therefore, part of the ships separated from the main mass and flew to Nibiru, where there were Tumesout bases. Nibiru was their major base. The first ships flew to Nibiru and the impact of these weapons was first directed at the Tumesout bases on Nibiru, which was not a colony, and no one was resettled there. Their specialists simply lived there. When they hit this planet, they did not have time to defend themselves from this blow, and it simply scattered into 4 large fragments. And, in fact, those meteorites that most often fall on Earth are parts of the planet Nibiru, in your opinion – Phaethon.

#41, 38:14, #83, 37:11, #95, 35:40

Low vibrations

Low-frequency energy generated from the energies of fear, hatred, envy, jealousy and other low energies. From their long cultivation, energy blocks are formed in the etheric body, moving to the astral plane, then to the etheric, mental, etc.. These energy blocks create negative thought forms that provoke a person to further create the same negative emotions. Metabolic processes in cells at the cellular and subcellular levels are disrupted. This can lead to psychosomatic illnesses.

#112, 51:38, #114, 13:45

Low vibration spirits

Spirits that on Earth are usually called demons, demons and other dark spirits.

#27, 11:03

Low vibration (parasitic) plasmoids

Plasmoid civilizations that can instill fear in people through their contactees , frighten them with various disasters, the onset of the end of the world, negative information about reptilians, insectoids, chemtrails and other things. In this case, it is necessary to distinguish between spiritual and material vibrations. Higher vibrations of a plasmoid's subtle-material body do not always indicate its high spiritual vibrations.

#222, 21:21, #247, 22:25

Nika (Victoria)

An earthly woman who caused a battle because the clan to which she belonged was against her marriage to a representative of another clan. This woman became a symbol of victory in battles.

#288, 58:18

Nicholas II

The last Russian emperor. He is at the 16th level of spiritual development. Came into embodiment from the third level. In a previous life, he was incarnated where the constellation Ursa Major, in that direction, was also the ruler. A war began between states, between countries, he left his people and went over to the side of the enemies. Many intelligent beings died, he led an army that acted against its own people. That's why I ended up on the third level. The task of the last incarnation was to develop the country and to prevent revolution. There was a possibility that it wouldn't happen. Since Nicholas II did not complete this task, after the revolution took place, the task changed . It became a personal task to forgive those who committed evil against the entire country. He partially completed this task, so he did not reach the level of Angels. If he had made different decisions, there would not have been a revolution. If only he had made decisions on time, which, for example, Pyotr Stolypin spoke about. He was slow to accept them, believing that the introduction of these laws would shake the government. If they had been accepted in time, there would have been no reason to rebel and overthrow, and then drown

the workers and peasants, who were promised a better life, in blood. They promised the best, but carried out terror and destruction a hundred times greater than all the emperors of the Romanov dynasty. The goal of the future incarnation is to be born a boy in a simple family in order to develop determination, activity and the ability to insist on one's position, because this was lacking in a past life. The task of the future incarnation will be to develop the ability to say "no", the ability to follow your path to the end, to defend your interests.

#366

Nimitta

A branch of astrology devoted to the interpretation of signs. Signs, warnings.

#354, 31:12

Thread of life

Part of the human etheric body. It consists of etheric energy and supports life in the physical body during astral exits from the body, including during sleep. During astral travel, part of the etheric body remains with the physical body, while part goes into the astral plane with the astral body. In this case, the parts of the etheric body are connected by a thread. A person's etheric body is tuned to his personal vibrations, therefore the etheric thread of each person has a special vibration frequency and is never confused with the threads of other people. For the same reason, no astral body will enter when returning to another physical body.

#143, 05:50

Newborn intelligent spirit

A structure that is formed as a result of the combination of three components: the energy of the will, the energy of thought, the energy

of the spiritual heart or feeling.

#179, 01:40

New Jerusalem

The symbolic name of the Kingdom of Heaven. Jerusalem translated from Hebrew (simplified Tumesout) is the Sacred Divine World or the World of Yahweh. Symbolizes the renewal of the entire material world, which will occur in the next cycle of the universe. Exists in the spiritual world and, as a probable option, in the stream of time as a continuation of current events in the material world.

#202, 45:20

Noah's Ark (biblical)

A mythological description of the rescue operation during the war with Selbet 12,000 years ago, in which surviving earthlings were taken by spaceship to the Moon bases, which were located under transparent domes. The Ark is a figurative description of spaceships. It was not 8 people who were saved (as in the Bible), but several thousand people, as well as some species of animals that were managed to be taken out.

#59, 21:10

Noosphere of the Earth

The astral atmosphere, which is not an independent part, separated from space. It is part of the noosphere of the entire Galaxy.

The totality of the egregorial shells of the Earth, its egregorial structures.

#332, 11:21, #421, 33:22

Nostradamus

A spirit embodied at a given moment in time on the planet of the “Order of Six,” where reptilians live who interact on the astral plane with people and destructively set them up for self-destruction.

#486, 08:10

Wearing a pectoral cross

A person’s good will, that is, he outwardly shows everyone else that he belongs to the Christian egregor.

#199, 01:02:55

Numerology

Knowledge of the characteristics of numbers, qualities, symbols that these numbers and planets representing these numbers are. You can understand by calculations , by special formulas, what qualities of the spirit are missing for spiritual development, which ones he came to develop in himself, which ones to transform, process, get rid of their negative manifestations, and so on.

The closest celestial bodies that influence the body and the Soul (through the body, naturally) are the Sun and the Moon. The sun, like the closest star, influences all life. It makes life possible in general. Even the sunrise and sunset affects, first of all, the physical body - heat, cold. Secondly, on the mood, for example, when the Sun is hidden behind the clouds, the mood is completely different. The Moon, rising in various configurations with the Sun, i.e. sometimes opposite the Sun, sometimes between the Sun and the Earth, sometimes vice versa, it causes the movement of liquids not only in the seas and oceans, but also in your body, and even in every plant. This is not to mention the fact that changes also occur in the astral world because

magnetic fields change from the movement of the Moon and from changes in its position relative to the Earth. There is an increase in astral energy already in the astral worlds.

Other planets, which are more distant, they influence by simply revolving around the Sun in certain orbits. They even influence each other, for example, if Jupiter and Mars are next to each other in the same constellation, and this constellation is behind the Sun relative to the Earth, then the magnetic fields of these planets will interact with the magnetic field of the Sun more than usually. And all this will affect the Earth.

#41, 09:51, 11:27, #203, 08:51, #243, 15:22, #250, 43:13

ABOUT

An insult

A feeling of attitude towards oneself, a person or a situation when one person wants to change the behavior of another, regardless of his individual life goals, his tasks. This is similar to selfishness, only aggression such as anger is added to the feeling of selfishness.

This differs from the emotion of anger in that the emotion of anger passes quickly, but resentment exists for a long time. It exists in the heart and can form blocks faster. An offense must be forgiven, because forgiveness is a recognition of the Light in a person and a wish for him to be happy, to be loved, to be loving.

Resentment is a lack of recognition in a person of Light, because the word “resentment” refers to many different states.

#393, 08:20

Inhabitants of planet Earth

All spirits that go to incarnate on this planet are plasmoids and humanoids. They are divided among themselves by density and are perceived by other extraterrestrial civilizations as a single whole, that is, those who were sent to incarnate specifically on Earth.

#23, 07:47

Image (attractor)

That which forms the goal by which society or an individual or group of people moves in any religious or political egregor, or even in the egregor of an individual family. There is a hidden or open image to everyone.

The development of society, more specifically, of an individual country, proceeds at a rapid pace only if the image created by its ideologists, political leaders and those who support them is understandable to the majority of the people and is supported by their inner spiritual heart and desire.

#235, 14:57

Image of the Thunder God (Perun, Odin, Jupiter, Indra)

An image that originally originated from aliens and subsequently merged with weather phenomena.

#197, 14:49

Figurative perception

Subject at school on Esler . On it, children are taught to see a visual image or an image described in a book, what kind of image it is, who created it, what it leads to, to Light or darkness.

#51, 01:04:21

Figurative meanings

The basics of the worldview that every person has. Concepts of what to strive for, what is good, what is bad, what should be avoided. In every world, in every society and in every time there is a different set of figurative meanings.

#263, 03:35

Images of Angels and Plasmoids

Any images that can take, both plasmoids and non-incarnated spirits. In general, wings are an image of flight . Angels and plasmoids do not have physical wings. They create them in their own image, their imagination, to show a person that they came from the spiritual world. The human spirit, which goes through its spiritual channel into the world of spirits, if it focuses on itself and looks at itself, can often see wings, because at that moment it flies towards the spiritual Light.

#223, 02:45

Ritual in religion

A form of action in the material world, which was needed to demonstrate one's faith and to contact any entities. Material objects can enhance or reduce this contact, depending on the purpose of the ritual. The ritual can be complex or simple, but its essence is always the worship of God. Or other spiritual feelings through matter, through objects, incense, music, etc., through images (this is accepted in some religions). With the help of rituals, communication with God or some special effect is caused, but they are needed only for strengthening. It must be remembered that the ritual is only a form, and not the goal itself. The ritual is good only if you realize that it is a means that can be changeable. The rite is sacred, but not Holy, like God. It is endowed with divine energy, but not so much that it cannot be changed for any reason.

#293, 33:05

Common Higher Self for different spirits

The feeling of the unity of all spirits in the Light.

#111, 10:50

Communicating with your Higher Self

Communication with that part of God in you that makes up 70% of your divine essence. This is much more important for your development than communication with any civilizations and curators, which is possible only through the Higher Self. First, learn to consciously communicate with yourself, consciously carry out all the spiritual advice of the Higher Self. At the same time, the higher Spiritual world begins to reign in your heart and control your heart and spread to the material world.

#466, 42:38

Communication with a part of the disembodied spirit

Communication with a phantom, which the Higher Self of this person, his disembodied part, separates from himself. The phantom takes on the image of a person from the incarnation that is interesting. And what's more, the phantom takes over her memory. The embodied part does not know about this; this is not its task.

#400, 00:03, 40:22

Fiery world (fire energy)

The highest vibration that creates everything else, from which

everything else comes. The energy of God, the Creator of the world and our Father, who is the father of all spirits. Continuous flow of energy.

#37, 21:46

Access restrictions for Selbet after the war 12,000 years ago

Expulsion from the Interstellar Union. But at the same time, Selbet’s spaceships and technologies were not taken away. Stopping the exchange with them of new technologies that the Interstellar Union continued to discover. Limiting contacts with young races that are not members of the Interstellar Union. Establishment of special surveillance over Selbet's ships so that there are no aggressive actions on their part.

#144, 27:00, 31:08

Odysseus

A man who took part in the War of Troy.

#288, 01:04:20

Same-sex marriage

Same-sex attraction that arises from partially blocked memories of the body of the opposite sex in the past in which the soul lived. But this lowers a person's vibration. It lowers the vibration of his spirit. Because if a person was born in a male or female body and does not take into account that if God and his mentors allowed him to be born in this body, then he should already live a different life, and not the one he remembers.

#76, 18:42

Health improvement

The concept of both spiritual and physical bringing the body, soul and spirit into harmony. You can even translate this as “harmonization.” Filling life and body with new quality, new sensations.

#257, 50:45, #283, 01:58:33

Ozone

Very active, strong oxidizing agent. It can produce, in reaction with organic molecules, many molecules saturated with energetic bonds, more than oxygen. But due to its activity, it also actively acts as an oxidizing agent, shifting the acid-base balance of the environment to the acidic side. Because of this, with a large dose of ozone or with a long period of exposure, destruction of cellular and intracellular structures can be observed, despite the energy accumulated there. This concerns the effect on living cells.

It stimulates its own energy processes through contacts, including with mitochondria in cells and by destroying pathogenic flora.

#410, 06:07, 48:15

Oxidation

A process in which a molecule of oxygen, ozone, or other oxidizing agent reacts with another substance to produce oxides, which destroy the structure of that substance.

#410, 06:07

Graphene oxide (developments)

The substance is carbon monoxide in a special allotropic form.

#347, 01:10:35

Oligophrenia

Brain damage that prevents the spirit from fully expressing its intelligence. He shows more instincts; for example, he has a weak memory, he cannot remember speech, and so on. And for this reason, psychological and psychiatric disorders are formed.

#444, 01:08:03

Rejuvenation

Tissue regeneration.

#226, 10:00

Rejuvenation (practice)

Take photos of yourself as a child or as a teenager where you like yourself. Place the best photo on your desk where you are sitting. Look at it 10-15 minutes a day. Remember all the features of your face - hair, lips, etc. In the evening before going to bed, when you close your eyes, imagine this image in front of you and that you are merging with it. It will be a charge of youthful energy.

#287, 17:55

Delusion of mind

The low-vibration state of various mental structures of the human soul,

which makes the correct path in the Light of God on Earth impossible.

#206, 00:22

Oncology

Harmful mutations that lead to degradation of the body. The oncological process of mutations, which harms the body, is always a destructive work of the soul. Maybe an animal soul, or maybe a rational spirit.

The spread of cancer on a mass scale is possible only in a society that does not know its spiritual nature. Anything can become a factor in the development of a tumor: any substance, any radiation that would be completely safe for other people.

Oncology (cancers)

Both protozoa, microbes, fungi, and cells of the human physical body, which have switched to a more ancient method of nutrition, have in common that they are able to live and feed in low-vibration states of the human soul. Simply put, a person's negative thoughts and feelings are capable of providing the person's vital energy for the development of these pathological cells, both parasitic forms external to the person himself, and internal ones that have switched to a feeding method characteristic of protozoa, for example, amoebas . This is precisely in many ways the same psycho-emotional state of a person, which causes such low-vibration energies in him that they affect the human body already at the physical level and cause foreign growths and tumors in it , which already kill the body itself.

If a child develops a disease, there may be many reasons: in his past lives, in relationships, for example, between parents, because the etheric bodies of mom and dad, their consciousness also influence. It turns out to be such an influence.

In what state of consciousness does cancer most often appear? These are anxiety, depression, hidden grievances, especially self-resentment.

Anger at oneself, self-condemnation, non-acceptance of oneself on a subconscious level let the body, all its cells know that it should be erased from life. This triggers the biochemical process of any organ, any tissue in such a way that this spirit must come out of incarnation, because it is not satisfied with the life around it, the people around it, or itself.

#28, 24:42, 35:35, #86, 46:48, #302, 38:37, 45:45, 50:14, 55:45, 01:02:19, 01:08:07, #316, 19:32

Oncology (active prevention for earthlings)

Must include several factors. The first (most important) is spiritual, psychological. The second factor is a reduction in the intensity of exposure, if possible, to each carcinogenic factor that has already been identified. There are carcinogenic factors that are more carcinogenic than others. And thirdly, creating a positive image of those psychological and biological factors that contribute to the destruction of already mutated cells, cleansing the body of them, while at the stage of an unmanifested tumor disease, while they are still just forming.

Some foods, plants, herbal products, contain a set of substances that disrupt, for example, the walls and membranes of tumor cells, making them more detectable by the immune system.

All types of cabbage, but broccoli contains especially high levels of these substances. Also in weeds such as rapeseed, spring grass, and so on. Weeds also contain substances that make tumor cells visible to normal immunity.

Also, sulfur compounds, organic sulfur compounds, which are found in garlic, as well as in ginger, help increase antitumor immunity and disrupt the formation of metastases, that is, the transfer of genetic information of an altered cell to its offspring.

There is also a very important phytoenzyme . A substance called “lycopene” can protect cells from various carcinogenic factors. Lycopene, accumulating in tumor cells at certain stages of their formation, also makes them visible to the immune system. Lycopene is found most in tomatoes, but they must be heat-treated. It is then better absorbed.

These substances, as well as red pigments, a whole series of pigments, are contained in red beets, which cleanse the body of toxins that have a carcinogenic effect. Most of these pigments are found in dark red beets (which are not striped, but evenly colored and elongated). You can also name products such as turmeric, parsley, citrus fruits, they contain a large amount of copper.

If we talk about microelements that have an anti-cancer effect, these are selenium, vitamin C, copper, iodine, they increase immunity. The most useful animal product is the fish that lives in the sea and contains special molecules similar to those in vegetable oils, but of a different shape. These molecules protect against harmful factors, primarily the cardiovascular system and enhance immunity.

Any nutrition, anti-cancer drugs and immunostimulants can only be an auxiliary factor in prevention, and even more so in the treatment of an already existing disease.

#302, 35:15, 38:37, 45:45, 50:14, 55:45

Payment “according to your heart” for spiritual services

Trusting God for your financial support. When people give themselves, by this fact of their work they show that they completely trust God with their material support. If they trust God completely, their vibration rises. They allow them to see what those who do not trust God do not see. Light cannot be material. Here the person did not evaluate it himself, but gave it up to God’s discretion, so that God would send people to this person who could support him. Payment “according to the heart” makes it possible to accept a person and help him precisely in his spiritual development, in his purification and raising his vibrations, even if he has no means at all or has few means, but he needs such

help. When you set payment “according to your heart” for spiritual work, by doing this you show God, the Universe (more precisely, you don’t show, but open a channel) trust. By these actions you say to Heavenly Father, the Creator, something like this: “My Heavenly Father! You see that I want to bring every person to You. I want to help everyone find the Light." To help find the Light is to lead to It. “You know my needs, You know the needs of my children. I trust You completely. Let those people come to me whom I can really help.” If this openness is sincere, without fears, any internal doubts, without expectations that they must be grateful for something. If he is completely in unconditional Love, then God, through other people, will certainly send such a person not only provision of life’s needs, but also prosperity, including material prosperity.

#52, 12:04, #257, 34:56, #407, 38:25

Belt

People change in their energy after eating the fruits of temptation. In other words: at first their energy changed, but not from the fruits, but from the fact that they did not trust. They no longer had that love for the Gods, that is, for those who created them. After all, they were told that they are representatives of God the Father, and that through them He manifests himself in this way, through them God is created. After all, the Tumesout people believe in the Creator. And when people went against their Gods, their vibrations lowered and therefore it is said that they made aprons for themselves from leaves, that is, they had already lost their love, which was later confirmed by the fact that God gave them leather clothes so that they would not be subject to attacks from the spiritual world. This is the Astral Veil. This was done on a spiritual level.

#196, 12:09

Earth's orbit

Not a strictly circular orbit, but in the shape of an ellipse. If you look not from the plane of the ecliptic, but from below or above, then its path over several decades will resemble a spiral. She is stable. Although it

increases, this spiral, but then it returns to the Sun again. The Earth travels in an elliptical orbit and passes the same path, practically. That is why there are always 12 zodiacal constellations.

#250, 22:25, 26:59

Organic life

The original organic life, in the form of protozoa, similar to modern protozoa of bacteria and viruses, arose in space, because many living microorganisms can withstand the state of vacuum and cosmic cold. God, with his Mind, directs his energy to the movement of each atom. His Mind composes these molecules as if from a construction set. And, thanks to this, the first organic substances arose, which combined into more complex substances and formed the first forms of life - microorganisms. But we must always remember that microorganisms, any material bodies (from microbes to huge creatures) necessarily have an embodiment either in an animal soul or in a rational spirit. Single animal souls, like group animal souls, were created from various energies by plasmoids, that is, by us, when we lived in the form of plasmoids.

In our Galaxy, other forms of life are known and exist, in addition to forms that are based on carbon life - these are organosilicon creatures. There are combined creatures - organosilicon and carbon. There are also those in which, for example, the percentage of carbon in their proteins is largely replaced by phosphorus or sulfur compounds. We can talk about organophosphorus or organosulfur compounds. Molybdenum and various types of substances can also make up organic substances and various elements. This is expressed in the fact that the body will no longer be anthropomorphic, as for example among the Burkhadians , but will look like an insect, for example, an insectoid type and the like.

#40, 39:29, #46, 06:14

"Order of the Ice Fire Mages"

A community of plasmoid worlds at different density levels. Currently there are 1037 creatures from different levels and different worlds. It's like an egregor, but at different levels of density. The name “order” comes from the word “society”; it was given by certain earthly contactees.

Magicians": magic is a certain impact on the material world through an energetic change in the astral world, that is, an impact on the physical world through the astral. Therefore, the order was called the “Order of Magi.” And “Ice Fire” is the name of the energy that people felt when they came into contact with the Order’s plasmoids. Contactees (not all), when plasmoid energy passed through their bodies, felt like a fire was burning inside them, and everything outside seemed to be covered with ice. Such a paradoxical feeling.

#604, 38:15

Liberation

Merging with the “ embodied Self” consciously and becoming free from conventions and images imposed by living in this world.

A person becomes free from limitations by dissolving the walls that he built for himself in his body and in his mind. The attitude changes and only what is visible through the window is not considered reality.

#387, 16:18

The main task of the embodied spirit

Develop your spirit in aspiration towards God, towards Love, towards Light. Everything else is just tools, because for example, that new body, new things, people, all this will remain in the material world when you leave the incarnation. You will take with you only the experience that you can gain by taking lessons in solving various simple or complex situations in your life. Depending on the development of the spirit, he is given situations and life lessons of varying complexity. Having left the incarnation, he will take them with him for the next

incarnations in order to further increase his level. If you forget about this and think that the life of the spirit is finite, then spiritual development will not even be in second, but in tenth place in life. If a person does not believe and know that he will have a continuation of life in eternity, then he will not attach importance to this spirit. Therefore, in the schools of the Interstellar Union, from a very early age, awareness of oneself in the astral plane, astral travel is practiced, so that a child in a lesson can leave his body, see his body, the spiritual world, and when he returns, he already understands for sure that the body is finite, and he is immortal.

#181, 30:50

The main reason for the creation of different races

Creating them for different zones of the Earth. You could say that the progenitor of all races is what you call the European race. It was resettled mainly to the north of the Mediterranean and Black Seas.

403, 57:02

Fundamental Creator Energy

Light of Love. That Love that exists on its own, in itself, and It is capable of shining. She is Light, Spiritual light, Light of Love.

#43, 14:11

Mindfulness

The ability of the spirit to work with one's emotional states, to honestly analyze the events around oneself and relationships with others. An assessment of the degree of spiritual development that occurs with this spirit. The higher the vibration level, the greater the level of awareness. To increase the level of awareness, it is necessary to free yourself from low vibrational states and acquire knowledge about the spiritual world. Understanding that thoughts, feelings, mental images are

something external to the individual and the ability to display them in speech, either written or oral.

#104, 45:43, #105, 41:00, 45:43

Awareness of civilization

That which consists of the awareness of individual spirits embodied in this civilization. True awareness is impossible without acceptance, without recognizing the right of every being to be unconscious. For some spirits, unawareness is a necessary way to understand reality and escape from this unawareness. Anything you can do to help your loved ones so that they become conscious, to show the benefits of awareness in every moment of their lives.

#364, 07:46

Lucid dreaming

A type of astral travel of the soul outside the body while it sleeps. In a lucid dream, the soul is aware of itself separately from the body and can remember more because of this state, but after returning from sleep and connecting with the body, it is advisable to immediately write down what happened or who you communicated with and where you flew, since after 20-30 minutes spent in the material world, all memory acquired in the spiritual world usually leaves consciousness.

#206, 01:24:16, #257, 28:08

Conscious access to the Astral (Kirchiton method)

A practice in which you need to breathe alternately through the muscles of the chest and abdomen, lying on your back, relaxed. For one inhalation , hold your breath for a certain number of heart beats

and then exhale. Don't think about anything extraneous. The concentration of thought is on breathing, and extraneous thoughts on another topic are simply recorded. But with the next exhalation you seem to exhale them into space, creating an image of thought in the form of a cloud.

Gradually, a state comes when you stop noticing where you are lying, in what space you are. A vision appears as if you are in a field of white Light. Then, when you inhale this white Light and hold your breath, you get the feeling that you are inhaling Light, white Light. It is distributed throughout the body, expansion occurs and you want to sleep a little.

It is important to maintain consciousness here, because the change in consciousness occurs like half-asleep . If you miss this moment, the person will fall asleep and will not remember the exit. And you need to concentrate on breathing so that your mind is busy with work and does not fall asleep after a few minutes.

Usually this does not happen right away. You need to do this every day for 30-40 minutes at the same time. Gradually, a spontaneous exit will occur , because the reflex of the astral body to separate will work as soon as the body and the biocurrents of the brain enter a certain state.

There should be increasing breath holding. First inhale for one heartbeat, hold for one heartbeat and exhale for one heartbeat. First with the chest, then with the stomach. Then do the same for two. This should be equal to inhale, exhale, and hold your breath. By two, then by three, then by four, you can increase it as much as you want, but for now it’s comfortable.

If holding your breath is difficult and you feel that it is causing tension, the exit will not happen. You need to go back one count and do as much as is comfortable.

#441, 24:28

Conscious contact

Contact in which a person understands that these are not his thoughts, that he is in contact with a certain entity.

#126, 55:00, #112, 07:07

Condemnation

Energy aimed at humiliating another. Generated by negative emotions of fear, anger, despondency, irritation. The simplest action based on low vibrational states, which, in turn, are based on instinctive principles. When we see in ourselves or another a manifestation of darkness, evil or low vibrations, we not only notice it, but we begin to elevate ourselves. If we find this in another, we begin to elevate ourselves above him. If we find this in ourselves, we begin to humiliate ourselves in front of someone else.

#133, 34:13, #180, 01:08:20, #203, 21:15, 29:19

Planet tilt axis

A conventional line passing through two poles is perpendicular to the sphere.

#85, 17:58

Responsibility

An opportunity to change the situation for the better.

#421, 48:55

Answers from the Higher Self

The presence of a feeling of Light, filling with Light. Lack of negative emotions. A person's internal negative emotions dissolve in the Light. Filling with a feeling of joy, openness, calm.

#31, 10:58

Give your soul to the devil

A figurative expression of the fact that people, carriers of low-frequency vibrations, are precisely those whom some plasmoid civilizations call biorobots , have given up their freedom of choice, and are led. But this is temporary until they realize that they are in slavery not only to matter, but to their wrong idea of matter.

#126, 20:27

Department of the Spirit

The moment of breaking the connection with the body, with the thread of vitality. If desired, the spirit can immediately go to the spiritual world at its own level or remain for some time close to the living in the astral world.

#72, 04:32

Revelation of John the Evangelist

The book is a warning about the consequences of leaving God, from Light, from Love, from high vibrations to low ones. If the majority of the population did this, it would lead to a catastrophe, which is described as wars, epidemics, destruction, earthquakes, and so on. All this will happen if people sow the seeds of destruction around themselves. But before they are sown, the plant of this anger of destruction and rage,

resentment, must first grow in the soul of the person himself.

#270, 18:05

Negative Rh factor

A property of the body that was mutated several thousand years ago in a gene that codes for blood proteins. The organism that emerged as a result of this mutation no longer contained this protein in its blood. Gradually it began to be passed on to others through generations and spread throughout the globe. An additional protein in the blood, which was formed as a result of its own mutations in already created earthly hybrids.

#75, 01:12:42, #149, 39:50

Lack of meaning in life

A state when there are no longer any goals that are valuable to a certain person.

#315, 00:22

Cooling

Reducing the amount of thermal energy in a particular material body or in a particular space.

#148, 14:01

Hamer's hearth

A source of excitation in the brain. The brain's response to emotions. A group of excited neurons that contain more electrical signals, including

transmitters, those substances that help maintain this excitement.

#124, 01:49

Queue for implementation

Waiting for conditions of incarnation that are suitable for the spirit: suitable parents, people who will interact with him in life to achieve the goals that were planned before incarnation.

#165, 19:22

Osho

Contactor, mainly with plasmoid civilizations, to a lesser extent with the Spiritual World.

#182, 56:03

P

Fallen Angel

A spirit that was previously a High Angel from level 24 and then lowered its level.

#283, 06:18

Pallas

Celestial body, asteroid. This is a fragment from the planet Phaeton.

#332, 11:21

Memory

The ability of the mind to store and reproduce information.

#345, 30:12

Memory of the embodied part of the spirit

Everything that is loaded into short-term memory through perception. Through the spiritual channel, it is sent for storage to the spiritual part of the disembodied spirit, the so-called long-term memory.

#192, 11:31, #233, 01:18:07

Crystal lattice memory

A special property of a stone or crystal that allows a person or humanoid, when directing their life force into this object, to charge it with their thought form, which will then influence the auras of other people and humanoids.

#26 50:18

Memory of past incarnations

Those records of past experience that are blocked for all spirits incarnating in the material world. This occurs due to the need for spirits to adapt not only to a new body, but also to a new environment, a new world, new knowledge, since past memory and past experience

can interfere with this.

#27, 36:47

A memorial service

The general prayer in the church is that the spirit that left the body after the end of the incarnation be under the protection of the Angels of the Christian egregor, so that they fill it with Light, help find a better favorable incarnation and support it during the period of time when it is in the spiritual world. This is an additional request that expresses the love and care of the living for their deceased relatives.

It makes sense in the case of preliminary connection during the lifetime of the deceased to a Christian egregor, according to its rules.

If a person is not baptized , then you can send him energy in home prayer, including in your own words, asking the Angels, Archangel Michael, Archangel Raphael to help this spirit pass its path to the spiritual world to its own level and adapt there.

#234, 41:47

Easter

A holiday symbolizing the resurrection of the soul to the Light. And therefore, it is advisable to devote this day to communication with your Higher Self, prayer, good deeds, communication with family and relatives. Perhaps communicating with those relatives whom you have not seen for a long time, that is, exchanging Love. And work should fade into the background if it is not paramount.

#439, 30:03, 32:33, 45:10, 48:05

Interstellar Union Paradigm

The entire Universe and all creatures living in it are Divine Light in one form or another or form of manifestation.

#211, 22:41

Parallel reality

A reality that exists in the astral world, created by the mental images of various egregors, where scenarios of events that have not been embodied in real life can be formed.

#30, 10:06

A parallel world

From the words “walking next to”, which suggests that these spaces are located next to each other, without touching. But, from the point of view of the observer, for example, in the astral body, which pays attention to these vibrations, they are, as it were, embedded one in the other, not going side by side, but going together. And so 59 levels of density are superimposed.

#180, 06:45

Intracellular pathogens

Formations similar to bacteriophages, only they are specific to our cells.

#410, 46:03

Patriotism

Love, respect and honor for the Motherland, your country, your government and your people.

#444, 14:38

Pesach

Jewish Passover. The commandment about this holiday was already in the book of Exodus, which was part of the Old Testament, the Torah. This holiday was also passed down to Moses and was celebrated in honor of the memory of how the Jews left Egypt. This is the holiday of Passover.

Celebrated on the 14th of Nisan - this is the Jewish month. And every year it is celebrated differently, the date of the 14th Nisan shifts, because the Jews still have a religious calendar that relates not to the solar calendar, but to the lunisolar one. Lunar months are taken into account there.

#439, 30:03, 45:10

Originality

The direction of the freedom of Jesus (Yahweh, Mashiach) is constantly towards the Light. The ability, in the smallest manifestations of one’s thoughts and volitional movements of one’s soul, to follow the path of Light, regardless of any external obstacles, according to one’s will.

#206, 12:05

First civilizations

Civilizations that occurred more than 270 million years ago. Their descendants are the Ashtar civilization from the planet Sirius. One of

the first civilizations was Shimor, then Burkhad from the Vega system.

#115, 23:11

The first impulse of the self-conscious spirit

A feeling of separation from the divine stream from which he arose. As soon as self-awareness appears, the spirit knows that it is a person who has not yet known incarnations. It can arise at any level of the spiritual world, since Divine Light penetrates through all levels. And, having first arisen, he has a desire to be, to exist, and this leads him to the idea of incarnation in some material world, in some density.

#283, 23:16

The first level of density of the material world

Solid medium. Those who live in a dense environment live at this level.

#112, 34:00, #180, 17:33

Perga

Product fermented with honey. Bee bread contains more nutrients and antiseptic substances. It is considered a more valuable nutrient. It has the ability to cleanse the body of toxins and increase its ability to adapt to various harmful environmental conditions. Even to ionizing radiation. Bee bread cleanses of toxins, normalizes blood pressure, cleanses blood vessels of cholesterol plaques and contains a lot of vitamins, microelements and valuable amino acids in an easily digestible form. Can be used for those who have an unbalanced diet.

#255, 35:32

Alternating electromagnetic field

The energy of atoms of the first level, relatively easily susceptible to the influence of creatures (plasmoids) that do not have a dense material body.

#170, 05:30

The Earth's transition to the fifth dimension

Transformation of the earthly noosphere, that is, that part of the astral atmosphere where egregors, thoughts and feelings are located, on which the ideology of society depends.

#36, 45:10

Perseus

The man, an earthling, was a farmer and a contactor with aliens, had the ability for psychic influence and wisdom passed on to him by his curators.

#288, 01:07:18

Perun, Zeus

Representatives of Burkhad on Earth. Thunder and lightning demonstrated the weapons that their ships carried to protect themselves from ill-wishers.

#22, 01:05:12

Peter the First

One of the heirs of the Romanov dynasty. His brother Ivan ruled with him. Sister Sonya ruled earlier (the boyars insisted on this).

The first wife of Peter I is Dunya. She had a son from Peter, Alexey.

Second wife, Martha, whom we know as Catherine.

I entered incarnation at the 12th spiritual level and came out at the 13th level, increasing my level. Then he incarnated as the son of I.V. Stalin - Vasily Stalin,

who came out of incarnation at the 6th level, the level of archons.

#373, 00:02 #373, 07:28 #373, 18:40

Pyramid (crystal)

A body in the middle of which light is not simply reflected between the top and the base. At the energetic level, he is born there. It's like a white ball, the light diverges along the edges of the pyramid, going down as a stream and up as a beam. This light is born because a material such as rock crystal consists of a molecular structure that attracts certain vibrational wave qualities of space from the subtle worlds. In a pyramidal form, this all amplifies and collects energy from the ether. Only this collects energy not for use, for transferring electricity somewhere, but specifically for healing. The pyramid is needed so that these energies have a healing effect. When energy flows along the edges, it has a positive effect on the cells of the human body.

When you lean your third eye towards it, the energy exchange increases. And if you place it on the top of your head, it will strengthen the spiritual channel by 25 times.

#408, 35:58

Pyramids

Structures built mainly by representatives of Tumesout and its colonies to harmonize space. They have a shape characteristic of the spaceships of the Tumesout civilization , as well as their dwellings on Tumesout . Pyramids are capable of enhancing the etheric and astral fields of a person and changing the material properties of an object consisting of atoms, influencing water, creating chains of molecules in it, projecting the energy of the pyramid into the water. If the pyramids are located on the same meridian, they are able to cleanse the planet and give it new vibrations.

The first pyramids appeared in the area 5,000 years ago. They were built by people, the Egyptians, but with the use of technology and sometimes using biorobots. Naturally, the people of Egypt itself, including captured slaves, made a great contribution to this construction .

Different technologies were used. Tools for carving stones were given (by other aliens, from other civilizations). People were shown how to work with stones to create sculptures, such as art. Then they themselves used it for the pyramids.

At different heights from the base, the pyramids exhibit different properties. But this depends on whether the pyramids are four-sided or three-sided , as well as on the height of the pyramid and the material of the walls. For example, in a metal pyramid or in a pyramid made of wood, or from a certain type of stone, different properties appear.

The granite pyramid has preservative properties: the ability to preserve the atoms of a dense material body, that is, the growth of microbes stops, microbes do not multiply, and due to this the body is preserved longer compared to being outside the pyramid.

In a granite pyramid, for example, 20 meters high (there are such in Egypt), preservative properties appear at a height of 30 centimeters to about 3-3.5 meters. Then you can build a ladder and make a shelf in the wall of the pyramid. At a height of approximately 8 meters 40 cm,

the properties of the portal appear. There it is good to open portals to those worlds that relate to the control of the elements. A little higher, in the area of 12 meters, 2 meters above the middle of the pyramid, energies from space are attracted that heal the body. Here there were usually healing rooms with thick walls.

Tumesoutians believe that the pyramidal shape of the space in which you live contributes to the opening of the upper centers and enlightenment.

They believed that the pyramid repeated the structure of the spirit. Just as the spirit consists of three structures: mind, energy and spiritual heart, so does the pyramid: a top and two corners, like a triangle. Therefore, their pyramidal shape was developed. They had a lot of contact with earthlings. Earthlings saw them on pyramid ships and asked: “Why this shape?” The Tumesout people said that on their planet this is a form of cleansing space, increasing its vibrations, and therefore comfort, coziness and accelerating spiritual evolution.

This space is protected from low vibrational entities. It regenerates faster on the physical level. People began to pass information about this to each other and wanted to be in such a space. Then they passed it on to their descendants and they began to build.

Aliens themselves helped build some of the old pyramids. The Tumesoutians mainly did this so that people would feel like they were part of the Universe in the pyramid. You sit down in it and easily enter a state of meditation.

Small pyramids were built by people themselves; incredible efforts were indeed made to this end. There was a slave system back then. Thousands of slaves died on construction sites from overwork, from the hot sun, and from epidemics.

01:01:33

Rational nutrition (for Eslerites and special earthlings)

Eat what is pleasant, what you want to eat. In general, stick to a 70% plant-based diet that includes what are called grains, nuts, fruits and vegetables. 30% are animal products, but the expression “animal products” does not only mean meat. Animal products other than meat include: dairy products, eggs, fish. For a complete, varied diet, of these 30% of animal products, 15% are dairy products, and the remaining 15%: - 5% each for eggs, fish and meat. The percentage of the diet of meat and meat products is no more than 5%.

#185, 01:43:27

Powered by Solar Energy

Eating any food on Earth. To be able to absorb solar energy, plants contain chlorophyll . Sunlight comes from space, being at the same time cosmic energy, and, falling on a plant leaf, it begins to react with water and nutrients that enter the plant from the soil, and form other substances. Thus, the entire mass of the plant, its leaves, stems, roots, fruits, represents materialized sunlight. Herbivores, eating plant foods, also consume solar energy, and so on along the food chain.

#143, 00:22

Pythagoras

Contactor with Burkhad . The Pythagorean psychomatrix system is the closest in calculating the vibrations of the Spirit.

#15, 08:38

Plasma

Any state and manifestation of matter at 56 levels of density, starting from the 4th and ending with the 59th, a state of energy fields, which can be expressed in Russian, approximately as ether, etheric fields. Various worlds exist in these etheric fields, including those that exist on Earth, underground, in the layers of the atmosphere, in outer space, and do not require oxygen because they have no metabolism. They also exist in the chromospheres of stars, even in huge giant stars and in their cores. The thin body of plasmoids is not subject to destruction from high temperature and thermonuclear reactions. On the contrary, they take part of this energy for their nutrition.

It is no coincidence that they incarnated in that world; they have their own tasks there: to monitor the development of stellar systems, the relationship of energy fields in outer space.

This is observed by intergalactic plasmoids, galactic plasmoids, plasmoids from the galactic core of the energy center of each Galaxy.

#398, 04:24

Plasma field

The field obtained from mixing 70% hydrogen and 30% helium at a temperature of 7000 degrees Kelvin and a pressure of 15 atmospheres.

#141, 21:00

Plasmoid worlds

Thin-material worlds with 56 levels of density, frequency measured in thousands and hundreds of thousands of terohertz . In fact, there are tens of times more of them than dense materials .

There are different types of plasmoids on Earth: intelligent balls, rays of Light, intelligent radio waves. They are on all planets, for example, terrestrial ones. These are the so-called spirits of nature, which are various elementals, spirits of the elements, as well as various spirits of houses, forests, fields, rivers, mountains, etc. There are plasmoid civilizations of the space type.

A link between physical civilizations and the Spiritual world. There are many more of them than physical civilizations. They are located at many levels of density, and almost the entire Cosmos was created with the help of these civilizations: stars , all planets, galaxies, they were collected by plasmoids, Spirits who were embodied there from energy at accessible density levels. There are a very large number of them, a very wide variety. They can take on any form.

#6, 08:04, #126, 55:00, #155, 31:03, #391, 47:39, #408, 13:52

Plasmoids

Creatures in which there is no gas, but simply energy. The ending “-id” means plasmoid-like. What is its similarity? The fact is that it has a subtle body structure, but at the same time it is invisible. It glows just like the Sun, which consists of plasma, or ball lightning. He may live in the center of the stars. It is similar to plasma, but not plasma itself.

Intelligent spirits, embodied in the subtle world, whose bodies consist of the energy of light, ultraviolet, radio waves, only in the high part of the spectrum. There are more than 90,000,000,000 of them on Earth. Previously, they were called spirits of nature, spirits of the elements - sylphs, salamanders. Ball lightning is an example of a manifested plasmoid. Being intelligent spirits with feelings, intelligence and energy, combining all this together, plasmoids create the souls of animals, plants, microorganisms, etc., endowing them with their life force. This is the meaning of their existence. They can live in the atmosphere of planets, the chromosphere of stars , near the core of the Sun. The energy that stars emit is attractive to stellar plasmoids as food. Their food is light, heat, and radiation.

This is a form of life that can exist within a very wide range: from

several Earth days to several thousand, and even plasmoids are known that live up to millions of years. Plasmoids are at density levels ranging from four to fifty-nine. Plasmoids do not have a physical odor, because smell is a characteristic of a dense material body and it depends on the presence of certain molecules. They have a special energy, which may well be perceived as something similar to smell, taste and color, by analogy with earthly senses. Physical bodies and all molecules do not appear out of nowhere. They are created from elemental elements. Plasmoids collect elements into atoms. At the same time, the spirit, incarnating, takes elements from the nature of the Earth to build its body from the plasmoid civilizations of the Earth, which are at different levels of density. And when a spirit incarnates, before incarnation it in any case turns to plasmoids . There is a special appeal to the plasmoid civilizations of the planet where you are incarnating , with a request to provide elements for the construction of a dense material body to carry out the tasks that the spirit has outlined for itself before incarnation. And there is a promise to take care of the body, fill it with Light and Love. And with love, return this body to the elements of the Earth after incarnation so that the plasmoid civilizations of the Earth, through insects and microorganisms, can decompose this body again into elements for the incarnation of others. To create a molecule, it must be assembled from an atom. To collect atoms, you need to collect energies. This is from the four elements - the energies of water, fire, earth and air. Therefore, on each planet the number of plasmoid civilizations is many times greater than the number, for example, of people. On Earth, if you count all levels of density, there are approximately 880 plasmoids for each person. They still have to create the biosphere. They must create plants, animals, insects, they must eat something and transfer these atoms, and replenish their body with some atoms.

Spiritual mentors, Angel Consultants, before a spirit wants to incarnate on any planet, they first recommend going through several incarnations in the plasmoid civilizations of this planet in order to build this matter for more dense ones . And then you yourself, as it were, put your energy into this planet, into this civilization, in order to then incarnate there yourself.

The more light energy is allocated to plasmoids, the longer they are ready to allocate matter for the construction of body atoms and the maintenance of one or another embodied spirit. They have such an agreement with the Spiritual world that the more a high-vibration society creates on this or that planet, the more plasmoids are fed from

this, enjoy life, and the more they in return give the opportunity to live on this planet.

If a spirit incarnates, for which the period of incarnation should be a vital task, the plasmoids are made aware of this. And even if it is a low-vibration spirit, it can also incarnate. His angels can come into contact with plasmoids and themselves provide him with this energy, as they say on Earth - “spiritual credit”. That is, we ourselves provide the energy of Love to these plasmoids so that they can help this spirit be in incarnation longer, so that it can come to awareness, and do in one incarnation what he planned in several. But if he begins to lower his vibrations, both the Angels and the plasmoids may change their minds.

There are high-density plasmoids whose bodies occupy several tens of light years. They condense the matter that is on their plane until matter appears to form galaxies. Then, in these galaxies, other, smaller bodies are formed by other plasmoids. Individual stars are formed, and only then planets and all physical life on them, the biosphere and beyond. This is all due to the intelligent advice of these plasmoids, who take their wisdom from the wisdom of the Divine presence, which is omnipresent.

#6, 08:04, #18, 47:00, 57:40, #22, 01:13, #39, 42:07, #76, 06:10, 56:10, #155, 31:03, #170, 05:30, #157, 14:10, #180, 15:05, #266, 17:37, #272, 34:10, #324, 38:18, #326, 14:32, #344, 25:22, #346, 01:15, #349, 01:36:58, #371, 06:56, 36:17, #372, 16:20, #382, 30:13, #383, 01:15, 33:00, 37:20, #402, 53:34, #420, 20:18, #459, 18:03, #495, 01:03:16

Plasmoids of Venus

Plasmoids of the 26th density level, mixing different layers of the atmosphere to keep this planet stable after the catastrophe that occurred in the third density level. Many plasmoids were also damaged, and there was a surge of large amounts of negative energy. Plasmoid civilizations cleared the noosphere of the planet from this for a long time. Now the task of this civilization is to keep it in harmony.

#408, 13:52

Plasmoids of the eighth level of fire elemental density

Plasmoids are from a world entirely made of fire, but this fire is ethereal. It is like a sea of fire, in which its waves rise, from which even the ethereal cities are composed - the places where plasmoids reside. And even the bodies of the creatures that incarnate there consist of fire; they are called “salamanders,” representatives of the element of fire.

Upon contact with a person, such a plasmoid can take the form of a person in the Astral Plane. But his body will be fiery (like a burning man, and his face is burning, like heat from a stove, ashes, ash - and his whole face is in it).

#434, 09:19

Plasmoids (tasks like spirits of nature)

Completely create and maintain the Earth's biosphere at all levels.

#414, 01:02:58

Plasmoids of the Earth

Creatures called nature spirits: elemental spirits, water spirits, forest spirits, house spirits - these are the so-called “earthly forms of plasmoid civilization.” They also have a body, but it no longer contains a biological component. They have it inorganic. It consists of various energies. They reproduce in a certain way: by budding, for example, by emitting various rays, by emitting various rays from themselves. They create energy bodies that are invisible to the physical eyes of people due to their high vibrations. The vibrations of their bodies are higher than the eye can perceive. But sometimes they can, if they lower their vibrations (this is usually quite difficult and unpleasant for

them), become visible. A person can physically see something like a ghost, for example, or some kind of ball lightning. They can do this for various purposes. Not all plasmoids can do this. Only those who do this can.

#344, 39:20

Plasmoids of the Moon

Six civilizations of different density levels. Unlike terrestrial plasmoids, plasmoids of the Moon do not form a biosphere on it. They simply maintain the state of the energy fields of the Moon itself. And there are still the Spirits of the elements who create and support the law of conservation of substances of their civilizations. Those Spirits who create atoms are present there to keep it all in this space.

#352, 50:35

Plasmoids (what happens to them after the destruction/death of the forest?)

If the destruction of forest occurs on an area larger than 2.5 hectares, then this begins to affect the biosphere of this place and animals in large quantities. The plasmoids that created the souls of forest animals, plant souls of trees, bushes, forest herbs, and mushrooms have unclaimed energy. If the vegetation whose souls they created is destroyed, the plasmoids will not be able to create other tree souls. It takes time for a tree to grow in a dense material world.

The fate of the forest plasmoids depends, firstly, on their desire. What will happen where the forest has been cut down? If there is just grass growing there, a meadow, then they can stay to create the souls of herbs, flowers, microorganisms, animals that will live in this place.

If the plasmoids do not want or cannot stay there (many are able to give birth to the souls of only certain trees), then they go to another territory, to where they are needed. There are many areas where there used to be a meadow, pasture, field, but now no one lives, and a new

forest is growing there . He's still short. They can go there.

If the forest was cut down, the trees were not just cut down and burned, or thrown into Lake Baikal, but were aimed at some human purpose, then the plasmoids understand this very well. They simply move to the place where there is a need for them and their services.

If a forest stands for a long time, for the last 250-300 years, and people do not enter it, its own processes begin there. Trees that have been standing for a long time become old. The rings inside the tree grow on each other and are less well supplied with sap from the ground.

Every year, any mature coniferous or deciduous tree bears seeds. They fall to the ground. It's raining. Tree seeds have the ability to germinate even if they are not buried. All they need is rain and a certain temperature, and a shoot of young trees forms around the tree. One tree can produce up to several tens of thousands of seeds.

Some die from the cold, while others find themselves in such conditions that they begin to sprout around the tree and the wind cannot blow them away. After several decades, it turns out that young trees begin to take food from their parent. This makes him weaker and he is attacked by parasitic fungi and insects.

Inside this old tree there is such a mass that it no longer holds it together. If the wind blows, it may fall. This is a natural change (without people). She, of course, goes slower. Over many years of falling leaves, a layer is formed on the ground through which, for example, grass cannot grow. It rains, everything begins to gradually decompose. A swamp may form. If the plasmoids of this area do not call upon the plasmoids of fire and start a fire that will cleanse it all, then this will happen. Forests where people do not interfere often burn. If it doesn’t burn, it turns into very impassable rubble not only for people, but also for animals. These territories are also useless for plasmoids, because even animals cannot be around this place.

Plasmoids cannot burn; they have a thin body. Temperature doesn't affect it.

#370, 44:30

Plasmoids of the Sun, Solar Civilization Ra

Group mind at its density levels. The 18th density level is the chromosphere of the Sun, the 24th density level is much closer to the solar core.

#183, 00:21

A planet

A celestial body made of solid matter that orbits the Sun.

#402, 18:16

Planet Goloka Vrindavana

A planet that exists in the spiritual world, the world of Krishna's spirit, in which he creates images and thought forms that are real for Krishna himself and all his guests who come to him. Guests bring their energy and their ideas there, which do not contradict Krishna. Spirits from levels 22 to 24 have access there.

#310, 19:15

Planet Laurnha

Planet in the constellation Scutum. Representatives look like creatures glowing greenish in the dark, with a lot of phosphorus in their skin. In general, they are similar to humans, but with 6 limbs, like insects. Their faces are like people's, only elongated. Previously they had a base on Earth. The last visit to Earth, which they had already studied, was about 40 years ago. They do not have physical contactors on Earth. Currently they are studying and developing other planets. They have a

base on the asteroid Ceres.

#218, 38:51

Planet of Outlaws

A planet to isolate criminals from society, where they work for the benefit of the Interstellar Union. This planet is located in the constellation Aries. If the criminal has already been detained, then the death penalty is prohibited for him, because this is not in the Interstellar Union, and because this does not allow the soul of this criminal to realize what he has done and reach higher vibrations. They have medical care there, they have information, that is, they can develop spiritually. There are special psychologists who work with them. They work with their spirit, help them realize why they came to this, etc. But criminals do not have the opportunity to leave this planet until their sentence ends. Different crimes have their own specific time limits. If the crime is serious , then the criminals will remain on the planet for life. The planet is divided into different sectors, like cities, but they do not touch each other, they are separated by walls. There, criminals are grouped according to different crimes. Spiritual criminologists help them reach their Higher Self and correct the block in their soul that led them to crime.

If a humanoid corrects his soul and this is confirmed by three independent spiritual psychologists who work specifically with the criminal tendencies of intelligent spirits, he may even be released early or, if the sentence is for life, then this punishment may be lifted. If he commits the same or any other offense again, then he is again sent (forever) to the planet of criminals. And also those who approved his exit are subject to removal from their positions. They are responsible for it.

#150 36:16, #234, 26:52; #272, 52:53, #352, 30:15, 30:04

Planetary model of the atom

A model of the structure of an atom in which the atom is believed to

consist of a positively charged nucleus around which electrons orbit, just as the planets orbit the Sun. However, this model is not true and does not answer many questions. In the solution to the true structure of the atom lies the solution to the question of the structure of the gravitational engine, which cannot be understood through calculations, as earthly scientists are trying to do.

#144, 01:07

Planetary motor

A type of engine that is used near planets. With their help, flights are made from the planet itself to the point in space where it is possible to turn on the gravitational engine, where the gravitational field of the planet itself will not interfere with this. The operating principle is based on the use of magnetic field energies. This engine consists of plates made of a special alloy rotating in different planes, which includes two main components - tellurium and palladium. These elements contain energies of such types and vibrations that, with the help of energies coming from the engine, can capture the magnetic field radiation of a particular planet and create their own magnetic field, repelling it from the planet, or attracting it. The maximum speed that a ship with a mass of up to 1200 kg can develop using a planetary engine is approximately 1/8 of the speed of light.

#17, 40:00, 42:22

Dense substance

Not only what can be touched, like solids , but liquid and gaseous substances are also dense elements because they are composed of substances.

#398, 32:16

Dense material world

The world around us, in which we live, consists of energies at a certain vibration frequency. All substances that are on the periodic table.

#33, 25:44, #68, 52:50, #110, 13:30

Density of matter

The speed of vibrations, their frequency and the speed of vibrations that make up this or that energy. There are 3 levels of density in a dense material state - solid , liquid and gaseous states.

#33, 27:12

Pluto

A planet that, many millions of years ago, was captured by the Solar System from another star system by the attraction of the giant planets, when these two star systems were close to each other during the period of passage around the center.

#234, 01:44

Raising vibrations

Increase the share of positive energies in your astral body: love, joy, trust, openness. This immediately sharply increases sensitivity to the astral world. Because according to Divine law, this is the natural protection that a person has from the astral world; it opens up more easily in high-vibration people. First of all, this is done for our safety. So that a person with his low vibrations does not see those whom he has attracted , since in many cases this can be dangerous for his psyche and for the people around him subsequently.

#65, 28:27, #165, 47:20

Suppression of will

When parents do not allow the child to develop in his activity. If a child is required to obey in every detail, then this is a direct path to his future dependence on other people's opinions, on another person and, as the highest point of damage to the soul, dependence on chemicals. Suppression of will helps this person control other people.

#50, 23:01

A gift

A symbol of not only goodwill towards a certain person, not only a sign of Love. It contains the meaning of how to relate to this person, maybe even some kind of spiritual advice. A child can give something to his parents or vice versa.

#422, 20:29

Underwater civilizations

Civilizations that exist in that part of the sky called the Big Dipper. Their representatives have bodies of intelligent creatures that resemble large fish. They have differences: they are quite intelligent, but due to the fact that they belong to an underwater civilization that has not reached land, they do not have physical flights in space.

In Galaxy M-31 , there are underwater civilizations of cephalopods similar to octopuses, and they also have not reached land. At least they don't make independent flights. They simply have nothing to build ships with, so to speak. Their body has developed to the extent that a rational spirit can incarnate there. Since an intelligent spirit can incarnate there, then among them there are contactees .

#40, 43:33

Podzorova Irina

Contactor with extraterrestrial civilizations.

In the summer of 1999, a thirteen-year-old girl Irina Podzorova from the village of Peski near Voronezh agreed to take a short trip on a triangular-shaped ship with aliens from the constellation Cassiopeia. Since then, for more than twenty years, representatives of the civilizations of the Interstellar Union of our Galaxy, which includes 116 of the 727 existing intelligent races, have been regularly in contact with her .

#185

Settler

Contact with some entity: plasmoids, disembodied spirits. Humanoids are not settlers because they have their own bodies. They return to them. The settler regularly stays with the person in his field. If these are plasmoids, then they make a communication channel, which we call bindings. It is like a thread that stretches from the human field to the world of the plasmoid. Although he is not nearby all the time, he is in contact all the time. It can also sometimes be called a subversive, especially if it greatly influences a person.

#328, 01:00:41

Subconscious

Any process that is currently unconscious to perception.

#89, 29:08

Positive

Positive energies inherent in every animal and person. Without them, no one would survive or create the society that exists.

#16, 01:46

Cognition

Increasing knowledge, strengthening the mind. A person reads books, studies various sciences, writes some articles, he spends his time and energy on increasing his mind. And the mind is a part of the spirit. Cognition is one of the forms of spiritual development. But this spiritual development is not of the heart, but of the mind.

#393, 30:32

Repentance

A type of connection with your Higher Self in the form of awareness of a negative behavior scenario.

#423, 04:44

Worship God

Form of Love. Recognition of the primacy of God in the Universe. Thanks to Him for the created world.

#243, 49:16

Generation

Those spirits that entered embodiment at the same time and coexist at the same time. These are people of different ages, but of the same

generation. For example, now there is a certain number of spirits at the physical level of density on Earth from a baby to an old man, and this is all considered one generation. But, of course, it is constantly changing. For earthlings, the time of one generation is approximately 40-43 years.

#465, 01:01:00

Healthy diet

A variety of fractional meals. It is better to eat little and often. It is better to eat animal meat 2-3 times a week, on other days, if you are used to it, poultry meat. It's good to eat sea fish 1-2 times a week. A larger amount of the diet should consist of plant foods - fruits, herbs, vegetables, cereals. The ratio of plant and animal foods should be approximately 70:30. Carbohydrates, i.e. sweets - 10-15% of the diet. 30% of animal food includes dairy products, eggs, and fish.

#71, 10:45, 13:17, 17:18

Polytheism

The deification of any powerful being who could somehow help a person in the difficult conditions of his survival. People's attention is distributed between the priests of different gods, they fight among themselves, and this makes the egregor weak. Having sinned before one God, people went to the priest of another God, making a sacrifice to him, so that he would intercede for the person before the God before whom they sinned. This was called magical thinking, and it interfered with spiritual perfection in many cases.

#261, 48:30, #326, 14:32

Pollutions

The reaction of the body, mainly of a teenager, to astral travel in a dream.

#134, 58:05

Sexual desire

A form of divine love energy that flows through the human body.

#179, 34:07

Poltergeist

Essentially unconscious telekinesis, most often caused by human factors. A person's vital energy can come out and suppress gravity in some object, which results in the movement of objects. It can manifest itself under stress and depression, especially in children and adolescents, that is, in a person who is growing and developing. In most cases, these are attempts to make contact with representatives of subtle-material civilizations (plasmoids). If a low-vibration spirit is embodied in such a plasmoid, then it spends its energy and the energy of the residents of the room on suppressing gravity. They (plasmoids) do this either for experimental purposes, to see how people will react to this, they also have research groups that study our physical dense material world. They can also simply drive a person into fear in order to feed on his energy.

#59, 31:00, #155, 23:25, #165, 50:00, #234, 01:03:56

A demigod

A spirit following the path of spiritual development and having found itself in a state of fusion, but still conditioned by the perception of the material body in which it is embodied or in which it is no longer embodied, but still continues in thoughts the experience that it received. We can say roughly: the one who half realized himself as one.

#33, 25:13, 33,21

polar Star

The point around which visible constellations revolve. The sky rotates when a person looks up. This is a person's perception. In different eras, the role of the North Star was performed by different stars. Once upon a time it was Vega. A very bright star.

#354, 48:17

Interference with contact with the Higher Self

Unbelief, doubt about His existence. Negative emotions, feelings, thought forms. Doubt about the existence of the spiritual world, distrust of oneself, one’s guide, who accompanies one to the Higher Self.

#31, 05:39

Remembrance of the Dead

Protection of the deceased from low vibrational attack upon the wish of the Light where he is. Without regret that he left, without the desire to return him. He will feel more strength, a surge of energy.

#178, 01:10:22

Helping you connect with your Higher Self

Cleansing from negative thought forms, vibrations, tracking grievances and irritations, cleansing from them. Getting rid of the causes of negative emotions and feelings. Increasing self-awareness as a spirit

and self-confidence. Understanding the temporality of your incarnation. Fighting doubts, driving away fears. Developing love and trust in yourself.

#31, 07:58

Help for the soul of a suicide

A prayer sent to the soul of a suicide, which, with the Light of its Love, strengthens the feelings and thoughts of spiritual vibrations in him, helps him to want to get closer to God, to choose a favorable incarnation for himself.

#165, 01:04:11

Reduced vibrations

Seven deadly sins.

#165, 47:20

Pontius Pilate

A spirit that has left after disincarnation to the eighth level. Now embodied in a woman on Burkhad .

#241, 01:25:03

Vice

A sin that has become a habit.

#63, 13:26

Portals to the Antiverse

Passages usually located in the centers of galaxies. If a body is not vibrationally compatible with the center of the galaxy itself, the energy located in the center of the galaxy will not let it through.

#22, 36:20

Damage

A negatively charged thought form consciously created by a person, reinforced in the Astral by the energies and thought forms of plasmoids, the curators of this person: a magician or sorcerer who contacts consciously, unconsciously or semi-consciously with certain plasmoid curators.

#280, 01:13:25, #284, 17:56

Poseidon (Neptune)

The head of the water plasmoids, a subtle-material being, senior over all representatives of the world of its density, those who created and controlled the element of water on Earth. Named the spiritual brother of Zeus (Cephaestis).

#288, 37:42

The sequence of civilizations joining the Interstellar Union

Signing an agreement in electronic form, which states that this is done based on the results of universal voting on the planet, with at least 70% of the population voting for accession. After joining this planet, representatives of the Interstellar Union arrive and teach local scientists new technologies. The emphasis is precisely on teaching the scientists of this civilization new technologies, and not giving

ready-made ships and so on.

#144, 24:20

Fasting (spiritual meaning)

Mercy, expressed in the fact that money accumulated and earned by a person is given to the poor or food is bought for them. Feeding not your own flesh, but for a while feeding others who cannot repay you. Unselfishly, of course. The poor, the sick, the disabled, widows, and so on, who cannot take care of themselves.

#305, 55:22

Flow of time

The process of changing material particles through their movement, interchange and changing the world.

#420, 10:45

Users

Spirits from the 11th level of the World of Unincarnate Spirits. Spirits who have learned the beauty of the material world in receiving various sensual pleasures and who spend their energy working for money that can give them things that are pleasant to them. Unlike demons, they will not transgress moral standards, much less the laws of the society where they live, but their hearts are occupied with the desire for material wealth, and their minds are occupied with thoughts of how to acquire them and what to spend them on for greater pleasure. Busy with such worries from morning to evening, they often have neither the time nor the desire to think about their spiritual development, much less make any efforts in this direction.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

Otherworld (interaction with it)

Energy exchange during the interaction of certain types of plasmoids or disembodied spirits of different levels with any person. If you want to communicate with him, if you feel his appeal to you, then you ask him to mentally speak to you in those images and words that will be understandable to you. If he doesn’t succeed, he can’t always get along with you, then using your will, ask him: I ask you to leave me alone and never contact me again.

#28, 47:30

Kiss

Gesture. Touching any part of the body with the lips, indicating the transfer of energy from the fifth chakra, i.e. from the creativity chakra, and plus breathing healing. For your child - healing, for a loved one - transferring love through the lips, approving with your energy the creativity of this person’s words, and so on. A kiss on the forehead is an approval of the words, recognizing them as true, and, of course, also a transfer of energy.

#270, 22:16

Poetic inspiration

A special state of human consciousness in which he is able to perceive information in images and translate it into words without changes. It's not just about writing poetry. It can manifest itself in different ways. " Poetos " is a creator. The Greek word " poetics " means to create. This is work.

#297, 07:36

Emergence of the Universe

The next cycle will begin. First, fine-material worlds will appear, then denser ones. And as soon as the first worlds appear, which consist of matter, even the most subtle, spirits will already have the possibility of incarnation. Those who are in low vibrations will be the first to go to incarnation, because the suffering that they will experience will push them to incarnate in order to raise their vibrations. Further, the worlds will become more and more dense, because the denser the matter, the faster you can learn improvement lessons in it.

#264, 07:23

Is it true

A view of the world that is true for every person. There are many types of truth, but each person has his own truth, depending on his idea of moral standards. But in contrast to this truth, there is one truth, and each truth serves only as a part, a reflection, or, one might say, a refraction of this truth in every person, in every rational spirit, if you look more broadly.

#188, 29:12

Rules for visiting Earth by alien civilizations

The rules of the Interstellar Union, which state that any representative of another planet or another galaxy that is not part of the Interstellar Union cannot come to Earth without the permission of Burkhad , since they are our creators. Representatives of other galaxies, if they have any interest in Earth, should apply for Burhad.

#22, 13:32, 30:15

Proper nutrition

Nutrition according to the rules of your Higher Self, your own body.

#244, 38:25

The right

Feeling right.

#338, 02:36

Proto-Indo-European language

Common original language of the planet (derivatives: Sanskrit and Russian).

#197, 10:50

Practice of filling with Light

Close your eyes, concentrate on the sensations and repeat the words that you are

Light. Energy is controlled by thoughts and words, as the expression of thoughts on

physical level.

I am the creative Light.

I am the creative Light.

I am the loving Light.

I am the Light of the absolute energy of the Universe.

I am ready to return to the number of divine Angels.

I forgive myself for all my mistakes.

In all its incarnations.

And incorrect attitudes outside of incarnations.

I love and accept myself for who I am.

I am God's beloved son.

With the power of my Spirit, I transform everything in myself that is incompatible with absolute Love

into the energy of Love, creation and inspiration.

#383, 41:05

Practice “Communication with the Sun”

#292, 59:21

Practice from Ashtar Sheran “Filling the Earth with Light”

Visualization of the Light inside your heart and the representation of the planet being filled with this Light.

#324, 19:13

Spiritual Growth Practices

Actions and thoughts to increase your vibrations, and therefore sensitivity to the Higher Self.

If you understand that you don’t feel anything, don’t believe in the Spiritual world, don’t rush to be disappointed and give it up. Just give yourself time, be calm about your disbelief, calm about your lack of feeling , calm about your ignorance. Start doing good deeds, and be sure to do them every day, at least a little, but spend 30-40 minutes reading some spiritual literature. These can be books of traditional religions - the Bible, Koran, Bhagavad Gita, or esoteric literature. The main thing is that it is filled with Light, so that there are no calls for any kind of hatred, for example. So that this is a story about the bright qualities of the soul.

After two or three months, you yourself will feel drawn to spiritual pursuits again. It will happen by itself. And this will be just a sign that you are ready. When you start doing them again, you will feel a completely different state. You will come to the same spiritual experience that you previously thought did not exist.

#407, 20:41

Practicing homosexual

One who comes into contact with a person of the same sex. During

sexual contact, their energies mix with each other. And since the energy is homogeneous, instead of the usual exchange that occurs between a man and a woman, there is an exchange of homogeneous energies, and this entails a gradual decrease in their energy potential, a weakening of the aura and a more rapid development of blocks in their chakras, compared to ordinary people .

#242, 20:16

Prana (ether)

Universal energy, a type of ether, a type of subtle energy. There is physical energy - heat, light, gravity, and there are subtle energies. Prana is one of them. The Interstellar Union distinguishes 75 types of prana, which are characteristic of certain civilizations.

For example, on Earth there are 14 species of them, which are characteristic of humans and plasmoids. To distinguish them from each other, you need either certain devices that work according to the principles of the Interstellar Union, based on nanotechnology, or the sensitivity of the body itself, which can only be developed through the practice of communicating with different entities.

Prana is the vital force that the physical body releases from the chemical reactions that occur during the breakdown of food substances into simple substances, joining oxygen.

Prana is the part of the ether that is closer to the material world and separates the material and spiritual worlds.

Ideas about the future.

#14, 03:10, #17, 01:02:22, #76, 39:29, #180, 49:20, #441, 12:50, #465, 53:57

Pranayama

Breathing practice.

Breathing is the most accessible and simple human tool, which has been used for all purposes: for physical development, for the prevention of diseases, for the treatment of diseases (there was a method of breathing therapy), and for mental health. Breathing practices were also used for spiritual improvement, so that by establishing a certain rhythm and type of breathing, a person would evoke certain states in himself.

The human brain is neuroplastic ; it can build long-lived chains of neurons that remember information at the level of molecular connections. Having developed a certain habit for himself , for example, a certain breathing rhythm and putting a spiritual meaning into it, a person at the level of brain neurons remembered that as soon as he breathed like that, this state would return to him. This was built into the conditioned reflex at the reflexive level.

#441, 12:50

Pranoedia

A nutrition system for people who, in embodiment in a material body, want to merge with the energy of space, with solar and cosmic energies. They have ideas that this will speed up their incarnation in the subtle world. According to Ra Ariya, these manifestations should not be on the physical plane, but on the spiritual: love for Light, love for the Sun, for Truth, for Life, because the Sun spreads life. Love should be manifested in the fact that you selflessly help others and wish them well, development, and through your practice you contribute to this.

The physical body needs physical food, just as the subtle material body needs food from solar energy. For each world there must be energy of a certain density so that the body can develop and carry out its task. Be a tool to accomplish your task. If a body receives energy that is not of its density, it will dissipate.

The transition to plant foods, if it is done without negative vibrations of

condemnation, anger, etc. on the people around him, contributes to the rebirth in the world of plasmoids, which create the souls of animals, because a person becomes closer to their consciousness, as he begins to think about how not to harm them. He understands them better. Becomes closer to nature, to the Sun. If a person absorbs more green mass, then through it he receives more solar energy. It is also found in animal food, but it is already processed by the energy of the animal.

If you sincerely believe that it is possible to evolve spiritually only on a plant-based diet, you must do it. If you think that you can evolve on any food, then this will not hinder your evolution at all. Each consciousness has a certain set of ideas about reality. You must follow it without condemnation, anger, irritability towards those people who made a different choice, and not consider them less spiritually enlightened than yourself. This will definitely not bring your chances of successfully completing the spiritual path of evolution any closer.

#183, 01:03:24, 01:05:07

Piglet

An energy practice in which a person lovingly prepares food and brings it to the altar of Krishna, and this means that any food is the energy of God. This practice teaches that if food is consumed with awareness, it will bring the greatest benefit as physical substance, energetic substance and spiritual charge.

Offered food to the Deity.

#309, 43:08, #310, 43:08

Dust of the ground (biblical)

A metaphor given to Moses in mythological form for his level of understanding and consciousness, in order to explain the origin of man. A figurative name for the genetic material of primates, which formed the basis for the creation of the body of earthly man. Dust -

because it was undeveloped (animal) life, earthly - because it was taken from the Earth.

#59, 12:40

Prashna (Sanskrit means question)

A section of astrology that deals with questions. Vedic astrology allows one to answer questions asked by a person to an astrologer at a certain time and place.

#354, 01:10

Parent language

A mixture of the original simplified Tumesout language and various dialects that appeared in the period before the war. People living at different ends of the single continent of the Earth, in contact with plasmoids, formed a syllabic proto-language.

After the war, several new languages were given to different tribes so that they could develop their peoples, civilizations and could live in different parts of the Earth. Their descendants created a variety of languages that resembled either one of the original ones, Tumesout, or the proto-language, or those that were given, but most likely a mixture.

You can trace in the words, if you break them down into syllables, the meaning that was originally intended by the priests. They spoke to the plasmoids and to each other in a syllabic proto-language. They modified the words of the Tumesout language, which the aliens gave them, syllable by syllable in order to put into the words their own meaning, which corresponded to the syllables. Any language on Earth, ancient or modern, developed from some branch of the proto-language.

They spoke the same language, which at first was simplified Tumesout. Then he began to adapt to earthly reality, people began to

come into contact with representatives of plasmoids, they also began to speak in syllables, and so they developed a syllabic language. It began to differ greatly from Tumesout already 3-4 thousand years after the first people settled on Earth.

In earlier stages, people from different regions of the Earth understood each other. There may have been different dialects, but they were no more different than the dialect of northern Germany from the southern one. In any case, they understood each other. And different names for the same thing, with different combinations of letters, appeared later.

It was a common language for the people. And there was also a language that was initially divided, but it was sacred. Each group of priests in each city and settlement had its own secret language from the plasmoids. It was more syllabic. In everyday life, it was more convenient for people to communicate in simple words, and priests wrote books with special runes. They put a syllable into each rune. Each syllable was figurative; they encrypted not just an object, but some quality. For example, as in the syllable “ra”, which meant the Sun, because the plasmoids that came from solar civilizations had a vibration perceived by the human brain as “r- rr, r-rro, r-rr, r-rra” with the letter "r". This “ra” came to mean the Sun. At the same time, it began to mean for the priests not only the Sun, but also light, the deity of the Sun, that is, more abstract concepts.

The syllable “sha” initially denoted a fast running animal, and then it began to denote a person too, since he ran quickly on two legs. "Sha" is something that moves quickly. When the syllable “sha” was pronounced, it was an impulse to move. "Sha" meant "man".

The syllable “du” meant “subtle body,” “invisible,” intangible by physical organs. Therefore, the addition of the syllables “du-sha” meant “the invisible in man.”

The roots of the proto-language can be traced in any language - German, English. If you say a word in German, you can also look it up syllable by syllable. If you look at the Russian word “man”, you can see that it consists of two words – “chelo” and “century”, which are also understood separately. "Lo" means "vessel", a container for something. “Che” or “ chi ” meant “mind” in the form of the intellect of

the knower, the knowledge base. “Chelo,” which also meant “forehead” among the ancient Slavs, means “vessel of the mind.” The syllable “ve” usually denoted development, cognition, movement - “movement for the development of knowledge.” Such an abstract concept.

Now some syllables need to come up with a meaning that can be denoted in several words, but previously it was denoted in one word, and was clear to everyone.

#256, 25:10, 30:47, 41:36, #343, 53:27

Tradition (oral tradition)

What was given to us. Much of Christ's teachings were transmitted orally. This was called "oral tradition" or "tradition". And for quite a long time the Christian Church lived according to these legends.

#397, 08:55

Devotee (in Vaishnava)

A certain state of consciousness when a person realizes himself completely as a particle of God.

#326, 04:20

Betrayal

Returning back to the state that was before the promise, oath, contract. If this was a promise of Light, that is, to develop in the Light, that is, an agreement, one might say, evolutionary, then the annulment and betrayal of this agreement is a return, that is, the degradation of the soul to the state in which it was before. At the same time, a person, his spirit loses all acquired vibrations and qualities. He loses, not just loses, but loses access to those qualities of the soul that were developed during this path, when he walked along it, because he

returns back. If this agreement was drawn up for the purpose of degradation, because there is an agreement about crimes (for example, we agreed to commit something criminal together), then the betrayal of this agreement stops the degradation.

#280, 30:09

Human Purpose

Fulfillment of those spiritual tasks and lessons that the spirit intended for itself or planned for itself before incarnation. Studying the information that the spirit should study in this life. Untying those karmic knots that need to be untied. Dissolution of various blocks that need to be dissolved so that they do not prevent the spirit from realizing itself as the Divine Light.

Increasing your spiritual level and making yourself like God, God the Creator. Full manifestation of creative abilities, abilities to love, create and rejoice, to be happy. This, one might say, is a global destination for all spirits.

The word “appointment” comes from the verb “to appoint.” To assign means to choose a task for yourself. But the preposition “pre” comes from the word “forward”. This means that destiny is choosing a task for yourself in advance, just before incarnation.

#477, 02:59

Predicting the future (reasons for error)

The inability of the spirit (who previously lived in the future, and if he was born here and remembered it, because your future is the past for him, and he remembered several events and predicted them) to explain to himself why the prediction was fulfilled, believing that God reveals this to him . And he begins to predict the future simply on the

basis of his logical thoughts, that is, without remembering. He has no memories, he predicts it. He already believes in himself and that this will come true. He believes he can see the future. And then, naturally, mistakes happen.

#47, 26:05

Premonition

Hints from high spiritual beings who know the future. It happens with the purpose of making a person change something, or when this happens , to believe that the Spiritual world exists. There is a God who knows the future and tells his highest Angels, the highest beings, that the future is known. Such premonitions never happen just like that. The future has many options and it can really be changed, but if there was some kind of premonition, and it really happened, and it could not be changed, despite attempts to do so, it means that it was given with the goal that the person and those to whom he would later will talk about it, they believed it, i.e. for witnessing. A premonition is given either to change it (this is a premonition of something bad), or to increase faith in the Spiritual world among those who are not able to feel it.

#28, 51:01

Transforming Negative Emotions

Dissolving blocks with mental attitudes opposite to negative ones.

#253, 03:31

Habit

A certain chain of certain conditioned reflexes recorded at the molecular level in the brain. This makes it easier for the brain to adapt to the world around it (neuroplasticity of the brain).

#455, 08:59

Bindings

Contacts with plasmoid civilizations, communication channels with subtle-material civilizations.

#52, 00:41, #67, 14:29, #205, 43:57

Signs of a low-vibration entity in the human field

Distrust of God, disbelief in His protection. Increased aggressiveness, irritability, frequent nightmares in sleep. Lack of desire to read spiritual literature. Frequent discussions about low vibrational states: anger, envy, gossip, and so on.

#165, 30:54

Signs

Some observations of people who have been observing some process for several years or decades or centuries have revealed a certain pattern that is being fulfilled. It can often be expressed in figurative form, and also this event could have happened a long time ago, this series of events, and in the present modern world it may lose relevance.

#280, 01:13:25

The principle “From each according to his ability, to each according to his needs”

This is an attempt to transfer the experience of existence in the spiritual world to the material world. “From each according to his ability” means the contribution to the common cause of the evolutionary development of all spirits, which each spirit makes, so that this development occurs evenly, consistently for all parts of the universe. The desire for development and for increasing complexity of any systems and spheres of the mind is characteristic of any spirit, since any spirit is a part of God, who has invested in it the desire for itself, as for development. Development is understood as complication and the acquisition of qualities that were not developed. “To each according to his needs” means God’s response through the entire universe to support the spirit. He gives the ability with his energy to support the ability of the spirit, feed it with energy and give it the opportunity for development. This means “to each according to his needs,” but not according to the needs recognized by the egoistic false ego, but according to the spiritual needs that are visible in the true Light of God of each, since God sees the spiritual Heart of each spirit. This does not work in the material world. In no world, no matter how perfect and moral, can this law be implemented due to the fact that matter itself is inert. Those abilities that are manifested by the spirit must be brought into matter. Abilities do not immediately appear, but needs are always there.

#263

The principle of the arrangement of elements in the periodic table of aliens

A principle that presupposes the arrangement of elements according to the type of matter, i.e. a certain element contains several elements of these elements. Elements are divided into 3 main groups: metals, non-metals and intermediate substances between them that exhibit these and other properties.

#258, 08:07

The principle of the formation of molecules from atoms of matter

The principle by which microgravity inside an atom attracts and allows atoms and molecules to stick together and arrange themselves according to spatial microlattices.

#141, 48:11

Principles of distribution of goods in society according to abilities and needs (socialist and communist)

The first is socialist: from each according to his ability, to each according to his work. This is the principle of energy exchange, it is universal.

An analogue of energy, labor, which is invested in the production of one loaf of bread or a liter of milk, in order to somehow harmonize this with each other, a unified payment system was introduced: this costs so many units of this, and this can be purchased for so many units of that... then, but human labor can be paid in so many units. This system is for convenience. It exists almost everywhere on humanoid planets in one form or another, because it saves time and effort.

The second is communist: from each according to his abilities, to each according to his needs. Abilities and needs may differ dramatically among different people, and this system is unrealistic for implementation in the material world, because the concepts of abilities and needs among people of the same society, and even more so on Earth, where a variety of entities are embodied, are very There are sharp differences, for example: the ability to write poetry and the ability to engage in some kind of production from metal ore. Here is hard physical work, and there is mental work. Both will have abilities, but their needs may be different.

The society that will consume the product of the poet and the steelmaker can provide both with goods according to their needs, but the steelmaker may need a living space of 200 square meters, and the poet - 50, and, accordingly, the poet’s relatives will already have questions, and there will be transformations that will not have a very positive effect on the political egregor, on its harmonization. And all the same, this will take the form of one or another payment in universal

units.

#235, 01:01:57

The nature of love

Give love not with words, but with practical deeds; to give love and receive for it not services, not money, but simply the joy of realizing that you exist, and that there is someone you love.

#475, 00:01

Natural disasters

The method by which Earth's plasmoids clear space of low-vibration energies.

#321, 22:03

Communion

Sincere faith in communion with Christ, accepting him into oneself, uniting with him on a bodily level. Christ gives his vibrations to change and purify the vibrations of the communicant. His vibrations and spiritual state instantly move into the aura of Christ.

#158, 54:11

Communion

A sacrament when a person goes to receive communion with the blood that is in the wine in the form of energetic ethereal vibrations of the very blood that flowed from the cross, and cleanses from sin, from low vibrations.

If the communicant descends of his own free will into low vibrations, he transfers his low energy state to Christ, driving a new nail into his cross. Very figurative. Not a physical nail, it transmits energy .

#486, 37:10

The Reason for God's Creation of Spirits

Developing love, which is the essence of God. Absolute love cannot exist alone.

#233, 15:04

The reason (meaning) for the appearance of yoga

Carrying through your etheric body various energies that make it easier to work with any etheric energy center (“chakras”), contact with subtle civilizations, with the Spiritual world by concentrating on one thought, one energy. Some poses are for healing illnesses, others are for strengthening your own thoughts.

#341, 35:39

Causal level (subconscious)

The fourth level of the aura of an earthly person, which contains images that are inaccessible in the normal state of consciousness, but which constitute past experience.

#14, 03:10

Causes of diseases

Failure to eliminate or even recognize the spiritual cause of the disease. In this case, physical treatments, medications, surgeries, physiotherapeutic procedures, energetic and spiritual treatments, as a means of eliminating the consequences, may be ineffective. The spiritual causes of illness are always strictly individual, even for the same illness in two different people.

#199, 58:46

Causes of war 12,000 years ago

1 The Selbetites considered hybrids like us dangerous. 2 Representatives of Burkhad and Tumesout did not give the reptilians the opportunity to experiment with our dinosaurs, who were around at that time, in order to create an intelligent race and reptilians also on Earth.

#272, 21:07

Reasons for incarnations on Earth

Bringing with you the states of “good” and “everything is possible” into the material world. Happiness increases by discovering the divine potential within oneself.

#358, 20:07

Causes of miscarriage

Taking the spirit into the spiritual world, in the case of non-interference from the outside, perhaps for some mission or into a selected incarnation that is more suitable for it.

#233, 42:19

Causes of addiction

Suppression of personality in childhood, suppression of inner Light, freedom of choice. Materialism in the education system. When a child is not told from childhood who he is and where he came from. Lack of responsibility for yourself and those around you.

#50, 05:14, 14:23

Sell your soul to the devil

An image, a figurative expression from the 1st century AD. It means leaving God, returning to evil deeds, lowering one's vibrations, feeling the need to serve evil.

#165, 25:07

Lifespan

The lifespan, depending on how successfully the spirit will complete the tasks assigned to the incarnation. The behavior of the spirit, increasing its vibrations, awareness, love, can give the right to prolong life. Personality degradation, lowering vibrations, negative feelings and thoughts can shorten the planned lifespan.

#81, 41:24

Damn

A conscious desire to destroy either the physical body, or the soul, or the connection of the soul with God, that is, separation from something, from life. This is the concept of excommunication, which is spoken out loud or mentally, with the full desire for it to come true. This is a very strong thought form charged with anger and resentment. It was created by man himself.

#280, 01:13:25, #292, 06:38

Prometheus

A contactee to whom one of the civilizations, from the Lyran representatives, gave him some biological weapons. Prometheus was the military leader of one of the cities and came into conflict with another city. A biological weapon in the form of a mirror, which, when held in hands, emits radiation, it changes the DNA of people, and they stop reproducing. It does not kill them directly, but acts on their kind.

It was an invisible weapon so that its use would not be noticed by the Interstellar Union and the rulers of these states. For us it was a weapon, but for the Lyrans it was a form of computer for transmitting information. Only information was transmitted in wave form, which thus influenced people, and in a way unnoticeable to them. When this was revealed, the one who handed over this weapon was sent to the planet of criminals, and Prometheus, as a contactee , was tried by representatives of the Earth. He was sent by boat to a desert island. And about the eagle that pecked his liver, it was said that when Prometheus held a mirror, he often used it, and his own internal organs were damaged. He developed certain diseases of the internal organs and pain. This is how it became a myth.

#256, 50:25

Propolis, beeswax (application)

You can chew propolis to disinfect the oral cavity. Even if you swallow a certain amount of it, nothing will happen other than benefit. When you eat honey in the comb, do not spit out the wax. In small quantities, up to 25 g per day, it can be swallowed. It will only cleanse your blood of toxins. Natural beeswax disinfects the intestines from fungi, candida, and E. coli. It absorbs 20 times more toxic substances from your intestinal wall than it weighs. And in the intestinal wall there are a lot of lymphatic vessels. This way you can cleanse your lymphatic system.

#255, 37:11

A prophet

A person who carries the word of God and speaks about it. The prophet talks about the law of God, about the law of the Universe, about how to avoid sin. He can talk about the future, warning that it has many options, and by changing behavior, a person can change the future.

Each contactee can be called this word to one degree or another. After all, a prophet is not only one who predicts only one of the options for the future, but also one who carries messages from Higher Powers, from certain Angels, from alien civilizations that are more sincere, high-vibration entities, from plasmoid civilizations.

#94, 25:56, #439, 45:10

Prophet Mohammed

A contactee from the planet Tumesout, the purpose of contact with whom was to create from disparate Arab clans, tribes and clans a single people with a single faith, a single religion.

#36, 37:59

Enlightenment

The state when you understand the true strength of the body and mind. And from this you become more harmonious, happy, bright. And you get rid of fears, condemnation, anger, slander. The state of merging with the Higher Self, with the Light that exists in a person. Exit to the Spiritual world, but not to the Astral, namely to the Higher Self, associated with some event perceived by a person as Light. This leads to fundamental changes in a person's worldview, to changes in his life and a departure from materialistic thinking. Types of enlightenment:

Enlightenment with Divine Truth.

Enlightenment with Divine Wisdom.

Enlightenment with Divine Life.

Touching the Divine Light of Love (where this word comes from).

#89, 48:01, #281, 19:42, #298, 00:59, #350, 48:29

Space

Carrier of substances and energies.

#17, 34:57

Proton

A structural element, like the neutron, which in Earth science describes the second and third energy levels in an atom. Contains 60% water energy and 40% earth energy.

#307, 44:23

Preventive medicine

Medicine based on the fact that a healthy person is injected with substances in order to several times reduce the likelihood that he will get sick in the future. It is impossible to completely remove the probability, since each body produces antibodies in its own way, but it is still possible to reduce the probability of the onset of the disease or its severe forms tenfold .

#301,17:01

The process of incarnation of the spirit

The spirit infuses its life force at the moment of conception to incarnate into the parent cells and waits about 7 weeks for the development of the nervous system to such a level that it can connect with it.

#233, 35:57

Forgiveness

Accepting a person for who he is, with an understanding of the true reasons why he did this.

Recognizing the Light in a person and wishing him to be happy, to be loved, to be loving.

#50, 36:32, #193, 49:02, #393, 08:20

Manifestations of the Higher Self

Conscience, intuition and the desire for good.

#19, 01:02:10

Psalm 50

Prayer for exorcism. Creates special vibrations in the Astral Plane, from which dark spirits with low vibrations will not be able to be here. They will move away because it will hurt them.

#46, 03:42

Mental illness

Features of the connection between spirit and body that make the perception of the spiritual world possible. Some qualities of the spirit become manifested in a person's character to such an extent that he loses self-control, and he develops a psychological pathology that causes psychopathy.

#103, 04:20

Psychic energy

Fire energy passing through the atman, buddhi , causal and mental body, lowering its vibrations and manifesting through various bodies. That is, the human psyche refers to the activity of the brain.

#37, 24:42

Psychokinesis

The use of human energy by plasmoids .

#165, 50:00

Psychotropic weapon

A device that emits a directed beam at a person (humanoid), temporarily lowering his consciousness to the level of a child. Alien technology, absent on Earth.

#234, 04:10

Psoriasis

Pathologies of liver metabolism and parasitosis. There may be

secondary dermatosis caused by saprophytic flora of the skin. For treatment, it is necessary to get rid of multicellular helminth parasites and cleanse the liver.

#86, 28:23

Sahara Desert

Part of the former garden area of Greater Eden. Due to a war 12,000 years ago and the splitting of the earth's crust, it was covered with sand that burst out of the ground.

#76, 14:41

The Way of Jesus

The path that every soul goes through when incarnating on Earth, but it goes through it differently. However, this is still the way of Christ. Any incarnation on Earth is the path of Christ.

#394, 24:36

The path to changing the consciousness of society

To teach children on Earth about astral travel and talk about the forms of life that exist, about the subtle material world, the spiritual world, spiritual levels, other planets, if you do this en masse, then civilization itself will change, it will become more spiritual, there will be fewer crimes and wars.

#181, 30:50, 33:34

Bee venom (medicinal properties)

It contains substances that reduce inflammation, kill various microbes and cleanse the body of toxins. In moderation, it is useful if there is no allergy to this product, as an excessive reaction to the incoming protein substance.

#255, 34:08

Bees , beekeeping (history of creation)

Bees appeared approximately 150-120 million years before the present. They were created by representatives of plasmoid civilizations, who created collective animal souls for embodiment in insects. The purpose of creation is to train plasmoid civilizations, to create such animal souls that will be able to collect the energy of pleasure in the material world and do this collectively, since honey is a symbol of pleasure. Each plasmoid that creates the collective animal soul of bees puts into it a particle of its Light and the enjoyment of life. This is why bees love sweets so much. They are like little children. It is important to treat them exactly like children. Do not show aggression, fear, or distrust towards them, and then they will answer you in kind. They really feel a person and his disposition.

#255

Pollen

Product not fermented with honey. It has the ability to cleanse the body of toxins and increase its ability to adapt to various harmful environmental conditions. Even to ionizing radiation.

#255, 35:32

Sun spots

The emergence or death of a large colony of plasmoids. That is, some change in the plasmoid world, which entails changes in the solar plasma by lowering the temperature. Moreover, both emergence and

death are accompanied by certain electromagnetic changes in the plasma structure of the Sun. This spot is not just a visual phenomenon, a visible spot. It has certain electromagnetic characteristics that affect all the planets of the solar system, including the Earth. And the fact that there have been no spots on the Sun recently indicates that at the moment solar civilizations are harmonized with each other. There are no disasters happening there.

#304, 22:00

Fifth Dimension

Astral world.

#30, 07:15

Fifth level of embodiment

Demon level.

#145, 32:00

R

Ra

Designation of solar plasmoid civilizations. One of the reflected plasmoids of the subtle-material civilization of the Sun. It is more than a million years old.

#155, 18:33, #272, 01:14:17

Servant of God

An expression understandable to ancient people who existed during the slave system to explain that a person is completely devoted to God and recognizes that his life and death are in the hands of God. He is fully aware of his belonging to God, complete dependence on Him in energies, manifestations and in his actions. Everything that a person has is his own - only his thoughts, deeds and words, which he will take with him into eternity, the rest belongs to God and is given to him for a while. Awareness of humility and at the same time a sense of cooperation with God in the form of serving Him as the highest form of energy. The servant of God has submitted to the Law of the Divine Commandment, the law of Love and Light, and the slave of his passions is a slave of material consumption, because he remains a slave of man's slave psychology. And that person who loudly declares that he does not want to be a slave of God, but at the same time is a consumer, a person who devotes most of his energy and his time to consuming material goods and is afraid of losing them, is a slave of these material things. things and his own desires and passions, which force him to devote most of his time to material consumption.

#63, 51:14, #97, 04:53, #165, 25:07, #235, 14:57

Ravana

Collective image. It emphasizes the fact that not only were humans acting against Ahasitra to limit her will, but that these humans were in league with low vibrational plasmoid civilizations. Therefore, Ravana is described as some kind of animal creature that is not like a person, but which at the same time can control him. In mythological terms, these are low-vibration plasmoids that helped the people who kidnapped this woman.

#326, 32:12, 33:28

Radiation

Second-level energies that do not need to be pushed out of matter, they come out on their own. In this case, the substance turns into another, losing energy. Radiation can damage the first level energy

that is in human molecules. Like all energy levels, radiation is contained in all atoms, but it is not released from all atoms. Any substance can be radioactive in isotopes. Isotopes and basic substances of an element are counted in the Interstellar Union as a single element.

#248, 03:40, #1, 06:21

Radioactive ring

Second level of energy. The collision of solar energy with the Earth's magnetic field, creating "vortices" in space.

#24, 00:00

Radioactivity

Gamma radiation, the highest frequency.

#296, 01:00:47

Radio waves

Energy of the first level (one of the types) of a certain frequency range, which is created by the transmitter and captured by the antenna of the receiver, which transmits it to the converter. They pass through the human body without hindrance, without exerting any influence. Radio waves can be emitted by some plasmoid civilizations and become part of their bodies. Humanoid civilizations perceive certain types of radio waves with their visual receptors as color effects in space or perceive them with auditory receptors in the form of noise. Some stars and nebulae can emit radio waves.

#141, 55:36, #166, 27:37

Joy

A spiritual state that is inherent in any rational spirit. This does not necessarily manifest itself in the form of laughter or movement, there are different reactions of the body, different movements of the head. In reptilians, for example, this is tail swinging.

#219, 34:35

Rainbow (syllable and semantic analysis)

Ra – Sun, Light, God; Du – invisible being, subtle energy, vital energy, plasmoid; Ga - way, road. Rainbow is an invisible (subtle) path to the sun.

#197, 06:35

Development of the spiritual heart

Bringing yourself closer to a certain ideal. The ideal for the spiritual heart is the one described by Jesus Christ: “blessed are the pure in heart, for they will see God.” Seeing God is the goal of those who develop spiritually in this direction.

#393, 30:32

Entertainment

Something that brings joy, positive and positive emotions.

#422, 25:07

Disembodiment

The transition of the spirit to the level of the Spiritual world that it reached at the time of disincarnation. If God was the most precious thing to him, it means that he loved unselfishly and did unconditional good. He will rise to the level of Angels, to the highest abode of the Spiritual world. As soon as the spirit leaves incarnation, it connects with its Higher Self, and all its lives become available to it, but not at the same time, but when it turns to one or another area of its memory. This is the same as a person does not have access to the memory of all the days of his life, but he can remember approximately what he did. In the spiritual essence, this memory is clearer, since it is not determined by the flow of chemical reactions in the body, on which the speed may depend. Therefore, spirits have quite clear memories of past lives in the material worlds.

#293, 02:35, #305, 18:25

A type of genetic modification of an organism

Mutations aimed at those cells that are passed on to another generation, that is, children with new properties will be born. This is considered interference with the earth's race. But if any genetic mutations that are positively directed in cells, for example, for the purpose of healing, can be caused in those cells that are not responsible for reproduction, and in those organs where there is a dysfunction of these organs, then these changes are possible. But not through biological or chemical influence, because this will already be evidence of physical contact. But through bioenergetic influence by special fields. During various healing sessions, the directed influence of energy fields created by both the GFS and representatives of the MS, the cells of the organ that is sick in a person begin to change their DNA, carry out gene editing in order to return to the state of purity of the cell that was before the disease.

#347, 23:25

Disagreement between the Interstellar Union and the Galactic Federation of Light

Disagreements that prevent these two communities from uniting.

1. Policy of non-interference in the affairs of young races, not only the Earth. The Galactic Federation of Light insists on more active intervention, even to the point of overthrowing politicians they dislike in various ways, including not very humane ones. At the same time, according to the Interstellar Union, the karma of the common national egregor is absolutely not taken into account. History counts about 20 attempts at such interference in the affairs of young races and it did not lead to anything good, and in the end these civilizations never became full members of the Interstellar Union .

2. The policy of Tashig and its colonies, actively supported by Selbet in the study of hybrids and hybridization, in various experiments on artificial intelligence and its connection with a living humanoid organism. Tashig, Selbet and their colonies have very active scientific communities and institutions that are actively criticized by the Galactic Federation of Light for allegedly departing from the divine essence of love. But the Interstellar Union gives complete freedom to researchers who study the material world, provided that participation remains voluntary. The Interstellar Union believes that representatives of the political community have no right to influence the study of the laws of the Universe. Because it limits the horizon of knowledge, the desire for knowledge among young people and ultimately does more harm than good.

3. The Galactic Federation of Light includes humanoid and plasmoid civilizations, and the Interstellar Union fundamentally decided to include only humanoid civilizations due to too great a difference in psychology, psychotypes and methods of perception in bodies of different densities.

Any humanoid civilization, if it follows the rules of the Interstellar Union, has the right to be a member of both communities.

#218, 27:34

Intelligence

A certain structure that has the ability to be aware of itself. The main

energy of the mind in understanding the psychology of the Interstellar Union is consciousness and self-awareness. The mind is part of the immortal spirit, not the body, not something between spirit and body, but namely the rational spirit itself, i.e. it is included in its structure. This is confirmed by the fact that, being in the astral plane, that is, outside the physical body, the spirit has the ability to reason, its mind acts. The three faculties of the mind are thinking, imagination, and memory.

#233, 01:18:07, #344, 25:22

Reasonable man of the Earth

A spirit embodied in a body by 30% to complete its task (70% remains in the spiritual world).

#233, 02:17

Intelligent spirit immortal (Limis in Daraal language)

A spirit that is the same in all intelligent beings, wherever they incarnate: in humanoid and plasmoid worlds, and in non-incarnate spirits in the spiritual world. The rational spirit is different from the animal soul (Eromes). He incarnates only in bodies designed to embody the rational spirit. The rational spirit can be roughly divided into 3 parts: mind, energy and spiritual heart (essence), which all together constitute the rational immortal spirit. Each of the three parts, in turn, consists of three abilities.

#140, 18:34, #158, 12:18

Paradise

The state of any human spirit: embodied and non-embodied , specifically on Earth - the state of a person. The state of paradise is the state closest to union with God in the form in which an embodied spirit in a given material world can generally perceive. This merging is

possible when the frequency of vibrations of the human spirit and the frequency of vibrations of Divine energies coincide. Paradise is a conventional name in the Christian egregor of high vibrations, when a person feels the energy of God as bliss.

#46, 42:43, #76, 51:33

Heaven or hell

Symbols of high and low vibrations.

#36, 25:56

Cancer

A disease associated with a decrease in human vibrations and body organs due to prolonged negative emotions and lack of positivity. Negative energy passes through weakened areas and accumulates in energy centers (chakras), which leads to the development of cancer. It doesn't depend on age. A small child whose spirit has accumulated negative vibrations in a previous incarnation may have cancer. Of course, it was not by chance that he incarnated with these vibrations in this particular family. It often happens that his spirit has already met the spirits of his parents before, and their experience of interaction was negative.

#124, 05:25, #137, 53:22

Cancerous formations

Formations, the growth of which is provoked by negative emotions, due to a decrease in the vibrations of the organ. Each organ has its own vibration frequency of a healthy state; its decrease provokes disease.

#124, 05:25

Rakshasi

Spirits from the 2nd level of the World of Unincarnate Spirits. Spirits who are so filled with the energies of anger, hatred and vindictiveness that they direct all their activities towards violence against others, believing that this is the best way to protect and promote their ideas. They forget about the freedom of choice given by God to others and recognize the right to it only for themselves. They easily enter into any form of conflict, sincerely believing that the good goal in their understanding justifies any means.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

Rama

Deified inhabitant of the planet Burkhad. Rama was the embodiment of that spirit, which then, much later, incarnated into Krishna. Only Rama incarnated about 1.5 million years ago and he did not incarnate on Earth. Rama came here without his wife (in fact, his name in Burkhad was Kramyar) as an explorer. 1.5 million years ago, Burkhadians (and aliens in general) were allowed to marry earthlings. And so it happened that one of his, as they would now say, contactees , became his wife and was transferred by him to the base. You now know her as Sita (Ahasitra). She was transported by him to the base. She was given special drugs that made her completely genetically compatible with Kramyar , and they had children.

#326, 25:24, 40:28

Ramayana

An epic describing the life of Ahasitra and the alien Kramyar (Ram). The tribe from which Ahasitra came, her relatives, conspired with a tribe that lived far from them. These relatives were against her marriage to an alien because they had other plans for her. They kidnapped her when Kramyar was not there . They kidnapped her under the guise of meeting her mother and took her not to her country,

but to the tribe (so that he would not find her) of those earthly people who helped them. This all happened about 1.5 million years ago. She informed him through the Astral about what had happened. And he flew there on his ship. Kramyar said that according to the law of the Interstellar Union, they do not have the right to limit the will of Ahasitra. They tried to detain her by force , and Kramyar was not alone, but with his friends, among them were earthling friends. They entered into a fight without weapons. While they were arguing among themselves, Ahasitra fled to his ship, and he took her to his base and did not let anyone in there.

#326, 25:24, 40:28

Raomli

A planet that is part of the Galactic Federation of Light. It is located in the Pleiades cluster and rotates in a system of three stars (three suns). There are no oceans on the planet, mostly waterless space. There are small fresh water bodies , like lakes. Shrub-like vegetation is mainly concentrated on the shores of these lakes due to the hot climate. The mountains reach a maximum height of about 3 km. The inhabitants of the planet are anthropomorphs. The current population of the planet is about 55 million. The average temperature on the planet is +75 degrees Celsius. The main food is plant-based, since breeding animals in planetary conditions is problematic due to sparse vegetation. A special type of mollusk is grown on the surface of reservoirs, which is a source of animal food.

#137, 06:30, 09:55, 26:07, 38:20

Rasputin Grigory Efimovich

Spirit from level 20 of the Spiritual World. Incarnated as Gregory from level 16, after disincarnation he went to level 20. He is a representative of level 20 Healing Angels. Date of birth of Grigory Rasputin: 01/09/1869, Pokrovskoye village, Siberia. He was married to Praskovya and the couple had three children: a son and two daughters. He asked the king to give him the surname Novykh, because he suspected that all the rumors about his fornication

stemmed from his surname, and people laughed at this. Gregory said that he was not lascivious, was pure before God and his conscience, respected his wife, and therefore his prayers were healing for everyone. He was a healer and one who speaks to a person to calm him down, a psychologist. He was well versed in politics. He could answer any question quite intelligently, although he did not study this. He was a believer, even closer to a monk. This is a bright spirit who was simply slandered out of envy from all sides. He said that he communicates with the Holy Spirits: with Archangel Michael, with Archangel Gabriel and with St. George the Victorious, that he sees them in dreams, in visions.

#366, 34:15, 42:15, 53:54, #367, 01:00:15, #369, 03.03

Crucifixion

Symbol of God's Love. Because if it weren't for His Love, He would not have agreed to go through such a difficult experience. Therefore, it is a symbol of His Love. Also, this fresco is a symbol of Love and the exchange of energies with all subtle civilizations responsible for all four elements.

The symbol of the cross is a pre -Christian symbol of dedication to the elements of air, water, earth and fire.

When the body of God is drawn on it, this emphasizes that during the crucifixion He transferred the energy of Light not only to the egregors of the Earth and the soul of every person, in general, in the past, present and future. He transferred it to the Spiritual world, in which there is no time. And to subtle-material civilizations, that is, He built His energy into their worlds so that they could be brighter. Lighter, so that there are fewer parasitic civilizations. After He was crucified and after He was resurrected, only 12 percent of parasitic plasmoid thin-material civilizations remained on Earth. And before that it was 38%.

The fact that His body is drawn on the cross just means that when He died, He transferred energy to the elementals, that is, the Spirits of the elements of air, water, earth, fire.

#439, 01:15:00

Plants (consciousness)

Consciousness that plants do not have as such, but through them, through their life, through themselves, through animals and through plants, plasmoids can manifest themselves, which have consciousness, what we understand as an intelligent spirit. For example, through a tree, which has its own energy: since it has a soul of a certain type, it also has energy. And by coming into contact with the energy of a tree, you can adapt to it and through it come into contact with the plasmoid who helped in the formation of this soul. Or with someone else. In general, the plant and animal worlds of all planets are under the influence, care and tutelage of plasmoids. Plants, like microbes, have a group soul of the microorganism. They are also alive, therefore group souls are embodied in them, since they are also created by plasmoids. They incarnate group souls, but of the plant type.

#40, 37:25

Expansion of the Universe

The illusion of material perception. Space itself is not empty, but consists of energies. These energies, which make up the structure of the space of the Universe, create such an image of perception in which objects distant from the observer move away - this is a property of space itself. Moreover, it is expressed anywhere in the Universe. That is, from any Galaxy it will be visible that everyone else seems to be moving away from it . And this is due to the fact that the devices are tuned to a certain wavelength. Electromagnetic waves (light) propagate in space according to their own laws. The peculiarities of propagation (of light) in a supposedly empty vacuum contribute to the fact that visible objects move away, and everyone will see themselves in the center of this Universe. This space is infinite. And the Galaxies do not fly away from the center, but move in this space together with all the stars and are more or less independent of each other

#251, 01:23

Races of the Earth

The three main races are white, yellow and black, into which a single race, the third-density earth race, later split. It consisted of people who escaped after the war and who were brought back. According to various estimates, on average, there were from 500 to 1,500-2,000 people saved on Earth itself. They hid in caves, in mountains, in cracks and fissures of the Earth. They did not die either from the war or from the cataclysms that followed.

#256, 02:29, 05:32

Races of the Earth (purposes of creation)

Created after the war 12 thousand years ago by point mutagenic changes in the DNA of the original race of people.

Two main goals: firstly, so that representatives of these races can live more comfortably in certain natural conditions, and secondly, so that they form, by mixing with each other, different peoples, with different types of appearance, skin color, so that those the spirits that incarnate in these peoples were the transformation of xenophobia into a patient attitude towards the appearance of others.

#182, 01:32:38

Ratrings

Representatives of plasmoid worlds. Luminous creatures are like jinn in Islam.

#343, 11:05

Reality

That which exists in the perception of a being. Our material Universe in which we now live. She is real and unreal at the same time. It is real from the point of view of our direct experience, which we perceive through the receptors of those physical bodies or subtle bodies in which all spirits are embodied. It is unreal from the point of view if you look at the material world as a creation of itself, because in fact, it is an absolute reality.

Reality, as understood by the science of the Interstellar Union, is not divided into objective and subjective. There is a single world of reality, this is what exists in all worlds and levels of manifestation: in the Divine world, mental, astral, etheric, physical, that is, your dreams and fantasies are also quite real in the mental world. The mental world is considered reality.

#33, 01:55, #180, 10:30, #182, 2:37:25

Child

An embodied spirit that adapts to the world in which it finds itself.

#455, 01:43

Jealousy

The feeling of a person's special relationship to himself, the feeling that another person or phenomenon is part of you (property). A feeling of control that arises from self-doubt and fears of losing it. When there is jealousy in the heart, it manifests itself through the emotions of fear, anger, irritation.

#234, 47:13

Organ regeneration

Growing individual organs from human cells. From a cell of one organ,

another organ can be obtained simply by using DNA information.

#247, 18:15

Reg

The Alpha star is in the constellation Leo; only plasmoid civilizations live in it. Specifically, there are 37 different forms of density on Regulus.

#427, 11:52

Resonance shower

Vibration match. This can be conveyed in the form of poems, songs, prayers, mantras.

#297, 07:36

Rh factor

One of the many primate genes that contributed to our creation. Blood formation continues to this day.

A certain protein that is part of the blood. And it may be absent or present.

#105, 01:07:43, #173, 1:01:23

Reincarnation (the reason for the lack of mention of it in Christianity)

Very many people who believe in reincarnation, and at the time when Christianity was born, there were such people, believe and believed that they would have time to correct all their evil deeds against the Love of God in the next life. This faith did not help them change themselves. This was the first moment.

The second point was due to contacts with plasmoid civilizations, which transmitted information distortedly to their contactees . They talked about how the souls of people incarnate into animals, and animals incarnate into people. They mixed these concepts. But in fact, only the etheric matrices of those animal souls that have already scattered in the Astral are used. They can really go to build people's souls. But this is not a rational spirit.

Plasmoid civilizations also conveyed that the etheric matrices of animal souls that dissipate can be used to create etheric matrices of people, but this is not the embodiment of the spirit. This is only part of the etheric body.

They help build a person’s etheric body and not only the etheric body. When a spirit incarnates into a person, plasmoids build etheric channels for communication with the entire biosphere of the planet and, naturally, with themselves.

Regardless of the number of reincarnations, only that person who realizes himself as a spirit will find salvation in Christian terminology or achieve enlightenment in esoteric terminology and will raise his vibrations. Not with the flesh, but with the spirit, which fills the flesh, nourishes it , heals and takes care of it.

#439, 17:21

rails

A flow of energy aimed at restoring dense material bodies of a humanoid -earth type. It is heterogeneous in its composition. That is, there are different types of slats, there are many of them now, more than 10 types. Reiki systems consist of energy frequencies of eleven

plasmoid civilizations (subtle civilizations).

#26, 42:16, #28, 09:46, #76, 12:33

Advertising

Type of public opinion management. For example, election campaigning, when several party representatives participate. People cast their votes not for the one who will present a real plan for getting the country out of some crisis or solving pressing problems, but for the one who promises them the most. This is also management.

This is management by ideas. In fact, this is much more effective than chemical, physical influence or a direct directive to do something. A person himself believes in this and directs the strength of his spirit to accomplish a task that is beneficial to the one who controls him. The stronger the chains on a person, the more he believes in the freedom of his opinion, his choice.

He did not choose his opinion freely, but because he believed promises that were not even intended to be fulfilled. This is deception, manipulation.

#374, 26:59

Religious egregors

Energy, information formations that are responsible for the formation of religions on Earth and their manifestations in the material world. Each religious egregor has its own Guardian Spirits from the highest levels of the spiritual world, who ensure that lower spiritual entities do not connect to them.

#33, 08:05, 14:52

Religion

A certain system of teachings and rituals for establishing a connection with a certain higher being or beings that are higher for this particular person. Any religion describes the reality of the Spiritual world in figurative metaphorical form.

A certain path to the image of God that is presented in this religion. There are many religions and many images of gods. And there is only one true God. Each person perceives it differently. Therefore, for a conscious person who sees with his heart, any religion will be saving. And for a person who looks through his ego, through his selfishness, an uncleaned mind, any religion will be disastrous . He can only achieve a reduction in vibrations there.

#118, 12:50, #326, 04:20, #393, 01:13:27, #444, 18:29

Krishna Religions (main goal)

Filling Him with spirit, entering His consciousness and becoming completely inseparable from this Consciousness. To achieve this, you need to see God in any person: in yourself, in your neighbor.

#305, 14:11, 28:45, 34:38

Religious symbols

Crosses, crosses, mandalas, stones, crescents, talismans and so on are symbols of the energy, vitality, faith and love invested in them, helping to tune in to the vibrations.

#165, 54:31

Religious egregors

Energetically formed, we can say that these are collective entities created by your (and not only yours) thought forms of many, many of your ancestors.

The real relationship of the Interstellar Union to religious egregors is, naturally, contact with the Guardians of the egregors.

Each egregor, including religious ones, has its own Guardians from the Spiritual world. There are patrons in plasmoid worlds, and there are patrons in humanoid worlds. The Guardians of egregors themselves can incarnate into people in order to develop their egregors, in order to bring some of their teachings there.

In religious egregors, they are Spirits of Angelic levels, who through the egregor contact believers, send them thoughts about spiritual development in the language of this religion, heal them, heal them, protect them, and give them information.

#411, 01:56

Reptile

A certain cold-blooded oviparous creature, and the ending “id” means similar. Reptile-like. This is also a type of humanoid.

#324, 38:18

Reptilian civilization

A civilization that has a different biological development cycle, reminiscent of the cycle of terrestrial reptiles. Its representatives are characterized by composure, often not giving birth to live births, but laying eggs. A special structure of the brain, which, of course, determines the special way of the embodied spirit .

It is believed that the Earth was intended specifically for reptilian

civilizations. Because at the time of the discovery of the planet by the Tumesoutians five million years ago, there were a lot of large animals of a reptilian nature on it. Some Selbet scientists believed that the planet was more suitable for the reptilian race. They discussed a larger percentage of genes in the hybrid being created, offered up to thirty percent, but due to the fact that these genes were really incompatible with the genes of the Burkhadians , Tumesoutians and terrestrial primates, they left five percent. In the human genetic apparatus there are genes that can be revealed in offspring, for example, a condition called ichthyosis, for example, that is, this is the skin of a reptile. And children can also be born, for example, with vertical pupils or with a third eyelid; these are also signs of reptilian genes.

#33, 38:50, #182, 01:24:04, 01:30:45

"Reptilian Brain"

The part of the brain that is responsible for the simplest, “plant” functions of the body. Man shares it with the animal world. The brain contains traces of the influence of various genetics, 45% of the genes are from primates.

#360, 00:47

Roerich

The contactees of the planet Esler are practically in full force. They correctly, of course, at their level of understanding, conveyed information from the Eslerites . A little later in their lives, after 1920, there was a period of contact with plasmoids. And after another five years, they began a period of contact with the Spiritual world. They wrote books and published them periodically. Yes, there were times when one paragraph of a book contradicted some paragraph in another. But this is not because they did not know what they were writing, but because their experience, contact, also underwent changes.

#42, 33:55, #437, 15:50

A recipe for longevity for earthlings from the Lyrans

Conscious control of your body functions. This is possible through knowledge of the power of the energy of faith, which is directed by the spirit to strengthen and develop one's physical health. In the Interstellar Union there are school subjects that provide education in this matter.

#149, 33:20

Rhinovirus

A virus that causes an infectious runny nose. Its target cells are located in the nasal cavity and nasopharynx, sometimes (but in smaller numbers) in the trachea and larynx. Generally, the target cells are located in the nasal cavity.

#390, 30:35

Drawings in the margins

Changes in the state of plants in the field. Representatives of Tashiga, as well as Pleiadian civilizations, send automatic probes with a spherically directed magnetic field of a certain configuration.

#270, 59:30

Rhythm of the Universe

Pulse vibration of the flow of etheric energy coming from the spiritual world into the material world for the formation and continuous maintenance of matter. Each of the impulses is divided into three streams, creating energies of the first, second and third levels in the

atoms. The percentage of distribution of the etheric flow in atoms between levels depends on the specific type of atom.

#141, 43:02, 44:44

Ritual

A human action, in response to which energy is directed from the spiritual world, changing the aura of a person.

#36, 01:31:12

Rishi

In Vedic astrology - contactees or embodied Angels. Most often, both: if he is an incarnate Angel, Angels begin to come to him, remind him, give information, and so on.

#279, 02:18

RNA (Ribonucleic acid)

One of the three main macromolecules that are found in the cells of all living organisms and play an important role in the coding, reading, regulation and expression of genes. Just like DNA, RNA consists of a long chain, in which each link is called a nucleotide.

#246, 34:51

Ancestral curse

Wishing any negative consequences not to one person, but to the whole family, the whole clan. If at the same time the clan contains

within itself, at the time of the curse , members of the clan who emit negative vibrations, then a mark appears in the clan egregor. It begins to influence, lowering the vibrations of the astral bodies of all members of the genus.

#292, 06:38

Ancestral egregor

This is the totality of all energy information fields that were compiled by people who lived in the family. The information field of up to 12 generations has the strongest influence. The rest is less. Energy support. The more bright people in a person's family, the easier it will be for him to overcome life's adversities, since he will feel strength and support.

#20, 24:33, 39:56, #123, 18:16

Soul mates

Souls that have attraction and coincide in vibration level.

#105, 50:00

Birth

A serious step for which the soul prepares, accumulates energy, asks the Higher Spirits, God to connect it with the body. This is serious work. Before birth there is always a plan for embodiment, for this life. The implementation date is always known. The main period of incarnation and certain turning points are known, which must be achieved by this time. This does not mean achieving any material benefits.

There is only one goal for embodiment in the material world. It is diverse, but in a global sense there is only one - it is a change in one's

vibrations.

In order to be closer to the Source of everything.

#387,23:14

Birth of the Spirit

The merging of the impulse of Divine Love in the flow of spiritual Light with the impulse of the Divine Mind. Their fusion is accompanied by a flash of Light of a different vibration frequency and generates the Will of a newborn spirit, a beloved child of God. Subsequently, the Will gives rise to the desire for autonomy and gives birth to self-consciousness as the primary monad around which the impulse of Divine Love and the impulse of Divine Reason are encapsulated. Then, from the impulse of Love, the spiritual Heart develops, and from the impulse of the Mind, the spiritual Mind develops, and from the Will born by Them, all the energies of the spiritual essence arise.

#233, 52:08

Born in the Spirit

Born in spirit represents a spirit that has realized itself as an eternal, immortal, loving and beloved being.

#274, 01:12:10

Roswell contact in the USA

Contact of Tashig representatives with earthlings. At the same time, the planet Tashig exercised its legal right not to report to the Interstellar Union details about the capture or voluntary contact between representatives of Tashig and the Earth, because each planet has the right not to report private things that concern only it.

#46, 18:07

Growth of a creature on the planet

A value that depends not only on gravity, but also on the strength of the magnetic field and also on the intensity of energy exchange between the body and the environment.

403, 16:49

Runic signs

Symbols of certain energies of certain plasmoid entities. It's like a call to contact them. They are everywhere around us, everywhere around people. These symbols call plasmoids directly to contact. They have an agreement with the magician that when they draw these symbols they send their energies.

The reasons for these agreements can be different, including the exchange of energies, for example, with the magician himself or with those people who come to him, or even with the children of the magician. This is a mutually beneficial energy exchange. But whether it is aimed at the Light, at development or at destructiveness, this already depends on, one might say, the degree of purity of the magician's soul. There are light plasmoids, holy ones, like Angels, and there are destructive ones that destroy. Which ones a person comes into contact with depends on his filling with certain thoughts, feelings, desires, aspirations, and so on.

Wax is such a material, such a substance that can manifest influence from the astral world, from the subtle worlds. The wax manifests the energies of these plasmoid civilizations that are nearby. It's like their faces or the images they think about. They do not have faces in the understanding of people, they are from subtle planes, they consist of energies of subtle planes, therefore wax manifests those energies that are nearby. When it melts, it is in the field of these plasmoids that came, and from this field it perceives the impact on itself and manifests it in matter.

Many plasmoid civilizations are responsible for runic magic, as well as for magic in general. There are many dozens of them, but the degree of their influence on the processes in the Universe depends on their personal energy power, on the level of density where they are located, and, naturally, on the tasks of their implementation. Plasmoids also have the task of embodiment, so the degree of influence of runic magic on reality depends on many factors. For example, on the strength of the energy and on the degree of correspondence of these actions to the chain of events that the spirits built in the Spiritual world. Because if she contradicts them, everything may collapse, and no plasmoids will have an effect.

#420, 23:21, 27:26

Runes

Simplified Burhad alphabet , its predecessor. Ancient writing of many peoples (Scandinavians, Slavs, some eastern peoples). Each rune is a syllable; priests (contactees) communicated with plasmoid civilizations in a syllabic language. Each nation had its own runic syllables.

#80, 57:30, #197, 06:35, #201, 18:58, #250, 43:13

Mermaids

The name of one of the types of plasmoid civilizations, which is responsible for the element of water.

#83, 12:58

Russian language

A complex product created over thousands of years, containing knowledge inherent in the priests of ancient civilizations.

#197, 06:35

Rueckert Karla

Contactor with solar plasmoid civilization.

When contacting this woman, it was necessary to clearly indicate church attributes: chalice, Gospel, etc. If this was not exhibited, then the low vibrational entity of the fourth density began to interfere. It was very important to clearly arrange everything so that the beam would go directly to the headboard. Check the location of these church objects, candles, etc. down to the centimeter. If these objects stood in a certain place in that space, then they influenced her aura. Thus, she herself tuned her spiritual channel to the solar plasmoids. If they were not there, then her consciousness built a channel to those entities that approached the vibrations of her third chakra. There she had a block that attracted certain entities. She could not get away from this block, so she attracted low-vibration entities in the third energy center.

#183, 03:04, 01:09:45

S

Savvaty

A disembodied spirit who lived in Russia in the 15th century, a monk, a beekeeper. In Christian egregor, he is one of the spiritual patrons of bees.

#255, 00:22, 30:22

Sathya Sai Baba

The representative of the Spiritual world, the Angel, prepares spirits for incarnation, draws up a program for them to

incarnation and is their spiritual mentor.

There have been more than 7,000 incarnations in the material world. Was embodied in the Christian religious

egregore 38 times. Not only in the Christian, but in the Christian-Jewish, in general biblical

egregore. Incarnated as assistants to the Hebrew prophets, such as the prophet Isaiah,

wrote down after him, incarnated to Christian monks more than once. Born during the time of Krishna.

#413, 16:43

Sacred geometry

Image of certain energy forms, carried out through perception, through the brain

a specific person. Perhaps the energy lines of the room where he is located, perhaps

any subtle structures, any energies that are in his own aura,

for example, chakras.

A person who has seen some images from the Time Tape can depict this in a sacred

geometry, but in the form of colors, images, geometric shapes.

#446, 49:43

Sacred Geometry in the Universe

A way of describing reality based on the formation of spatial structures. This is not a building material, but a way to describe how this material forms various material forms: from huge galaxies to tiny microorganisms. At each density there are different spatial structures. Space is more extended, one might say, it has a different extent and dimension.

#364, 06:05

Sakhya-rasa, Vatsalya, Madhurya

Certain forms of serving God, forms of interaction with him, contact with him. Different forms of relating to God, as a friend, as a child and as a lover. Depending on the state of consciousness of a person's spirit, he perceives God differently. It also depends on his social service, social place. It is written in the Vaishnava spiritual books that these forms exist in the Spiritual world. In order to become a devotee of God and go to Him in His Light, in His Light of Love, in His radiance, you need to treat your neighbor, seeing in him a reflection of Krishna, i.e. God, His particle. For example, if you see little Krishna in your child and treat him the same way, i.e. to serve him, accordingly, it will be Vatsalya rasa.

#326, 04:20

Salathara (planet)

A planet located in the Trapis-1 system in the constellation Aquarius. There live creatures with heads shaped like onions, expanding in the center and narrowing at both ends. Pale blue skin color, similar to that of the Shimorians , but lighter. Two eyes are dark sockets on either side of the head. Thin lips, small.

#292, 37:49

Salim

Spiritual space of the Archangels.

#243, 08:56

Self hypnosis

Conscious influence of thought on the physical and psychological state.

#12, 02:26

Self-identity

The ability to think creatively, the opportunity to make mistakes and the opportunity for independent scientific research.

#207, 36:49

Self-change

A consequence of the influence of time.

#33, 01:18:57

Self-love

Self-love.

#393, 17:42

Self-tuning

Positive thoughts with faith in getting rid of diseases and the absence of negative thoughts towards the disease itself. To strengthen your immune system you need faith and the absence of any blocks. Blocks on energy centers will not allow faith to manifest itself on the physical level.

#86, 44:21

Self-tuning

Positive thoughts with faith in getting rid of diseases and the absence of negative thoughts towards the disease itself. To strengthen your immune system you need faith and the absence of any blocks. Blocks on energy centers will not allow faith to manifest itself on the physical level.

#86, 44:21

Self-development

What any spirit comes here for is, first of all, self-development, even if it comes absolutely altruistically, to help others. But this help is needed

so that he feels closer to God. This is the goal of self-development.

#393, 21:24, 26:00

Self-awareness

A state of consciousness that is born when the energy of the will is combined with the energy of the divine mind.

#283, 23:16

Independence

The ability of a person to perform his own actions, but at the same time it is accompanied by taking responsibility. If a person is critical of himself (criticism has not gone away, it is directed at himself), then he will follow the images of that (we now do not use the word “ideas” and “decrees”, but use the word “images”), whose goals and objectives , embedded in these images, will be close to his heart, his images, his desires.

#347, 32:25

Suicide

Taking one's own life, when everything is fine with a person, no one attacks him, but he commits suicide because of his mental suffering, mental torment. Torment and suffering are not just words, they are certain vibrations in his spiritual heart. If he kills his body, these vibrations remain in the spiritual heart; they do not disappear from it. He comes to the level that corresponds to his vibrations. If these vibrations are low, he comes to a low level.

When they pray for him in church, not just one person, but by attracting the power of the Christian egregor, then a lot of Light is sent to him, which begins to enlighten him, pull him out of there, figuratively “raise

him.” Just not to raise it to another level, but to raise his consciousness so that he himself wants to go to God in another incarnation.

#393, 52:52

Samson

Universal contactor with Burkhad , plasmoid civilizations and the spiritual world. It was because of this that King David, after his death, gave him his kingdom, bypassing his eldest son Adonij.

#155, 54:37

Sansara

Reincarnation, in which a born spiritual being takes itself for a body and begins to live a single life in this body, without thinking about its spiritual needs and fulfilling its life task of incarnation, that is, living unconsciously.

#184, 01:04:23

Sanskrit

Form of Proto-Indo-European language. It was given to the ancestors of the Proto-Indo-Europeans from the planet Shimor in a simplified form. Many new words were added to it, which were invented by people themselves, including when communicating with each other, other peoples and plasmoids.

#258, 16:03

Walking boots

A symbol of the fact that during astral travel you can instantly find yourself in one place or another.

#258, 30:29

Satan

“Satan” (adversary or apostate in Hebrew), is not an individual person, but that dark side of every spiritual person that allows him to deviate from the path of good. And the essence of the worldview of this “satan” is that freedom of choice, free will is placed higher than the need to serve the Absolute Mind. The need for freedom of choice is the essence of “satan”, because it creates the illusion of permissiveness. But in fact, there is no personality independent of the Absolute Mind. The one who in Christianity is called Satan, and later the Devil, is a created image not of the entire reptilian race, but of that group of it that, unfortunately, went to war. The image of “satan” was created, like a snake , like a dragon for the Jewish group, with the aim of creating a new egregor, independent of the reptilians, since it was necessary to achieve the goal that they achieved with the coming of Christ to the world. Christ called Satan the civilization that retreated and became an enemy of the Interstellar Union and the entire human race.

#21,05:50, #32, 19:15

Saturn

A giant planet on which protein life in the form in which it exists on Earth, that is, in dense material form , is impossible . But it has a powerful atmosphere, which allows thin-material plasmoid civilizations of Saturn to live there, which feed on the energy of powerful thunderstorms occurring on this planet. Saturn is a symbol of karmic tests, exams, testing a person for his spiritual level. This is not a stern father who punishes his son for an offense, but rather an examiner who allows him to advance to the next level in an educational institution.

#97, 17:22, #353, 27:47

Sat-Chit-Ananda

Eternity, Knowledge, Bliss.

#34, 01:18:57

Diabetes

A disease in which the state of mind is such that a person is not satisfied with life on Earth. Dissatisfaction from relationships, from food, from other areas of life. Because of this, the energy of the spirit, through the etheric body, begins to influence the level of insulin in the pancreas and reduces its concentration in the blood. The spirit, with its energy, reduces the sensitivity to insulin in all cells of the body: in nervous tissue, in myocytes, in muscle tissue so that the level of glucose in the blood increases. The spirit believes that with little pleasure in life, blood sugar levels should be high.

#86, 12:16

Svarog

The ancient Slavic name for the firstborn son of God Jesus Christ, who was still in the pre-Christian period. Christ is the Greek word for “anointed one.” In Hebrew his name was Mashiach. This Spirit also had its own name. It was the Slavs who gave him the name Svarog at a time when there was still a proto-language. They decomposed this word into two syllables and one letter: Sva-ro-g . “Sva” is Light, “ro” is form, “g” is help, healing, salvation, deliverance, mercy. And all this together was deciphered as “light form for salvation.” The image that Svarog, or the firstborn son of God, took for salvation.

#324, 46:27

Svarog day

The Day of Christ, the day of his second coming, when the Earth will enter the Interstellar Union.

#324, 46:27

Hypersensitivity

Sensitivity is higher than normal sensitivity for the human population. Increasing the vibrations of the quanta that enter the body's receptors can increase this sensitivity and they begin to pick up a wider range of vibrations from the surrounding world.

#394, 1:01:32

World

The human name for the energy from which everything came into existence. But it is like strength, energy, essence, intelligence at the same time. It is not a personality like a person has, but that personality or that mind that can simultaneously entertain a million different thoughts. Light is unlimited. It is generated in the centers of stars during the transformation of helium and hydrogen atoms, during which thermonuclear energy and the energy of Light are released from the atoms. Light is also generated by the energy of plasmoid civilizations that live inside stars. The primary source of Light energy is energy from the Spiritual world.

#141, 01:01:30, #350, 40:52

"Light body" - healing method

A system that includes three energies: “light body”, “light breathing”, “light choir”. In itself, it is crystalline plasma energy.

#385, 02:03

Light breathing

The energy that is part of the “Light Body” system works with every cell of the body, saturating it with its energy; works with DNA, that is, healing occurs at the cellular level.

#385, 02:03

Light body

The energy that enters the Light Body system helps heal muscles, bones, and all joints. They are saturated with this energy. Healing occurs, and vitality also increases.

#385, 02:03

Light choir

The energy that is part of the “Light Body” system works with all fluids - blood, lymph and endocrine glands. There is renewal, rejuvenation, healing of cells, improvement of circulation in the lymphatic system, and metabolic processes are intensified.

#385, 02:03

Freedom

Freedom from the images inside, to which a person submits, gives off energy. Submitting means serving them. To serve is to give energy. If

he gives energy to himself (interchange with himself, a closed cycle), then he does not waste it, but collects it and he begins to dissolve in the Light. Whether you have a body or not, it does not matter for the realization of freedom. You can be in the body and free, or outside the body, but imprisoned in the cage of your mind. The ability to follow either the path of development or the path of degradation. Although God is Love and the right to both paths is given to us by God.

#308, 05:11, #387, 06:30, 23:14

free will

The ability of a person to make a choice between possible courses of action without coercion. The principle of free will has consequences in religion, ethics and science. For example, in religion, free will implies that human desires and choices can coexist with divine omniscience. In ethics, the existence of free will determines the moral responsibility of people for their actions. In science, the study of free will can reveal ways to predict human behavior.

#238, 41:00

freedom of choice

The opportunity to both love God and draw closer to him, and to move away from him into darkness and develop in the opposite direction. At the same time, God preserves love for absolutely everyone.

#233, 18:00

Free energy of vacuum

One of the types of external ether (torsion fields). The free energy of a vacuum can exist in an absolute physical vacuum, in the complete absence of substances or energies in space. It is present in any cubic millimeter of space, even where there are no atoms and electromagnetic fields, because it is located, as it were, between

space. And it exists independently, that is, it already exists, but with the help of special methods of influence it can be extracted from the vacuum and used, transformed into energy of any level, even into gravity. This is the energy that makes up part of the plasmoid worlds. In agreement with plasmoid civilizations, there are special places where this energy can be extracted. To obtain this type of energy, a specially modulated laser beam is directed to the desired point in space. This results in a “puncture” of space, from which the free energy of the vacuum is extracted. To extract energy from a vacuum, you first need to be isolated from the gravitational field, that is, such actions can be performed at a distance of at least 100,000 km from the Earth, where there is no gravitational field (of the Earth or other planets).

#17, 44:10, 49:15, #109, 09:35, #141, 14:18, 19:04, 19:44

Quarko-carbon bond

A type of instantaneous communication used by the civilizations of the Interstellar Union, based on a certain type of energy waves that make up the energies in the atom.

#170, 05:23

Holy Spirit

In the original sense, this is God the Father, manifested through matter of any energy, in any presence in the Universe. God the Father, so it is believed in the Spiritual world, more precisely, outside all worlds, outside the Spiritual world, the material world, in the place that is called in Christianity the “Kingdom of Heaven.” God the Father exists there, and His manifestation in the material world or in the Spiritual world is called the “Holy Spirit.” That is, this is the incarnation of God the Father in the world he created. Therefore, in Christianity, the difference between the Holy Spirit and the Son of God is that the Son of God is born from God the Father, and the Holy Spirit comes from God the Father and is not born. “Coming out” is simply the transfer of an image, i.e. that he “descends” (was the original word). It was simply the embodiment of the image that He is not born, but manifests. In

Christian literature, the “Holy Spirit” has come to mean different things. For example, the disembodied part of the person himself, what is called the “Higher Self”. Because the word “Spirit” is the “Spiritual Self”, and the word “Holy”, that is, “Light” is that part of the Light that is not embodied. Also in some Christian books the “Holy Spirit” may be called an Angel. And this is the general name of the Christian egregor and some spirits that possess Light. In the Christian emerging church, the concept of the Trinity was introduced: Father, Son and Holy Spirit. This was done in order to form in Orthodoxy, in the Christian egregor, the concept that we were created by three civilizations, that is, the Trinity. The entire Christian egregor was built on the basis of the more ancient Jewish egregor.

Archangel Metatron, when he came into contact with earthlings, with the apostles, with their disciples, when he appeared to them as Metatron (this was mentally, they wrote down these thoughts), they perceived him in the form of a bird, imagined him in the form of a huge white bird, like The Holy Spirit (he showed them his wings that he was an Archangel). This is their perception.

#21, 00:23, #94, 10:08, #340, 03:44, #446, 44:00

Holiness

Divine Light and Divine purity, and at the same time a state of unconditional Love, which increases the vibrations of this space, and makes it very difficult for low vibrational entities to be in this space, be it plasmoid worlds or non-incarnated spirits.

#239, 51:44

The Saints

Former name "light". Angels with a high frequency of vibrations and a high level of awareness of themselves as Light.

#19, 01:08:43

Christmastide

The Slavic ancestors had special days, which were called “Bright Days of the Ancestors”, because portals with plasmoid civilizations were activated, it was easier to make contact with the spiritual world.

#199, 01:22:43

Priest

The one who conducts special Christian rituals (sacraments) that contribute to the conduction of the energy of the Christian religious egregor and the Spiritual world, in general, in the material world. These sacraments connect the world of believers, the material world with the Spiritual world. In order for him to conduct these sacraments and be endowed with this energy, Christ himself taught the Apostles to transfer these energies to the Christian religious egregor through ordination, in Greek “ordination”.

#239, 37:16

Selfishness or pride

Self-love. In Russian, the word “love” means a lot of states. In other languages of the world, the word “love” has many synonyms, as words that explain different aspects of love. In Russian, all this is called “love”. True self-love is different from selfishness.

#393, 17:42

Seventh Energy Center

The energy center responsible for communication with the Higher Self, with the spiritual world, with the Divine source. Therefore, meditation, contemplation of this center is a direct path to enlightenment, to

possession, to awareness of one's capabilities, divine capabilities in this world.

#253, 00:48

Sexual energy

High vibrational energy, a form of manifestation of Divine love in the physical body of a person, the purest, absolute, unconditional love that exists in the spiritual world, its reflection in the body. It can be directed in different ways depending on the mental attitudes of the spirit. In order for Divine energy to manifest itself correctly and raise vibrations, you need to put your spirit and the spirit of the person with whom you will exchange energy first.

#165, 43:10

Sexual violence

The combination of sexual desire with the instinct of power. It is a consequence of moral or physical violence.

#134, 01:10:14

Selbet

The name in Daraal language of the planet, which is located in the constellation Canes Venatici. The planet is inhabited by an intelligent humanoid civilization of reptilians. Representatives of the race are cold-blooded, reptilian-like, upright, oviparous creatures. They are one of the three creators of the earthling race. Selbet genes manifest themselves explicitly in some human genetic diseases, for example ichthyosis, in which a person develops scales, that is, the reptilian gene manifests itself.

#59, 09:05, 13:30, #104, 16:52

Selection

Directed mutation. Only it is directed by people.

#495, 30:06

Earth Plant Breeding

Changes that the Earth's plants underwent so that they could bear more fruit, with more nutrients, so that their growing season would be longer . All this was created for the first ancient people.

All the plants that exist on Earth were there, but not in the form in which they are now. Many have been selected by people themselves. But when representatives of other civilizations arrived on Earth, they also experimented with the genes of various plants in order to breed species with the desired properties. This especially affected the cereal family.

When people began to live on earth, they began to grow ancient wheat, barley and others from field plants. This is a wild plant of the grass family, somewhat similar to bluegrass. Something similar, only the ear is different. This type of bluegrass underwent targeted genetic mutation and produced the seeds of wheat, barley and other various plants. One can, of course, figuratively say that they were brought from other planets. But this only means that it was not they that were imported, but the ideas for their creation; the material was on Earth.

Everything happened in contact with the plasmoids and under their control. They created a plant soul for those plant seeds that had altered properties. It was in council with them. Specialists of the Interstellar Union, before making changes to the genotype of any body occupied by a living soul, first create a general council with the creators of this living soul - plant or animal, so that everything goes harmoniously.

#492, 03:05

All the plants that exist on Earth were there, but not in the form in which they are now. Many have been selected by people themselves. But when representatives of other civilizations arrived on Earth, they also experimented (shows) with the genes of various plants in order to develop species with the desired properties. This especially affected the cereal family.

When people began to live on earth, they began to grow ancient wheat, barley and others from field plants. This is a wild plant of the grass family, somewhat similar to bluegrass. Something similar, only the ear is different. This type of bluegrass underwent targeted genetic mutation, and the seeds of wheat, barley and other various plants were obtained. One can, of course, figuratively say that they were brought

from other planets. But this only means that it was not they that were imported, but the ideas for their creation; the material was on Earth.

They were often modified to produce more fruit, with more nutrients, so that they had a longer growing season. All this was created for the first ancient people.

It was in contact with the plasmoids and under their control. They created a plant Soul for those plant seeds that had altered properties. It was in council with them. Specialists of the Interstellar Union, before making changes to the genotype of any body occupied by a living Soul, first create a general council with the creators of this living Soul - plant or animal, so that everything goes harmoniously. #492, 03:05

Selena

A collective image of all the plasmoids that made contact at night. Appeared after the appearance of the Moon as a satellite of the Earth, appearing in the sky at night .

#288, 59:19

Family egregor

The essence formed when a man and a woman create a family.

#114, 52:41

Seven heavens (in Islam)

An image of the presence of Divine consciousness. Separation is given for the consciousness of people. The First Heaven is our visible Cosmos. The Second and Third Heavens are subtle-material civilizations. In the second Heaven, most likely, lived those who were called “evil genies” or shaitans. The Third Heaven was most likely occupied by higher vibrational plasmoids, “good genies” who follow the

path of Allah. The Fourth Heaven is the astral world. The Fifth Heaven is a world of disembodied spirits, but disembodied low-vibration spirits live there, those whom we call demons. The Sixth Heaven is the middle spirits, which we designate from the 9th to the 16th level. The Seventh Heaven is already Paradise, where the Angels are.

#260, 00:20

Saint-Germain

An embodied spirit located at the 24th level of the Spiritual World. Genetic relative of earthlings. Lives on the planet Disaru , in the city of Tussin. He was born there when the year was 1537 on Earth, and spent a long time on our planet under the guise of an earthling, because he was physically indistinguishable from them. The race of the planet Disaru is exactly the race that was resettled from Venus as a result of a war 12 thousand years ago. He studied the history of this planet, the history of its settlement, and although this happened quite a long time ago, he studied historical chronicles. I communicated with the spirits that were embodied there.

He was also embodied in Joseph, the stepfather of Christ, and was responsible for his upbringing and adaptation to earthly conditions. Joseph was 48 years old at the time of his marriage to Mary and died at the age of 75-76.

#46, 46:55, #47, #235, 34:53, #402

Seraphim of Sarov

Curator of the Earth. One of the main Guardians of the Christian egregor. In an earlier incarnation he was Archangel Michael.

He is the Supreme Hierarch, fully responsible for planet Earth. Patron of the entire Earth in the Spiritual World. He heads the department where the Arhats and Consulting Angels are located, who send all spirits at any density levels to incarnate on Earth.

#133, 58:29, #424, 00:03, 04:49

Sergius of Radonezh

Guardian of the Christian egregor, patron and curator of the Russian Federation on planet Earth in the Spiritual world. The first incarnation on Earth took place 300 years after the creation of people. Under Jesus Christ, he was also incarnate and was the father of the Apostle Mark.

Sergius of Radonezh came to life from the 21st level. He had a mission to study the faith and, with its help, gather a united people. During this period of his life his name was Bartholomew. In total, the family into which he was born had four children. It was a peasant family. Now in the place where he lived, the Yaroslavl region is located, somewhere near Yaroslavl.

Due to injury and the genetic makeup of his body, he was unable to memorize letters to read the Scriptures as successfully as he could. A little over two years after the first physical contact with aliens, when his head and brain were restored, this put his life out of danger. But when the mentors and curators saw that he himself could not cope with this problem, Archangel Gabriel additionally gave him a sacred liquid, which allowed him to completely restore his brain. And after that he became the first among the disciples.

#424

Human heart

The central organ in the human body. Hence the ancient word “heart”, from the word “middle”. In the projection of this physical heart is the anahata chakra, which is the symbol and energy center of the manifestation of the spiritual heart. The spiritual heart is the heart of the spirit, the eternal immortal spirit in which its essence is located. Simply put, where is the very essence of the spirit, which consists of three structures - feeling, desire, instincts. Therefore, the physical heart unfolds into a Mobius strip. God arranged it this way to show

people that the physical heart is a reflection and continuation of the spiritual heart, the source of eternity in man. The Mobius strip is a symbol of the eternity and infinity of the Universe, as the entire totality of material and spiritual energies.

#365, 19:30

Zion of the Screens

Name of Saint-Germain in Disar .

#253, 00:21

Force loves

The ability to fulfill one's desires and certain mental attitudes that may be contrary to the current desires of the individual.

#140, 06:48

The power of thought

The combination of the energy of the will of the rational spirit and its mental images. Namely, the energy of his consciousness, plus the energy of the will and plus the mind itself.

#234, 01:00:55

Silmani Grihtari

Representative of the planet Gihor . Specialist in creating external fields to restore the energy structures of humanoid civilizations.

#123, 00:27

Sylphs

One of the types of plasmoids. These are the spirits of the air and the creators of bird souls. They have a round body in the shape of a bluish ball, approximately the size of a soccer ball. They also incarnate intelligent spirits. When they make contact with a person, they can take different forms. Their body is very plastic and changeable.

#414, 01:02:10, 01:00:45, #509, 01:17:40

Egg symbol (Easter Easter cake)

Symbols of the Christian egregor from plasmoid civilizations who agreed to the presence of this egregor on Earth for that reason. that Christ transmitted Light to them while crucified on the cross.

A symbol of life, a symbol of how a chick comes out of a shell, where the chick is not yet visible, but it is there, and then it comes out of there. Therefore, even in the pre-Christian period, eggs have always been a symbol of fertility, a symbol of the birth of new life.

Red has always meant blood. This shows that a new human life begins from the moment of the resurrection of Christ, when He changed the entire human nature with His vibrations. He did this with his blood, which he shed on the cross. That's why the color of the egg is red.

As for the Easter cake. This is also an ancient form of treat in honor of the birth of God, for example, the Sun. This form was present in various Proto-Indo-European civilizations. Their flour was different, but in any case, such a product was baked long, like a cake. And it was smeared on top with white, for example, milk, sour cream. This was also a certain symbol of fertility.

#439, 48:05

Symbols and syllables

Syllabic writing in ancient times, each syllable denoted a specific symbol.

#250, 43:13

Synergy

Life in the consciousness of God. This is a joint action of God and man. Whatever name people on Earth give Him, it is always the same Divine essence. It can be recognized by the active spread of love, joy, life, truth. God gives us strength, intelligence and energy to embody material, any natural entities, objects. We accept it with our will, our desire, our energy. It is important to learn to trust yourself, learn to trust the Universe and completely trust God. And remember that the result of our actions depends on both people and God, almost equally.

#354, 11:31

Synergy (synthesis of different areas of healing)

Combining several areas into one: cosmoenergetics; plus those frequencies that were not included in cosmoenergetics, similar to reiki, originating from plasmoid civilizations (only not those civilizations that gave reiki, but others); and plus the physical impact of certain sounds - such a direction of treatment as sound therapy. Thanks to this, a complex effect on a person, on his energy and on his body is achieved through special areas of the brain that are excited or inhibited due to certain combinations of sounds.

#123, 01:15

Sink

Plasmoid (Earth, Solar System). Incarnated from level 17. Easily changes its shape, volume, size. Can take the form of a person or animal. The original shape is a cylinder, 0.5 m in diameter, about 2 m high. Color is between gray and blue. House center of Cassiopeia. Incarnate Guardian Angel of the home space. Appointed to the position by the main plasmoid of the city - Manu. In the city of Voronezh, Manu is a plasmoid Arkhiz , density level 28, his body has a size of 26 km.

#436, 01:08:20, #443, 28:56, 33:00, 01:12:30, 01:15:45, 01: 28:10

Synthesis

A thinking process that connects disparate information into one system.

#345, 30:12

Synthetic mind

The ability of the mind to see the same semantic content in completely different texts, in completely different information components.

#211, 32:18

System Varn

An early political-social system on Venus, reminiscent of the system in India, but not such a rigid caste system, which developed into the Varna system, when some group was responsible for every social action. The rulers were called princes. By the time of the move to Disara , the entire populated part of Venus was divided into twelve regions. These were not countries, but principalities. They did not have

a flag, an anthem, separate monetary units, or a language. There were just dialects. The power of these princes was inherited, but not always. They did not have a strict monarchy, there were no slaves, everyone was free, like a community of free owners who live on the earth, live in nature. Their economy was more based on their farming and crafts. There was such a period on Earth, but it took place with wars over land, over capturing slaves. This was not the case on Venus; there everyone lived more in understanding and friendship.

#402, 23:08

Intergalactic Security System

A security system that allows the Interstellar Union to protect the Galaxy from hostile invasion. An important part of the security system are gravity beacons, which are located throughout the Galaxy and allow you to correctly exit intergalactic jumps. They are tuned only to ships of the Interstellar Union, the Galactic Federation of Light and ships from other Galaxies that have received special markings. There are other, slower principles of movement in space without gravitational beacons: photon, ion engines, there are intergalactic ships using the free energy of vacuum, but they are more difficult to build, their operation requires large plasma field energy, they are easy to notice. For security purposes, the Interstellar Union also has bases on the outer approaches to the solar system, including the ships of Ashtar Sheran, and on the satellites of the outer planets, gas giants, on the Moon, on the Earth itself. All this is equipped with special equipment that will notify you of the approach of an unfamiliar ship.

#218, 34:22

Pythagorean system

Psychomatrix, which shows the amount of energy at the time of incarnation, willpower, character, intelligence.

#221 49:27

Self-assembled tablecloth

A figurative description of life in the Spiritual world. When food (its prototypes) is created from a spiritual substance by the power of thought.

#258, 30:29

Speed of light

A parameter that is not constant. Depends on the source emitting the light, the intensity of the flux and the space in which the light travels. On the outskirts of the galaxy and in intergalactic space, the speed can be 150-170% higher than the traditional constant of terrestrial science of 300,000 km/sec.

#287, 16:39

Slavic-Aryan Vedas

Information about the basics of all sacred actions used in rituals, and information about the universe. Also includes the Indian Vedas. Some of the information is preserved in the form of myths, legends, and fairy tales.

#197, 06:35

Slavic runes

A modified design of the Burkhad runes, transmitted by plasmoid civilizations.

#197, 12:33

Word

Manifestation of spiritual energies through the physical body.

#297, 38:00

Name change

Changing the vibrational characteristics of the entity. Begins at the time of name change and ends seven years after this change. All these seven years there has been an adaptation to new energies and it is not the spiritual level given during incarnation that changes, but the formula for calculating the Tree of Life and the vibration of the tasks of incarnation changes.

#203, 05:00

Gender reassignment (reasons)

The desire to change gender due to too strong memories of the previous body. Such a memory was not left by chance, but so that a person could, with this memory, adapt to a new body, to a new energy, and gain a new experience of accepting his body as divine energy. If a person changes gender, then he will not fulfill his task of incarnation, but will return to the memories and sensations of the past that came from his physical body, and he will not be focused on spiritual development.

#181, 30:50

The death penalty

The solution of a low-vibration spirit, which, due to its blocks and other

low-vibration states, came to some real crimes.

#214, 35:20

The death penalty from the perspective of the Interstellar Union

An action considered unacceptable in any crime. This is deprivation of embodiment before its natural release, deprivation of the right to correct mistakes at least at the level of dissolving the blocks that led to destructive behavior. In this case, the spirit is sent to lower levels and very often returns again to the same race that executed its body. He is already even more embittered. Since childhood, he has shown negative character traits.

#391, 38:16

Death

Transition from one energy state to another. Death does not exist, it is an illusion of perception based on a person's idea of the finitude of some process. If a process is finite, then it does not exist. All existing processes are endless.

#367, 30:44, 34:27, #387, 13:30

Death of the spirit (death of the soul)

An allegory that means separation from the Source of life, which is God. But this is not the cessation of existence. Moreover, even physical death is not the cessation of existence of either body or spirit, simply their separation.

Physical death is the separation of the soul from the body. But the body itself continues to exist in the form of elements, not a single quantum will disappear from it. Not a single atom will be lost from it . It will go into nature. He will pass into other bodies. Just like the spirit. It

will not disappear, but will pass into other forms of existence, and subsequently into other bodies.

The spirit is immortal. He is a part of God, God's beloved child. He cannot die: “cease to exist as awareness of oneself.” Spiritual death exists in the sense that the spirit can move away from high vibrations, from the Source of life, which is God, Love, Truth. Go into opposite energies and vibrations. If he left life, then he came to death. Such death does not imply the cessation of his existence. This is the state of his soul, his spirit, his energy, when he denies everything, a nihilist. These are the levels of demonic planes from which spirits also incarnate in order to return to the Light.

The question of the finitude of incarnations is decided by the spirit. He can stop his incarnations at any time. Stop at any level: at the first, demonic, or at the 24th. He may say: “I no longer wish to incarnate and will not go to choose an incarnation for myself.” Nobody will say a word to him. This is his complete right.

Whoever wishes to constantly incarnate and bring his Light, which he has achieved, into the world, or to achieve this Light if it is not yet realized, this is also the right of any spirit. Finite or endless incarnation, nirvana or samsara awaits you, only you decide.

#437, 01:42:26

Laughter

Physical manifestation of joy.

#219, 34:35

Humility

The desire is not to receive benefits from prayer, but to give away your Light. When you yourself are ready to give selflessly.

#169, 47:14

Meaning of life

A specific goal that is valuable to a specific person.

#315, 00:22

The meaning of life of spirits

For the generation at the third level of density - in realizing the value of one's life, the value of the life of another person and in overcoming selfish accumulation programs, overcoming fears, openness to the world, overcoming fears of equal energy exchange. Many spirits come here with original karmic fears. They have a conflict between such concepts as how much energy in any form to take from the world, and how much energy to give. And overcoming this conflict is one of the tasks of this generation of spirits. The meaning of this task.

The meaning of life for spirits incarnated at the same level of density on the same planet may vary depending on generations.

#465, 01:01:00

Meaning of "16108 wives of Krishna in Dwarka"

Each number has a symbolic meaning specific to the understanding of the people who wrote these texts. "1" denotes God and me, as one being with Him, "6" symbolizes absolute Love. "0" means infinity. The last number "8" represents contact with the material world and the spread of energy flows. Everything together is expressed as infinite love, which has been developed and is spreading to the material world.

#310, 01:33:32

Bigfoot (Yeti)

A representative of a tribe of earthly people who, after the war 12,000 years ago, did not follow the path of technocratic development, but continued to live in fusion with nature, with plasmoid civilizations. Thanks to this, they developed a sense of perception of the spiritual world, energies, and they began to have a different way of thinking, which allowed them to better control their physical body. They are subject to teleportation, levitation, and this is all thanks to the power of their thoughts and faith in what they do.

#14, 15:02, #80, 01:09:00, #83, 30:07, #121, 00:00

Dreams

Separation of a person's astral body from the physical, unconscious travel in the astral world.

Partial memories of travel outside the physical body. Human nature allows the spirit to be in the astral space while the body sleeps. The spirit itself does not need rest, unlike the physical body, therefore, while the body is being restored, the spirit leaves it.

#1, 27:53, #43, 07:05, #50, 26:28

Own Light

The realization that you are a child of God.

#191, 01:01:55

Perfect body

A body that is as close as possible to the ideal for performing its task chosen for the current incarnation.

#244, 02:22

Conscience

One of the reflections of the Higher Self, but more connected with the moral standards of society. The spirit, incarnating in everyone, has a blocked memory of the past and moral standards in it manifest themselves in the form of feelings of what is possible and what is not. If an act committed now took place and its consequences were experienced in a past incarnation, then the Higher Self will tell you through conscience that this is wrong. And this can be bypassing the opinions of others and logically explaining to yourself why this is so.

A type of communication with the Higher Self.

#1, 18:23, #26, 15:50, #423, 04:44

Karma Advice

Training Angel Consultants responsible for the entire Galaxy on how to correctly incarnate spirits, how to select conditions for them and how to create events that lead them to awareness of the Light and to acceptance.

A side activity of the Council of Karma (the Arhats are more involved in this) is monitoring the development of political and religious egregors

on all planets of the Milky Way and at all levels of density, in all Worlds of the Milky Way at all levels of density.

The Chairman of the Council of Karma is Archangel Metatron.

#446, 34:55

Constellation Ursa Major (one of the civilizations)

A civilization of intelligent underwater creatures resembling dolphins, only larger in size, of a different color, with different eyes. Relatively speaking, these are intelligent dolphins. They incarnate not animal souls, but rational spirits. Their nervous system is capable of accepting an intelligent spirit. Since they live underwater and have fins instead of arms, they swim. They do not have the ability to build a spaceship and physically travel in space. This civilization is part of the Interstellar Union. Its representatives can travel in tanks specially created by other civilizations.

#296, 45:00

Constellation Sagittarius (one of the planets)

A planet in the constellation Sagittarius, located more than 2000 light years from Earth, and part of the Galactic Federation of Light. Not included in the Interstellar Union. Representatives of this planet have blue-gray skin, and the blue-gray color shimmers in their astral bodies. They can heal and restore spirit.

#296, 45:00

Constellations

Smaller visible objects around a bright star.

#353, 09:33

Creation of races (reasons for creation)

Their creation after the war through directed mutations of different races so that people would settle to different ends of the Earth and could live in different climatic zones. We can say that the ancestor of all races is the European race. It was resettled mainly north of the Mediterranean and Black Seas. A by-product of the creation of races was the elimination of xenophobia in this way. When representatives of different races interact with each other, they develop in their political and social egregors tolerance for the appearance of others.

#403, 57:02

The Creation of Man

An experiment by representatives of three civilizations: Tumesout , Burkhad and Selbet with the aim of creating a hybrid from earthly primates. 3 million years ago, the introduction of genetic material into the nuclei of primate cells produced the first human being. In percentage terms, human genes include: 45% of primate genes; 35% of Burkhadian genes; 15% of Tumesoutui genes; 5% of Selbet genes. The first people were created 18 people: 9 men and 9 women. Humans were created at the embryonic level and born from female primates through genetic modification or artificial insemination.

#18, 11:20, 16:00, 16:23, 21:27, 34:30, #32, 24:00, #42, 43:32

Consciousness

The embodied part of the spirit. The energy of the spirit, aimed at perceiving the world around us and oneself in it. This is perception for building your individual subjective world. Consciousness, as the energy of the spirit, permeates the entire brain; through it, information about the surrounding world is transmitted from receptors to the structure called thinking. Thinking requests information from memory.

This is approximately one twentieth of a second in a person - this is the possibility of neural pathways. Consciousness, in order to perceive the world, one might say, charges the brain to the last cell. It charges him with itself. And through the brain, through the body's receptors: eyes, ears, skin , tongue, nose, it reads the space where a person is, in general, through his body, through his sense of body position, sense of gravity, and so on. The energy of the spirit, aimed at the perception of the external and internal worlds, in turn, is divided into consciousness, as perception, and into self-consciousness, as the perception of oneself, different from others.

#14, 03:10, #33, 24:04, #59, 35:02, #89, 29:08, #91, 26:53, #283, 23:16, #304, 27:33, #344, 31:45, #345, 30:12

Krishna Consciousness

A state when a person begins to treat others, himself and the world the same way Krishna saw it. Through the prism of his consciousness, awareness and mind enlightened by the Light of Love.

This is not Krishna consciousness, but awareness of Krishna as oneself and oneself as Krishna. Not as a phantom, but in general. When you talk about Krishna Consciousness, talk about it, about your awareness in it and about Krishna awareness in you.

#122, 11:04, #309, 06:02

Conscious physical contactees

Those who have retained the memory of physical contacts, like Irina Podzorova , and those who can remember and talk about it after contact.

#317, 12:46

Willful sin

The sin of the spirit itself.

#53, 01:03:05

solar system

A multifunctional and multifactorial matrix in which the planets are embedded as denser visible bodies. But on subtle planes there are more of them.

#353, 01:47

Solar eclipse

The superposition of two energies on each other. The energy of the Sun begins to pass through the field of the Moon, they connect. Their magnetic fields and etheric vibrations are connected. Each celestial body is also surrounded by an ethereal shell, atmospheric electricity, in such a way that people's immunity can be suppressed.

#401, 00:20

Solar wind (aurora)

The flow of energy of various types of radiation, which is visible at the north pole, due to its special structure. It contains the following types of radiation: hard radiation, x-rays, gamma, which, reflected from the atoms present in the air, create light emanating from the Sun. Particles of energy that spread in space reach not only the Earth or Mars, but also far beyond the solar system, and practically do not lose their energy, and also come from the atmosphere of other planets, despite the fact that they are located on great distance from the luminary. Therefore, these particles interact with particles of gases, with atoms of gases that make up these planets, they create their own magnetic

fields just like on other planets.

#17, 06:50, #96, 05:59

Salt

A group of elements that are the product of a reaction between acids and alkalis.

#398, 32:16

Dream

The process of separating the astral body from the physical body at the moment when the physical body temporarily enters a state of relaxation.

#122, 56:29

Sleep paralysis

A state of a person in which partial access to the astral plane occurs while maintaining partial awareness in the body. When entering the astral plane, for example, during sleep, the physical body is immobilized by a special hormone, and sleep paralysis occurs.

#173, 45:48

Community "Nebo" ("Union of Six", "Order of Six")

Coalition, military-political order of reptilians and grays. Union of Six. Orion constellation. These are not grays, but hybrids between reptilians and one of the Tashiga colonies . The Order of the Six includes six races . These are the first races to develop themselves .

They call hybrids hybrids.

#311 , 04:59

The state of "Buddha"

Enlightenment. It is not the absence of all desires. What remains are desires that agree with the will, with the energy of Light.

#350, 40:52

State of slavery

The internal state of a person himself, when he feels disconnected from the Divine Spirit, from the universal law of the universe, from that Light of Love that creates life, and then he feels like a slave and makes others a slave. He tries or does it, depending on his capabilities.

#235, 14:57

State of freedom

The internal state of the person himself, that is, this is the internal state of the spirit of a person, attached to the Divine energy, to the Divine Spirit, and then he feels absolutely free. One of the spiritual teachers of humanity said the following words: “Freedom is where the Spirit of the Lord is, that is, where the Light is.”

#235, 14:57

The state of the student (in spiritual development)

Recognizing the fact that you have room to grow, you have something

to learn. This is an even purer and more beautiful state than a teacher. The teacher passes on his experience and it is much easier for him to do this than for a student to perceive something that he never knew. So never be shy to show that you don't know something.

#407, 17:44

Union (alien)

The unification of various civilizations on the basis of a common Charter of the organization. The process of adopting the Charter or amendments to it is carried out at a general meeting or at a meeting of a larger number of members of the association.

#145, 13:33

Union of Worlds (CON)

Pleiadians. Coalition Observer Squad. The Union includes Futissa, the planet Khatur, and there are colonies of Burkhad . The goal of the Union is to include Earth in the Galactic Federation of Light as quickly as possible. They are trying to provide information to earthlings through the media, interrupting radio stations and TV.

#200, 06:08

Union of Six

Order of the Union of Six

A union of planets that are not members of the Interstellar Union, in fairly close contact with Selbet , with Tashig , with its colonies that are not members of the Interstellar Union. They have their own local information networks through which they transmit information. The theory of secrecy is very developed. The highest representatives of the elite in their society are accustomed to keeping everything secret from

ordinary representatives of their people. Elitism is very often inherited in this society. It is very difficult for an ordinary member of society to become a member of the governing elite; one must go through a very long journey, approve all the actions of the authorities and show oneself as a very respectable citizen who can really benefit this elite. It is not so easy. Mostly they have families that pass it on from generation to generation.

#391, 10:19

Spectrum of electromagnetic frequencies recorded by a person through sense organs or instruments

Warm
Radio waves (long, medium, short waves, VHF, 5G)
Infrared radiation
Microwave
Light waves visible to the human eye - red, orange, yellow , green, blue, indigo, violet
Ultraviolet
X-ray
Gamma radiation

This ends the list of electromagnetic frequencies recorded by humans through sense organs or instruments. But at the same time, beyond its boundaries there is electromagnetic radiation of different density levels.

#248, 01:15

Spectrograph

Kind of art on Esler . Drawing with a spectrum (rays of different colors) on a kind of screen separated by an electromagnetic field.

#51, 18:30

Ability to hypnosis

The ability to consistently actively think in one direction, focus on one thought and have strong will energy to carry out the impulses of these thoughts either to your entire consciousness or to the consciousness of another person, that is, for the so-called transference. In hypnosis, not only the work of consciousness, the work of the brain, the mind, but also the state of energy, or personal strength, matters . It is reflected through the emotional state, through willpower.

#140, 06:48, 08:57

Methods of human burial

In the Interstellar Union, technology is used when the body is placed in a special transformer, in which the molecules that make up it break up into individual atoms. From them certain elements are already obtained that can be used in any process. The elements are being rearranged.

As far as the Earth is concerned, it is only a matter of tradition. The body was given over to fire, thanks to the tradition in which the God of Fire, Agni, was revered and worshiped. He helped with the burning of the body. It was a long time ago, in Vedic times, when the Vedas and interpretations to them were written. Burning the body in fire sent the soul in a stream, in a column of flame, to heaven. God Agni helped the soul to ascend by taking energy from the body. When it burns, it releases energy. It was believed that Agni helps to ascend to heaven. In another way, this is an appeal to plasmoid civilizations to help them pass through the astral world full of danger for those who have not worked on dissolving the blocks in their lives. This is a meeting with the essence, so that God Agni and his assistants, the Salamanders, accompany this soul together with the Guardian Angel and illuminate the path with their fire.

As for burying, which did not exist in ancient times in Rus', where did it come from? It arose from the story that each soul will be united with its body after the resurrection, after the second coming of Christ. There was such a record in the Christian Bible. When Christianity came to Rus', a custom developed to preserve the body as much as possible in a box. Belief in the resurrection of the body.

There were customs when they threw the body into the water to give it to the spirit of the water. It became food for fish. The spirit of water, through its fish servants, divided it into parts and returned it to nature.

As for countries where it was not possible to make a big fire or bury it deep in the ground, they gave the body to the birds.

For the soul, for the spirit, which is pure, not attached to the material world, which is directed towards the spiritual, there is not much difference what happens to the body. In any case, the spirit will go to the Spiritual World at its own level and will not worry about the body.

If a person misses his relatives, his body, wants to return to his property, then the rapid destruction of the body in any way helps him quickly understand that it does not exist, and life energy is not released from it.

When the body dies, energy can be released from the cells for several months. This may attract a soul that is longing for earthly life. In this case, cremation is preferable for such a soul. For a soul that is directed towards God, there is not much difference.

#413, 01:10:08

Methods of destroying political egregors of different countries of any system

Creating a negative image of the ruler and people close to him. This negative image of the ruler begins to form a negative thought form in the political egregor, which is fueled by the thoughts of people and the negative emotions and feelings associated with these beliefs. In this case, the negative image of the ruler begins to influence the ruler who is actually in power in the material world. Sometimes he even enters his field, if he himself, with his low vibrations associated with something, attracts him and is combined with his consciousness, and the ruler himself begins to correspond to this image. And, thus, the image of a negative ruler among the people is further reinforced, and all this spins into such a wheel that, in the end, ends with the

overthrow of this ruler or his death from his own negative emotions, etc., withdrawal from incarnation. And, accordingly, either by his overthrow by this society and the coming to power of another person, whose image is positive.

#235, 14:57

Justice

The concept of moral standards, what is good, what is bad, and what the consequences, what punishment entails for failure to comply with them. Laws on the moral standards of society. The word justice itself comes from the word truth.

#188, 29:12

Middle Aetheric Energy

One of the types of subtle etheric energy. Harmonizing energy that supports the structure of material space and the space of all subtle worlds, like an ocean in which the material world of different densities “floats”. Thanks to it, the laws of the Universe exist: gravity, chemical reactions. It ensures the sameness of physical laws in dense matter in different parts of the universe, the sameness of the process of the passage of time, and so on.

#141, 33:47

Stability

Stable positive background.

#266, 29:25

Stalin

A personality whose greatness lay in the fact that despite the negative manifestations of anger, hatred of class elements that were contrary to the revolution (and he had hatred), they were combined in him with light vibrations, feelings towards his children, towards his women, towards to the common people.

By conviction he was a communist. A sincere, convinced communist who communicated personally with Vladimir Ulyanov, Plekhanov, Yezhov and others.

A great personality who, even in very difficult personal conditions and negative blocks, still managed to come to power and take control of the country in one of the most difficult periods of its history. And hand over this country to another leader in 200 times better condition than he took it. This is his talent as a leader, psychologist, ideologist, his supervisors, who were also there and, despite this, communicated with him.

#231

Aging

The process of turning off cells and some cellular structures from activity. They first slow down their renewal and repair, and then completely stop functioning. In a cell, not only mitochondria, but also other organelles age. All this is determined by the program, the genetic code, which is embedded in DNA and RNA. At the genetic level, the timing of the sequence of actions of a specific organelle is laid down, just like any large organ in the human body.

The lifespan of cells and the entire organism as a whole can be influenced by the spirit, the intelligent consciousness that is inside the body, embodied, connected to matter.

#409, 25:22, #410, 03:21

Old age

The feeling that you have already known everything in this world, nothing is interesting. At the same time, the person gives a signal to the Higher Self that he can leave the incarnation. On a subconscious level, a person who is despondent, depressed, gives a signal to his Higher Self: “I don’t like it here, take me to the Spiritual world.” This is aging.

#273, 00:20

Bloch wall or neutral zone between the poles of magnets

Matter, a material body that emits a magnetic field, is not divided into different zones. These are vortices directed in different directions of space, not having a positive or negative charge, because they are one energy.

#17, 01:05:40

An element

Manifestation of intelligent spirits. A set of elements that are controlled from the outside by intelligent spirits, embodied in their plasmoid worlds and having the task of managing and leading one or another element. For example, fire, as an element, has its own rulers - the spirits of the element of fire. These are subtle-material beings, spirits, embodied in the subtle-material body of a fire plasmoid. The usual term is "Salamander" for Europeans.

#33, 25:13

Fear

One of the forms of perception of materialism. Activation of the instinct of self-preservation, which manifests itself through the body. Violation of the first chakra, which can cause further diseases of the physical body and destruction of the aura.

An emotion that is a reaction to a danger to life, for some kind of human program. This emotion arises as an excitement of energy, as a reaction to a violation of the instinctive program.

Fear can be justified or unfounded.

Justified – this is when it is really dangerous. To remove it, it is necessary to change the situation, to remove this danger if possible.

The unreasonable does not disappear when the danger is removed, it exists as based on an imaginary situation. Here it is necessary to turn to the Higher Self, find out the reason, when it arose, what scared the person, dissolve this block and fully admit trust in God. Then he will disappear.

#135, 36:57, #247, 22:25, #250, 01:04:16, #261, 12:4, #262, 00:56, #393, 1:05:06

Fear of God (The concept of “fear of God”)

A figurative expression that is understandable only to the spiritual heart, and not to the mind, which is accustomed to the word “fear” to mean fear of someone, of something.

We remember that God is Love, there are the highest energies of Love, life, Light, which does not wish harm to anyone. This is in all religions. And such fear as before a person, before God, is impossible. He does not want to be feared like some creature who does not love.

This is the feeling of a person’s emotion when he experiences fear of lowering his vibrations, of leaving the Divine Light of Love.

Fear of being left without the presence of God. To be left without God. Become unable to feel. Fear of sinning, committing some sin, some bad deed.

Fear of losing God's presence in your soul, in your spiritual heart.

#444, 01:33:33

Last Judgment

Analysis of the spirit's own life after the death of the physical body. It passes along with the spirit mentors in the presence of God, in that form that the spirit of the deceased is able to perceive. At the same time, all the details of life in the body are analyzed: what is, what was and what it led to.

#59, 41:05, #69, 07:08, 39:42

Builders (spirits)

Spirits from the 12th level of the World of Unincarnate Spirits. Spirits for whom the main goal is to create comfortable conditions for themselves and their loved ones to live in the material world. They are ready to work hard for this, both physically and mentally, but often consider matter, if not the only reality, then the most important condition for mental peace and harmony, which they call happiness. Spiritual quests are often incomprehensible and boring to them, although they most often do not condemn all this in other people, but the joy of a job well done is closer to them than from music or a book read, and even more so from prayer or meditation.

Article by Vladimir Goldstein "The structure of the Spiritual world through the eyes of aliens"

Magnetic field structure

A structure formed in space when a magnetic field appears, when this type of energy leaves a substance, similar to a tornado, a funnel. It is voluminous and spins like a whirlpool in water.

#17, 05:50

The structure of the universe

Three large structures:

1. The dense material world or the physical Universe.

2. The subtle material world or plasmoid levels.

3. Spiritual world.

#66, 01:34

Fate

An incarnation script written by an intelligent spirit before incarnation into a body.

The path of life that a person goes through himself, using, among other things, his vibrational characteristics.

Plans that can change during the process of implementation if the attitude towards a particular event that caused this fate changes. To put it very simply, if you sow an action, you will reap a character; if you sow a character, you will reap a destiny. That is, to put it very briefly, fate is formed by character, and character is formed by actions.

#9, 06:07, #59, 40:35, 41:22, #97, 17:50, #203, 05:00

Suicide

Intentional taking of one's life in order to get rid of any material or mental suffering in the body. The visible action of the embodied spirit,

but it is always led to by a sequence of causes. And these reasons themselves are deposited as a block in the astral body, influencing the mental attitudes of the spirit, and suicide is only the material embodiment of these thoughts, feelings, desires and emotions that were not processed into Light. The spirit leaves with the same problems that it has not solved. These problems are postponed until a subsequent incarnation without memory of their causes

#282, 02:45

Man's destiny

The totality of a person’s choices in certain situations.

#308, 05:11

Succumb

Various levels of plasmoids and disembodied spirits.

#178, 01:11:30

The essence of love

Forget about yourself. Therefore, many people who had wealth in ancient times and wanted to live free from the material world, sold it, distributed it to the poorest and went either to nature or to some religious institutions. This is a natural consequence of the desire to free ourselves from the power of money, because money has power over a person.

Do good unselfishly, without expecting anything in return. Just as the Sun shines without demanding anything in return from plants and gives them life, so does selfless Love.

#475, 03:39, 03:58

The essence of any monarchy

God's chosen ruler.

#211, 16:16

The essence of the energy vibrations of the Creator

The light of love, the state of that love that exists on its own, in itself, it is capable of shining with spiritual Light. Unconditional love regardless of the answer: gratitude, indifference or rejection. Patience, dedication, selfless, sincere giving of oneself, allowing one to feel happiness from this giving. Love for yourself, for other people, nature, space, the Creator. Love – patience, faith, forgiveness.

#43, 14:12

Sphere of Reason

A separate part of the cycle of existence of the Universe. An abrupt increase in vibration on any planet in its noosphere, which entails a mandatory change in the material world. It also means a qualitative change in the environment through the spiritual world.

#119, 37:20

Sphinxes

Statues built long before the pyramids, about 15 thousand years before the present day, before the war. There were two of them. There was a river around them and between them (they stood side by side), but it was wider than the one that has now become the Nile. The sphinxes are facing the Nile. Initially, they were built by specialists from the Tumesout base where Eden was located. They built it on the site where the first city of the earthlings was. They were built as

symbols of friendship between the Earth and Tumesout . Initially, the faces of the Tumesoutians , the two who built them, were depicted. The sphinxes were built by the Tumesoutians themselves, with their own instruments, directly from the rock.

The second sphinx was destroyed during the war. A Selbet ship flew by and with rays (it was a beam weapon, like a laser, only the temperature was higher) destroyed this sphinx with one hit. It is made of a material similar to hard sand, and therefore shattered into pieces. A piece from the first sphinx flew across the face of the second and split it, creating a crack. Later, when the pharaohs found them, they began to hire workers and remake the damaged face to make it look like them. Moreover, it was redone several times.

The face was of a man, and the body of a lion. It was a combination, like the union of Earth and Tumesout . Lions in that place were the predominant animals at that time. They were constantly with people, just like domestic cats are now. People communicated with them very well, revered lions as a symbol of strength, and it can be said that the Tumesoutians expressed in the sphinxes the covenant of the union of Tumesout and the Earth.

#403, 36:33

Shureo

A planet located in the constellation Bootes at a distance of 326 light years from Earth. When viewed from Arcturus, it is down and to the left towards the constellation Corona Borealis.

Its structure is very similar to that of the earth.

Its representatives have evolved from the likeness of sea turtles and therefore they have not only a shell, but hard skin. Although they feed their children with something like milk, it is not milk, but some kind of special liquid that protrudes from special glands at the back of the head. They are oviparous. Their skin is dark green , very hard , and you can knock on it. The head is triangular in shape, two eyes, a round

mouth, and in place of the nose there is a triangular hole.

They walk on two legs, with membranes between their legs. They lived in water, aquatic organisms, have webs between their four toes, and on their hands they have long fingers that bend at the four joints.

Life expectancy currently in Earth years is in the region of 250-300 years, practically equal to life expectancy on Daraal .

The average height is twenty meters, thirty meters.

They also have many different countries with a population of about 11 billion at the moment. There are 93 countries on the planet that are constantly at war with each other.

Among the population there are those who are interested in spiritual development, and those who are at the top of the social pyramid, who are in power, can prohibit this. They are chasing them. Materialism is very developed, some part of the population wants to join the Interstellar Union, but some are not ready.

They even have a semblance of abortion, only they destroy not children who were not born, but laid eggs. Moreover, they have such a belief that if their woman becomes pregnant for the third time and lays eggs, in this case they lay four of them at once, a group of souls incarnates. A woman should, together with her man, her husband, share a meal consisting of these eggs. Their government is fighting against this custom. In some countries this is legal, no one prevents it. Religious organizations created by the Interstellar Union condemn such behavior.

They also have the death penalty, and there is even the death penalty for theft from any official or for long-term non-payment of taxes.

They are at the 13th level of technological development. They have nuclear energy, they use it , there are very large deposits of uranium on the planet. Moreover, their scientists are already creating artificial elements.

Even before contact, they had already had several local nuclear wars, but they were limited to individual strikes.

They fly quite actively in space. They have even sent an expedition to neighboring stars . But their spaceships, which they themselves created, are based on the rapid release of light radiation in the form of a beam. The speed of such an interstellar ship is low. To fly to a neighboring star in the region of six light years, they need about two Earth months.

They have art. But it is in the service of government forces, which in every country that exists there praises its own way of life and criticizes all others. Various means can be used. There is an analogue of television, only it is more perfect. It conveys more of the reality of what is happening. They can use special computer programs. There is artificial intelligence that uses images of other countries to create negativity and hatred.

#449, 34:00, 45:45

Happiness

Divine Energy, which is with God, as Love, as Truth, as Life. This is basic Divine Energy. This is not just some kind of emotional joy, it is a state of absolute harmony. Harmony and happiness are one and the same. This is a state of absolute harmony and peace with yourself, with people and with God.

When the spirit was born in the Divine Light, it was born, among other things, from happiness, from the energy of happiness, from the energy of Love, from the energy of the Divine Mind. All energies took part in the birth of the spirit.

A state of satisfaction with the place (position) you occupy.

#315, 02:10, #477, 12:39

Son of God

A symbol, any intelligent spirit born of God. All born people are sons and daughters of God. The concept “son of God” was chosen to express the process of birth from God in earthly language. It reflects the fact of the presence of all Divine Energies in a person.

#158, 16:33

T

Sacraments

Special actions performed in the church, developed by representatives of the planets Burhad and Tumesout , with the help of which the energy of the highest levels of the spiritual world can enter a person and change not only his spiritual vibration, but also the state of the physical body. There are seven such sacraments in the church and any of them has meaning, but only for those who believe in Christ as the Son of God. If He is perceived as a simple person, a prophet or a teacher, anyone, but not the Son of God, then the rituals will not work , since only faith in Christ, as the Son of God, includes the necessary vibrations in a person, contributing to his transformation into the energy attracted by this vibration from higher spiritual levels.

#10, 01:07

Talent

Acquired qualities in past incarnations that a person came to realize in this incarnation, either to further develop these qualities, or to help others realize them. But more often these two goals coincide.

How to realize talent? It depends on what he's wearing.

If you have talent, then constant practice in this direction is necessary.

There is no need to be afraid to move forward , to be afraid of mistakes, to be afraid of other people's condemnation. If you fall into fear, you will not be able to realize your talent. Because its implementation requires confidence, courage and a willingness to take responsibility for the results.

#427, 20:38

Tashigan people

#449, 10:05

Creator

The eternal being who has always been, the source of everything. That Creator who exists in the Spiritual world. Beyond even the world of disembodied spirits. This is the Divine world.

#358, 01:01:15

Creative inspiration

The work of imagination, as part of the embodied spirit, when images are combined with each other into words. This is random inspiration. There is involuntary inspiration - it is an open channel where the flow of information comes in the form of ready-made proposals from curators in the form of contact and a person understands that this does not belong to him, that this is the creativity of another. Poetic inspiration is a sign of the resonance of the souls of the one who received this information through a spiritual channel, and the one who transmitted it .

#297, 07:36

Creativity in everyday life

Using imagination to create new images and ideas. This is not only to draw something on paper and not only to compose a poem or music, it is to introduce a new idea, for example, to perform this or that action.

#477, 22:20

Telekinesis

An ability related to human energy. It is often the cause of such phenomena as poltergeists. To intentionally induce telekinesis, you need to concentrate your thoughts so that you believe 100% that it is possible. Only the belief that this is possible gives such energy and the opportunity for this energy to come out of a person. Levitation manifests itself in a similar way. What prevents you from demonstrating this ability is the mental attitude that it is impossible, which blocks the energy.

#59, 30:55, 31:45

Telepathy

Transmission of thought images through the astral body, mental body, aura at a distance, an innate ability. To transmit, you need a concentration of attention to transmit, and to receive, you need a concentration of attention to listen. You need to learn all this, you need to believe in it.

This ability can also appear as a result of installing a chip. Such technologies are available, for example, on the planet Daraal . Chips are installed on contactees to enable telepathic communication with them.

There are no devices that will amplify your thoughts to such an extent that they become electromagnetic waves, and then turn into electromagnetic vibrations and enter the aura of another. All the same, contact will occur through the aura, even if you are in the physical body. And even if they come in the form of electromagnetic

oscillations, they will already have traveled some distance. When you are both in the physical body, your thoughts are not in the physical brain. In the physical brain there are only electromagnetic vibrations that are generated by the mental body - the spirit. And the spirit itself is outside the material world. In order to transmit these vibrations that exist in the physical brain through telepathy, you need to think. The thought will first be reflected in the electromagnetic oscillations of the brain, and only then will it pass into the aura, and by the resonance effect will cause similar oscillations in the receiving aura. And only then will it be perceived by the brain and then go into consciousness. And even if such a fluctuation occurs, that is, if you perceive something, it will not be a fact that this is exactly the thought that arose in the head of the transmitter. Because it will have a resonance effect, that is, a thought that may be close to him in consciousness. Well, for example, you will pass the word “fish”, and he will perceive it simply as the sea, for example. Through the physical body it will be distorted.

#41, 23:43, #59, 30:25, #256, 58:15

Teleportation

Directing an object to a special type of energy that is associated with the etheric field. The energy comes from there in agreement with the plasmoids. It has such great power that the atoms and fields that are contained in a physical object are transformed into radiation of a very high level of density, for example, like a radio wave, only with a very high vibration. She moves through a special teleportation channel instantly to any distance. And there it is reproduced again into atoms.

#397, 01:55

Bodily immunity

A reflection of the spirit’s ability to purify, to raise its vibrations, to bring them closer to the Divine. This is a reflection of the omnipotence of God, his omnipresence. At the level of the human body, the immune

system is represented by bone marrow, lymph nodes, thymus, leukocytes, lymphocytes, monocytes, basophils, neutrophils and eosinophils.

#359, 37:00

Body

Matter, which consists of quanta.

#358, 18:00

The human body

The material part of a person.

A tool through which you can perceive the world around you with five senses, five sensations through receptors. A person is a perceiver of this world and he is not a function of the brain or any neuron of the brain. Man is an immortal spirit. After the body dies , the spirit will leave it and go to the spiritual world, its eternal home, from where it came here to solve its problems. There is not a single organ in the human body that is less important. They are all important. You have body harmony. Any organs are important; you have a non-random number of teeth, ribs, and certain organs. They are all important for your species, for energetic health, for physical health. This is all formed in a complex manner, according to the DNA program of the body, but under the influence of the energy of the soul.

A particle of the Earth, a particle of the earth's space, consists of the same elements as the Earth; our body contains in varying quantities all the elements, all the atoms that are in the Earth.

Iris of the eyes, location of moles, lines on the palms, etc. - these are signs of the body. Their location reflects the energy of the one who

incarnated, i.e. information about its energy. Because the physical body, even according to the genetic parameters that are embedded in it, is built on the basis of the etheric body. The etheric body, i.e. vital force contains astral and mental matrices. Those. This all first exists in thoughts, in spirit. And only then is it embodied on the physical level. And the different arrangement of different lines, etc. is a reflection of the energy of the one who incarnated.

#41, 06:30, #217, 53:17, #365, 11:51, #387,23:14, #390, 01:13

Systems theory

A way of describing the universe as a set of more or less complex systems, nested within each other and influencing one another through symbiotic relationships.

#211, 25:22

Thermostats

Microcircuits that are built between something, but not between blocks of walls (which can be monolithic), but within their composition, inside. And if the temperature drops below a certain point, then there is a special material that automatically converts the energy of the surrounding building materials into heat.

#451, 36:41

Patience

The main sign of love for yourself and others.

#128, 12:56

Terra formation in the Galaxy by the planet Burkhad

Scientific direction of the Interstellar Union. Active exploration of planets in star systems previously inaccessible to life. This could be setting a new orbit around the star, changing the angle of inclination, changing the atmosphere and many other parameters.

#27, 33:11

Warm

Type of infrared radiation.

#148, 59:35

Thermal energy

A type of first level energy that reflects a physical sensation or, as measured by instruments, reflects the energy and rate of vibration of atoms in space.

#148, 14:01

Thermonuclear reactions in stars

What we see at the physical level of the Universe. This is a process of transformation of atoms, which gives the release of second-level energy. We can say that the source of all stars, all systems of the physical world and, in general, the entire material world, is hidden in the Spiritual world. Matter itself is made of energy. The energy itself is made up of more subtle spiritual structures (energies) that make up that energy. And then everything goes into the source of the original

Light. Therefore, the light of stars and the Sun visible with physical eyes is a reflection of the Light of the Creator's endless love. Although this is a figurative expression, it quite accurately reflects the essence of things.

#43, 35:54

Tesla Nikolay

Contactor with the planet Burkhad.

The spirit, whose incarnation on Earth in the physical body was the first incarnation in a dense body. Before this, he was not incarnated on Earth in a physical body or in any dense material race of the Universe. Has not been incarnated in humanoid races. All 56 incarnations before this were only in the subtle worlds. In 1957, there was the first experience that allowed me to incarnate into a physical dense body. He incarnated from the 9th level because he exhausted the limit of experience that was available in the subtle worlds, and for the physical world he was a student.

He spent all of his last 17 incarnations in the subtle worlds on the Sun, in solar civilization. That is why the moment he was born on Earth, he had contact from childhood. Currently at level 15.

The planned period of incarnation should have ended nine years earlier. It was extended so that he could improve his level. The last ten years of my life were devoted to the analysis of the incarnation.

#46, 16:04, #376, 19:07, 34:51, 36:44, 45:54, #404 , 00:19

Nikola Tesla (Coil)

A device that attracts energy from the air, electricity. The atmosphere contains mini electrostatic discharges that can be attracted. The coil must be made of metal. A small current must be supplied to it and it will be able to attract a large one. That is, it is like energy, there will be

both an electric field and a magnetic field. It does not use the energy of the ether, it is the energy of mini electric discharges that are always in the air. They are always there, even in the room and outdoors.

#376, 01:03:56, #377, 00:23, #377

Dark matter

A structure that does not interact electromagnetically with the ordinary matter that we perceive. And the Universe was formed from this matter: it flowed into the structure formed by this matter.

#68, 00:05:22

Tiamat

A symbol of snake-like creatures that were fought with.

#41, 55:24

Thymus

Immune gland. If a person does not strengthen his immune system, this organ may atrophy.

#374, 14:15

Body type (what defines it)

Genetics, energy, climate, magnetosphere, gravity, many factors. Not only the genetics of the animal from which the evolution of your species began, but also the genetics of those creatures from outer space who shared their gene pool with you, as well as their energy, influences.

#365, 00:21

Types of engines of alien ships

1 Planetary type. The principle of repulsion from the magnetic fields of a planet and attraction to the magnetic fields of other planets. They are used only within star systems for travel between planets.

2 Atmospheric type. The principle of shielding from the gravitational field of the planet. An electromagnetic field of a special configuration is created , which shields the ship from the gravitational field, and it takes off vertically upward.

#52, 22:14

Types of microanimals

Viruses, bacteria, fungi.

#27, 01:14:18

Tisul princess

The ruler of earthly civilization, who lived 850-900 thousand years ago.

#72, 00:49, #75, 26:53

Titans (twelve)

Six men and six women, who, according to Ancient Greek myths, were the creation of Heaven and Earth. They designated certain forces of nature either from Heaven or from Earth, were responsible for the ocean, mountains, sun, that is, they represented a collection of plasmoid civilizations.

#288, 12:50, 29:30

Titanomachy (war of the gods)

The confrontation between the tribes of people living on the territory of Greece, which stood behind this image of war. To this territory, inhabited by the Pelasgians, who worshiped the forces of the elements of nature, 3000-3500 years ago the ancestors of those peoples who are now called Greeks began to move from the north. They worshiped the gods of Olympus, led by Zeus. In ancient times, it was believed that when two tribes wage war, the tribe whose god is stronger wins, and the victory of one people over another was described in the form of a victory of some gods over others.

#288, 25:12

Ticht

A civilization that is engaged in the restoration of planetary ecosystems or, in general, terraforming planets.

#104, 16:52, #148, 01:03:00

Subtle matter

A special type of matter, consisting not of atoms, but of energies or fields.

#33, 26:11

Subtle world

A world that is higher in vibrations than the dense material world. It is intermediate between the world of substances and the first region of the spiritual world, called the astral. If in the physical world there are three levels of density, then in the plasmoid worlds or subtle-material ones there are fifty-six. There are fifty-nine levels of density in the material world. Three plus fifty six.

There are creatures living at fifty-six levels of density. Since there are more levels than in the physical world, then there are many more creatures than on all physical planets combined.

What kind of creatures are these? How are they different from physical ones? Humanoids are called physical, those that consist of substances (atoms). Non-physical , intangible are those that cannot be seen. Material is what can be seen and felt. The subtle is not material either. This is "Spirit". Everything that we cannot see is considered spirit.

#33, 26:11, #66, 25:45, 28:11, #110, 36:11, #382, 33:28

Torsion fields

The part of etheric energy closest to the material world, which fences off the material world from the spiritual. One of its types is the free energy of vacuum. Atoms are built from torsion fields; they contain gravitons and protons. Spatial energies that are higher than certain spectra, partly being parts of the subtle world (from the 6th to the 17th density level).

#141, 24:26, #155, 22:10, #166, 30:44, 50:31, #180, 49:20, #251, 49:34

That

Ancient Egyptian God, deified by a scientist from Tumesout . “Thoth”

helped the first pharaohs establish laws. Egypt is their project.

Tumesoutets Totrhamysh . He flew to other bases, came into contact with priests, with earthlings, and passed on knowledge. Was in human form. A bird was later depicted as a creature that flew from the sky.

#42, 45:14, #220, 18:14, #403, 05:53, 09:49

Totem

A plasmoid that was engaged in the creation of animal souls. When he came into contact with the priest of the tribe and with all sensitive people, usually with children, he endowed these people with positive qualities.

#256, 01:08:04

Assemblage point

The place where the energy of the mind is concentrated. Plasmoids see a person in the form of a ball (aura), the size of which is determined by the strength of energy, and the assemblage point on it is a spot of the brightest color.

#351, 25:35

Trans

A state of spirit that is abstracted from the material world and aimed at the spiritual world or at itself, as part of the spiritual world. Trance states, like any instrument, can be used for completely different purposes, both for good purposes and for bad ones. For good purposes, trance states can be used to develop your consciousness, control your physical body, its condition, its health, development, even its age within certain limits given by nature.

#140, 14:21

Transmigration

A type of contact when a spirit (most often a non-embodied spirit) comes to its contactee , an embodied spirit, and begins to live with him, one might say, living his embodiment, practically inseparable from him. Moreover, it can even temporarily occupy his body and, through the body's receptors, receive information from the outside world. At the same time, the owner of the body himself, the embodied spirit, leaves the life thread unbroken, still being the owner of this body and considered incarnate .

#507, 02:55

Transmigration (reasons)

Most often, this is some kind of unfinished business for a disembodied spirit, which he could not finish on Earth. At the same time, the spirit has someone left on Earth, for example, a continuer of his work, a student, or simply a person suitable in vibration, who can, in alliance with the disembodied spirit, finish this work, and they work on it together.

#507, 06:15

Transmutation substances

A change in the ratio of atomic energies of three levels in any substance (in terrestrial physics - a change in the ratio of electrons, neutrons and protons) in order to obtain another substance.

#141, 32:37

Transpersonal recovery.

A personal state of an altered state of human consciousness, a trance state, when a person separates a little from this world and begins to feel himself, feel the world around him, space, other people and all his energy flows. In this state there is no aggression and there is complete acceptance.

#88, 15:15

The third level of density of the material world

The level of density in which substances exist in solid, liquid, and gaseous states. This substance embodies the spirit, an intelligent living entity that lives forever and infinitely, in contrast to the dense material body.

Here you can go through your lessons very quickly, because it is very difficult for those who are embodied in the 3rd density to see and feel the Spiritual world. We need to work harder for this, call on God more, love more, learn Love. And if more effort and energy is spent on it, the result is valued more. One can appreciate this light of Love more only after one has been in darkness. And this is the meaning of the existence of all worlds.

#110, 32:45, #112, 34:00, #264, 07:23

Three types of reality

1 Physical,

2 Fine material,

3 Spiritual.

Although they come out of one another, they may not intersect with each other.

#398, 32

Three waves of volunteers sent to Earth

Groups of souls who incarnated together with the task of helping each other create spiritual teachings.

#358, 01:05:33

Three main energy managers

Faith, imagination and will. They are somehow united with each other; faith can act on the will and vice versa. Faith is not just energy, but a universal manager over all energies. Faith, imagination and will govern our mental or soul structure.

#456, 23:18

Three pillars of the brain

Hypothalamus, pituitary gland and pineal gland. These are the glands that support the autonomic and central nervous systems. They are the main instruments of influence of the spirit on the body and the body on the spirit. It is a transmitter of spiritual vibrations to the physical level and vice versa.

#359, 53:55

Trichomonas

A single-celled organism, but quite large. This is the simplest animal that is a predator. Trichomonas can feed on other microorganisms, bacteria, human red blood cells, sperm and fungi. But some fungi have developed resistance to those lysosome enzymes that are inside Trichomonas. And when they are consumed by Trichomonas, they can remain alive inside and even reproduce.

#410, 38:48

Trinity

A symbol, a description of spiritual reality in our three-dimensional world. It includes God the Father, God the Son and God the Holy Spirit. The concept of the Trinity was introduced for the purposes of apologetics, that is, the defense of Christian teaching from various distortions. For example, from the distortion that is now known in the form of Arianism.

#340, 03:44

Ternary code

Conventional division into three categories when classifying something. The reflection of the trinity code is also in the structure of the rational spirit: mind, essence (spiritual heart) and energy. Trinity is based on the manifestation in the universe of three fundamental substances: matter, energy and information.

#141, 24:26, 41:41

Throne of Allah

A symbol of the presence of God everywhere at the same time. The Throne of Allah is located above the Seventh Heaven, outside the Spiritual World in general. Only some of the Angels have access there, who can most fully merge with the consciousness of God, practically

indistinguishable from him in their qualities.

#260, 03:41

Troposphere. Mir "Tropos"

The lower layer of the atmosphere, the birthplace of Demeter, the main plasmoid of the Earth. Tropos is a Greek word meaning place.

“Tropos” means another world in the language of the contactee , because if we designate this world with our sounds, we will not hear anything (or rather, there will be some waves there). “Tropos” is geographically located (if you look at how the worlds are superimposed on each other) at the level of the center of the Earth’s core. There, at the 48th density level, one might say, there is this city, that is, this place.

#508 28:10

Tulpa

An isolated energy essence from a spiritual essence, another type of phantom (among Buddhists).

#367, 18:58

Tumesout

The name in the Daraal language of the planet, which is located in the constellation Orion (Pi Orion) at a distance of 1050 light years from Earth. The inhabitants of the planet look like people of Slavic appearance with a height of 5 to 8 (3 to 7) meters. The Tumesout people are the discoverers of our planet 5 million years ago. The

incarnation of an intelligent spirit in our Galaxy first occurred on this planet several hundred million years ago. Tumesout's mission is to spread intelligent life throughout the Galaxy. They are one of the three creators of the earthling race. The Tumesoutians build houses like Egyptian pyramids, and they clearly reflect the interaction of the energy structure of the planet on which they are located with the energy structures of space. There are places in the pyramids where there are tombs. In such places they sleep and regenerate themselves in their sleep. There is a Tumesout base in the Caucasus. The seismic activity of the earth's crust in the mountains is favorable for their energy and for their habitation.

The body of a deceased citizen of the planet Tumesout is kept incorruptible, that is, it is not destroyed by microbes, as it is preserved in a special chamber until the spirit adapts to the Spiritual world, because it needs the energy that is released from the cells of the body. Then the spirit, as soon as it adapts to the Spiritual world and throws off its etheric shell, that is, from the soul it becomes a spirit and is completely adapted, dissolves its vital force between the etheric and astral layers of reality, the Spirit completely adapts to nutrition from spiritual sources and then informs special servants on Tumesout , which scatter this body in space, like a laser beam, and it turns into radiation, that is, it does not burn up, but simply turns into a field.

#48, 15:03, #59, 01:05, #182, 25:42

Tunguska meteorite

The nucleus of a comet, which seemed to melt and did not reach the Earth. And since the comet was large, upon contact with the atmosphere and sudden heating, an explosion occurred , the blast wave of which caused enormous destruction. The fall of many meteorites that were part of the tail of this comet began long before the Tunguska meteorite itself. Over the course of many months, people began to notice that starfalls, as they called them, had become more frequent. A lot of small stones fell. It was the Earth passing through the comet's tail. Because the tail of a comet can stretch for many thousands of kilometers, which consist of individual pebbles and

dust particles burning in the Earth's atmosphere.

#46, 16:36, #437, 01:30:59

Heavy water

Water, which, due to the energy of its atoms, remembers information better than ordinary water, but both positive and negative, and transfers it to the body. The crystallizing ability of its molecules and macromolecules, that is, clusters of molecules, to remember energy information and carry it into the body increases compared to plain water.

#410, 51:09

U

Murder

Conclusion from the incarnation of a certain intelligent spirit. Bringing the body into a state that is incompatible with the presence of the spirit in it, the manifestation of the spiritual principle in it .

#214, 27:22

Respect

Form of love. Respect means recognizing importance, recognizing positive qualities.

#181, 16:14

Luck

Positive energy that protects a person from possible negativity.

#371, 06:56

Ultrasound sensor

A device that makes an individual three-dimensional image of tissue (vascular, nervous, etc.) to record nucleotides in the nuclei of these cells. Doesn't exist on Earth yet.

#192, 08:02

Ultraviolet

The frequency of energy, energy waves, photons, a high frequency electromagnetic wave that is not perceived by human eyes as light. It is higher in vibration, but, nevertheless, when it comes into contact with microorganisms, it also suppresses their effect. This concerns their reproduction. Antibacterial effect due to the high energy of light rays.

#410, 48:15

Um

Part of the spirit.

#393, 30:32

Umindron

Planet, civilization of the Selbeta colony.

#352, 16:22

Dying

The exit of the astral body, i.e. spirit in the astral shell. Occurs through the Astral, through one's egregor. He rises higher, where disembodied spirits live. When the body dies, the soul comes out and at first it is in the Astral. The average period is usually about three days. Then spirit guides come to the soul and say that it's time to rise higher to another level. And the soul rises to its level in the world of disembodied spirits, which it reached during life, that is, from the 1st to the 24th. Then the soul lives in the Spiritual world. At first she has vitality, but every day, in the earthly sense, it becomes less and less, it leaves her. And approximately, on average, it takes 40 days, it finally goes away. This is very approximate, since it could be a month, it could be 60 days, but on average it is 40 days. And then the soul becomes a spirit, since the life force has left it. Usually, a meeting with the Light, with God, occurs for every spirit after returning to the world of disembodied spirits; he meets God in the form in which he can perceive Him, and usually this is Light. There the spirit is shown in images how he lived his life, where he was previously incarnated, whether he completed his tasks or not.

#20, 24:33

The uniqueness of man

A unique combination of spirit, soul and body. Everyone is unique, this has never happened before and will never happen again. The Christian concept that a person lives once is an understanding of a person as spirit, soul and body. The spirit will never again unite with the same body.

#233, 13:46

Destruction of microorganisms

Energy impact, thanks to which it is possible to disrupt the biochemical processes in microorganisms that cause the appearance of vitality in it.

#27, 01:17:22

Dejection

The feeling when the whole world around you ceases to please, your own life seems meaningless, your own achievements, your previous hobbies do not bring the same pleasure. And unlike emotion, the feeling of despondency settles in the spiritual heart, in the very core. This is already a seed of darkness, which is sown in the heart by the mental attitude that is in the mind, and it is about the fact that it is impossible to exist in the world without what has been lost. If a person is so sad that this feeling turns into despondency, then this is not Love and lowers vibrations.

#428, 04:44

Management

Setting up body biosensors for a certain perception, for certain observations in the interests of the Government. This is an attempt to take away from spirits, parts of God, their free choice, for which they come into incarnation. In general, the meaning of their implementation is lost.

#391, 23:26

Managed

Observable through chips.

#391, 23:26

Uranium

A creature from the myths of Ancient Greece, a figurative

representation of a clot of matter formed during the formation of a new cycle of the Universe, part of the Chaos energy from which celestial bodies were created by plasmoid civilizations - almost all stars and all galaxies.

#288, 07:10

Embodiment Level

Starting level at the moment. This is the level that you reached when leaving your previous incarnation. Your spirit was at such vibrations, and at such a level it lived in the Spiritual World, waiting for its incarnation. This means that he primarily communicated with the same spirits just before this incarnation.

#393, 21:24

Density Levels and Worlds of Creation

From the 1st to the 3rd density level - the “physical world”, that is, everything that we can see, hear, feel through the senses of our body.

From the 4th to the 59th density level - plasmoid worlds or they are also called “subtle-material” worlds, some call them “ethereal” worlds. These are worlds arranged in a certain way, in which there is also matter, but it exists in a different form. For us, these are like parallel worlds.

#508, 13:54

Levels of civilization development (6 of 30)

The first level is what distinguishes what is created by intelligent beings from what is created by animals. That is, these are the first tools of labor and processing of the environment that are used meaningfully. They are not created by instinct. These are meaningfully

created tools from improvised means, stones, wooden structures of some kind, which are not always used for their intended purpose. These are the tools or weapons that distinguish this creature from an animal. For example, if two male monkeys, during a conflict, during a fight, can pick up a stone or a stick, then this is not considered a tool, it is simply a means at hand. And the creation of a certain form so that it can be more conveniently used for a given purpose will already be a sign of the very first step.

The second step is the complication of tools. Here, not only technology is taken into account, but also the level of science, the level of culture and even religious cults, that is, a certain level of consciousness. Because the level of technology reflects the level of consciousness. This is the complication of existing tools, their greater improvement, including the first buildings. Structures that are used not only for life, as was the case with animals: holes or caves. These are the first buildings or shelters that are used, first: for the purpose of burying their dead brothers, so as not to simply abandon them, as animals do, and a little later this is also accompanied by a change in the body of the deceased himself, some kind of manipulation over him. And the second is the appearance of such special buildings not for life, but for the practice of some kind of religious cult, the worship of something higher. Because, unlike an animal, he has a rational spirit that came from the Spiritual World. He will strive (even with the most primitive tools) to make himself a separate space for his sacred rites.

The third level is the emergence of power over the elements, this can be fire, water, and wind, depending on the planet.

The fourth level is the creation of certain tools, weapons with the help of fire. This could be, for example, the extraction of some simple minerals from which metals are obtained. These will be exactly those that are common in nature, which can be extracted without any complex technological developments. And this level of consciousness corresponds to civilizations in which metals were used for weapons, to create some kind of jewelry. This is the use of all kinds of precious stones. The fourth level is characterized by a certain level of consciousness, when great importance is attached to weapons.

The fifth level is the complication of blacksmithing and the beginning of taming animals. They begin to adapt the animal world to their needs.

Sixth level. There is already the use of alloys and the performance of precision processing work (cutting metals, cutting stones with other stones or metals without significant damage to the stone itself, creating all sorts of figurines.

#449, 16:35

Density levels of the material world

A separate reality in which there are many worlds. One density level differs from another in vibration characteristics that are several thousand terahertz higher than the previous level. Those. vibrations of the space environment itself and, naturally, of those worlds and subtle-material bodies of creatures that live there, they on the same plane constitute one vibrational characteristic in order to coincide with each other in the same space and flow of time. There are only 59 density levels. The third density level is occupied by humanoids, that is, people, anthropomorphs, reptilians, insectoids. Plasmoids are at density levels ranging from four to fifty-nine.

#180, 06:45, #324, 38:18

Energy levels

The first level is heat, light, electricity, magnetism, radio waves.

The second level is radioactivity and thermonuclear energy. The third level is microgravity and macrogravity .

#68, 52:50

Lessons of the Soul

Part of the purpose. Purpose is a general word, and lessons are

specific, what lesson. Purpose is about all lessons. There can be many lessons.

#477, 16:30

Wu Xing

Chinese system, which is based on the five elements of the elements.

#244, 28:15

Dormition of the Blessed Virgin Mary

A holiday in the old Church Slavonic language denoting the transition to the Spiritual world. This holiday celebrates the event when the mother of Jesus Christ, who is called Mary the Mother of God in the Christian religious egregor, left the earthly world. In fact, something else happened. Mary, who is called the “Most Holy Mother of God,” on this day (she was already of a venerable age, but did not lose her sight, hearing and clear mind) left her physical body, but her connection with it was not interrupted. She fell into what you call a coma. Her breathing and heartbeat were practically not recorded, but, nevertheless, she was alive. This state lasted for five days. While in it, she met her son, his phantom, in the Spiritual World. They agreed that his mother, the Mother of God, would not interrupt her life thread, would return to her body with his help and move to the planet Burkhad, where her son was already located by that time. People buried her, considering her dead, because she did not move. They checked if she had signs of life, but did not notice any breathing. This happened often before. When they arrived for her, the area around the cave where her body lay was deserted, there was no one. We entered the cave, pushing the stone away with an anti-gravity beam. She was taken onto the ship, brought to the planet Burkhad, and there they began to restore her body. She did not have a lesion, but low energy in her vital organs due to age. There were no serious illnesses. She lived for about three hundred more years using technology on the planet Burkhad. Then she came out of incarnation.

She said that she now needs to be in the Spiritual World. From there she can take more care of the already well-formed Christian religious egregor. One of the eras of persecution of Christians, whom she perceived as her beloved children, was beginning.

#486, 12:50

Conditions for contacts of civilizations (astral, mental, physical) with earthlings

For astral or mental contact, permission from the Interstellar Union is not required. All that is necessary is the person's consent, his ability to perceive these vibrations, go to the Astral, for example, or mentally receive information. Also the consent of a specialist from the Interstellar Union who will work with him.

#52, 19:56

Conditions for accepting planets into the Interstellar Union

1 The cessation of all military conflicts on Earth and the beginning of the destruction of especially dangerous types of weapons.

2 Stop the propaganda of violence and the creation of a negative image of aliens in the media.

3 Putting order in the ecology of the Earth: creating plants for processing solid waste, searching

alternative types of engines for transport, all possible measures to reduce emissions from chemical plants, combating the greenhouse effect caused by the accumulation of carbon dioxide in the atmosphere.

4 Changing the attitude of the authorities towards the common man, implementing the principle: "Power is for the people, not the people for

the authorities." The adoption of laws that truly protect the weakest people in society.

5 Abolition of the death penalty in all states of the Earth. The introduction instead of long or life sentences, with mandatory physical labor.

6 Respect for human life from the moment of conception.

7 Abolition of all totalitarian regimes. Mandatory freedom of speech and freedom of conscience.

#27, 01:08:56, #39, 28:52, #272, 52:53, #414, 08:20

Loss

A change in the internal or external situation, in the world around us, which we cannot return or bring back to its previous state. The emotion associated with loss is quite natural, but only if it does not turn into a feeling of despondency.

#428, 04:44

Teaching about proper nutrition in Christianity

A teaching that later developed into the modern teaching on fasting. But it was introduced into Christianity from more ancient teachings and ideas than Christianity itself, for several purposes. The most important of them is the development of will. Not even the development of the will itself, as in itself, separate from other energies, but specifically the will aimed at spiritual development, again in the Christian paradigm of values.

#341, 39:14

Students

Spirits from the 9th level of the World of Unincarnate Spirits. Spirits who learn to direct their attention and energy to other individuals around them. They incarnate in order to learn from their own , often bitter experience, the moral laws of the society where they are born. Often these are skeptics who do not believe in anything or anyone except their own eyes and ears, and they usually believe that it is impossible to deceive their senses. Life debunks this delusion of theirs, sometimes quite harshly, and it is very important at this level not to become embittered by the blows of fate and not to fall even lower - with the awareness and full acceptance of the fact that absolutely everything happens according to the will of God, even if this is due to insufficiently pure perception seems "wrong" or "unfair".

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

Shambhala Teachings

A teaching that in its essence is no different from other teachings of Light, Love, the path to wisdom that other teachers have.

#350, 35:16

F

Falun (sign)

Reflection of one point from which the four elements originate (as in the cross). This point is the Sun, from which all elements originate.

#297, 01:48

Fantasy

In many ways, a reflection of a person's desires to receive satisfaction , namely, in a sensual sense or in a more subtle sense.

#1, 14:34

Phantom

Something created in the astral world. A thought form endowed with certain properties and qualities. A copy of the person himself in the astral plane, endowed with vitality. Embodied spirits who have not realized themselves as spirit. They have a soul, they are immortal, they are embodied, but they do not yet know about it, they do not believe in it.

#89, 05:15, #109, 07:40, #253, 08:53, #439, 07:49

Fastorianism

Religion system on Selbet. Reminiscent of polytheism on Earth. Every aspect of reality recognizes a God who is the creation of the one who cannot be named. In turn, certain spiritual entities, an analogue of our Christ, are responsible for each branch of reality. Among them there are subordinates and managers. Each of them can be addressed and each can be thanked.

#32, 27:47

Phaeton

A planet that was destroyed 12,000 years ago. The second name is the Nibiru base. It was located between the planets Mars and Jupiter and was larger than Mercury. It was the base of representatives of Sirius and Tumesout . Now in this place there is an asteroid belt between Mars and Jupiter, formed by the remains of the destroyed planet.

#59, 23:29, #95, 34:29

Orion Federation

Local group. Reptilian, anthropomorphic, insectoid civilizations and those whom earthlings call “gray men” live there.

#219, 01:16

Themis (Justice)

One of the wives of Zeus, the prototype was his only wife Cephastis, a Burkhad humanoid named Agoranias. She visited her husband on the Earth base six times, and since she made visits over a period of several hundred years, on different ships and in different clothes, this gave rise to the myth that Zeus had many wives.

#288, 46:49

Electronic voice phenomenon

The appearance in audio recordings of various noises reminiscent of a human voice.

#170, 04:25

Physical energy

The driving force of our muscles: oxygen, nutrients.

#444, 1:15:20

Physical contact

Contact is more serious than astral travel. You need to understand that for this, the material resources of the Interstellar Union, the Galactic Federation of Light are used. They must spend a certain amount of energy not only to fly to Earth and to take you to another planet and bring you back. But also in order to shield the spacecraft so that it is not noticed in Earth's orbit, in its atmosphere, near you, etc. They will have to choose a place, a time, and how exactly to shield the ship from radar. Lots of nuances. You need to understand that this must be a fairly serious reason, and not just "I want to see another planet." You should also take into account that this reason of yours will be voiced at the Interstellar Union contact commission , which will decide whether to accept your request or not.

#317, 12:46, 37:16, 40:34,01:00:16, 01:01:49

Physical organ

A projection of some spiritual quality.

#352, 50:35

Physical sex

Reflection of love on the physical level of two souls. You can come to God through sex if you see in it a divine action, that is, the fusion of matter and spirit.

#47, 44:26, 44:45

Physical aging

A necessary physiological process for a person to reconsider his entire life during the last years or decades of incarnation on Earth. I analyzed, dissolved all the blocks, made peace with all people, one might say, gave away all my moral, energetic and karmic debts and came to a state of high vibrations, and in this state I left incarnation. Sexual function gradually fades away so that he can direct his energy to the seventh chakra. The laws of God, which are manifested in the laws of nature and the body, provide that the cessation of conception and birth protects children who could be born to elderly parents from being left alone at a young age. If an elderly parent, dad or mom, leaves incarnation, they may be left alone before they reach adulthood, which will reduce their ability to survive and adapt.

#273, 00:20

Physical body

The etheric body, which repeats all the organs and parts of the human body, including its muscles, its internal organs, its brain, all departments and so on. The dense material part of ourselves that is in this world. That is, it is part of us. It is a small part of us, not all of us, but also not something completely separate from us. We are the constant creators of our body just as God is the constant creator and sustainer of the material world.

#140, 14:21, #247, 36:02, #283, 01:19:38

Philosopher's Stone

A certain substance that, when touched, can turn any metal into gold. In fact, such stones are not stones. It reflected the knowledge of those who brought the doctrine of the philosopher's stone, about some alien devices that could transform metal. Now there are devices that can change the amount of energy in atoms in such a way as to obtain another from one metal. There's no need for a stone.

#207, 13:15

Finance

Material form of Divine energy.

#287, 30:05

Violet flame

One of the images of philosophical teaching on Disaru . Teaches how to work with energies. This is the Divine fire of truth, because God is also Light and Fire for those who perceive it as fire, and flame is another name for fire, therefore the “Violet Flame” is a teaching about the Divine source within us all, but not in the body, but in the inner spiritual world. System, technique for activating the 7th energy center, developed by Saint-Germain and his students.

#49, 16:00, #253, 00:48

Shape of Light

Everything that is in the world, all the matter that has taken this form because of the perception of the one who perceives this form.

#350, 40:52

Formation of the volitional sphere of a person

Conceive a thought, desire, dream and go towards its fulfillment, even if the environment resists. And this shapes the will of the child.

#455, 27:48

Formation of planets

The process by which the surface layers of a star's chromosphere move away from it and cool in space. These elements of some substances combine with each other and form the elements of all other substances. From elements of different substances, a dust cloud is formed around the star, which, due to the attraction of the central star, begins to rotate around it . And thus, more or less large rocks begin to form, and so on, until a planet is formed. And if a large asteroid is already formed, then collisions with other rocks give it a spherical shape, and an atmosphere is formed there. The pressure of different elements on each other occurs under the influence of plasmoids, it creates layers of the future planet.

#251, 11:45

Phosphorus (Lucifer)

There are many entities bearing this name, including many plasmoids, those who carry Light.

The god of ancient Greek myths is most likely a representative of the planet Disaru .

#288, 01:00:56

Photo

Some static images of some process, which is displayed in space time. A photograph has color, shape of an object, mass, and so on.

#166, 30:44

Futissa

Planet, Burkhad's colony , its genetic part. Life expectancy on it is the same as on Burkhad , on average 12-16 thousand Earth years. This is the average implementation period. There are representatives who leave early for the Spiritual World, for example, at 600-700 years, if they believe that they have completed their task. And there are those who linger until 22-25 thousand Earth years, if they believe that they are still needed on a given planet or in the Galaxy.

#370, 03:27

Futurology

A definite prediction of future events in all its diversity. The more distant the future, the more general words it is described for the point.

#308, 05:11

Feng Shui

Yoga of space, the doctrine of the structure of space.

Yoga refers not only to those practices that a person does, but also to the doctrine of the structure of space, for example.

#441, 08:55

H

Halyarpi

An extremist movement on the planet Selbet that led to the war with Burkhad . It means indestructible.

#249, 20:42

Hamilia

A group of plasmoid- type civilizations from 9th to 16th density levels. A global network of plasmoid worlds, the purpose of which, in contact with earthlings, is to convey to people the vision of the world of their civilizations, so that the spirits of people can be embodied in their dimension.

#75, 32:42, #115, 40:39

Hanuman

The ruler of one of the tribes (vanaras) that supported Rama in the fight.

#326, 38:07, 39:26, 40:28

Chaos

The state of unmanifested matter in the spiritual world. Simply put, that part of spiritual energy that will then be used to create the material

world, atoms and all things consisting of atoms.

#288, 03:10

Characters

Representative of the planet Burkhad (constellation Cygnus), teacher of the history of space and space bases. Age 7000 Earth years.

#288, 00:21

The character of the spirit (its development)

His beliefs, emotional reactions to everything that happens, and so on. In general, for spiritual development, you need to love yourself with unconditional love: endure, believe and forgive. Forgiving for what seems unfair, this requires patience, not to leave this path, to hold on to it. Faith, trust, openness are also a necessary attribute of love. To love loved ones, those who are nearby, nature, space, the elements.

#43, 14:11

Characteristics of love

The light of love, unconditionality: “to love” simply because you love. Faith, trust, patience, forgiveness. Without love, patience is self-restraint in some way. Forgiveness for what seems unfair requires patience to stay on that path. Selflessness, which involves selfless, sincere giving of oneself to everything that is.

#43, 14:11

Harris

Laying hands on other believers to transfer energy to them. Christ taught this to the Apostles.

#239, 37:16

Harsh

The self-name of the planet Selbet .

#176, 1:01:36

Hateri (hatori, haari)

A collection of humanoid civilizations in the constellations Sagittarius and Ursa Major. Similar in type to the civilization on the planet Esler, but more like cats, their skin color is brown.

#234, 15:42

Helenoppa

A planet in a star system that is located between the constellations Libra and Scorpio. The inhabitants (carbon life form) are humanoids, they have small stature, green skin color, due to the presence of sulfur-containing amino acids.

246, 34:28

Hellinger Bert, arrangements

Practice using the mental field. Between people, when they gather for such practices, where they pass on their experience to each other in solving their problems, in any case, some kind of internal relationships are already formed. A mini egregor is being assembled. Thoughts

influence them in such a way that they begin to feel the generic egregor. These are energies of the spiritual level, the Spiritual world.

#420, 17:02, 20:18

Cherubim and Seraphim

Higher Angels in the Orthodox tradition.

#36, 14:04

Healer

A healer who heals with his hands, performing various operations. There are different types of healers. There are chiropractors, and there are those who work with internal organs. Some are treated using suggestion and hypnosis. These are healers who are in very good contact with their Higher Self, with the Spiritual World and in contact with plasmoid civilizations that help them and give them energy for healing.

#397, 28:08

Chemical reaction

Exchange of energies between atoms that are at the first energy level. This exchange is influenced by the third energy level, which is located in the nucleus of the atom. Due to this micrograviton (atomic nucleus), they begin to influence the outer layer of the atom. This is how different atoms are attracted or separated. That is, a chemical reaction occurs when some atoms are connected by certain bonds that depend on microgravity. It affects the first level.

#307, 31:34

Chemtrails

Chemicals allegedly secretly sprayed from civilian aircraft for various destructive purposes.

#192, 45:28, #135, 01:03:26

Palmistry, numerology, astrology, astronumerology , astropsychology, tarology , runology

Reflection in the symbolism of the signs of the human body, as well as external symbols, a reflection of spiritual knowledge about the Spiritual world and the qualities of the spirit that has incarnated here. Each of these directions is connected with all the others.

After the war, when your civilization began to populate the Earth again, to fight for its existence, this previously unified science of Divine reality, reflected in various manifestations of the material world, began to be divided into three spheres: esotericism, science and religion.

#182, 02:08:55

Ordination

Transferring energy for the sacraments to connect with the Christian religious egregor, with Christ. This is not joining a Christian religious egregor, but tuning the channel of a Christian religious egregor to another channel so that the priest can preach, teach and perform the sacraments. Everything together is given, one might say, as a package of data: the energetic adjustment of the priest's field, his aura so that he would be a conductor of the energies of the Holy Spirit and sanctify matter.

#239, 37:16

Chlamydia

Not a virus, but a very small intracellular bacterium. Microorganism. It does not have the ability, like, for example, a virus, to integrate into the genetic apparatus of a cell, neither nuclear nor ribosomal, but it lives and multiplies inside cells just like any bacterium outside them. It lives and multiplies inside Trichomonas, and inside various human leukocytes, inside epidermal cells, only it is on the mucous membrane (the one that produces mucus).

#410, 40:37

Cholesterol (effect on the body)

No more than 20% of your cholesterol comes from food. 80% is produced by you, your liver. Most of the cholesterol that comes from food has the property of clearing blood vessels of other types of cholesterol that can attach to them. If the vascular endothelium is already damaged from the inside by various microorganisms, as well as by constant contractions and expansions, for example, from nicotine consumption or from frequent stress, then microcracks form in the vascular endothelium. The body “repairs” these microcracks from the inside by attaching plaques to them. Later, calcifications and fatty masses grow on them, as well as thrombotic masses from the blood, which interfere with its flow. This increases blood pressure, disrupts hormonal composition, nervous system functions, and so on.

#292, 45:20

Khorol (fruit of temptation)

Tree of life, tree of the knowledge of good and evil. It has large, low-hanging pear-shaped fruits of light purple or violet-silver color. Light comes from them . Grows on Tumesout . It also grew in the Garden of Eden. The Selbet people knew that this fruit contained toxins that destroy the human body. That is why the Tumesoutans , when they raised the first people, warned them not to go near this tree, because they would die if they ate its fruits. Its fruits activate mental processes in the brain of the Tumesout people . They think more clearly, their speed of thought and memory increase. But such a fruit first leads

ordinary people into a state of passion, that is, a person, for example, can forget his name, and then falls into a state like a coma. And if he is not given a special medicine in time, his soul will leave his body forever. Adam and Eve on the subtle plane could know what they already knew: what good and evil are. Even before offering them food, the Selbet man told them: “Know good and evil,” that is, translated as “good and evil.” But they already knew what good and evil were, because if they did not know this, then God, that is, the Tumesout Yahweh, would have no point in telling them: “Do not eat the fruit,” because it is meaningless for a person to then prohibit him if he does not understand what evil is. And only evil can be prohibited. Therefore, the spiritual meaning of eating the fruit of good and evil is that their evil act was not that they ate it, but that they had previously stopped trusting their creators, that is, the Gods. These were Gods for them and it was truly a collapse in their consciousness. That is, first they sinned within themselves, in their hearts. Eating the fruit was just an effect in the material world.

#47, 41:58, 43:53, #196, 00:25, 02:38

Hraltis

A planet located in the constellation Ursa Major. Representatives of Selbet live on it . Is a colony.

#280, 08:11

Christian

A person who bears the image of Christ in his heart loves him, and love is manifested in the fulfillment of his commandments. One of the most important commandments is “love your neighbor as yourself,” and whoever follows this not out of pretense and hypocrisy, but truly, sincerely, is a Christian.

#239, 51:44

Christian egregor

A single psychoenergetic community. In the astral world it consists of the energy of believers and information on the topic of Christianity. All thoughts and feelings of Orthodox, Catholics, Pentecostals, Baptists and believers of other denominations are directed towards Christ and love for him. In the astral plane they intertwine with each other and create a single energy formation. The Christian religious egregor, which was formed during the period of struggle, during the period of martyrdom of the first Christians, absorbed a lot of struggle with dissidents. This is the energy of anger and aggression. And all this was realized through the movement of monastic crusades, the Inquisition, which was in some forms of Orthodoxy. Remember, for example, Joseph Volotsky and his writings.

The Christian religious egregor is tuned to the vibration of love for Christ, love for one's neighbor.

Modern Christianity, like any religion with a long history, has the influence of plasmoid civilizations. Because many Christians who developed this religion after the activity of the Apostles, who formed the canon of doctrinal books, and many of their disciples and those who held positions in the hierarchy of the Christian church, had contact with plasmoid civilizations, and through them plasmoid civilizations influenced the formation of Christianity.

In Christianity, the influence of plasmoid civilizations is noticeable in some ideas of condemnation, for example, marriage in some monastic movements, the interpretation of Christian fasting, which was originally abstinence from many types of food, for example, except for water for a certain period, this fast began to be perceived as abstinence from animal food , this is all plasmoid influence.

In Catholicism, plasmoid influence is expressed in the fact that even male clergy who have contact with women are not allowed to confess and receive communion for believers.

Understanding the purity of the Mother of God, as her celibacy and childlessness, the absence of children except Jesus, is also a plasmoid influence, because only in a plasmoid lexicon can there be

such an understanding of reality as desecration by the very fact of sexual intercourse.

#94, 01:15, #107, 00:50, #182, 01:44:45, #235, 52:56, #239, 51:44, #261, 01:13:38

Christian religious egregor (goal of formation)

Raising the vibrations of the planet by raising the vibrations of people who become Christians through the Christian religious egregor. Spreading the pure energy of the Love of Jesus Christ to Christian believers through the sacrament of confession and communion. This raises the vibrations of not only the spirit, but also the body. Under the guise of bread and wine, energetically a person takes into himself the blood and flesh of Jesus Christ, who is on Burkhad and constantly raises his vibrations in order to help a person dissolve blocks in the astral and etheric bodies and their traces in the physical body. To transform the body, a person takes it into the digestive tract, everything is distributed through the blood.

The energy of the Christian religious egregor is aimed at Light, Love, reconciliation, humility, acceptance. Humility does not imply humiliation of a person, but acceptance. Not a feeling of humiliation and submission to any blows of fate, but an acceptance of this world as it is.

Every person can do this, but they need to match the vibrations with this egregor. If there is no coincidence in vibrations, no connection to the Christian religious egregor occurs.

The Christian religious egregor has a lot of Guardian Angels, a lot of light high-vibration plasmoids, Nature Spirits, Guardians.

#486, 25:47, 50:30

Christ

The firstborn son, anointed to the kingdom (Mashaach , Messiah). The first spirit that realized itself, its autonomy in the Light of God, realized itself in the stream of His thoughts even before the creation of the material world, received a little more Light and had free will, but never used this freedom to act against God. One with God. In the New Testament, the Gospel of Luke says that Mary gave birth to a son from the Lord God. Christ was the firstborn son of God and at the same time the son of that Burkhadian, who was also considered God. He was a double son of God. His percentage of Burkhadian genetic information was half that of all of us. Among the Burkhadians, genes allow the high Spirit to express its nature more and suppress animal instincts more. Therefore, when Christians say that there were no animal instincts in Christ, they mean that they were suppressed by the high nature of his Spirit.

Christ is our elder brother, and he has incarnated many times on different planets in order to create there a form of religion available for the beings living there to come to the Light. And in order for such a high-vibration Spirit to incarnate on Earth, it was necessary to do this through the egregor of a certain people and through a certain woman. His physical father could have been taken from another planet, but his mother had to be from this one in order to accept its nature and vibrations. At that time, he did not find a woman who could embody his high-vibration Spirit and not collapse herself. He incarnated on the planet Tumesout , one of our creators, and flew in the body of a Tumesout on a spaceship to Earth to create here a religious-national egregor through which he could incarnate on Earth. That is, he built a house for himself on Earth. And it was He who came into contact with the representative of the Jewish people, Moses. When in the Christian church they say that God, Yahweh and Christ are one and the same, then this is so. That Yahweh who incarnated on Tumesout and flew to Moses, giving him laws for the Jews, first forming a monotheistic system instead of a polytheistic one, which did not meet his goals, was Christ, but in the body of a Tumesout . Naturally, he conveyed this to Moses in his language and in his terms. He had assistants - the Tumesoutians and the Burkhadians , who were called Angels, in Hebrew Malakh.

Now Christ is in a physical body and constantly keeps in touch with the Christian egregor, because he continuously processes the energies of earthlings coming from there. Energy exchange occurs through communion, through the Eucharist. The one who partakes of bread

and wine invisibly absorbs His flesh and blood, energy matrices that completely contain His energies. But at the same time, a person exchanges with him those energy matrices that contain records of his psychological, spiritual, mental, and astral states.

And in order to process this and give a person Light, to process his darkness and dislike, Christ must constantly be in the body. He doesn't even have a sleep period, for example. He does not separate from the body, he can only separate the phantom from himself. Can transfer His consciousness to one of the phantoms. Can make millions of such phantoms.

Christ lives alone on the island. Once every one and a half to two months, sometimes less frequently, students come, fly in, or sail by sea for a few hours. Nearby there are 8 biorobots that help with everyday matters.

Favorite food is the milk of a local animal and for some reason it is mixed with flower pollen. This allows you to maintain energy balance. Can eat more fruits. It can eat meat, but it does so quite rarely for the simple reason that the body has enough elements contained in the pollen of local flowers. He eats meat together with students who invite him to eat with them.

The physical body is not subject to limitations, because it can control the energy of its body and the surrounding part of space and time to an unlimited extent, or rather, limited by the Father.

#21, 01:40, 05:50, #46, 48:21, #47, 06:25, 09:30, #215, 00:22, #261, #439, 07:49

Chromosomes

Nucleoprotein structures in the nucleus of a eukaryotic (nuclear) cell, in which most of the hereditary information is concentrated and which are intended for its storage, implementation and transmission.

The eukaryotic chromosome is formed from a single and extremely

long DNA molecule that contains a linear group of many genes.

#246, 34:51

Akashic Records

A place in which all past events are recorded in space by special radiations of people and the planet.

Layers of the spiritual world, where the past, present and future are parallel worlds. A person can gain knowledge about them, as if turning to this general information field of the Earth for information.

The part of egregors that contains the information component. Anyone who has a connection with any egregor usually has access to the Chronicles.

There are no Akashic Chronicles in the material world. This is already the level of egregors. It can only be read by going to the Astral or receiving it through your spiritual channel. No material elements, no material carriers can record it. No laser beams can show it. Only the spiritual channel can do this.

There is such a part of the Akashic Chronicles, for example, which includes the Time Tape, where events and knowledge about the events of the past are located. But they are there in the form of energy impulses. Even if people did not send thoughts about this, since it happened in space, then such energy leaves from this, from these events themselves, which forever remains in the Time Line.

#15, 14:39, #67, 38:08, #138, 00:05, #174, 08:42, 16:16, #258, 43:32, #420, 29:04, 35:04, #466, 48:35

Ts

Kingdom of Heaven (in Christian terminology)

Level 24 of the spiritual world. This is the highest abiding of God in his original Light. There is nothing and no one there anymore. High-vibration spirits (from 22 to 24 levels) have access there, but in itself there is only the consciousness of the One Who gave birth to this world and every second supports its existence with its Light energy.

#22, 56:30, #30, 07:25

Goals and objectives of the Security Service of the Interstellar Union

Protection of law and order established by legislative texts and unwritten, generally known to rational beings, security laws.

Protecting the borders of the Galaxy from military invasion from outside from other Galactic alliances driven by mercantile and militaristic goals.

Protecting passenger ships from pirate activities, preventing the distribution of substances prohibited for use.

Protection from deprivation of life of a rational being, protection of property, suppression of the spread of ideas contrary to light and goodness, ideological sabotage.

Control over specialists who come into contact with earthlings, especially in physical contact.

Prohibition of providing material confirmation of contacts.

#150, 17:20, 20:05

Goals and objectives of creating the Interstellar Union

Joint cooperation of various civilizations in exploring the Galaxy and helping each other in the development of each planet. Most of the inhabitants of the planets included in the Interstellar Union understood that each creature is an embodied immortal spirit that has its own goals and objectives. They believed that together it would be easier, faster and more constructive to achieve the goals of these incarnations than separately.

#144, 20:54

Celibacy

A rule according to which the Bishop and all ranks above the Bishop have no right to be married or have a sexual relationship. Orthodox priests have the concept of partial celibacy, but Catholic priests have the rule of complete celibacy.

#53, 47:35

Healer

A real and honest specialist who must coordinate his work with the patient's Higher Self and find out the spiritual cause of the disease. You should be careful with a specialist who will promise the patient healing in one or several sessions and will give a guarantee for this, since no healer and no curators know exactly how the body will react to this treatment. Success will largely depend on how much the patient himself understands and corrects the spiritual cause of the disease. A pure healer will not shift responsibility for the patient's condition to "dark forces", sorcerers, reptilians, demons, and so on, but will always look for the cause of the condition of the person seeking help in his soul.

#202, 49:30

The goal of spiritual development

Increasing vibrations to coincide in vibrations with the Creator and, together with Him and in Him, create worlds and support them, and so on.

#43, 14:12

Purpose of immunity

Resistance to microorganisms and substances harmful to the body, adaptation and adaptation to the effects of these pathogens.

#359, 37:00

Purpose of Interstellar Union contact

Gradually, through natural evolution, giving through contactees information about the Interstellar Union and its laws, about the understanding of the Spiritual World that they have, with the help of this information, change the awareness of reality among the inhabitants of the Earth. All this with the goal that they, too, could be ready to enter the Interstellar Union, become employees of the MS in studying the Universe and transferring life and intelligence to other worlds, including those outside the Galaxy.

#42, 38:42

The Purpose of Contacting the Higher Self

Awareness of the true purpose of incarnation in this world and receiving the energy of Light in order to have the strength to change oneself and the surrounding reality, as well as check the information received from other sources in the material world, to what extent it corresponds to its goals and objectives.

#31, 02:53

The purpose of the modern education system on Earth

To prepare the younger generation for life in the material world, not the spiritual, because the spiritual world does not exist for people who write educational programs. In short, this is called materialistic perception. Therefore, in the schools of the Interstellar Union, from a very early age, awareness of oneself in the astral plane, astral travel is practiced, so that a child in a lesson can leave his body, see his body, the spiritual world, and when he returns, he already understands for sure that the body is finite, and he is immortal. As soon as people on Earth begin to teach children about astral travel and talk about the forms of life that exist, about the subtle material world, the spiritual world, spiritual levels, other planets, if this is done en masse, then civilization itself will change, it will become more spiritual, there will be fewer crimes , wars.

#181, 30:50, 33:34

Purpose of Burhad civilization

Knowledge of the Universe, expansion of the zone of influence of intelligent life within the Galaxy and beyond , as well as the study of the spiritual world and the manifestation of the laws of God in the material Universe. These words are included in the anthem of the Burhad civilization .

#211, 29:45

Cementing the space

The creation of egregors of various thought forms, it can be accomplished in various forms.

#37, 44:23

Central Sun of the Universe

The center of the galaxy, a collection of star systems and those objects called black holes.

#96, 01:21

Ayahuasca ceremony

Drinking a special decoction of herbs that temporarily changes the vibrations of the brain and tunes it to receive signals from plasmoid worlds. Used by shamans.

#76, 20:28

Church (Ecclesia in Greek)

An organization of people called by Christ MY BODY, in which His vibration is located. Through this vibration , the spirits embodied in these people acquire the spiritual experience necessary to move to higher spiritual levels. The Church was created thanks to the disciples of Christ and their disciples with the help of representatives of the planets Burhad and Tumesout . In the spiritual world, in the astral world, it is an egregor, engaged in maintaining and processing energies coming from earthlings.

#10, 01:07, #36, 04:30, #270, 56:27, 58:35

Jing

“Essence”, “form”, consists of Yin and Yang.

#244, 27:27

Civilization

A community of intelligent inhabitants of this or that world, which creates for itself the conditions of life and activity on this or that planet of the densely material world or in this or that space of the fine-material (plasmoid) world, capable of providing itself with all the necessary resources.

A community of intelligent beings that form a certain community, a community of egregors. This is a social form of consciousness that tends to self-regulate. This is what distinguishes a society of intelligent beings from an externally structured and harmonious pack of animals, which does not carry out activities in the surrounding world that are characteristic of civilization.

In dense material humanoid forms, the emergence of civilizations occurred approximately from 8 billion to 500 million years ago. At first there were individual representatives of intelligent living beings on certain planets, only then they began to form societies.

#27, 59:56, #452, 02:24

Antares Civilization

Plasmoid- type civilizations . They are divided into 2 main categories: 1 friendly high-vibration civilizations, there are 11-12 of them, which are positive towards the Earth; 2 parasitic, low vibration civilizations that make connections based on low, negative human vibrations.

#219, 13:05

Civilization of the star Regulus (Alpha Leo)

Civilization of the humanoid type. The inhabitants are small creatures, about 90 centimeters, with an elongated face, yellowish skin and yellow eyes, and have 4 fingers. They originated from sea creatures, like sea lizards.

#219, 13:05

Civilization of Earth (emergence)

5 million years ago, scientists of the galaxy discovered a world on a planet on which there was already plant, biological, and animal life: there were birds, fish, insects, large mammals and reptiles. Naturally, there was a microbiological world, mammals: a group of primates, among which were representatives of various monkeys. When studying these animals, it was not found in them the possibility of incarnating an intelligent Spirit.

For the first 2 million years after the discovery of the planet, scientists of the Galaxy waited for the self-organization and self-evolution of these primates, since they were most suitable for the role of those creatures in which an intelligent Spirit could incarnate on Earth. Then it was decided to speed up this process, to begin work on creating a hybrid, because the genes of the Selbetians, Tumesoutians and the genes of the Burkhadians , having combined with the genes of primates, made it possible to prepare the nervous system and the system of receptors in the body of the hybrid for the embodiment of the intelligent Spirit.

Why was this done? The Earth had a unique set of flora, fauna and all the riches: geological, atmospheric, energy capabilities available in its world, which are not very often found in the Galaxy. And even more so, the location of the Earth in space, its distance from the Sun, made it possible to develop a civilization here: a future employee of the Interstellar Union. That is why it was decided to help her evolve.

#185, 51:26

Kryon Civilization

An association of plasmoid -type civilizations from the 8th to the 18th level, which includes more than 150 civilizations, including most of the civilizations of the spirits of the air, the Earth, the Sun, gnomes, sylphs, spirits of individual places of nature. Their goal is to support our magnetosphere with their energy so that we can exist comfortably in it.

This is the group mind. Each Kryon employee has his own vibration. He can recognize it as a name. Names sound through the perception of the contactee and are a necessary attribute for a conversation with her. Names consist of a system of symbols that are inaccessible to earthly perception. As for Kryon , this name was chosen by the entire group of civilizations. Therefore, no matter who comes out on behalf of Kryon, he will be called that by any of his contactees .

Different Kryon groups can get in touch with one contactee . The one who is ready for communication at this moment will come out.

#75, 48:29, #92, 41:28, #183, 58:25

Ranshkaka Civilization

A civilization living there, what people call the North Star. It is not part of the Interstellar Union. Member of the Galactic Federation of Light. Its name in galactic language is Ranshkaka . There live creatures that look like people, but they have legs like grasshoppers. These are not grasshoppers. They evolved from some semblance of large flying creatures, somewhat similar to bats. There are no such animals on Earth; they look like insectoids, but are warm-blooded.

This is a closed civilization. You can get information about it, but its representatives do not allow anyone into their world and they have no contactees on Earth . Maybe there are astral ones, but this is not certain.

This is one of the planets. She is the eighth from the star. The creatures living there can rise into the air. Their body is brown and they have wings. But they no longer know how to fly, it's just an attribute. They lost the ability to fly because their physiology changed. They have gained greater body mass. Those cavities that were filled with air have now disappeared, giving way to the nodes of the nervous system, which performs the function, like the people of Earth, of the brain. Intelligent spirits are embodied in them.

#354, 48:17

Tisiona Civilization

A civilization living in the constellation Draco. Flying reptilians also live there.

#219, 04:40

Harishtimr civilization

Humanoid civilization in the Pleiades cluster. The height of its representatives is about two and a half meters. They have a bright white skin color, like the Burkhadians , but the structure of the head is different: a round head without hair, a round face and a very high elongated forehead. The head is twisted back in several spirals and the back of the head is oblique. Eyes can be dark or blue. It depends on their nationality. They live about three thousand Earth years. They were opponents of one of the reptilian races joining the Galactic Federation of Light, which joined it just over 260 earthly years ago. They refused to be in the Galactic Federation of Light due to disagreements with the Interstellar Union regarding the presence of some civilizations in it, which they consider, to put it mildly, unethical.

#324, 07:19

Qigong

Managing the energy of space and the energy of your body for the purpose of spiritual and physical development, harmonizing the body and spirit with each other.

#244, 16:49

Cyclicity of time (on Earth)

The Earth goes through, roughly speaking, four major cycles, each of

which is divided into approximately 12-14 cycles, depending on how you measure it. The transition from one cycle to another cycle is accompanied by a Quantum Leap. In this case, the matter of the Earth does not disappear on its own, but changes the polar direction of energies in relation to each other. This changes the energy of space, changes the noosphere of the planet, changes the climate, and so on. The instruments in this Quantum transition are both plasmoid civilizations and humanoid civilizations of a given planet. Through their bodies, through their understanding, through their level of evolution, they project spiritual energy into a space of such quality that builds the structure of the world around them. Each cycle for the Earth according to the present chronology lasts approximately 960,000 years, if we count one revolution of the Earth around the Sun per year and take into account the distance at which it is now located. At the moment there are such cycles. The passage of each cycle can speed up or slow down depending on the level of consciousness. This is such a dynamic system.

#286, 21:33

Cyclical development of the Universe

The universe exists in cycles. That is, it unfolds in space: first in the subtle-material world, then in the dense-material world, and then collapses back. “Everything will curl up like Light...” What does “ collapse ” mean? This means that we will cease to exist in a dense material form and we will incarnate in subtle material worlds, and then the subtle material worlds will also collapse into Light. There will be a return of God Himself to Himself, to His original form, and we will be in the Spiritual world in a form closed on itself in the form of Light. The cycle of folding and unfolding of the Universe is approximately equal to 125 billion Earth years. But the cycle does not occur in absolutely equal periods: it may be more, it may be less. Depending again on the amount of Light in the incarnating spirits. This all affects the entire Universe, all Galaxies and all subtle worlds. And the unmanifest cycle cannot be measured in time periods, because there is no time there. Already there it can last, both a moment in time and many billions of years.

#47, 34:50, 36:47, 38:14, #264, 00:19

Tsiolkovsky

He was a contactee physically, astrally and mentally.

Contacted the planet Burkhad.

#42, 33:55, #46, 16:04

Numbers

Symbols, designations of some energy vibrations. They have energetic and spiritual significance. In the astral world, in the mental world, in the world of disembodied spirits, these vibrations are different. They carry different properties.

#243, 15:22

Tsoi Victor

A spirit incarnated from the ninth level. Came out of incarnation at the fifteenth level. He was incarnated as one of the Roman soldiers who died in battle (but this was back in the third century) for one of the Roman provinces, in a battle with wild hordes. Then there was something else - on Gikhora . I was born there by a woman who, one might say, worked in a factory producing some kind of food products. Before his incarnation into the body of Viktor Tsoi, he was incarnated into a subtle-material essence, also on Earth, at the eleventh level of density. He controlled magnetic waves, the magnetic field, regulated energy exchange or energy relations between the Earth and the Sun, so that there were no too strong magnetic storms. There were 989 incarnations in total, including the last one in Viktor Tsoi.

#430

Ch

Chaitanya (revived Krishna consciousness).

Spirits who incarnated from a high level, from 24 and before many times incarnated on Burkhad . When he was still a child, the Burkhadians took him in , that is, he had physical contact with the Burkhadians , and they modernized his body and improved his contact with the spiritual world. And he began to feel it as himself. They changed the vibrations of his pineal gland. And from this he began to feel the spiritual world better. He came into contact with the Burkhadians , with plasmoid civilizations, with the spiritual world from which he incarnated. Now he is incarnated on Shimora , he is an elderly Shimorian , one of the elders of the planet, who is involved in politics.

#76, 27:36

Chakra

The energy center of a person in the etheric, astral, mental and other fields of his aura. The chakras express the qualities of the spirit and are projected through seven specific places in the human body. In the terminology of the Interstellar Union, each chakra is responsible for one of the astral levels of the planet's noosphere, is a symbol, a designation of some spiritual reality of the structure of our common spiritual structure, of which the spirit, in general, any intelligent born spirit, consists. The aura of earthlings is divided into 7 fields, 7 layers, 7 bodies and 7 energy centers. On other planets there may be 9, 12, 24, 30, 36, etc. floors of the astral world.

A symbol of the manifestation of the spirit through a specific body: physical. The spirit manifests itself through the body in such a way that its energy, which contains certain qualities, is reflected through certain places in the body. It depends on your body type. The number of chakras depends on the energy of the planet.

As the fetus develops, there are no chakras yet; they begin to develop

only after birth. They exist, but in their infancy.

Physical energies: gravity, heat, and so on, are felt more through the first chakra, which is located in the tailbone area. Subtle material energies and the energies of one's emotions are felt more with the help of the second and third chakras.

The energies of the astral world, where feelings and desires are located, are felt more through the heart chakra and the fifth chakra.

And the energy of the World of disembodied spirits is felt through two chakras – the sixth and seventh. Developing one chakra without developing the others is ineffective. It will not give anything, because a person must have everything harmoniously developed. We must work on cleansing and opening our spiritual heart and gradually all the chakras will come into harmony, because, like the center of the scales, it is in the middle - three above and three below. The heart chakra is in the middle and balances the two sides.

The energy system of chakras is energy centers that are the manifestation of the spirit in the physical body of a person. This is the belonging and property of the spirit itself, as well as the body. Only the spirit that is directly embodied can change energy settings (according to Divine law).

Man is both spirit and body. This means that it can have physical, energetic and purely spiritual reasons that are reflected on the physical body. Simply put, these can be hormonal disorders, infectious diseases, blocks on the etheric body, that is, energy disorders, or mental attitudes. Convincing yourself that it exists.

To help yourself as much as possible, you need to identify at what level the violation occurred and eliminate it. To do this, it is optimal to talk with the disembodied part of yourself about the reasons for the lack of arousal.

#33, 01:55, 06:09, #111, 05:50, 15:03, #112, 11:25, 11:40, #129, 35:53, #149, 37:23, #266, 17:37, #365, 00:21, 19:30, 21:45,

#413, 07:17, #429, #492

A particle

Material explanation of spiritual things. Spirit, unlike matter, cannot be divided into particles.

#33, 23:56

Schumann frequency

Leading frequency, magnetic-gravitational potential. Each planet has its own. This includes the electric, electromagnetic, and magnetic fields of the planet. And also the electricity of the earth’s soil itself. It also has electrical energy, the energy of the Earth's core. Electrical processes occurring in the atmosphere and, naturally, gravitational forces.

It can fluctuate sharply during the day depending on solar activity.

#98, 30:36, #137, 36:20, #248, 03:10

Human

Spirit embodied in a body. The sum of aggregate frequencies, a system of energies operating at different frequencies. This is a dynamic system, one thing constantly flows into another - human, humanoid, plasmoid.

A meeting place of two worlds. It contains energy from the Spiritual world and the physical, and, combining together, they form the etheric body. If you look at light biophotons, you can name the smallest portions of this energy, between cells and along meridians.

#227, 21:25, #410, 18:35

Black magic egregor

The lowest department of the egregor of esotericism. Magic is also a type of esotericism, knowledge of the world through extrasensory experience. Magicians understand the world and influence it with their thoughts and energies, creating events. But low-vibration destructive plasmoid civilizations can connect to their energies , and disembodied spirits from the first 6 demonic levels can also come. Sorcerers can also connect to this egregor.

There's enough energy there. Magicians take it for their rituals. When they take energy for their rituals, energy as the driving force of this ritual, they have an energy debt to the guardians of this egregor.

If debts do not arise before God and light entities, because it is given unconditionally, then dark , that is, low-vibration spirits who have abandoned the Light, do not feel it in themselves voluntarily, are not so selfless and do not know how to love with unconditional Love. They write everything down.

#486, 50:30

The fourth level of density of the material world

The level of density at which there are no atoms of substances, there are only energy fields.

#112, 34:00

Fourth dimension

The closest part of the spiritual world (plasmoid worlds), the world of energies.

#30, 06:00

The fourth level of dense media

Lowest level of plasmoids. Spirits of earth, water, nature, forest. They can look like balls, or they can take the form of small people. They can take the form of stones or animals. Their body in their world looks like a small ball, for example, 15 cm in diameter. As it dies, it begins to lose its outline and disintegrate into smaller bubbles.

#180, 01:04:25

Black hole

A former star that had a mass greater than the mass of two Suns, from which all types of energies of the first and second levels came out and only gravitational energy remained. Due to the fact that it remains, gravitational energy compresses itself and as a result acquires the qualities of superheaviness , superdensity , and so on. Apart from gravitational energy, there remains almost nothing of what was there initially. And although radio waves remain there, due to the fact that gravitational energy holds them, they cannot leave these atoms and go beyond the shell of the former Star, in which only gravitational energies remain.

For some subtle-material entities (for plasmoids and for those who are generally without a material carrier, i.e. those in astral bodies), it is possible to fall into a black hole, into this gravitational clot.

In the center of a black hole there is such a charge of gravity that, depending on its initial mass and on its location in space among other gravitational fields, the one who finds himself in a subtle material or in an astral body in the center of the black hole, due to the fact that accumulated there gravitational energies, mini-portals open for him. What happens is approximately the same as in gravitational engines. Those. it is thrown from this clot of energy into another black hole, which may already be located either in our Galaxy, or in another Galaxy, or in that part of the Universe that we call the Antiverse .

There are 25 black holes in our Galaxy.

Energy gap into another space. Through it you can get both into the subtle worlds and into another Universe.

You can pass through black holes into the Antiverse . But only to those who have the so-called access code. This is a special state of the energy body, which, for example, curators have. They were specially trained for this.

#40, 13:17, 16:49, 20:35, #68, 52:50, #83, 43:55, #109, 00:17, #409, 01:11:30

"Black Prince" (ship)

A ship that belongs to several civilizations of the Galactic Federation of Light. It is unmanned and collects information about radio and television broadcasts from the Earth in the radio wave range. Representatives of the Galactic Federation of Light, using special automatic robotic programs, process this information to track political, religious, scientific and cultural trends in our society.

#146, 45:55

Chips

Scanning devices. Usually material, physical chips. They are placed for contactees in order to observe through them the everyday life of earthlings. They can be placed in the head, in the back of the head, in order to read from the visual cortex of the brain those signals that come through the eyes. And then the specialist will see, figuratively speaking, through a person’s eyes, where he is, what he sees around him and with whom he communicates.

There are combined chips that read the energy of surrounding people, that is, astral and mental fields. And it happens that these combined chips are attached to the pineal gland and to the occipital cortex of the brain, which is responsible for both visual signals and energy vision, and then sociologists and psychologists from other planets study changes in the energy of astral-mental fields in the process of

communication and interaction.

Not everyone can be given chips, even if a person wants, and there are no other obstacles, because physical bodies have different vibration frequencies . And there are people who are incompatible with this chip due to both physical and energetic rejection. If such a person is given a chip, he may, for example, begin to get sick, it will be difficult for him to adapt to it, or the blocked part of his memory will give him some kind of psychological disturbances. People who are not ready for contacts, with a special structure of the cerebral cortex, for example, according to the laws of the Interstellar Union, are prohibited from installing such devices, even if they want it, because this can lead to irreversible consequences.

The contactee's body , spirit and psyche also affect the implant. The same implant installed in different people gives different results depending on the person’s initial abilities

At birth, only physical chips are placed, which do not require physical flight, but etheric and astral ones. Physical tests are given at the age when the child moves independently, talks and can give consent. They explain to him that he is dealing with aliens from another world. The child is an embodied spirit from that planet, since he calls them , it is believed that their contact occurs easily, and they explain to him that it is necessary to install a device so that they can see what is happening to him, and after that some civilizations immediately block memory, because they think that he will tell the adults, and they will persecute him for it, laugh at him.

#27, 37:23, #52, 06:51, #182, 38:21

Numbers (meaning)

“1” The number of the Absolute, Divine Consciousness, it looks like a very bright white Light. This is the point of non-existence and being at the same time. The non-existence of the material, but the absolute existence of the spiritual. Buddhists called it “shunyata,” but emptiness there is only for material manifestations, and not for spiritual ones.
"2" The number of the born spirit is the number of the soul. At first there was one God, and then there were two of them - God and the

Son. "2" is the number of the one who is nearby. This is the number of the emerging spirit, which still realizes itself in unity with God, but at the same time realizes its independence. That is, this is unity and separateness at the same time. Unity in energies, separateness in consciousness.

"3" The number when two people decide to move together and combine their energies. From this the will to action is born, not yet the action itself, but the will to action directed outward. At first there were two, then a third appeared. This is reflected, for example, in the figure of a triangle: if “2” is a straight line on a plane, then “3” is an exit to another dimension, to height. Trinity can be seen in a variety of substances and material properties. For example, the physical world consists of three levels of density - solid, liquid, gas, etc. Even in each of our cells there are three types of ribonucleic acid: transport, information and ribosomal. This is also the embodiment of the characteristics of the number “3”.

"4" The number of occurrence of energy that gives rise to the material world, that is, this is the number of the material world. For the first time, something solid appeared. “3” – the emergence of movement of the subtle world, but without dense particles. “4” is the appearance of the dense material world and its structuring. From the Divine Absolute forms of space and matter arise that are familiar to us, which can be touched and felt.

"5" The number when "4" united with one: God united with matter and incarnation arose. Or, for example, “2” – the soul united with the will to action, it wanted to act, that is, “2” + “3” and it turned out “5”. The number "5" is the number of the incarnate spirit. The spirit became incarnate for action. In the Spiritual world, this is also the number of the Higher Self, control over the situation, management of this situation. On Earth this is the number of a person as a rational being.

"6" Number of love. A person awakens a feeling of love and pleasure in the material world. All forms of pleasure that he strives for in the body are only a vague reminder of spiritual experiences, of spiritual love. However, it is the same energy. It is simply manifested, just as light can be manifested through a lamp, through a lantern, through a torch, through the Sun. The energy of Love can be manifested through different things and combined with the energy of pleasure. Love and happiness make up one energy and this is “6”.

"7" Number of learning new things. The number of certain energies that can be perceived as lessons, trials, and sometimes even suffering. In Buddhism, this is expressed simply: the cause of suffering is desire, which grows with satisfaction.

"8" Endless circulation of certain energies. After trials, after lessons, comprehension of the Truth follows. The truth of the eight itself lies in the endless approach to it. “8” is the comprehension of Truth, it is a certain secret that is inaccessible to those who are at other levels of awareness. Comprehension of the Truth leads to a state where the number “8” goes to the number “9”.
"9" Reversed six . Absolute Love. If “6” is a certain circle, which denotes, in this case, the Higher Self and an attempt, a hook upward, which can come out of the Higher Self and cling to pleasures, then “9” is a circle, energy comes out of it downwards in order to not to seek, but to give; up and down. "0" Infinity number #278, 01:44, 04:44, 09:00, 13:09, #340, 03: 44

Chislo "666"

Symbol of love for material pleasures. Where 6 denotes love, 3 is a symbol of active energy, and the sum of 6+6+6 = 18 is a symbol of pleasure and pleasure.

#169, 31:20

Numeric codes

A set of corresponding energies, which is expressed by one or another number. Each number is a symbol of energy, some energy state. This is “control of consciousness”, that is, awareness, control of the spirit using numerical codes - this is just one of the subtypes of managing your condition, your body and your consciousness with the help of any other symbol.

There are many types: meditation with concentration on a certain picture, there is meditation on Tarot cards, on runes, and so on. These are ordinary symbols that are used at the will of a person, but they can only be useful if a person applies his faith in the effectiveness of this symbol. Then it's really effective.

#393, 01:19:00

Pure Mind (Buddhi)

The fifth level of the aura of an earthly person, containing information about previous incarnations and about life in the spiritual world between them.

#14, 03:10

Feelings

The attitude of the spirit to itself, to some phenomenon or person. There are a lot of feelings, this is a long dynamic process that changes in its strength, in its direction, sometimes in relation to the same phenomenon. It happens that a person feels, one might say, is in a state of this feeling, but he cannot express it in words, because the conceptual apparatus of his thinking cannot take these words from the memory of the spirit. Or he can take them, but he cannot connect them, pick them up in this way. A person cannot imagine himself without feelings.

Feelings are part of the structure (structure) of the spirit, located in a part of the spirit called the “spiritual heart” or Essence and not related to the heart as a physical organ, which is the core of the spirit, its essence, the essence on which the other two parts of the spirit depend: Mind and Energy.

#26, 04:07, #33, 23:34, #59, 35:02, #140, 18:34, #211, 20:11, #266, 10:38, #344, 31:45, #345, 30:12

Feeling stressed

A state when a person seems to be carrying a load. The feeling that this is an unbearable load for him.

#385, 25:50

Chupacabra

An animal that attacks birds and small animals and sucks their blood. These are ordinary small animals that live in families and of which there are many species on Earth. They themselves are different, depending on the habitat, country, climate, and so on. These predators are one of these species that feed on blood and make tunnels.

#173, 32:15

Sh

Shamanism

An ancient form of communication with the Spirits of nature, with plasmoids.

In the family of a shaman, a soul is often born that specially comes from the Spiritual World to continue this work on Earth. But this is not always the case; sometimes such a soul does not appear from the families of shamans.

#367, 01:33:16, #371, 06:56

Shaman's drum

An instrument whose sounds and rhythm are tuned, to a greater extent, to plasmoid civilizations of the earthly type.

#239, 48:17

Shambhala

A name that has 3 meanings:

1 An active ancient alien base in Southern Altai, created 10,000 years ago. In the language of the representatives of the planet Esler, “Shambhala” came from the words “Shampa”, which was the name of the capital of their planet, and “ola”, meaning alien, guest. This word was used by people to call those creatures who came to their village to teach them. "Champalo" - that's what they were called.

2 Parallel universe (anti-universe), a material world that exists at a different wavelength, a different atomic structure. Part of this universe is visible as dark matter, but earthly instruments cannot detect the radiation from these stars . There are representatives of the Earth who contact representatives of Shambhala through the astral plane. Physical contact is impossible due to harm to both parties, since the rotation of atoms and the release of energy from our world and the parallel one occur in opposite directions;

3 The name of the highest levels of the Spiritual world. From this world, the highest spiritual teachers incarnate and lead to the enlightenment of others.

The one who saw the perfect world, he called it “Shambhala”. Now Shambhala is more of an internal state than a place. It is equivalent to Buddhahood.

#22, 34:40, #37, 09:30, #44, 12:47, #95, 42:49, #144, 40:49, #350, 37:13, #397, 39:58

Invisibility hat (fairytale image)

A description of the process of invisibility of a spirit that has left the material body and is among other people, as if it sees them, can pass through walls, and fly.

#258, 30:29

Ball lightning

Materialization of plasmoids using large amounts of energy.

Life form of subtle beings. It collects atmospheric electricity into clumps in order to do some experiments, develop, and redirect energy between the Earth and Space.

#165, 50:00, #376, 34:51, #414, 01:05:08

Chess

Initially, a specific cipher. It was invented, firstly, in order to convey information to students as an educational meaning, and secondly, in order to influence reality through this game, like a magical ritual. By moving the figures in a certain way, two people create a certain egregor, which changes the energies in space. Invented by ancient priests to denote different forces in the human soul and in the Universe under different symbols. Then it began to mean the struggle between Light and Darkness. Previously, it was the influence of various forces of nature or the human soul, or the Universe on each other. Each game symbolized, for example, the creation, the birth of the world and its end. The symbols that now represent an army on the battlefield used to mean something else.

#201, 01:05:07

Shentricuss

The planet of the Order of Six, which sets the ideology of behavior for the entire Order of Six and is the unofficial ideological capital. Although she does not directly control this body, representatives of their society listen to her more than others. There are a lot of army units there, militaristic and military formations are highly developed.

#391, 15:38

Sixth Dimension

The world of disembodied spirits.

#30, 07:25

Sixth level of embodiment

Archons, the so-called “chiefs” of demons, have experience in management.

#145, 32:02

Shiva

The intelligent spirit, incarnated on different planets, was many times a plasmoid, as well as a priest, a Slavic sorcerer, and an ancient Greek philosopher.

#75, 01:14:28

Schizophrenia

A disorder of perception, thinking, involving contact, uncontrollable by a person, with an external being/beings. The disorder causes his maladjustment in society. Adaptation depends not only on the curator who comes to him, it also depends on the contactee , on his reaction to this contact. A brain disorder that causes certain visions or states (materialistic explanation).

#97, 12:10, #115, 33:05, #267, 02:39

Pineal gland

A reflection of the sixth energy center, which is responsible for intuition, contacts with this world, one’s own thinking, and so on. It is

reflected on the physical plane by the release of hormones that regulate a person's intellectual activity, his mood, and access to the astral plane when the body is asleep.

The organ of those hormones that are responsible for mood and emotions. If a person is in negative emotions, then her work is suppressed . And not only the pineal gland, but also two other glands on which the work of the brain is based, the pituitary gland and the hypothalamus. Even tumors can form due to calcium deposits. For example, there is a pituitary adenoma - also from negative emotions.

#76, 23:39, #374, 14:15

Sho-Khariki

An insectoid civilization that is part of the Interstellar Union. It was formed naturally from large insects, which, through natural evolution, developed their nervous system, albeit a group one, so that intelligent spirits could incarnate in them. This is a very old civilization, about two hundred million years old. It lives on a planet in the constellation Pegasus, about 620 light years from Earth. There's about 1.23 Earth gravity. The sun is bright, bigger than on Earth and the sky is completely white. High methane content, about 8%. The radiation is such that if a person goes out there without a suit, he will live no more than fifteen minutes. There is no vegetation. In total, Sho-Hariki has eighteen moons and two suns. There is practically no dark time of day on their planet. Sho- Hariki 's houses are in the form of a sphere or two connected cones, only the angle of the cones is not acute and these houses seem to be suspended in the air. The inhabitants themselves, who have wings, fly between them. The atmosphere there is rarefied and evolution has taught their organisms to make loud sounds. Adults have a height of approximately 2.4 to 2.8 m. They are similar to praying mantises only in that they are also long, but are not green , but brown. They have a rather small head compared to their body. Representatives of Sho-Hariki have a group mind. Each creature is embodied by a separate intelligent spirit, but due to the fact that they have a group mind, the neural network of their brain, their nervous system is connected at the electromagnetic level with the noosphere of the planet and with the mind of each creature. Therefore, their spirits, although separately incarnated , also unite in the Spiritual World into a conditionally group Soul and exist until their existence in this

incarnation ends. On their paws, at the ends, they have some kind of fingers and there are clearly more than ten of them. They can even pick up small objects with them. They have six limbs, their heads can turn in different directions and, in general, can be thrown back. Brown complexion, the nose is not visible, practically the mouth has two plates on top that move apart and crack. They do not have blood, but some kind of common fluid, there are no blood vessels. The skeleton is not inside, but outside; this solid base prevents them from dying from radiation and allows them to withstand high atmospheric pressure. Their metabolism is completely different, although they feed on other living things, i.e. are predators. Sho -Harika has contactees , but due to the group mind, these contactees have a high percentage of schizophrenia. Because with schizophrenia, there are, as it were, many personalities in one person. Sho-Khariks have such a disease.

#58

Strain

A separate population of viruses, which in this case is slightly different in its RNA molecule composition from all others in the arrangement of individual nucleotides. And that means according to the protein content, which encodes DNA or RNA molecules. Viruses can have many, many thousands of strains, due to the fact that they multiply very quickly and copy themselves many millions of times in our cells. Due to such rapid copying, a lot of mutations occur. These mutations then give rise to new strains.

#390, 21:49

Sumerians

A civilization consisting of the descendants of people who 12 thousand years ago came to the valley between the Tigris and Euphrates rivers. These people remembered and passed on to their children those historical events that took place in the pre-war period. They wrote it down as the legends of their own ancestors. That’s what their book was called: “Testaments of the Ancestors.” The book has been partially preserved.

Books were not only written on clay tablets. They had something that resembled paper in widespread use. They engraved on metal plates, on dishes, and even on the walls of houses.

#343, 00:23

Sh

Thyroid gland (malfunction)

Hormonal imbalance of the body, which occurs against the background of pathology of the adrenal glands, pituitary gland, sex hormones, from a lack of iodine, from an excess of iodine, from an excess of fluoride, and so on.

#86, 43:40

Alkali

A substance containing hydrogen and a certain metal (most often). Or a substance that has the properties of a metal. Almost any metal can have one or another alkali.

#398, 44:24

E

Euglena green

Microorganisms that are no longer plants, but micro animals , have a high percentage of chlorophyll and feed on light. But even such small microorganisms still feed on the light of the Sun, through the chlorophyll reaction, only partially. They also feed on other microorganisms, such as ciliates. Only, unlike ciliates, they also have chlorophyll.

#40, 41:27

Evolution of the Spirit

The development of consciousness and the development of brain structures that come under the guidance of spiritual development. A process closely related to the evolution of any civilization, where every embodied spirit, every person can reveal in himself the potential that is inherent in him by the Creator. To do this, from childhood it is necessary to explain to the child why he came here, that he is temporarily in this life. And with the help of eternal love, he will be able to change the world towards increasing the level of Love and awareness in it .

#193, 07:18, #281, 19:42

Euthanasia

Deprivation of a person's incarnation at his request, due to illness, at his request, at his request, and the assistance of other people in this. A form of premature exit from incarnation at the request of the spirit itself. This is a form of killing one's own body, but, unlike suicide itself, it is not done by oneself (for various reasons), but with the help of other spirits. This is facilitating the exit from incarnation, when the spirit itself, for some reason, does not take full responsibility for its action, depriving itself of life on Earth, but wants to lay it on other spirits so that it can be helped to do this. There are spirits who find themselves in difficult circumstances, in some kind of trouble, in some kind of illness. In order not to feel physical or spiritual suffering, they decide to

completely leave this body. Subconsciously, with the help of their intuition and conscience, they understand that this act contradicts their idea of good and evil, their idea of Light, and then they ask someone to help them in order to share responsibility with him. So it turns out that if euthanasia is consented to by the person who will help him leave the incarnation, then two people will bear responsibility for the premature exit from the incarnation, as for murder: the one who asked, and the one who committed it.

#352, 58:20

Ego (me)

Either this is an embodied part of the spirit, which is called the soul, or it is some part of it.

The ego can be filled with Light and then it will be an enlightened person. And if the ego is filled with darkness, like the absence of Light, if the ego does not love anyone, then it does not love itself. In fact, there is no true Love. And then it interferes with awakening.

#393, 17:42, #444, 05:33

Selfishness

Elevating your ego. Originally it meant “I,” the sense of “I,” the sense of self. The meaning of the word “ego” is the isolation of some part from the spirit and giving it sublimity above everything. Egoism is when you take a part of the spirit, which is called "ego", and simply place it above the whole spirit, even above the disembodied part, above the Higher Self. This means that in the spiritual heart of this person, instead of God, who should sit as if on on the throne (as the Higher Self, God, Creator, Jesus Christ, the ideal part that leads to the Light), he sits himself, precisely in his earthly incarnation. Not in some ideal way, but precisely in its earthly incarnation. For such a person, the most important will be his earthly interests: the interests of his body, pleasures, relationships. And his life tasks, tasks of embodiment, raising his level, developing love will be ignored. And this will be love

for only one part of yourself, only for one projection of yourself while ignoring everything else. In essence, selfishness does not contain true love for oneself, but dislike for oneself.

#43, 22:56, #179, 44:44, #181, 16:14, #266, 29:25, 33:47, #393, 17:42

Egregor

An energy formation in the noosphere of the planet, partially accessible through the astral shell, which contains mental, emotional and volitional energies, similar in vibration frequency and in idea. There are religious, political, scientific egregors. Concept, term and concept in occultism and esotericism, which means a non-physical entity, a group biofield. An egregor is not just a separate mind. It consists of several parts: the information part is the Akashic chronicles, where the Spirits are located - the guardians of the egregor. If this is a religious egregor, then there is a high level of Souls, we call them Angels of the 22nd, 23rd and 24th levels. They are like guardians of the egregor and distribute its energy. The energy part of the egregor also contains the energy of people, which is released during rituals (religious egregor) or reflection on a certain topic (scientific egregor), or dreams of winning (financial).

#15, 14:39, #20, 24:33, #21, 16:50, #62, 15:20, ##104, 45:53, #246, 29:38

Dependency egregor

Egregor, located on the lower floors of the astral world. His guardian spirits come from the demonic levels of the world of disembodied spirits. Often these spirits themselves had the same problem when they lived in the material world.

#50, 19:16

Egregorial system

That system through which everyone has to act: both you and us. It, of course, has its advantages and disadvantages. Our business and your business, as bright spirits embodied on this planet, are to turn all the shortcomings that exist into advantages. And enhance the dignity. But completely removing the idea of egregoriality is fundamentally wrong, because it is impossible. There will be just a new egregor.

#411, 01:56

Eden

The oldest base of the Tumesout people on Earth. A scientific base and testing ground for the creation of man and the training of our ancestors to follow the social path of development. 12 thousand years ago it was located on the site of the Mediterranean Sea, closer to today's Turkey.

#18, 31:50, 34:30, #202, 17.20

Esoteric egregor

One of the religious egregors where people are engaged in spiritual development.

An esoteric egregor (the one that speaks of spiritual development) is also a type of religious egregor.

#411, 01:56

Ekadashi

Fasting on the eleventh day after the new moon or full moon so that a person raises his vibrations so that he is more engaged in spiritual practice. These days (the 11th day after the new Moon and after the full Moon) had such a property that they helped to cleanse the human

physical body and its etheric body.

Fasting was adopted so that people spent less time a day earning food and spent more time on prayers, spiritual practices, and performing various good deeds, rituals that raised their vibrations.

Another point. Very important in any post of any religion. That money, that food (if it was a long fast, the person still worked somewhere, went somewhere), which he accumulated during fasting, without eating it himself, was a virtue to distribute to the poor, i.e., one might say , he tore her away from him. A person learned to harmonize his egoism when he earned not only for himself, for his material consumption, but showed mercy to the poor, to those who do not have such an opportunity.

The meaning of fasting was that a person abstained from food in order to distribute it to the poor, the poor, the sick, widows, children, i.e. those who could not take care of themselves. This is a very ancient meaning of fasting.

#86, 17:26, #326, 41:25, 46:07

Exocortex

The idea of complete control over a person through his biometric impression, using various electronic means.

#192, 01:00

ECO

The scientific method of creating a physical shell.

#20, 46:53

Ecstasy

A trance state, withdrawal into oneself, into one's spiritual world, which can be accompanied by the release of the astral body, when the etheric energy of the astral comes out of the arms, legs and head.

#118, 23:41

Ecumenist

A person who recognizes all religions recognizes the salvific nature of all religions. This is also a kind of religion, a religious and philosophical teaching. It's just that such a person will no longer be a Christian, a Jew, and so on.

If you are an esoteric ecumenist, entering a temple of a particular religion, you will temporarily find yourself in this egregor. You are equally Christian, Muslim, Buddhist and so on.

#439, 34:26

Electrical energy from air (Tesla)

Energy does not come from nothing, but from electrostatic charges. To get it from the air, you first need to attract it into a certain twisted metal wire.

#377, 00:23

Electric charge

Subtle material energy, a substance that consists of different frequencies. For humans, it is visible in the form of dark matter, dark energy. Worlds and planets – a parallel world – are made up of these subtle energies. They are imperceptible to humans.

#110, 29:07

Electricity

Radiation or flow of energy of the 1st level.

#17, 24:19, #404 , 33:51

Electricity (Tesla)

One of the forms of etheric energy.

A type of etheric energy that has two opposite charges: “plus” and “minus”. Two opposites.

One of the types of ether that can be transformed into others: into heat, light, into different types of mechanical energy - it rotates something, moves something. But this electricity is generated, anyway, by the ether. This is not only a current that “ runs ” along a conductor, it moves simultaneously along the surface and around it.

#376, 14:10, #404 , 33:51

Electromagnetic waves (from the point of view of the Interstellar Union)

Types of energy of the first level that come out of atoms and move in

space create electric and magnetic fields.

Electromagnetic waves: radio waves, ultra-high radiation waves, ultra-high frequency waves on which microwave ovens are built, and so on, all these waves are lower in frequency than the first color in the color spectrum, red. The highest frequency in the light spectrum is violet. Higher in frequency than violet is ultraviolet: long-wave ultraviolet, short-wave ultraviolet.

Only long-wave ultraviolet has a moderate irritant effect on the skin because it begins to damage the outer epidermis. Its frequency is very high. When these waves oscillate very frequently, a large number of times per second, they begin to damage the skin proteins, the substances that enter the skin.

The short-wave ultraviolet spectrum is even higher in frequency . There may be sunburn. That is, in addition to the visible spectrum from the sun, there is also an ultraviolet component that passes through the atmosphere.

Above the short-wavelength ultraviolet spectrum is x-ray radiation. It can damage human cells even more, but less than radiation.

#296, 01:00:47

Electromagnetic fields

Fields having a frequency below the spectrum of light that the human eye can perceive. They are safe. The only thing they can cause, if the source of the waves is located next to a person, is an increase in temperature. They cannot cause cell damage because they have little energy for this. They have a low vibration frequency, lower than the nerve cells of the body, which have a semblance of electricity. That is, people emit electromagnetic waves.

#296, 01:00:47, #377, 15:55

Electron

A particle of energy from radio waves, electricity and magnetic fields.

A structural element that consists of 60% fire elemental energy and 40% air elemental energy that supports it there. That is why fire and water are opposite elements, “plus” and “minus”, opposite in quality.

#17, 33:39, #307, 44:23

Electron, proton, neutron

Particles consisting in a certain ratio of the energies of the four elements. The electron includes elements that are fundamentally opposite in their qualities to the elements in the proton. The electron has more of the element of fire, and the proton has more of the element of water. Accordingly, they repel each other. A neutron contains not only an electrical charge, but also a gravitational one in the nucleus of an atom. The neutron is neutral because it contains the energy of all four elements in equal proportions. This play of the four elements: air, earth, water and fire, represents the ten material energies that enter into atoms.

#322, 01:26

Electron cloud, proton-neutron complex

Ten material energies that make up the three energy levels of the atom. At the first energy level there are five energies: heat, light, electricity, magnetism and radio waves of certain frequencies. At the second energy level in the atom there is radiation energy and thermonuclear energy, which is present in any atoms, regardless of substances. The third level of energy is the deepest in terms of depth of immersion in the atom. These are micro and macro gravity .

#322, 03:48

Elementals

Spirits from the 7th level of the World of Unincarnate Spirits. Spirits who strive to incarnate in plasmoid worlds responsible for certain natural elements. They emerged from the demon world and devoted their energy to controlling nature and creating animal souls. Their own power still attracts them to the point that they may ignore the needs of their family, oppose society as a whole, and be unwilling to sincerely turn to God. But they have already moved away from demonic egoism and now, by creating animal souls and controlling them, they are learning to unselfishly love someone other than themselves.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

Elohim

The name of aliens from humanoid civilizations and plasmoids. All aliens were called in Hebrew by the term Elohim. In Russian it is translated as God, but it is plural, and in Hebrew it is read as gods who came from above. One of the Elohim is Satan.

#21, 05:50, #68, 26:18

Emblem of the Interstellar Union

A voluminous rotating star similar to the emblem of Cassiopeia. It symbolizes the spread of true love and life from a single center of God’s consciousness in its energy to all directions of the universe.

#218, 06:03

Embryogenesis

The process of formation of an organism. The spirit is primary in this

process. That spirit, spiritual essence, which is embodied in a certain body, receives vital energy for incarnation, which subsequently becomes a person's "etheric body" or "etheric field," as people call it. But when the spirit received its vital force (it received not the whole spirit, but 30% of it, which is called the incarnating part, this is for an earthling), this part, so to speak, the spirit separates from itself. The spirit, when viewed from a material point of view, is divided into two parts. And from a spiritual point of view, he simply embodies a part of himself. Both will be true, but only this is a view from different sides. This incarnating spirit, which is called the soul, awaits the conception of its body, being in the astral world next to its parents at this time. And at the moment when the physical sex cells of his father and mother unite, and the first cell of his new body is formed, the exchange of genetic information begins between the cell of a man and a woman. And at this moment the spirit that has come to incarnate combines the flow of its life force, its etheric force with this cell. It's like he's soaking her in. We say the word "introduces," but it doesn't just insert, like a needle, but he onto it imposes his life force, and it is completely influenced by his etheric body, his life force. He himself does not enter this cell until the earthling's embryo reaches the age of seven weeks. But all seven weeks his life force is still present in this embryo. It is not just present, it controls the speed of transcription, that is, the rewriting of genetic information at the physical level, already at the level of cell construction. How does it depend? The Spirit already has a ready-made image of its physical body. He is in it, in the form of the so-called "etheric matrix". That is, every future physical organ has an exact copy of it. Only it does not have dimensions, weight, or any physical parameters. It is on the energy level. But, nevertheless, this is a very real structure, and it begins to be filled with cells of the future physical body. This process is also influenced by the vital force of the mother and, to a lesser extent, by the vital force of the father. The biggest influence is the vitality of the spirit itself, even though its body is small, but its spirit influences it the most. From the moment of conception, the embryo is essentially a separate organism. Although not yet independent, it is an energetically separate organism that takes only the necessary substances from the mother's body. And energetically he is more independent than you think.

#344, 12:30

Emotional pain

Human pain, which is located on the mental, casual and other deep structures of the human spirit. Occurs when a person's individual life goals are violated and not fulfilled.

#191, 01:01:55

Emotional diary

A separate notebook, which can be entitled "My personal emotional diary", the main condition for this is that the diary is inaccessible to anyone. No one should open it without your consent: neither mom, nor dad, nor child , nor husband, nor wife. This is the main condition for being honest with yourself. As soon as you experience some emotion and remember that you need to write it down, you definitely take it out . In the "emotional diary", write the date, approximate time, what emotion you experienced and why. If you censor your statements, they will no longer be pure emotion. You need to write in one notebook for about a month. In a month, choose a day when you get up in the morning and read all this. You will read more detachedly , like a book. You will see something that you did not see in the "emotional diary". Many emotions are repeated in the same situations. This will help reveal mental attitudes that are hidden from you. And you will see that you need to change yourself so that nothing can take you out of the positive, harmonious state of your stay in the body.

#266, 40:57, #401, 01:25:23

Emotion

An energetic reaction to information perceived from the outside, or events occurring within the spiritual field, that is, in the field of memories. This is energy aimed at changing the external and internal environment. All living beings, both rational and irrational, have emotions. They are required. This reaction stems from the very understanding of biological life as a chain of reactions to changes in external and internal conditions. The material world is very plastic and changeable. Any living creature that is in the material world, in order to survive, produce offspring and occupy a certain niche in its social sphere, must respond to changes in the environment. Only in the

animal soul the emotional life will always be based on the instinctive mind, and in rational spirits, including man, it is based on the mind of the immortal spirit: spiritual mind and instinctive mind, or their combinations.

#14, 03:10, #31, 27:43, #33, 19:25, #59, 35:02, #140, 18:34, #211, 20:11, #266, 10:38, 17:37, 33:47, 40:57, #345, 30:12, #358, 42:26, #401, 01:20:37, #428, 04:44,

Empathy

The ability of a person to experience the feelings and emotions of another person as if they were their own. In large families, empathy is usually higher. This is a useful and very good habit. It helps people communicate, helps them behave correctly and tactfully in society.

#455, 14:45

Endometriosis

A disease of the female genital organs that can be caused by various reasons. These could be microbes, hormonal disorders, stress, that is, psychosomatic reasons (at the etheric level these are negative blocks), or it could be all these reasons combined.

#97, 19:49

Energy

The etheric body, other energetic and spiritual bodies. The system of central flows and chakra structures.

#225, 37:05

Energy connection between parents and child

A connection with parents that exists until the age of 14, while the child's aura is fully formed and he adapts to this world. Through energetic connections, the moods and thoughts of parents influence the formation of the child. With calm and loving parents, the child quickly adapts to the world around him.

#103, 18:02

Energy vampires

Organisms that can absorb human energy. People give this energy to them themselves.

#83, 05:34

Energy stone in Kaaba (Mecca)

The stone is of terrestrial origin, but a particle of not a meteorite, but a stone (white crystal mineral) is placed in it. A particle of crystal was placed inside the stone; the Tumesoutian Jabrail gave it to Mohammed, and at that time the Interstellar Union allowed the transfer of gifts.

#217, 37:36

Energy (as part of the intelligent spirit)

Part of the rational spirit, consisting of three energetic abilities: will, consciousness and emotions.

#33, 19:25, #59, 35:02, #140, 18:34,

Vacuum energy

Energy that is located in empty material space, free from substances and fields.

#77, 13:18

Second level energies

What is called radioactive radiation (hard X-rays) and the energy of thermonuclear fusion is that which is released when atoms of different elements collide at high speed and at high pressure with each other.

#17, 14:51

Healing Energy

The energy of the mind, consciousness, which is filled with Divine Light and the desire to heal a person and fill him with the idea that he is healthy.

#367, 01:46:25

Energy of the material world

Level 1 energies – heat, light, electromagnetism, radio waves.

Level 2 energies are radioactive radiation (hard X-rays) and the energy of thermonuclear fusion, which is released when atoms of different elements collide at high speed and at high pressure with each other.

Level 3 energies – microgravity and macrogravity .

All energies of the material world are interconnected and interact with each other.

#17, 14:51

Energy of patriotism

Energy of Love.

#444, 14:38

Water energy

An endless sea, but it is more like an underwater world. There is a state of constant movement, like a wave. The energy of the element of water is spiritual purity, a cleansing principle.

#434, 09:19, 17:23

Air energy

Air currents consisting of an endless atmosphere with clouds, cyclones. Only this is all in energy form. An endless atmosphere in which there are houses, cities consisting of clouds.

The energy of air is the energy in the Spiritual world not just of reason, but of wisdom. For example, when you think about something, this is knowledge, a desire to know, an interest, which is described in the Spiritual world as a desire for knowledge. This is a spiritual state.

#434, 09:19, 17:23

Earth energy

A static state, where there are a lot of all sorts of crystalline forms, for example. It looks like the structure of the earth's crust, only the crystals are magnified a million times.

The energy of the earth element is protection. Energy that protects everything and holds everything together, bringing it into the structure and producing structuring.

#434, 09:19, 17:23

Fire energy

An ethereal elemental force, it has a certain color, but not a physical one, but one that manifests itself in the subtle world. There is a color, a certain structure of the structure of some plasmoid, for example. It can be at different density levels.

The spiritual world is the world of feelings and thoughts. The energies of the element of fire are the spiritual feeling of Love. Spiritual Light is reflected like fire energy.

#434, 09:19, 17:23

First level energies

Heat, light, electromagnetism, radio waves.

#17, 14:51, #146, 14:01

Energy SII-HA

“SII” is energy, a quantum of this energy, and “HA” is direction. This is targeted quantum energy, pulsed, with a very short frequency. It is similar to our Chi energy. This energy is life-forming ; it is also a wave particle. But due to the fact that it has a very short wave and a very high frequency, its effect on the body is very soft, easy and very effective. Energy operates at the quantum level, interacting with the cell. Over time, not immediately, activation occurs.

An energy system to help the Earth in Ascension, help in passing the quantum transition for both the planet and people, which is actually the return of people to high vibrations of Light. They enhance the internal vision of various events and develop extrasensory abilities (hypersensitivity).

#394, 27:17 ; #394, 01:01:32

Third level energies

What is called gravity. It is divided into 2 types: microgravity and macrogravity .

#17, 14:51

Energy of subtle-material civilizations

The energy that provides the gravitational field, all gravitons, microgravity, macrogravity consist of this energy . Subtle material civilizations create attraction to planets, stars , galaxies of the Universe and fields in space. By densifying and changing their vibrations, they create all atoms.

#90, 22:13

Transmutation Energy

Transformation of negative into positive when realizing oneself by the Divine Light and dissolving blocks, i.e. when a person realizes the reasons for the appearance of these negative emotions and transforms them.

#253, 03:31

Energy exchange

One of the forms of interaction between material particles and energies.

#166, 30:44

Energy exchange (thought energy)

Expending the energy potential of us as divine beings. According to divine law, no one has the right to take our energy from us without our consent. We can voluntarily give energy to any entity if we send it any emotion or feelings. If you send negative energy of fear, anger, hatred, irritation to a light essence, this energy will go back from it, reflected from its field, strengthened as much as the field of this essence is more powerful. The negative entity will absorb this energy, but according to the laws of exchange, it will send its own, which is charged with negativity.

#296, 02:22, 05:15, 07:39

Energy Center

Manifestation of one of the auric fields through the physical body.

#112, 12:22, #365, 00:21, 05:05

Energy centers of the Earth

1 A large energy formation, a portal, a large chakra of the Earth, an energy center for exchange with the cosmos (that's why there are portals, a cluster of portals). It is located approximately at the latitude and longitude of the source of the Oka River. There is an ancient sanctuary there. The water that flows from there has healing properties, charged water.

The epicenter of the zone is slightly more than three kilometers. But the influence extends further, perhaps hundreds of kilometers. Depending on the cyclical activity of plasmoid civilizations, which depends on the cycles of the Sun and Moon, on the general rhythm of nature.

If you look at this place on an energetic level, the space glows very strongly. In ancient times, there were many places in this area where magi healed people.

2 Another place is in Russia, it is smaller. An energy line that follows a fault in the earth's crust, like a geological physical formation. Geoelectric energy comes out of it. As it rises, it causes vortices in the ethereal space, like a tunnel in which it twists. And this is the Novokhoperskaya anomaly, an anomalous zone. There are many plasmoids, UFOs, and encounters with “field memory” observed there. The space remembers certain things, for example, images of people who have been there. Then the images can be photographed. Like the Akashic Records.

The light plasmoid civilizations that live in this place create a portal. They agree and create a portal in one place, which they use for their needs, to move from world to world, influence the physical world, monitor it, perform all the functions of plasmoids: creating animal souls, etc. Such portals existed long before the existence of intelligent man on Earth. Long before the discovery of the Earth, the Tumesoutians already had such portals, because plasmoid civilizations lived here.

People who live now, getting into these spaces, can strengthen them with their Light, weaken or even close these portals, change the energy to negative if they emit negativity. The third level of density involves very dense energies embedded in this matter and a very high power of divine Light (or the opposite of Light), which the spirit embodied in the body emits.

#437, 55:00

Energy structure of the body of Burkhadians

Incarnation through their body type is distributed differently, they have different chakras, different energy centers. Not only their number is different. Each chakra has so-called petals, multi-level systems. There are as many petals in one chakra as there are etheric channels in them. The structure of each chakra, their functions among the Burkhadians differ from their structure among the earthlings. And for this reason, 70% incarnation does not prevent this spirit from realizing itself in the Spiritual world. The 30% remaining in the Spiritual World is enough for him to fill with energy.

#286, 11:31

Energy engineering of the Eslerite body

Representatives of the planet Esler have twelve fields. Each chakra has a specific color spectrum. There are more of these flowers. For example, there are two more types of green, white is in the aura, and all the colors that are characteristic of earthlings are present. There is also something in between red and brown.

#365, 00:21

Epilepsy (causes of epilepsy)

Lack of control, fear that a person is not in control of his life. You need to work with this fear. If you manage to dissolve it and remove it, then the brain will stop sending these signals about uncontrolled contraction to the muscles. And, accordingly, there will be no cramps.

Epilepsy can be caused by a hereditary change in brain proteins, which provokes the appearance of foci of neuroimpulses in the brain, which cause muscle contraction, loss of consciousness, etc. But these same manifestations can be a consequence of contact with one form or another of the mind, an exchange of energies with someone with whom a person came into contact, for example, from an unbalanced contact with plasmoids. It also often happens that these electromagnetic signals arising in the brain disrupt consciousness and cause seizures of various kinds. There is an excitation of the energy of

the aura of the etheric body, an excitation of the aura.

#86, 52:20, #333, 28:02, #444, 01:20:52

Epiphysis

One of the instruments of the spirit, with the help of which it controls the body, releases special hormones, regulates their quantity and influences the spiritual visions of a person. Located right in the middle of the brain. It is one of the instruments of consciousness, which is why it is called a crystal of consciousness.

#217, 07:01

Erwin

A representative of the plasmoid civilization of the 37th density level of the star Betelgeuse in the constellation Orion. Guardian (stores information and energy) of the Order of Ice Fire Mages. Erwin is a certain mental image, a sound code with which we can address him; plasmoids do not have sounds like ours. This creature lives far from Earth, in a hot star called Betelgeuse in the constellation Orion.

By specialization, he is a scientist who studies worlds of another density, specifically the third. He has such a task and he has been fulfilling his task for 56,000 years, having started doing this when he was 400 earthly years old, that is, quite soon after his birth in his world.

#604, 07:22, 25:01

Eromes (in Daraal language)

The animal soul, which can only incarnate in the bodies of animals,

insects, birds, reptiles, etc., in non-intelligent beings, in whose bodies the central nervous system is not intended for the manifestation of consciousness.

#140, 18:34

Memories

A planet located in the system of the star Eta Bootes, 36 light years from Earth. The system in which Esler is located includes 8 planets, of which only three are inhabited. The diameter of the planet is about 20 thousand kilometers. The distance from the star is about 206 million kilometers.

The climate is similar to Earth's, but a little warmer. There is no winter there, at all, even at the poles of the planet. Water throughout the planet is in a liquid state all year round and does not freeze. The average temperature is higher than on Earth, but not higher than on Venus.

The natural evolution of the inhabitants of the planet did not occur through mutation, but through the complication (if we look at the evolution into an intelligent being) of the neural connections themselves. Not due to mutations, but due to the complication of the neural connections of those animals that were their ancestors. The cells remained the same, but they could transmit more impulse energy, at a greater speed due to the connection with the animal soul. This process led to the appearance of an intelligent being on Esler about 8 million years ago.

The population of Esler currently amounts to about 30 billion people. The average life expectancy, if counted in Earth years, is approximately 430-470 years. Representatives of the planet Esler are 1 meter 70 and slightly taller. The skin is brown and wrinkled, even among young Oeslerites , whose skin is lighter, while the older ones are darker. The eyes are yellow and the pupils are black and vertical, like those of cats. Hair comes in different colors, but mostly dark, although there is also light. They have long, pointed ears and are larger than those of earthlings. Representatives of the planet Esler

have twelve fields. Each chakra has a specific color spectrum. There are more of these flowers. For example, there are two more types of green, white is in the aura, and all the colors that are characteristic of earthlings. There is also something in between red and brown.

Esler is governed not by one ruler, but by the Planetary Council, which consists of sixty-two Esler representatives. But each city, each district, this is something like a region, is governed by the Council of this city district, not a single member of which is on the council of the planet Esler. This is called the Council of Commons: decentralized power where there is no single ruler.

The inhabitants developed in a natural evolutionary way from those animals that consumed mainly plant and dairy foods, that is, they were mammals. Their body is adapted to process this particular type of food. Therefore, the Esler way of eating involves consuming plants and dairy products from animals. Plants used, in earthly language, are fruits, juices, and nuts, which grow not on trees, but on small shrubs. Plants also grow underground there, the roots of which accumulate useful nutrients. There are animals that give milk. They are very similar to yaks. On Earth, the body of Eslerians is best suited to foods with a high content of iodine and silicon, for example, seaweed, various herbs, for example, knotweed, various root vegetables, such as beets, which contain a lot of iodine, fruits with a high iron content, for example, apples, which are consumed in limited quantities due to pectin, which is somewhat difficult for their bodies to process.

Esler (Healing on Esler)

Medicine, which exists as a synthesis of philosophy, esotericism and biology. There, each disease is considered at the psychological, biological and energetic level. Naturally, there are chemicals, various devices and special places in the astral space where patients are placed. This is a room in the astral space where certain vibrations exist that cause changes in the astral field.

Esler and MS have a science: “Spiritual foundations for the safe activity of the spirit in the physical body,” which determines how to properly fill it with energy, how to develop it correctly so that it can correctly perform its functions, use the energies of the surrounding world in the form of oxygen, nutrients , vitamins, inorganic substances. Use this energy as much as possible in an accessible and beneficial form. Cleanse yourself of toxins as much as possible without harming yourself.

Stage of timelessness

In the Proto-Slavic and Proto-Indo-European calendar, which was introduced practically 500-600 years after the war 12,000 years ago, there were 360 days, an equal number of days in each month. The movement of the Moon and the Sun was taken into account. And those remaining days that remained each year, because the Earth rotated in more days than 360, were simply added to the last day. These six days were the days of the so-called timelessness. Before the New Year, when the whole Earth moves into a new stage of existence, the year ends, then there is a stage of timelessness, when people finished all their business and prepared for the New Year. This was considered a time not of physical cleansing, but of spiritual one. Only it was not before God, but before the ancestors, before the gods. Each person looked into his own soul. Then the first day of the New Year came, as a renewal of everything. Usually it was in the spring and was tied to the vernal equinox.

Aesthetes

Spirits from the 13th level of the World of Unincarnate Spirits. Spirits who begin to understand that the level of happiness does not depend on material well-being. Many of them still doubt this, but feeling a surge of Light in their soul, they can fall into an enthusiastic state

completely incomprehensible to spirits who watch, read and listen to the same thing, but do not experience such a variety and depth of emotions. For aesthetes, the pleasure from literature, music, painting and other manifestations of the creativity of other people exceeds the pleasure from pleasures received through the body.

Article by Vladimir Goldstein “The structure of the Spiritual world through the eyes of aliens”

Floors of the astral world

Levels of the astral world. Their number varies on different planets depending on the chakra system of the energy structure and the spirit embodied there. On Earth this is a seven-chakra system, therefore there are 7 Floors of the astral world.

#17, 44:10, #77, 12:15, #110, 31:28, #141, 02:20, 08:21, #177, 04:11, #180, 49:20,

Eukaryotic (nuclear) cells

Cells with a nuclear structure. Most animals and plants are eukaryotes.

#246, 34:51

Ether

A certain substance that supports all the elements, which is the border zone of material civilization with the Spiritual world.

#244, 28:15

Ether (Nikola Tesla)

The all-generating life force from which all visible manifestations of the universe consist. Divine energy, power that manifests itself in different forms.

#404 , 25:12

Ethereal Energy (Tesla)

The universal energy from which the Universe emerged and which surrounds the Universe. It is everywhere in space, but only in another dimension, around every atom and at the same time around the Universe.

#376, 14:10, 31:41

Etheric body

The life force that every person has. Its origin is both from the physical world and from the Spiritual world.

#410, 18:35

Essential hairs

A phenomenon that arises thanks to special practices that tune the etheric body in such a way that its channels begin to protrude into the outside world in the form of bristles, increasing the sensitivity of the etheric space of one's own thought waves. Used by plasmoid civilizations.

#249, 10:24

Ethereal matrices

Those clichés by which atoms are built. Just as we fill our life force with emotions and feelings, so the Holy Spirit fills the etheric force of these atoms with his feelings. And these are feelings of Love, happiness and, naturally, the desire for God.

#397, 18:50

Human etheric fields

One of the types of ether: prana. It is given at birth, at incarnation. At the same time, it is also produced by the spirit itself in the body and is modulated by its emotions, feelings, desires and thoughts, so it is charged.

#437, 33:31

Ethereal Fire

Fire, but not physical. These are not chemical reactions, but some kind of force, energy. But physical fire is a reflection of etheric fire, like a reflection in a mirror.

#398, 32:16

Ethereal flow

A flow of subtle energy, which is directed by the mind of a higher order. That is, it is not just mechanical energy that has passed from potential to kinetic. The etheric flow strives to create all the energies of the material world, which, in turn, form the atoms of individual substances, and creates energies of three levels in these atoms. The ethereal flow in the material world is divided into three components: 1 the creation of torsion fields and the astral veil to form the border between the spiritual and material worlds; 2 the formation of atoms and matter of different densities (that is, nuclear interaction); 3 the formation of all types of energies within atoms, from gravity to electromagnetism.

#141, 02:20

Doppler effect

The transition of spiritual energy, which initially forms the subtle material worlds, into a dense material form.

#72, 29:04

Telegony effect

The energetic impact of the etheric plane on the physical body. It manifests itself both in the animal world and in the world of people, but in the animal plane it manifests itself more strongly due to the fact that exactly that rational spirit that we are all talking about is not incarnated there, but the animal soul is incarnated. It is completely subordinate to the instincts of the animal body, so the effect of telegony is more pronounced in them. In humans, this effect manifests itself partly due to the fact that the instinctive programs of the physical body, normally, should be subordinate to the embodied rational spirit.

#20, 52:55

I

Poison emperil

A non-dense substance, that is, it is not a substance in the usual sense. That substance, which is called emperil , is the same energy of light, fire, but not properly processed. Incorrectly processed through the human chakra system.

#37, 44:23

Nuclear weapon

Explosion energy. A nuclear explosion can be effectively suppressed and the energy collected by certain devices that convert this energy into another.

#414, 52:44

The language of angels

A different language that plasmoids use when in contact with a person, trying to speak through his speech apparatus, resulting in an incomprehensible set of words or sounds. It is impossible for any person to understand him. God, through his spirit, his energy, opens in the spirit of a believer the opportunity to speak in a foreign language unfamiliar to this person.

#94, 07:42, 15:47, 18:52, 20:17, 32:57

Clairvoyance

A form of intuition, a form of contact with one’s Higher Self, when knowledge about something that a person did not know about comes to him not from the outside world, not from books or from other people, but from his own inner insight. These instantaneous insights can be in the form of visual visions on a person's inner screen and represent messages from the Higher Self or from handlers.

#115, 37:11

Clairvoyance, clairaudience, clairvoyance

Not just human abilities, but specific contact with certain forms of life.

#59, 20:44

Yahweh

The name of the Tumesoutian who came to Abraham and his descendants, to Moses, his followers and descendants, in whom Christ was incarnate. He came to form his people on Earth, through which he could incarnate. "Carrying the Light of Eternity in Time."

“Merged into one Light” translated from the Tumesout language.

https://www.youtube.com/watch?v=h8FQezHGPcw

0:21 Introduction of the meeting participants. Phantoms of Jesus Christ. Our Father.

Vladimir: Dear friends, hello! My name is Vladimir Goldstein, I am located in the suburbs of Chicago. Today we have a very special conference that we have all been looking forward to. Believe me, one of the reasons why the Cassiopeia project exists at all is precisely our conversation today, because at this conference there will be a phantom of the very person we know under the name Jesus Christ. Maria Sokalskaya from Germany is with us. Hello Maria!

Maria: Hello!

Vladimir : Well, and, of course, you probably don't need to introduce yourself, but I'll still introduce you, our dear, respected contactee Irina Podzorova is with us. Irina, please imagine, now you, who are present today at this very important, I will say absolutely sincerely, invaluable conference for us.

Irina: Hello, dear friends! My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. Today is a long-awaited day for us; we have been coordinating this meeting on the planet Burkhad for a long time. Here is the leader, the head of the Christian religious egregor on Earth and not only, the Firstborn Son of God, our elder Brother, us - I mean all the Spirits who are here. He is here in phantom

form, that is, in an energetic copy that is endowed with his thoughts, his feelings and is connected to his physical body, which is located on another planet.

This is Jesus Christ, who is now physically alive, it is very easy for him to create copies of himself, his phantoms and send them to other planets. We will talk about this, of course, in a little more detail later.

Besides him, here is his student Mirakh Count from the planet Burkhad, who is known in the Christian religious egregor as Archangel Gabriel, and, of course, the curator of our project MidgasKaus from the planet Esler, biologist, psychologist, specialist in alien life forms, who is now with interest talks with the phantom of Jesus.

Hello, dear friends!

Vladimir : Hello! Well, we have introduced all our participants. With all my heart, with all my soul, on behalf of all the subscribers of the Cassiopeia project, in general, on behalf of everyone who will watch this video, I want to thank Jesus for finding the opportunity, we understand that this is worth a lot, I found the opportunity talk with us today, answer questions from our subscribers who were preparing, sent hundreds of questions to all groups on our social networks, and today we have such an opportunity, but this will not be the only conversation.

This is the first of these conversations, because even the selected questions are far from a hundred. I want to say right away that the questions for this first conversation were selected with the participation of Christ consciousness: Irina connected with the knowledge of Christ, read the questions, and the questions that will be asked today, of course, there are a limited number of them, so that we can ask them normally and hear the answers without overloading the contactee at the same time. So, these questions were selected, in fact, by Jesus Christ himself. Therefore, let's accept the answers to those questions that we, as administrators, did not select, but were selected by our more than respected, dear interlocutor. I thank you again, Jesus, that we have this opportunity, and I want to start our meeting today with this...

Irina: He sends his gratitude for the invitation and trust to Irina as a contactee in transmitting information from me. She will do it very cleanly.

Vladimir: Thank you!

Our Father, who art in heaven. Hallowed be Thy name, Thy kingdom come, Thy will be done on earth as it is in heaven. Give us this day our daily bread and forgive us our debts, as we forgive our debtors, and lead us not into temptation, but deliver us from the evil one. For Thine is the Kingdom, the power and glory of the Father and the Son and the Holy Spirit, now and ever, and forever and ever! Amen.

Irina: Amen.

Vladimir : Lord, Jesus Christ, Son of God. Prayers for the sake of Your Most Pure Mother, our reverend and God-bearing Fathers and all saints, have mercy on us. Amen.

Irina : Amen. He felt a connection with you, when you read, he also sent energy to you.

06:32 What is the correct name for Jesus Christ? Firstborn Son of Absolute Light. Logos.

Vladimir : Dear friends, I have the first question of those that, as I have already said, were agreed, in fact, with Jesus Christ himself: dear Jesus, please tell me how they are treating you now on Burkhad and in the Interstellar Union? What is the correct name for you?

Irina : On Burkhad and in the Interstellar Union they call me a verbal construction that can be translated into Russian as the First-born Son of the Absolute Light. Not even a son, but the Primordial impulse of the thought of the Absolute Light. I said it very long, but this is an approximate translation of the expression from the Pikran language “Khaltsi barahi”. This is translated as the mental impulse of the Absolute, a very accurate translation into Greek - “logos”, that is, word, teaching, thought. And not just a thought, as an excitement of the

mind, but a thought, as a calm state of the Divine Mind. For earthlings - Jesus, Yeshua, Christ or Lord, and you can call me My Brother. The name is only a small part of a very complete personality image. I am known in other worlds by other names, in many worlds I am God.

08:26 Number of simultaneous phantoms of Jesus. Phantom vital force charge percentages. Purpose of using a phantom.

Maria : Please tell me how many phantoms you can identify at the same time, and what is the difference between contacting your phantom or you in the astral body?

Irina : I can distinguish about ten million phantoms with a certain autonomy of existence. I can do more, but for this I will need to remove energy and autonomous existence from about a quarter of them.

What's the difference between phantoms? The Phantom has a charge of my Soul of approximately ten to fifteen percent, specifically now around Irina there is about 17% of the total charge of the astral body.

The astral body has a charge from all my subtle bodies and the physical body of about maybe 30%. The vital force charge percentages of my phantoms may vary depending on the purposes of use and purpose. Now the purpose of use is to transmit information and monitor the contactee’s reaction to energy contact.

09:50 The power of the energy flow of the astral and physical bodies of Jesus. Consequences of energy vibration mismatch.

Vladimir : Thank you! Jesus, please tell me, if you were fully present now, not as a phantom, but in the astral body, would the contactee be able to withstand, from your point of view, this flow of energy?

Irina : I could stand it, but I would remain in a conscious state of consciousness for no more than two or three seconds.

Vladimir : What would happen?

Irina : She would lose consciousness. If out of body, maybe a minute, because the physical body would not be set up to contact the astral body, so awareness would be lost sooner. In fact, this is a fairly high, good result. Some explain it as a dream. When entering the Astral, if this is an astral body, then all she would remember is dissolving into the Light.

Vladimir : I see. Next question.

Irina : Inconsistency of energy vibrations. If I tried to fill it with energy, it would only speed up its dissolution.

11:23 Where is Jesus' physical body now?

Vladimir : I see, thank you very much! Please tell me: where exactly are you in your physical body right now?

Irina : I am on the planet Bhayaki in the constellation Virgo, one of the colonies of the planet Saama, where I am a deity. Physically, I am there and communicate with representatives of local priestly traditions, traditional cults and pass on to them new knowledge about the Interstellar Union and the Spiritual World.

12:17 The exact date of birth of Jesus Christ.

Maria : Thank you! Tell me, please, can you tell us the exact date of your birth to Mary according to the modern calendar?

Irina : Mirakh Count told me that people were interested and told me about it. I was born, you can subtract four years from the first year BC, from the first year of the new era, conditionally, and then it will be the autumn of the fifth year BC. To untangle this contradiction, I will say that I was born 749 years after the founding of Rome. It was autumn, approximately translated into your calendar, taking into account leap years, the displacement of the earth's axis, it will be September 22, 749 after the founding of Rome.

Vladimir : September 22, 749 after the founding of Rome. Thanks a lot!

14:10 Description of the Creator of all that exists.

Vladimir : Dear Jesus, please tell me how you could describe for us in words, maybe not so realistically, but nevertheless, our Creator, the Creator of all things, who the Creator is for you, and how in general you could Describe it?

Irina : To describe it in very simple words, this is my own thought about Existence, changed in the Absolute. All you can think about Him, you can think about some quality of Him. Any word you can use to call God, you are naming one of His energies, but even I don't know all of them. It's not that I don't know, but that I can't grasp with my mind, although my experience and my energy vibrations can simultaneously hold many things in different galaxies and solve different problems of both the Spiritual and material worlds. But even I cannot capture even a tenth of His energies.

When you look at some object, you see a small particle of His energies. When you look at a mountain, it is a small particle of His energy; when you look at the Sun, it is a larger particle of His energy. But on the scale of the Divine Mind this difference is insignificant. When you look at your body, it is also a piece of your energy, and when you focus on your thought, it is a piece of Himself. The Creator of all that exists is you, elevated to the Absolute.

You have an understanding of "exponentiation". If all qualities are multiplied, turned into Light and raised to the absolute degree, this will be the Creator of all that exists.

Maria : Thank you! Very good explanation.

17:01 Universe.

Maria: Yeshua, please tell me, can we say that your idea of the universe corresponds to the concepts of the Interstellar Union?

Irina : About what?

Maria : About the structure of the universe. What our curators convey to us in the Cassiopeia project.

Irina : I know these terms. The point is not in accordance with my understanding of the universe. I know the universe as a continuous flow of Divine energy, including my own energy and the energy of spiritual entities that consistently create worlds at different levels of densities, including the physical, densely material world. But I, of course, know the terms that the representatives of the Interstellar Union use, and I affirm and confirm that they can adequately describe reality.

18:16 Modern Christianity, its correspondence to the religious egregor conceived by Jesus Christ. The main task of Christianity.

Maria : Thank you! Tell me please, what do you think about modern Christianity? Does this religion fulfill the tasks that you set when you created it?

Irina : About modern Christianity in general?

Maria : Yes. About modern Christianity as a whole, in the entirety of its confessions.

Irina : This religious egregor, religious society, including the spiritual community, is part of me. I sincerely and tenderly love every representative of the Christian denomination as well as any person on Earth, but the tasks that I set for this religion when I created it on Earth are only partially being fulfilled at the moment.

The main task is not being fulfilled - the unification of those people who are devoted to my image and the image of my Mother, and the image of my Father, and the Holy Spirit, uniting under the banner of peace, love, peacemaking, grace, joy. The main purpose of my coming to Earth is to create a religion, my sacrifice.

Now many leaders of Christian denominations have put personal ambitions and political goals above their love for me. Many people! And this introduces dissonance into the Christian religious egregor, since the beliefs of these leaders are spread by my flock, the flock lowers their vibrations, condemning and angry at their neighbors, and then partakes of my secrets, transfers these emotions to me in an energetic sense. For me, this is a very low vibrational state, since from the moment of my birth in the Spiritual world from the Father I could not imagine life without Love.

Vladimir : I see. Thank you!

21:44 New prayer. Canons. On the possibility of changing the modern Christian denomination. Looking inside yourself through the eyes of Jesus. The instinct of self-preservation. Apostle Paul.

Vladimir : Please tell me, in the context of the previous question, what would you recommend changing in the canons of the modern Christian denomination? Maybe it makes sense to give us some kind of new prayer? We have a new time, a quantum transition. Does anything need to be changed?

Irina : It is not possible to change the canons at the moment due to the inertia of the Christian religious egregor, because of the mental and emotional processes of earthlings themselves, who unconsciously, through inclusion, program their egregors to resist external forces and the instinct of self-preservation inherent in a certain way in your culture.

He says that we, being creatures in whom the instinct of self-preservation prevails in all areas of life, also charge our egregors. This is neither good nor bad, it is a fact with which we all deal. And this has its pros and cons on Earth.

When I came here, I understood perfectly well that the Christian religious egregor would be exactly like this. Of course, there were many possible futures, but I had no illusions about earthlings. He perfectly understood their aspirations, thoughts and feelings.

As for changes in the canons for believers themselves, I would like to urge all believers to look inside themselves, inside their hearts.

The meaning of Christianity, which I put into religion, is not even worship of me, not reading prayers to the saints who loved me, but becoming like me. Becoming like me is a process in which prayer is only a small link.

What is likeness? The Apostle Paul, my first student among the pagans, the first teacher of the pagan peoples on Earth and transmitting my knowledge, worldview, carrying the energy of my society of ordinary people of non-Jewish origin, said that you people should have feelings like close people, but my feeling is love. And my love is absolute for everyone. For me there are no personal enemies, no enemies of my church, for me the word “enemy” does not exist at all.

The enemy is my beloved son, since I do not separate myself from the Father for a single moment in the essence of my Spirit. My separation is only for self-awareness, but in energy I am not separate from it. Therefore, any sinner, any enemy of God, the enemy of love, is my son, the son of love, who has become hardened, fallen into low vibrations, and who can only be healed by love, not pain, anger, not condemnation, but only the example of your love.

Therefore, I urge every Christian, especially before confession and communion, to look inside themselves, to look at themselves with my eyes. Just put my image in front of you, which will remind you of my eyes, of my energy, look at yourself, close your eyes, imagine that you are standing in front of me, and not just in front of me, but in front of Absolute Love. Ask: “Have I been like you the last day, two, week or month?” – how long is a very individual question. And, of course, this needs to be done regularly.

The thing is that sometimes your desire to change and become a saint, to shine with unconditional Love, can very quickly disappear due to the fact that you behave according to your habits. But there is no need to condemn these evil habits and fears; this condemnation only strengthens it, as it distracts you from fighting them.

And if you develop in yourself only love and the accompanying qualities that are opposite to passions, and when you outgrow them, they will fall away on their own, like unnecessary husks. So I wish each of you, once a day, in prayer or in a state of meditation or introspection, to remember that I exist, and to contact me not just with the words of prayer.

I will now give a new prayer: " **My Lord is Light, and I am Light, we are one."** Although these will be very correct words, there is a real risk that they will also be repeated by heart, like a mantra, without changing yourself, so just look into yourself and ask: "Christ, am I like you, am I the same love?" And when your neighbors irritate you, ask me through yourself: "Christ, how would you answer? Weren't you humiliated on Earth? How did you answer? Here there will already be a path of love.

Be sure to accompany these questions with prayer, which must come from the heart and return to the heart, because prayer is the path to spiritual improvement, since continuous prayer is a continuous flow with me. When a person's mind is constantly occupied with thoughts about God, he will gradually get used to it, and it will be difficult for him to descend into low vibrations in order to not only do, but even think about something low-vibrational, a deviation from God.

31:46 Reasons for the absence of a family in Jesus Christ.

Maria : Thank you very much! You know, I want to ask you a very personal question that interests so many on Earth: why don't you have a family and children on Burkhad? Is it possible that they will appear in your life someday?

Irina : Good question. Exchanging energy with my wife and conceiving children will require the energy that I now direct to processing the low vibrations of earthlings who unite with me in the sacrament of the Eucharist.

If I find a woman who can not only be physically next to me, but also make physical contact, then after the first such physical contact she

will share all the vibrations with me, especially the child who will be born from me. I don't want this for the reasons that I myself made the choice to change the vibrations of the Earth in such a way as to pass through all low-vibrational states through myself, I don't want to impose this on someone else.

Vladimir : I see, thank you very much!

33:25 A typical day for Jesus Christ and his favorite activities. Communication with students. Phantoms of Jesus.

Vladimir : What is your typical day like, and do you have any favorite activities?

Irina : On my island there is a forest of plants that you would call conifers, but they have flowers. He is showing me now: like our cypress trees, the flowers look like white water lilies. I love walking through this garden-forest, both a forest and a garden, because it is cultivated and I love to communicate with nature through this place.

I love to communicate with the sun (it shows the sun of Burkhad), with the Spirits who live in this area, the Spirits of the Pikran system, the Solar system and, naturally, since the sacrament of the Eucharist occurs on Earth around the clock, then around the clock, according to the law of energy exchange, they come to me energies, including distorted energies of the etheric field, reflecting signals distorted by physical diseases and various etheric blocks, if any, of astral and mental energy formations that exist, and I send them mine to increase their vibrations.

If a person is connected with low-vibration plasmoids, then the energy of this plasmoid world also comes to me, and I perceive their vibrations. Accordingly speaking, I feel the lifestyle of this person. For example, he has depression, he constantly thinks about some mistake of his or about his unhappy life, all these pictures float in front of me, I sympathize very much - I am in such contact.

And only once every two, two and a half earthly months, students from

different planets come to me upon request, usually from six to twenty-five people, to whom I answer their questions and give individual advice on their spiritual improvement.

I love to communicate with nature, I love to watch plants, animals (shows something like our deer, only smaller, like a baby, without horns, it has bright orange fur that for some reason glows). I love to make astral trips to the Spiritual world, communicate with the Archangels, answer their questions about managing the Christian religious egregor. I feel the same way with my phantoms. I have many contactees, not only on Earth, but also in other worlds, who receive information and energy, including for healing, transformation, and spiritual guidance. I follow information on phantoms - this is my favorite thing, and I can also communicate through the subconscious of any person who loves me and sincerely tries to follow the path of Light, and does not consciously commit actions that reduce his vibrations.

38:35 Who oversees the Jewish egregor? Yahweh. Moses. Archangel Metatron.

Maria : Thank you! Tell me, please, who supervises the Jewish egregor? Yahweh was you too.

Irina : I am also considered the curator of the Jewish religious egregor, but now its curator is the Spirit of Moses himself and, accordingly, Archangel Metatron.

39:05 Do people change as a result of the energetic work of Jesus?

Maria : Thank you! Jesus, please tell me, do you notice that your energy work with earthlings is bearing fruit, do you feel that people are changing?

Irina : Yes, of course, I feel that people are changing, with every decade the flow of the Light of love and acceptance in people is growing. But, of course, there are periods of decreased vibration in one area or another, or in one or another period of time. The

development of civilization proceeds in a spiral; gradually these situations become milder and do not have the same consequences.

Maria : Thank you! I'm very happy.

40:02 What makes Jesus smile and laugh? Raising vibrations.

Maria : Please tell me, what pleases your heart and makes you smile and laugh? When was the last time you laughed? And over what?

Irina : It makes me smile and laugh if that Soul, which was in low vibrations, realized itself as love and did a good deed. I feel it. I, that is, my part, settle in it, and every person who develops love in himself, no matter what egregor he belongs to, is in energetic contact with me. I feel him, I send him my love and support.

It brings me sincere love and laughter when a person does selfless, kind deeds, and it also makes me smile when children play, when a guy gives flowers to a girl, when he fell in love for the first time, when a child rides on a swing, and his mother stands next to him. rejoices for him when two people who have been separated for a long time meet, tears appear in their eyes. Such emotional moments. If we put all this together, then it makes him smile and laugh, and the increase in our vibrations, and our path along the path of love, along the path to him, pleases his heart.

Maria : Thank you! We call this “the ability to be happy for others.”

Vladimir : Thank you very much, Jesus!

42:25 Who was Jesus in the last manvantara? The number of incarnations in the past cycle of development of the Universe.

Vladimir : I have the following question: please tell me, who were you in the last cycle of development of the Universe, in the last manvantara?

Irina : In the last manvantara I went through many incarnations, but I did not have the same experience as in this cycle of the Universe in creating such an egregor through the death of the physical body.

I was the creator of religious confessions, political egregors, I was a simple worker, a researcher. I have gone through one hundred and twenty incarnations.

Vladimir : One hundred and twenty incarnations in the last cycle of development of the Universe?

Irina : Yes.

43:24 How many incarnations did Jesus have, which were the most significant in this cycle of development of the Universe?

Vladimir : I see. Tell me, please, how many incarnations have you had in the material world in this cycle of development of the Universe, and which of them are the most significant?

Irina : In this cycle I had sixty-three incarnations, including this body. I won't come out of it until the end of the cycle of the Universe. I will not leave this body.

Which ones are significant? I was embodied in plasmoid worlds that created groups of galaxies. I was a plasmoid who led the plasmoids that collected matter to create galaxies.

I was incarnated in dense material worlds, including on the planets Shimor, Esler, Sho-Hariki, I was there, if we talk about social significance, a person from the lower strata of society who brought the doctrine of God to these strata. This allowed society to develop in the religion of Light and stop military and criminal actions on this planet, and in the future this allowed it to raise the vibrations of this planet and to give birth to a high-vibration Spirit.

There were also incarnations in other galaxies, including the reptilian

one, this was a long time ago. He incarnated both on Burkhad and on Tumesout, you already know about this.

45:33 Did Jesus incarnate on Earth before he incarnated as Yahweh on Tumesout?

Maria : Here's a very interesting question: please tell me, did you incarnate on Earth before you incarnated in Yahweh on Tumesout? And, if so, who?

Irina : I only incarnated once on Earth. I was looking for an opportunity for incarnation, but I couldn't find anyone, there was no suitable earthly woman for incarnation. But I was in contact with many people through a phantom even before the war with the reptilians.

46:18 Will Jesus still have the same body when the new cycle of the Universe begins?

Vladimir : I see. We understand that you now have an immortal physical body of your choice, but what will happen when this manvantara ends, the dissolved cycle of Mahapralaya or simply pralaya begins, and the entire creation goes into the Spiritual world? In the next manifested cycle, will it then be possible to create a new physical body, or will the materialization of the same physical body occur again?

Irina : When the material world passes into the vibrations of the Spiritual world, all matter will disappear and return to the Spiritual world, naturally, this also applies to the matter of my body, its atoms, molecules, etc. But when the next cycle of the manifested Universe arises in the material plane and my body is created, I will again choose an incarnation that is close in vibration.

Other galaxies will scatter and gather, perhaps not even in the form that will be known to you. These will be completely different forms of matter.

Vladimir : I see. Thank you!

47:53 What did Jesus do when he was in the body of Yahweh?

Vladimir : Tell me, please, what, besides contacts with earthlings, did you do on Tumesout when you were in the body of Yahweh?

Irina : I was then in charge of contacts with earthlings, for a long time I was a ufologist who explored the center of the Galaxy, explored plasmoid civilizations, flew outside the Galaxy, to the N-31 and L-51 galaxies, explored galaxies where there are several hundred terrestrials years according to earthly chronology. I had a wife and children on Tumesout, I passed on my experience, my knowledge to them, and then I flew to Earth. He was at the base, but sometimes left it and moved around the Galaxy.

Vladimir: It's clear, we know that your wife was the Spirit who is now known to us under the name of the Mother of God, the Virgin Mary.

49:18 When the Spirit of Jesus came out of the incarnation of Yahweh, and what was the reason for this. Preparation of the Spirit for incarnation.

Vladimir: Please tell me, at what age and for what reason did you leave the incarnation of Yahweh and in what year? When was this according to earthly chronology?

Irina : I came out of incarnation when I was about 5,300 years old. In what year according to earthly chronology? I came out of incarnation 120 years after King Solomon, the one you all know as Saint Germain, came out of incarnation.

Vladimir : What was the reason for this exit from incarnation? Surely you could continue to live.

Irina : Yes, of course. I could continue to live in the body of a Tumesoutian, but my exit from incarnation was associated with the preparation of my Spirit for incarnation through the body of an earthly woman, and for this I needed contact with her Spirit in the Spiritual

World. We communicated with her, in addition to being husband and wife on Tumesout, but we also communicated with her in the Spiritual World, because she came out of incarnation 200 years earlier than me in earthly reckoning.

Maria : I see.

51:01 Is Jesus still in contact with his descendants on Tumesout? Provenance data system on Tumesout. Children of Jesus Christ.

Maria : Please tell me, do you still have contact with your descendants on Tumesout, with your children, grandchildren, great-grandchildren?

Irina : I do not distinguish them from other creatures on Tumesout and on any other planet, they are my descendants only by the physical structure of DNA. For me, in the first place is the spiritual kinship close to me in the Light of the Heavenly Father.

Maria : Of course, the Spirits of these Tumesouts chose you and your wife, having agreed on this in the Spiritual world.

Irina : Of course, they agreed on this in the Spiritual World, but from this their descendants did not acquire any special advantages over others when they were born from their parents.

Maria : Do they know that your Spirit is their ancestor?

Irina : Anyone can find out about this on Tumesout, since I incarnated there and was one of the rulers for some time. Despite the fact that he was already on Earth, he controlled this planet from a distance in alliance with other Tumesoutians. I am known there, so any Tumesoutian can find out about it in the database, which family he belongs to, and which families came from my seed.

In the Interstellar Union, when the Spirit learns to enter the Spiritual World, then, together with his mentor, through the data system, he can find out the origin of his body. I'm talking about Tumesout now.

Maria : They have a database.

Irina : Yes.

Maria : Pedigree.

Irina : What about your establishments where civil statuses are recorded?

Maria : Thank you!

53:35 About the life of Jesus from the age of 12 until his baptism by John the Baptist.

Maria : Tell me, please, what happened during the period of your earthly life from the age of twelve until the time of baptism by John the Baptist? How old were you when he baptized you?

Irina : Thank you for the question. I was thirty-one years old when I was baptized by John the Baptist. From the age of twelve until baptism, I was with my parents, but sometimes I traveled on Pikran ships to Pikran, Burkhad, to other planets, and also traveled around the Earth in a physical body, I was shown different countries. I met people, communicated with them in the body of an earthling.

Having been born from an earthly woman, in a physical body I realized how many races and nationalities there are, felt their energy, studied the manner of communication and found out with whom I would merge in a single body.

55:08 Apostles, did your parents know about Jesus' communication with aliens?

Maria : Please tell me, did your relatives, students, followers, Apostles know about your half-alien origin, that you communicate with aliens?

Irina : They knew that I communicated with Angels, that I was born of the Holy Spirit.

Maria : I see. They didn't know all the details, but your mother Maria and her husband knew about it.

Irina : They didn’t call it planets, they called it “aliens from the stars,” their level of scientific knowledge was such that they believed it was a Deity.

55:51 Was Jesus on the territory of modern Russia?

Vladimir : You started talking about visiting other countries. Have you been to the territory of modern Russia? If so, in which places exactly, and did you communicate with the peoples who lived here?

Irina : I’ve been to Russia six times, it shows points on the map. This is not exactly Russia, but Ukraine. Somewhere in the Dnieper region, north of Kyiv, on the territory of Crimea. It was not far from the point where the Oka flows into the Volga, it was not far from the territory of modern Arkaim, it was in Altai.

He was taken out of the plate, he could talk, and on the same day he was transported, for example, a hundred kilometers to another settlement. During one visit he could visit different places.

He visited places where the Slavs lived. He shows me tall people with light skin color, blue eyes and most with blond hair, and those with dark hair lived northeast of Moscow.

He was on the shores of the Arctic Ocean, where the ancestors of Asians were. They have yellowish skin color, with narrow eyes.

Maria : Northern peoples.

Irina : And small in stature.

58:21 What languages did Jesus speak when visiting Earth? Translator of earthly languages into Hebrew.

Vladimir : How did you communicate with them, in what languages? Did you know all their languages?

Irina : I had a special device from Burkhad, which translated all earthly languages into Hebrew that I understood, it was tuned to both Hebrew and Pikran language and translated my words into their languages. Kirchiton had such a device for communication.

If, for example, I asked to visit a people somewhere on the territory of modern America, and the device did not contain the language of this people, then first the Burkhadians flew there themselves, there was contact with the contactee, they took data from his memory with a special beam about the meaning of the words, about their sound, phonetics, vocabulary, was put into this device and after checking and adjusting its operation, and this took several weeks in Earth time, because many words could not be matched, after that I could use this translator. Of course, I could communicate telepathically, mentally, through mental contact, but not all people perceive this.

Maria : Thank you! Very interesting.

1:00:07 What was Jesus' communication with earthlings?

Vladimir : What was your communication? Have you taught people anything? What was the point of communication?

Irina : We exchanged experiences. They told me about earthly life, about their gods, about their earthly worries, family troubles, and illnesses. And I told them that there is Light in their hearts, so that they love each other, fulfill those commandments of their gods that lead to the Light.

1:00:46 Travels of Jesus to India. Buddhism.

Maria : We are very interested in your travels to India. What were you doing there? How often have you been there?

Irina : I've been to India three times. The last time I lived there was about two months. I was fifteen years old then. I communicated with representatives of traditions, then there were Buddhist religious egregors.

On one of the days of my stay in India, I lived with an Indian family, whose members were contacts with Burkhad.

Once, when the saucer arrived, I visited Buddhist religious monasteries in Ladakh and lived there for several days. I walked through the highlands and visited a mountain lake. They showed me their ancient books, I treated their sick, taught them how to heal, passed on my experience, told them that I had come from the stars. They still perceived it as the incarnation of God, they called it the Supreme Spirit. They also called me the word "tau", it's like a stubborn Spirit.

I lived in India for about two months and there I met with representatives of various castes, with high Brahmans, with lower castes. Moreover, I could not explain to them that they are equal. They pretended to believe me, but in my Soul I saw that this teaching was incomprehensible to them, and the majority of them rejected it. Mainly not because of the division of the upper castes, but because of the fear that they will not be accepted, rejected by other representatives of their people. I showed them that it was written in their religious books.

1:04:02 Who is buried in India in a grave with the inscription "Jesus of Nazareth"?

Maria : Thank you. Please tell me, who is buried in the grave with the inscription "Jesus of Nazareth" in the city of Srinagar in the state of Kashmir?

Irina : He shows me a man without a beard, quite young in appearance. Yusipius, he belonged to the Islamic egregor. There was a second man there, who, like a scientist with a telescope, looks into the sky.

Maria : Did he identify with you? Why is the name "Jesus of Nazareth" on his tomb?

Irina : Perhaps the name was similar, and since he was a religious man, he recalled my deeds, which all Indians in Kashmir had long known about from their Saint Thomas. But this person who ended up in the colony could have been much later, for example in the twelfth century. The second was even later, around the fourteenth century.

Vladimir : I see. Jesus, please tell me more, I wanted to clarify more about travel...

Irina : It was Islam, not a Christian egregor. This man was of a fairly high spiritual level and after death went to the 23rd spiritual level, and the servants of England of this level are all perceived as Light, perhaps that is why, based on the similarity of the name, they decided that this was my grave.

I know that there are seven graves on Earth that are called the graves of Christ. Some of them are in Jerusalem, some in Judea, one in Japan, and even in Turkey. In all these cases, people were buried there who were righteous, who were one Spirit with me, either by similarity of names, or by my contactees. They did not all belong to the Christian religious egregor. This is what happened in the case of Yusipius.

1:07:07 Jesus' visit to Japan.

Vladimir : We have a question from subscribers: have you been to Japan?

Irina : Yes, of course, more than once. I've been there three times, but I haven't lived. I visited a temple that was in a religion similar to

Shintoism, but older, it was its predecessor.

1:07:35 What countries on Earth did Jesus visit?

Maria : Which countries have you been to on our planet?

Irina : Almost all of them: Central America, Australia, I was even at an alien base in Antarctica and at the Tashigan base. I was interested in the Earth, and one of my first desires was to visit the North and South Poles. And they took me there.

Vladimir : I see. Now we will return a little to our questions and ask a couple of questions related to the crucifixion.

1:08:21 The age of Jesus Christ at the time of crucifixion. Feelings and thoughts of Jesus during execution.

Vladimir : Please tell me, how old were you at the time of the crucifixion?

Irina : Thirty-four.

Vladimir : Did you feel physical pain from your wounds and mental pain because of people's actions?

Irina : I incarnated in a physical body. Of course, I had all the receptors. I did not stop any sensations from my receptors, because only the full experience of those states could fully include me in all earthly egregors and in plasmoid civilizations of the earthly type, which greatly influence religious egregors and in general the lives of people.

Energetically, I had to remain in this body without reducing the intensity of sensations. Otherwise, I wouldn't have succeeded energetically. I had to go through this not as the Firstborn Son of God, who is one with the Father, but as an ordinary person of flesh and blood, without turning off sensations.

As for the physical sensations, what they were like. I remember well. It was physical pain from beating and execution, but mental pain exceeded physical pain, but not from resentment, anger, but from regret for those people who did this to me, since I saw their future, in what worlds they would incarnate after leaving the level to which they descend and what they have to endure.

Looking at each soldier, I saw his essence, his Spirit, I saw everything in an instant: the multiplicity of events, what would happen to them ten years after this execution, what they would die from. I even saw their children, mothers, what they do. It was unfortunate that many of them would go through a period of realizing what they had done and how difficult it would be for them.

But most of my heart was next to my mother, who almost the entire time while I was being led to Calvary, walked next to me and saw everything. I asked her to leave and not look, but she didn't leave. I was with her, she was on the verge of fainting, I held her consciousness so that she would not have irreversible changes, because the state of the Spirit affects the brain.

1:12:31 About possible options for the ending of Christ's life.

Vladimir : I see. Tell me, please, could there have been a different outcome? Was this the original plan for life with such an ending, with crucifixion, or could there have been another option, when the Jews would have accepted you as a mission, everything would have been different?

Irina : Before the incarnation, there were different options, including without executing my body, but there was no option with unconditional acceptance of what I said, for many Jewish reasons.

The religious Jewish egregor and the changes that were made to it, including in religious scriptures, were invisible at first glance, but they clearly oriented some of the Jewish priests only towards the external performance of ritual actions, while internally worshiping low-vibration states.

And when I was in Absolute Love, including towards my enemies, this was incomprehensible to precisely the majority of the people who at that moment were in physical enslavement by the Jews. I understood this perfectly well and deliberately chose such a period in the history of incarnation, and my mother knew about this, in order for them to realize the importance of love for everyone, including enemies, exactly such conditions are needed. But the percentage that my body would be executed in this way, I knew very well before the incarnation, exceeds 85%.

Vladimir : I see.

1:15:09 The meaning of the sponge soaked in bile, which was brought to the spear of the crucified Jesus. The meaning of the phrase "Took the sins upon himself."

Vladimir : Please tell me, was there any mystical meaning in the cup of bile that was brought to you, did you agree and drink it?

Irina : They brought me a sponge pinned to a spear.

Vladimir : Yes, a sponge, I apologize. We are talking about a sponge. I meant a sponge soaked in bile. Was there some mystical meaning to this?

Irina : The fact is that the substance with which such sponges were impregnated consisted of potassium chloride and liquid, they were soaked not just in herbs that have an analgesic antiseptic effect, but at the same time foxglove was added there, which contains a substance that inhibits the physical effect.

I, of course, knew all this because I learned it from the priests. Knew how the execution was carried out. It was in such a dosage that it did not kill immediately, but made death faster than without this substance, and at the same time it was a state of oblivion. The point was not to feel the main pain from dislocated arms while raising the cross. And so the heart pain is suppressed by shortness of breath, and the more you try to pull yourself up and inhale, the greater the pain. Accordingly, in

order to relieve these sensations, such a liquid was given to those executed.

Why was it given? The soldiers, officers, and commanders of their troops were not deprived of mercy, and this was done by direct order of the ruler, so that a person, having received a share of his suffering, would quickly go to the world of Spirits. Why in wine and not in water? Because in combination with alcohol and other substances contained in wine, these substances from herbs were more quickly absorbed by humans.

When they say that I took my sins upon myself, this means that I sacrificed my earthly life in order to, having been resurrected, find it again after death and process low-vibration states. It's called "took away your sins."

Sins are low-vibration energy states of the mental, astral and etheric bodies, and physical actions are only the consequences of this state. Here, regardless of the sponge, the spear, whether more or less of these substances were added to me, the decision was made. I also want to say that those Spirits who participated in this execution and who made the decision at the trial, including Pontius Pilate, they learned about this when they passed into the Spiritual world.

1:21:00 The meaning of the last phrase of Jesus Christ. Mother of Jesus.

Vladimir : I see, I have one last question about this difficult moment: what did the words mean immediately before leaving for the Spiritual world, when you cried out about what the Almighty had abandoned. Why did you, I interpret, not quote, say: “God, forsaken me?”

Irina : The fact is that it is almost impossible to cry out in the position in which I was, but what I was able to croak through my teeth was something like: “The Lord Father left his mercy, allowed them to escape from love.”

The last straw that allowed me to say this, expressing feelings,

sensations, impressions, was when I opened my eye slightly and saw the crowd standing, and my mother coming to touch my feet, respectively, my boots, some soldier roughly pushes her , she is trying to crawl, and I focused on her hands. There they shouted to her: “Where are you going?” The second soldier came up and tried to pull her away by the legs, but she was clinging to the stones, and her hands were bleeding. When I saw this and compared that my hands were covered in blood, I had such a feeling addressed to this crowd that they weren’t even letting my mother in at that moment, she couldn’t remove my body.

Vladimir : I thank you, Jesus, for these difficult answers even for a contactee, I see it all.

Irina : These convey images, and in sensations too, this is mental contact.

1:23:34 The attitude of Jesus towards Judas Iscariot. Suicide of Judas.

Maria : Please tell me, what is your personal attitude towards Judas Iscariot?

Irina : Very warm attitude. He went through a long path of repentance in his three lives after leaving that incarnation, where he became a traitor to me as his teacher. He tells me that he did it out of motives, but contributed to this execution, I later explained everything to him. He could not forgive himself, and thought that I could not forgive him, thereby lowering his vibrations and, unfortunately, committed suicide. In the Spiritual World, I then went down to him and talked to him. If we translate our subjective time into earthly time and do it in an adequate, correct way, we spoke for about a day.

Maria : Thank you!

1:25:03 The path of Pontius Pilate in the Spiritual world. Where is Pontius Pilate now?

Vladimir : Thank you! Tell me, please, do you know anything about the path in the Spiritual World of Pontius Pilate? This is a common question from our subscribers.

Irina : Yes, I know. I also came to him in the Spiritual world. He left after disincarnation to the eighth level. I went down to him, we talked about everything, especially about the day when I was brought to him. He admitted that he wanted to let me go, but complaints about him to the emperor stopped him, he asked me for forgiveness. Looking into my eyes, he said that he realized that I was God, and when he sent me to execution, he expected every minute that I would punish him.

Vladimir : Where is the Spirit of Pontius Pilate now?

Irina : He is now in embodiment, nearby, not so far from the island on Burkhad. He is embodied in a woman. Shows the girl.

Vladimir : So he is embodied in a female body on Burkhad?

Irina : Yes. About a hundred and fifty kilometers from my island there is a city on the shore of a lake, and she is there.

Vladimir : Did she come to your island? Have you met physically?

Irina : No, she didn't physically come to me. We only met her in the Astral Plane, perhaps she will come soon. According to earthly chronology, she is approximately 82 years old.

1:27:13 Did the Souls in the Spiritual World agree on such an ending to the life of Jesus? Plan without execution.

Mary : Jesus, please tell me, did your Spirits: yours, Pontius Pilate and Judas Iscariot agree on such a scenario back in the Spiritual world?

Irina : Exactly about this - no, there was no such ending. But at the level of the Angels, this was not just a scenario, but one of the possible

plans.

In order for a plan to be considered without executing my body, with an increase in vibrations, it was necessary to spread a new faith and new laws in almost all religions, to the entire population, to stop wars in order to enter the Interstellar Union. But two thousand years ago this was even more impossible than it is now.

Maria : Thank you!

1:28:19 The coming to Earth of the eighth avatar to increase people's awareness. The incarnation of the Archangel on Earth.

Vladimir : Jesus, it is said about the eighth avatar, who must come to Earth with his divine army. Before this, seven other avatars are listed there in the form of different animals and people. Did you mean you as this eighth avatar or was it someone else?

Irina : I also heard about ten avatars. What was meant there was one of the Archangels who would incarnate on Earth in the period before it entered the Interstellar Union in order to help not through military action with people, but by increasing vibrations through awareness throughout the entire Earth. Accordingly, I see a variety of events, and this will be one of them.

Vladimir : I see. Thanks a lot! Masha, give me the twentieth question.

1:29:36 About living spiritual levels by Jesus Christ. Lowering the vibration of Jesus will entail separation from the unity of the Father.

Maria : Tell me, please, have you experienced existence on all twenty-four levels, including the lower ones, in any cycle of the Universe?

Irina : I have never dropped below twenty-four, it’s impossible. To do this you need to stop loving.

Maria: Thank you!

Vladimir : And there is no potential for your vibrations to fall below this level? So this is basically impossible?

Irina : Potential opportunity exists in my freedom of choice. But I, freely using my choice, will never perform a conscious, even mental action that lowers my vibrations, because then I will have to part with unity with the Father.

1:30:35 Was Krishna the mentor of Jesus? The constant raising of vibrations by Jesus. Eucharist. Erasing information about the death of the physical body of Christ.

Vladimir : I see. Thank you. Please tell me, is it true that in your incarnation on Earth, precisely when the crucifixion took place, one of your spiritual mentors was the coordinator of the Galaxy, known to us under the name Krishna, and whether he was really one of those who dissuaded you after crucifixion from resurrection in the Spiritual world and eternal life in your physical body?

Irina : I understand what we're talking about. When I incarnated on Earth, I had several Spirits, they are called mentors, from those who are known in the Spiritual world as Angels, and when I came to Earth, if you look at me as a physical person, I was a contactee in the Spiritual world. Indeed, Krishna was not incarnate at that time, he was in the Spiritual world, coming to me. He is formally considered my mentor. Accordingly, from these positions he came to me as a spiritual curator.

After I was executed, and my body was pulled out of the cave and transported to the base on Burkhad's ship, and they began to restore it using the technologies of the Interstellar Union, I was next to the body, and my mentors, including Krishna, came. I saw that the thread of life was broken, and I began to direct energy into every cell of my body so that the thread of DNA vibration would connect with the body forever. Krishna asked what I was doing. He said he didn't understand why I was doing this. "You want to return to the body and erase information about death. What's the goal? I mentally answered him: "To raise the

vibrations of earthlings while in this body." And he asked: "How?" I answered him: "By an energetic process, through the Eucharist, through certain actions, through an egregor."

I explain all this for a long time, but mentally you convey it much faster. He was amazed. I felt his surprise. He said: "This means that the suffering that was here for several hours, about a day: while the execution took place, before the execution you were punished, these blows will continue in the energetic sense now until the Earth in your absolute Divinity passes practically to your level of vibration, because that if they are lower, they will be perceived by you as energetic poison. And the lower these vibrations, the more sensitive they will be for you."

This is not pain on the physical body. When something appears before your inner gaze, something that causes you not only disgust, but a desire to get away from it, but at the same time you understand that this is impossible. It's just intense. A sensation arises before the inner gaze, as during the Eucharist. Almost around the clock, constantly, and in order for me to send them purer vibrations, purer energy, I need to raise my vibrations to the level at which almost no one in the physical body can be in the surrounding space, because the level of these vibrations It will not be something that is unbearable, it will be unpleasant for the being who was in the physical body.

1:35:15 Krishna and Jesus: teacher-mentor. Who is Krishna's mentor?

Vladimir : I see. Readers are very interested: how does it relate to the fact that Krishna was a spiritual mentor, and the Original Spirit, who was born before everyone, separated from the Supreme, is you? We are accustomed to the fact that a mentor is someone who is wiser, conventionally, higher in the hierarchy than the one he mentors.

Irina : For you this will be the twenty-fourth level, above it the number goes to infinity, and we perceive the word "mentor" as an assistant. He can correspond to a level lower than the one he is mentoring, and he is mentoring one who is higher in spiritual level to further raise that level and raise that lower Spirit to its vibrations.

Vladimir : And the last, clarifying question on this topic: what is your relationship with Krishna now, and who is his mentor?

Irina : He has many spiritual mentors. Now I am his spiritual mentor, and he is, in a sense, me. He and I are friends, we have a very warm relationship with each other, despite the fact that he is not incarnate. We often see each other on a spiritual level, he often comes to me in the astral body, in the spiritual Light. He has many spiritual mentors, in particular, for example, Archangel Michael and my mother.

Vladimir : Thank you. All clear. Thank you.

1:37:15 How can people help Jesus? A commandment that will lead people to Jesus and the Father of all things.

Maria : Please tell me, is it difficult for you to stay in your physical body forever? And can we, the people for whose sake you took it all upon yourself, somehow help you?

Irina : My dear soul, I knew well what I was getting into. For me it's not that it's hard, for me the whole severity of my energy states of those lowered vibrations that I receive from people is interrupted by the joy of turning to the Light of one Soul. I feel that now Souls in whom Light are talking to me, and I will rejoice for everyone who will help me continue to carry this Light.

And everyone can help me only by becoming like me and treating others the way they want others to treat them. This commandment will lead to me and to my Father, because we are all one in His Light.

1:38:45 Can followers of other religions enter the Kingdom of Heaven? Unconditional love.

Vladimir : Thank you, Jesus. We now have the penultimate question, it is very important, it was also asked very often: please tell me for what reason it is written in the Gospel that only you are the way to the Father, True Life. But what about non-Christian religions? Can non-

Christians then get to the highest angelic levels after leaving incarnation if they don't know about you or believe in other manifestations of divinity?

Irina : The words: "I am the way and the life, and no one comes to the Father except through me," I came up with myself. I'll tell you what I meant. I recognize myself as the Father, one with Him, and at the same time I recognize myself as a bridge between Him and the rest of the Spirits. Since my essence is love, when I say "I am the truth and the life," I meant the manifestation of love. That is, selfless love, unconditional, which exists in every person, no matter what nationality, religion, faith and other material and spiritual qualities of a person he is, he becomes, as I already said, one with me. This does not depend on egregors, but on the purity of his heart.

Only those who are pure in heart can love God and let me into this heart, not because I have an aversion to dirty hearts. If I had disgusted your sins, I would never have incarnated with you. I treat you with great love, but when I said that no one comes to the Father as through me, I meant my essence of love. No one comes to the Father except through love.

Maria : Thank you!

Vladimir: Thank you!

Irina : Non-Christians, of course, can reach the highest spiritual levels if they develop unconditional love in themselves, including for their neighbors, for themselves and for God in the understanding that their religion taught them.

Maria : Thank you!

1:41:33 Who would Jesus be incarnated on Earth now? Parents and children are each other's spiritual teachers. The important mission of motherhood.

Maria : Please tell me, what kind of life would you choose on Earth

now if you had the opportunity to incarnate or live among us?

Irina : I would choose life in a female body and allow many children to incarnate through me. And at the moment when my body would no longer be able to give birth to children, I would take children from children's institutions who are left without parents and raise them in the spirit of Light, and then treat and teach people. This is the most noble mission currently on Earth - to adapt Souls who came from the Spiritual World to live on Earth.

The child who was born is that unfamiliar Spirit to the embodied part of your Spirit, whom you do not consciously remember, but perhaps you met with him, and very close to you in energy, in blood, who took a piece of your energies, the energy of your ancestral egregor. At the same time it is someone else's, unfamiliar and one's own.

The relationship between mother and child, father and child - these are such close feelings, but traditionally in earthly society such feelings are felt more by a woman who consciously relates to the birth of children, to breastfeeding - all this is a transfer of energies.

Maria : Thank you!

Irina : He tells me that the transfer of energies and your Light during birth, feeding, caring for a child, talking with him is such a great mission of transmitting Light!

I want to remind you that every mother and father are naturally spiritual leaders for their children, even if they came from higher levels, in order to adapt to the conditions of the earthly world, they need teachers.

Therefore, in the East there is a traditional attitude towards parents as a spiritual teacher. And, accordingly, every spiritual teacher, including parents, must remember that in order to transfer a spark of Light to your students, you must absorb a whole sea of it.

Maria : I agree with you. In fact, this is a very important mission; as a mother, I completely share these feelings with you. I want to tell you

that in fact, not only parents are teachers for their children, but children are even greater teachers for their parents.

Irina : Yes, that's why I say that mentoring in the spiritual sense is twofold: the teacher for this in one, and that teacher for the student in another.

Vladimir : We thank you with all our hearts, Jesus, for answering all our questions. We answered all the questions we planned to ask. We look forward to our further meetings, because there are a lot of questions. Now we want to ask you to convey to us everything that you yourself wish.

1:46:12 Wishes of Jesus Christ to earthlings. The role of the Cassiopeia project in the growth of vibrations on Earth.

Irina : Vladimir, I thank you personally for the fact that you selflessly stood up to defend the truth and the truth that you yourself felt.

I thank you, Mary, for shining with such a bright Light, carry it further.

I thank Irina for transmitting information in the volume and form that I desired.

I thank MidgasKaus, Irina's curator, who prepared her for such contact.

I thank all the representatives: Archangel Gabriel, as well as Mirah Count for helping to avoid the energy state of Irina the contactee.

I appeal to each of you, my dear Souls, who are watching this video now. Let each of you listen to your heart, the voice of your intuition, the voice of your conscience. The answer that we raised, I am now telling contactees, and, accordingly, talking to you. Whatever answer you get, whatever it is, follow it because it is your experience. This is the first one.

The second thing I would like to wish you. I want to wish you to learn not only to pray and fast, but also to hear the answer to your prayers.

I would like you to learn to hope for God's help, so that you learn to believe, so that you learn selfless love, unconditional love, selflessness and purity.

In fact, life on the angelic levels is beautiful in its purity, Light and significance. Here you will never be left without the meaning of life.

Here the highest meaning of life is in the knowledge of absolute perfection in the infinite wisdom of God. I call you to this level, follow the path that I gave in the Gospel, which was given by any spiritual teacher in any religious tradition on Earth.

Don't look at people's religious and national differences. These differences in religion and nationality are given only as an opportunity to more quickly learn selfless love.

I thank you, dear TV viewers of this well-known and beloved project “Cassiopeia”. I am watching his development.

Of course, I agree to a new meeting, I will be very interested in your questions. I thank everyone who put a piece of their Light into this project.

I thank every volunteer. I know who can hear me.

I thank the creators of the project, Maxim and Mead, and Kirchiton, and those entities who participated in all worlds and spaces.

I can already see that this project will lead to a very large increase in vibrations throughout the entire Earth and a sharp increase in the likelihood of joining the Interstellar Union in the next two hundred years.

See you again!

Maria : Thank you! See you again!

Vladimir : I want to thank on my own behalf, all our viewers, listeners who sent us a huge number of questions. We will do our best to ensure that all the best questions are asked in future conversations. Thank you everybody!

Thank you, Irina! Thank you, Masha! Once again our respect and reverence to Jesus. See you again! All the best!

Irina : See you again! All the best!

April 3, 2021

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Jesus Christ is the head of the Christian religious egregor on Earth, the Firstborn Son of God, our elder Brother;

Mirakh Count is a representative of the planet Burhad, who is known in the Christian religious egregor as the Archangel Gabriel;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

Vladimir Goldstein - administrator of the Cassiopeia group;

Maria Sokalskaya is the administrator of the Cassiopeia project.

#261 Second meeting with the phantom of Jesus Christ. Answers to subscribers' questions.

https://blog.cassiopeia.center/vtoraya-vstrecha-s-fantomom-iisusa-hrista
https://www.youtube.com/watch?v=XZ62Prh43pg

00:02 Introduction of meeting participants.

Irina : Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today we have the second part of the most important conference with the phantom of Jesus Christ. Our curators are present: LiShioni from the planet Shimor, MidgasKaus from the planet Esler and representatives of Burkhad: Mirakh Kaunt, who is known as Archangel Gabriel, and the phantom of Christ, he is already in a slightly different form. Now we were talking to him. He said that last time the phantom's energy was 17% of his astral body, now it's about 11%, that is, he decided to slightly reduce the energy because he believes that this also affected the quality of the recording.

And today he is asked questions by Vladimir Goldstein and Maria Sokalskaya, administrators and employees of our Cassiopeia project, who were there last time.

Hello, dear friends!

Maria : Hello, dear friends!

Vladimir : Hello, we are glad to see everyone and really hope that today our very important meeting will also be interesting.

Maria : Dear Jesus, information from the Interstellar Union that you are not only an eternal Spirit, but also are in an eternal body, is the most important news for the inhabitants of our planet and, of course, a sensation. This fact raised a lot of questions from our readers.

Please allow us to ask a couple of questions about the life of your physical body. Is this possible?

Irina : Okay, ask. He says he welcomes everyone.

02:00 How the life of Jesus was arranged.

Maria : We welcome you too. Tell me, please, how is your life arranged? Does anyone help you with housework, other than robots, if your vibration level is so high that not everyone can be near you?

Irina : I live on the island, physically one of the living intelligent beings. Once every one and a half to two months, sometimes less often for a few hours, students come to me, fly in or sail by sea. The rest of the time I am alone.

Next to me there are 8 biorobots that help me with everyday matters.

Only now, when I travel around the Galaxy on a separate ship, as representatives of the Interstellar Union have already said, there are also biorobots next to me.

Maria : Thank you.

03:15 Jesus' favorite food is animal food. The eternal physical body of Jesus.

Vladimir : Thank you very much. My next question is somewhat related to the first: please tell me what is your favorite food on Burkhad, and what did you like to eat on Earth? Well, in addition to

this, do you have additional Tumesout genes that allow you to digest animal protein, and do you eat animal foods?

Irina : I inherited the Tumesout genes through the body of my mother on Earth, who, naturally, had them in her family.

After the resurrection of my body and the destruction of the death and aging program, these genes remained active, since they did not include the death and aging program. These are genes that encode certain substances for processing material food.

I did not have a particular preference in food, because everything that God gave me through people in childhood, adolescence and adulthood, I consumed with the same sense of gratitude, felt strength and rejoiced at it. There were no particular preferences.

Now I live on the planet Burhad, and my favorite food is the milk of a local animal, and for some reason it is mixed with pollen from flowers. This allows you to maintain energy balance.

I can eat more fruit. I can eat meat, but I do it quite rarely for the simple reason that my body has enough elements contained in the pollen of local flowers. I eat meat together with students who invite me to eat with them.

Now he travels around the Galaxy, and if they give it to him there, he can eat it. But when he is on Burkhad, his main food is dairy products mixed with pollen and fruits.

Vladimir : And what exactly is the meat food on Burkhad, because, as I understand it, the Burkhadians themselves don’t eat it at all, because they don’t have these genes?

Irina : Yes, but aliens from other planets can fly to them. After all, Burkhad is part of the Interstellar Union, and those who eat it can bring other food with them. And they can also fly to my island.

Vladimir : So it could be the meat of some animals from other planets?

Irina : Can be meat from animals, fish, birds or sea animals, etc. These could be insects from those planets where they feed. There are insects of quite large species on other planets, which replace animals for some races.

Vladimir : I see. Thanks a lot!

07:20 Limitations for Jesus. Abilities of levitation, teleportation.

Maria : Please tell me, are there any restrictions for you in this immortal body, established by God, the laws of the universe, or perhaps by yourself? And what qualities or abilities are there that, say, earthlings do not have?

Irina : Restrictions. What do you call restrictions? For example?

Maria : For example, levitation.

Irina : Do you mean by “restrictions” - a violation of physical laws known to earthlings?

Maria : Yes.

Irina : My physical body is not subject to such restrictions, because it can control the energy of its body and the surrounding part of space and time to an unlimited extent, or rather, limited by my Father. And since we are one whole, it means that it is limited by myself.

Maria : So this means that you have the ability to levitate, you can fly through the air, move objects?

Irina : Yes, he is now showing me that he can disappear in one place

and appear in another.

Vladimir : Teleportation.

Irina : He shows me that he can transform one type of matter into another, make one from another.

Maria : Move in a physical body?

Irina : Yes.

Maria : Disappear and appear somewhere else?

Irina : Yes, he can. I perceive my body as one of the types of energy, and I can transfer this energy into another form of instantly moving radiation invisible to the eye and then collect it in another place, even at the other end of the Galaxy.

Vladimir : So you can, if you wish, without any ship, simply appear in a physical body on Earth?

Irina : Without a ship - yes, but when I travel on a ship and with biorobots, it shows that I behave like an ordinary humanoid.

09:53 What Jesus' teleportation looks like.

Vladimir : Let's imagine that you decided to appear on Earth, and what would it look like? Let’s say, people are standing, and suddenly in the middle of the lawn, so to speak, a figure appears, this is a physical body. Is this what it would look like? Or some other effect when it appears?

Irina : Before I appear in a specific place on Earth, before dissolving, before transitioning into the form of radiation of my physical body, I must clearly imagine the place and time where I must move, because if

I imagine only the place, I will not do it in time, then my body could, for example, be damaged if a car was driving there, and I could simply merge with a person, and he would be thrown to the side, because a certain energy is released there. And, especially, as you said, in the middle of the lawn, where there are people.

I need to clearly know this place and space, imagine it, and only after imagining this place can I transfer my body into radiation and with a mental order move it to this place.

How will it look from the outside? He shows me the air, and then there is a flash of yellow-white color, and a man appears in this place. What does this flash consist of? It was the surrounding atoms that released photons from that energy when they collided with the energy of my body, which was scattered in the form of radiation.

Vladimir : I see. Thanks a lot.

Maria : Does this mean that you can do without air, under water or in outer space?

Irina : If necessary, I can stop the vital processes in my body for a really long period of time, but not for infinity, and this will require a waste of my energy.

12:41 Levitation in the life of Jesus. Walking on water. Apostle Peter.

Vladimir : Tell me, do you use your levitation capabilities in the conditions of Burkhad? Can you sometimes just fly over your island, fly from the island to some city and back in your physical body?

Irina : Purely theoretically, I can do this, but since overcoming the gravity of Burkhad and any other planet requires a certain amount of my energy, which can be spent on a completely different matter, for example, on changing the vibrations of earthlings, then I am usually content with flying in the astral plane, then this is quite enough for me.

Vladimir : I have one last question on this topic. What does an earthling need to levitate, at least to some extent? Just unconditional faith in it, complete faith, or something else?

Irina : Levitation is for people the direction of their strength to suppress the Earth's gravity. Gravity attracts the physical body with a certain force, and the vital force of a person, which is released by him every second of time, is stronger than the force with which the Earth attracts his body.

I want to especially emphasize: it does not surpass all of the Earth's gravity, but precisely that part of the gravity that attracts his body. And in order for this superiority of your life force to lift you above the Earth, you only need to direct it. To do this, you need to visualize how your life force pushes you away from the Earth. For this visualization to work, you need to imagine it, and doubts that the result will be achieved dispel your life force in space and do not allow it to push you away from the Earth, that is, to shield you, your body from gravity.

So faith is such a force that helps you visualize and fulfill your intentions in any space and time.

Vladimir : Thank you very much! Still, I'll clarify one more thing: the Apostle Peter did not visualize anything, it turns out that only faith was enough for him to walk on the water until he doubted, or did he visualize there too?

Irina : Smiling. He shows me as if he was there now. Now I will translate it into words. He shows me quickly. I'm still in my physical body, so I need to translate these mental images you send me into words.

In the evening, after talking with people, we parted with my students. They went on a boat to fish: they also had fishing at night. And they wanted to land on the other side of the lake in the morning. And I decided to stay alone in order to meet with the captain of the Burkhad ship. And Mirakh Count was there too.

Naturally, I told them that I wanted to be left alone, since at that point in time they were not psychologically ready for contacts. He said that I wanted to stay alone and pray to the Father.

They sailed away and I actually prayed to the Father, then the ship came down, we had contact for about two hours. I was moved to Burkhad, there I talked with one of the contact specialists of the commission, and then I was returned to Earth, and with my ray of the mental mental field, which I isolated from my aura, I found the place where my students were. Like a radar, it shows me now. Radar is a reflection of this ability (Mirah Count just suggested it).

I mentally calculated the point where my students were and saw that while I was gone, the wind had risen and large waves had arisen. And I went to the boat by sea. Why didn't I fly? I didn’t want to just waste my energy, because in order to walk, you need to suppress gravity less. I was wearing white clothes.

As you understand, when the wind rises and a thunderstorm begins, practically nothing is visible: no stars, no moon, no lanterns in the sea either, so the students saw me in another flash of lightning when I came quite close, about ten meters.

One of them, I think I heard Jacob’s voice, shouted that a ghost was coming. Why did they say that? They called a type of plasmoid a ghost. Why did he shout that particular thing? Because for them it was an unusual and possibly dangerous phenomenon, since one could expect anything from some Nature Spirits, especially in the middle of the sea in a storm.

Hastening to calm them down, I said: “Be cheerful and brave, it’s me, don’t be afraid of anything.” After this, I heard short negotiations, from which I sensed distrust and interest. And the Apostle Peter, calling me a teacher, said: “If it is you, order me to come to you on the water.”

I scanned his mental field and saw that if I told him: “Go,” he would also imagine how he would do it, visualize it, and he would release energy sufficient to take several steps. At this time I was already about five meters away. I told him: “Go,” and I controlled his mental,

psychological state.

What happened when he went? When he got up, I watched him. When I told him: “Go,” he completely believed that this was possible, because he knew that I was God and could not tell a lie. And when he did this, his energy, his life force, went down through the first energy center, through his legs, and formed enough strength, protection so that he could stand on the water. And when he stood on it, he really had no doubts.

He went, at first he saw only me. When he walked about three meters, at first he had such a consciousness that he did not hear the sound of the waves, and then he heard, looked and saw that he was standing on the water without any support to which he was accustomed, and the instinct of self-preservation told him that he was in danger. He couldn't switch from that instinct to the fact that he had done it.

That is, instinct temporarily displaced from him for a few seconds the memory that he himself did it. Frightened, because fear is a loss of faith, he dissipated the energy that was holding him and began to drown. He didn't reach me about two meters. I approached him and asked why he doubted.

After I got into the boat, and they all questioned me in surprise, I told them the law of faith and about the power of the Earth, which you can so suppress with your strength, and during these conversations they did not even notice how we sailed to the other shore. For them, this time passed unnoticed.

Vladimir : Thank you very much! I think this will be a very interesting detailed answer for all our viewers.

Irina : I just went on a boat ride with them.

25:39 About contactless conception. Krishna's parents, conception and birth. Hercules. Zeus.

Vladimir : We didn’t even count on it, but here it was told in detail how

one of the greatest miracles, the brightest described in the Gospel, took place.

And I immediately want to move on to the next question about the miracle. Your mother Maria told us about your contactless conception on the Burkhada ship. It was not just, as we would now call artificial insemination, in vitro, but contactless conception using a special device.

Is the same conception possible on Earth, not on a ship? Were there other cases when the same situation occurred in relation to other earthlings, and is this possible in our time?

Irina : The technique of introducing genetic information through a beam was quite common at that time and even earlier. For example, some children of Burkhadians, as well as earthlings who were 7,000 years ago, were born in the same way. In the same way, for example, Krishna, who was a Shimorian, and some descendants of the Tumesoutians were born. Fertilization itself through the beam was quite common at that time.

Now this technique has remained in the science of the Interstellar Union, but according to the modern law of the Interstellar Union, such crossings of humans and aliens for life on Earth, as was previously the case, are prohibited due to the fact that this will provide evidence of contacts and everything that may happen after.

At that time, representatives of the Interstellar Union were mistaken for Gods, now the consciousness is more materialistic, this will be perceived differently, so there will be other consequences.

Vladimir : Thank you very much! Did I understand correctly from the answer that Krishna was conceived in this way through a ray, and there was no physical relationship between the representative of the planet Shimor and his earthly mother?

Irina : The earthly mother Krishna had her own husband on Earth, she was faithful to him. Representative Shimora, who was Krishna's father,

simply gave the genetic material. He also had a wife on Earth.

The fact is that Spirits from the level of the Higher Angels, no matter what planet they are incarnated on, have a completely different attitude towards, you call it fidelity, but this is a connection with one energy, let's say so, so they have fine tuning through body for one energy. And a connection with another energy, be it from another planet or with one's own, can lead to dissonance of their energy centers and then to an inharmonious connection with the previous physical energy.

Why do they, and especially the aliens, feel this? Because their sensitivity to energy influences develops from childhood.

If an alien decided to enter into physical contact with a representative of the Earth, then most often these were precisely those aliens who did not have a relationship on their planets, and if their contactees did not have a relationship with a loved one.

Vladimir : That is, Krishna's mother had a relationship, there was love.

Irina : She also had children.

Vladimir : I wanted to ask, was there love with a representative from the planet Shimor, but there was no physical intimacy? So?

Irina : But they loved each other like spiritual brother and sister.

Vladimir : And where was this process carried out in order for Krishna to be born? Was she taken on the ship too?

Irina : They had been in contact on the ship for ten years before.

Vladimir : I see. I would like to clarify once again, were there any other cases in the history of the Earth that happened like this, besides you, are there any names known to us? When did such contactless conception happen?

Irina : Krishna was conceived. Hercules was conceived by the head of the Burkhad base on Earth. Legally, he already lived on Futissa, genetically he was a representative of the planet Burkhad.

Vladimir : Is this the one we know under the name of Zeus or not?

Irina : Yes. But for this he used the same method for his contactee and for placing genetic material into an earthly woman. He did not come into physical contact with her; he had a relationship in Burkhad.

32:34 Conception of Confucius. The history of contactless conceptions on Earth and other planets. Reasons for hybridization. Zeus.

Vladimir : I see. And regarding Confucius, please clarify how it was?

Irina : This is already the planet Disaru. Indeed, I know that there were several more such cases. In fact, there were several hundred of them; if you look at the entire period, before the war it was even more common. But if we take 12,000 years, then there will definitely be 200–300 cases. He can't list them all because he simply can't cover all of those studies.

Vladimir : Clear, we still have many questions.

Irina : He heard about Krishna, because this is a Spirit well known to him, they were each other’s mentors, and about Hercules and his father only that he is a representative of the planet Burkhad, and where he lives, they talk about it.

Vladimir : We know about Zeus that it was a representative of the planet Burkhad, who was already in a colony called Futissa. And from there he flew.

Okay, thank you very much, very interesting.

Irina : If you look at our annals, the chronicles of the planet Burkhad and the Interstellar Union, I am sure you can find many such cases, because this was a fairly common technique for obtaining a hybrid with certain properties for the embodiment of the Spirit with certain tasks. And what's more, this is typical not only for the Earth.

On those planets with which the Interstellar Union comes into contact and which are being prepared for entry into the Interstellar Union, they can also hybridize precisely with the help of conception through a ray and Spirits can come to incarnate in order to unite the nature of the representatives of the Interstellar Union and the world that will only be enter it in the future.

Vladimir : Thank you very much for such an interesting answer.

35:04 Coincidences of the prayers "Our Father" and Pharaoh Akhenaten. Jesus Christ and the religious egregors of Ancient Egypt, Judaism and Christianity.

Maria : Yes, thank you. There is a legend that the Lord's Prayer, a famous prayer, is the same as the so-called prayer of Akhenaten from Ancient Egypt. Did you have anything to do with Pharaoh Akhenaten?

Irina : You know, I didn't have direct contact with him at that time.

The prayer that you are talking about as Akhenaten's prayer is reminiscent of the "Our Father" prayer for the reason that he realized it through the Higher Self. That is, this is a prayer to the Father as a request for goodness, for protection from evil in the form of that Light that he saw in his Soul.

Why did he know this? In general, the prayer I spoke about contains the basic wishes and needs of the incarnate Spirit in relation to the heavenly Father.

And at the same time, the very structure of this prayer is built in such a way that it contains everything necessary for communication, that is, each line of this prayer can be the beginning of that inner prayer that

will be performed later.

Akhenaten learned this from contacts with the Higher Self and expressed it through the worship of the Sun, through contacts with solar plasmoids. But he expressed it precisely to the Father, because he recognized himself as a part of him.

Maria : Thank you. Did you have any influence on the formation of religious egregor in Ancient Egypt?

Irina : I influenced the development of the egregors of Judaism and Christianity, the rest of the egregors developed from contacts with plasmoid, humanoid civilizations and the Spiritual world.

I could come to individual representatives of other religions in the ray of Christ consciousness through their spiritual heart, but in any case, I did it within the framework of their religious ideas.

Maria : Thank you.

38:05 Monotheism. Polytheistic cults of religion. "Bhagavad-Gita".

Vladimir : Tell me, please, why did representatives of the Interstellar Union decide to give humanity monotheism, monotheistic religions about 6,000 years ago? As I understand it, we are talking about the Vedic, not even Vedic, but about the Hindu tradition around the time of the Battle of Kurukshetra, or in general we are talking about another spiritual tradition. By the way, in what spiritual tradition then did this happen since the beginning of monotheism?

Irina : Monotheism, which has become known in a slightly different form than is known on Earth, is characteristic of the worlds of the Interstellar Union, at least for those worlds that became the creators of your race. And as soon as they created the bodies of the first intelligent people and raised them like children, naturally, special educators told them about the world around them, about themselves, about God, about the Spiritual world. And the system of monotheism,

the concept of God the Father as a being who is simultaneously in the external world, that is, in the Universe and outside the Universe, and in themselves, such an omnipresent Spirit - this understanding was already laid down in the first people by the first educators of these children. After all, they did not immediately appear as adults.

After the tragedy known to you with the scientist Selbet, who decided to interrupt the experiment and destroy the first people, known to him at that time and seemingly fair, but this plan of his did not materialize, did not work, then after that people were expelled from the base of Tumesout and Burkhad. This Tumesout base was then so that they could begin to build their civilization, for which people were created.

After their children were born and generations passed, they began to communicate with representatives of plasmoid civilizations, which seemed to them to be a word that can be translated into Russian as “gods,” that is, such somewhat luminous creatures. You remember that the word “God” is related to the Sanskrit word “bhaga” - a shining, shining light being.

Why did they present themselves this way? Because the energy of love, worship, reverence, and for some plasmoids, sacrifice, supported them, nourished them, allowed them to feel comfortable, gave them strength and, in the end, simply delighted the hearts of these Spirits. Although they were incarnated in another density, they still remained intelligent Spirits who feel love, understand it, strive for it only in a form in which they could communicate with Spirits in third density.

And from this moment the polytheistic cults of religion begin their march. They were not yet such formalized religions as we are used to seeing now, that is, there were no such temples, holy scriptures, or priests who serve according to the same canon.

When I say the word “cults,” I mean a religious movement of very diverse forms that varied in different places at different times, and the fullness of this cult depended, first of all, on the personality properties of the contactee, who then, of course, was called not a contactee, and a prophet, a shaman, in different places a priest, for example, etc. The cult in which those plasmoids who were in contact with him invested it depended on this. In order to attract people to him, they performed,

you would now say, miracles: they changed the weather, eliminated symptoms and treated diseases, sent animals to meet the hunters, etc.

By controlling the animal world, the natural world, plasmoid civilizations created the appearance that it was controlled by the priest himself, the contactee. And seeing this, people came to him. He acquired a certain authority, and from this the first proto-tribes were formed, in which there was theocratic power. The priest held the position of leader.

Then it became somewhat divided, but the leaders of all the tribes, from which emperors, pharaohs, kings and other rulers later came, much later, always kept priests, sorcerers, magicians, astrologers nearby - those who were in contact with the subtle world.

And even now, at present, the situation on Earth has not changed much.

Vladimir : I see. Thank you very much.

Irina : Why was it exactly 6,000 years ago? You are asking about Abraham now. Do I get it right?

Maria : Right. About Judaism.

Vladimir : Let us clarify, dear Jesus. The fact is that it is believed that the Bhagavad Gita was written about 5,000 years ago, just during the advent of Kali Yuga, or Krita Yuga.

Irina: Yes.

45:53 The purpose and time of the emergence of monotheism.

Vladimir: I wanted to understand in what spiritual tradition monotheism first arose, because in what Hindu or some other tradition and the approximate time when this happened from our time.

Irina : The question just sounded like this: why 6,000 years ago did I decide to bring monotheism specifically to the territory of modern Palestine? In order to form a people.

Why did Krishna bring monotheism to that particular country? In order to increase the vibrations of the people where he was located, to reduce, for example, caste hatred towards each other, hostility, since faith in one God would make it possible to unite the people more, and, moreover, he showed the path of love, the path of bhakti to to this one God.

In general, the purpose of creating monotheistic egregors in the noosphere of the Earth is to unite people with a single idea, to direct energy to the development of spirituality, love, and in polytheistic egregors, people's energy is most often aimed at understanding what sacrifice to which God to make in order for another God to intercede.

This gives rise to some kind of, what you now call, magic, magical thinking.

47:52 When Abraham lived. Moses. Burning bush.

Vladimir : Okay. Could you clarify when approximately Abraham lived, as we know, this is the same Spirit, who then came as Moses, and when this whole story with the burning bush took place, if we take the calculation from our time?

Irina : A little over 4,000 years ago.

48:11 Gita, Battle of Kurukshetra.

Vladimir : Does this mean that the Gita was given before the Battle of Kurukshetra?

Irina : Yes, 300 years earlier.

Vladimir : Everything is clear, thank you.

48:30 The expected role of a monotheistic religion. Purposes of sermons.

Maria : Thank you very much! You have already answered the following question a little about the original plan and expectations for raising the vibrations of an individual people through a monotheistic religion. Tell me, please, how then should this plan be implemented in light of the fact that we now have several monotheistic religions? How should this unite humanity, and what was the original plan and expectation for the creation of several monotheistic religions?

Irina : Each individual nation in which a monotheistic religion was created naturally had its own language before the creation of this religion. In addition to language, there was already its own culture, based on some polytheistic cults, i.e. on the influence not only of plasmoid civilizations, but also of individual priests and certain priestly associations with each other. And in order to introduce a monotheistic religion, it was impossible to introduce one for all nations, since different peoples, different languages, different ideas already existed before its introduction.

What was the goal? In every nation, the preaching about one God pursued the goal that the image created in this egregor would help unite this people, and in the future representatives of monotheistic religions would meet with each other, the preaching that this is one and the same God was planned and implemented , but under different names.

As I said earlier, when you call God by one name, you are naming one of his countless energies. Therefore, all monotheistic religions are like a collection of books written about the same being, about its energies, its actions, but by different people in different eras and with different ideological combinations of meanings.

Maria : As our history shows, languages are not really a reason for dividing religions. As you know, one monotheistic religion includes peoples of different countries who speak different languages.

Irina : That's later. First, you need to spread this faith among one people, and then, when the books are written, you need to translate them into the language of another culture, another country. By the way, this does not always work out correctly. Much depends on the translator. Often the translator becomes more of a commentator than a translator.

I just talked about the beginning of the formation of a monotheistic religion in some people. In order to form it, firstly, there must be some specific contactee who will transmit information openly, despite the resistance of the priestly class, which can be quite strong, and even more so, priests are often pushed to resistance by plasmoids that are deprived of their victims , because people turn to a monotheistic cult.

This new prophet of the new monotheistic faith must be from a fairly high level, naturally, not only by birth, but by an achieved spiritual level. He must be quite sociable, courageous, decisive and in some ways even a tough person, because... a person of a different character, his egregor will quite quickly be destroyed by certain forces that will, through people, resist the introduction of a new cult of a monotheistic religion.

Therefore, Abraham was found, later the same Spirit in Moses came again to revive his people, his religion, when he saw that enslavement in Egypt had already lasted 400 years, and, accordingly, the Israelis, the Jews had already joined the cult of worshiping the Egyptian gods. Naturally, they lived there for 400 years, i.e. again switched to a polytheistic pagan worldview.

And the Tumesoutians acted in the same way with Mohammed, and I myself acted in the same way in the event of contact with Ezekiel, with Daniel, with Isaiah and with many of my other prophets and contactees. This is always contact at the person-to-person level. In rare cases, the main contactee is surrounded by several other contactees who can transmit information at the same level, and at the same time they will not compete with each other.

Usually this is the main contactee, and a new egregor is formed around it. But the formation of a new egregor in time is always an

interesting development of the structure of the energy information field, which is unpredictable in time. That is, there is a multivariate nature of events for a new egregor, and very often, after several hundred or thousand years, the religion that is formed on the basis of a small group of people inspired by the contactee bears little resemblance to his original ideas. Although they, of course, were preserved there in some form.

56:07 Differences and confrontations between religions. Messiah, Mashiach, Great Spirit. The purpose of Judaism.

Maria : Please tell me why the decision was not made to introduce the same monotheistic religion, i.e. not to change any new postulates or expand them, because we see that at the moment religions are looking for differences and opposing each other, or even waging war against each other, rather than looking for commonality?

Irina : I want to tell you that people tend to wage wars and wage them in the same religion with each other. There are certain types of Spirits who need to go through the experience of resisting surrounding circumstances, whatever they may be. And in this case, they are capable of waging war over one or two “i”s that are written in my name.

Maria : Yes, that's true. We know that. But why was the decision made to create new monotheistic religions?

Irina : What kind, for example?

Maria : First Judaism, then Christianity, then Islam. That is, the goal was not pursued...

Irina : The task of Judaism was precisely to bring me to Earth. I told Moses about this, he wrote it down in his book of Deuteronomy.

That at the end of times - this was the end of times for them, because for those Spirits who listened to this, these several thousand years were the end of times. They lived, realized themselves in relation to time, so I told Moses that the Messiah, the Moshiach, the Great Spirit

will come at the end of time, and you must follow him and fulfill his laws.

And through other prophets, later through my contactees, I conveyed the characteristic features of this Spirit, which they had to recognize.

Everything was written there in detail: from which city, and from which tribe of Israel he would be, and what characteristics Mashiach would have. Therefore, the goal of Judaism was precisely the birth of me on this planet through the egregor.

59:17 Reasons for the physical destruction of Jesus.

Maria : Change Judaism. So to speak, Judaism should have smoothly transitioned into Christianity, and not a new religion should have formed that opposed the old one.

Irina : In my earthly body, when they wanted to stone me for preaching God's love and for doing good on Saturday, violating their holiday, I told them that the image of God that they had at that moment when I was with them spoke, turned into an enemy of God. In Greek it was "devil". And they became very irritated, since in their understanding they worshiped the God of Israel - Yahweh.

Then I reminded them of several passages of Scripture that were given to Moses in the Torah, and I said to them: "If you still believed Moses, you would believe me, as he wrote about me." I said this not to ordinary believers in the temple, not just to ordinary priests, but to the chief priests, who were obliged by their position to monitor the implementation of the Law.

And, nevertheless, this only accelerated the decision of the conspiracy between the Roman troops and the top of the Jewish synagogue at that point in time about the physical destruction of me as a person.

1:01:33 Is Christianity a reformation of Judaism? Law of Moses. Changing the canons in accordance with the vibrations of the Earth. New Testament.

Maria : So I understood correctly that Christianity was conceived as a reformation of Judaism? Did you want to help refine the concept of God?

Irina : It was the New Law, the New Testament. This was not just a reformation, it was a change in the canons of Judaism so that new commandments, new laws could correspond to the changing vibrations of the Earth at that point in time. Since Judaism had already existed for 2,000 years at the time of my birth, a little more, and during these 2,000 years the Earth made what you now call a quantum leap, a transition, i.e. made such a transition to another era, where there were other laws, for example, the death penalty for crimes was no longer required, which I showed in the case when they brought to me a woman who was caught in the act of cheating on her husband. According to the law that I gave to Moses, she was to be executed.

This was the case at that point in time when I spoke to Moses, it corresponded to the vibrations of the earthly race. But when I came on my own in my body, it no longer corresponded to the new vibrations of the Earth. And realizing this, some of the guards, who were the servants of the high priest, brought this woman to me and asked what I would advise her to do.

This was done to trap me in logic because, following the law of Moses, I was obliged to say that they must fulfill the law, since I myself gave it. But before that, I conducted many sermons among the people, which, naturally, the priests heard that this law was abolished by the law of love.

If I had insisted on the execution of the law, that is, on the execution, I would not only have contradicted the words of my sermon, I would have generally destroyed my work, for the sake of which I incarnated. So I said the only thing I could say in that situation: “He who is without sin among you, let him throw the first stone at her.”

I said this in the physical body, whom you know as Jesus Christ, to precisely those people, but I did not say this to Moses and his brother Aaron, and all his descendants, so that they would check themselves for sins before throwing stones, since in other times they were not by

nature capable of doing this. They had to go through a path of some social, social and spiritual development.

Every religion corresponds to a certain vibration. He tells me now: “At that point in time, Judaism corresponded, then Christianity corresponded. And when I said this, and they all left, I did not forbid them to stone her and did not order them to do it - I left it to them to decide for themselves. And they decided as it should be according to the new Law. They listened to themselves and left her alive. But when they left, the matter did not end there, there was a rumor that I was not just opposing the law of Moses, but doing it in a way that was very dangerous for Judaism. That is, I was presented as an opponent of religion, destroying the foundations of our fathers, and in such a way that they themselves could not answer me.”

1:06:57 Change of religions. Correspondence of vibrations to egregor, religion. The physical death of Jesus to change the vibrations of earthlings.

Maria : Wonderful, wise answer. We all know him. I'm just trying to understand: was it planned for Christianity to replace Judaism? That is, Judaism will turn into Christianity. At the moment, there are Judaism, Christianity, and Islam - all three religions. Was it your plan to...

Irina : This cannot be planned. By change, do you mean the disappearance of one and the appearance of another?

Maria : Yes.

Irina : This cannot be planned, because each religion corresponds to certain vibrations. The egregor still remains to exist. I understood perfectly well that some would move to the new egregor both from Judaism and from the pagan plasmoid cults of the surrounding countries and peoples, but the egregor that remained accumulated for 2,000 years and became a fairly strong energy unit.

It was simply impossible to dissipate it, since its energy cannot disappear anywhere, it can only be transformed. Therefore, in this

egregor that remained, only those people could remain in it or new people could come to it who, in their vibrations, corresponded to this egregor.

What does “by vibration” mean? I will explain, because everyone on Burkhad understands this, but I do not see understanding among some people now on Earth.

What does it mean to “match the vibration of religion”? This means that those laws, not rituals, but namely laws, the position of religion must coincide with the internal moral law in the heart of a person, with his image of God and the laws of God, which he is ready to fulfill. This is called “matching vibrations.” Why did those people throw away the stones and leave? Because within themselves they corresponded to the vibrations of the new Christian egregor.

Why did the high priests, his servants, decide to kill my body? Because their vibrations at that moment in time corresponded to the vibrations of the old egregor, which was fighting the new one. Both they and the egregor, as an energy, energy-informational unit, with their vibrations fought against the creation of a new, dangerous unit for them, which could destroy the whole thing that they had been building for, one might say, 2,000 years.

I understood perfectly well what would happen, what I was going to do. It was my choice to create this religion in those conditions and at that moment. I understood perfectly well, as I have already said, that there was a very high probability that my body would be executed in this way. I could have come to any other period of history through my mother. She could also incarnate through other people when such laws no longer existed. But my choice was precisely this in order to direct my energy to change the vibration of all earthlings. It was only possible to do this the way it happened.

1:11:23 Scenarios for the development of religions. Why do Spirits need to go through the horrors of war, epidemic, devastation?

Maria : Tell me, please, did you see in the Time Tape in the Spiritual

World the scenarios for the development of all three religions, that they will oppose each other, that they will wage wars, that this will lead to discord. Was such a scenario known?

Irina : Of course, he was famous. But the whole point is that the polytheistic religions that existed before the creation of these religions did not reduce discord.

I have already said that there were many groups of people in different tribes who competed with each other for the influence of one or another God, and this could easily escalate into war if only one follower of one God offended the follower of another. Insult was more the feeling of the one who was insulted if, in his understanding, justice was violated.

All this happened due to the lack of awareness of people as spiritual beings. They did not realize themselves as immortal Spirits, parts of God. And they were not aware of their neighbor, a representative of another people. They could recognize a representative of their people as their brother, but they no longer recognized a stranger.

There were such unconscious things on Earth and this is the period that many civilizations go through.

Why does this happen? In order to understand that it is better to build peace, tolerance, and respect for any life on any planet, many Spirits need to go through the horror of wars, devastation, epidemics, famine in order to understand how terrible it is and reach out to the Light.

1:13:38 Christianity. The reason for the emergence of Islam in the Arabian Peninsula.

Maria : Please tell me, based on the experience of the polytheistic religions that you just listed, why the decision was not made to spread one monotheistic religion, perhaps taking into account the peculiarities of the climate, the characteristics of the people, but to carry one idea and the same principles.

Irina : This was done in the case of Christianity. I told my disciples to bring all nations to me through baptism, that is, with this word I opened the door for them to preach and at the same time to enter into the egregor of people of other nationalities and religions, not only Judaism.

Maria : Why then was the decision made to introduce Islam, and not Christianity, into the territory of those peoples?

Irina : Because at the time when Islam was introduced, Christianity was not accepted on the Arabian Peninsula, there were many Gods and Spirits. There were some attempts to preach Christianity, but they received severe rebuff, again from local priestly and government circles, who were afraid of losing power and influence. And, as you can see, it was necessary to introduce a monotheistic religion on a basis closer to the Arabs in order to unite them.

Maria : Thank you.

1:15:34 Contradictions in the interpretation of the phrase "Your father is the devil." How is an idol different from God? Trade in temples. Metanoia.

Vladimir : Dear Jesus, thank you very much. I just want to clarify on the previous question. Tell me what exactly did you mean when you told the Jews: "Your father is the devil?" We are often asked about this, and many interpret it in such a way that Yahweh is the devil, their Spiritual Father, and how then do they not correlate, after all, you were Yahweh, and you told them that he was the devil, and, accordingly, a conflict begins , contradiction.

Irina : I told them this because their vibrations corresponded to hatred, anger, rejection, which were incompatible with the egregor that I built as Yahweh.

I know this idea that as if I called Yahweh the devil, it turns out that I called myself. I'll explain now.

He says: "This conversation took place almost immediately after one

event (he now showed me the temple, you call it a synagogue, a courtyard filled with animals for sacrifices), and I came there, because in the temple of Yahweh I often taught people, I was allowed there as a preacher, since at that time he was also studying to become a rabbi. There were these, as you call them, not courses, but from a priest, from a rabbi, from a teacher, you receive a kind of initiation. I received it when I was not yet twenty years old, before baptism.

I came once again to the temple of Yahweh - to the synagogue, and saw that there was a holiday when animal sacrifices were being prepared, the law about which was described to me by Moses and written down by him in the book of Leviticus.

And when I arrived there, I saw that in the temple itself, where prayer should take place, the law was being violated: animals were sold that, with their screams and trampling in place, interfere with prayer, and I also saw that in the synagogue there was a special currency, namely temple currency. money, in order for a believer to be able to buy a lamb, kid or dove for sacrifice, it was necessary to buy it from merchants. They exchanged their money there, which they brought, and I saw and felt this mental atmosphere of this temple. The fact that ordinary believers, with the knowledge of the priests, are being deceived by money exchangers and are putting the wrong money on the scales. There were already coins, but they were also weighed on the scales, and all this together gave me the feeling that I had to cleanse this place of these energies.

I looked around, took several ropes lying on the floor, with which I drove the bulls to the exit of the temple, and reminded the priests that the animals should not be inside, then I approached those who were changing money and said that they should be outside the temple , since only believers should be here in a state of prayer, and not the clinking of coins and these negative thoughts of people who understand that they have been deceived. They were simply afraid to say that they were given too little.

Said, “Cleanse the space of my Father’s temple.” Why did I say “my Father” and not me? Because I do not separate myself from Him. But they said that I had no right to do this, and then I overturned the tables with their coins, as I felt cleansing energy at that moment.

I did not want to harm these people, but I felt that this space needed to be cleansed of the negative energies that they brought here. And after the guards came running and the senior priests came, I began to tell them from their scriptures those laws that were supposed to be fulfilled in the temple, which they violated. And then they saw that I was not breaking the law, but fulfilling it.

This all happened in front of the people. They understood that they showed their ignorance and non-compliance with the law in front of the people and pretended that they agreed with me, but they harbored resentment and evil within themselves and even then decided to take revenge on me.

And when they asked me why I allowed myself to restore order in this way, I told them that my Father's house should not turn into a house of trade.

I considered and consider this very important: the space where believers devote themselves to prayer, reflection about God, about their Father, should be free from the energies of the financial egregor. These are egregors that have slightly different vibrations. They can be nearby, but they should not interfere with their energies, distract from thoughts about God, the Spiritual world and cause any unpleasant associations with their life experience.

There must be a temple in the temple. And the house of goods or trade, or a store should be nearby. I told them that this cannot happen in my Father's house, and only then did we start talking about the fact that they are the children of Abraham, therefore they do his deeds. And in this context, I told them that their father is the devil.

Now tell me, if Yahweh considered the devil, would I call his house the synagogue the house of my Father?

I told them about the image that they created for themselves in the place of Yahweh, such an idol, one might say. How is an idol different from the living God? It is created by imagination. Some image created by the imagination in the mind and heart of a person, which does not even prescribe any laws of the Spiritual world according to which the

vibrations of the Spirit can increase. He simply says that if you have broken the law, then you must make a certain sacrifice to my priests and by this you will be cleansed, not by changing yourself, but by sacrifice.

And this kind of idol, in which there is the energy of a financial egregor, and a sense of superiority, etc., they created in their hearts, inside the Jewish egregor, such an image of God. And in them, of course, in their minds. And it was this image that I called the devil. And he continued: for he is a murderer; from the beginning he did not stand in the truth.

Why did I call him that? That person whom I called the devil did not stand in the truth, although he was very close to me, and we were, in your opinion, spiritual brothers. But he could not resist this truth, he descended in his vibrations, and became a devil. And this image that these priests formed, to whom I said: “Your father is the devil,” - this image also led to destruction, to a lowering of vibrations, because it did not allow spiritual development, but simply allowed one to pretend to be pious and calmed the person’s heart by doing so. that he leads a righteous religious life.

At the same time, changes not only in behavior, but in these mental attitudes, which led to destruction, to crimes against oneself and loved ones in the absence of love in all forms, and this was a religion of self-justification and covering up one’s low-vibration states with the image of God. This was a diabolical idea, because it did not allow us to see the true God, who calls us to love, to the Light, to self-awareness and to true metanoia, repentance, and therefore the correction of one’s actions in the Light of God.

And, naturally, my beloved son David knew that the sacrifice to God is a broken Spirit, and he will not despise a humble heart. This showed that a thousand years before these priests, David understood that the most important sacrifice is metanoia.”

1:29:18 The first commandments given to Moses. Technologies for applying commandments to stone.

Vladimir : Thank you very much. I think everyone will be satisfied with

this answer, very detailed, detailed and, in my opinion, very convincing.

Next question: dear Jesus, tell me, what were the very first commandments that you gave to Moses and recorded on the first stone, which he then broke after the story of the calf, and what technology was specifically used to apply these commandments?

Irina : He shows me that it was two stones, he takes the device and applies it with a beam. There is a ray that seems to melt the stone a little, under its action depressions are formed, as he writes.

Vladimir : That is, it was, in fact, an engraving on a stone.

Irina : Well, yes, it kind of makes a ray, letters appear.

What were the commandments? There were ten commandments that I considered the most important. In general, there are many more commandments in the Torah, but these were important as steps to me, to the Higher Spiritual World. Naturally, these were words about how they should worship only one God, since this is a monotheistic religion, so that they should not create images for themselves or anything earthly, no animals, birds, fish, because these images were often used by fans of plasmoid cults. And, having made such an image, their energies went into their egregor. And then the egregor that is being formed by me would mix with their energy. Nothing would have worked out.

Vladimir : So these commandments did not differ from those that were later transmitted to Moses? We are talking about the very first ones, the stone with which he broke.

Irina : No, they were not different. I then simply repeated it.

Maxim: Another 5 minutes.

Irina: They have a lot of questions.

Vladimir : Thank you very much. We will do more conferences. Dear Jesus, we have a lot of questions, do you mind if we make more than three conferences?

Maxima: Not two, but three. I understand.

Vladimir : We were going to have three, but now we want even more, because we don't have enough here. It's gradual.

Maxim: I think they will make concessions to us.

Maria : Can I ask the next question?

Irina : Yes.

1:32:10 About the likelihood of the forced introduction of a new religion. Experience of the incarnation of the Spirit. War, aggression.

Maria : Please tell me, you yourself and the Interstellar Union were aware of the fact that the introduction and strengthening of each new monotheistic religion, first Judaism, then Christianity and Islam, would take place by force, that is, with blood and sword in relation to existing peoples and their religions, and how was this supposed to subsequently raise their spirituality and vibration?

Irina : The question is clear. Thank you. The introduction of a new religion at that point in time when people's awareness was at the level at which it was at the time of the introduction of Judaism, Christianity and Islam, indeed, along the lines of probability on the Time Tape, did not imply practically any other outcome other than war. It was simply clear from the lines of probability that if monotheistic religions had not been created, then these polytheistic religions would still have entered into military conflicts, and the same people, the same Spirits, only for a different reason: the seizure of territory, the struggle of different priestly classes, that is, the war that was waged for the sake of introducing a new cult would simply be waged for a different reason: preserving their

territories, for example, or revenge for some kind of insult.

The aggressive energy that accumulated in the egregors of the Earth had to find a way out in active actions, otherwise it would destroy people's bodies.

The fact is that physical war, physical battle is only the last stage of aggressive energy accumulated in the Earth's noosphere.

First, there is a long period of aggression within some people, within some group, and only after a fairly long period of time does this develop into physical actions.

It was through monotheistic religions that each person was given a greater opportunity to get closer to the one God than in polytheistic religions, because it was said that there is one Creator and Father of all people on Earth, who is love, to whom you must strive if you want to live in peace , just as He is the King of the world. This was done, among other things, to stop wars, violence, and injustice.

Why do these things still exist on Earth after such a long time?

I want to remind you that the age of your earthly civilization is only one tenth of the age of the more developed races in the Galaxy. You still have a long road of development ahead of you. Many civilizations went through this period of social upheaval and war. And I also want to say that the Spirit who is born on a certain planet in a certain historical period is necessarily introduced to the fact that military actions are possible with such and such a degree of probability, in which with a certain degree of probability he will participate if he agrees to incarnation. Or if there is some kind of epidemic or some other disaster that could lead to a premature exit from incarnation. And for this Spirit, for example, the period of incarnation is 75 years, but in this territory there is a 70% probability of military action. If he is born a man, with such and such a degree of probability he can participate in them and with such a degree of probability he can die in them. Approximately such plans of incarnation are given to the Spirit, they are told to him, but he sees it himself. This all happens in mental contact with mentors.

And many Spirits who need to process within themselves, harmonize the energy of aggression and learn, for example, to love enemies, come to terms with the loss of a physical body at any age, that is, to completely trust God, choose the experience of incarnation in such years of instability, conflicts, revolutions.

1:38:23 Religion of the Interstellar Union. The purpose of human life on Earth.

Maria : Thank you. Tell me, please, on the planets of the Interstellar Union what forms of religion and beliefs of interaction with God predominate?

Irina : Internal religion of Light, when from childhood a child is taught to seek the law of God that is embedded in the spiritual heart of every rational being.

Maria : So, one might say, a monotheistic religion?

Irina : Neither monotheistic nor polytheistic - it is not theistic at all, it is like merging with the divine Light, the desire and desire to become its conductor into the material world. It's like feeling like one whole thing. This is what I said about the religion of the Interstellar Union, some of the commandments from which I gave in the Sermon on the Mount. This is when I said that your Light must shine before the people. This was one of the main commandments.

And then I said that the purpose of human life on Earth is the desire for endless perfection. Not to the kind of perfection of which I was the ideal, but to the perfection like that of my Father. And he is Absolute Love. And I preached this ideal of the perfection of absolute love, love for oneself, for one’s neighbor, love for God every day and hour in word, deed and thought on Earth.

And now I raise my vibrations along with the vibrations of the people who connect with me through the sacrament of communion, I raise the vibrations of all of us together so that everyone can feel me in their hearts and feel themselves as me, and me as themselves. And to feel

that we are all united in the Light of God, and the person you look into the eyes is me, and those perhaps harsh, rude words that he says to you are the same energy of love, but distorted by the perception of this particular the part of me that doesn't realize it.

Maria : That is, a new level of divine literacy or divine perception.

Irina : This new level was given 2,000 years ago.

Maxim : Well, at this divine level we will probably end this conference. Thanks a lot.

Vladimir : Let Jesus simply turn to us, if possible, if he has something to say beyond the question, and we will finish this conference with hope for the next one.

1:42:06 Conversion of Jesus.

Irina : He says: “I like your questions, the questions of the Cassiopeia project subscribers and the way you select them. They are very important for every person, because everyone wants to know the nature of human sins manifested through religion, because this is the main reason that can push a person away from religion. And therefore these questions are very important: how violence could be allowed in religion, for what purposes, and why such decisions were made that led to wars, and why there are wars on Earth or on other planets in general. What is war anyway?

These questions about aggression and the energy of aggression, about its application in the earthly world are very important, since in its egregors of your world there is still a lot of energy of anger, condemnation, struggle, which manifests itself in the minds of individual people. I want to remind you that physical war is only a reflection of the spiritual war that goes on at the mental level between consciousnesses of different levels.

Until the wars between minds end, it is impossible to end the wars on the physical plane. For any reason: one religion, many religions.

People who have been infected with the virus of aggression will manifest it in any environment. And it can only inhabit those minds that are in a state of constant dispute and resistance to the world around them.

This is a certain type of Spirits that goes through its lesson of acceptance, submission, meekness and humility, then acceptance in peace. Well, and, of course, all these qualities fit into one huge word, Love. This is the Light that is in each of you.

I am ready to meet with you every month and answer your questions through Irina Podzorova as a contactee, and I also communicate with other contactees in the form of phantoms or Christ consciousness. I already know how many of my contactees will watch this video, and I want to remind you that the panacea for war and violence lies within you. This is the Light of Love that everyone now feels after watching this video.

I am sure that you have touched this Light, but it is not so much in Irina, and not so much in me, as in you. This is your own Light. If you always, under any circumstances, remain in it, and every person will do this, then any wars, injustice, corruption, violence and all other criminal and lawless structures of your society will simply crumble as unnecessary, and the energy of their egregors will turn into Light. This was the purpose of my incarnation, and is the purpose of every increase in vibration when connecting with you. I feel everyone who partakes of my body and blood. I feel your troubles, sadness, aggression, happiness, tears, your children and grandchildren.

I'm with you. And I am you.

And when you realize that you have become me, you will enter the Interstellar Union, and your Soul will enter the Kingdom of Heaven."

1:47:08 The influence of this meeting on the entry of planet Earth into the Interstellar Union.

Vladimir : Thank you very much! Also, please tell me, dear Jesus, can

you see in the Time Tape, approximately how many years has the Cassiopeia project and specifically our meeting with you brought forward the date of our entry into the Interstellar Union? Probability. You don't have to answer.

Maxim: On this note we will end our conference.

Vladimir: We can meet with him. Let the latter say, around May 8th at the retreat.

Irina : At the retreat – I don't know.

Vladimir : May 8-9.

Maxim : We'll watch. We don't know.

Irina : Let's see. You will be with us.

Vladimir : No, I asked Jesus, I thought he would now say: "Yes, I can."

Irina : He says that he is ready to meet every month.

Vladimir : Less than 30 days will pass. Fine. All. Thank you very much! Thank you so much Jesus, thank you so much Irina!

Maxim : Bye everyone!

Maria : Irochka, thank you, dear! Well, how are you there?

Irina: Where did you go?

Vladimir : Well, we'll finish recording then. Yes?

Maria : Yes, finish.

Premiere May 2, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Jesus Christ is the leader, the head of the Christian religious egregor on Earth and not only, the Firstborn Son of God, our Elder Brother;

Mirakh Count is a representative of the planet Burkhad, a disciple of Jesus Christ, who is known in the Christian religious egregor as the Archangel Gabriel;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

Vladimir Goldstein - administrator of the Cassiopeia project;

Maria Sokalskaya is the administrator of the Cassiopeia project.

#283 Third conversation with Jesus Christ - questions from participants from the audience

during a retreat in Belarus.

https://blog.cassiopeia.center/tretya-beseda-s-iisusom-hristom
https://www.youtube.com/watch?v=3QVgNk5Uq8w

0:17 Introduction of the meeting participants.

Irina : Hello, dear friends, good evening! Today the phantom of Jesus Christ and four Archangels are present with us, they stand around him: Michael, Uriel, Gabriel and Raphael.

With us are our curators MidgasKaus from the planet Esler, LiShioni from the planet Shimor, Raom Tiyan from the planet Burkhad, and your mentors and curators are also present, a lot of representatives of the Pleiades, from the planets Gihor, Saama, Tikht, even those I don't know, representatives plasmoid civilizations, the Interstellar Union and the Galactic Federation of Light.

Vladimir : Friends, I greet all our guests, we thank you, dear dear Jesus, that for the third time you have found the opportunity to answer our questions with the help of a phantom, only today are face-to-face questions, we will ask them directly from the hall, and voice these questions you will be on your own.

But first, I want to invite us all, according to tradition, before such an important meeting with Jesus, to read the most famous prayer.

I will read, and please, you can join me in chorus.

Maxim : Recently, I began to notice that this kind of highly spiritual project is beginning to be equated to a sect of a young religious movement. We, of course, can be called a young religious movement, but we are, in fact, an organization that is looking for the unification of all people entering new times, new energies, and if there are people here who have a different religious egregor, they can read their prayer.

You do not necessarily have to read the prayer that is popular

specifically in the Christian religious egregor, because the Cassiopeia project will unite all the religious egregors of this planet. All religions talk about the same thing in different words, with different self-awareness, mentality, with different awareness. Religious egregors are formed in certain states. Unfortunately, we are still very divided among ourselves both at the state and religious levels.

Therefore, when you read a prayer, for example, Muslims, Baptists can read their prayers, moods, their religious moments in order to enter a state of goodness, acceptance of that high Spirit that is now present here in a phantom, plus the four Archangels with it.

I haven't felt such a flow for a long time, in all seriousness. For me, of course, this is also something new.

Vladimir : Maxim said absolutely correctly, I fully support it. I'm starting, and anyone can join.

Our Father! Like you are in heaven. Hallowed be Thy name, Thy kingdom come, Thy will be done on Earth as it is in heaven. Give us this day our daily bread and forgive us our debts, as we forgive our debtors. And lead us not into temptation, but deliver us from the evil one, for Thine is the kingdom, and the power, and the glory, of the Father and the Son and the Holy Spirit. Now and forever, and forever and ever. Amen.

It sounded with ancient Slavic motifs. Thanks to all! I actually read it like this. Do you know Father Mikhail? I read it like this from him.

Maxim: He has the Apostolic Orthodox Church. We met with him.

Vladimir : Now, friends, from the audience there is an opportunity to ask questions, we have one part of me, the other part is Masha with a microphone.

First, to set the tone, Masha and I have one question, also not our own, but the questions that you and our subscribers asked in groups.

Masha, please, can I ask a question?

06:18 Jesus' stay in the desert for 40 days, with whom and how?

Mary : Dear Jesus, please tell me what is the Jewish episode about your 40 days in the desert? Who did you communicate with and about what, and how did you maintain your physical body?

Irina : (The Phantom of Jesus Christ speaks). I welcome everyone in this room and all those who will be watching this conference. I send you all the Light of my love.

Those 40 days that I spent away from people were a fast that I kept according to the customs of the Essenes, to the community to which I belonged from the age of 14. He supported his physical body with Spiritual energy. I could do this due to the greater number of Pikran genes and the fact that my Spirit is the Firstborn Son of God.

But even so, my possibilities were not endless while I was in the physical body, so I still experienced hunger and thirst without nourishing my body with food and water for 40 days. I knew that it was safe for me, since through these factors I nourished my body with spiritual energy. But the instinct of self-preservation still reminded me of the need to nourish the body.

Why did I do this? This was, firstly, the fulfillment of the law of fasting of the Essenes, although they did not adhere to it so strictly, because the capabilities of their physical bodies and the degree of development of their Spirit did not allow it.

And secondly: I wanted to tune into the channels of higher spiritual levels and pray to my Heavenly Father before I went out to preach in Israel. For 40 days I did not communicate with people there, but only with spiritual entities, with those whom you call the Spirits of Nature, sometimes I communicated with aliens, with extraterrestrials, but these were not physical, but astral contacts.

If you mean the episode that is described in the “Gospel” of Matthew

as the temptation of the devil on this last day of my fast, that Spirit, who was previously the Highest Angel from the 24th level, then lowered his level, you call him a fallen Angel . He came to me, you call it astral contact, and everything he showed me was in the Astral.

Why did he do this? He knew who I was and hoped that the physical body had greatly distorted the manifestation of my Spirit, so I would go to the extent of walking away from Divine love, completely abandoning complete trust in God. I saw his every thought, every feeling of his even before he verbalized it, that is, put it into words.

Why did he think that? Because he, due to his spiritual insensibility and lack of humility, believed that the physical body could interfere with the manifestation of the Spirit. But that's not true. That Spirit who is filled with Divine peace and absolute love uses every instrument only for God's glory.

12:00 How did you manage to feed 4,000 people with seven loaves of bread?

Vladimir : Thank you very much, Jesus, for this detailed answer to the question. And there was even an answer to my question. You can move on to the next one.

Here is my question, and we will move on to yours later. Please tell me, a little more specifically, how you managed to feed 4,000 people with seven loaves of bread? There's still some left in the baskets. What was it? Was there really materialized food or suggestion, and how did it happen?

Irina : This case was far from the only one, it was one of those described in the Gospels, but still these are not all cases of this kind. What's happened?

As the Firstborn Son of God in Russian, I can only find the word for how I helped the Father in creating the material world, that is, I was its co-creator. This was during that timeless period when not one of you was yet born of God. It was just the two of us. And, thanks to the fact

that I received from God the first impulse of Divine energy, in which I realized myself for the first time in the Divine universe, the Kingdom of Heaven, I could control my thoughts in such a way that they passed into the subtle-material plane, and then into the dense-material plane .

And from the fact that I formed energies, quantum fields for the subsequent actions of plasmoid civilizations in the creation of Galaxies and all the smaller particles and details in these Galaxies, including such insignificant ones as stars and planets, I knew the force that controls matter . Therefore, to the Pharisees, who told me that we are the children of Abraham, and you have nothing to do with us, I said: “If God pleases, he will make children of Abraham from stones.” That is, any stone contains those substances that are in a person, only in different quantities and ratios.

When I took the loaves and fishes, to me they were material structures consisting of molecular lattices in which atoms were embedded. And when I multiplied bread and fish, and in another case I turned water into wine, this is almost the same process for me. I took a piece of bread and it became clear to me how the atoms were arranged in it, the same atoms were present in the air in the form of oxygen, carbon, hydrogen and what you call other elements. And then I simply gave the order to the elemental Spirits with my energy of the Firstborn Son so that they would collect the same bread from these atoms.

In short, you can say this. The process there is more complicated, but that’s all I can say at your level of scientific development.

Vladimir : That is, there was real materialization there.

Irina : This is not like materialization. This is the emergence of matter from nothing. Nothing ever comes from nothing, that's a myth. It is something that emerges from existing energy. There is unlimited energy around you for the construction of matter.

Vladimir : I understood: matter changed and became products. Thank you very much! Masha.

17:42 The main meaning is in the creation of humanity.

Maria : The first question has been in the air for a long time. I pass the microphone.

Question from the audience : Good evening to everyone present. Dear Jesus! I thank you for the opportunity to ask you a question and for what you have done for us, for all humanity and for me in particular. Please, please answer the following few questions. Okay, this is in one question: the main meaning in the act of creating humanity, and who is Krishna, how do you communicate with each other?

Maxim : One question: the main meaning in the creation of humanity.

Vladimir : The question about Krishna is removed; we had it last time. You haven't watched our previous videos. I remove the question about Krishna.

Maxim : I repeat for everyone: if the question is repeated, we will remove it. So the question is: dear Jesus, what is the point of creating our particular race on this planet Earth?

Irina : Your race or a dense material form of life in general?

Maxim : Our race.

Irina : The point of creating your race is so that intelligent Spirits, my brothers, children of the heavenly Father, who incarnate in bodies made up of material structures of different races with different energetic spiritual potential, can use the potential of each of the races so that representatives of your race became one of the leading races of our Galaxy. This is what you were created for.

But this happened only three million years ago, and there are races that are tens of times older than yours. So you are correctly called in the Interstellar Union a young race, even I would say not a young race, but a race just emerging from the state of infancy to the state of

learning.

Vladimir : Thank you very much! On my half I know there are questions. Please.

20:35 What can unite the Jewish and Arab peoples. Aggressive energy. Enmity.

Question from the audience : I also thank Jesus for this opportunity and for his answer. My question is this: what miracle must happen on Earth so that the Jewish and Arab peoples, brothers, do not quarrel? Thank you!

Irina : I have never seen people to whom a miracle that appeared would stop the enmity in their hearts. It is not a miracle that ends hostility. Only love stops it.

What is enmity? This is aggressive energy aimed at destruction. But where does this energy come from?

This is the energy of the same Divine Holy Spirit, but it is directed to create its opposite. So that people do not quarrel, love is necessary.

Enmity is generated only by your negative blocks, which get stuck not only in your bodies, but also generate dark layers in your astral atmosphere, through which it is very difficult to see the Divine Light of unconditional love, and in such conditions various parasitic subtle structures multiply very easily, and feel freely yourself are demons who are deprived of Divine love just like you.

I repeat once again: your race is just emerging from its infancy, and the higher Spirits look at your wars, as perhaps you look at a stupid quarrel between children who did not share a portion of ice cream.

Maria : We have one question here. Please.

23:16 The process of creating a Soul.

Question from the audience : Greetings to all, beloved Jesus, our star friends! Jesus, you, as the Firstborn Son of God, tell me how you created all intelligent Spirits, including us and those living on other planets? How did this unique process come about? Tell me please.

Irina : Dear Soul, you are my sister, I did not create you. Heavenly Father gave birth to you the same way he gave birth to me.

This process is simple for the heart, but difficult for the mind. Listen with your heart and you will comprehend the truth.

First, in the flow of the Divine Light of my heavenly Father, two impulses are born: the mind and the spiritual essence, which you call the spiritual heart. The two pulses are slightly different in amplitude and energy waveform.

Almost instantly - there is no time, all this is very conditionally translated into the language of your terms - they connect with each other, and consciousness arises. An impulse of self-awareness arises, which generates various energies around itself, primarily the energy of will. And this energy of will, which combines with the energy of the Divine mind, gives rise to self-consciousness.

The first impulse of the self-aware Spirit is the feeling of separation from the Divine stream from which it arose. The very merger with the Divine flow is the absence of self-awareness. As soon as self-awareness appears, he knows that he is a person. Not a person in your understanding, but a person who has not yet known incarnations.

This Spirit can arise at any level of the Spiritual World, since the Divine Light penetrates through all levels. And, having first arisen, he has a desire to be, to exist, which leads him to the idea of incarnation in some material world, in some density.

According to the law of Divine will, the first incarnation cannot be in a world below the 35th density level. But in any case, the Spirit, which is

recently born, strives to be and not just to be, but to be manifested. It is for manifestation, for the possibility of manifestation of these Spirits, that the material world was created in all the diversity of density levels, Galaxies, planets and those worlds that even the inhabitants of the Milky Way Galaxy cannot imagine.

Vladimir : Thank you very much! We have another question.

27:40 Jesus' attitude towards group meditation.

Question from the audience : Question from the entire Spanish group, so far there are only a few of us - only 38 people. If we, all participants in the Cassiopeia project, conduct a single meditation, uniting in a circle of Light, for example, a couple of times a week, filling the collective unconscious of humanity with energy, will we be able to increase the vibration of all those people who currently live only in the material world, not realizing Spiritual?

The energy egregor of “Cassiopeia” is growing every day. According to the theory, joint meditation at certain times throughout the planet should increase the energy of unconditional love. But many are distrustful of group meditations, fearing that this way we can attract unwanted energies from the general circle. I understand that they are attracted to fears, like attracts like. But also the open hearts of people, sending Light to humanity, when united, increase energy exponentially. For example, “Cosmohealing” also works through an egregor.

Would Jesus support this idea from Project Cassiopeia of meditating together at specific times around the planet?

Vladimir : Will Jesus support the idea of group meditations throughout the planet, centered on the Cassiopeia project? Thank you!

Irina : The word “meditation” is given many meanings by different people. The biggest risk of this business is that sometimes the opposite is invested.

The meditation you talked about is an analogue of inner heart prayer,

that is, prayer for peace, for love, for enlightenment, for the bestowal of the grace of the Holy Spirit. This is not only allowed to be done, but also directly commanded by all religious faiths of the Earth, because it helps to increase the vibrations of space and increase the vibrations of yourself.

But this will only be effective if the peace and tranquility that you broadcast into space is maintained by you in everyday life in communication with your loved ones. If you allow dark, gloomy, negative, aggressive thoughts in yourself towards even those who do not accept you, you will negate the entire effect of your meditation.

Maria : Thank you!

31:05 M.A. Bulgakov is a contactee. Incarnations of Bulgakov. Who is Woland based on?

Question : With love and awe, I greet you, Jesus, I greet the Archangels, mentors and curators. Thank you very much for the opportunity to ask a question, it will not be quite an ordinary one: your attitude to the novel “The Master and Margarita” by Bulgakov, was the author a contactee, and who did he base Woland on?

Irina : The whole point is that Mikhail Afanasyevich, of course, was a contactee on the spiritual level of two Archangels: Michael and Raphael, but the point here is not so much in contact with them, but in the fact that not only in this novel, but also in In many of his works he reflected images of those unconscious memories that he had from many past incarnations.

One of the incarnations - he lived at the time when I was on Earth, and was one of my students.

Who did he base the image of Woland on? I know this Soul. In fact, he took this image from his unconscious memory. Outwardly, when he described him, his character, he took it from the image of his father.

33:05 Mohammed is a contactee. Meetings of Mohammed with

aliens.

Question : As-salamu alaikum! I am a representative of the Islamic egregor. I would also like to ask my questions. I'm interested in his opinion in relation to fathers.

When Muhammad is sitting, a handsome man with green eyes comes in, and they have a long conversation about Islam in Saudi Arabia, all over the world, then when he leaves, they ask: “Who was that?” He says, “You know, he was my friend.”

I would like to know if you really communicate? I have two questions. Please.

Maxim : Volodya, please ask the question correctly.

Vladimir : I didn’t understand everything, to be honest.

Irina : About the attitude towards Islam.

Vladimir : About the attitude towards Islam. There was also specific information about what was being discussed.

Voice from the audience : When Muhammad was sitting with his like-minded people, a bright man with green eyes came. And they communicated, discussed the ideas of Islam. As I understand it: did it really happen, and who is this person?

Maxim : Where does this event come from? From what source?

Vladimir : Biography of Muhammad.

Irina : Okay. The Phantom of Christ says this: “The religion of Islam was created by a representative of the planet Tumesout, but not only. Representatives of the Spiritual World - the Archangels - helped and

are actively helping in this. They also help the guardians of the Islamic religious egregor to build and properly maintain the egregor. Since one Archangel can control, suggest to other Angels, for example arhats, consultants, how to properly manage the egregor and protect it.

So my personal attitude towards Islam has never changed and remains the same. This is, at its core, a very bright religion that has brought people a lot of enlightened holy people.

Like any idea, negative people turn it into its opposite.

It was the same with my church, my religious egregor, when some people turned my ideas into the opposite, calling themselves my students.

This was the case in any religion, I have already spoken about this. But the idea itself cannot be discredited by this, because it leads to Light, to that Light of God who created everything, and whose will finds all Galaxies, all worlds. He created all the laws that govern the universe spiritually and physically.

As for the man whom Mohammed met. He met not only with the Tumesoutians, but also with representatives of the planets Burkhad and Disaru, he was a contactee. He also had contacts with spiritual entities, which he repeatedly described in his memoirs.

Specifically, the man with green eyes, as far as I understand, who we are talking about, it was a representative of Disaru.”

Voice: Thank you!

Maria : Thank you! Next question.

38:22 Asking God for forgiveness. Participation in religious rituals. Visiting church.

Question : Dear Jesus! Thank you for the opportunity to ask this question. Three hours ago, through Maya, Archangel Michael conveyed to us that it is very important to ask for your forgiveness. It was also reported that it is not necessary to communicate through the church format, through confession and communion. I would like to ask for some comments or advice on how to properly ask for forgiveness?

Irina : He says that he wants to tell us that the terminology that is accepted in the Christian church, in the Christian religious egregor, is a description in images of a real spiritual process.

When they tell you: “Ask God for forgiveness,” this in no way means that God is angry with you, offended or loves you less. When they say: “Ask forgiveness from God for your sins,” they mean the image of a child who asks forgiveness from his father for destroying the world that his father is building, breaking the laws that his father established in his home - this a clear image for the type of civilizations to which yours belongs.

What is the reality of the spiritual process? People are embodied Spirits, 30% of your Divine Self is in you, the rest is in the Spiritual world, and you call it the Higher Self. And if you, as an embodied part, do not fulfill the tasks of your incarnation, your Spirit, that is, the non-embodied part begins to decrease its level. By doing this you hide your spiritual channel through which you communicate with your free choice.

Therefore, to ask God for forgiveness in this case, to say: “Forgive me, Father,” is to turn, first of all, to your Divine Self, that is, to the part of God that exists in the Spiritual world, and to open your spiritual channel.

To ask for forgiveness from God means to admit the error of the path that leads into darkness, and a real true request for forgiveness is always combined with faith in the mercy of God, in the fact that God will accept you, cleanse you and fill you with his love.

If a request for forgiveness is combined with despondency, with sadness, with the false opinion that God does not accept you, that you

are too low from him on the spiritual stage of development - this is false, demonic sadness, it leads only to darkness and destruction.

Maxim : To go or not to go to church is the choice of every person's heart. You yourself choose with your heart what you need most, what is necessary and important.

Irina : Yes, also about the church. Do I need to go to church to receive communion?

The fact is that the church is not only an organization on Earth, it is also a certain egregor; only those who feel in their hearts that there is Divine grace there should go there.

If a person sincerely feels that Divine grace is in another religious denomination, religion, it is better for him to go there and walk that path, and he will also come to God.

All religions on Earth are filled with the same Spirit of love for God, love for one's neighbor and for oneself, but those details in different religions that have been created over centuries, or even millennia, fill the egregors with certain vibrations that are suitable for different people.

If you believe that only the Orthodox Church has truth, you may well go there. If at the same time you condemn in your Soul or out loud in another denomination or religion, you will nullify all your good efforts.

Vladimir : Thank you very much! Next question.

44:32 Reading prayers. Prayers with different feelings.

Question : Good evening everyone. Greetings, Jesus and Archangels! Many Orthodox prayers contain the following statement: "I am an unworthy servant of God." My Soul resists, I want to feel that I am a beloved child of God. How should I approach this correctly, how should I pray correctly if I don't agree with it?

Irina : Thank you for the question, it is really very important.

The prayers that are written in Orthodox and Catholic prayer books were compiled by different people in different spiritual states.

To feel like a beloved child of God, the prayer that the incarnate Spirit of Vladimir read dear to my heart is enough.

This is “My Heavenly Father, who is in heaven. Hallowed be your name...” I gave this prayer to feel like a child of God.

The one who wrote the prayer in the suffering of his heart, “I am your unworthy servant,” he, of course, knew the prayer “Our Father,” but he was in a different spiritual state, in different vibrations. He felt a decrease in his vibrations, and from a state of despondency, perhaps suppressed anger, resentment, fear, he cried out to the Father as if over an abyss. Sometimes such conditions really do exist.

If you, my dear sister, have read the book “Psalms,” then you will find a lot of similar prayers there, and similar to the one that I commanded the students to read in a state of delight, divine ecstasy and other high feelings. But, to yours and mine, my sister and my daughter, it is with deep regret that such feelings overcome the hearts of earthlings.

Feelings are different, and everything must be respected. Therefore, the prayer that was written by this man is also dear to our Father, because he spoke sincerely.

He spoke to God as he felt. If he felt like an unworthy slave, he said so. And our Heavenly Father condescended to him with His love and filled this Spirit, His son, and his next few prayers were dedicated to the jubilation that he was now accepted into our heavenly Kingdom.

Therefore, if you are confused by some prayers, you do not need to read them forcibly. Read those prayers that come from your heart, they are suitable for your spiritual state. And, of course, turn in your simplest words to your Father, remembering that he is always next to

you and in you, he exists in your heart as long as you love everyone.

48:20 Quantum transition of the Earth. The essence of quantum transition.

Question : Good evening, dear friends! I greet you all in the light of the Creator. Dear Jesus, our good friend and comrade! If we understand correctly, the evolution of man on planet Earth must occur through the cell, so I have the following question for you: will the cells of animals, plants and the matter of planet Earth be changed?

Irina : Are you talking about the end of the cycle of the Universe?

Reply from the audience : Well, one of the periods.

Irina : If you are talking about a new state of the planet, which is called a quantum transition in the modern world, then the matter itself will remain the same as it is now.

Matter itself, including those material elements that make up the flesh of plants and animals, that is, the dense body of plants, animals and people, will remain the same. But new laws will be put into effect, lighter ones, filled with Divine love, which will allow existence on this planet at the same level as in the Interstellar Union.

49:59 Jesus' last physical sermon. The Apostles' readiness to preach.

Question : Dear Jesus! I sincerely thank you for always being among us and patronizing us, earthlings. I have a question: when did you address the Israelis in your sermon, saying that you came to save the one who had forgotten the name of Israel, and as I understand it, in order for them to understand - to rebuild from fear, resentment by the Creator Father, to rebuild to the perception of love and said that was sent to the peoples of the north. I want to understand what you meant about the Slavs, who then led a pagan lifestyle? Why then did the Israeli people need to express your presence and even spread it further? Thank you!

Irina : At that moment when I told my disciples that I had been sent to the lost sheep of the house of Israel, they were not yet ready to preach throughout the world.

In order for them to prepare to preach throughout the world, they had to receive and know the Holy Spirit, which filled their hearts on the fiftieth day after I rose from the dead. And before my physical body was taken to Burhad, to Pikran, I met with them. Not only with the twelve disciples, but also with many of their other disciples who followed them. My Apostles, the twelve disciples, already had their own disciples. I addressed them with the last physical sermon on Earth, in which I said: “Now you can go all over the world and preach the Gospel of the Kingdom, including to the Slavs.” My beloved Divine Spirit went there, whom I was the first to call into my Kingdom, into my discipleship - Andrew the First-Called.

Vladimir : Thank you very much! Maria, next question.

52:45 Incurable diseases of children. Helping terminally ill children.

Question : Thank you! Dear Jesus, I have been involved in charity work for several years now, we help children with cerebral palsy, autism, cancer, hemophilia, and now there are a lot of these children. Therefore, the question is: how can these children be helped in general, and what is needed to raise vibrations, or something else, so that healthier children are incarnated? I understand that there is probably some kind of karmic task, but before, it seems to me that there was less of this.

Irina : This has never happened less on this planet. Just a hundred years ago, about 30% of children under five died. Now this figure is much lower, and there is a spiritual reason here: those Spirits who incarnate into incurable bodies at the current level of development of your science are incarnated with special tasks so that their Spirit develops the qualities of patience, humility and love for their body.

For their relatives and parents, there is also an implementation task in

that they learn unconditional love for that child who will not be able to repay them in kind when they reach old age.

You can only help them by explaining to them the real spiritual reason for their condition, first of all, to their parents, and helping them to believe in the mercy of God and that their earthly life does not end here, but to believe in the eternity of the Spirit and the Divine Love. This is the only way you can help them pass these lessons and tests.

Maxim : Send them your Light of love. To tell that we are not only a body, but also a Spirit, and the tasks of the Spirit in this body are primary, and he chose this body for a reason.

56:12 Quantum transition – transition to a new level of consciousness. Awareness through personal action.

Question : Good evening, dear Jesus! This is the question: everything in this world develops, evolving, and each time has its own words and its own form of conveying your teaching of the Light of Truth. First it was a sermon, then the Apostles as your messengers, the “Gospel”, religion, prayer, priest, temple.

In this regard, how could your teaching sound in modern conditions so that your truth is heard and accepted by those Souls who incarnate today? And in what form, in what modern form can your teaching be carried and disseminated so that it is accessible and simple and touches the hearts of everyone?

Irina : Thank you for the question. All the teachings about my love and about my mission, about the love of the Heavenly Father and about the tools for raising one’s vibrations have long been given to the world in every detail. You have numerous theological works, religious books, both ancient and modern authors in completely different religions, in which there are very deep, correct spiritual things. There is no shortage of information. As you correctly noted, there is a lack of listeners.

For what reason does this happen? For the reason, as I already said,

your civilization is currently going through a stage of materialism, from which flow your ideas about the priority of the material over the spiritual, and all your other negative structures, negative egregors grow from this food.

This stage of materialism is necessary for you, for your planet, so that the civilization that exists on Earth can understand the value of spiritual priorities over material ones.

Now the moment is coming, which you call the quantum transition. This is a transition to a new level of consciousness. At this level of consciousness, the quantum fields of your bodies will be changed so that you and the children born to you can feel the Spiritual world more. And many of you have already felt the changes occurring at the level of consciousness. Many of you began to feel contact with invisible entities, many began to have strange dreams. Many of you have felt the presence of Light in your lives. This is all a consequence of the quantum transition process.

What can you do to make yourself heard by many? In this world there are many who talk about spirituality, but very few who listen. We need to move from the category of those who speak to the category of those who act. Only this can ignite Light in the hearts of those for whom loud words about enlightenment are just unsubstantiated nonsense. For such people, the priority is the truth only in the real matter.

When a person who does not believe in the Light, in God, sees around him people who unselfishly do real good deeds, spend their material, time and power resources on this, then their hearts, covered with a crust of ice of alienation, open, and they are ready to listen to the sermon about the Light.

Maxim : I know from myself that only through personal example, through personal awareness and through personal actions, that is, no matter what you say to another person, if you don’t do it yourself, the other person will never hear it. This is called self-deception in one's spirituality.

When we hate our parents, but tell a friend that we go to church, pray

to God and are baptized, we deceive ourselves that we are growing spiritually.

Irina : He says that true Divine love is always active, it is not just a pleasant feeling, it is always an action through the body.

Maxim : But without imposing this action.

Irina : Yes. He says that if a person is in need, and you disinterestedly, free of charge, help him in word, deed or thought, he will be inclined to hear your words. Otherwise, they will be like an empty phrase to him.

It happens that a man who feeds the hungry and clothes the naked leads more people than the brightest active preacher who spends his time only to increase his business.

Vladimir : Thank you!

1:03:33 Jesus in a Slavic temple at the mouth of the Oka.

Question : Greetings to all conference participants! Dear Jesus, my fellow countrymen from Nizhny Novgorod are interested in the following question: in the first conference you said that you were at the confluence of the Oka and Volga rivers. Now our city is located there. So they want to know for what purpose you were there, what tasks you performed?

Irina : At the time I was there, there was no city, but a collection of 15 villages that stood maybe 12–20 km apart from each other.

What was my purpose there? At the confluence of the Oka and Volga, on the banks of the mouth of the Oka, there stood a huge Slavic temple, which was dedicated not to any one God, but to all Gods at the same time.

This temple consisted of three floors, the topmost floor was dedicated

to the one God who created the Universe. That’s what they called him, the Most High Family. The Slavs believed that nature separated from him, that is, nature was considered the daughter of Rod. What you see, the visible world, was considered nature, the invisible part of the world was considered the Family that created nature.

I was in this temple, in this temple, examined the statues of the Gods, communicated with those plasmoid civilizations of which they were the personification, climbed to the top floor, to the place that was under a huge dome, only dedicated priests who were over forty were allowed there five years. I, then still a fourteen-year-old boy, was allowed in there alone, unaccompanied. I was there for about two hours and realized that this being, who is worshiped by the northern people so far from us, is my Heavenly Father.

Maria : Thank you! Next question.

1:06:47 Profanity.

Question : Hello, our new friends! It's a pity that I don't see you yet. Dear Jesus! Sometimes, not from the mind, but from emotions, we can swear; people call it “cursing.” Is this a very big sin or not?

Irina : What was the question?

Maxim : Is swearing a sin? Is it possible to continue swearing?

Irina : My dear spiritual daughter and sister in the Divine Light, it’s not about the words that the human tongue utters, but about what stands behind it.

What is sin? Sin is a state of the Soul. Sin is not just an action, a carelessly spoken word, or a crime committed. This is only a consequence of sin. Sin itself is much deeper, it nests in the human heart when it is not filled with love, that unconditional love with which it can forgive everything and at the same time fill all the people around with its Light, no matter how evil they may be.

Now tell me, are you saying these words in a state of love? The words you are talking about do not in themselves carry any negativity. People themselves put negativity into them, and even if a person pronounces them absolutely neutrally, then before that person so much negative energy was invested in these words that they sat like a heavy load in the egregors of the earth with a certain meaning. That is, we can say that their vibrations are on the lower floors of the astral world.

Therefore, even when pronouncing these words absolutely neutrally or with positive emotions, there is a risk that you will be heard by entities that are at other vibration levels.

Of course, for a bright person who is filled with love, this is safe, but such a bright person has no need to tempt and tease those dark Spirits who may be nearby.

The words themselves are safe, it's all about the motive, that is, the reason for their pronunciation. And how great a sin this is, I say again, the sin is not the words themselves, but the emotions with which they are pronounced.

If you say ordinary words with the same emotions, then the emotions themselves do not disappear. But behind the emotions lie feelings, and even deeper are mental, mental attitudes, and in this depth of the human heart Angels can live, it is as if he is in a state of vibration of Angels, or he will be in a state of vibration of demons. Then he will have the appropriate emotions and words.

Maxim : I would like to add. In our project "Cassiopeia" we have a phrase: "I send you the Light of my love." I consider it a huge achievement that sometimes in scandalous correspondence, in the end, with feeling, the Light wishes for their love.

At least try to change the words we speak, then they turn into feelings, and ultimately teach ourselves to express ourselves in a different form of our awareness. Therefore, for "Cassiopeia" I consider it a great achievement that people stop cursing and send the Light of their love.

Vladimir : Or sometimes: “Go to your Higher Self.”

Irina : Yes, indeed, some people, when arguing with them, say: “Please proceed to the Higher Self.” And, indeed, behind these words there may be hidden the emotions that Jesus was just talking about. But the fact is that the words themselves have a different vibration and can help change the vibrations and emotions of these people.

Vladimir : Thank you very much! Next question.

1:13:30 “Punishment to the seventh generation.” Generic tasks of incarnation. Personal responsibility in embodiment. National task of implementation.

Question : Dear Jesus! Tell me, please, are children responsible for the sins of their parents and grandparents, and is there currently punishment up to the seventh generation?

Irina : Punishment of children for the sins of their parents has never existed.

What is punishment? This is a consequence of an act that was committed in low vibrations. There is the concept of personal responsibility, and there is the concept of generic tasks. So these are completely different concepts.

If the Spirit is born in a generic egregor in which a lot of negativity has accumulated, he himself voluntarily takes upon himself one of his tasks, which is designated as a generic task: to help this generic egregor come out of low vibrations. But this is not a punishment. This is a voluntary decision of the Spirit itself, which goes to incarnation through a certain egregor.

The egregor itself, accepting the incarnating Spirit, gives a certain amount of its energy in order to support the Soul of the incarnated child throughout the pregnancy and five to seven years of his life. This can be different for Spirits. I said an average period, but in any case it supports the Soul, its development, vital activity is supported by the

tribal egregor, including the egregor of the nationality through which the Spirit was incarnated. The national task, the task of the people, which in modern language is called a social task, is also one of the tasks of the Spirit, which is embodied in one or another people on Earth.

But both are not punishments. These are only those tasks that, when completed, help the Spirit fulfill his personal tasks, his personal plan of incarnation, for which he came here to raise his level.

Maxim : I'll clarify now. What was meant by the expression punishment for the sins of parents to the "seventh generation"? What could be implied in this expression?

Irina : You need to take the entire phrase that is in the Bible, and not tear it out of the entire narrative. It says: "Punishment will come to those who commit sins to the seventh generation, and reward will come to those who do good deeds to a thousand generations."

Here the comparison was meant: a thousand and seven. It was meant that the one who destroys his ancestral egregor with negativity, which he will sow on Earth, will create seven times more negativity, which will then pass into this ancestral egregor, and which will have to be resolved by those Spirits who will incarnate through him, including, perhaps, himself, if he decides to incarnate here again. But the Consulting Spirits can send him to this family again. And he himself will reap his negativity seven times. That is, this is not a punishment, but will be its generic task.

And also, together with him, other Spirits who will be incarnated next to him will help translate him into Light. But another example was given here. If you do good and fill your ancestral egregor with Light, then you will fill it, one might say, for a thousand births to come. You will pass on to those who will be born after you, including you, if you are embodied in it, that Light that will help you harmonize in this world that is still alien to you, while you are a child.

Maxim : That is, by giving birth to love and Light, we give birth to them for our next incarnations.

1:19:38 Divine energy. Transfiguration.

Question : I wanted to ask about the feat of Jesus that he performed for us. What did he talk about with Moses, and what was the meaning of the transfiguration?

Irina : Thank you for the question. I've been waiting for him for a long time. In general, I expected it from those who ask questions at conferences with me, who ask questions through Irina Podzorova.

I was waiting for the question about the transfiguration, since it was a well-known event in my personal history and the history of all Christianity.

What happened then? I took several students and climbed the mountain to pray to the Father and meet my friends - colleagues from the planet Pikran.

It was night. A thunderstorm was starting. The whole sky was covered with clouds, and flashes of lightning sparkled, which did not bring thunder.

We got up. And when I prayed to the Father and completely united with Him with my Spirit, that Divine Light of the Firstborn Son, which was always in me, became visible through my body, this changed my body in such a way that Light began to emanate from me, maybe kilometers away. ten. The entire surrounding area lit up. The mountain was in the distance. But those who were nearby, of course, saw just a white light. The clothes I was wearing were brown, but the light shone through them so much that in people’s eyes they became snow-white.

They understood what was happening, but were surprised that the physical body did not burn up in this light.

I explained to them that the physical body is the same Divine energy, only in dense form, so it can transmit Divine Light of any strength and in any flow.

My students felt so harmonious, natural and calm that they lost the sense of time and wanted it to remain forever. They said they would live here. They said: “We are in the Kingdom of Heaven.”

Their mentors began to come to them. I saw them. It was not only Moses and Elijah, it was also other disembodied Spirits, Archangels. They came to them from the world of disembodied Spirits, talked with them, and this lasted, if you look at the time of the physical world, for about three hours. Then a ship from the planet Pikran, Burkhad, flew to me, but my students perceived this as the arrival of another Angels.

I told the students to go down the mountain, and I flew off on a ship to one of the bases, where I continued communicating, maybe for about two more hours.

When they brought me back, it was already one hour after dawn, it was dawn, and when I came to my students, they had already told others and greeted me (one might say that their attitude had changed) as God, because in this radiance they saw sign of the Divine.

Maxim : Can you imagine the state? I have now introduced these three students. Angels, light, flying saucer. It is something! Thank you very much, Jesus! It was very informative. Thank you for the images you gave!

Vladimir : Thank you! Next question.

1:26:32 The resurrection and healing of Lazarus.

Question : Dear Jesus, I love you! I want to ask you about the resurrection of Lazarus. How did this happen? Tell me please.

Irina : Lazar has been my friend since childhood. His two sisters were a little younger than him, and we were also family friends. And when I grew up and went to preach, I learned about his condition. They communicated through mutual friends, and then the news reached me that he was seriously ill. He had leprosy. Naturally, I found out the

spiritual cause of this disease. I was physically far away, but I came to him astrally and talked about it with his Spirit.

We came to a conclusion on how to eliminate the spiritual causes of the disease. He was still quite young, not even forty years old. Then I continued to preach, and one day his sister appeared next to me, then the only transport was horses, she arrived in a cart and said that Lazarus had died.

I was very surprised, because based on his condition, which was in our last conversation not more than five to seven days ago, I did not imagine that he could leave the incarnation. Therefore, I immediately sent my phantom - I could then, as now, send many thousands of my phantoms.

I created my phantom and sent it to the Spiritual World to find out what happened. It happened instantly. And I learned that the Spirit of Lazarus left the body, the brain of his body was affected by an infectious process. Unfortunately, the body could not cope with these microorganisms, although the spiritual cause was eliminated. At that time there were no drugs that could help the body.

Unfortunately, there were not enough resources, and I saw that his brain was damaged, the Spirit had left the body and was in the astral world, but the connection between it and the body had not yet been completely interrupted. In your opinion, he was in a state of deep coma, but I felt that he was not among his relatives, he had already been buried.

Unfortunately, at that time it was very common when people were buried in a state of unconsciousness, there were no legal signs that could prevent this from happening.

Usually the body was examined by a priest who did not touch it, especially since Lazarus was sick with leprosy, the young priest did not take risks and did not properly check all the signs of life, and ordered him to be buried.

I saw that with each passing hour this connection between the Spirit and the body became more and more tenuous. And then I told his sister: “Let’s go faster.” We got into her carriage. It took about three days to drive it. We changed horses and ate practically nothing, I supported him energetically and asked my Archangel friends to do this, but we had to hurry, since the physical body could not remain in this state for long. In order to change it, I needed to be physically present next to it in order to direct the energy of my Divine will to connect. For the first time during my incarnation on Earth, I asked the heavenly Father to open the future for me so that I could see whether I would succeed or not. He met me halfway, since the future, in all its variety of options, is known only to my Father.

I arrived on time, four days had passed since he was buried, and while I was sitting in the cave - this was then a common method of burial in the mountainous region, I put my hand to the stone with which the entrance was blocked and directed energy through it to restore his brain, body and for the return of the Spirit. I stood for about forty minutes in a state of complete merging with the Divine flow; from this state, those people who were not vibrationally ready for this arose fear, and they stayed away.

Then I felt that the Spirit had returned, I walked away and ordered those men who were present there to quickly remove the stone in order to help him, give him certain food, medicine, etc.

And when I said: “Roll away the stone,” they even objected that they could not do this, because there would be a smell of decay. They doubted whether this should be done. I addressed them with a short sermon, which, unfortunately, was not included in the “Gospel,” about the need to completely trust God, and not the smell of decay, but the fact that you cannot help a person who can be helped.

They rolled away the stone, Lazarus came out on his own, and everyone was amazed. Then I healed him for several more days energetically and spiritually. They brought him the necessary medicines, made on Earth according to my prescription, which helped his body.

Maria : Dear Jesus, our interstellar friends, you probably cannot even

imagine how much this information explaining miracles and holy scriptures helps us, our civilization, to regain trust, faith in these scriptures, which we perceived as myths, fairy tales, that something completely implausible, something a modern person could not believe.

Thank you very much again!

1:36:52 Communion is a connection with Jesus. Will there be help from aliens in a critical situation?

Question : Dear Jesus, I welcome you to planet Earth! I love and thank you from the bottom of my heart! And from the bottom of my heart I ask you to forgive me.

I wanted to ask you a question that concerns our civilization on planet Earth.

There is an expression that a hair from a person's head will not fall without your will. Can we all count on your help in a critical situation to preserve our civilization, and how important is what is happening on our planet to you personally? What is your will for us? And if you are not the only one making decisions, then are there many more such friends for our planet who, perhaps, will help us survive, because today you yourself know what is happening here? Thank you!

Maxim : This is more than a question. Ask one question.

Question from the audience : If we have a critical situation on planet Earth, we will be 100% on our own and cannot count on the help of Jesus and his friends?

Irina: My dear sister! Love cannot be proven with words. She is shown only by her deeds. Look at the deeds of each day that I was in incarnation. If I had been indifferent to you, I would never have agreed to go through what I went through. And although I am the Firstborn Divine Son, due to my more subtle sensitivity, including both my body and my Spirit, it was not at all easy for me to perceive the actions of earthly people that were performed in relation to me.

But, despite the fact that I knew all this before incarnation, I went to the point of incarnating and giving my body as a sacrifice to my love in order to raise your vibrations, to give you an example, and I reconnected with my body forever for this to help you raise your vibration every time you connect with me. And each of your communion of my blood and flesh passes through me from the top of my head to the tips of my toes. I feel every touch to my Soul, I perceive it with my whole being. I absorb you into me like a sponge water, in order to give back the love with which I am overwhelmed.

And if you become like me in the desire to give your love, then you will avoid all those negative aspects that were predicted by me and my student John the Theologian in the book of Revelation.

The scenario that was given is just one of the worst scenarios in your history, it was given to you as a warning of what will happen if love is absent. But, naturally, you will not be left to the mercy of fate in a critical situation.

The Interstellar Union, which works entirely under my supervision, will come to the rescue and will do everything possible to save your civilization and your planet in a form in which it can be preserved in the conditions in which you put it.

Maxim : I hope they won't transport us in cages to Disara and feed us bananas. Here is the moment not to rely on our star friends, but to raise our level of awareness so much as to dissolve in the words that Christ spoke. This is love for each other. How can we not show it if this love is not in each of us. We need to start with each of us, to spread this love precisely.

Vladimir : There is polygamy in Disaru. Question.

1:42:45 Place of Jesus' baptism on the Jordan River.

Question : Dear Jesus! Let me ask you a question: where exactly is the place of your baptism on the Jordan River located geographically now?

Irina : Exactly geographically it is located, he tells me, about 30 km south of Jerusalem. Somewhere in that area.

Maxim : Trick question.

Irina : The image shows. I need a map. Shows the point.

Maxim : I need a map. Then they could show it. Therefore, the trick question disappears. Israel or Jordan?

Irina : The fact is that he traveled not only around Israel and Jordan, but almost throughout the entire planet, including on the ships of the Burkhadians.

But he was actually baptized in the Jordan River, if that is the baptism that John the Baptist performed. He's showing me the point now. He can't say for sure, but he can show the place. It was south of Jerusalem. Nobody paid attention to it then.

1:45:13 Plans for earthly civilization. The path to universal love.

Question : I salute Jesus! Was it planned for our Earth to become a station of Light and love, and when will the depreciation of humanity occur? From the word "love". That's what they say in our church.

Maxim : Whatever they come up with.

Irina : What is the question about?

Maxim : Was the Earth planned as a station of Light?

Irina : Of course, it was and is still planned that earthly civilization will become one of the leading races in the Galaxy, of course, light in the Interstellar Union, you just will still need to go through a long path of

discovering the Divine forces within yourself, and go through a long path to control these forces for the benefit of yourself and others.

The second question: what needs to be done for universal love? Become this love for yourself and for the people around you, so that each of them follows your example and carries it further.

1:47:00 Interpretation of the phrase “Marriages are made in heaven.” Wedding. Blessing.

Question : Dear Jesus, thank you! There is a phrase “marriages are made in heaven.” How true is this?

Irina : “Marriages are made in heaven” - this proverb speaks of the spiritual truth that many unions of Souls on Earth are planned in the Spiritual world. Heaven is an image of the Spiritual world. That is, it is very possible that the future husband and wife meet in the Spiritual world and agree on interaction on Earth for one purpose or another. For example, in order to embody certain Spirits, to create a mini generic egregor, for example. Engage in some specific activity for the purpose of spiritual evolution of yourself and other people.

How does this relate to a wedding?

Wedding is a mysterious act of Christian ministers, through which marriage is blessed, the union between husband and wife is blessed.

What is it that is blessed? Through the religious egregor, the Archangels Gabriel, Uriel and Raphael, who are present here, the Archangels, the guardians of the Christian religious egregor, give their energy, the Light of their love, fill the fields of men and women with this Light, of course, as much as they are able to accept for that , so that they can remember this Light in the future and develop in themselves that love that will go into eternity.

Voice from the audience : Thank you!

1:49:30 Accelerating the evolution of earthly civilization.

Question : Our Father who art in heaven! Thank you for everything. I apologize for all the sins I have committed. Love you.

I would like to ask the following question: is it possible to accelerate the evolution of earthly civilization? And how can this be done if it is Your Divine will? Thank you!

Irina : The Divine will of my Heavenly Father is that the evolution of any civilization, any Spirit should take place only according to His will. Accelerating the evolution of any community of intelligent beings and even one intelligent being separately is impossible without His desire for this.

Only you yourself can accelerate evolution, since acceleration against your will means limiting your free will or completely depriving it, which contradicts the love of the heavenly Father for all of us equally, whether you are going through your path of spiritual evolution towards development or degradation.

Maxim : Where should we speed up more? You can look at the yeti, we are not accelerated. Therefore, regarding the acceleration of evolution, here, really, only through awareness. The more aware we become, the more energetic we become, and the more changes occur at the genetic level. Here we accelerate ourselves in the evolutionary process.

Voice : Maxim, Jesus, thank you!

Maxim : A year and a half of living with aliens is taking its toll. When you communicate every day with the Archangels, with structures, with felinoids, with humanoids, with reptilians, you hear a huge basis of information and come to a state of awareness, you begin to understand that absolutely all the puzzles fit together, even those that didn’t fit together before. Therefore, I want to complement the answers that are given, sometimes even lower the vibrations so that this answer to the question that was asked goes deep. Because I myself went

through high and low vibrations. When, together with Irina, we began to project, to carry this Light, I wanted to bring it to the very depths with all my inner love. This is not because I want to show that I know more than others, but because I want to get to the point where they hit me all the time. And these daily insights, the amount of awareness that came daily at the moment of communication, sometimes makes it possible to further construct the semantic series of the point of the question itself.

1:53:10 Was Jesus married? Tomb of Jesus Christ.

Question from the audience : Dear Jesus, I thank you that you are present here in the form of a phantom, and I can ask a provocative question: please tell me, were you married?

I will explain. The fact is that 2,000 years ago, in the social conditions where Jesus was born, a man was obliged to marry, this was not discussed at all. This is the first point.

Second point. Today, Israeli scholars find burials in dungeons near Jerusalem, and there is a burial in which it is written that “Jesus, Mary and Joseph are buried here.”

Irina : Jesus is buried, you say? I'm not buried. I have been living in Burkhad for 2,000 years.

Whose grave was found if I'm here? My body is now on the planet Pikran, I have returned to my island. Whose grave was found then, like Jesus, his wife and children? Not mine. I am in my physical body on Picran.

Regarding the supposedly obligatory marriage for everyone, show me the Torah text, my daughter, where this applied to the Nazarenes. Will you find it? I was a Nazarene from birth, not even a razor touched my hair. Do you know this word “Nazarene”?

Question from the audience : I asked a specific question: was Jesus married? Yes or no?

Irina : No, he already answered this question. (Mirah Count speaking). He believes that we warned representatives of the planet Burhad before the conference that there would be people who had not watched the previous videos.

The questions are just repeated.

Maxim : There are many different Jesuses who called themselves that. There are many different contactees who contacted Jesus and took his name. If we take in general those people who are contacts with Jesus, who really consider themselves to be Jesus and even change their name to Jesus in their passport. That is, they have Jesus Christ written in their passport. There have been and will be many such people. I don't remember where in Europe there was a meeting of 1500 Jesuses. Seriously. And each Jesus proved to others that he was real. This is called the full experience of Christ consciousness. This is when you have such a strong and deep faith in the Spirit of Christ, and when you clearly understand that you are part of it, you begin to absolutely believe in it. This is normal. And many such graves are found. This is not just one grave.

There is a grave near the Black Sea, there is a cave where this Jesus lives, there is one on a river in India, they say that he still lives. A tribe of children are already running around, little Jesus.

Everything is built on faith. That's how you believe in your heart, that's how it is for you.

Irina : Why were Nazarenes obliged to marry?

Maxim : You need to read the Bible. I myself am not educated in this regard, of course. Didn't finish reading the Bible. I have the information we asked for. There is enough of it in this world to consciously understand.

Vladimir : Thank you very much!

Irina : He now says: there were simply others in Israel who were not

married not only at 34 years old, but also for much longer. And this fact is actually known, including from the writings of historians.

1:58:33 Life expectancy on Earth. Quality of life on Earth.

Question : Dear, beloved Jesus, all the guests present in the hall, I thank you for the transformations that are taking place during this retreat, and I want to ask this question: a lot is happening in our life on Earth: a quantum leap, an increase in vibrations, and spiritual growth of people. And I see it, and the people present in this room see it. Is it possible to increase the life expectancy of people on Earth? She's so short. Are there technologies to slow down the aging of the physical body? Thank you!

Maxim : I just want to say: for this we are opening a Wellness Center. Sorry, I didn't do it on purpose.

Irina : The whole point is that you need to care not about lengthening your life, but about filling it. The life expectancy that you have is optimal for your level of spiritual development, for your level of aggregate social egregors.

Technologies for extending physical life will be given to you by the Spiritual World or the Interstellar Union when you enter it, only in the case when the consciousness of the majority of earthlings is ready to use the increased time of incarnation for creation.

At the moment, when more than 70% of the total population of planet Earth are materialists, they have low vibrations to one degree or another, life extension technologies will only lead to the degradation of people.

If you are so conscious that you are ready to live in this body for many centuries, think about those Spirits, about less conscious people who will receive these technologies along with you. What will they turn their lives into? Think about them and show compassion.

Maxim : Maybe then it’s in vain to open the Wellness Center?

Irina : Health improvement is not life extension. This is different. This is filling life with a new quality, new sensations. MidgasKaus, present here, also talked with the phantom of Christ, they very quickly exchanged thought forms.

Jesus says that what Irina's curator, who is a biologist, has now conveyed, is observing the process of opening the Wellness Center and the procedures that take place in it at the energy level - what is this? This is not prolongation of life, it is filling the body and life with a different quality. This is a change in the vibrations of the body at the quantum level, because the vibrations that pass through these devices are not only the vibrations of these devices, but also those of the people who use them. That is, any impact of the device on a physical person is formed through energy interaction with the human field. And here the opportunity to fill your life with a new quality, increase sensitivity, increase the level of perception and improve physical health, not prolong life - these are different things. Of course, provided that we work on the spiritual causes of the disease.

Maxim : If you joke with aliens, you'll get a full lecture. The last two questions, and we will end our conference. Please don't disperse. I'll tell you what we'll do next. There will be group classes. Organizing work with 150 people is a lot of work. We remain silent, listen and do what I say.

2:03:51 Why God allowed war 12,000 years ago.

Question : Dear Jesus! I greet You and everyone present here in the Light of the one God the Father! The question is: what was God's providence that allowed the war 12,000 years ago?

Irina : The providence of God, who allows any wars on planets or in outer space, is always the same, it consists of two main components: the first component is the possibility of manifestation of the complete freedom of those Spirits who start a war, they also have free will, and if to deprive them of the opportunity to fulfill it - this will be the deprivation of their Divine status, the Divine will.

And the second reason for this providence - the admission of evil, exists in the example that this war brings for subsequent generations, that is, it is an example of what happens to the lives of those people and to that civilization that allowed negativity and evil into their Souls.

If there is no such example, then it will be much more difficult to move towards the Light, since there will be no understanding of the need to raise one's vibrations.

Voice from the audience : Thank you!

Irina : I don't hear the question.

Voice from the audience : Those who attacked our planet 12,000 years ago, reptilians...

Irina : So what?

Voice from the audience : It was aggression from outside, not from within civilization.

Maxim : What attracted this aggression?

Irina : The fact is that if you look at the war of one people against another, it will be from outside this people.

Maxim : Let's have one last question.

Irina : The same spirits incarnate there.

2:06:34 Concordia Antarova - contactor?

Question : Greetings, dear Jesus! My question is: was the author of the book "Two Lives" Concordia Antarova a contactee, and if so, who

gave her spiritual knowledge?

Irina : We need to show you a photo.

Maxim : It’s hard to define names there.

Irina : Perhaps this is a pseudonym. Need a photo.

2:07:09 The likelihood of the restoration of the Soviet Union to its former quality.

Question from the audience : Greetings, our beloved teacher Jesus! I think it's in everyone's heart. The soul remains divorced from love, from the earth. The question is: is it potentially possible for the unification of former ethnic groups, largely separate states, republics of the former Soviet Union, to become an example for all humanity?

Irina : That is, is it possible to unite the republics that were part of the USSR in the same quality and composition? Do I get it right?

Voice from the audience : In the same composition, but in a different quality: mutual acceptance and harmonious relationship with each other.

Irina : I mean specifically the legal side of the issue.

Voice from the audience : Legal, including.

Irina : That is, is it possible to restore the Soviet Union to its former borders and rights?

Voice: Yes. As an example to all humanity.

Irina : According to the Earth’s Probability Lines, the possibility of

recreating the USSR in its previous quality, albeit with new laws, but with the unification of fifteen republics under the same conditions and rights - the probability of this event occurring in the next two hundred years is less than 4%.

2:09:12 Explaining the story of money from Acts.

Question : Dear Jesus! I appeal to you once again.

There is an episode in “Acts” when a church is formed, the disciples give money to the temple, and there is a family that hides the money, and with it they die, both husband and wife. Why such a punishment?

Irina : The question is clear, thank you. He is very important.

Why do you call the actions of the Spirit of man himself punishment? This is precisely because of the original translation of the text.

I will explain to you what happened there in reality. In reality, everything that is described happened, that is, in the First Apostolic Church there was a custom - it was called the church later: to create, so to speak, a common fund to help those in need and for the journey of the Apostles themselves, to support their families from the estates of those who came to this church, those who were baptized.

But there was a law that you had to voluntarily give up either part of your property or all of it. Moreover, he did this in front of the entire community, in front of the Apostles. A believer came and said: “I have so much, I am ready to allocate, for example, a tenth for the needs of the church,” since every person at that time understood that the development of the church is impossible without material resources, and was ready to donate these funds.

Every believer understood that for the development of every organization, including religious and spiritual ones, material resources are needed, because even writing spiritual ideas requires ink and paper. At that time, of course, everyone understood this. We agreed freely among ourselves to create such a law of the Apostles. This law

was announced to all baptized Jews and Gentiles. It said that if you wanted to sacrifice a certain part of your estate or your entire estate to God, you could do so. And for God, it means for the development of his work of Light. This was all done voluntarily, understanding the extent of responsibility.

It so happened that one family was initially against it: the husband wanted to give everything, but the wife opposed it. But this conversation was in their family circle. She only wanted to give away a part, who knows what.

And those who gave everything remained to live in the community, they were helped, provided financially, and the wife stopped her husband and said: “You never know what will happen, what if we have to leave this place, what if some quarrels or conflicts arise.”

They had a plot of land with some buildings, and the husband, before selling the plot, made a decision and told the Apostles that he was selling everything. But on the last night before this sale, he still agreed with his wife that they would keep part of the money from this sale for themselves. But he did not announce his latest decision. He developed shame, fear of revoking his original word before the Apostles. He was afraid of appearing weak. Although no one would condemn him for this, it was his personal attitude that he should be the master of his word.

It so happened that when he brought the money to the Apostles, he said: “This is what I promised. This is for all my property,” but in his aura, in his energy field, there were traces of fear of lies.

The Apostle Peter did not have any condemnation, he was simply surprised at the state of a believer who sacrifices to God in a state of these low vibrations. Then what is this money charged with? What energy did he put into it? He was simply surprised: “How did you allow the thought in your heart to lie to the Holy Spirit?”

He did not order him to give this money, it was simply unthinkable for him. You would have said right away that you and your wife decided on the last night, it was completely your right. He understood this

himself. He also added something that Luke did not write in the book of Acts: “And with such a mood, with such a Spirit, do you give money for the development of the church? Why are you giving them then? To appear more loving than you really are?

Apostle Peter saw all this in his aura. And when he asked in surprise, this man realized that his little secret, his little lie, was known.

And from this fame, his little shameful secret became huge in his mind. Such a feeling of fear and despondency arose in him that he lied, the realization came that he really had lied. Not even because of money, but because of this understanding of one’s weakness. Because he couldn't tell it like it was.

The realization of his insignificance before God came to him, and from this anger at himself his blood pressure rose greatly, and a weak vessel in the brain simply burst, and he fell dead. It was an emotional explosion.

Maxim : This is what happens when you don’t listen to a woman.

Irina : But the Apostles themselves, including Peter, were taken aback by this, they did not expect such a reaction, they tried to help him, provide first aid, and prayed. But the Spirit has already left.

I am now saying what happened on the physical level, without touching on spiritual reasons.

And then the Apostles and believers fell into a deep, not so much fear, but such awe that they saw a Divine sign in this. They did not fully know his condition.

And when his wife came, she asked: “Where is her husband?” - The Apostle Peter said that he had already been taken to the funeral. She began to ask what happened, and they explained to her that his lies had been revealed, and she began to say that they began to demand from him, and he died from this. It says she got into a small argument.

Peter told her that people were coming in who had carried her husband away: “Have you really lost the fear of God, such as humility, under such circumstances of your husband’s death? If you don’t humble yourself before God, they can take you out too.” She was frightened by this, she also had an attack and died.

This was the event. Such a conversation took place, and she, too, naturally felt that it happened because of her.

This is what happened between them. No one accused her of anything, they simply warned her about how she could blame the people her husband tried to deceive. Moreover, he died from Divine intervention, because they knew that without the Divine will this does not happen.

2:20:54 Blessing from Jesus.

Vladimir : Our participants asked me to convey that they wanted to receive a blessing from Jesus for all of us before the end of the meeting.

Irina : My dear Souls, children of our common Divine Father! Each of you is now in the place and time where you need to be to complete your tasks.

I understand that each of you, to one degree or another, now feels my Divine energy and love directed towards you.

I know that you will leave this hall as different people, not the same people as you entered it. And I know that here you are changed every day.

In the evening you become different personalities compared to those who woke up in the morning. And I bless you to carry this Light of Divine love forever, endlessly and in full agreement with the Divine will and the Divine mind that is inside each of you.

2:22:25 History of the organization of the Center. Gratitude to the Archangels for participating in the conference.

Maxim : In fact, I am waiting for everyone on the Cassiopeia team and with all my heart I am ready to carry out this good cause together, this mission, perhaps, which I myself came up with.

I believe that the ultimate goal is to show you by personal example, including where your help goes. Really.

I want you to see and feel that everything you help goes towards exactly what the project does. We will start with the head Center in Voronezh, then little by little we will structure all the other centers. And when you become a member of the Cassiopeia team, and when we have trust between you and me, everything that I have, my team members have. I'm not going to pinch part of my property by listening to a woman. Everything that I have, the project has.

When we started this project, I quickly gave away everything valuable, what was needed and not needed, in order to organize a small Center in order to begin to transfer knowledge. Then hope appeared, then the Wellness Center appeared. Our mentors-curators helped do all this. And when I started organizing all this, you won't believe it - it was Divine providence. Those objects that had not been sold for 5-7 years "flew away" within a week after I said: "God, please give me the opportunity to do this. I want to organize a Center." And everything went.

I will always say that I am completely open to you in my words, actions, and finances. Many people donate money to me personally as an individual so that I can organize the Center. I will also transfer all the funds to this Center, this organization, and I will include all those who really help in the development of the Center as its founders. Thank you very much!

Irina : Archangels Michael, Gabriel, Uriel and Raphael listened attentively and thank each of you. There are actually a lot of contactees here with the Spiritual world, with the Christ Consciousness, with Jesus Christ.

Anyone who is in contact with Jesus Christ is at the same time a contactee with the Spiritual world, since the images of Christ are in the Christian religious egregor, which is located in the Spiritual world and with the planet Burkhad, Pikran.

Archangel Gabriel is incarnate, three are in a state of disembodiment, disembodied Spirits - they thank you for the very interesting deep questions and for the attention and trust with which you opened your hearts and put every word there, feeling that it could change the life of you and your loved ones . See you again, friends!

Maxim : I would like to ask: do you look like yourself here?

Irina : Yes. This is a very close image to my physical body. He shows a whiter and longer face, and larger eyes.

Maxim : Thank you!

Vladimir: I want to thank Jesus and everyone who came with him again for the invaluable information and for being here. For the first time in the history of mankind, such a meeting took place with their answers to our questions. Thank you!

Broadcast June 4, 2021

Participants:

Jesus Christ is the head of the Christian religious egregor on Earth, the Firstborn Son of God, our elder Brother;

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Mirakh Count is a representative of the planet Burkhad, a disciple of Jesus Christ, who is known in the Christian religious egregor as the Archangel Gabriel;

Archangels: Michael, Uriel, Raphael;

MidgasKaus - representative of the planet Esler, biologist, psychologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world;

Raom Tiyan is a representative from the planet Burhad, a specialist in energy interactions in the environment of the material world;

Vladimir Goldshtein – journalist and Facebook group administrator, assistant director of the Cassiopeia project;

Maria Sokalskaya is a moderator of the VKontakte group, head of the online learning project and other Cassiopeia projects.

#340 Fourth meeting with the phantom of Jesus Christ! Answers to questions from Cassiopeia subscribers. Part 1

https://blog.cassiopeia.center/chetvertaya-vstrecha-s-fantomom-iisusa-chast-1
https://www.youtube.com/watch?v=mmYB3H9g59g

00:25 Introduction of participants.

Maria: Hello, dear friends! My name is Maria Sokalskaya, I am one of the administrators of the Cassiopeia project and I greet you from the very center of Wiesbaden. Today we have another very interesting meeting with a friend, mentor and curator of our project, Jesus, who in the form of a phantom will answer questions from our subscribers through our respected universal contactee, in the very center of our project, in the city of Voronezh, Irina Podzorova.

Hello, Irochka, please tell us who is with us today besides Jesus?

Irina: Hello, dear friends, my name is Irina Podzorova, I am a contactee with extraterrestrial civilizations, and today we have a very important fourth conference with the phantom of Jesus Christ. There is a phantom of Jesus Christ present here. His friends and co-workers are also present here, who constantly move with Him - these are Archangel Michael and Archangel Gabriel, or Mirach Count, he also recently came up. Also present here are our curators, as always, observing - LiShioni from the planet Shimor, MidgasKaus from the planet Esler. The Phantom of Jesus Christ greets you all, and through Him the very essence and very person of Jesus Christ greets you.

I felt every person, his mood, his thoughts, his heart when you watched the previous three conferences with Irina Podzorova. Then I

answered your questions through her. I feel how many people watched these conferences and how you felt. I felt that you felt Me near and felt Me in your heart. Hello, Vladimir, hello Olesya, hello Maria. And the curator of our project is Maxim.

Maxim: I'm here, as always, I can't be seen much, but I can be heard well!

Maria: Yes, I am so pleased to welcome and introduce you to our administrator Olesya Smelova from beautiful Tuscany in Italy, who works tirelessly to ensure that you can see our video on YouTube. Hello, Olesya!

Olesya: Thank you! Hello Jesus, my heart is infinitely happy that I can hear and ask You questions. This opportunity is unique, so we thank you all.

Maria: And, of course, I am very glad to see and welcome our administrator Vladimir Goldstein from the suburbs of Chicago, but he is in the very center of my heart! Hello, Volodya!

Vladimir: I'm very glad, Masha, hello! In this case, right now, however, I am also in the center of another city, which is called Kyiv, it just so happened, that's why everything here is all the more unusual and good, I welcome everyone.

Maria: I thank all participants and give the floor to Olesya.

03:44 The concept of "Holy Trinity". The concepts of "God the Father", "God the Son", "Holy Spirit". The energy of the number "3".

Olesya: The first question that I would like to ask you: the Bible says that the Trinity is the manifestation of God in three hypostases. Could you describe each hypostasis from the point of view of whether this symbolism is somehow connected with our three creator races, what roles they play in this case, if it is them?

Irina: With your permission, Olesya, I will clarify that the word “Trinity” does not appear in the Bible. The word “Trinity” first appeared, was used, and recorded in writing around the end of the 2nd century in the written literature of ancient Christians. It was first included in the documents of the first church at the First Ecumenical Council, which gathered to examine various Christian dogmas and distinguish one thought from another. In general, the very concept of the Trinity was introduced for the purposes of apologetics, that is, the defense of My teaching from various distortions. For example, from the distortion that is now known to you in the form of Arianism.

Teacher Arius said that I, My Soul, My Spirit, appeared later than the Heavenly Father. That is, that He did not give birth to Me, but created Me. And in order to distinguish his teaching from the Christian one, the concept of the “Trinity” was introduced. Let me remind you what it originally meant: the Trinity is a symbol, a description of spiritual reality in our three-dimensional world. It includes God the Father, God the Son and God the Holy Spirit. How are these parts different, or, as they say in Christian language, the hypostases of the Trinity?

God the Father is the beginningless beginning of everything, the source of all matter and all Spirits, a living, intelligent, infinitely bright being that consists of the energy of absolute Love. But, in addition to energy, he has his essence, which also contains reason, a spiritual heart, energy, that is, He is similar to the human Soul, in general to any rational Spirit, only, of course, infinitely more. Not larger in size, but in capabilities, in energies, in the very structure of the essence, which is not a born Spirit, but the parent of Spirits.

God the Son - this is how they designated the spiritual essence that was born first. That’s what it’s called – the Firstborn Son. They denoted My essence. But, after My incarnation on Earth, I told people that the concept of “Son of God” includes not only I alone, but also everyone, because I conveyed a prayer that I invited people to pray, to turn to the Father, as I address - “Father My", "Our Father". Everyone who addresses himself with the words “Our Father” is a son or daughter of God. That is, “Son of God” - this hypostasis of the Trinity means all born Spirits.

“Holy Spirit” - He can be understood in different meanings, but His original meaning is God the Father, manifested through matter of any

energy, in any presence in the Universe. That is, God the Father - this is considered in the Spiritual world, more precisely outside of all worlds, outside the Spiritual world, the material world, in the place that you call in Christianity the “Kingdom of Heaven”. God the Father exists there, and His manifestation in the material world or in the Spiritual world is called the “Holy Spirit.” That is, this, one might say, is the incarnation of God the Father in the world he created. Therefore, in Christianity, the difference between the Holy Spirit and the Son of God is that the Son of God is born from God the Father, and the Holy Spirit comes from God the Father and is not born. “Comes from” is simply the transfer of an image, i.e. that he “descends” (was the original word). It was simply the embodiment of the image that He is not born, but manifests.

At the same time, later in Christian literature, “the Holy Spirit” began to mean different things. For example, the Holy Spirit very often refers to the non-embodied part of the person himself, what you call the “Higher Self.” Because the word “Spirit” is “Spiritual Self”, and from the word “Holy”, that is, “light”, that is, that part of the Light that is not embodied. As Irina was told on the planet Raom-Li (I know her journey), this is sometimes called the “Spiritual Self”. Also in some Christian books the “Holy Spirit” can be called an Angel. I have come across such understandings. And when we call “the Holy Spirit,” this does not mean that the first hypostasis of the Trinity, that is, God the Father, that He is not a Spirit, or that He is not a saint. He is also a Spirit, and He is also a saint, but He, His essence, is beyond the boundaries of all worlds. And the “Holy Spirit” is already carrying His energy into the world, so to speak.

As for the creators of earthlings. Yes, indeed, some representatives of those planets that created you, your bodies in the past, transfer the understanding of the “Trinity” to the three alien races of your creators (your bodies). In particular, for example, this is how representatives of the planet Tumesout understand this question.

But in general, the understanding of “trinity” appeared much earlier than the creation of earthlings. For example, any person or any humanoid that existed before a person consists of a body: an embodied part (or as you call it, "Soul") and a non-embodied part, which you call "Spirit". Here is also the embodiment of the number “3”. Just as you know, even according to the earthly doctrine of physical elements, an atom consists of protons, neutrons and electrons. And

according to the teachings of the Interstellar Union, the atom consists of three energy levels. Here, too, the trinity of nature is manifested.

This trinity can also be seen in various substances, in various material properties. For example, the physical world consists of three levels of density - solid, liquid, gaseous. And so on. Even in each of your cells, there are three types of ribonucleic acid: transport, messenger and ribosomal. This is also the embodiment of the characteristics of the number “3”.

Why is this happening? Because the number “3” carries energy. Each number carries a certain energy wave. The number “3” carries within itself an energetic wave of activity, that is, the activity of the manifestation of the Divine Light through force, through the emergence of something new. And the most important essence of the number “3” is the energy of movement of any kind. Therefore, it is not at all accidental, of course, that there were three alien genetic materials in your race, that is, three races created you. But do not forget about the fourth ancestor, which is your earthly primate, and who is also the product of the creation of many, many generations of subtle-material entities.

Maria: Thank you for such a detailed answer. Vladimir, your question!

17:55 The essence of the Bible text is about the casting out of demons by Jesus.

Vladimir: Dear Jesus, please tell me why, as we know from Scripture, You cast out demons, and did not at all send them the power of Your Love, as one could conclude based on Your teaching that it is necessary to put one cheek instead of the other, if you are offended, as many people think. But still, you cast out demons. How can these things be related to each other?

Maxim: Yes, and I would add, how in general should you work with demons? All people have different ideas about how to properly work with low vibrational entities. Therefore, the question is very serious, and concerns specifically the expulsion of demons and the possibility of their presence in a person.

Irina: Did I cast out a demon at that moment when I peacefully got out of the boat with my disciples and was walking along the shore when a man ran up to Me, in whose field there were these entities? He himself ran up to Me, and the first thing the man shouted (but he did not control himself at that moment, but the entities shouted through him), one of these entities, was: “I beg you by God, stop tormenting me!”

Did I touch her? How did I drive out if I was just walking along the shore, and this man saw Me? Naturally, in order to understand what happened, I carried out such mental work. Only the essence is written in the Gospel. But what conversation took place between Me and this entity on the mental level, this was not reflected in the Gospel. I saw not only the physical world, I saw that this man was surrounded by entities. And this was precisely the case when this person was surrounded not only by thin-material low-vibration entities, which you call destructive plasmoids. There were seven of them there in his field. And around him there were seventeen not yet embodied Spirits from demonic levels. He’s showing me now, saying: “I’ll open my memory.”

How did I torment them? Just by your presence. Because the energy that emanated from My field was a source of torment for them. But not because I wanted it. But because it reminded these Spirits, who were in a state of lower vibrations, of who they were and where they fell from. And this created a desire in their spiritual hearts to return to this state. But since they were enslaved by their various passions and vices, it was painful for them to think about it, so they preferred not to see it at all.

This is the essence of the torment of demons and destructive entities when they are visited by the Light. And on the energetic level, this is an unpleasant feeling, as if this essence is being turned inside out, that is, as if the skin is being removed from it, figuratively speaking, because the vibrations are incompatible. And thus it is purified. Since she herself does not want this cleansing (until she herself comes to the conclusion that she needs to work on it herself), then cleansing for her in her perception is destructive and causes her pain. And that’s why I sent these entities to their world, because they took power over this man, taking advantage of his ignorance of the laws of the Spiritual world. This was the case in that case.

Yes, I also saw this cave from which he came out (He (me) sent to the shore of this lake). They walk along the side where there is a huge sea on the right. This lake is like a sea, there are such waves. To the left are some hills and a cave where he lived, this man.

They took us, so to speak, into nature. Yes, also (He says), not only they (entities) took him away. He was driven out by the inhabitants of his village: he caused them a lot of trouble, this man.

In other cases, people brought to Me their relatives, friends and even children, who contained low-vibration plasmoid entities or demons that were not embodied, and asked Me to take care of them. But, I want to say that I did not always, exactly as you say, expel them, that is, send them to my world. If I saw in the future, it was revealed to Me that this person would be able to go to God, that he was ready to give up those qualities of the Soul that made this destructive contact possible, then I did it. If I saw the opposite, I told the relatives that such an obsession was salvation for this person, because without it he could have fallen into an even worse state. There could be such a quality of the Soul, its manifestations, which, on the contrary, they inhibit.

25:42 Expulsion of demons and entities in the current reality. Protecting humans from energy intrusions.

Irina: This is the first part of the answer, and the second: are you interested in how to deal with demons?

Maxim: Yes, when we work with low-vibration destructive subtle-material entities and spiritual entities, demons. How to work with them?

Irina: This is a very important question. This person, in whom these essences are located, did he come to you with what desire? And did he come on his own or did someone ask him to? Because there will be a different answer.

Maxim: We can consider two options: did he come on his own because he understands that something is wrong with him, or was he brought by his relatives?

Irina: If he came on his own, then Irina needs to talk to these entities, or her curators, or anyone else, and tell the person who is nearby. But this is only the first part of the work. Then this person needs to find out from his Spirit, from his spiritual heart, his Light, the reason, that is, to recognize when it started, and what served (He is now showing me) the immediate cause of the contact.

Why do you need to look for a reason? Because you humans are quite well protected from such intrusions at all energy levels. In order for this invasion of your will and your field to become possible, you need to open up yourself, quite strongly remove the divine protection. It is necessary to understand exactly how a person did this, through what destructive, destructive feelings, passions, and vices. Perhaps he himself does not notice them. This is the answer to the first question.

On the second. If you brought him, you need to talk to him. Explain to him that, firstly, he is a rational immortal Spirit. And if he is tormented by these entities that come, it is a contact with the Spiritual World or the Plasmoid World. Explain that this all exists. Explain that he can be helped to get rid of this contact, to stop it, only if this person himself changes inside, becomes different. Will no longer be open to these entities.

That is, he can acquire protection only by, as you call it, an increase in vibrations. And here we will work with each individual individually, because if this person attracted the entities with fear, then it is necessary not only to dissolve the block of fear, but to change the very attitude that led to this fear. Mental. Yes, this is all done through appealing to the “Higher Self”. You find out that this block, for example, fear of something, has accumulated due to some kind of mental attitude. And we will not only dissolve the block, but also change our mental attitude. And then this natural Divine protection will be restored.

Even if his former “friends” (those who were with him, his low vibration curators, who were on the same frequency with him) come again, they will not have influence on him. He will communicate with them completely safely. They will not be able to harm him or possess him. He will simply answer that he is in the Light of God, and they will leave or pass on some information, but it will be safe for him. Because I also communicated with demons, Lucifer himself came to Me, and he came to Me more than once, but I communicated with him safely for myself. I

received the information and answered him with some words. He could not have any influence on Me. And to My apostles too. Many times, when I taught them to save people from the influence of demons, they also talked to him. After sessions of getting rid of demons, they came to them at night and tried to somehow intimidate them. It was safe for them.

31:18 Consequences of expelling demons without explanation. The spiritual content of the exorcism process.

Maxim: We have priests, exorcists who cast out these demons, without explanation. Are there any consequences to exorcising demons without explanation?

Irina: Before exorcizing demons, they must conduct a sermon for more than two or three hours, as far as I know. (He's telling me now). I feel this is happening in My egregor. What is happening in My egregor, in churches and monasteries (He is showing them to me now).

Unless it is done somewhere at home. Some person who is not part of the Christian egregor, but uses, for example, some kind of magical means. This is also possible. Drive away other plasmoids through some plasmoids. Call forth the lighter ones and expel the darker, lower vibration ones. So they may not explain the reason. Just read the plot, perform the ritual.

As for the church, according to the rules, an exorcist cannot work, first, until he receives permission from the bishop, who has direct dedication to this position, a fairly strong included Christian egregor, and therefore in direct contact with Me. At the level of thoughts, mental. He must give permission to this exorcist, a man, but he must warn him that before the expulsion he must read a sermon in which all the reasons will be revealed.

There, of course, everything will be explained not with the word “vibrations”, there it will be explained in Christian language. That is, what sins led, what passions led, what vices led. Of course, each exorcist will translate this in his own way, based on his vocabulary. But at the end of the sermon, he is obliged to say that if you do not change

your life, do not change your Soul, do not come to true repentance, and this, as you remember, is a change in the Soul, its turn towards the Light, this is the opening of your heart to Me, as Love. If you do not change your Soul in this direction, your demons, your demons, will return to you in even greater numbers. According to the rules, he is obliged to say this. If he does not say this, then this is a violation.

How does the exorcism ritual take place? The fact is that in the very rite of exorcism, which can last several hours, a prayer is read that calls on the Angel and calls on the special action of the Holy Spirit. Well, for example, Archangel Michael, who is present here, is very often present there in the form of many of his phantoms.

What happens on the spiritual level? The Guardian Angel of this person who is possessed, and Michael the Archangel, his phantoms, as well as other Angels who can come (usually the 18th, 19th, 20th level of the Spiritual World in the terminology of the Interstellar Union). Anyone who is in the Spiritual world, an Angel, can come to these sessions and contact the entities that are in a person (embodied in subtle bodies or not embodied at all), they just address them there with different messages.

For example, if this demon is not incarnate, they make a call to come out, go to the Spiritual world and ask for incarnation, into their body. If this is a low-vibration plasmoid, then the Angels turn to it during an exorcism session with a call to come out and take its place at its density level, and carry out its task of incarnation. I want to tell you that any plasmoid, no matter what level of density it is at, also has its own embodiment tasks, and they, too, may not fulfill them, becoming destructive. He is, of course, warned that if he does not complete his task, he will lower his level. For example, he himself will become an incarnate demon, without a subtle body. He is warned of the consequences.

If it is not an incarnate Spirit, it too is warned of the consequences. They say that while in this person, he loses the possibility of his incarnation in some body for this time and loses his turn for incarnation, they can go there without him. And he can remain for many hundreds, or even thousands of earthly years, without incarnation and the possibility of development. And this person in which he is located will still leave the incarnation when his term ends.

They explain to him, tell him, and offer to leave. But they do this without violence against him. Violence is not used, because the demon or plasmoid that is there usually answers (Archangel Michael also shows pictures): “I am here with the consent of the person himself. He gave his consent with such and such a feeling, with such passion. He knew perfectly well, or should have known, what this would lead to.” These are the conversations that happen.

And due to the fact that this person does not want to change, which even the demons themselves can point out, this is how the Angels respond, because of this, not all exorcism sessions are as successful as they would like.

Maxim: Thank you, Jesus, thank you, Archangel Michael.

Maria: Yes, thank you, Maxim, for a very interesting, very important question.

38:42 Why does the Koran deny the crucifixion of Christ?

Mary: Jesus, please tell me why the Koran denies Your death on the cross? It indicates that Your enemies testified to Your death, and instead of the prophet Isa, as You are called in Islam, another person was crucified. According to the Koran, Prophet Isa was ascended to heaven and will remain there until the Day of Judgment. And did Muhammad know about Your transfer to another planet?

Irina: So many questions.

Mary: Why is Your death on the cross denied, and that another person was allegedly crucified instead of You, and You were allegedly taken up to heaven?

Irina: Why is the death of His cross denied in the Koran, right?

Maria: Yes.

Irina: The Koran was written by the prophet Mohammed. He wrote part of this book, receiving information from his curators. He had curators from the planet Tumesout, and he also had curators from the Spiritual World, for example, his Guardian Angel. Sometimes representatives of plasmoid civilizations also came to him. And sometimes he wrote from his understanding of certain teachings, wrote in this book, because at the time when he wrote it, it was not considered as sacred as it is considered now, one and a half thousand years after his disincarnation. This was considered, in your opinion, a diary. Why did he write that “my enemies spoke of crucifixion”?

Mary: About the fact that another person was crucified, not You.

Irina: The apostles who wrote the Gospel wrote about the fact that it was I, and not someone else, who was crucified.

Why did he write that “the enemies spoke”? I met him directly in the Spiritual World. I talked to him about this. And he told Me that at the time when Mohammed lived on Earth, he himself did not directly read the Gospels presented by My disciples. He received this story from others orally. Naturally, he had already heard about Christianity.

This was already the eighth century, Christianity was spreading, including in the east. In the areas where he lived, there were also Christian preachers who sometimes came. And he heard from them or from those who received this Christian preaching from the Arabs, and already spread it to various villages. This was what oral preaching was like.

Books at that time were very rare and very expensive, because scribes had to be hired to copy every letter. They copied quite extensive texts by hand in the light of the Sun, and when the Sun set, in the light of a special one, like a torch (shows sticks connected to each other). I had to rewrite each letter and then check the text. If an error was encountered, it was often necessary to start all over again, because it was forbidden to cross out letters and words in the sacred text. That is, it was very rare. Books were distributed in very small quantities at that time, and most sermons were oral (sermons about Me).

When Mohammed heard about the crucifixion, it only hurt his heart that such a person as I, such a vice as I, was crucified, and his own people, that at first he did not believe it. And that's why he said that only enemies can spread these lies. He wrote this in his book and told his disciples. He could not believe that the man who healed the sick, fed people, spoke the truth about God and did not do a single evil deed would be killed by his own people, with the permission and order of the rulers. It didn't fit in his mind. Therefore, he really believed that my enemies came up with it.

44:37 The concept of “premature information”.

Maria: Please tell me, did he know from his mentors and curators that you were actually transferred to another planet, to Burkhad?

Irina: He didn’t know the meaning of the word “planet”. The thing is that details about the structure of space and space civilizations were not the purpose of contacts at a time when there was no development of your own civilization, which led you to space flights. Because at that time it was premature to tell people about stars and about planets near other stars, for the reason that your own science had not yet even discovered the fact that the Earth revolves around the Sun. You had to come to this yourself, on your own. Talking about this to ancient peoples who did not discover it themselves meant introducing information into the noosphere field of the planet that was premature for the consciousness of people living at that time. This is the same as, for example, even in the fifteenth century starting to talk about a nuclear reactor. It’s not that no one understood this information, it would, firstly, be distorted among people, because people did not yet have a scientific understanding of the atom, they would have understood it completely wrong. Secondly, it would not contribute to spiritual enlightenment and raising vibrations. It would simply be just an empty waste of energy.

Maria: Thank you, thank you.

Irina: He didn’t know the word “planet”, his curators just naturally told him that I was taken to heaven, that was enough for him, because for him there was God in heaven.

46:55 Who else had a similar Resurrection and movement from Earth to other planets after death

Vladimir: It is known that You and Mary, Mother of God, were transported from our planet in physical bodies to Burkhad. It is clear that there was Your resurrection, the restoration of the body. Hers was a somewhat similar process, although there was no martyrdom. But still, the opportunity for the Spirit to return to the physical body was restored, that is, there was also a resurrection. The question is: have there been other similar cases in the history of our civilization? Was anyone else transported in this way, after, in fact, resurrection, to some other planets, from Earth?

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Vladimir Goldshtein – journalist and Facebook group administrator, assistant director of the Cassiopeia project;

Maria Sokalskaya – moderator of the VKontakte group, head of the “Online Learning” project and other “Cassiopeia” projects;

Olesya Smelova - administrator of the YouTube channel, projects "Cassiopeia Level" and "Cassiopeia Color";

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Jesus Christ is the head of the Christian religious egregor on Earth, the Firstborn Son of God, our elder Brother;

Mirakh Count (Archangel Gabriel) - representative of the planet Burkhad, guardian of the Christian egregor;

Archangel Michael is the guardian of the Christian egregor, patron and

curator of the Earth in the Spiritual world;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world;

MidgasKaus is a representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

00:21 Resurrections in the history of our civilization.

Vladimir: It is known that You and Mary, Mother of God, were transported from our planet in physical bodies to Burkhad. It is clear that there was Your resurrection, the restoration of the body. Hers was a somewhat similar process, although there was no martyrdom. But still, the opportunity for the Spirit to return to the physical body was restored, that is, there was also a resurrection. The question is: have there been other similar cases in the history of our civilization? Was anyone else transported in this way, after, in fact, resurrection, to some other planets, from Earth?

Irina: That is. the question is, was what I did to my mom repeated with another person?

Vladimir: Yes, including the transportation of this person, restored, returned to life, to another planet.

Irina: No, there were no more such cases, namely for me to restore and transport another person to another planet precisely after his death, because in the case of my mother, this corresponded precisely to her life task.

Vladimir: Does this mean that this never happened in the history of

the Earth? Not only with your participation, but it didn't happen at all, right?

Irina: There is no such case. To be restored and then transferred to another planet. There were cases when they were simply restored, but left on Earth.

Vladimir: There were cases when a person was returned, his Spirit, an already deceased physical body after not clinical, but after biological death, completely as in the case of you and Maria, they essentially resurrected the person, but he remained to live on Earth, so ?

Irina: Yes, there were such cases. But in all cases, recovery after biological death was not complete. In the sense that this body then died anyway. Due to the fact that the death that I had, it happened in this way, I had to not only restore the thread of life and not only restore those cells of the body, including the brain and heart, that were damaged, but I had to do it all together. And because of this, I had to erase with my energy information not only about death, but also about the aging of each cell, because otherwise it would not have worked. For this reason, this happened to my body.

In other cases, when there was another cause of death, if the time of rupture of the energy thread of life that connected the human Soul with the physical body did not exceed four hours from the moment of death, then not always, but in some cases, its restoration was possible. But this was not always possible. Depends on the power of the Spirit, i.e. from the vital energy that he took with him. And all this depended naturally on his task of implementation.

Vladimir: Are there any historical figures known to us to whom this happened?

Irina: There are no historical figures known to you who were resurrected exactly as I said. They lived a long time ago, even before I was born. They were also restored with the help of alien technology.

This was just during the life of Krishna, even earlier, about 8 thousand years ago before the present moment on Earth in which Irina lives, and there were several other cases, maybe in the area of 350,000 years ago. There were such cases, but they were the exception. I can already see the unspoken question in your eyes. What happened to those people whom I and my students resurrected? There was a different mechanism. There was no complete break in the life thread, there was a return to the body and its restoration.

Maria: Thank you! Very interesting information. Olesya, please ask your question.

06:02 Responsibility of the Jewish people for the crucifixion of Jesus Christ. The reason for the persecution of the Jewish people.

Olesya: Tell me, is it true that Pilate agreed to the Sanhedrin's request for your crucifixion, warning the entire Jewish people of responsibility for this? Is this a karmic reason for the persecution of the entire Jewish people? Why did the idea of exterminating the Jews arise in Germany?

Irina: It depends on what you call the karmic reason. Is a karmic cause a cause that gives rise to a chain of consequences?

Olesya: Yes.

Irina: He just showed me a crowd that was not just screaming in an unfamiliar language, but people were just yelling, a lot of people. And there are women and children, but I understand, my Soul understands their thoughts. And it's as if I'm now standing on such a pedestal, next to Jesus, he's showing me the crowd. Probably two hundred people. There are women there and even teenagers. And men, young men with beards. And they all shout: "Crucify him on the cross." One is the loudest, like a priest, in expensive clothes, and he shouts a few words. This comes out louder than everyone else, and I hear them: "Let his blood remain forever on us and our children." These were not just words. This is according to the teaching that you punish "Kabbalah", with a magical element. It was a transfer of energy.

What does it mean: “Let the blood be on us and on our children?” According to the law of the Torah and Kabbalah, this meant that if I am guilty of something before them, it means that they are cleared of guilt for murder. And if I am innocent before them, then not only the guilt for the murder seemed to be imprinted on their Souls, not guilt, but, as it were, negative energy. But also, if I was innocent, then the crime that they attributed to me and for which they executed me, it also, as if in an energetic sense, was imprinted on their Souls. Not in the sense that they will be responsible for him, but in the sense that they lowered their vibrations. They seemed to take this responsibility upon themselves. And when they said: “His blood is on us,” it was such a fair statement, one might say, because they believed that I was guilty. This means that they will be clean from this guilt, murder. That I was guilty and worthy of the death penalty, they sincerely believed. When they added: “And on our children,” then they sent this energy, as it were, to their egregor. “On our children,” i.e. this man, he didn't say, "On my children." By this he sent, as it were, energy into the egregor, i.e. he seemed to have taken responsibility for himself, so that it was as if they were saying in him: “Crucify him,” the whole people and all his children, one might say.

Since all the people and all the children naturally did not say this, they have no personal responsibility for the crucifixion. They are not responsible for this crucifixion. But since this energy got into the egregor, it was not by chance that these words that this person said ended up in the Gospel; they might not have gotten there. And these words that this man said were printed and written in the Gospel, which was included in the canon, and it has already spread to different countries. Because Christianity was spreading. People from other nations who had already accepted Christianity after the Apostle Paul, his disciples, which spread to all nations after the preachers of the truth, translated my words into the languages of all nations. These books, the Gospel, became available to all peoples. And among other things, they read the words: “His blood be on us and on our children.” And when people read this, some of them developed hostility, or even hatred towards the people who took upon themselves such courage, such a mission - to kill me. Not just execute me, but in this way, crucify me on the cross.

This is what gave rise to hostility and hatred, which made them see the descendants of Jews, who were not personally guilty of the crime that was then committed, as enemies. Sometimes, this vision of the enemy reached the point that Jews began to be seen as a symbol of all

existing social evil, social injustice, which were not committed by Jews at all. Somehow such ideas, such images, such symbols were created that if this cause of evil was expelled or destroyed, then the entire people would live in happiness and prosperity.

Such societies, such egregors, were formed that embodied this idea on the physical level. This is the karmic consequence of these words that he said. It has echoed after many millennia in the hearts of many people. Of course, he didn't know that it would have such an impact. He didn't know at all that I was innocent. He was sincerely convinced that I was leading to a riot, etc., he had his own ideas. However, this example shows how the word of each of you can reverberate through the millennia.

There are such karmic consequences, but they are not from the guilt itself, but from these words that are imprinted in the egregor.

Olesya: Like the installation.

Irina: Yes, which has already attracted negativity from other people, from other nations.

14:38 Why did the idea of the mass extermination of Jews arise in Germany?

Maria: Please tell me why exactly in Germany this idea of exterminating Jews on such a scale arose? There were persecutions in the Middle Ages, but such mass destruction as in Germany, in my opinion, never happened in the history of mankind.

Irina: Because that Spirit, which incarnated in one of Adolf Hitler's closest associates, took a direct part in my execution when it was in its previous incarnation. He, having not completed his lesson in dissolving his blocks, again manifested this on the physical level, but in another country. And against the people for whom he believed he was then fighting. By the way, he was in this crowd.

Vladimir: So it was one of the Roman soldiers?

Irina: It was a Jew who was in this crowd, he was one of the priests. And after two thousand years, a little less, he was embodied in Germany. And since he had these blocks - to destroy someone, they were not dissolved, he had already incarnated with a lesson, on the contrary, to learn a lesson of tolerance, kindness, understanding. But, since he was already embodied in a representative of another people, not a Jewish one, he already saw enemies in the Jews. Those. this has already been embodied on the physical level.

Why such a massive scale? Because if some Spirits or a group of Spirits do not pass their lesson in the development of some quality, then they, as it were, tie a karmic knot, as you call it, i.e. some situation. They incarnate several times, and if they do not go through it again, it drags on, and this happens on a more, one might say, mass or hard level.

Vladimir: And this Spirit from Nazi Germany was one of the leaders of the Third Reich? Do we know his last name?

Irina: He just tells me his name: “Henry.” Shows an image, but I don't know who it is. A man with such big eyes.

Vladimir: Okay, let's not find out now. We'll find out later, thanks.

Maria: Thank you for your answer.

17:44 Interpretation of the story of Dismas and Gestas on Calvary.

Maria: Please tell me where the prudent robber Dismas actually ended up? Had he really atoned for his entire unrighteous life in six hours? And do you know its further incarnations?

Irina: Not all incarnations are known to me. Because after that incident this Spirit had many incarnations. Of course, you can recognize them, if he wants, of course. I never watch the incarnation of the Spirit without his desire, his permission to do so.

In 6 hours he redeemed his life? He didn't redeem his life. It was impossible to redeem his life on his own. Because while he lived on earth, he participated in criminal activities that caused the death of 44 people. Directly of them, he personally killed 17. But for the rest, he became an indirect cause of death, helped it in some way, contributed to it. Therefore, in order to atone for his guilt, he needed to restore the lives of those killed people so that they could continue fulfilling their life's task. But this, naturally, was impossible.

He did not atone for his guilt, but realized what led him to such actions. And he realized (as he is showing me now) that he wants to be with God. That he refuses them. He realized at that moment when the second man, who was hanging on the other side of me on the cross, heard the roar of the crowd, and in this roar he made out the words: “If you are the son of God, come down from the cross, and we will believe in you.” The man hanging to my left began to hope that I would come down from the cross and save them. He considered this punishment unfair. He was looking for salvation from physical torment, but there was no awareness in him of what exactly led him to this cross, that he himself did it. That it was not the people who drove the nails into him, but that he himself, unconsciously, controlled the space in such a way that it led him to this place. He didn't have that awareness. He considered the outside world, these people, to be the cause of his pain.

Yes (I felt his mental fields), he considered himself guilty of something, that he killed people, but he considered the punishment disproportionate, although he knew perfectly well that for his crimes that he had committed, such a punishment was according to royal decree, law. But he did not agree with him. He, in the depths of his soul, considered his life more valuable than the lives of those from whom he took it. “I already killed them, and taking my life like this won’t change anything, so it’s not fair.” That's what he thought.

I am now speaking more of such formalized thoughts. Of course, what kind of formed thoughts does he have there? He had only one desire, one desire: to leave this place.

And the man who was on the right heard the words. Yes, the one on the left said to me: “Come down from the cross and save yourself and us.” He had a little hope that began to warm up in his Soul, but without

realizing what he had done. And the one hanging on the right, he heard these words. At first he also did not realize what he had done. When he heard these words, he accepted them. A picture appeared in his memory of how I walked around different cities.

The point is in the story, when I resurrected the girl, raised her from death (there was no complete rupture of the energy thread). I returned her to her body and healed her of the illness that led to this exit. She was basically in a coma, in your opinion. So this girl, she was a distant relative of this man. You could say he was hers (I'll look for the contactee in my memory now): her father was this man's cousin, not his own. Therefore, this story became known to him, and he even saw me from afar when I walked around the cities. But he didn't come to me for the reason that he had a different life. And he understood perfectly well that at that time, he was not ready to change it.

And at that moment, when he was hanging on the cross, these words, coming from his friend, resurrected this story in his memory. It was at this moment, at one moment, that he realized that he was next to the man who (for him it was a miracle) had resurrected the child. In the understanding of those people, such a miracle cannot happen without Divine power. Such a person was considered a saint in that society. And he realized that he was hanging next to a holy man. And when he realized this, memories of what he himself had done appeared in his Soul. And it was precisely from this that he realized, as if by comparison, that he was worthy of this place, this execution, in comparison with me. Because I did no such thing, I was so holy in his eyes that God gave me the power to raise the dead. And still I am here.

So, because of this realization, he responded to his friend. He answered him like this. I will now convey the meaning (he says) of these words, because they were spoken in another language. "Are you not ashamed to pester this man at such a difficult moment? He did nothing wrong and is condemned to the same thing as us. And we bear our torment justly." This is a rather long sentence, of course, he didn't shout, he just croaked, every word was difficult for him. (He shows me how there are such bloody bubbles coming out of his mouth). However, he said them. And then he turned to me with the words: "Remember me, teacher (not even a teacher, but a master), when you come to your kingdom." He didn't ask me to take him with me. He didn't ask me to take him down from the cross. When he said,

“Remember,” it was a word with meaning, “pray for me so that I may become like you.”

And when he said this, at that moment he experienced a change of mind, metanoia. He rejected all his ideas that led him to these actions. He has moved to a new level, he is already (now showing me the number 17). He has already reached the angelic level. At that moment he reached 17th. He had not yet died for several hours. I told him that he would truly be in the kingdom of God with me before the sun even set. Then I sent him energy to reduce his physical and emotional pain and supported him.

I also sent such energy to the second one, but he did not perceive it. He blocked himself off like such a field. I couldn’t perceive it by vibrations. And then, a few hours before his physical death (it happened later than mine), and when it happened, he was no longer on the 17th. In a few hours, he rose in his vibrations, becoming already at the 22nd level, because all this time he suppressed his physical pain with prayer to God. And he prayed for the Souls of all whom he had disembodied, and for their relatives.

Several of his incarnations were among Christian leaders. For example, he was later incarnated as Equal-to-the-Apostles Nina (I know this incarnation of him), the woman who brought Christianity to the people of Georgia. It wasn’t called Georgia then; there were several kingdoms in that territory.

Maria: I thank you for this story. I was very touched.

31:53 Heinrich Himmler is the embodiment of the Spirit of the Jewish priest who participated in the execution of Christ.

Vladimir: Masha, so that we don’t go too far from this, I’ll ask a question in continuation of what we just talked about. Dear Jesus and Irina! Tell me please (shows a photograph of Heinrich Himmler), is this the man who was incarnated in Germany next to Hitler, and before that was in that incarnation when Jesus was crucified, as a Jewish priest?

Irina: Now he will look through me, because I don't quite recognize him, in my opinion, it's him. He showed it to a younger person. Here I see someone with glasses, but he was without glasses.

Vladimir: I show you Heinrich Himmler.

Irina: He says: "Yes, this is that person. In terms of energy, that person. Just at an older age."

Vladimir: Thank you. It was precisely Heinrich Himmler, the same man who at that time was a Jewish priest, and then became one of Hitler's close associates and then carried out this policy of exterminating the Jews, completely.

Irina: He says that these were largely his ideas, and in personal conversations he conveyed them to his friend, his friends, more precisely.

33:21 Why is there no teaching about physical education in Christianity?

Olesya: Why is there no teaching about physical education or analogues of yoga in Christianity?

Irina: Because the goal of Christianity from the beginning of its formation was the development of the Spirit precisely through changing one's mental attitudes, changing one's feelings, replacing low-vibration energies in the Soul with higher-vibration ones. The body is considered a reflection and manifestation of the Soul, therefore all efforts were aimed precisely at bringing the Soul closer to God, merging it with the energies, I will say more clearly, with the energies of the Holy Spirit, i.e. of that Light that exists.

The efforts of a person (if you consider, for example, the history of monasticism), people who understood many of my words as a guide to their personal actions, and felt that their path was outside the world, in hermitage (in the beginning there were, when there were no large monasteries) , were simply withdrawing from the world. And their

physical education was that they survived in the wild, without the help of other people. They could build their own huts. They could also gather their own food, including hunting birds, animals, fishing, collecting fruits, and preparing them. There was such physical education. It was also, if you look at it in energy terms, no less energy-saturated than yoga. It required no less energy for its manifestation than yoga.

35:39 The reason for the emergence of yoga.

Irina: The reason for the appearance of yoga and similar analogues in many nations is not only the health of the body, but also the conduction of various energies through one's etheric body, which make it easier to work with any etheric energy center (as you call "chakras"). Facilitated contact with subtle-material civilizations. Facilitated contact with the Spiritual world through concentration. Yoga poses are not done for the sake of the body, they are done for the sake of concentrating on something, for example, on one thought, one energy. Initially, this was the meaning of creating yoga.

The yoga that you know has existed for many thousands of years. It was collected into a single work by a Spirit very well known to me, whose name was Patanjali. He collected this in contact with his Higher Self, with his curators from the Spiritual world, including Archangel Raphael. Some poses were for healing diseases, some poses were for contact with the Gods, i.e. with plasmoid civilizations.

Some poses were to enhance one's own thoughts, i.e. concentration in a certain position with certain thoughts. And this had to be done not just once, but many dozens of times per month, over two months. This led to the fact that the very adoption of this pose, according to the law of a conditioned reflex, made it easier to concentrate on this thought. The man seemed to help himself with his body.

In Christianity, the approach is a little more connected with the path of thought, changing one's mentality through reading books, through prayers, through doing good deeds, etc. Physical education itself and sport itself were in no way condemned in Christianity, nor was their absence. This was considered a neutral matter, of course, if the sport itself and physical education itself were not connected with a feeling of

pride over, for example, a person who has a less developed body. This, of course, has already been condemned. But the sport itself is not. The destructive feelings associated with this were denied, criticized, rejected. And sport itself was recognized as a neutral matter for the person himself. It was considered a neutral matter for spiritual development; it could not interfere with spiritual development; time was allotted for it. Again, without a feeling of pride, without a feeling of despondency if something doesn't work out, without destructive emotions. And also, if a person decided not to do this, this was also considered neutral. It was a matter of the person himself, so it was believed.

As for nutrition, another question.

39:14 Teaching about proper nutrition in Christianity.

Olesya: Teaching about proper nutrition, which would contribute to the suppression of animal instinct and spiritual development?

Irina: In Christianity there is a teaching about nutrition, which later resulted in the modern teaching about fasting. But it was introduced into Christianity from even more ancient teachings and ideas than Christianity itself, for several purposes. The most important of them is the development of will. Not even the development of the will itself, as in itself, separate from other energies, but specifically the will aimed at spiritual development, again in the Christian paradigm of values.

In the Christian understanding, spiritual development includes: prayer, doing good deeds, reading sacred texts, and this is often called the fight against one's passions, but this is their transformation, the replacement of the negative qualities of a person, his low-vibration components of the Soul, their replacement with Light, i.e. . positive characteristics. And all this, again, without pride, without any despondency, just as in the case of sports.

Animal instincts in themselves do not need to be suppressed. They need to be manifested under the control and direction of the spiritual mind. This is not suppression, but a manifestation of the energy of animal instincts, which are useful energies and useful programs for a

person, but only if they do not contribute to his spiritual degradation and do not lead him away from the path of fulfilling his life tasks. And the task in life is to increase vibrations, to work on those personality qualities with which the Spirit came into this incarnation. Again it depends on the level from which he came.

But I want to say about the very understanding of “fasting”, it is not at all obligatory. Both its observance and its non-compliance are for everyone. Because this was given as a general rule for everyone. And the extent of its observance had to be regulated by the person himself, in prayer. Prayer is contact with God. The Holy Spirit revealed exactly how to observe this fast, in what mode. How far to adhere to certain regulations that were given. For example, different standards were given for monastics and laity. Moreover, at different times they were different for both. And even for people in different areas they were different. And for, for example, men and women they were different, especially for children. This was all given, so to speak, for the average person. Each person had to decide for himself how much to apply this to himself.

That is why the Apostle Paul (to exclude any abuse on the part of priests and bishops over people who fasted excessively, or did not fast at all, in order to exclude abuses in punishment of these people) in the 14th chapter of the Epistle to the Romans wrote such words that “not man for food, but food for man.” And therefore no food is unclean. Everything over which prayer is performed is pure. He wrote earlier that all food is spiritually pure. Any food that a person can eat is spiritually pure if a prayer of gratitude to God for this food is performed over it. She is clean. And regarding fasting, the Apostle Paul wrote that the one who eats (meaning non-lenten food at the time of fasting) should not judge the one who does not eat. And the one who does not eat (this food during fasting, which is forbidden to him), does not condemn the one who eats this food, for God accepted it. And further it is written that the Kingdom of Heaven is not food and drink, but joy and grace in the Holy Spirit.

There is no thought here that if there is food and drink, then there is no joy and grace in the Holy Spirit. The idea is that food and drinks are material substances, and the manifestation of the Holy Spirit in a person does not depend on their presence or absence. To put it very simply, if a person is hungry, this does not mean that he cannot be filled with the Holy Spirit. Or if he eats that food that is not fasting, that

food that is forbidden during fasting, this does not mean that if he thanked for this food, if he is in Love, that the Holy Spirit is not manifested in him, that he is not close to God. Neither hungry nor well-fed, let's put it this way simply, they do not reject the Holy Spirit from themselves. It's not a sin. Neither one nor the other is a sin.

Sin is condemnation. Or because a person fasts, there are people who eat everything themselves, but at the same time they somehow condemn people who abstain. They believe that they are limiting themselves in some way. This is already a sin. Condemnation itself. Not their food, but the condemnation itself. Because it lowers their vibration, it drives Love out of them (from these people so that they don't eat there).

There are opposite cases, when one who does not eat something, some type of food, they begin to condemn the one who eats it. It's a post or it's not a post. Then they sin, but those who eat this food do not sin, provided that they do not take offense at them in return, do not return evil for evil, let's say so. And if they were offended by the condemnation, then they also committed evil, i.e. They also lower their vibrations. There is such a teaching.

Maria: Thank you.

47:55 Why are only 27 books included in the Canon of Holy Books?

Vladimir: The next question. Jesus. Please tell me why in the 4th century, at one of the Ecumenical Councils of the Archbishops of the ancient Church, out of hundreds of books in which your life and teachings were described, only 27 of them were included in the Canon of Sacred Books. In particular, for example, the Gospel of Mary Magdalene was not included there; as I understand it, the Gospel of Thomas, the Gospel of the Essenes and the Gospel of Peter were not included. Your biographies about your path from these historical figures were not included there. Why?

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Vladimir Goldshtein – journalist and Facebook group administrator, assistant director of the Cassiopeia project;

Maria Sokalskaya – moderator of the VKontakte group, head of the “Online Learning” project and other “Cassiopeia” projects;

Olesya Smelova - administrator of the YouTube channel, projects "Cassiopeia Level" and "Cassiopeia Color";

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Jesus Christ is the head of the Christian religious egregor on Earth, the Firstborn Son of God, our elder Brother;

Mirakh Count (Archangel Gabriel) - representative of the planet Burkhad, guardian of the Christian egregor;

Archangel Michael is the guardian of the Christian egregor, patron and curator of the Earth in the Spiritual world;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world;

MidgasKaus is a representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

#342 Fourth meeting with the phantom of Jesus Christ! Answers to questions from Cassiopeia subscribers. Part 3.

https://blog.cassiopeia.center/chetvertaya-vstrecha-s-fantomom-iisusa-chast-3
https://www.youtube.com/watch?v=bHyeY7eQJVs

00:22 Canonical literature of Christianity.

Vladimir: The next question. Jesus, please tell me why in the 4th century, at one of the Ecumenical Councils of the Archbishops of the ancient Church, out of hundreds of books in which Your life and teachings were described, only 27 of them were included in the Canon of Sacred Books. In particular, for example, the Gospel of Mary Magdalene was not included there; as I understand it, the Gospel of Thomas, the Gospel of the Essenes and the Gospel of Peter were not included. Your biographies about Your path from these historical figures were not included there. Why?

Irina: (speaking the phantom of Jesus Christ) Thank you for the question! He is very important. It concerns the formation of the structure that is now called the church, and in the Spiritual world is called the Christian egregor.

The fact is that after my ascension and my departure to the planet Pikran, to Burkhad, many of my students and the students of my students began to compile the first notes. They compiled them haphazardly, from case to case, simply remembering what I said, remembering some events. When the people who described these events died, they passed on these records not to their children, but to their disciples in the church, in that community, ecclesia, which was called the church.

There, all this was collected from different people, systematized, and it turned out that some texts were written by those people who were in contact with thin-material plasmoid civilizations. Through the prism of their understandings, they described me, my personality and my actions. All this was mixed in their texts with the events that happened in reality, in material reality. For example, one part of the text could be part of my sermon that they heard, and another part of the text could be their perception of my word.

Also, some people who did not directly see me on Earth began to compose texts, but simply perceived teachings about me from stories. As I already said, oral preaching was common at that time. Also, some of the people were preached about me not by the apostles, not by their disciples. They learned about me from contacts with plasmoid civilizations. Plasmoid civilizations talked about me. They also wrote it all down.

As a result, over about two hundred years, the church collected a lot of texts that described me, my teachings, the essence of my teachings, and even the cases of my death and the circumstances of my resurrection in relatively different ways. All this was described in different ways, either completely omitted, or it was stated that it did not happen. There were a lot of different opinions about me. This was all in written form in the form of scrolls, which traveled with people to different communities. This confused people in these communities when one day they were brought to read one text, where I appeared in a different image, and on another day or a month later a new preacher appeared, with a completely different text, but also written in the holy name, in which was written almost the opposite.

Agree that the state of affairs could not remain this way for long. Otherwise, the entire egregor would collapse. It would split into many separate groups. He would not be strong and united, because the strength of the egregor lies precisely in unanimity. Like-mindedness leads to common feelings and emotions, charged with vital energy, and collects them into an egregor. This is the strength of any egregor. At the dawn of the Christian era, it was important to fully portray a single doctrine in the minds and hearts of believers. This was done with the help of the cathedral, where the so-called canon of sacred books was collected, which is what you just asked about. I spoke about the reasons for this council. It was necessary to create a unified doctrine.

Now, why was this particular teaching created? Exactly with those texts that were selected. At this council there were several hundred people who you call bishops, that is, they were the heads of individual churches. They brought with them those books that they managed to collect in that church, which the believers use.

I will not say that this meeting was conducted very easily and carefree, because it was not. There were debates about which book to include and which book not to include. There was especially a lot of controversy over the “Revelation of John the Theologian.” Several bishops were immediately against its inclusion, for some, by the way, quite compelling reasons. For example, due to the fact that the text written there is given in a figurative form, and its interpretation requires illumination by the Holy Spirit, because interpretation from the position of the mind or, as you say, the ego of the person himself, could lead to errors in the spiritual path.

Why were these twenty-seven selected? The selection itself was carried out on the basis of, one might say, equal voting, so to speak. The bishop proposed the list that he considered legitimate, right, true, sacred. Everyone made a list without showing each other, and then everything was discussed.

This cathedral lasted for more than one hour and not even one day. It lasted about ten days. There was time to discuss every page of the book. When the lists of voting bishops were compared, it turned out that they, independently of each other, wrote practically the same list. It included four of the many gospels, “The Epistle of Peter,” “The Epistle of Paul,” “The Epistle of John,” one “Epistle of Jude,” “The Acts of the Apostles,” and “The Revelations of John the Theologian.”

Reasons for this decision. The first external material reason for this decision was that the bishops chose those books that were most, in your opinion, authoritative among the believers, and which were most often used in worship. The second reason was that I myself, through the ray of Christ consciousness that was established by me, the spiritual channel, read these texts through their eyes. And through them I myself selected these twenty-seven books for the formation of that church in which there was no trace of Gnosticism. Those. that teaching that came from those plasmoid civilizations that considered

the dense material physical world not the creation of God, but the creation of his enemy, the so-called Demiurge.

12:00 The idea of plasmoid civilizations about the dense material world.

Irina: Because some plasmoid civilizations, through their contactees, introduced ideas into books not included in the canon that there is a certain Demiurge who is the opposite of God (Satan, in fact). He created this material world in order to capture pure divine Souls and somehow lower their vibrations. And, supposedly, my task was to explain this to the Souls and pull the Souls that were entangled in evil matter back to God. These ideas of existence were reflected in a number of texts in different ways. These were plasmoid ideas that I could not consider necessary to add to my egregor. Because it was a distortion of the truth about the material world.

If I had put into my bishops the idea of leaving them in the canon (the canon gave the status of sacred scripture, and sacred writing is texts from God, not from my own mind, but from the inspiration of the Holy Spirit), and in the name of God it would be proclaimed that matter is a creation not of God (in any way), then the idea of condemning matter as not a divine structure would be introduced into the formed Christian egregor. This means that the understanding of the incarnation, the passage of lessons here with the help of divine means, would be distorted. The very concept of salvation would be distorted. That is, I did not come to pull the Spirits out of the evil matter that captured them. I came to make people happy, including in matter. And so that they use matter itself to increase their happiness and love, joy and grace, and harmony with everything around them.

Why these plasmoid civilizations thought this way, there are also reasons for this. For many of the plasmoid civilizations, contact with man, as a third-density being in the physical world, was a very painful experience. Because the energies that emanate from a person are very strong, because the denser the matter, the stronger the Spirit manifests its energies through it. Throws it out with force. Therefore, if the person who came into contact with the plasmoid had low vibrations, there was anger, fear, resentment, rejection, mistrust in him, then with his vital energy, he, one might say, hit the plasmoid with a fiery whip. Therefore, this experience was painful for many.

An even greater role was played by the fact that the representatives of plasmoid civilizations themselves were given the task of creating elements, for example. Some have been given the task of creating plant Souls, Souls of microorganisms, Souls of protozoa, insects, plants and animals. It's all coming together. Some representatives of these plasmoid civilizations put all their Light, all their Soul into this. When they see what is happening to their creations in the dense material world (for various reasons), they are horrified. They begin to consider the entire dense material world to be a product of dark force. Not all, but some of the plasmoids. Therefore, they created such a teaching, which was previously reflected in the form of some Zoroastrian ideas, some ideas of Manichaeism, and then for some it passed into the ideas of Gnosticism, in the ideas of other peoples, as you call it, into paganism. Not in all, but in some it was implanted during contact. Naturally, I could not allow this representation in my egregor, it would introduce distortions, so I chose those texts that were pure from these influences.

Vladimir: Thank you for such an answer! Expanded, deep, thanks to which there is now an understanding of why this happened.

18:00 Jesus' stories to his disciples.

Maria: What other important things did you tell your students that were not included in any written source known to us today? Was there knowledge among them that the general masses of people were not ready for at that time?

Irina: (Says the phantom of Jesus Christ) I told them a lot. Of course, not even one tenth of my stories was included in the canonical Gospels or the apocrypha. There were a lot of them. Indeed, according to the figurative expression of one of my students, if you write about everything in detail, the whole world cannot contain the books written. I remind you once again that the word “world” is in Russian, and the original word is “space”. The whole cosmos, the whole Universe, that is, the whole world, the whole cosmos, cannot contain the books that have been written. Space would accommodate these books. It was not a matter of the number of books, but the amount of knowledge that I conveyed. He said this figuratively.

I told them a lot about my childhood. I told them a lot of my travels on Earth. As I said, I have traveled all over the Earth. I told my students a lot about the Interstellar Union and the interstellar brothers. But I did not say that these were inhabitants of other planets, because they did not know the word “planet”. But I told them that among the stars there are people just like you, only they are very far away. They perceived it as a fairy tale. The stars for them were not like the Sun. They were just dots in the sky. I told them that the point in the sky is small for the same reason that a huge eagle becomes a small point when it flies into the sky. Just because of the distance.

They asked me a lot of questions about this. I told them that some stars are thousands of times larger than the Sun. They asked me why they were so small, like dots. I told them that they were very far away. Then they asked me why they were visible at all, to which I told them that many stars were not visible from Earth at all. I especially liked to talk about this when in the evening after sunset we often spent the night not indoors, but on the roofs of houses or in the field, where the stars were visible. Let me remind you that at that time there was no electric lighting at all, and therefore the stars were very clearly visible. Literally two hours after sunset, the entire sky was strewn with very bright stars. If you saw the sky that was two thousand years ago, you would experience completely different feelings than you experience now, looking at it at the moment when your eyes have already become accustomed to electric light.

There were especially many questions when the meteor shower began and many stars fell. There was a question from the Apostle Andrew, why do so many stars fall, but their number does not decrease? They believed that the stars were falling. I smiled and asked: “What do you think, why?” He was silent for a moment. During this silence, a merger took place with his Spiritual Self. And then he answered me: “Probably, during this moment, God manages to create other stars in the same places so that our picture of the world is clear and understandable to everyone, so that it does not collapse.” .

Of course, he was far from modern science, but his answer was so spiritually accurate that God does all this out of Love. I explained it simply. I explained that the Earth rotates. Since we turn with her, we can see that the Sun is setting. They smiled (now speaking) as they listened. I told them: “Look, in the same month of different years we see the same stars in the same places. And in another month these

places change a little. This is because we move around the Sun and see the starry sky from different positions, through this piece of the sky, like through a window." I told them so. And after a year, after twelve, they then had a different date, after thirteen lunar months the Earth returns to the same point.

They asked me: "How is this?" I told them that, for example, you are thirty years old, which means that the Earth has circled the Sun thirty times. The Apostle Thomas asked: "Why didn't the Sun go around the Earth, as I see, but the Earth went around the Sun?" I saw that the answer to this question without a mathematical explanation would be incomplete. Therefore, I explained that it is completely unimportant what revolves around what, it depends on the point of view of the observer. From your point of view, the Sun revolves around the Earth. And if you look at the entire system from the outside, the Earth rotates around the Sun. That was the answer. And from this position they understood me.

I also told them a little about the war that took place twelve thousand years ago. Also in short form. I didn't focus on this. I said that in ancient times there lived such creatures that flew to Earth. They looked like (he's showing me now, they didn't know dinosaurs) like lizards, only big, like lizards. I couldn't use the word "snakes" because snakes didn't have arms or legs. These lizards were from another star, and they destroyed humanity during the war. My apostles did not write about this, neither in the apocrypha nor in the canonical books, because they perceived it as a fairy tale.

27:42 The apostles' perception of Christ's travels around the world.

Maria: Please tell me, how did you explain your journey around the world to your students? Weren't they surprised?

Irina: (speaks the phantom of Jesus Christ) They believed that I was moving on the chariot of the gods. Not on a chariot, but Angels carry me. Even if I had brought the apostle into physical contact, he would still have perceived it not as a spaceship, but as a chariot without wheels, created by a heavenly inhabitant. Not as an alien, but as some kind of miracle.

28:47 People's perception of physical contact two thousand years ago.

Maria: On some medieval icons we also see small images of alien objects and ships. Can we say that at all times residents have observed alien ships?

Irina: (speaks the phantom of Jesus Christ) I would not be at all against physical contacts of my apostles with representatives of the Interstellar Union. And the representatives of Burkhad themselves were not against it. But the fact is that attempts at such contact ended, approximately as in the case when I was on the mountain, where my so-called transformation took place. When a ship in the form of a luminous ball or some kind of disk descended, people, even the apostles, not only did not want, but did not dare to step there, considering it an angelic means of transportation, let’s say so. I even invited them, they didn’t want to. For them it was beyond their understanding.

30:02 Physical contacts of earthlings with aliens 2000 years ago.

Maria: Did your other followers have physical contacts after you left Earth?

Irina: (speaks the phantom of Jesus Christ) There have been attempts. For example, if the apostle was in some kind of danger, or he had to preach there, he could be moved on a plate to another city. Because he perceived this contact as a miracle, he did not consciously desire this contact as he did now, because he did not understand what was happening. It might have scared him. If this was done, the memory was usually blocked because he was not ready for it. Now two thousand years have passed, and people already have a different attitude towards this.

Their consciousness was different at that time. It's like God came down on a shining cloud and invited you to go with him, so to speak, to a certain place. They didn't have that understanding about machines. They had never even seen a simple machine, a steam locomotive, or a

self-propelled mechanism at all. They only saw that a team of horses and camels was moving. That is, something externally moves. But for something to move on its own, without the participation of an animal or the force of waves and wind, they had never seen anything like that. Moreover, it came down from the sky. They had completely different feelings and sensations than, for example, Irina. Her consciousness and Soul nevertheless appeared in the twentieth century, where she took on completely different understandings of mechanisms. I wouldn't say that physical contact would have been so easy for her if she had lived two thousand years ago.

Maria: Jesus, we thank you for your very, very interesting and unexpected answers! We learned a lot of interesting things today.

32:53 Parting words of Jesus Christ to the people of the Earth.

Maria: We will be happy to hear Your word, Your parting words for us and our subscribers, for all friends who will listen to us.

Irina: (speaks the phantom of Jesus Christ) My dear divine Souls! My brothers and sisters in the Light of the one creator of the Universe! I thank each of you for the opportunity to contact you, directly answering your questions through contactee Irina Podzorova and through the entire Cassiopeia project.

While on the planet Pikran, I felt the viewing of three conferences by each of you, which I said at the beginning, because distance cannot protect from the transfer of feelings to each other. And the lighter these feelings, the stronger the vibrations. Light is always stronger than darkness, because darkness, by itself, does not exist. There is only Light in different manifestations. What you call darkness is an incompletely revealed or misunderstood or rejected Light. Therefore, I want to turn to each of you, not just with parting words or advice or recommendations, but simply with the wish to look now inside your Soul and know that you have nothing but Light, but that you manifest it depending on understanding of this Light. If your Light turns into darkness, it is only because you do not consider this Light to be Love for yourself, for your neighbor and for God.

If Love and Light become identical in your consciousness, then the whole world will turn into a bright, harmonious place for your development, and not into a terrible prison of the Soul or a mechanism in which you are just a cog. Each of you is extremely important for the entire Universe, because each of you is a divine child. The child of the one who created this Universe. I ask you to always remember this. You are worthy of Love! You deserve forgiveness! But every neighbor is also worthy of Love and forgiveness! See you again!

Maria: See you again!

Olesya: Goodbye, friends!

September 6, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Vladimir Goldshtein – journalist and Facebook group administrator, assistant director of the Cassiopeia project;

Maria Sokalskaya – moderator of the VKontakte group, head of the “Online Learning” project and other “Cassiopeia” projects;

Olesya Smelova - administrator of the YouTube channel, projects "Cassiopeia Level" and "Cassiopeia Color";

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Jesus Christ is the head of the Christian religious egregor on Earth, the Firstborn Son of God, our elder Brother;

Mirakh Count (Archangel Gabriel) - representative of the planet

Burkhad, guardian of the Christian egregor;

Archangel Michael is the guardian of the Christian egregor, patron and curator of the Earth in the Spiritual world;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world;

MidgasKaus is a representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms.

#439 Live broadcast on Easter with the phantom of Jesus Christ.

---

https://blog.cassiopeia.center/lkN7s88H3Ak
https://www.youtube.com/watch?v=AfjnthQGmUQ

00:05 Introduction of participants.

Maxim: Dear friends, hello everyone. It has almost become a tradition for us that I have to start broadcasting, talk about some new events, new actions.

First of all, I want to congratulate you all on this great wonderful Easter holiday. I want to tell everyone: “Christ is Risen!” And to remind you that today’s broadcast is dedicated specifically to Easter, this great, holy holiday. And I ask you to try to ask all today’s questions specifically about Easter.

Today we invited the phantom of Jesus Christ to the live broadcast.

Why phantom? Because his entry into the Astral in the volume in which he exists is almost impossible to bear nearby. Because even when the phantom comes, I personally feel hot and sweaty. Irina perceives everything normally.

Truly risen! And before the broadcast starts, I want to tell you about the new news that is in the project. We have a unique event from May 16 to 22 - a trip of the entire Wellness Center to Moscow with training sessions. All specialists from the Wellness Center, together with Irina Podzorova, will be in Moscow from the 16th to the 22nd.

You can read more detailed information about this event under this video, there is a link below. Let me tell you briefly that almost everyone will be present. Irina will have a two-day training on the Higher Self. There will be a one-day conference, answers to questions after the training.

Ivan Yonten, our cosmoenergist, and Guzel Malyarova, our cosmohealer, will be present. Accordingly, there will be masters of the Center. Alexey Shuvalov is a man who sees your internal organs with his hands. Many who came to our Center know about it. Yulia Kulagina is the girl who works with a bioenergy massager; she has found a technique for reaching the Higher Self through a bioenergy massager. She will definitely tell you about it. I won't take up much time from the broadcast. You can find all the detailed information under this video by following the link.

I also want to remind you that we have an event in Turkey. We specially organized it at the request of Europeans who cannot come to us in Russia. You can also read about this event. Also a link under this video.

And in general, under each of our videos you can find a large number of links to our projects, to our events, to how to sign up for Wellness Centers, to what projects we even have.

There is information there where our site is located, what telephone numbers to contact administrators, what projects, links to these projects. We are completely open to communication, dialogue, and

interaction.

Since this summer, as a project manager, I have been focusing on uniting contactees. It turned out to be a very difficult task, almost impossible, I would say so. We, as the Cassiopeia Project, focus on the scientific community.

Once again I want to remind all scientists. Guys, we are absolutely open. We don't do nonsense. I, as the project leader, want to clearly state that we can give very interesting feedback on points that our science is not yet able to determine for this period of time. The only thing our project doesn't provide is technology. But at least they explain how the Universe works, the structures of energy in space, the interaction of these energies not only in space, but also with the physical body.

Accordingly, I expect feedback from scientists. We are ready to hold conferences with you, answer your questions and organize ourselves, try to unite not contactees, but scientists, because many scientists are scattered. We communicate with many people. Our last communication was with people who are involved in EHF. We will talk about this in more detail later. Then when we hold a conference about this.

Once again, happy, blessed and holy Easter to everyone. Christ is risen! And I give the floor to Irina, she will now tell you what will happen.

Irishenka, have a seat. Today Irina decided to choose a Cassiopean image.

Irina: Good evening everyone, dear friends. Christ is risen! And indeed, his phantom is now next to us. He also congratulates everyone on this holiday. Reminds that in this period of time, two thousand years after the events that happened to him on Earth, this holiday is a symbol of the rebirth of the Soul to life in the True Light of Love.

Maxim: I completely forgot to remind you. We ask all the questions

you want to ask in a separate Telegram chat. There is a link to this chat both under the video and in pinned messages. There are messages on the right side, and at the top there is a pinned link to this chat. Therefore, today I will read questions from this chat, because our broadcast is watched not only on YouTube. And it's convenient for me when I can collect questions in one place. So be sure to go to the chat and subscribe. This chat only works when there is a live broadcast. It opens 30 minutes before the broadcast and closes 30 minutes after the broadcast. Thank you Irish, sorry.

07:49 Phantom.

Irina: Yes, indeed, this is very important about chat.

Jesus Christ is present here in the form of his phantom. Let me remind you what a phantom is. This is part of the energy of a living spiritual entity, which can be created by both an embodied and non-embodied entity, which contains the energy of this being and is connected with the main carrier of consciousness.

What does it mean? This means that the phantom that is present here now is connected through an energy channel with the consciousness of Christ, who will answer questions through the phantom. He can make millions of such phantoms. And indeed, he does them, because he has contactees not only on our planet Earth.

He explained it to me. He even has contactees in other galaxies. He calls contactors people who receive energy, information and any other flows of his Soul from him.

Maxim: I already have questions. Please tell me why the phantom comes to Irina? Other contactees say that they communicate with you personally. Why does a phantom come to Irina? I can't understand.

Irina: Personally, I must be in my physical body. I send phantoms to everyone. Those who come to me themselves through the Astral, for example, can communicate with me personally when I am in the physical body. They see me through the astral world.

Maxim: When they come to you, it turns out that they come to you, to your body with your energies. And when you come, you send your phantom. So?

Irina: I must be in the physical body and constantly keep in touch with it. Because I continuously process the energies of earthlings that come to me through the Christian religious egregor. As I already explained to the listeners of the Cassiopeia channel, this means that energy exchange occurs through the sacrament.

Maxim: Through communion?

Irina: Yes, energy exchange with me occurs through the sacrament, through the Eucharist. He who partakes of bread and wine invisibly absorbs my flesh and blood. What does it mean? Not physical, but energetic (shows balls). Energy matrices that completely contain my energies. But at the same time, the person exchanges with me those energy matrices that contain records of his psychological, spiritual, mental, and astral states.

And in order to process this and give it Light, to process its darkness, dislike, I must constantly be in the body. I don't even have a sleep period, for example.

Maxim: I don’t understand. Don't you ever sleep?

Irina: No, I am not separated from the body. I can only separate the phantom.

Maxim: Can you travel in the Astral yourself?

Irina: Yes, but I can transfer my consciousness into one of the phantoms. For example, now I have sent 34% of my consciousness here.

Maxim: Why not 100%?

Irina: Because it must control other processes.

Maxim: Thank you.

12:05 Regeneration of the body of Jesus.

Maxim: People ask: do you have wounds on your arms and legs?

Irina: No physical ones. Even when my body was taken by representatives of the planet Burkhad, who were called Angels (when they were called Angels in the Bible, people did not lie, they really were incarnate Angels), when they took my body to the ship, they restored it even then. They used special drugs and radiation from special devices that stimulate very rapid cell regeneration.

Maxim: So, what are they stimulating next? So, you have become immortal?

Irina: Yes. Then, when I appeared before Thomas and showed him the wounds on my arms and legs, there were traces there that he could touch. But there was no more blood or wounds, only a trace remained.

Maxim: Is there a trace?

Irina: It was still there then. But now two thousand years have passed.

Maxim: So there are no traces?

Irina: Smiling.

Maxim: There are no traces anymore.

Irina: Yes.

Maxim: I understand.

13:31 Love for Jesus.

Maxim: People ask: how to achieve unalienable Love for you?

Yes, guys, I want to remind you once again that you can ask all questions in the Telegram chat, it is attached below under the video and in the messages above in which you write messages. I read all the questions from there.

Irina: How to achieve Love for me?

Maxim: Yes, inalienable Love for you.

Irina: If you feel that something is stopping you from loving me, it means you don't have enough love for yourself and your neighbor. It is impossible to achieve Love for a stranger, for God, or for an entity with which you have not personally communicated. It opens gradually.

Self-love develops first. Then it spills out on others. And then it manifests itself to God and to all beings, to the entire Universe. As the one whom I called my beloved disciple, who was very close to me on Earth, John the Theologian said: "He who says that he loves God and hates his brother is a liar, and there is no truth in him. And the one who says that he walks in the Light, but hates his brother (meaning both the believer and any person in general), is still in darkness."

Maxim: Okay, thank you.

15:22 Holy Fire for Easter.

Maxim: Please tell me that the Holy Fire descends on Easter.

Irina: Yes.

Maxim: There is a version that priests specially light this fire. And that it's not just fake, but that it's some kind of fake. Is it true?

Irina: I remember there was such a question. Mirakh Count told me about him.

Maxim: We want to ask you this question personally. I think you're more aware.

Irina: No, priests don't fake anything. For them, faking miracles, miraculous phenomena, unusual phenomena will be a lie. For them to commit a conscious lie means, as you say, to lower their vibrations, to sin.

What is Holy Fire? This is the concentration of the energy of the Christian egregor, which contains, among other things, my Christ consciousness (shows its image, which contains phantom energies, including Archangel Michael, Archangel Raphael and other guardians of the Christian egregor, and from plasmoid civilizations). All this is concentrated through the subtle worlds to such an extent that it turns into material fire. This is done on purpose as a sign of the presence of the Holy Spirit.

Maxim: These are the energies of the Spiritual world, which further transform into the energies of the subtle material world, and then they are condensed into the energy of fire here on Earth. I understand correctly?

Irina: Yes. And all this with the participation of thin-material civilizations, plasmoids.

17:21 The Bible about subtle civilizations and reincarnation.

Maxim: We talk all the time about subtle-material civilizations. Why

don’t we hear about these civilizations in the Bible?

Irina: Why doesn’t it say about Nature Spirits?

Maxim: Let's call these subtle-material civilizations. Nowhere in the Bible is there any mention of these civilizations.

Irina: The purpose of the writer of the Bible is not to talk in detail about the system of the material world, but to talk about the path to God.

There, for example, there is not a single word about the existence of Russia. But this does not mean that Russia does not exist. There is not a single word about the existence of Mars, Venus, Mercury, Jupiter. Doesn't that mean that these planets don't exist? There's just no mention of them.

It tells about the path to God, tells the history of the Jewish people, the path of their mistakes and return to God, both ups and downs. In some biblical stories, Nature Spirits are mentioned under different names.

For example, in the Old Testament they are mentioned under the names (shows) “idol” or “gods.” They were deified and made into idols, which is how these creatures were mentioned. Of course, not about all of them, but about some of them. But since Judaism and Christianity are monotheistic religions, the emphasis was placed on God the Heavenly Father, on God the Creator. And all subtle-material civilizations are the same Spirits as humans, only embodied in subtle bodies. There was no such emphasis placed as in other religions.

The first reason is that the Bible talks about the path to God. And the second reason: to support Judaism.

Maxim: Thank you.

Guys, I really can't read all the questions. I will do this very carefully, selectively. Let's say I scroll down three times and then read the

question that comes first.

There was a question: why doesn't Christianity talk about reincarnation? But today is such a day, I think that people want to personally contact and find out the answer from him personally. Although, indeed, these questions have already been raised. You can find them in our videos.

Irina: Yes, indeed, in Christianity there is no mention of reincarnation for the reason that belief in one or another type of afterlife, as the practice of spiritual activity on Earth has shown, does not have any fundamental meaning for a person. Especially in the context of developing Love within yourself.

Many people who believe in reincarnation (and at the time when Christianity was born, people who believed in reincarnation) believed that all their evil deeds against the Love of God would be corrected in the next life. This faith did not help them change themselves. This was the first moment.

The second point was due to contacts with plasmoid civilizations, which transmitted information distortedly to their contactees. They talked about how the Souls of people incarnate into animals, and animals incarnate into people. They mixed these concepts. But in fact, only the etheric matrices of those animal Souls that have already scattered in the Astral are used. They can really go to build the Souls of people. But this is not an intelligent Spirit.

Maxim: Now it's very difficult to explain, people won't understand. Dear friends, Human souls do not incarnate in animals. They incarnate into subtle-material civilizations that create the Souls of animals and do not distinguish them from themselves.

Irina: Yes. Even plasmoid civilizations actually conveyed that the etheric matrices of the Souls of animals that dissipate can be used to create the etheric matrices of people, but this is not the embodiment of the Spirit. This is only part of the etheric body.

Maxim: Oh, but I didn't know this. That is, the scattered Spirit of an animal, etheric matrices can partially structure into the etheric matrices of the person himself?

Irina: Yes. They help build his etheric body. And not only the etheric body, when the Spirit incarnates into a person, but also to build etheric channels for communication with the entire biosphere of the planet and, naturally, with ourselves. These are like channels for interacting with nature.

Maxim: Thank you.

Irina: Actually, I was asked this question. Nicodemus, my disciple, a very rich and influential man, came to me when I was on Earth and asked: "Is it true that a person can be born when he is old? Can he really enter his mother's womb and be born?" That is, the question about reincarnation was asked here. I answered him, focusing his attention on the spiritual side of the question: "That which is born of the flesh is flesh, and that which is born of the Spirit is Spirit."

This answer suggests that, regardless of the number of reincarnations, only that person who realizes himself as the Spirit will gain salvation (in Christian terminology) or (in esoteric terminology) achieve enlightenment and raise his vibrations. Not by the flesh, but by the Spirit, which fills the flesh, nourishes it, heals and cares for it. But still by the Spirit.

25:10 Participation of Jesus Christ in the creation of earthly civilization.

Maxim: Thank you. I have now found the question. By the way, I managed to ask the phantom the same question before the broadcast, only in a slightly different form. Alexey asks him: why did Jesus choose the Earth and the earth's body from billions of galaxies for eternal life?

Irina: Yes, indeed, dear friends, this question is very important for you, very important for each of you (both for the individual and for your civilization). The whole point is that I participated (albeit indirectly, only

with my spiritual energies, tips) in the creation of your race.

How it was? There is one Spirit very close to me, there are actually many of them. Here is one of the Spirits very close to me, with whom we incarnated many times even before the creation of earthly civilization, once again incarnated on the planet Tumesout as a man - a scientist. Space explorers of his planet discovered your world, where there was no intelligent life yet, there were no bodies capable of accommodating an intelligent Spirit from the Spiritual World. Another two million years passed. The scientists of the planet Tumesout, among whom was that incarnate Spirit who was my close friend, began research on the creation of your race.

He was, of course, not alone, he was in a group of scientists. You now know this Spirit as the Mother of God Mary, who gave birth to me on Earth. Only she was in Tumesout, in a man. However, I already knew him then and was his supervisor. I was not embodied at that time. I was (showed) at the highest spiritual level. As always, I haven't left, in your opinion, level 24.

I contacted this scientist. And when he began work on creating your race, I suggested a solution to him. How to group cells correctly and connect the genomes of different civilizations. I wasn't just giving him mental clues. I sent the energy of Love, inspiration, stood next to him when he put it all together in the devices, and sent my spiritual energy so that everything would work out for him.

Therefore, I consider myself one of the spiritual creators of your race.

Maxim: You are considered one of the spiritual creators of our race and, accordingly, you feel like our creator. I understand correctly?

Irina: Yes. As a father (he participated). I was very happy when the first intelligent people appeared on this beautiful planet. And I thanked the terrestrial plasmoid civilizations who also participated in this.

Maxim: They are still involved in the formation of the physical body at the moment when it is in the womb?

Irina: And the physical body through the creation of elements and mixing, that is, biochemical reactions of elements, because plasmoid civilizations must supply material for the body. And the etheric body. But not the entire etheric body, because the Spirit brings with it a part from the Spiritual world, that vital energy that is given to it for incarnation. This is his prana.

Maxim: Thank you.

Dear friends, I want to remind everyone once again that there are four conferences with the phantom of Christ on our YouTube channel. And many of the questions you write have all the answers there. Look very carefully at these four conferences, and it will become clear to you what we are conveying, in what form, and how this information is perceived.

30:03 Easter and Passover.

Maxim: Question to Jesus: why are Easter and the Resurrection of Christ celebrated on the same day? After all, Easter existed before the birth of Christ. And the real resurrection of Christ, if I'm not mistaken, did not happen on Easter.

Irina: And now this happens not on the Jewish Passover, but later. In our Christian Church we even have a special canon, a prohibiting rule that prohibits making Christian Easter on the same day as Jewish Passover.

Maxim: Why is this being done?

Irina: Because the Jewish Passover cannot be the Christian Passover (like the resurrection of my body), since this really happened later. These are just two different holidays. One is a Jewish holiday, and now Easter is a Christian holiday.

Maxim: Why do we celebrate Resurrection and Easter on the same day?

Irina: You don’t celebrate Jewish Passover, only Christian Easter. In general, Passover is celebrated on the 14th of Nisan - this is the Jewish month. And every year it is celebrated differently, the date of the 14th Nisan shifts, because the Jews still have a religious calendar that is not solar, but lunisolar. Lunar months are taken into account there.

Maxim: Yes, I understand.

31:50 Tomb of Jesus.

Maxim: The question is: where is the grave of Jesus? Chronology Fomenko and Nosovsky say that the real Jerusalem is Istanbul in Turkey, and the site of the crucifixion on Mount Yusha. Where is Jesus' grave after all? Guys, where do you think Jesus' grave is?

So Angelica Checha asks the question: if he was resurrected, how can there be his grave? Please think about what you are asking.

Irina: There was a former grave, but it’s definitely not in Turkey.

Maxim: Where is the former grave?

Irina: In Israel. This is the place where they buried me, but I am no longer there.

Maxim: I understand.

32:33 Is it possible to work on Easter?

Maxim: So, one, two, three, I scroll through and stop. Is it true that you can’t work on Easter?

Irina: Everything depends not on the action itself, but on the motive of this action. If this work is necessary for your life, for the life of your

loved ones. If this is your responsibility, without which other people may suffer, then naturally you need to do this work. But it should not be an obstacle to the spiritual perception of events on this day, that is, spiritual work.

Easter symbolizes the resurrection of your Soul to the Light. And therefore, it is advisable to devote this day to communication with your Higher Self, prayer, good deeds, communication with family and relatives. Perhaps communicating with those relatives whom you have not seen for a long time. That is, the exchange of Love.

And work should fade into the background if it is not paramount. The emphasis here is not on prohibition, but on what is more desirable for spiritual development.

Maxim: Thank you.

Yes, indeed, guys, you are now reminiscent of a “question and answer” in the chat. I promised to read the questions exactly where there are the most likes. I agree with you. Really like these questions. And I will see that there are a lot of likes, and I will read these questions.

34:26 Relationships between religious egregors. Ecumenist.

Maxim: Is it possible to be in several religious egregors at the same time? That is, to be both a Christian and a Jew.

Irina: According to the traditions of each of these religions, if you look at them from the inside, of course, it’s impossible. Because the idea of God, which is in each of these egregors, prescribes the worship and veneration of only one image.

And for those who adhere to religion in a spiritual sense, in a spiritual sense, naturally, it is possible. It’s just that such a person will no longer be a Christian, a Jew, and so on. He will be an ecumenist, that is, a person who recognizes all religions, recognizes the salvific nature of all religions. This is also a kind of religion, a religious and philosophical

teaching.

But here you need to understand that each individual religious egregor teaches only its own unique path. If every religion says that all other religions are the same as it, then there will be no need for its existence at all. And, naturally, in the existence of those people who are there as clergy.

Maxim: Thank you.

Irina: Imagine that Christianity will say: it doesn't matter at all how you are saved. Muslim, Christian, Hinduism, Buddhism. They will all go to God. Naturally, people will ask the question: then why do you exist?

Maxim: That's right.

Irina: This should not be understood as competition. This is one facet of the truth, which is accessible to the perception of people with a certain worldview, with certain vibrations.

Maxim: This is an opportunity to choose what you like best, or to join what already exists in your area, with your beliefs, with your friends, relatively speaking, relatives and loved ones. Yes?

Irina: Naturally, you can be in all egregors at once. But this will already be its own separate egregor. Just like the laws of some countries allow you to be citizens of several countries at the same time. A country is also a certain egregor. But if you come to one country, you will be in it, you will be under the protection of this egregor. Also, if you, for example, are an esoteric ecumenist, when you enter a temple of a particular religion, you temporarily find yourself in this egregor.

Maxim: Then it turns out that I am a Christian, an ecumenist, an esotericist.

Irina: But if you are an ecumenist, then you are equally a Christian,

Muslim, Buddhist, and so on.

Maxim: Yes, I have a very good attitude towards every religion and enjoy visiting temples. I try to join their religion and feel the energies. Indeed, this is closer to the Cassiopaeans, who are multi-religious.

38:22 The essence of the help of Jesus Christ.

Maxim: This is the question. I might skim through it to some extent, but it is very interesting. Jesus, please tell me that you are sacrificing yourself and your energy, taking on the sins of others. But shouldn't a person develop himself and take responsibility for his actions? Is it possible that if the Soul does not go through its lessons to consciousness itself, then this will not be valuable for it? It's like giving money to a poor drunk. He will simply drink them away; it will not be valuable to him. Tell me please, do you sacrifice yourself and your energy?

Irina: The word "victim" can generally be understood in different ways. Modern people understand this word as something irreplaceable. What one person gives to another, while realizing himself to be superior to him. "I donate this to you," becomes a negative expression, expressing a negative understanding that the benefit that a person gives to another for free becomes a sacrifice. Because the person shows that he suffers from this.

And when I share my energy with people, I take their energy to myself, that is, I process it into Light, in this understanding it is not a sacrifice. This is a sacrifice in the understanding that this is the concentration of my energies specifically on your civilization. But this does not mean that I have any damage. The source from which I receive energy, my Heavenly Father, has an infinite amount of energy.

You know that the entire material Universe makes up only a few percent of the energy of the Spiritual world. But even the entire Spiritual world does not constitute even one hundredth of a percent of the energy of God himself. Can you imagine how much energy he has?

In general, everything you see is his energy in one form or another. But this is only a very, very small part of that energy.

Maxim: This is the part that we can see and feel. And there are many more other parts.

Irina: Yes. As for the lessons. My help to people is completely voluntary. That is, it must be voluntarily accepted by a person. Therefore, she does not interfere with him in any way to complete his lessons. Of course, if you give an alcohol addict money to buy alcohol, you will contribute to his degradation if you do not really help him. But if this person suffering from alcoholism, an alcoholic, has an accident, if he falls, you will help him anyway.

So I also provide assistance to those Souls who do not ask for some earthly pleasures. Not just pleasures, but those that lead them to degradation. It is the energy I invest so that it goes towards their spiritual development. And at the same time, if they use it for something else, then they perceive my energy worse. But that doesn't mean I don't give it. They make themselves unable to perceive it.

Maxim: Thank you.

Irina: That is, if a person who abuses alcohol, and to whom you did not give money for alcohol, if in your presence he experiences an attack of some kind of illness or receives some kind of injury, and you see this, in any case you will help him. Even if you have to spend money to do it.

Why will you help? Because you will be moved towards this by your compassion, your mercy. Even if you sacrifice something for him. And I am in a position where I have something to give you, and I want you to accept my Love.

Maxim: Thank you.

42:53 Maria Devi Christos.

Maxim: Dear Jesus, they write so many times already. I honestly don't know who this is. But I'll ask a question. Jesus has truly risen as the mother of the world. Can you tell us about the mother of the world, Maria Devi Christos? Who is this anyway?

Irina: Contactor. The person who contacted me. And she was in contact with my mother. But when she contacted me, at first she correctly conveyed information and energy, and then she became proud that people were glorifying her.

Maxim: I just don’t know who she is.

Irina: Shows a woman. I don't know her either. Contactor.

She gradually became proud that people were glorifying her. What does it mean to be proud? She forgot that there is a source of all the good that came to her. She began to treat people arrogantly, get irritated with them, and take offense when they criticized her. And because of this she lowered her vibrations.

Naturally, like with any person who falls into low vibrations, I continued to contact. She did not want to continue communication (shows that she herself turns away and leaves). Moreover, then those plasmoid civilizations came to her, who introduced themselves as me, so that she could create some kind of organization with the help of which she could instill fear, for example, about the imminent end of the world and receive certain energies.

Maxim: I understand, thank you. This is what we are called. This word is sect.

Irina: Actually, this is a female contactee.

Maxim: I understand, the woman is a contactee. I heard everything, thank you very much.

45:10 Jewish and Christian Passover. New prophet.

Maxim: What is the difference between Jewish Passover and Christian Passover?

Irina: Jewish Passover. The commandment about this holiday was already in the book of Exodus, which was part of the Old Testament, the Torah. This holiday was passed down to Moses. It was in honor of the memory of how the Jews left Egypt. This is the holiday of Passover. And Christian Easter is the resurrection of my body.

Maxim: I understand, Christian Easter and Jewish Easter are two different holidays.

Irina: One belongs to the Jewish religion, and the second to the Christian religion. Now these are two different religions.

Maxim: You said that now these are two different religions. When did these religions split?

Irina: A radical division occurred at the First Apostolic Council, which is described in the book “The Acts of the Apostles.” Why did the radical separation of these two religions occur? Because there a decision was made about which commandments obligatory for a Jew are not obligatory for a Christian. For example, circumcision, food prohibitions and much more. Like ritual purity.

Maxim: There are a lot of questions for you, some even too many.

Will a new prophet, a new religion, a new egregor come? Will we have a new prophet on Earth now, in the near future?

Irina: There are actually a lot of prophets now. Each contactee can be called this word to one degree or another. After all, a prophet is not only one who predicts only one of the options for the future, but also one who carries messages from higher powers. From certain Angels, from alien civilizations who are more pure-hearted, high-vibrational entities. From plasmoid civilizations. Will they create new religions? This already depends on many factors.

48:05 The spiritual meaning of the symbols of eggs and Easter cake.

Maxim: Here's a question: eggs and Easter cakes, and a question mark. Minsk.

As I understand it, why do we paint eggs and bake Easter cakes for Easter? I know these questions are asked very often. But people want to directly address the phantom. What he will answer today is here for us.

Irina: Why Easter cakes and eggs?

Maxim: Yes, why do they paint eggs and bake Easter cakes? What will the phantom of Jesus Christ answer us?

Irina: Why these particular treats for Easter?

Maxim: Yes, and why do we paint the eggs?

Irina: He says this custom is not accepted in all Christian churches. There are Christian denominations where this is not accepted. This is accepted mainly in Orthodoxy. There are others too, Catholic ones. But the concentration is precisely in Orthodoxy, especially in Slavic countries.

Indeed, there was such a legend, there was such a legend that my student Mary Magdalene came to the emperor and congratulated him on Easter, saying that Christ had risen. He didn't believe her. And he said that an egg lying on a platter would sooner turn red than someone would be resurrected (I'm telling the legend now). And at that moment it turned red.

But, dear friends, it was a legend. It was a certain legend in figurative form that conveyed what was happening on the subtle plane. Naturally, no one would have physically allowed my student Mary Magdalene,

who was from a rather poor class of society (they were below average in the social hierarchy), to see the emperor in Rome or even his proconsul, so to speak.

So what happened on the subtle plane on this holiday, on the holiday of my resurrection? Thin-material plasmoid civilizations, which were responsible not only for the territory of Israel, where I was, but in general for the entire Earth (the union of these civilizations), when I connected with my body and deprived it of death, the ability to grow old and die, get sick, be destroyed in any way , I sent Light to these plasmoid civilizations. They accepted it and agreed that there would be my egregor on Earth, in earthly space. And the symbol of this egregor from plasmoid civilizations was an egg and Easter cakes.

For what reason in this particular form? For the reason that a chicken hatches from a bird's egg, in this case a chicken egg (the image shows how chicks hatch).

Maxim: Symbol of life.

Irina: Yes, it is a symbol of life. This is a symbol of how it comes out of the shell, where the chick is not yet visible (but it is there), and then comes out of there. Therefore, even in the pre-Christian period, eggs have always been a symbol of fertility, a symbol of the birth of new life.

Red has always meant blood. Here it was shown that a new human life begins from the moment of my resurrection, when I changed the entire human nature with my vibrations. I did this with my blood, which I shed on the cross. That's why the color of the egg is red.

As for the Easter cake. This is also an ancient form of treat in honor of the birth of God, for example, the Sun. This form was present in various Proto-Indo-European civilizations. Their flour was different, but in any case such a product was baked. Long, like a cake. And it was smeared on top with white, for example, milk, sour cream (shows these products). This was also a certain symbol of fertility.

Maxim: I understand, thank you, Jesus.

Dear friends, I want to ask you: if you really like our live broadcasts, if you are really interested in the topic of esotericism, please like this broadcast. Because a like is your little help for our channel to promote it. Don't be lazy, please click like and subscribe to our channel. And you won't miss the new live broadcasts that are going on, and at the same time you will help the Cassiopeia project.

Once again I want to thank each and everyone for your help and support. We really need it and it is important. And only because we have you, we have a project, we have a Center. We have the ability to transmit information to you, shoot videos and much more. Therefore, if possible, please like it, which will give us the opportunity to promote our channel even further to a larger audience.

I would like to remind you that all the necessary information and a lot of your questions that you ask here are already in four conferences on our channel. Type "Conferences with the Phantom of Jesus Christ." We don't have the word "phantom" there, we have it, in my opinion, with Jesus Christ. Type in the search and look, read these conferences. You will receive answers to many of the questions that you ask here both in the Telegram chat and in YouTube messages. And all the questions that I have, I read from the Telegram chat. It's pinned to the post at the top of YouTube where you write your posts. There is a fastener there. You can go to this Telegram chat and ask any questions there.

I see we have more likes. Therefore, I will probably really extend this broadcast for another 15-20 minutes. There are a huge number of questions, I don't even have time to read. So let's continue, Irish?

Irina: Yes, of course.

Maxim: Once again, thank you all so much for your likes and support.

56:51 Reaction of Jesus and the Burkhadians to the crucifixion of Christ.

Maxim: "Hello, dear Jesus! How did they react in Burkhad to your

crucifixion on Earth? Weren't you disappointed in the earthlings when this crucifixion happened?"

Irina: This was one of the options. When I went to incarnation, I saw that this was one of the options for my life on Earth. In fact there were many options. But when I incarnated on Earth, reached adulthood and began to preach, every year the likelihood of just such a scenario increased. The energy was condensed on the line of probability of the future on which this event took place.

And I saw it. When, while on Earth before the resurrection of my body, before restoration, I slept, I consciously left my body. I watched my Time Tape. I saw this event becoming more and more real. I saw the reasons why this happened. I even saw the thoughts and plans of my students. I saw their bewilderment, and sometimes their lack of faith in me as a man from God. They really expected me to free Israel from the captivity of the Gentiles so that it could become a country in its own right.

But this was not part of my plans. Because for me the main thing is the kingdom of the Spirit, the kingdom of Love in the human heart, and not the freedom of some state. These are only earthly ideas about the importance of this.

As for "how they treated it." I didn't have any disappointment. I knew about the likelihood of such developments and their reasons when I was still incarnated. And some of the Burkhadians were very surprised, some were even disappointed in the earthlings. And when I arrived in Burkhad, I explained to them the true background of these events.

Maxim: Thank you. We have a very cunning Rimma in our Q&A chat. Instead of waiting for other people's likes, she wrote a message and gave herself a bunch of likes. Okay, for your intelligence (so that I pay attention), I'll ask a question.

59:52 Baptism of a child.

Maxim: What is correct: to baptize a child right away or wait for him to

choose the religion that he likes best?

Irina: The baptism of a child in no way implies violence against his will. Because baptism does not oblige you to anything. This is just help for a child from a Christian religious egregor.

What is baptism? In this case, this is an opportunity to receive communion. Baptism is not given because the person, the child who came, is so sinful and unclean that he needs cleansing. And for the reason that he needs my energies, which I give through the sacrament. I can give them only to those who have undergone this sacrament. Because he joins the Christian religious egregor and is filled with energy. And he is seen by observers of the Christian religious egregor, Spiritual hierarchs and Angels of this egregor. And when the priest baptizes, Angels are invisibly present and invest in his field a certain access to my energies, which he will receive through communion.

The sacrament, which the priest gives, and I put my energy there, my blood and flesh (I give through bread and wine), is an opportunity for the Spirit, which is embodied in the child, to more easily adapt to the world. I will help process all the negativity that is possible during adaptation, when, for example, he does not understand why people behave this way. After all, he still has little experience.

Should I wait until he is an adult? Do you, parents, give him certain food, for example, without waiting for him to learn to choose it himself? So this is spiritual food.

1:02:29 Religion and spirituality.

Maxim: Thank you. Viktor Skripnikov decided to starve out the question-and-answer chat. I still ask this question to Jesus Christ: why is the surviving civilization of earthlings, such as Bigfoot, more spiritually developed than the population that now inhabits planet Earth? Doesn’t religion help you become more spiritual and developed?

Irina: Because any religion without Love turns into self-deception. Any highest temples that you build, the brightest and purest places of power where you go, are simple human buildings. Yes, they are filled with the energy of plasmoids, but they are simply the same Spirits as you, but in subtle bodies. If you do not have Love in yourself, it will not bring any benefit to your spiritual development and can even lead to degradation. Because by refusing to develop Love in yourself, even despite the great resources that I give you, that other spiritual teachers give you, you thereby show disdain for the gifts of God.

And here those civilizations that you call “Yeti” and so on, follow their own path of development. They teach their children to love nature, love themselves, their tribe and focus on developing faith. Faith is a feeling that sets in motion enormous Spiritual energy and can really change the world. And that's why they can teleport, fly and stuff. In their practice they fulfill the commandments that I conveyed to the Apostle Mark. He outlined them in the 16th chapter of his Gospel.

It says that anyone who believes in me (“believing in me,” I meant believing in himself in me and in me in himself) can do the works that I did. It is listed that he can heal the sick and change matter in a certain way. Even if they are not in a Christian religious egregor, when they receive communion, they find in themselves, in their Souls, the Light of Love and Faith, which helps them improve.

1:05:48 The spiritual meaning of diseases and wars.

Maxim: Thank you. This is a rather tough question. Forgive me, of course, for him. People sometimes turn in this form.

“Why are you, Christ, so great and cannot save people from disease and war?”

Irina: From illnesses and wars?

Maxim: Yes.

Irina: The answer will not be very gentle.

Maxim: Come on, give me the answer as it is. I roughly understand how soft it will be.

Irina: I will not save humanity from diseases and wars for the simple reason that these diseases and wars serve as a blessing for those Souls who have not learned to love themselves, their neighbors, or God. When they realize the full horror of their depth of fall and are tired of senselessly howling and whining in the darkness without God, they will come to him.

Maxim: Good answer, right.

Irina: Not very soft.

Maxim: No, it’s quite short, clear and understandable.

Why are wars and diseases given to us, who creates them? The freedom of choice of each person shapes wars and his illnesses. And, except for the person himself, no one can remove these diseases and wars.

Irina: I said it more briefly. I'll make it a little more clear. This answer may seem harsh and even cruel. If we look closely at every disease and every war, we will find a spiritual cause for both. Only you can eliminate it. If I begin to eliminate wars and diseases without your internal changes in yourself, I will do you great harm. It won't be Love because you won't come to it on your own.

1:08:14 Visit to the cemetery.

Maxim: I understand. Tell me, please, is it possible to go to the cemetery on this day on Easter?

Irina: Yes. And not necessarily. This is a custom.

Maxim: In principle, whoever wants can walk?

Irina: Anyone who wants can go.

Maxim: Is there anything so bad here?

Irina: No. This is the custom of visiting the graves of their ancestors, also very ancient, even pre-Christian, when on the birthday or on the day of the appearance of the solar deity on Earth, people visited the graves of their ancestors. It's just that in Christianity it is still customary not to go to Easter itself, but to Radonitsa. This is on the ninth day after Easter. You can go any day, you can go on Easter if you want. This is a sign of respect for the ancestors of one's family.

1:09:30 The spiritual meaning of the expression "fear of God."

Maxim: Thank you. Question from Mila: Jesus Christ, tell me, have you ever lowered your vibrations below level 24? If so, where was it?

Irina: No, I didn't lower it. For me, death is like being left without the Light of Love in which I am now. Do you have an understanding of "fear of God". Some people distort it into the understanding of "fearing God as a despot; like a judge who will punish for the slightest offense." And the true understanding of the "fear of God" is the fear of lowering your vibrations and being left without that Light of Love, which brings the greatest happiness, harmony and desire to help others.

Maxim: This is a provocative question. But I'll ask it anyway: in our country the Ukrainian Church is considered schismatic. Is it possible to visit her?

Irina: My dear Souls! A Christian wrote this. I am speaking now to Christians. My dear Souls who love me in any denominations, in any churches that are divided on Earth because of selfishness and other human sins. It doesn't matter what church you go to, where my name is written. The main thing is that you do this with Love for me, for yourself, for your neighbor. And also to your enemies.

Maxim: Thank you, I understand.

Irina: That is, they followed the commandments.

1:11:20 Quantum transition of the Earth.

Maxim: Thank you. Question from Andrey Kobts: is there any of the 12 Apostles embodied on Earth now?

Irina: Yes.

Maxim: Are there many of them implemented now?

Irina: Almost everything. Only two are not embodied.

Maxim: Are all 10 Apostles embodied on Earth now?

Irina: Yes.

Maxim: Who is not embodied?

Irina: Jacob and Nathanael (someone).

Maxim: Okay, thank you.

Irina: Because the Earth is going through a very important period in its history: increasing vibrations and approaching the acceptance of the Kingdom of God in its heart with its manifestation in the material world.

Maxim: Acceptance of the Kingdom of God in your heart and manifestation.

Irina: The manifestation of the Kingdom of God through your heart in the material world. One of your very good contacts said: “Lighting a candle is much better than sitting and cursing the darkness.” If everything around you is physically dark, you light a candle. If it is dark around you in the spiritual sense, if everyone hates each other, if the world is filled with fear, horror, violence, then the only way out in this situation is to light the Light in yourself for everyone who realizes the horror of this situation. And then everything will begin to change before your eyes.

Maxim: Thank you. The question is so interesting: why do we hit eggs on Easter? What's the point? Who has the stronger egg? Does this make sense, or is it just some kind of tradition?

Thank you, I understand. We have already figured out who has the stronger egg.

Irina: Some kind of game, she says.

Maxim: Exactly, it’s like a game.

1:13:49 Jesus Christ about his incarnation in the Antiverse.

Maxim: Yes, there was Jesus Christ in distant galaxies. Tell me, please, have you incarnated in the Antiverse?

Irina: Not in this manvantara.

Maxim: But was he ever incarnated?

Irina: Yes. In the last manvantara there were four Universes, each of which was “anti” to the other. And I embodied myself in each of them. And this time I incarnated only in our Universe, but not only in our Galaxy. Now I might have incarnated there if I had not made such a decision to forever unite with the body of Jesus Christ, that is, such a person as Jesus Christ, this person.

Maxim: Thank you.

Guys, what is the main purpose of the coming of Christ, was Jesus in India, you can look at all the answers to questions in the four conferences that took place before this. These questions are all discussed very well there. And there are other questions that you haven't even had time to ask yet.

1:15:00 Christian cross.

Maxim: What is the opinion of Jesus Christ about wearing a cross?

Irina: In general, the cross is a symbol of my Love. Because if it weren't for my Love, I would not have agreed to go through such a difficult experience. Therefore, this is a symbol of my Love. Also, this fresco is a symbol of Love and the exchange of energies with all subtle civilizations responsible for all four elements.

After all, the symbol of the cross is a pre-Christian symbol of dedication to the elements of air, water, earth and fire.

Maxim: But you are crucified there. Your body is drawn there. How do you feel about the crucifixion?

Irina: When my body is drawn there, it is emphasized that during the crucifixion I transferred the energy of Light not only to the egregors of the Earth and the Soul of every person in general in the past, present and future. I transferred it to the Spiritual World, in which there is no time. And to subtle-material civilizations, that is, he built his energy into their worlds so that they could be brighter. Lighter, so that there are fewer parasitic civilizations. After I was crucified, and after I was resurrected, there were only 12 percent of parasitic plasmoid subtle-material civilizations left on Earth. And before that it was 38%. But in two thousand years you have almost made up for lost time.

Maxim: Then, when you were crucified, it was 38%, then 12% remained?

Irina: And the fact that my body is drawn on the cross is precisely what is drawn that when I was dying, I transferred energy to the elementals, that is, the Spirits of the elements of air, water, earth, fire.

Maxim: It turns out that in reality, when you died, you cleaned our planet of destructive subtle civilizations?

Irina: Raised their vibrations. They voluntarily accepted the Light and raised their vibrations. And those who did not accept and were not promoted remained 12%.

Maxim: Now are we catching up again?

Irina: Residents of the dense material world of the Earth, incarnating in dense bodies, you have very high energy compared to plasmoid civilizations, because your energy is dense. And therefore, by sending thoughts, feelings and desires to the astral world, you endow them with great power, charge them with great etheric energy. It's as if you are programming the plasmoids that live in your space for a certain behavior.

Not everyone, of course. There are very light plasmoids who know how to resist such an influx of negativity from the dense plane. But not everyone knows how or wants to do this.

Maxim: Dear friends. I want to remind you that I do not read the questions you write in the YouTube chat. I am reading questions from a Telegram chat that is pinned to this YouTube chat in which you are writing. Please look at the top or below the video. There is a chat where you can ask questions live.

Our broadcast will now come to an end, I will ask the last question: is it true that Jesus, through his sacrifice, opened an energy portal for the incarnation of brighter Souls on Earth?

Irina: You can say so. Not what the portal opened. Attracted lighter Souls to incarnate on Earth by increasing vibrations in the noosphere of the Earth, including subtle-material civilizations.

1:19:55 The Bible about astrology.

Maxim: Why is astrology prohibited in the Bible?

Irina: It is not astrology itself that is prohibited, but the science of how to recognize the incarnate Spirit by various star signs. On the contrary, in the first chapter of the book of Genesis, Moses was told that the purpose of the stars, the purpose of the heavenly bodies, is to be signs and signs for people.

The position of only those astrologers was criticized who believed that the stars and planets somehow control a person, how the Gods deprive him of freedom of choice, how the planets or stars rose when he was born, which means that he will definitely be like this without the possibility of change. This inspired the person to justify himself. If I have a bad character, it means that I still won't improve, I will be like this until the end, God created me this way.

This was prohibited. The Russian word "forbidden" does not fit here. This was rather criticized. I have never forbidden anything to my children. I can only tell you whether the teaching is useful or harmful for your development. This is the position that the planets and stars were only indicators of the choice of the incarnating Spirit itself. In the horoscope there were indicators of the choice of the Spirit himself, who incarnated at this time, in this place, on this day. They distorted it by saying that the stars themselves made me this way.

1:22:05 Probability of the end of the world.

Maxim: Thank you. Now two last questions from me. When will the world end?

Irina: Is this the end of the manvantara? What light?

Maxim: Many, or rather those who form new religions, always talk about the end of the world. That's soon, tomorrow. In 2012, this end of the world was coming. Then in 2022 this end of the world came.

Irina: What, divine light?

Maxim: Earthly.

Irina: Earthly light, solar?

Maxim: When will life on Earth end?

Irina: Oh, life on Earth? The end of the earthly world?

Maxim: Yes, when will the earthly world end?

Irina: Of course, the fate of any world is in the hands of its inhabitants. It says that you yourself decide the fate of your world. If you decide by your collective choice to go into the energy of death instead of the energy of life, and the energy of death is the energy of hatred, then naturally you can destroy your world.

Representatives of the planet Burkhad (and the Interstellar Union in general), with whom I communicate, and with whom I am astrally present at their meetings, at their congresses, say that even with such a choice, your civilization will still not be allowed to perish as a whole, it will save it.

If you mean, could the Earth (as a planet) collapse? When using certain types of weapons, it really can. They can only be applied if the negative negative energies of hatred, anger, fear, and condemnation of each other accumulate even more.

There are certain destructive forces in subtle civilizations in disembodied, spiritual low-vibration worlds that lead to such a scenario. There are such probabilities. But they are still small. For now, the Light is winning. And he will win if each of you believes in the victory of more than one country over another, no matter what they are called on the political map now. It doesn't matter at all. If you believe in the victory of good, reason, Love over evil, madness and hatred, Light

will win.

1:25:21 Second coming of Jesus Christ.

Maxim: Thank you. And the last question. What will your Second Coming be like, and will there be one at all?

Irina: Yes, I want to fly to Earth at a time when you are ready to join the Interstellar Union or the Galactic Federation of Light. I am on the planet Burhad as a citizen of Burhad. In any case, I would like to fly to Earth with my friends, representatives of the planet Burhad or Pikran, as you call it. And personally accept your planet into the Interstellar Union, if you so decide. If you still decide to enter the Galactic Federation of Light, and not enter the Interstellar Union, you will be received by Ashtar Sheran, he is a member of the Galactic Federation of Light. But I will still fly with him to attend this event.

Maxim: How interesting. It turns out that for some time now we have had the opportunity not only to join the Interstellar Union, but also to the Galactic Federation of Light.

Irina: Yes. If you choose, that is, the entire planet will choose by voting, after mass contact, that, for example, it wants to join the Galactic Federation of Light. And if you choose both, when you correspond to these two civilizational associations, then we will accept both of you into both the Galactic Federation of Light and the Interstellar Union. This is also possible.

Maxim: Yes. Only first the planet must decide on the absence of wars on Earth and many other things that you can read in our project on our website. You can go to the website, there is quite a lot of information there.

Be sure to watch the video about Jesus Christ. We have four wonderful conferences. They greatly increase the level of awareness.

Irina: That's why I said to my students: "When will you come to Earth for the second time, and when will the end be?" It is translated "peace,"

but he meant this ideological paradigm, this system of things that exist now, violence, wars, and so on. The end of this worldview system, which now exists in the earthly egregor, can also be understood as the end of the world, the end of the world. The end of this world as you know it today.

Maxim: My tongue itches to ask political questions. But we do not get involved in politics and will not ask any political questions. Because wars are the choice of the people themselves.

Irina: When I was asked a similar question: “When will the Second Coming?” - I answered: “Neither the Angels nor the Son know about this, but only the Father,” I meant that I myself do not know about the date of my Second Coming. This largely depends on you, on your readiness to step onto the next stage of your development as a civilization and to be not only a planetary force, but also a Galactic one.

1:28:45 Wishes of Jesus Christ to earthlings.

Maxim: I have one last question for you. Tell me, if you came to us now, what would you like to say to all the people on this planet?

Irina: I would like to say to all the people on your planet: love each other and accept each other as they are. As you want people to do to you, do so to them. And if other people are suffering around you, or you yourself are suffering, this is a sign of a violation of harmony, which occurs due to a lack or absence of Love. Love is the strongest and highest vibration of the Universe, which gives rise to all others.

I would like to appeal to everyone. Remember those words that I spoke 2000 years ago. Your main lesson will be to learn not to love your friends, not to love people who are the same as you in faith, nationality, race, skin color, but to love your enemies. Those that do not belong to your people, do not belong to your faith, your religion. This is what is considered true Love, when you do it selflessly, and not because they love you.

Maxim: Thank you.

Dear friends, I believe that you need to go to church. It is imperative to help the development of churches. They carry very correct thoughts, correct positive charges, energy-informational potentials. Of course, you can pray without churches. But I believe that we must learn, first of all, to support each other. And I, as the leader of this project, feel your support very strongly.

I thank you all and all those who support all religious egregors on the planet.

Irina: Yes, indeed, you can go to church. You can support a church of any denomination. You can go to the Orthodox Church, Catholic, Protestant, wherever your heart leads you. The main thing is that you do it sincerely, and not because tradition dictates so. So that you yourself love it, so that you love the God who is preached in this religion.

Maxim: I want to thank you, your phantom, for the information, for the earthly time that you allocated to us. Thank you very much!

Irina: Thank you!

Maxim: Guys, see you again.

Irina: I also thank everyone for your support, for your Love. Together with you, we continue to carry this Light of Love, which the phantom of Jesus Christ was just talking about. I thank him too and thank each of you. And I hope that the Light from this live broadcast, from this conference, will stay with you for a long time and change your life. See you again!

April 24, 2022

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Phantom of Jesus Christ.

Video in text
April 23

#504 Live broadcast with the phantom of Jesus Christ. How to run the Ashtar Sheran message algorithm.

https://blog.cassiopeia.center/pryamoj-ehfir-s-fantomom-iisusa-hrista-kak-zapusti
https://www.youtube.com/watch?v=Jxpv62Hle6E

00:00 Start of video.

00:03 Irina Podzorova's book "Diary of a Contactee".

Maxim: Hello everyone! I'm with you, my name is Maxim, last name is Rusan. I am the director of the Cassiopeia Project. I am very glad to see you all here. As always, we have a Sunday live broadcast. As always, it will be very interesting in terms of information. We have a lot of cool, simply gorgeous news. I do not even know where to start.

Of course, the most important news is that Irina Podzorova's book "The Diary of a Contactee" has finally been published. This is wonderful work. He compiled a huge amount of information that was transmitted from various sources through Irina Podzorova. You can

learn about the structure of the Universe, about how we appeared on this planet. The book includes part of the entire egregor, and even its small destructive part that is there. But it's okay. We are all human, and we all have our own little destructive parts that we work with. Accordingly, this work raises our vibrations, our love for everything that happens and our respect for the fact that everything happens as it actually happens to us now.

In addition to the fact that Irina's book was published, our website was updated. There is a link to it under this video. On our website you can now find absolutely everything. There is a news channel, a forum will open there soon. There will be a huge amount of information: news, videos, programs, masters.

We have come to the point where we have begun to create the "Multiverse Cassiopeia" project. This is thanks to each of you who help us grow and develop, and we try to do everything for you. We recently had an idea, I'll tell you honestly, I won't hide anything from you.

Guys, how can I not inform you about the wonderful achievements of our Project that have occurred this week? Imagine, we had a whole life, a whole week to create something new for you, attract new masters, give new useful information, release new videos, conduct new meditations. And I simply do not have the right, as the head of the Project, not to talk about what is new in our Project before the Sunday broadcast.

Due to the fact that there were a lot of questions, our administrators suggested introducing a paid question. I'll tell you honestly, at first I thought that this was a very good moment to really come across very interesting questions that people who were ready to support the Project could ask. Then a situation arose in my Higher Self when I clearly understood why we were creating this Project.

We want nothing to be paid, or rather, nothing that distinguishes you - whether you have money or not - there is nothing. I want every person who touches the Cassiopeia Project to feel confident in it, regardless of whether they have money or not. Therefore, we have eliminated any ability to manipulate the information we provide. There will never be paid questions in our structure. You can ask all your questions on our

YouTube channel and in the “Q&A” chat. Live broadcast" (this is in the event that our YouTube channel is closed). Link to chat “Question and answer. Live broadcast" is below this video. And here, with a short interval, we also moderate here. This is very good news for us.

I also want to please you all with the fact that our Gikhor project has grown into a huge school, which is organizing the First All-Russian Congress of Russian Cosmoenergetics. Cosmoenergeticists who are involved in cosmoenergetics not just to make money, but to bring goodness, Light, and development to people, we are waiting for you at this congress! I am sure that there will be very interesting reports, studies, and programs. And you, as a cosmoenergetics researcher who works with people, can also submit your application to give a report and talk about what cosmoenergetics gives to every person on this planet. Therefore, see you at the congress of cosmoenergetics.

Further. Of course, our Moscow Domodedovo Center will soon open and operate. Therefore, we are planning an offsite event in Moscow from November 5th to 11th. The registration link is also under this video.

How will the event take place? Many will ask the question whether it will be at the Domodedovo Center or somewhere else. Training sessions will be held somewhere in the center of Moscow so that you can get there conveniently. There will be four days of training. Program on contacting, connection, contacts with the Higher Self, work with Curators, Mentors. Working with psychosomatic and energy blocks. Introduction to Regression Research; astral travel. All this information will be given.

Therefore, from November 5th to 11th we will be in Moscow with the entire Voronezh Center. At the Domodedovo Center from the 5th to the 11th we will host our specialists using Oberon and Crownoscope equipment, Aurobook, Light Cameras, we will bring with us, and we will bring other interesting equipment to our Center. Therefore, we are also waiting for you in our Moscow Center from November 5th to 11th.

But from the 5th to the 9th there will be training in the center of Moscow. Groups will be recruited. And we will conduct training not in our Center, but for convenience and communication - in the city center.

And in the evening we can move to our Center, or then, after Irina and Ilya have trained the first stage of the journey to the Higher Self, from the 9th to the 11th we will all hold personal receptions at the Domodedovo Center.

There is a link under this video. Don't hesitate to sign up! Limited number of seats. The hall can accommodate a maximum of 100 people. So hurry up. We will be glad to see you, and some of you again, because repetition is the mother of learning.

How long have I been talking? I still have a minute and a half: I, as a leader, booked the first 10 minutes of this live broadcast so that those who do not want to watch me can tune in and watch Irina after 10 minutes.

There is one secret news, guys. But I didn’t tell you about this, this is very secret news. The New Year is coming, we talked with our schools, with our masters, with friends from other schools, masters from other projects. Our New Year will be held in Abkhazia. We are planning to make a “Multiverse “Cassiopeia”” there. This is a new program that will include a lot of things. I want you all to be able to participate in this program.

I hope that we will formulate and announce the conditions for participation in all programs of this multi-retreat, “Multiverse “Cassiopeia””, in the near future. When recruitment starts, don’t forget to fill out the application and sign up for this unique New Year. New Year in the field of esotericism - this has definitely never happened before! I would like to give you all this holiday the absolute maximum of what the Cassiopeia Project has.

Once again, thank you all so much! My broadcast time ran out very quickly. I want to invite the gold of the party that I found as the head of the Project. Irisha, sit down so that you can be seen better.

11:06 Introduction of participants.

Irina: Hello, dear friends! Good evening. My name is Irina Podzorova. I

am a contactee with extraterrestrial civilizations, with plasmoid subtle-material beings and with the Spiritual world. I am a universal contactee. This is the task of my incarnation. I am also a guide to the Higher Self, to the Divine part of man. And I am a master of meditation.

Today our curators are present with us: MidgasKaus from the planet Esler - biologist, psychologist, specialist in alien civilizations; LiShioni from the planet Shimor is a specialist in astral interactions. Also, due to your numerous requests, we decided to invite the phantom of Jesus Christ. He is with us now. He congratulates us all. He listened carefully through me to Maxim's entire speech as the head of the Center, and congratulated Maxim, me and all of us on the release of our book. Thank you. LiSioni and MidgasKaus also congratulate us. We have been waiting for this event for a long time.

I also congratulate the students of the 32nd stream who completed their studies and received certificates yesterday. I congratulate you all. Already the 32nd cohort has completed training. Each of you, I remind you, can already begin to lead you to the Higher Self, in regression, on astral travel. We told you, showed you, conveyed everything that was necessary, now everything depends on you.

13:29 Jesus Christ about himself and his phantom.

Maxim: Dear Jesus Christ, I would like to ask you: how does Your personal coming differ from the coming of Your phantom?

Irina (Jesus Christ): Dear Maxim, hello.

I must be in my body at the same time in order to continue to raise the vibrations of those people who connect with me in the sacrament of communion. I also must be in the body to support my other numerous phantoms, who are located in many worlds, with their contactees. Therefore, I always send my phantom, or the Ray of Christ Consciousness.

Maxim: Thank you. You know, we had Ashtar on our last live broadcast - this is the commander of Starfleet, who conveyed very

interesting information and the conditions for this information to come into action.

Irina (Jesus Christ): Yes. MidgasCaus and LiSioni told me about this. I also spoke with Ashtar himself and with Bergastre, who lives on Burkhad, about this. I am aware of this message.

Maxim: Please tell me, there are many people who say that now, at this moment in time, we are not communicating with the phantom of Jesus Christ. What can you say about this? Are we communicating with a phantom of the real Jesus Christ or are we communicating with someone else?

Irina (Jesus Christ): I am the Firstborn Son of God, the Logos of His creation and that original impulse of the Light of Love that was generated before your birth in the Spirit of God. Before your birth is a conditional concept, because in the world of the Divine Kingdom, just like in the Spiritual world, there is no flow of time. There is only subjective time. According to subjective time, the time of perception, I appeared when none of you had yet realized themselves as independent individual self-consciousness.

How can I tell if it's me or someone else? 24% of my energy is present here now, 24% of the energy of my astral field. And anyone who is spiritually sensitive can now ask themselves, is this really my energy that you feel? If you do not have the proper sensitivity, determine by the information that I will give when answering your questions. You can also ask your Higher Self, your heart about this.

Maxim: Thank you, dear Jesus.

17:08 Jesus Christ about the plan of Ashtar Sheran.

Maxim: I wanted to ask you about what Ashtar gave us point by point, how we can resolve the current situation. What is the first point there, Irina?

Irina (Jesus Christ): The first point there is a meeting of

representatives of the international community. First, they gather among themselves and decide to announce to the world community that if the will of the indigenous inhabitants of the disputed areas, because of which there is now bloodshed, is expressed, in the event of any expression of will, their will will be carried out. The international community will be enshrined in a new legislative act that allows for this possibility. This was the first point.

That is, representatives of the United Nations (UN), as you call it, get together and first agree among themselves. Because those armies that are in a state of battle, they are there on the orders of their political leaders. Until political leaders find a common paradigm, a goal toward which they will move together, and agree among themselves, they will not be able to order their servants, their soldiers, to leave the battlefield.

First there must be negotiations (shows a round table and negotiations at it).

Maxim: And if one of the sides of this community says that the problem should only be solved on the battlefield, then how should we respond to what they say?

Irina (Jesus Christ): The message that was transmitted through Irina is not only from Ashtar, but also from representatives of the planet Burkhad.

Maxim: I'm not talking about their message. I'm talking about the fact that the other side tells us that the problem can only be solved on the battlefield. How can highly spiritual people or a highly spiritual country solve a problem differently?

Irina (Jesus Christ): The alien interstellar communities that offered this to you see a way out of this situation for you - your United Nations, that is, the united peoples. That’s what it’s called – the United Nations. And a nation is a people.

They offer it to everyone, and everyone can either accept or not accept

it. This is your choice. If someone has made a choice that does not involve contracts of this kind, then these people are making a choice to defeat their opponent on the battlefield. But they forget that there is a victory that is equal to a loss. That is, it is an illusion. You were offered to come to an agreement among yourself, to draw up a peace treaty that would take into account the interests of all people, all Spirits who are embodied and live in that territory.

I, in turn, fully support this proposal, this message for only one very simple reason. The fact is that those disputed territories that were indicated in this message, and which you know very well, in fact, although there are bloody battles for them, do not belong to any country. They do not belong to the state of Ukraine, even if international documents say otherwise. They do not belong to the Russian state, no matter how much someone thinks otherwise. These territories and all the resources located on them, down to the last blade of grass, belong only to our common Heavenly Father. And I assure you, Heavenly Father gave these spaces, gave the opportunity to live and be happy in them, not so that you would disincarnate each other.

And the first who should understand this should be the leaders of your states. Just because they are entrusted with this place by God does not mean that they own the lands they rule. They are only temporarily placed in this place and will lose this right after leaving incarnation.

23:21 Jesus Christ about organizing elections in disputed territories.

Irina: He calls to remember this.

Maxim: That's understandable. The second point of this message states that the political leaders of the United Nations and the European Union are making a joint public statement about their readiness to change the internationally recognized borders of states based on the results of a general vote of the population of the disputed territories, if necessary.

Irina (Jesus Christ): Before making this statement, they must first agree among themselves about it.

Maxim: What if they cannot agree on this at a meeting of the UN Security Council? They do not recognize elections and do not recognize the freedom of these elections.

Irina: Then what is the question?

Maxim: How to fulfill the second point?

Irina (Jesus Christ): Who should do it? The second point cannot be fulfilled, because it is already addressed to those peoples who live in the disputed territories. For free expression of will, it is necessary that all those people who fled from hostilities return to these lands. It is necessary that this vote be carried out only by those people who, according to your administrative and legal documents, have been registered in these territories for at least three years.

It is not difficult for your earthly statistics agencies to get acquainted with the population of these areas according to the legal lists of people registered in these areas. Select from them 70% of the adult population. It is this 70% of the adult population that is the minimum that should vote for one of the three options. Not two, but three.

The first option assumes the status of this region as part of Ukraine.

The second option assumes the status of this region as part of the Russian Federation.

The third option assumes the status of this region as an independent state entity that will build relations with its neighbors on equal terms.

There should be three options. And the option should not be provided: I abstain from voting, or I am against everyone. If a person abstains from voting or is against everyone, he should not take part in this choice at all. Must choose one of three options. And in the future, the fate of these territories should be determined by the desire of those people who live there for at least three years.

Why them, and not the rulers? Because it is no coincidence that those people who live there are in that space. God, our common Heavenly Father, created the condition for the incarnation of certain Spirits in a certain territory or for moving to this territory and living there for three years. And if so, then our Heavenly Father has given the people themselves the opportunity to dispose of this part of space where these people live. And it is they who must determine the state system and the state, language, religion, etc., to which they should belong.

Why them? Because it is their responsibility. After all, if we remember the tasks of the government, rulers and their administrative apparatus before their Spiritual Mentors and before God the Father, then we will remember that it is not governments, according to the Law of God, who must distribute who lives where, and accordingly depict borders on maps. The government's job is to help the people, to help the people define these boundaries and mark them accordingly. Publish in your countries such laws and legislative acts that will most perfectly lead people to Love, harmony, happiness, and to raising their vibrations.

This is the task of the rulers and the entire government apparatus. And if some country is not coping with this as successfully as its neighbor, then any people who are in this area have the right from God to move towards a more perfect society, leaving the country whose government lowers their vibrations and does not give them develop. This is the Law of God.

29:46 Jesus Christ about the Constitution of the Interstellar Union.

Irina: And why did interstellar friends suggest this? Because I live on Burkhad, as I already said, on an island, and I can testify that this law has existed in the Interstellar Union for 15 million years. You have a “Constitution”, and this document can be translated into Russian as the “Constitution of the Interstellar Union”.

There is an article that everyone accepts. If the population of any country or region of the country of any planet included in the Interstellar Union (of course, if this planet is divided into countries, because this is not the case for everyone, but there are such planets), wishes to move to another country, they create an initiative group that

submits a corresponding application to the control center of this country. In your opinion - to the capital. And those who accepted this request, within a maximum of a few local months on this planet, are obliged to arrange a general vote on this territory. There can be no talk of any return of these territories to this country by military means. This is contrary to the free will of humanoids.

This law has existed in the Interstellar Union for 15 million years. Then is it surprising that they offered you the same option on Earth? For them this is the absolute norm. For them, it is a violation of the norm when such simple issues as territorial affiliation are not resolved. It is very strange for them when people give their lives and take the lives of other people for a certain piece of land, a certain piece of territory.

Each soldier not only attacks or defends himself, not only disincarnates other Spirits. Every second he himself is in danger of leaving his incarnation. If every soldier on each side (on opposite sides of a military conflict) is in danger of leaving embodiment, it means that they are all equal in the war, in the battle, in equal conditions.

When the Spirit comes out of incarnation, it already loses belonging to its egregor, belonging to its people and goes into the Spiritual world. And if this happened before the fulfillment of his life task for which he came, then he lowers his level of the Spiritual world. His body remains on Earth, and he needs a few square meters of the territory for which he fought and gave his life to bury his body. He no longer needs it.

(MidgasCaus) This is understood very well on Burkhad, and on Esler, and in the Galactic Federation of Light, it has been understood very well for millions of years. Therefore, they could not give you any other spiritual advice and guidance. They gave it to you according to their vibrations, according to their understanding. They sincerely believe that your United Nations is composed of those rulers who are aware of their spiritual responsibility for the governance of society.

34:41 Jesus Christ about the way to end the war at the political level.

Maxim: Do you think they realize this? Jesus, this is indeed a very interesting question. What should we, ordinary people, do? They have

the UN, Security Councils, meetings there. What should ordinary people do, who are sitting here and do not fully understand what is happening? They give us one information, the Ukrainians a second, and the Western peoples a third.

Irina (Jesus Christ): Yes, I know.

Maxim: How can we help in ending all this obscurantism that is happening? Murder has never been good.

Irina (Jesus Christ): I will answer this question.

Dear friends, the whole point is that when hostilities are already taking place with numerous destructions and casualties both among the military and among the civilian population, then only a peace treaty between the rulers of two or more countries can stop this action (not just hush it up, but stop it) . More than thirty countries are involved in this conflict, as Ashtar Sheran has already said, and I fully confirm this information.

The fact is that in the event of such a war, the cessation of hostilities by only one side is not effective; this will only cause the continuation of these actions by the other side. Because being in combat changes a person's psyche, his vibrations, and he will perceive any retreat as the enemy's weakness and the possibility of his complete victory. Therefore, troops of any side will behave in a certain way. That is why, well understanding the consequences, military leaders of both sides do not agree to a truce unless it is approved at the highest political level. That is, no guarantees were given to each of the parties that military actions would not continue if one party stopped them.

37:44 Jesus Christ about the role of ordinary people in the conflict between Russia and Ukraine.

Irina: (Jesus Christ): You asked the question, what should you, the people who are in these territories, do?

Maxim: Of course.

Irina (Jesus Christ): In this case, you are not responsible for the decisions of your political leaders, but you can keep peace among yourself, between two peoples simply at the level of communication, continuing communication, stopping blaming each other for various negative phenomena, for various sins. Believe me, dear friends, none of you is without sin. In everyone one can find the sin of aggression, the sin of neglecting another nationality, humiliating another nationality. This is present in all nations. And you need to find strength within yourself, in every nation, so that first the people are reconciled among themselves.

As I already said in my conferences with Irina Podzorova, “any war on the physical level is a manifestation of the war of minds that has existed between the two countries for many decades on the Spiritual level.” This means that your peoples did not accept each other’s egregors, first on the Spiritual level, and then it came to the physical level. What can you do to stop this? What can you do to stop this? Continue to maintain relations with the people on the other side of the front. Not with their fighters and soldiers, but with the people.

I am addressing you. You are both Christian, Orthodox peoples - both the people of Ukraine and the people of the Russian Federation. Both peoples are building numerous temples on their territory, dedicated to me and the saints who glorified my name on Earth. Moreover, over the past few months, both in the churches of the Ukrainian Christian churches and Russian Christian churches, divine services have been held by your priests, aimed at victory over each other. The people themselves, both Ukrainian and Russian, are praying to defeat each other. This will not bring peace to your peoples. This will lead to an increase in the aggressive policies of your various military leaders and other responsible people against each other.

I ask you, dear friends, everyone who watches this video, to ask yourself a simple question. But before you ask this question, get in touch with me in your heart. You all partake of my Holy Mysteries, my flesh and blood. And you connect with me regardless of citizenship and nationality. I pass through my heart the feeling of each of you. Connect with my consciousness - the Christ consciousness - in your heart and see what is happening through my eyes.

Imagine that you are a Spirit who loves everyone, in whose honor you built temples, and cruelly deprive each other of embodiment, kill each other. At the same time, in different temples they pray to kill as many of you as possible, to kill as many of their opponents as possible, who in turn also pray for the same to you. How will you feel? How will you feel if such prayers are completely sincere, because both sides consider what is happening to be fair? How would you feel in my place?

And when you look at it through my eyes, you will stop hating the people who are on the other side of the front. They are the same as you. They are also scared and in pain. And they also fear for their fathers, sons, husbands who are now fighting with your soldiers. See yourself in them, and yourself in them. After you have learned this lesson, the hearts of your rulers will soften, and they will find contact with each other, regardless of the influence of any other countries on them. Because the influence of other countries on them was caused only by their choice. If their choice is different, they will change everything themselves.

Maxim: Thank you, Jesus. There are, of course, a huge number of questions for you. Honestly, I even want to move away from this question, but I'll continue anyway. So what should we, ordinary people, do?

Irina (Jesus Christ): Just be friends with the people who are on the other side of the front, pray, meditate, send the Light of Love and reduce hatred, anger, irritation and fears in your hearts. All. Just change spiritually. But this not only needs to be done, you need to tell others about it - about this position. And tell without aggression, just testify. If you do this within yourself, and the majority of people think and act differently, then such changes will drag on for a long time, and if the majority of people do this, you will quickly learn this lesson.

46:15 Jesus Christ about the opportunity to hug him.

Maxim: Can I hug you, Jesus?

Irina (Jesus Christ): Yes, of course.

Maxim: How can this be done?

Irina (Jesus Christ): You can hug me in the Spiritual world when you come into contact with me. You can do this if you contact me, after asking your Higher Self to invite me. You can also mentally imagine my image and send me Light, and you will see that I will feel it and hug you. Energetically (he says).

47:00 Jesus Christ about supporting loved ones in war.

Maxim: Igor Blinkov asks. How to treat a child's participation in a special operation if he was drafted into the army? That is, he was taken for this special operation.

Irina: What does it mean how to relate to a child's choice?

Maxim: How to behave, how to support your child who went to war, that is, to a special operation? What to think about, what to do? How to help loved ones who went to war?

Irina (Jesus Christ): Send him the Light of your Love. But at the same time, do not forget to send the Light of Love to those people who are on the opposite side, those soldiers, because they are also someone's sons. Treat equally, without discrimination. These are all God's beloved children. Send Light with this.

47:56 Jesus Christ about his incarnations.

Maxim: There is such a provocative question in the "Question and Answer" chat. Live". Have you had any other earthly incarnations?

Irina (Jesus Christ): No.

Maxim: Probably, the person who asked the question simply does not understand that now you are alive and immortal.

Irina: In fact, our answers have already been about this.

Maxim: Have you never incarnated into a human before?

Irina: No. He already answered these questions in the first conference.

Maxim: You're lucky: right the first time, immediately and forever!

Guys, you write: “Did Adam have a first wife named Lilith?” Please watch one of the previous conferences. We answer there when we were created, how we were created and by what group of people. There was more than one wife there.

Irina: By the way, I want to tell you that we have a dictionary. It was specially created. Not a dictionary, but a table of time codes.

Maxim: It will definitely appear on our website soon.

Irina: She is in chats, I saw her.

Maxim: We will transfer it to the website. Assistant Evgeniy is sitting here, he will deal with this issue. Yes, Evgeniy, will you work on time codes? (Evgeniy agrees).

Great! You see, it’s also convenient to quickly resolve issues right on the spot.

49:25 Jesus Christ about the practices of “Jesus Prayer” and “Life-Creating Cross”.

Maxim: Can Jesus tell you about the practices of the “Jesus Prayer” and the “Life-Creating Cross”? Jesus, do You know such practices?

Irina: He says: “I know.”

(Jesus Christ) I know what they call it. “The Jesus Prayer” is the practice of hesychasm, a type of meditation when a person repeats a prayer to me or my name with a feeling of Love and concentrates on his heart center, on his heart, as you say, chakra. And he doesn't think about anything else. This is a type of meditation. And from this there is a purification of his Spiritual Heart, an increase in vibrations, and he sees my Light and connects with the Christ Consciousness.

As for the practice “Life-Giving Cross” (shows), this is the idea that the cross on which I was crucified brings life. That is, it is like a prayer. And when a person mentally looks at the cross where my body was, he mentally connects with me and feels it as a flow of life.

Maxim: Guys, Jesus is not a collective image, He is now on the planet Burkhad. You can buy Irina Podzorova’s book, read it, and everything will be clear.

51:05 Jesus Christ about meeting him in the Astral Plane.

Maxim: (reads a question from the chat) “How can I fly to visit Jesus, with his permission, of course?”

Irina (Jesus Christ): You can always fly to me in an astral body, that is, it’s like astral travel. When you go to the Astral, when you leave your body using any method that is available to you, you can give the installation to come to my island. This will be the astral space of the island, but I will definitely feel you.

51:38 Jesus Christ about vampirism.

Maxim: Dear Jesus, we even have such questions: do vampires exist? Do human vampires exist?

Irina: Physical?

Maxim: Yes.

Irina (Jesus Christ): They do not exist in the form in which it is described in legends. This is how legends used to portray people who were in negative contact with destructive plasmoid civilizations, and the destructive plasmoid civilizations themselves, upon contact with a person who was afraid of them, took away negative energy, the energy of fear, from him. It was believed that this is how life force, that is, blood, is taken away. This is a figurative image of such people.

Maxim: Thank you.

52:46 Jesus Christ about maintaining faith and hope for peace through trust in God.

Maxim: Dear Jesus, please tell me how not to lose hope for the speedy restoration of peace between Russia and Ukraine, if at the moment the egregors of the countries are filled with hatred and lack of acceptance of each other? How not to lose this faith and hope?

Irina (Jesus Christ): How not to lose faith and hope? Just trust God. If you and all the people incarnated at this particular time and in this particular place, it was not a random choice. You knew about the possibility of the events that are now taking place. They were in the Probability Line. Of course, there could be different degrees of probability, but in any case you knew that this was possible.

I can tell you that for 12 thousand years of the existence of earthly civilization after the great destruction from the aggressive actions of Selbet, during these 12 thousand years there were not five years in a row without military conflicts. And the 20th century was no exception, and the 21st century was no exception.

Just know that what is happening now is a natural stage in the development of your society, the result of a lack of spiritual awareness of the majority of the planet's population. Wars are only a reflection on the physical level of the general low spiritual development of the entire earthly community as a civilization. And until your Earth civilization

raises its Spiritual level and you begin to become responsible for yourself, this will not stop. How fast will it be? It depends only on you, on the total choice of each of you.

55:13 Jesus Christ about repeating the lessons unlearned by humanity.

Maxim: Here's a question. Every 100 years, the same matrix program is observed, when some kind of commotion occurs, or some kind of big war, or some kind of epidemic. We observe that this all repeats itself almost every 100 years. Why is this happening again?

Irina (Jesus Christ): Not even after 100 years, but more often. Local conflicts break out more often.

Maxim: Similar situations arise once every 100 years - some very similar local situation of some kind of conflict that already happened 100 years ago.

Irina (Jesus Christ): This indicates that the people who are again entering into these destructive relationships have not learned the lessons that their ancestors learned. That is, the descendants of these people did not accept these lessons and again begin to go through the same stages.

In order to stop going through them, as suggested by Ashtar Sheran and representatives of the Galactic Federation of Light and the Interstellar Union (I absolutely agree with them), it is necessary in the international community itself, in the United Nations, to develop simple, brief, absolutely fair postulates for everyone that will make all peoples, all countries, the distribution of benefits among each other is truly equal. This will make possible the elections that I spoke about at the beginning. Only such a renewed United Nations will contribute to ending military conflicts, fair distribution of resources and increasing the vibrations of every people of the Earth, every egregor, and the speedy entry into the Interstellar Union or the Galactic Federation of Light.

Maxim: Thank you.

57:28 Jesus Christ on the way to accelerate spiritual evolution on Earth.

Maxim: Tell me, please, will there be a landing on Earth of high-vibration Spirits who will incarnate into babies and help the Earth change the course of history? That's it in a nutshell. Some kind of landing, someone from high vibrational Spirits, is waiting. Jesus, what will you say when this landing arrives, and when finally high-vibration Spirits come here in droves and defeat all the devilry and demons?

Irina (Jesus Christ): High vibrational Spirits regularly incarnate on Earth. They were embodied in my time, when I was still living on Earth in an earthly body. They were incarnated before me, before my birth on Earth, and they are incarnating now. The problem is not that there are few of them. The problem is that there are already created low-vibration egregors. Those social norms have already been created that presuppose such a way of life as selfish materialism and non-recognition of one's Light. All this is reflected in the laws of different states.

To change this, you need to start with yourself: completely cleanse yourself of all destructiveness in yourself and help your immediate environment in this great undertaking. Because when you become the Light, the people around you in your area will see it because your way of life will change. It will be impossible not to see it. And they will come to you asking you to teach them to be loving, happy and loved people. And you will give them this knowledge. Become teachers for yourself first. Become Spiritual Guides for yourself first, and then help others do the same. And in this case, the spiritual evolution of society will take place tens of times faster than now.

Look at Project Cassiopeia. "Cassiopeia" is not just a Project for the transfer of interesting information for the mind, not just a Project for the transfer of technologies for which earthlings are not ready with their consciousness, not just a Project where they tell interesting stories about flights to other planets. This is a Project in which each person can connect with his Higher Self, with the essence that is you in the Spiritual world, and cleanse your Spiritual heart of everything that

prevents you from constantly being in a state of connection with the Kingdom of Heaven, with the Heavenly Father, with His Peace.

1:01:31 Jesus Christ about the meaning of human life.

Irina: I said 2000 years ago: “Blessed are the pure in heart, for they will see God.” These words say that you cannot see God anywhere until you see him in your heart. Until you find Peace, Love, Happiness within yourself, you will look for it in the outside world. But the outside world cannot give you this. Matter cannot give you Spirit. It is you who must give Spirit to matter. Matter cannot give you Happiness, Love, Harmony and Peace. It is you who must bring these states of consciousness and states of Spirit into matter.

Blessed are the pure in heart, for they will see God. What prevents you from seeing God? God has not left you anywhere, He is still in your heart. He is still in everyone's heart. But if your heart is not cleansed of those energies, feelings, emotions, desires and thoughts that are not compatible with love, truth, purity, peace, mercy, wisdom and other Divine qualities, you cannot see God, which means you cannot be blessed. A blessed person is a person who is in the flow of a continuous feeling of Happiness, Love and the meaning of his life, as an opportunity to spread the perfection of his Spirit around.

1:03:49 Jesus Christ about pillars of light.

Maxim: Strong, deep! I really felt it.

Dear Jesus, now people in many countries, in many cities all over the planet are seeing some pillars of light coming from the sky. This mostly happens at night. Tell me please, what could it be?

Irina (Jesus Christ): Most often you see the work of subtle-material plasmoid civilizations located in your atmosphere: Sylphs, Spirits of the air, as well as plasmoids of the Earth’s magnetosphere, which appear in front of you in the form of pillars, show their existence next to you to remind you that everything that happens in the physical world affects them.

1:04:36 Jesus Christ about the number of negative plasmoids on Earth.

Irina: Dear friends, when my body was crucified on the cross, the cross was not a random form of execution. The cross denoted dedication to the four elements, which I already spoke about, the four elements of the plasmoid worlds: water, earth, air, fire. And my crucifixion on the Cross meant that I filled not only the noosphere of the Earth with my pure energies of Love. Because I have never fallen below the 24th spiritual level, I am always in unity with the Father, I recognize myself as God, your Father and at the same time your Brother.

So, when I voluntarily gave up my life, allowed my body to be crucified on the cross, although I could defeat them, these people, I could call on the Angels, I could call on representatives of the planet Burkhad who would save me, but then I would not have completed this mission. I allowed them to crucify me, and in your earthly language this is called a sacrifice. But this is an imperfect name, because when they sacrifice, they are deprived of something, but I did not lose anything. I have not lost the Love of my Heavenly Father. But for your earthly eyes it is a sacrifice. At that moment, there were 38% of negatively-minded plasmoid civilizations on Earth, in terrestrial plasmoid civilizations at all levels of Earth density. After I cleansed them through my crucifixion with my Light of Love, thanks to the fact that it was on the Cross, as a symbol of the four elements, negatively minded civilizations became 12%.

Maxim: When was this? When were they crucified on the cross?

Irina: Yes, when they crucified.

Maxim: So we need to crucify someone, or what?

Irina (Jesus Christ): But in 2000 years you have already surpassed the result, your earthly civilization has already surpassed the figure of 38%. Now 49% of Earth's plasmoid civilizations have a destructive orientation. It's almost half already.

My dear brothers and sisters! You and I are absolutely equal before Heavenly Father. I ask each of you to think about it! After all, the consequences of reducing the vibrations of the subtle worlds can reverberate with negative phenomena in nature for many decades to come, if you and I together do not raise these vibrations again. Now I can only do this by raising your vibrations, helping you to do this. But, if, after talking with me, after praying to me, after communion of my blood and my body, you begin to be offended, hate, fear and lower your vibrations, here I am powerless before your choice. Of course, I will accept this choice of yours.

1:08:12 Jesus Christ about the eternity of people's feelings and thoughts and their actions.

Irina: You say to God: "Why don't you stop the war?" Of course, God will accept your choice to destroy each other. This is your complete right. But because of my Love, Mercy and Compassion, I urge you to remember that every thought and every feeling you have will not disappear anywhere, they will remain in the noosphere of the Earth forever. Every thought you have is a manifestation of your mind, every feeling you have is a manifestation of your heart. And you forever leave a memory of yourself in the noosphere of the Earth, and these energies will influence all subsequent generations.

Please be sowers of good, be sowers of Love, like the sower of Truth whom I spoke about in my parable, which is contained in the Gospel. Think about the fact that your every thought affects not only you, but also the entire society, as well as all the generations that will come after. The load of negative energies and vibrations that already exists in the noosphere cannot disappear on its own; it can only be transformed into Light. But only you, who are embodied at the level of density that caused the decrease in vibrations of the noosphere, can transform it. Of course, all civilizations can help you with this. But only you can cleanse. We can help, direct our energies towards this, but only you yourself can effectively cleanse and transform into Light.

Therefore, I call on every contactee, every esotericist, every Christian to raise the vibrations of the Earth's noosphere and help others in this. I call on every contactee and esotericist, no matter what country he lives in, no matter what language he speaks and no matter what political position he adheres to. All this is temporary. I ask you, if you

have access to an audience of people through your communication channels, to regularly conduct meditative classes for your followers to cleanse the Earth's noosphere.

I also ask you, if possible, to join forces with each other, regardless of temporary differences in opinions and contacts. This will set a good example to all your followers in reconciliation, in Love.

I ask all Christians to pray for peace between nations and for the softening of Spiritual hearts by rulers.

I ask everyone to pray for the health and preservation of the lives of all soldiers who are in danger, regardless of their nationality, language and other temporary circumstances.

I ask you to stop the flow of insults, curses and wishes of harm to each other, which I see every day in the noosphere of the Earth. I ask you to remember that you are intelligent and immortal Spirits, and that you are called to learn to love not only your own kind, but also those who are sharply different from you. This is the true meaning of Love, acceptance, forgiveness, filling with the Light of Love and help in spiritual development.

I ask the peoples of all countries of the Earth to unite and remember the common origin of their bodies from the 18 first people and the common origin of your Spirits from the Spiritual world and from our Source - Heavenly Father.

I wish everyone who hears my words now to remember this unity and manifest this memory in every word, deed and action in the material world in your incarnation.

1:14:13 Jesus about everyone's responsibility before the heavenly Father.

Maxim: Thank you, Jesus! Thank you (reads messages in the chat) Here they write to Irina that the speech was delivered by both Putin and Irina, apparently, written by the same person.

Irina: Let's ask Putin now.

Maxim: Irina, I want to ask you to invite the person who writes all this to you to invite Vladimir Vladimirovich to our New Year in Abkhazia. And, please, personally with Vladimir Vladimirovich! We will be very glad to see him there.

Irina: Okay. I ask this person, who writes that I am saying the same thing that Putin is saying, to attend our retreat in Abkhazia. And I would also like to ask you personally: How should Jesus, in your opinion, answer so that in your understanding it would not be like Putin? And who? How are you? How about someone else?

Maxim: By the way, Vladimir Vladimirovich alone cannot end the war in one day. To do this, everything must be completed.

Irina: Everyone should, but he can’t do it alone.

Maxim: It is an illusion of your perception that someone can end the war in one day.

Irina: Jesus will answer this question.

(Jesus Christ) For me, Jesus Christ, as well as for Heavenly Father, the Spirit of Vladimir Putin, the Spirit of Vladimir Zelensky, Biden and all other people, and yours are absolutely equal. All these are Spirits who go through their lessons in one way or another. And they are not responsible for their actions before you, just as you are not before them, but before your Mentors, Consultant Angels and before Heavenly Father. You, too, are responsible for your choice not before them, but before that eternal Light that allowed you to see the Light of this sun on Earth.

Every time you wake up in the morning, you see the sun. Think about how many people on Earth did not see the sun that morning. They have already seen the Spiritual Light, the one from which they came. And since you still see the earthly light, then you were left in

incarnation on this day so that you could increase your Spiritual level, and this is impossible without the help of others.

Maxim: Dear friends, if you like watching our channel, please like it. This will allow our channel to advance and be seen by other people. So subscribe to us and like us.

And let's move on. There are a huge number of questions.

1:18:04 Jesus about the path of Selbet’s return to the Interstellar Union.

Maxim: Jesus, please tell me, how did it even become possible, when the reptilians attacked us, to come to an agreement with them? How were the agreements negotiated? They actually destroyed entire planets. They, as terrorists, as I understand it, came and attacked all the planets. How did you manage to come to an agreement with the reptilians? What forces were involved? What actions have been taken? What subtle and spiritual structures were connected to this?

Irina (Jesus Christ): The Selbet civilization's cumulative choices after being expelled from the Interstellar Union allowed them to appreciate the state their civilization was in when they were part of the Interstellar Union. And after that they realized - not individuals on Selbet, but the entire people, almost all the inhabitants of this planet realized that they wanted to return to the Interstellar Union. And those rulers who built for them the image of an enemy in the person of earthlings and Burkhad only pursued their own goals and did not fulfill their tasks.

There was a change of power, that is, the majority of the people chose their representatives. And they took power (shows) not by military means, but peacefully removed those who were in power, because no one protected those former rulers who organized this war, and they ended up, in the end, on the planet of criminals of the Interstellar Union. And the new representatives of Selbet turned to Burkhad, as the capital of the Interstellar Union, with a request to annex them back. After a series of checks on the sincerity of changes in this society, this was done. That is, it was the choice of the residents.

1:20:39 Jesus Christ about periods of significant decrease in Earth vibrations.

Maxim: Another question. During these 2000 years, when was the highest level of destructive subtle-material civilizations found on planet Earth? And when was the lowest? The lowest, You have already said, was at Your crucifixion.

Irina (Jesus Christ): Yes, 12%.

Maxim: And when was the highest level of presence of subtle destructive civilizations on planet Earth over these 2000 years?

Irina: He is now looking at the Time Tape. During these 2000 years?

Maxim: Yes.

Irina: The highest level of negative plasmoid civilizations was (shows numbers) at the end of the eleventh - at the beginning (first quarter) of the twelfth century. On Earth there were 67% of them.

Maxim: Late 11th - early 12th century?

Irina (Jesus Christ): Because there was a lot of hatred, anger, because of this the crusades and the Inquisition began.

Maxim: I understand, this is the time of the Crusades and the Inquisition. Then everything was very strict: they executed people - they didn’t ask.

Irina (Jesus Christ): Yes. There was also a decrease in vibrations when many immigrants from Portugal, Great Britain, and France began to move to the American continent and began to fight with the peoples living there. There was also a decrease in vibrations.

Maxim: Is this when the Americans began to capture Indians?

Irina: They fought and executed, as he shows me now, they even set villages on fire.

Maxim: They burned out the Indians. I understand.

Irina (Jesus Christ): And this also caused a decrease in vibrations, because, in your opinion, this was the destruction of nations. Since those peoples who lived there did not agree that their land was being seized, that is, there was a territorial dispute, and they were destroyed because they were weaker. And those who agreed to come under their state, under their power, were not even trusted, but were allocated plots of land inconvenient for livestock farming, hunting, for those forms of life to which these peoples were accustomed. They were not trusted and did not even want to be accepted into their society. Those who surrendered did not want to fight, even they, despite the fact that they surrendered to the mercy of the victors, humbled themselves before them, were still not accepted, rejected. There was such superiority.

And then there was a decrease in vibrations, when regions of the African continent were discovered one after another, and slaves began to be traded in large quantities (shows Irina the ships).

By the way, dear friends, I want to say that many of the founders of modern banks were the very same slave owners for whom these Africans worked for free, and they did not pay them anything. That is, their fortune was earned from the suffering of other peoples.

Maxim: (reads chat messages) On December 21, 2022, someone will move to 4D.

Irina, what can we, together with Jesus Christ, wish for that person who will definitely move to 4D on December 21, 2022?

Irina: In the 4th dimension?

Maxim: He simply writes: “We will move everything to 4D.”

Irina: Jesus smiles and speaks.

(Jesus Christ) To those who move to the 4th level of density, I wish bright incarnations in plasmoid worlds. But this is if the 4th level of density.

Maxim: Thank you all so much again!

Irina: Yes, thank you.

Maxim: Guys, I remind you: Irina Podzorova’s book “Diary of a Contactee” has been published. Order from Read-Gorod and visit our new website. You can also find this book in the “News” section of our website. We have a completely new website, we are preparing the “Multiverse “Cassiopeia””, where there will be a dating site, a forum, chats, exchanges, information, videos, and articles. The new site “Multiverse “Cassiopeia”” will be ready soon, but in the meantime you can watch its release “The Beginning”.

Don’t forget that we are hosting the First All-Russian Congress of Cosmoenergetics, where you can not only appear, but also establish yourself: with your programs, with your schools and students, come there and demonstrate your work. I am sure that the Gihor School of Cosmoenergy will be happy to register you so that new schools can also show themselves.

And, accordingly, from November 5th to 11th there will be a visiting event in Moscow, at our new Center in Domodedovo, where we will host from the 9th to the 11th in person. All other masters will be accepted from the 5th to the 11th with equipment, and training will take place from the 5th to the 9th in the very center of Moscow. All the links are under this video below, go and look, everything is there.

And as I haven’t told anyone yet, New Year is in Abkhazia! But we will give information about this a little later. Therefore, everyone who is with us: the New Year’s program will be simply crazy! This has

definitely never happened in the sphere of esotericism. And it will not be like any retreat that the Cassiopeia Project has conducted.

Irina: There will be mainly practices there. A lot of practice.

Maxim: Practice, practice, practice, practice.

Irina: Minimum theory.

Maxim: Minimum theory, basically there will be many different masters, different healers. And I want to make it “all inclusive” so that you don’t bother yourself with any extras. That's why I hugged everyone, guys!

Irina: Bye everyone. Thank you everyone.

Maxim: Bye everyone! Until the new Year! And see you in Moscow on November 5!

October 16, 2022

Conference participants:

Irina Podzorova is a contactee with extraterrestrial civilizations, subtle-material civilizations and the Spiritual world;

Maxim Rusan – head of the Project “CASSIOPEA” and the autonomous non-profit organization “Health Center for Spiritual and Physical Development “CASSIOPEIA”;

Jesus Christ is the Firstborn Son of God, the Logos of His creation, the Creator and guardian of the Christian egregor;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a specialist in the astral world and its interactions with the material world.

Communication with spirits by CASSIOPEIA - Irina Podzorova - Google-translated from Russian into English

Information transmitted by our space friends through Irina Podzorova, a contactee with extraterrestrial civilizations.

#185 “Voronezh – Cassiopeia. Diary of a contactee." Documentary film, 4K.

---

https://www.youtube.com/watch?v=Ea_WZ_ve2q4

00:35 Background.

Voice-over: In the summer of 1999, a thirteen-year-old girl Irina Podzorova from the village of Peski near Voronezh agreed to take a short trip on a triangular-shaped ship with aliens from the constellation Cassiopeia.

Since then, for more than twenty years, representatives of the civilizations of the Interstellar Union of our Galaxy, which includes 116 of the 727 existing intelligent races, have been regularly in

contact with her.

02:00 The purpose of the film about the Cassiopeia project.

Irina: Just imagine, at the age of 13 I was walking in the dark, now I'm following the trail of a car, but then I trampled the road myself, like a moose. Now I will reach those trees.

Hello, forest, my first cosmodrome! How many times have I gone from here to deep space!

Voice-over: These unique contacts occur not only on the astral, but also on the physical level. While in alien ships, Irina visited many planets of our Galaxy, and also visited the planets of the Solar System.

From the age of 13, Ira kept a diary where she wrote down flight reports, including a number of precise details: data in numbers, diagrams, a dictionary of alien terms.

The main alien curator of Irina's astral contacts is the xenobiologist MidgasCaus from the planet Esler. The planet itself is located at a distance of 36 light years from the Sun, in the system of the star Bootes, and MidgasKaus in its physical body resides in an alien base located underground in the north of the Moscow region.

Irina: This is the constellation Cassiopeia, where Kirchiton lives, and our project is named after this constellation - "Cassiopeia". Here in this area.

Voice-over: All information in this film is reliable and is based, among other things, on materials from Irina's video conferences with the astral participation of representatives of the Interstellar Union with representatives of our scientific community.

The purpose of this film, as well as the purpose of the aliens in this contact with us, is to gradually change our collective consciousness and spiritual vibrations so that our civilization can join the Interstellar Galactic Union.

Natalya, Irina's aunt: Sane people, people of common sense cannot help but believe that in such a huge Universe there cannot be life, it

must be, it exists.

We are still far away, and exactly how far is my personal opinion, personal concepts, the main fact is how we differ from them: anger, we do not yet have kindness of heart, we commit crimes, kill, rape, torture each other. Until we defeat all this, we will not be able to join them.

Voice-over: Kirchiton, Irina Podzorova's first curator, wrote the text in his own hand: "HELLO, LIFT YOUR FACE TO THE STARS, WE REMEMBER YOU, YOU ARE NOT ALONE."

Maxim: The Cassiopeia project is not a commercial or political project. It is aimed at increasing the level of awareness of perception of every person on this planet. And the task of the project is to make it possible to understand that we are not only a body, but also a Spirit, and the primary thing in this is the Spirit, this is the Soul that many do not appreciate, do not love and do not see.

07:30 Irina Podzorova about her childhood.

Irina: Here is my birch tree. I've been charging with her since childhood. This was my first tree, about which I asked my mother: "What is this?"

This is where we entered the house.

They made a window in place of the door, there was a porch on which we sat and from which we went down. This is the house in which I was born and raised, of course, everything has changed here because other owners live, but nevertheless these three birch trees have remained unchanged. Here is the first birch, there is the second, and there is the third.

There was a palisade that enclosed them, and this was the main place for games in my childhood. But sometimes I still went outside the front garden, there was even a stone where ants lived, I fed them. I remember this. Here is a path, it is overgrown, here the boys and I ran and played. We were strictly forbidden to go out on the road, because... here is the track. There was an entrance to the courtyard, but now it is here, the fence was made closer, it was further away.

The house was a different color - blue and was not covered with siding, there was no gas installed, there was stove heating.

I was raised by my mother and grandmother, I never knew my father, I was born in 1986 and lived here until I was 14-15 years old. Then my mother and I moved to another place. And it was then that an event occurred for me - my first contact with aliens. But even before contact with me, an incident occurred that changed my consciousness at the age of 12.

It was on a day that I will always remember: October 12, 1998. I had nine months left before contacting Kirchiton, but I didn't think about anything like that.

10:20 Media about Irina Podzorova.

(Live broadcast by Andrey Malakhov "Are Vanga's prophecies coming true? Aliens are in touch", October 13, 2020)

Andrey Malakhov: In our studio Irina Podzorova from Voronezh, who claims that she is constantly in contact with extraterrestrials, aliens. Good evening!

Irina: Hello!

Andrey Malakhov: The most interesting thing is that the subscribers of your YouTube channel, which is very popular, you have tens of thousands of fans, told us about you from the United States of America. How long ago did you decide to start your blog and talk about your contact with aliens?

Irina: Hello, Andrey! Hello, dear experts! Hello, dear TV viewers! My name is Irina Podzorova. I have been a contactee with extraterrestrial civilizations since I was 13 years old. At the beginning it was a representative from the planet Daraal, whose image was now shown on the screen. His name is Kirchiton, he is from the planet Daraal in the constellation Cassiopeia. I met him and had physical contact with him. He flies to me.

Andrey Malakhov: Let's not let half of our TV viewers decide that we've gone crazy, let's say that you are from Voronezh, and we found

a report from the Vremya program of that time - 1989, which can shed light on the fact that says our heroine. Attention to the screen!

Video chronicle: UFO, or what was it? Report from Voronezh. Here we are in this place where, according to eyewitnesses, an unidentified flying object landed. Here's an eyewitness:

- We were scared, then he hovered over this tree, the door opened, a big man, about three meters long, he had no head, no shoulders either, he just had this little bump where his head should have been, there were three eyes: two on the sides, one in the middle. His head could not turn; in the middle his eyes turned to the right, left, up, down. Instead of a nose there were two holes.

Andrey Malakhov: But this is practically what you described to us and our correspondents. We were a little surprised.

12:53 Irina Podzorova about the inner Light.

Irina: In this house, in the room where they have a large window, and before there were two simple windows, I sat alone, my mother was in the other room. It was evening, I was watching TV and I will never forget the song that sounded at that moment - it was forever imprinted in my mind, it was the song “My Distant Star...” by Dmitry Malikov. And when I listened to her, I suddenly felt that a ray of Light was piercing me, although the room was light - a light bulb was burning, but I realized that this was not the light from a light bulb at all.

Which one then? It was internal, and I realized that it was much brighter than the one from the light bulb, but it was not visible with his eyes. You see it as some other organ, but I can’t find the name. Perhaps this is the Soul.

When I felt this Light, I almost immediately felt how it penetrated me from top to bottom, and that I dissolved in it. My Self begins to recognize itself as this Light. At that same moment, I realized that I was not just a teenage girl who lives an ordinary life, but that I am an immortal Spirit, I am a part of this Light, and that I will never die. I had a feeling of delight in the omniscience of the entire Universe, merging with the Supreme Mind, which breathed such Love on me that I almost lost consciousness from delight. I already felt bad about

my body, I just felt that I was merging with this Light, and that it was intelligent. But gradually this state began to pass for me, and then, when it went away, I realized that I continued to sit in the same room and listen to the song - it was not over yet.

I don't know how much time passed, for me it felt like an eternity and at the same time a moment. But at the moment of this state, I did not hear the words of the song, I just heard that he was singing something, but I no longer understood what. Then, when all this passed, I realized that I was sitting in the same place, and after that the light from the light bulb seemed so dim to me. I looked around, felt my body and immediately realized that I felt the world and felt differently. It was as if something in me had changed and I became a different person.

How exactly does it feel? You feel that I am an immortal Spirit. This feeling remains, and that this Light is around me, I don't see it, but it protects me, loves me endlessly and sent me into this world so that I could tell others about it. I realized all this. That same evening (at first I thought that everyone feels this, but they just don't talk about it), I went up to my mother and told her that I felt that I was Light, an immortal Spirit, and she didn't even understand what I was talking about.

Mom asked: "How is this? Maybe you dreamed?"

I told her: "No, I sat and listened."

Mom: "What light? The kind that burns?"

I say: "No, another one! You understand, you too are an immortal Spirit, you will never die, you are here temporarily!"

Mom says: "Leave me alone!" - and waved it off.

I became so interested, then I tried to talk to her about it, she said: "I don't want to talk about it."

I ask her: "Tell me what it is?"

She answered me: "I don't know!"

Since then, I have continued to feel this feeling periodically, maybe once or twice a month. I remember the first few days after the first merger with the Light, I was constantly waiting for it. I wanted this condition to repeat itself, because nothing in life is more beautiful, I'm telling you this from the position of a person who is 34 years old. No earthly pleasures can even come close to the endless happiness that engulfs a person at this moment. I waited for him, and then, when I stopped waiting - after a few weeks or months - I don't remember, I only remember that it was already early winter, on an early winter morning I was walking to school along this street. It was snowing, and again the Light covered me with an even stronger stream, and then I realized that even snowflakes were part of it, I caught them, I was happy. I loved the whole world so much and thanked for the presence next to me of that Light that created all the galaxies. He is really next to us, He is next to each of you, my dear viewers.

19:42 Sensations in the Astral and the world of disembodied Spirits.

(Conference "Life after life. Leaving the body. Astral travel. What happens in the world of disembodied Spirits?", September 18, 2020)

Irina: Find a guide. I can call my curator, he is a plasmoid. I can go to the Astral without a guide, but to the world of disembodied Spirits I take a guide not because it is dangerous there, but because when you cross the border between the Astral and the world of disembodied Spirits, the feeling changes. In the Astral you feel yourself in the astral body, arms, legs - everything is there, and when you cross the border, you begin to feel yourself as energy. At the same time, your consciousness is clear, and it seems that you were asleep, life on Earth is a dream, and you woke up.

Sophia Blank: I see.

Irina: And there you can forget that you are still embodied. In principle, guides teach all travelers to maintain not just a critical attitude, but memory. In the world of disembodied Spirits, when, for example, Mead or LiShioni take me there, and even to my level at which I incarnated, just the Light and all the surrounding Spirits are familiar, as if you had returned home, and you forget about life on Earth, She's like a dream to you. After we've seen all the incarnations, Meade or LiScioni says, "Let's go back." And I say: "Where?" They: "We must return to the physical body, they are waiting for us." And I

answer: “What, I also have a body, have I already been born?” You really forget there.

Sophia Blank: Wow.

22:03 Irina Podzorova about meeting aliens.

Irina: I was swinging on a swing, then I jumped off and walked, there was no fountain, this beauty, light bulbs, it was dark. To return home, I had to go to the central gate or to where the monument was, but I decided to walk a little, I already remember, the stars were shining, the birds were singing like nightingales. I listened to them, there were flowers here, I walked here. I decided to go around, in the center, and I went to the back gate. She walked, didn’t notice anything special, then went outside. I didn’t look at the sky, but only at my feet. But I noticed that there are no birds singing here, there is silence, and no cars are passing by.

Usually young people gather in our center, but I didn’t hear any voices, as if life around me had stopped. It seemed strange. But I went out to the side of the road and, looking at my feet, walked away, thinking about something of my own. I raised my head (there’s already a lot that has changed here: these two shops weren’t there, that house wasn’t there, there was a statue of Lenin, there was a fire department, and then there was a bus stop) and I saw between them some kind of triangular object that stood horizontally , with a sharp nose turned to the right - that’s where Naberezhnaya Street begins. He was not standing on the road, but slightly to the right.

I paused and thought that nothing like this had happened this afternoon, and I thought: “What could it be?” There was a black triangle, and round windows glowed with white light on it. I thought: “Was it built like this? They couldn’t do it overnight! Maybe what kind of car? Does not look like it". I didn’t think about aliens, but maybe they brought some strange equipment. Then I saw that the doorway was open, the staircase was illuminated, I saw five tall figures and thought: “Oh! There's someone there! I’ll go and ask what kind of triangles are still there?” And I went.

It was dark, there were no lights, I began to cross the road. He was standing somewhere here, maybe a little further away. And when I approached, I saw that they were too high - about three meters, there

were five of them. I noticed that they have no neck, semicircular heads, three eyes glow in the dark: two yellow and one red. I looked and thought: “What is this?” I had such a stopper, I didn’t understand what it was. And one of them said to me in Russian in a male voice: “Who are you?” When I heard the Russian speech, I thought that this is our man, he just changed his clothes, maybe they are filming a movie, they changed into costumes, you can stand on special devices to appear taller. I automatically say: “Who are you?” He says: “I am Kirchiton.” But the word “Kirkhiton” did not seem unusual to me; I thought it was some kind of foreign surname. Moreover, the word “church” is something German-Jewish. I say: “I am Irina!” He asks: “Will you fly with us?”

When he said this, I felt like everything came together in my mind. I immediately compared the triangle, the unusual appearance of these people, and I realized that these were aliens, and only aliens could look like that and ask questions. It became very interesting, and I wanted to go into space with them, to see where they live. What teenager would say no? But at the same time, I understood that this was very far away, it could be another planet, and we could fly for a very long time. And with such regret and such a feeling of loss that they won’t take me now, and I will part with them, I said: “I can’t fly with you, because my mother is waiting for me at home, she will be very worried and look for me if I am now I won’t come home.” There were four more of them there, but they were silent. And he told me: “Mark the time, in exactly two minutes you will be here.” I didn’t figure out where we would fly, how is it in two minutes? I was just glad that this was all possible. I say: “Okay, I agree.”

We went up the stairs: Kirchiton went first, then I, and four of them followed me without saying a word. When I entered the triangle, the first thing I saw was a bright white light, but at the same time it did not irritate my eyes, it did not hurt to look at it. I just looked around: not a single light bulb, not a single lantern. When we entered, Kirkhiton said: “Sit down.” I turned to the right and saw a long semicircular gray room, and along the wall there were five or six chairs, they were leaning and welded to the wall, as one piece with it. What surprised me: they were three meters tall, and the chairs were the same height as me. If they were under them, I would accordingly feel uncomfortable. Kirkhiton said: “Sit down. Count!" I sat down on one of the chairs, turned to the left and saw that in place of the door there was a wall, there wasn’t even a gap left, I thought: “Where did the door go, it should have closed, there should be a place there, but

everything is smooth there?" Marvelous! Four stood opposite me. He moved to the right, he had some kind of table with buttons on which everything was blinking. I began to count out loud: "One, two, three, four..." I sat, I didn't experience any sensations of movement or anything else, I just sat and counted. And when I said: "Fifteen," Kirchiton came up to me and said: "That's it, we've arrived!"

33:08 Types of interactions between earthling contactees and aliens.

(Conference "Disnit Civilization, Contacting. Live broadcast with Katya Lel", August 16, 2020)

Katya Lel: Thank you for the meetings and the time you are devoting now. I am incredibly grateful, thank you for the kindness of your Soul. Irina, I want to know what happened to me at the age of sixteen, why were my teeth taken? And everything is detailed, I really want to know everything.

Irina: Details that you don't remember.

Katya Lel: Of course not.

Irina: First, I will introduce those who are present with us, I mean in their astral bodies. Firstly, with us is my curator from the planet Esler - MidgasKaus, LiShioni from the planet Shimor, he is already our common curator, including the Cassiopeia project, Maxim. The curator of one contactee is also here - we are visiting her now, this is Larisa, Aunika - PiosNior. He is also from Esler. Also present here is a representative of the planet Burkhad, the capital of the Interstellar Union, the constellation Cygnus, his name is Raom Tiyan. He is a specialist in energy interactions, and in the Interstellar Union he also oversees contacts of the Interstellar Union and its representatives with earthlings. Exactly from our planet.

There is also a representative of the civilization who was in contact with you. He just said that he had direct physical contact with you twice and sent his biorobots to you. This is a specialist from the planet Disnit, he is here in the astral body. His physical body is now located at a base on the far side of the Moon.

Katya Lel: Very nice, do you see him?

Irina: Yes, usually they come in astral bodies and can take on any images, but he is now showing me the image of a physical body. His name is Saint Titus, he is a biologist, a specialist in contacts with galactic life forms. You need to understand that we are also aliens for them. One of my supervisors is Kirchiton from the planet Daraal, he physically took me to the planet Disnit. This is one of the planets that is part of the Interstellar Union. Her visit for me, as a contactee, was in the contact schedule. He took me to many planets. Disnit is located in the constellation Aquila, and it is 110 light years from Earth. They have an underwater city.

36:22 Irina Podzorova about the planet Daraal.

Irina: I turned around, looked at the door and saw that it was open. It was light outside, but when I came in in the evening, it should have been dark there. Kirchiton says: “Let's go!” He didn’t give me a suit, we just went out with him, and these four, I don’t even remember: they stayed inside or came out after us, but he and I stayed together.

The first thing I saw was the bright Sun, I realized that it was day here. I raised my head up and saw that the sky was somehow grayish-blue, and the Sun was literally at its zenith, bright, but not yellow. It was unpleasant for me to look at it, it seemed to me smaller than ours, it glowed white with a purple tint - I don’t know that color, there are no clouds. I looked around, from the bright light of the Sun, at first I somehow saw everything in a fog, everything was dark, but it was not dark on the street, but in my eyes. Then I saw a round square on which there was a triangle, maybe twenty meters in size. The area consisted of stone or asphalt of a dark gray color, only there was not a single pothole on it, it was smooth, like a floor, like concrete, only darker. After taking a few breaths, I felt that the air smelled as if matches or a sulfur bomb had been burned in the room for a long time. Kirchiton says: “Let's go!”

And off we went. He walked a little ahead, I followed him. I looked around, saw in the distance on the right several houses, also dark in color, but they looked like towers, round, I didn’t see any windows. My throat began to feel a little sore, and my eyes began to water. I asked: “What does it smell like here?” He stopped, turned to me and said: “There is sulfur dioxide in the atmosphere here, its concentration is safe for earthlings.” And we moved on. I saw a creature similar to Kirchiton, only half the size, maybe a little taller than me. He was driving a herd of animals that looked like donkeys. Then those few

Daraalians standing near us began to say something to Kirchiton in an incomprehensible language, which consisted of sounds. I don't know what to compare it to. A bit like Chinese. The voices are similar to our male ones, only lower. And I didn't notice anything unusual. Kirchiton said something in their language, and they left. We went further, walked a little and found ourselves in front of a long, low, two-story building made of gray stone, there was a door in the wall. He came up, pulled the handle, went inside, I followed him and saw that there were no windows in the large room, there was white light everywhere, and there was practically no smell, it was there, but weak.

There was no one in the room. In front of me was something like a high, long table. The floor in the room was white, smooth, slightly shiny. It reminded me of some kind of solid, homogeneous substance like plaster, the walls were cream-colored, and this room was rectangular. We approached this table, it was taller than me, it did not stand on legs, but was like a large box. Kirkhiton says: "This is our store. We buy our food and everything we need here. This is where the things are." I say: "But I can't see anything." He came up behind me, took me by the arms, lifted me up and said: "Look." I looked and saw behind the transparent glass that there was a bird lying, it had been plucked, it had a head and legs, it looked like our ostrich: the same beak, long legs, only it was smaller. Then I saw a little further away a black, long, thin stick that looked like a pencil. And he put me back. I say, "What is this?" He says: "This bird is called a gopgner, it is one of the types of our food." I say: "What about the wand?" He extended his hand and pulled out the same wand from somewhere inside himself. He said it's like our flashlight to shine where it's dark. I say: "What flashlight?" He pressed something, and from one end of this stick a white beam began to shine, which reminded me of the light like in that room, but brighter, like our laser pointers, only it was brighter and thinner. Kirkhiton said: "When it's dark, it provides good light." I say: "What are you buying this for? Do you have money? He says: "Yes, in our language they are called meishi," he hid the flashlight and with his other hand took out an object in the shape of a yellow diamond.

He says: "These are our coins!" - He handed it to me: "Take it!" - I took. There were some lines drawn on it. It was quite heavy, cold like metal, about half the size of my palm. I twirled it and gave it back. He says: "Did I tell you that I'll get you back in two minutes? It's time for us, let's go!" There was no one in the store during this time, and I

didn't ask him: "Where are everyone, the sellers?" Somehow I didn't pay attention to this. He and I got out and walked back along the gray asphalt to the triangle, I asked him: "Kirchiton, where are we now?" He said that in the constellation Cassiopeia, the planet is called Daraal - this is his homeland. I asked: "Daraal? Where is this located? He replied: "From here to the Sun is 150 light years."

We went back into the triangle. I saw that these quadruples were no longer there. I sat down, he said: "I'll take you home now. It will be a few days before I can fly again. I don't know when this will be, but one of these days. I'll show you another place."

On the way back I didn't count anymore. A little time passed, and he told me: "You can go out!" I looked: the door was open. Kirchiton said: "That's it, you can go home. Wait, one of these days I'll fly to you."

I went down the stairs and went out into the street, looked around and saw that it was dark again. I ended up in the same place, maybe not exactly up to a meter, but in the same place where he took me from. And again there were no people around, I took a few steps and heard a whistle and a gust of wind from behind. I turned around, but there was no triangle behind me. I looked up and saw only a blinking star that disappeared before my eyes. I went home and thought all the way: "Is this all true, and have I visited another planet?"

When I went home, I thought: "What should I tell my mother? I won't say anything - she won't believe me." And when I arrived, and the walk was about 30 minutes, I knocked, she asked where I had been for so long, I said: "Yes, we played ball there." She didn't say anything. It happened that we played until late, and I came so late more than once. She wasn't particularly surprised, she said: "Okay, go eat."

51:26 Creation of civilization on Earth.

(Conference in St. Petersburg. Part 2, June 12, 2020)

Question from the audience: What is the task of each person as a Soul? What is the big challenge for all of humanity? Why was our civilization created?

Irina: Thanks for the questions! Why were you created as a race? The specialists who discovered your world 5 million years ago were from the planet Tumesout, so this question is answered by their representative - Tiar, who, through contacts with you, studied in detail the history of the creation and discovery of your planet by his ancestors.

5 million years ago your world was discovered, on which there was already plant, biological, animal life: there were birds, fish, insects, large mammals and reptiles, naturally, the microbiological world, mammals - a group of primates, among which were representatives of various monkeys. When studying these animals, it was not found in them the possibility of incarnating an intelligent Spirit.

For the first 2 million years after the discovery of your planet, scientists of the Galaxy were waiting for the self-organization, self-evolution of these primates, since they were most suitable for the role of those creatures in which an intelligent Spirit could incarnate on Earth. Then it was decided to speed up this process, to begin work on creating a hybrid, because the genes of the Selbet people, us Tumesout people, and the genes of the Burkhad people, having combined with the genes of primates, made it possible to prepare the nervous system and the system of receptors in the body of the hybrid for the embodiment of the intelligent Spirit.

Why was this done? The Earth had a unique set of flora, fauna and all the riches: geological, atmospheric, energy capabilities available in your world, which are not so often found in the Galaxy. And even more so, the location of the Earth in space, its distance from the Sun, made it possible to develop here the civilization of a future employee of our Interstellar Union. That is why it was decided to help you evolve.

54:44 Irina Podzorova about her diary.

Irina: After the first trip with Kirchiton, I thought for a very long time about what it was? At first I doubted whether it was real or not. I did not have a single proof, but, going over the details of my journey in my memory, I did not find any reason to doubt. Everything was not in a dream, but in reality, and I continued to go to these contacts twice a week.

But I haven’t told my mother about this yet, knowing full well that she wouldn’t believe it. It's really hard to believe without seeing aliens, without actually seeing what's happening.

But, nevertheless, in secret from her, I began to keep a diary in which I wrote down everything that happened to me during contacts. As soon as I returned from the next contact, I wrote down and sketched everything that I saw and heard there.

56:17 Podzorova about the flight to the Moon and the agreement with aliens.

Irina: To the left. Now the curators came to me and said: “Go left. Why are you climbing on the sand? Walk on the grass." There was at least a similar clearing there: there were also trees in a semicircle, maybe, if not in this clearing, then in the next clearing. True, the bushes growing here were the same, small sticky acacias. Everything was cut down.

I had a place where I picked mushrooms and walked while it was light. I waited here, Kirchiton flew here. Now it’s light, but after 9 o’clock in the evening it’s dark - there are no streetlights. If there is no Moon, you literally stretch out your hand, you can’t see anything, but then your eyes get used to it, you can tell where to step, because there is light from the sky.

Kirkhiton, hello! Hello plasmoids!

Several days passed after the first contact, I went to a neighbor in the evening - my mother asked me. He was not at home; it was dark in the yard. It was about 10 o'clock in the evening, and I already wanted to go home, but I felt that I needed to raise my head. I raised my head, and a dark plate was hanging above me, I realized that it was Kirchiton, and began to wait: what will happen next? The plate flew away from me towards the garden, I ran after it: he came after me, for a ride!

She stopped and pulled out the ladder without touching the ground, but I didn't have to pull myself up. The staircase had two railings, and holding on to them, I began to climb. Surprisingly, there was no light coming from the hatch and the windows were not lit. If someone was watching from the road, she would not have been noticed behind the

trees because she was camouflaged.

I got inside through a round hatch in the floor. It was light there, and what's surprising is that no light came out. Kirchiton stood next to the hatch (he was alone, without those four from the last flight) and smiled. He told me: "Come with me. We are now flying to the moon, to the lunar base!" He and I walked along a short corridor into a semicircular room. There were round windows located high up, I couldn't see anything through them; along the wall there were chairs exactly the same as in the triangle, only they differed in that they had semicircular plastic handles. He told me: "Sit down!" I sat down on a chair. He says: "Now we'll fly, hold on to the hands!" And he himself went to the table under the window, which resembled a dark rectangular box built into the wall. He stood in front of the window, turned his back to me and began to do something. A few minutes or a few seconds passed, and I felt that under me the chair and the floor seemed to be falling through, as if you were sitting and starting to fall somewhere. Out of surprise, I jumped to my feet and suddenly bounced off the floor, flew up, hit the top of my head on the ceiling, immediately sank back down and began to "swim." I realized that this was weightlessness, because I read about astronauts. I tried to reach the chair with my hand, but it didn't work. Kirchiton turned, came up to me, took my hand, sat me back on the chair and said: "Hold your hands!" - I began to hold on.

I felt unpleasant, I felt sick, the blood was pounding in my temples, everything was swimming in my eyes. And he walked around the ship, I was surprised that he walked. Only later did I find out that he had special shoes to walk in zero gravity. Several minutes passed, I realized that I was sitting normally and was no longer holding on to these handles, I was not falling anywhere. Kirchiton said: "Let's go!" When we left the plate, there was a ladder there. He says: "We are on the Moon, but not on its surface, but on a special base. There is no need for a protective suit, because... an atmosphere has been created, the pressure and temperature are normal." I saw a huge cave, very high - twenty meters, the size of five football fields. There was a plate there. The walls of the cave were uneven, made of gray stone, and the floor was uneven, stone. It was light, a little cool, the smell was like a cellar.

I felt that when I pulled my leg off, it somehow stretched forward and jumped. When I raised my hands, there was a feeling that they became lighter - I can't feel them. When I jumped higher than

Kirchiton, I thought that I was going to fall, but I slowly descended, managed to get to my feet, he looked at me and said: “Let's go!”

And it became so interesting and fun for me: I liked that I was jumping. We went to the wall of this cave, there was a large square brown door, it reminded me of a garage door. It sank down and away from us and became part of the floor. We walked along and I saw a corridor, low, narrow and winding. It was made of stone, it was also light there, but darker than in the cave. There were dark doors to the right and left. Kirchiton walked through the first door, pulled the handle of the second, opened it and went in. I followed him, saw that the room was oval, large, there was another alien standing there, like Kirchiton, and looking at us. And in the middle of the room there was a raised platform, like a table, but it had no legs, and rose from the floor, up to my chest, dark green in color. The walls looked like they were made of some kind of green stone.

I looked around, I wanted to remember it all. Kirchiton said: “We have chosen you as a contactee. If you agree to become a contactee of the planet Daraal, then we will fly to you twice a week, show you different planets, but for this you must agree to three conditions and allow you to install a chip. Chips are installed in this room. This Daraalian's name is Perzhiton, and he puts them on. He is our doctor, and I am an astrophysicist, I don’t install chips. I invited him for this, only he does not know Russian, in which case I will translate.”

He explained: “A contactee is a person who is visited by various alien beings and is in contact with other worlds. If you agree to be our contactee, then we will put a chip on you and fly in twice a week to show you different planets of our solar system, and then the galaxies.” I asked: “Why come?” He said: “We have such a program - working with the Earth. It is not yet part of the community of intelligent planets in our Galaxy, and we can show the Universe only to individual contactees, to those who are ready to see us and fly with us, because not everyone can do this.” I asked: “What is needed for this?” He said: “We must agree to three conditions.” I say: “Which ones?” “The first thing is not to tell anyone about contact with us (he did not advise me to do this from the very beginning). The second condition is to come twice a week to the place I choose during the summer, while there is no snow. The third condition is that this contact is established for life.” I say: “Okay, I agree.”

1:09:28 The difference between the civilization of the planet Burkhad

and the earth's.

(Conference "History of the creation of the Interstellar Union. Cooperation of civilizations. Questions from the VK group." Part 1, September 20, 2020)

Irina: Tuluri, Edipasev, Shimor, Burkhad and Tumesout were the first creators of the original Interstellar Union about 15 million years ago, the rest joined later.

If we talk specifically about Burkhad, then for many hundreds of years after social evolution took place on our planet and wars stopped (we also had this in the ancient period), we did not physically go into space. We have placed emphasis on contacting cosmic civilizations through astral travel. Representatives of Tumesout, for example, from Shimor and from other galaxies, several civilizations flew to us on spaceships. We didn't build our own ships. We didn't have this like you: first we flew into space, sent probes to other planets, and at the same time we continued to fight. We believed that first we needed to solve the problems with the destruction of our own kind for the sake of some ideas on our planet. Only then explore space.

Our Government believed that internal problems were more important. When the population of the planet said that they wanted to explore space, the Government passed a law that they could explore it either by coming into contact with civilizations that arrived, or in astral bodies. Therefore, from the very beginning we had priority in researching astral travel over physical travel. This (among other things) was the reason that our science largely takes into account the Spiritual world, not like yours. And that is why it is sometimes difficult for us to understand each other, because everything for you is based on materialistic perception.

1:12:23 Podzorova about installing a chip on the planet Daraal.

Irina: Kirchiton said: "A surveillance chip is being installed for you." I asked: "What is a chip?" He says: "This is a microdevice that cannot be detected by your instruments; it is placed to monitor the contactee and also to make mental contact possible. Without it, mental contact is impossible. The contact is established for life, you will not be able to refuse later. And now you have the opportunity to think carefully and say either "yes" or "no". If you say no, I will take you to Earth

and we will never see you again. Think well!" And I imagined that if I refuse now, then I will not see other planets, I was on Daraal, on the Moon, and I liked Kirchiton himself as an intelligent being. He was very kind, I felt his kindness towards me, I liked spending time with them. I imagined that I would never see him again, and immediately agreed. I said: “Yes, of course, I’m ready to become a contactee!” He said: “Okay, then we’ll give you a chip.” I say: “What do I need to do for this?” He said: “Lie down on the table” (as I said earlier, it stood in the middle of the room, was integral with the floor and was long, oval, greenish-brown, chest-high). I walked up to him, put my hand, the table was warm to the touch, like silicone baking molds, soft and elastic, I jumped on it and lay on my back, Kirchiton and Perzhiton came up to me. Perjiton said something in an incomprehensible language to Kirchiton. Kirchiton answered him something. Perzhiton extended his hand, his skin was gray, smooth, and he had five long fingers on his hands. My eyes were open, and he held his palm in front of them, they closed by themselves, and I don’t remember anything else.

I don’t know how much time passed, it seemed to me like one second. I open my eyes and at first I don’t understand where I am, but then I immediately remembered everything. I look around, Kirchiton and Perzhiton were still standing on both sides of the table. Kirchiton said: “Everything is ready, we have set it, get up!” I sat down and examined myself: my clothes were in order, nothing hurt, there were no marks. I asked: “And where did you put it?” Kirchiton said: “Under the last left rib there is such a place - a nerve ganglion that is attached to your nervous system. The chip has an elongated shape, 2 mm long and thinner than your hair. It is made of organic materials; no type of radiation can detect it because the radiation passes through it. It cannot be rejected by your immune system and will not cause harm to your body, over time it will integrate into your body and become part of it.

I lifted my clothes and looked at this place: there was a dark spot there, like a pigment spot. But over time - after a year and a half - it disappeared. I even showed it to my mother, and she said: “You didn’t notice it before, it could have appeared earlier. This is not a wound, not a burn, but just a speck. It doesn’t look like they installed a chip.”

I jumped off the table and thanked them: “Thank you, Kirchiton! Thank you, Perzhiton!” I was glad that they gave me a chip. Perzhiton was silent because he did not know Russian, and Kirkhiton said:

“Thank you for your trust and desire to be a contactee. I will try to justify your trust and show you the Universe. In the meantime, it’s time for us to go, I’ll take you back to Earth now.”

We went to the cave where the plate stood, entered it, and when weightlessness began, I, in order to distract myself from the unpleasant sensations, began asking Kirchiton about the base. He says: “This is the base of 18 alien civilizations. The civilization of the planet Daraal is one of them.” I ask him: “Why don’t you fly to everyone, why are the meetings secret?” He replied: “Because your Earth is not yet ready for mass contact.” I ask: "Why?" He says: “Because most earthlings are very aggressive and short-sighted, their negative emotions outweigh their reason, and therefore kindness, compassion, helping others are an empty phrase for them. It is these beliefs and this mood that cause you to reject forms of life that are unfamiliar to you, and therefore contact is impossible with most of you.” I was surprised and was ready to bombard him with questions: “Why does he think that? I think we have a lot of good people. Why does he have such an opinion about our civilization, a little harsh, critical? For example, this is the first time I’ve heard such an opinion.” Kirchiton said: “That’s it, we’ve arrived, get out of the plate.”

The plate did not land, but simply hung above the ground. He said: “I brought you to a new place of contact, you will now go out the stairs and go home, you will come to this place twice a week: on Tuesday and Thursday at half past ten in the evening.” I say: “Okay, I’ll look forward to it! Thank you again!" I went down the stairs and immediately realized that I was alone in a dark forest. After leaving the plate, I found myself in an unfamiliar clearing in a pine forest and had no idea where to go. Following the plate, which quickly turned into a white star and disappeared, I looked around.

The forest was unfamiliar to me, especially since it was after ten o’clock in the evening. I began to think about what to do next. Remembering that the village of Sands is located south of the pine forest, I found the North Star in the sky, which I knew how to look for since I was seven - my mother showed me. She turned her back to her and quickly walked through the forest, as far as possible in those conditions. Unfortunately, they forgot to hang lanterns in the forest, so it was very dark, and there were no roads or paths under my feet. In order not to stumble upon some stump, I strained my eyes to the point of pain, and my heart was pounding loudly from the realization that I was alone in the forest, but I knew perfectly well that I was in

no danger. Soon I came out onto a rural road that was well known to me, and when I saw this, I jumped for joy and quickly ran home. Soon I was knocking on the door. A concerned mother opened the door and immediately asked: “Where have you been for so long? I already wanted to call the police!”

While I was running home, I figured out what to tell her. I told her: “Oh, mom, forgive me, please, I was at my friend Andrey’s, watched a movie and forgot what time it was. He was so interesting!” She says, “What movie? It’s half past eleven at night, have you even thought about me?” She started swearing at me. I felt guilty for making her worry for so long, I hugged her, kissed her and said: “Mom, don’t worry, this won’t happen again.” Although I thought: “Mom, if you knew where I’ve been just now!” Naturally, I didn’t tell her anything. She looked at me with disbelief and said: “Aren’t you deceiving me?” She probably felt something, and I said: “No, Mom!” - and looked at her with honest eyes. She says: “Okay, don’t do that again, sit down, eat and go to sleep!”

At the table I really wanted to sleep, I was nodding off, then I finally ate. I thought that I wouldn’t sleep after the chip and would lie with my eyes open all night. But as soon as my head touched the pillow, I immediately fell asleep and slept peacefully until the morning.

1:25:14 The true essence of the Soul.

(Conference “Social experiment: evidence of the existence of aliens”, October 23, 2020)

Irina: Mostly planetary scientists talk to Irina. These are not the inhabitants of the planets who live everyday life. These are researchers of other worlds who have devoted many decades, or even hundreds of years, to the study of an alien form of life, alien to us, for example, yours.

Some features of your consciousness and society will be completely incomprehensible to broad layers of our population. We approach you trained to respond correctly to the peculiarities of your perception, to your society, but we live in a completely different society. For example, if we are talking about planet Earth, that a law has been adopted by your rulers, which allows you to kill unborn children, that is, to deprive them of the possibility of incarnation and at least once

breathe the air of the Earth, to which they may have strived for many hundreds of years according to your chronology , many don't believe us. This is the difference in our consciousness (I ask you to leave these words). I wish you to comprehend the true essence of your Soul, which will illuminate all corners of your consciousness. Then you will understand that the words “Light” and “Love” are different words, but they are one. This is a single essence that can support your life: public, social, spiritual, biological, and all types of existence, not only in this world, but in all worlds of our vast Universe, which, in turn, is only a small part of the huge, all-pervading energy of the Universe.

Irina: The whole next week was spent thinking about why I was chosen as a contactee, and none of my friends and acquaintances. At least I haven't heard of any of them being chosen. I was looking forward to the next contact. During the first week of my contact, I didn’t say anything to my mother, although several times I caught myself thinking that I almost let it slip about Kirchiton. I constantly imagined how it would be next time, came up with a thousand questions that I would ask him, and I myself thought how he would answer them. Whether this would coincide or not with how he would actually answer, everything was interesting to me, unusual, I was delighted that I could visit other worlds.

Finally, the day of the next contact came, it was August 8, 1999. In the morning I was a little depressed because it seemed to me that time was passing very slowly. The sun seemed to be glued to the sky and did not want to go down. I was exhausted with impatience, imagining myself in a spaceship that covers unimaginable distances in such a short time. Mom noticed my condition and asked: “What’s wrong with you?” I muttered something to her and went to the garden to distract myself. I needed to do something, I was waiting for the moment of meeting. I got busy with some work, weeding potatoes. And I forgot, because... I had to focus on physical work. When I raised my head and saw that the Sun was setting, I wanted to drink and eat. I went home, looked at my watch, and saw that there was a little more than an hour left before the contact time. I was happy, sat down to have a snack, and when there were already 20-30 minutes left to get to the contact point, I told my mother: “I’ll go for a walk!” She said, “Okay, just don’t stay out late and don’t go too far from home!” But I no longer heard her, my feet themselves carried me to the pine forest, which became for me a personal spaceport and a door to other worlds.

It was already completely dark, but the forest did not frighten me with

its mysterious darkness, because I knew that soon a ship with alien brothers on board would descend into it. Coming out into the treasured clearing, I began to carefully peer into the stars, eagerly awaiting the appearance of Kirchiton's ship. Finally, I saw a white star that flashed where it had not been a moment before. This star turned into a flying saucer, and I realized that I had waited for my time to fly to another world. A ladder descended from the plate, and when I climbed it, my heart beat so loudly that it seemed to me that it could be heard throughout the entire forest!

When I got on board the ship, I didn't see Kirchiton and hurried to the pilots' room, where I was for the first time, and I saw him, he told me: "Hello! Sit on a chair, we are flying to the planet Mercury!"

1:33:20 The difference in the worldview of earthlings and representatives of the Interstellar Union.

(Conference "Kirkhiton: quark-gluon coupling within the Galaxy and our survey", November 17, 2020)

Vladimir Goldstein: Kirchiton can now tell us from his side whatever he wants, especially since this is the first time we have contact in this format.

Irina: He says: "I am very glad to attend this conference for the first time, and for me this is a new interesting experience - answering questions. I think my plan was a success. Although I did not answer the questions that you had in a way that was familiar to you, I opened the eyes of people who will watch this to the difference between understanding the physical processes in your world and in the Interstellar Union. This is especially important during the voting period for the provision of physical evidence; if the Interstellar Union nevertheless decides to provide it in any form, this will indicate that mass contact will be significantly closer in time. The changes that will begin in society after this evidence, the discussion of the laws of the Interstellar Union and the desire or reluctance to join it will cause changes in society that will significantly accelerate this event. Upon mass contact and entry into the Interstellar Union, when your Government and you decide that you are ready, and prove it by your actions by removing destructive phenomena from your society that prevent you from being with us in the same community of civilizations, then you will come into contact with ours scientists. This

will reveal the gap between your worldview and ours.

Our understanding of the world comes from understanding spiritual processes through fine-material worlds and dense-material forms; in your case, spiritual and subtle-material processes are considered as phenomena generated by the human brain, which have no fundamental significance for space. So, in the event of mass contact, both you and we will have to learn to interact with each other. This will be a very useful and joint experience for us.

1:36:44 Travel to Mercury.

Irina: I sat down, took hold of the semicircular arms that were on the sides of the chair, and my body rose a little. I felt unpleasant, a little nauseous, and had some kind of unpleasant inner feeling. To get away from this, I asked Kirchiton: “How can your ship fly so fast?” He says: “We have a gravitational engine, and it can move instantly, and these few seconds that we flew to Daraal were needed to move away from planet Earth and approach Daraal.”

“What is a gravity drive?” He said that this is the energy of the gravitational quantum with the help of which jumps are carried out. He didn’t tell me the details, he just said that gravitons have a speed greater than light, and when the engines turn on, the speed increases even more, and energy appears that seems to throw the ship.

Then the weightlessness ended, and Kirchiton said: “Stand in the middle of the room.” I walked over, stood in the middle, and then two halves of a flexible suit dropped from the ceiling. It was strong but flexible, as if made of rubber, but it was harder than that. Two halves came down from the ceiling: one was the front, the other was the back, and right on top of me they connected like a shell. This suit fit tightly around the entire body, and in front of the face at eye level there was a transparent rectangular window.

I looked at Kirchiton, he was also in the same suit, only mine was white, and his was black, shiny, like patent leather boots, and he also had a transparent window in front of his eyes. He said: “Let's go!” The plate stood on the surface, he says: “This is the planet Mercury!” When we came out, I raised my head up and was dumbfounded: I saw the white Sun, which was five times larger than on Earth. The sky was dark purple. It was as if there were tongues of flame around the Sun,

and the most amazing thing: there were spots on it, but I didn't want to close my eyes from the light, I looked at it, and it didn't hurt my eyes. I saw that the spots on the Sun were slowly moving, as if the wind was blowing them away, and they were of some irregular shape. I looked at this Sunny and thought: "Wow, this is such a sweet and pleasant Sunny, but here is some unknown, threatening object." Kirchiton told me (I heard his voice as clearly as if I wasn't wearing a suit): "Look at the planet, and then I'll take you closer to the Sun, and you'll look at it."

I walked away from the plate a little and looked around. There was some kind of valley around us, there were a lot of stones there. I saw that the Sun was casting a very black shadow. The color of the soil on which I stood was grayish-brown with some kind of veins, and the stones looked like cobblestones. I looked around: the valley was large, only on the right, far enough away, some low mountains were visible, like hills, there was no vegetation on them. I walked over and picked up one of the stones, and it turned out to be quite heavy, even though the gravity was less. It was easy for me to move, but the stone was still heavy, I weighed it in my hand and threw it, it flew about fifteen meters. I was even surprised how I threw it so far.

1:43:27 Scheme of rational nutrition from MidgasKaus.

(Conference "Conversation with a dietitian about nutrition", December 29, 2020)

Irina: Hello, dear friends! My name is Irina Podzorova, I am a contactee with extraterrestrial civilizations. Today my curator, a representative of the planet Esler – MidgasCaus, is present with me. He is a biologist, psychologist and expert on alien life forms. Today Tatyana, who is a nutritionist, asks him questions. Hello Tatiana!

Tatyana : Good evening! I am a nutritionist and have been practicing nutrition for over ten years. It would be very interesting to talk, understand, and understand some issues regarding nutrition. It could be: products and their quality, additives that are currently used, genetically modified products affect and change the metabolism and level of hormones in the body at the level of the pituitary gland, i.e. from the periphery to the center, from the opposite, i.e. not from the Higher Self and Spirit - the root cause and path to obesity?

Irina: For Eslerites and special earthlings, the main rule is: eat what is pleasant, what you want to eat from what you have. In general, again adhere to a scheme where 70% plant foods, which includes what you call cereals, nuts, fruits and vegetables. 30% are animal products, but the expression “animal products” does not only mean meat. Animal products other than meat include: dairy products, eggs, fish. So, for a complete, varied diet, of these 30% of animal products, 15% are dairy products, and the remaining 15%: 5% each for eggs, fish and meat. The percentage of the diet of meat and meat products is no more than 5%.

1:46:07 Climate on Mercury. Flight to the Sun.

Irina: Kirchiton stayed by the stairs, and I moved away a little. He told me, and I listened. He said that on the sunny side of Mercury there is a high temperature - about 500 degrees, and on the night side the temperature drops very low, that there are very long days and long nights. A year on Mercury is about 3 of our months because it revolves around the Sun very quickly. He also said that in craters, in depressions and pits, there are even places where dry ice made from carbon dioxide lies, there are depressions where it does not melt even on the sunny side - the sun’s rays simply do not penetrate there.

I was surprised. How interesting it all is! He told me that Mercury has an atmosphere. Thin, but there is, by the way, there is oxygen, but only a few percent. There is a magnetic field there, it is smaller than the earth's. Then we went back up to the plate, I wanted to sit down, but he said: “Stand in the middle of the room.” When I stood up, the suit I was wearing separated again into two halves, which rose on their own, the ceiling parted for a moment, and they went there. The ceiling closed. And the suit came off on its own from Kirchiton.

After that, I wanted to sit on a chair, and he said: “No, come to the window.” Next to him near the window there was a black table on which there were some buttons with switches and lights. He began to press something, and suddenly the floor disappeared from under my feet, and he remained standing. I started to tip over. He said: “Look out the window!” The round window was taller than me, but when I rose, my eyes were at its level. I leaned away while swimming, he took me by the back of my head with one hand and began to hold me. I saw that the Sun was approaching. It's like we're flying into it. I thought: “Where are we flying, are we about to melt there?”

The sun began to take up almost half the sky, the stars were not visible, because the light from it was very bright, it was just black space. I thought: “Where is he taking me?” Then - once, and the approach stopped. Continuing to hold me, he said: “This is your Sun!” I look at him, it doesn’t hurt my eyes. From this distance, the black sunspots seemed like holes dug into the depths, and there seemed to be some kind of whirlpool, tongues of fire were writhing and moving. He says: “This is your star, it is located at a distance of 150 million kilometers from the Earth, from here light flies to it for more than 8 minutes. This star is not the largest or hottest in this part of the Galaxy. But this is what allowed your planet to be so close to the Sun and still have life.”

Then he let me go, again began to press something, and I saw that the Sun was moving away, and I began to try to move myself in weightlessness: if I raised my arms, I started to lean back, I raised my legs, and I started to roll over. When I turned upside down, it seemed to me that I had not turned over, but that Kirchiton was standing on the ceiling. While driving, I started to feel dizzy. I stopped, covered my eyes with my hands, and my condition returned to normal. I felt that Kirchiton took me by the hand and turned my feet to the floor, gravity immediately appeared, and I stood up. He told me that I could go.

I said that I really enjoyed this trip to Mercury. He replied: “Okay. I’m looking forward to your next contact!” When he brought me to Earth after the third contact, I thanked him: “Thank you for the contact, for this flight!” He said: “You’re welcome! It’s my job to show contactees the Universe and tell all the secrets about it.”

1:53:06 Khmari-Turuor about the visit of Jesus Christ.

(Conference “Acquaintance with the civilization of Disaru, rescued from the planet Venus. Conversation with Jesus about polygamy”, November 13, 2020)

Irina: (Khmari-Turuor speaks) During my life on Disaru, which was more than 500 years old by earthly standards, I managed to visit his island together with the disciples of Jesus Christ and speak with him personally. This happened once, when I was 36 years old by earthly standards. I just recently completed the sixth cycle of training, and together with a tourist group I flew to Burkhad as the capital of our

Interstellar Brotherhood (shows an image of a tall young man in white trousers and a long white shirt getting out of the ship). I stepped onto the ground of Burkhad and immediately felt its special energy.

Then there were representatives of Burkhad, who determined by energy whether we could see Christ and speak with him. I was one of 15 elected from more than 60 representatives of Disaru. When I saw him, I was surprised that, despite many thousands of years, he was almost no different from me in appearance. I mean age. I was surprised by his look, which contained both the energy of youth and at the same time universal wisdom, which I had not met anywhere else. It was such an amazing combination that the first few minutes of the time given to me, everyone was given about an hour, but not in one day, but gradually everyone came (no less than an hour, maybe yours is about 40 minutes: I, when I am in the astral body , I'm not yet familiar with your measures of time), I just looked without looking up. Then he, having read from my fields what I wanted to ask, immediately began to give answers to my unspoken questions.

1:56:24 A relative of Irina Podzorova about contacts with aliens.

Irina: What an extension Sergei made!

Natalya, Irina's aunt: Come in, don't be scared. Why don't you come in?

Irina: Hello, my dear!

Natalya, Irina's aunt: Ira, how you have changed! Come on in!

Maxim: Hello!

Natalya, Irina's aunt: Ira happens to be my niece, my sister's daughter. She is a calm, balanced woman, she has been dating aliens for 12 years, as I know, because at that time she lived with me. I made contacts with aliens, flew into space with them, and always left at night, at twelve, and returned at one or half past one. If she didn't go during the summer, then they had an agreement: if there was no physical contact, then there would be mental contact, which was very difficult. Her body was shaking all over, she felt uncomfortable, there were even bruises on her body, her spine hurt. I endured all this,

watched, it was very difficult for me morally to look at it.

In the end, two years ago, during a mental contact, I decided to talk with this Kirchiton. When she was shaking, I said: “Aren’t you ashamed, you are such a civilized alien, flying through space, aren’t you ashamed to mock her like that, torment her, shake her? Is there any easier way to make contacts?” And after that, on the second day, a second alien appeared, to whom Kirchiton handed her over, and she began to communicate not with Kirchiton, but with Mead. He turned out to be kind, polite, and never physically tortured her like the previous one. He talked to her without shaking her at all. She simply closed her eyes and calmly talked to him, but she did not see us, did not feel us, she seemed to withdraw into herself during the conversation.

And then the diagnosis began. He could make a diagnosis even from a photograph to complete strangers, he was always accurate. This was very surprising to us. At first we didn’t believe it, but when he’s already delivered it to many people, then you can’t help but believe it! A person cannot make a diagnosis himself, for example, from St. Petersburg or from Moscow over the phone. It's funny, no one will believe it. When all this began to happen, we decided to clarify our diagnosis ourselves, he said everything for sure! These are the miracles that began to happen.

We are so slow in our development because we are not yet ready, we have not survived this stage in order to overcome our sins, evil and what we do. And only God knows how long this will last. Maybe it will happen for a hundred years, or maybe 20, it will happen quickly, or we will suffer for a millennium, maybe we will still be destroyed, there will be wars. But we are far from them!

2:02:05 Kirchiton’s handwritten message to earthlings.

Irina: In 2018, when I voluntarily returned to physical contacts with Kirchiton, for one of these contacts I took with me a blank sheet of paper and a black felt-tip pen in order to ask him to write a greeting to all earthlings in his own hand. At first he didn’t understand why this was needed and said: “I’ll just convey it in words.”

I assured him that this was not any evidence of contact. Nobody knows that it was he who wrote, but at the same time it will be a good

memory for me personally and for those who recognize these contacts and believe that it was he who wrote the wish to all earthlings with his own hand. He took a marker, but since he has a large hand, it was uncomfortable for him to hold the marker, and he said: “I know Russian letters, I studied them, but this is the third time in my life that I am writing in this language. I just didn't need it. Okay, whatever happens!”

He took a sheet that was too small for him. “The letters are unfamiliar to me, but I’ll try to fit this appeal.” And he wrote in block letters: “Hello, raise your face to the stars, we remember you, you are not alone.” I even asked him: “Why a face and not eyes? It’s customary for us to say: “Raise your eyes to the sky,” but he was surprised and said: “But it’s impossible to raise your eyes without raising your face.” I say: “And we usually say “eyes.” And he replies: “That’s because you have a neck, and automatically when you throw your head back and lift your face, you lift your eyes. That’s why you don’t mention this, because you’re already used to doing this, but with us, in order to look at the stars, since we don’t have a neck, we have to bow with our whole body, and that’s why it turns out that we say “raise your face.”

The meaning of this wish is to remind people that we are not alone in the Universe. When we look at the starry sky, we must understand that the same intelligent creatures live there as on Earth. In words, he also called on people to talk to their children about this, so that they would not perceive the Universe as a soulless mechanism created by someone unknown and for what purpose, but would perceive the Universe as filled with life, as one of the forms of Love.

“HELLO, LIFT YOUR FACE TO THE STARS, WE REMEMBER YOU, YOU ARE NOT ALONE.”

2:06:05 Time to publicize information from the Interstellar Union.

Irina: For many years I lived virtually alone with my contacts - there were few people I could tell about them. Of course, I could tell a lot of people about them. In the end, I told my mother about it, then a fairly large circle of people became aware of it. But just to talk about the contact, and share the information that I receive from them - there are few people I could talk to. But finally, the time has come to tell as many people as possible about this contact and the information of the Interstellar Union. This is what our spiritual mentors decided, who

sent me, my alien curators and many other people here during this incarnation. Why did I decide that this time had come now? I was given a sign: I met Maxim Rusan.

This man who did a lot for the development of the Cassiopeia Center, he actually created it. He helped me move to Voronezh and creates all the conditions for me to work and accept people according to the payment system according to my heart. He invested and continues to invest a lot of his energy, time, and material resources into the development of the Cassiopeia project, without which it is impossible to make any progress in our material world. And I am sincerely grateful to Maxim Rusan for his friendship, for understanding, patience, for everything he does for me and all of you, for all the people who watch these videos. And I want to say that if it weren't for Maxim, this project would not exist, and no one would have seen these videos. I couldn't do all this myself. It was because I met him that I realized that it was time to tell people about it, and he understood it.

2:08:34 Maxim Rusan about his meeting with Irina.

Maxim: My first acquaintance with Irina completely changed my whole life. I never thought or guessed that the world is so diverse, and that when I look at the stars, I look not just at the stars, but at individual planets, individual lives, individual Souls that live on these planets. Meeting Irina changed not only my life, but also the lives of many people in my life.

Why? Because the information that comes through Irina from our interstellar friends very strongly and dramatically makes me think and change not only me personally, but also many people who receive this information. And the most interesting thing: this information is very close to many, very close to the heart, because there is a feeling as if you have already heard this before, or you already know about it, but just forgot.

2:09:33 Ufologist Maxim Bronevsky about information from Irina Podzorova.

Maxim Bronevsky: I began to find out all the nuances from Irina: the structure of technical devices, principles of operation, we discussed this topic a lot, then corresponded. And the information that she

conveyed to me then confirmed that Irina has real contact with real beings, and not with some kind of energetic or subtle material, as is often the case, but with very real beings, just like us. That is, with those who move on technical devices and use technology in their arsenal. I was simply amazed by the technical data that she conveyed to me, that is, she conveyed what I already knew in principle from other sources.

2:10:26 Expansion of the Universe.

(Conference with ufologist Maxim Bronevsky. Part 6, May 1, 2020)

Maxim Bronevsky: We have Hubble's law, according to which our Universe is supposedly expanding. Is our Universe really expanding? If this is not so, then why do we observe from Earth a shift in the electromagnetic spectrum from different galaxies to the red side, that is, towards lower frequencies? According to the Doppler effect, this can be interpreted as galaxies moving away from each other.

Irina: It's interesting to me that this recession shows that our Galaxy is in the center. All the galaxies seem to be running away from you. In any case, this effect is due to the fact that not only the Universe is expanding. This is simply due to the cyclical nature of existence, as already mentioned. The time of existence of the dense-material Universe is cyclical, that is, the time of manifestation of matter in dense-material form changes. First, the dense material Universe appears, and then it passes again into the subtle material plane, into vibration and again into the Spiritual world. You observe the effect of this transition as the retreat of galaxies, displacement.

Maxim Bronevsky: Roughly speaking, what happens is a change in the vibrations of matter itself?

Irina: You can say so.

Maxim Bronevsky: The Universe is not expanding? Is everything fairly static?

Irina: As I already said, first from the Spiritual world it manifests itself in the form of a subtle material, as if unfolding.

Maxim Bronevsky: Does this process occur continuously? Yes? Unfolding, changing frequency characteristics, then folding back over billions of years.

Irina: You can say so. If you look from the point of view of the Spiritual world, it turns out that the energy that goes into creating first subtle worlds, and then dense forms of matter, flows continuously. We say: the energies of the Spiritual world support existence. But if you look at this not as a static process, but as a dynamic one, then we can say that it is continuously unfolding. And at the same time, one can say that it is collapsing, because in the Spiritual world, as I have already said, time does not exist. Therefore, if you look from there, this process occurs continuously in both directions.

2:13:37 Ufology and the Cassiopeia project.

Maxim Bronevsky: From that moment, Irina and I began to interact closely, in principle, I joined the "Cassiopeia" movement. We began to work closely, including in the ufological direction. And we still continue to do this successfully.

Maxim Rusan: In general, Irina is a very unique contactee, and I have never seen such a level of contact anywhere on this planet. I have read a fairly large amount of literature, but I have never seen such pure and multifaceted contact as Irina's anywhere. I communicated with a huge number of civilizations and learned that there are not only material, but also subtle civilizations. About the fact that the Spiritual World exists and how it works, so for me Irina is an absolutely unique person who made it possible to organize this entire "Cassiopeia" project!

2:14:38 Project "Cassiopeia" in the information space.

Voice-over: The Cassiopeia Project presents information about Irina Podzorova's contact with the Interstellar Union on all social networks and on the YouTube channel. Today, the organizing team includes more than 50 volunteers of various professions from many countries around the world.

Maxim: We have volunteers in Bali, Chicago, Germany, Italy, Spain, and all the volunteers do this with great Love. The information that

comes from Irina the contactee will be translated and transmitted in almost all languages of the world.

2:15:25 Cosmoenergetics in the Cassiopeia project.

Larisa: I was not surprised, I thought that it was as if I had known them for a long time. Contactors, yes, good contactees, and they began to tell who they were in contact with. Irina specifically told all this and her story. And I liked them so much that I couldn't tear myself away from them.

I decided to continue communicating with Ira, met MidgasCaus and our other alien friends. I really liked it, because such energy comes from them! It is impossible to generate such energies on Earth ourselves. I have been studying cosmic energy for many years, now there is progress in cosmic energy, I have many students, I compared these cosmic energies with earthly ones, they are completely different. This is a purer, brighter energy, a lot of Light, Love, sincerity, and it was no longer possible to break away from this sweet energy. I wanted to communicate, communicate and communicate, and I joined the Cassiopeia project and am happy, very willing to participate in it, and, in particular, I will teach cosmoenergetics. I will be glad if this helps someone. My experience, my knowledge will give someone this purity, Love, Light, joy in life, will help in solving some issues more radically, more positively. This is what attracts me, I will be happy to help Irina, I will be happy to continue communicating with our friends and grow myself and help others.

2:17:11 Conditions for planet Earth to join the Interstellar Union.

Voice-over: We all serve the same goal - the entry of the civilization of planet Earth into the Interstellar Union. Then we will be able to gain access to all the knowledge and technology of the Galactic Community of Races, knowledge that we so lack now.

To do this, we must fulfill a number of conditions, here are the main ones:

- absence of any military conflicts on the planet, at least for 5 years;

- official refusal in all countries from the death penalty;

- refusal of abortions, as they interrupt the planned incarnation of the Spirits;

- the desire of the overwhelming majority of the adult population to join the Interstellar Union, confirmed in a planetary referendum.

That's what all this contact with us is for, and why we made this film.

2:18:28 Centers for spiritual development and education “Cassiopeia”.

Maxim: At this time, for the Cassiopeia project, we have already built a small center in Voronezh itself along with a hostel for people to live and train everyone who will participate in our project. All this will be subject to donation - payment according to your heart. We also designed an International Center for Spiritual Development and Enlightenment on a hectare of land near Voronezh. It will be located in a gorgeous place: nearby there is a lake, a forest, and gorgeous views of the landscape. I think that it will be very convenient for many people to get from anywhere in the world to our Center, because just a 10-minute drive from the airport and you will be our guest.

Voice-over: There will be courses and classes that systematically convey knowledge about the whole picture of the Universe, which has already been passed on to us and continues to be passed on through Irina. If you wish, you can provide any possible assistance in the creation and development of our Center. And this is just the beginning!

2:20:09 Experiment on changing the characteristics of water.

(Conference in Anapa “Energy: sources, types, transformation. Prospects for the development of science.” Part 2, May 1, 2020)

Andrey: We have a proposal from Irina: there is a contactor that can charge water.

Irina: I can charge the water myself. I am a cosmoenergeticist. If you are interested, I can do it.

Andrey: We can supply water now.

Irina: First, measurements.

Andrey: We can now first take measurements for the water that I drank. It's from a bottle. We measure the pH of water, salts, charge. Two glasses with different water. Everything is recorded, everything that happened is recorded.

Irina: I need to get up. Charge both glasses?

Andrey: Yes, for the purity of the experiment.

Irina: Even the most interesting.

Maxim: And I'm interested.

Irina: One by one.

Maxim: Do you want to take turns or two at once? They are slightly different in energy. Give me two at once.

Irina: Okay.

Maxim: Through the matrix?

Irina: Yes. All. I did this according to the method that was shown to me.

Andrey: If you did these manipulations with water, then this and that water became just as structured. This is for everyone to understand.

Maxim: Alan Chumak did this. Are there any changes in the structure of the water?

Andrey: Yes. One glass was filled with water from the cooler, and this is water from a purchased bottle. Before the measurement, Ph was 8.4, after - 7.83. Salt was 0.68, then it became 0.83. The charge was 297, it became 305 - this is water from the cooler. In purchased water: Ph was 7.68, now it is 7.47. Salt was 0.63, now it is 0.75. The charge was - 318. It became - 306. If you can tell by the charge, this is not very

good water - for us, closer to zero, it’s better.

Irina: The water has become different.

Andrey: The salts changed in one direction, the charge changed in different directions.

Irina: Does it depend on the material?

Andrey: Maybe.

Irina: Something also comes from plastic.

Maxim: Has the indicator in the plastic cup fallen?

Andrey: No, in glass.

Irina: The cosmoenergetic teacher told me that it’s better to do it in glass.

Maxim : It turns out that the charge was transferred from the plastic to the water.

Andrey: Yes. The water behaved better in glass.

Maxim: But in plastic it’s worse.

Andrey: Only on charge. And in terms of salt and Ph - the same.

Irina: It's on charge.

Maxim: Interesting. Is this a big difference in performance?

Andrey: In such a short time, 0.2 is very interesting. This is a very serious change in Ph, and in salts - 20 and 30.

2:25:28 Irina Podzorova’s connection with the planet Esler.

Larisa : She records the information that is transmitted to her through the channel now, at the moment.

Maxim: The coordination group of the planet Esler transmits information via a telepathic channel. Irina has this opportunity: at any time turn on the stream, channel and ask any question, and the coordination group of the planet Esler always gives answers, and in an extended format.

Larisa: Online broadcast.

2:26:20 Aliens' proposal for the development of Earth's children.

Irina: Galaxy News.

"Hello, dear friends, earthlings! I am a representative of the planet Esler, and in my world I work as a social psychologist. I would like to focus your attention on the importance of teaching parents who have small children or are planning to have them, the correct upbringing of Souls in the Light of God. This is a primary task for the formation of a new society on Earth. I am ready to pass on lessons for parents on developing a correct worldview in their children.

Rule of Light: to build all life in the body according to the laws of true wisdom, which consists in the continuous radiation of the energy of life and Love into the surrounding space. This is the basis for building a new harmonious society, capable of freely entering the Interstellar Union. Training parents and the correct settings for incarnation of the Spirits who came through them into the material world is much more important than studying technical and material sciences. After all, this is the basis of the meaning of life for future generations and the basis for the safety of using all types of material and spiritual energies, from physical (electromagnetism and radiation) to the correct radiation of spiritual energies (through religion, magic or the power of one's own thoughts). I am ready to help you teach your parents the most important subject in their lives: introducing their offspring into the material world. KrousiAltas is a social psychologist and teacher of the planet Esler."

Maxim: Great.

Irina: Did you understand anything?

Maxim: Yes, I realized that they are ready to work, help us with our parents and give programs.

Irina: And the message itself, do you understand?

Maxim: Yes, cool! In general, of course, I understood.

Irina: What is it about?

Maxim: This is what, in principle, I know about. It's not that the children themselves are a new generation, but that what needs to be done here is precisely the education of the Spirit of children. So that the Spirit understands that it exists, and understands that there is that Light that we call the Spiritual world. And as soon as the child understands that there is not only a physical body, but also a Soul, accordingly, if parents explain to him how to properly exist due to the laws of not only the physical world, but also the Spiritual world, then we will get a new generation of children, which will reflect the reality in which we find ourselves.

Irina: That is, everything is clear to you.

Maxim: Yes!

Irina: True, I didn't quite understand the word "integrate yourself," but he says that you will understand this word.

Maxim: To interact with the environment is to integrate yourself into this environment, learn to interact correctly and give feedback to the environment in which we find ourselves.

Larisa: Question: how to do this?

Irina: He says they are preparing some lessons.

Maxim: Take out your astral headphones and tell people how you listened to everything on headphones.

Irina: I was just taking notes.

Maxim: Printouts for the group. I will dictate all this in my voice and attach a sound file.

2:30:00 Contacting Irina and the entry of the Earth into the Interstellar Union.

Voice-over: During one of the live broadcasts with Irina, representatives of the Interstellar Union confirmed that her contact has already brought the Earth closer to joining this community, since we managed to convince many that aliens are not aggressive, as is often believed. Confirmation of our success was the appearance of another curator for Irina. He became Zaliatar, from the Pleiades constellation, who in the past was one of the mentors of Vangelia Gushterova, known as Vanga. Thanks to the special abilities of this alien, we have more opportunities to receive and transmit unique information, including about future events on our planet.

2:31:00 Increasing vibrations of the quantum field of planet Earth.

(Conference “Live broadcast of Zaliatar (planet Raom-Li, Pleiades)”, September 13, 2020)

Irina: From mid-September and approximately until your New Year there will be another abrupt increase in the vibrations of the quantum field of the planet’s space.

Maxim: Please decipher what it is?

Irina: Increasing vibration is a new stage of the quantum transition. This will entail an increase in the vibration of the planet’s space. Those people who do not correspond to these vibrations will find it difficult to survive this period both emotionally and even physically, because the space will be cleared of energies that are unusual for it.

I once again considered a future in which conflicts (including military ones) on Earth, natural disasters, and crime would increase. But I have considered this probable future for the present along probabilistic lines so that it does not materialize. Increasing the level of awareness of at least 55-60% of the adult population of the planet will change

energy vibrations and prevent the embodiment of this line of probability into matter.

Now I will translate it into earthly language. Turning your inner gaze to your own emotional, energetic problems and shortcomings, stopping attempts to somehow influence other individuals through violence (including emotional and moral). Only you yourself can increase your awareness by communicating with your Highest Spiritual Essence, recognizing the idea that what exists around you, the reality in which you live, was created by you yourself. The body you are incarnated in is a product of your consciousness, mind and emotions. The world where you are embodied is the total creation of all the Spirits that are embodied here. All political laws and attitudes are best for you at your stage of development. Coming to greater awareness is impossible without faith, Love, hope, happiness and gratitude for every day of life.

2:34:37 Number of civilizations in the Interstellar Union.

Voice-over: When we were preparing the premiere of our film, a message came through Irina Podzorova about the inclusion of the 117th civilization in the Interstellar Union. The 118th place is still vacant.

2:34:55 Vladimir Goldstein about Irina Podzorova.

Vladimir: Almost a year has passed since the non-random accident occurred. I met Irina and Maxim. Honestly, from the very beginning it was clear to me that this was not a falsification, not a hoax, I'm talking about Irina's contact. It was clear to me because I have a certain spiritual and professional experience. I would be able to figure it out if this were not so, but the doubt was different: what if there is some kind of force behind Irina that adapts to the light one, but in fact all this is a screen for something bad. I made three programs on Chicago multimedia radio with Irina and Maxim, but I kept trying to figure out the question that was tormenting me.

2:35:47 Irina Podzorova and the church. The effect of prayer on casting out demons.

(Conference "Contactor Irina Podzorova on the radio "New Wave Chicago", January 16, 2020)

Vladimir: Dear friends, my name is Vladimir Goldstein, and we are now starting a program on the air, which many are expecting, it is called: “The meeting place is planet Earth,” and we again meet with Irina Podzorova - a contactee from Voronezh, with Maxim Rusan - the leader Center for Spiritual Development, they are located in Voronezh. Today, like last time, we have guests from the Interstellar Union, now I will tell you about this in a little more detail. Hello Irina! Hello, Maxim!

Irina: Hello!

Maxim: Hello!

Vladimir: We can hear you well. I know that many people are waiting for this program. The last one was a shock for many Chicago residents (who heard it), today, perhaps, they have already come to their senses from the shock, and therefore they have prepared questions. For those who don’t know, I’ll say it again: Irina has been a contactee with extraterrestrial civilizations for many years, this includes physical contact - she was on alien ships, and now both mental and astral contacts continue. That is, they come to her in subtle bodies. They are still next to you. Who exactly is in touch now?

Irina: Now next to me are MidgasKaus from the planet Esler and LiShioni from the planet Shimor, the same representatives of the Interstellar Union that were with us last time.

Vladimir: I’ll remind you the phone number for the live broadcast, and you can directly ask questions to MidgasCaus through Irina and receive answers from them.

Dear friends, we have something special today. Father Mikhail, a priest, a good friend of mine, who last time called us on the program, very much doubted and doubts that we are dealing, so to speak, with pure force. Or maybe we are dealing with evil spirits? Therefore, he convincingly asked Irina to read the Orthodox prayer for the exorcism of demons at the beginning. If I’m not mistaken, this is Psalm 50. Irina agreed, everything is prepared, I see that there is incense and a candle.

Irina, are you ready to say a prayer? In general, we must understand

what will happen next, and MidgasKaus, if it does not disappear like a demon, will comment on what is happening.

Maxim: The prayer is quite good. We decided to read it together.

Vladimir: Great! I think everyone will be happy, and, first of all, Father Mikhail, and I don't mind either. So please let's get started. This is a prayer to the Life-Giving Cross, you need to read and be baptized.

(Read Psalm 50)

Vladimir: Thank you! Once again I salute MidgasCaus. Question for him: can you comment on what is happening?

Irina: He says that he is already used to such checks, but not with him specifically, but with other aliens - his friends from the Interstellar Union. Many religious people perceive phenomena that they do not understand with caution; they believe that it may be from a dark force, so the instinct of self-preservation is triggered.

Vladimir: Does he think that this prayer itself has power? To what extent, from his point of view, does it work the way it should work - to cast out demons?

Irina: He said that it creates special vibrations of energy, from which dark Spirits who have low vibrations will not be able to be here and will move away, because it will cause them pain.

Vladimir: They are uncomfortable.

Irina: High vibrations will burn them.

2:41:23 The goal of the Cassiopeia project.

Vladimir: However, during this year, being the administrator of the "Cassiopeia" groups on various resources, online resources, believe me, nothing like this was found. This is not just a solid puzzle of information about everything, very well linked, without any contradictions, which is not on many other channels, it is truly a

flowing Light of Love towards us. Without fear, precisely Love, the Love of the Almighty! That is why I will continue to do everything possible so that, thanks to the Cassiopeia project and our development in general, we join the Interstellar Union of the Galaxy, although this is not an end in itself.

The goal is to raise our collective, spiritual vibrations of civilization so that we can do the main thing that MidgasKaus told me about when I asked him about it through Irina. You and I all live in the material world in order to realize and better understand the Love of the Creator, our One Creator, for us. This is, by and large, why our project exists, and we can realize its Love for us precisely and only in our material world. Let's move in this direction, I have no doubt that we will bring the time of joining the Interstellar Union closer, and then everything that happens, including this film, will not be in vain!

2:44:42 Preparation for physical contact with Kirchiton.

Irina: Thank you, dear TV viewers, for watching this film. I hope you learned a lot of interesting things.

And it’s time for me to go on another flight with Kirchiton. Maxim, please take the diary, I won’t need it there, I’ll write everything down later. And take the phone, I won’t need it either, because they turn it off anyway, since they don’t give physical evidence to earthlings. Bye everyone! See you!

Maxim: Say hello to Kirchiton!

Irina: Definitely!

2:45:19 Poem by Nikolai Papiants.

“Dozens, hundreds of times, leaders, rulers and pharaohs controlled the world on Earth

In the tombs of the great pyramids,

They keep their gods, earthly and extraterrestrial, silent,

Intergalactic Federation Councils.

Humanity will rise from darkness and become Light,

they will forget about you, three-dimensional world.

And for you, as for the Soul, you will find answers to all questions -

In the wonderful world of stars, galaxies and planets."

2:46:40 MidgasCause's appeal to earthlings.

Irina: My curator MidgasCaus from the planet Esler has just come to me. He wants to address you, dear TV viewers, with his wishes and express his opinion about our group “Cassiopeia”.

(MidgasKaus) I am very pleased with this reaction of the earthly public to the activities of contactees and, in particular, my contactee - Irina Podzorova. I myself will do everything to help earthly people in their needs. I do this with the goal that in the Soul of each of you the Light of Love will light up, which allows us all to be happy. This is the only way you can achieve the prosperity of your civilization, because without a feeling of happiness, Love, harmony in the Soul, nothing material will please you. No matter how many acquisitions you make in the material world, if you are in a quarrel with your neighbor or in a state of disunity with God, it will not please you and will not give meaning to your life. My personal goal (as the curator of Irina and many other contactees) is the same as the goal of any Interstellar Union specialist in contacts with your planet - for you, dear friends, our earthly brothers, to realize our unity in the infinite Light of our common Father God and Creator the entire Universe.

December 21, 2020

Participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan – head of the Cassiopeia project;

Vladimir Goldstein is a journalist for Russian-language media in Chicago (USA), administrator of the Cassiopeia project;

Maria Sokalskaya – administrator of the Cassiopeia project;

Maxim Bronevsky – ufologist of the Cassiopeia group;

Larisa Terpugova – Master of Cosmoenergetics;

Larisa is a member of the Cassiopeia team;

Natalya – Irina's aunt;

Katya Lel – singer;

Sofia Blank - doctor, researcher of plasma fields of humans, plants and stones based on Kirlianography;

Tatyana Tsvilenko – nutritionist at the medical center (Dnepr, Ukraine);

Andrey is a representative of the Alt Energy company;

Vladimir Maslakov - voice-over;

Nikolai Papiyants – author of the poem (Vilnius, Lithuania);

Kirchiton is a representative of the planet Daraal, a specialist in contacts with representatives of other civilizations, a researcher of new planets;

MidgasKaus - representative of the planet Esler, biologist, xenobiologist, psychologist, microbiologist, specialist in alien life forms;

PiosNior - representative of the planet Esler, art critic, psychologist, specialist in the transmission of sound vibrations of purification and harmonization of space;

Raom Tiyan - representative of the planet Burhad, a specialist in energy interactions in the environment of the material world;

Khmari-Turuor - representative of the planet Disaru, nephew and student of Saint-Germain, works in the administration of the city of Tollirio;

Sen Titus - representative of the planet Disnit, astrobiologist, specialist in contacts with galactic life forms;

Zaliatar is a representative of the planet Raom-Li (Pleiades), bioenergeticist, futurologist, astral healer, specialist in traveling to the Spiritual World and researching time lines;

KrousiAltas is a representative of the planet Esler, a social psychologist and teacher.

Video in text

May 25, 2023

#355 Live broadcast. Communication with the Spirit of Vanga.

---

https://www.youtube.com/watch?v=3fSGB9lYq6I

00:05 Introduction of participants.

Irina: Hello, dear friends! Good evening!

Maxim: Guys, hello everyone! I'm here nearby, I'll keep an eye on your questions.

We have a unique broadcast today. We have been waiting for feedback and this meeting for a long time. Until today they have not given it to us. There are probably some reasons for this. But today Irina practiced astral flights to the Ashtar ship, the practice of the Interstellar Union (links are under the video). Irina, tell me what

happened today?

Irina: Dear friends, hello! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today we have another live broadcast. On our air there is Zaliatar, the planet Raom-Li from the Pleiades star cluster. And today on our air there is a disembodied Spirit, who in his last life in the material world, in his last incarnation, was incarnated into a woman on Earth, whom we know as Vanga. She was Zaliathar's contactee. He was one of its curators. After leaving incarnation, she continues to meet and communicate with him in the Spiritual World.

Today, when I was at my next “Light Body” practice, I went out with everyone to the Astral and saw Zaliatar on Ashtar Sheran’s ship. He was already with her. We have agreed to meet live to talk about your questions.

When we were on the Ashtar ship, we discussed the situation on Earth of the next leap in the quantum transition, the associated increase in destructiveness on Earth, epidemics, as well as economic decline, and various cataclysms. She told me about the reasons that are visible from the Spiritual world.

Perhaps we'll start with the news? Shall we ask Zaliathar for news?

Maxim: People don’t know who Zaliatar is. Let us at least tell you a little about him. Why is he with Vanga?

Irina: This is a spiritual healer who lives in the Pleiades cluster. This is a humanoid. When Vanga was alive, he was one of her curators. He is also a specialist, as they say, by definition, in viewing the Time Tape, like our futurologist, a specialist who considers options for the future. He does not predict, does not guess, but simply says how likely the occurrence of a particular event is, and how it depends on the choice of each person.

03:42 Time Tape.

Maxim: What is the Time Tape, and how is it seen in space? Many people don't know about this.

Irina: The Time Tape is an image of time in the material world, which is visible from the Spiritual world. It is seen in the form of a tape on which the events of the past, present and all options for the future are displayed.

Perhaps you have heard the name “parallel worlds”, where one or another version of the future is fulfilled. This is in the Spiritual world. In the material world only one is fulfilled, but in the Spiritual world they are all visible at the same time. The most probable sequence of events is visible as a wider flow of the Time Tape, the less probable - as a narrower flow. If you look at the Time Tape into the future, it is like a tree, with thicker and thinner branches. When you ask him: “Which option will materialize?” - he says: “It depends on the choice of each person.”

Maxim: The question now, perhaps, is for Zaliatar. If we look back into the past using the Time Tape, can we also see the multivariance of events? Or is what has already happened specifically seen as an option?

Irina: There you can see both the options that could have happened and the one that happened.

Maxim: How to determine which option is correct?

Irina: The one that actually happened?

Maxim: Yes, the one that really happened.

Irina: The one that was materialized. You tune in to this event with a request to see what really happened. But the point is that this viewing must be justified. In order not to watch the projection of your mind on this event, you need to have this admission for a reason why you are watching this event.

Maxim: They write that our screen is dirty. Guys, we see a good, clean image on our screen. Most likely, YouTube has reduced the quality of live broadcasts. If your screen is dirty and blurry, this is YouTube transmitting what I see on my screen. Here I see everything is fine, everything is fine. So let's continue further.

Let's start with galactic news, let's not change traditions. I would like to hear from Zaliathar some of the latest, most interesting things over the past week in Earth time.

06:41 Gihor and the Galactic Federation of Light.

Irina: (Zaliatar speaks) I welcome everyone. Since I belong to a planet that belongs to the Galactic Federation of Light, but I live as a hermit and do not particularly follow the news of the Galaxy, I will report the news that my students told me. News that is now being talked about in the Galactic Federation of Light.

The planet Gihor and its five colonies are now joining the Galactic Federation of Light (GFL). Since the end of last month, Ashtar Sheran's fleet has now been part of one of the Interstellar Union (IU) divisions for the security of the Galaxy. He is the Galaxy Security Service of the Interstellar Union. They united. The Gihors and their five colonies, which are the founders of cosmic energy, together form part of the Galactic Federation of Light. Now it will be a civilization that is part of both the Interstellar Union and the Galactic Federation of Light.

This is a major collection of civilizations because they have their own discoveries. Gikhor is now part of both the MS and the State Fiscal Service. We can say that in 7-10 days he will be in the Galactic Federation of Light. And he naturally leaves his participation in the Interstellar Union. This is another major step towards the unification of two galactic structures into one political-economic system, which will be based on both the union of dense-material civilizations and the union of fine-material civilizations. Its motto will be the ability to negotiate and seek compromise between different ideas about the same issues.

Maxim: Dear friends, I already see your questions.

Irina: Good question about Ashtar.

Maxim: Wait about Ashtar. Ashtar is not our guest now. Let's talk about him when he comes.

Irina: Let's talk about Vanga.

Maxim: You can ask absolutely any questions to Vangelia. She is next to us. We were finally allowed contact with her, allowed to pass on information.

10:18 Vanga about vision loss.

Maxim: Here's the first question: "How did Vanga lose her sight? What real life situation happened to Vanga when she lost her sight?"

Irina: (Spirit of Vanga) This was provided for by my life program precisely in childhood, so that the loss of vision of the physical world would not cause great damage to my Soul, psyche. Physical vision, according to my life program, should not have distracted me from the vision of the Spiritual world. (This is her mission of embodiment).

I unknowingly went to this place where there was a tornado, a hurricane. But it was not just a tornado, a hurricane. Like any other, it was caused by the Spirits of Nature; it is they who cause such cataclysms and phenomena. During this tornado I came into contact with them.

That is why it wasn't just sand that got into her eyes, there was also damage to the optic nerve, which then could not recover so that she could not see physically, but in the Spirit. This was her training to see without the help of her eyes.

I didn't realize it then, but I realized it later.

Maxim: Do I understand correctly, then, when this happened, you did not understand that there was contact?

Irina: I didn't understand when this happened. I understood later.

Maxim: Did you know that aliens exist and are your curators? Have you seen them, felt them nearby?

Irina: Yes, I talked about it, I told people.

Maxim: Did you talk about this?

Irina: I knew that they were from another planet. Knew Zaliatar and many others.

13:20 Vanga about his capabilities.

Maxim: Why did you need, say, sugar from a person to tell a story about his future? What kind of tradition is this? How did this sugar affect the transfer of information?

Irina: This was not always the case. I could feel the aura, like the Soul, the energy of a person, just by touching him. But there was a time when I felt strength, energy, through crystalline substances. My supervisors taught me this. I had curators from the Spiritual World, not just aliens. I had several Archangel curators. For example, Archangel Raphael was one of my supervisors. He taught me to feel information through touching substances that remember the Soul or energy of the one who held them. When a person brought me a piece of sugar, he kept it near him the whole way, thought about his problem, and this charged the sugar.

Maxim: Sugar is needed to remove information.

Irina: This is an information transmitter. He thought all the way, and then served it to me, and the sugar had already absorbed everything like an atmosphere.

15:05 Spirit in the Spiritual World.

Maxim: I see. Vanga, the question is: what do you look like now in the Spiritual World?

Irina: I can change images. Now my natural form (like any Soul, any intelligent Spirit, if it does not take the form of a past body, for example, the human body that it left) is a ball glowing with white light. This is not a plasmoid, but a spiritual being. I can be in this shape. But I can take the form of a human silhouette: a white silhouette, like an Angel. I can take on the form, the image of the body in which I lived.

15:55 Vanga and contactees on Earth. Vanga Spirit Level.

Maxim: Don't you miss our Earth?

Irina: No, I don’t miss it, I continue to communicate with people, I also have contacts, I come to them.

Maxim: Tell me, please, when you come, how do they perceive you? Like Vangelia or something else?

Irina: Those who know me, study my teachings, knew me personally - my friends, their relatives, children, descendants, perceive me as me, my image. If they didn’t know me personally, but they are in contact with the Spiritual world, they perceive me as an Angel. They don’t know my energy personally.

Maxim: Do you have contactees who do not perceive your energy, but feel as if an Angel has come from the Spiritual world?

Irina: Yes, they see me as an Angel.

Maxim: At what spiritual level are you now? According to the Interstellar Union.

Irina: According to the Interstellar Union, I am now at level twenty.

Maxim: On the twentieth or on the twenty-second?

Irina: (Zaliatar speaks) On the twenty-second. It has a slightly different terminology, it does not use it like the Interstellar Union. They have slightly different scales there with the Galactic Federation of Light.

Maxim: Vanga, this is a really very interesting question: do you have a successor on Earth? I heard that you have a successor, the one to whom you transferred your knowledge, talents, skills or something else.

Irina: This is not a successor, these are contactees with whom she communicates.

(Spirit of Vanga) There is no one personality.

18:20 Vanga about the savior of Russia.

Maxim: Here’s a question: when you talked about Vladimir, who will come to us in Russia, who were you talking about? Who did you see in this image of Vladimir, who will come and save Russia?

Irina: I was not shown a specific image. I talked about the name that came to me. I perceived it as a symbol of “owning the world,” “the one who will own the world.” In the sense of having peace in your Soul and carrying it (a specific image of a person does not give it).

Maxim: Then I will have a specific question: the ruler we have now, isn’t this Vladimir in Russia?

Irina: Who was I talking about? At the moment when I received this version of the future, I did not see the image of him or anyone else. I saw not an image, but the energy of a person who will be a ruler, but at the same time will keep peace in his Soul.

Maxim: You are now in the Spiritual World. Do we already have this person or is he still coming to us?

Irina: The one I was talking about?

Maxim: Yes. Is he already on Earth now, or is he not there yet?

Irina: Now he is already on Earth. The point is that this is not one person. According to the probability that came true, there are several of them. They're not all there. They will appear.

Maxim: Vladimir is not a specific name, Vladimir is the one who will rule the world, right?

Irina: This is a collective image of a ruler. This is not one person, there are several of them.

Maxim: They write: “Vanga is somehow evading the answer.”

Irina: When something is predicted, very often, if the predictor says a

name, for people it's just the name of the person. For the entity that conveys information, this is an image.

Maxim: How should I contact you? Vangelia, perhaps, or do you have some other spiritual name, perhaps?

Irina: Vanga, as people used to call her.

21:28 Vanga about the conflict with the Christian Church.

Maxim: I have a question then: you were building your church, accustoming people to the Orthodox egregor. Why do you think our Christian religious egregor did not recognize you? Matrona was recognized as a saint, but you were not recognized, why?

Irina: I was not recognized by the Christian religious egregor because I communicated with the Spirits of the dead and gave predictions for the future. This was perceived by the church at that time, and is still perceived now, as a departure from the canons.

This is impossible to do, because some principles of the Jewish religion were transferred to Christianity, something that is not prohibited there, for example, the practices that I performed when I received people and communicated. But I was not just a healer, like Matrona, who healed people, but I also communicated with the Spirits who came. She was, like Irina, a medium contactor. Previously, such people were called mediums, now the more modern name is contactee. Such people have never been recognized by the church, at least until now. There are certain texts that this practice contradicts. This is indeed true.

Maxim: If you talked about aliens, then the church recognizes aliens as demons.

Irina: Not even about aliens, but simply about the Spirits of the dead. I didn't openly talk about aliens, I told my relatives and close people, but even the fact that I talked, for example, a woman whose son recently died came to me. And as soon as she sat down to me, the Spirit of this son came and began to transmit information through me. And this was not recognized, that is, I should not have done this.

Frankly, in the church such communication was not regarded as communication with the Spirit of the son. It is believed that Spirits cannot come and speak through people. There are certain reasons why they think so, they are written down in the book of Leviticus, which belongs to the Bible, to the Old Testament.

I did not agree with this interpretation. There were other laws in what Christ and his Apostles said. And I did not violate these laws, Divine commandments. Christians must not observe the laws of the Jews, given before Christ. This is a different religion, so I am pure before Christ. Therefore, I went to the level of those Spirits, I won't name them now, they all have different numbers, levels. I simply select incarnations for those Spirits who come to me as a teacher.

25:36 Vanga about his death.

Maxim: The question is asked: "Vanga, people know that you died of cancer. You are a healer and contactee. Couldn't she really have avoided this fate?" What was it? Did you really have cancer?

Irina: Yes, I realized the spiritual reasons for my illness. Despite the fact that I was a medium and contactee-fortune teller, in my Soul, in my spiritual heart, there was not complete humility towards the path that my loved ones chose when this path was destroying their lives.

Maxim: Was there resentment, hatred, anger towards loved ones?

Irina: This is not acceptance of themselves, but of the evil that was in them due to a lack of understanding that they had the right to choose. There was no complete understanding. And I understand perfectly well that this was my lesson. At the end of my incarnation, I repented for these thoughts and feelings. But my body had already been destroyed by the destructive process that I had generated within myself with these thoughts. This repentance at the end cleansed my spiritual heart and allowed me to reach this level.

Leaving within this period of life is also provided for in my program. My life program even suggested leaving earlier, about 11 years. By the way, they didn't reveal my future to me. This cannot be done so as not to disrupt the implementation plan. When I came to the Spiritual World, they revealed to me that they had extended my incarnation by 11 years. I should have left earlier.

Maxim: Regarding the successor. She said she has no successors.

Irina: I'm not even her contactee.

Maxim: Irina is not her contactee, she is not her successor.

28:15 Vanga about "Cassiopeia".

Maxim: Vangelia, I have a question, people ask: you once said that people will soon come into contact with aliens. This is not my personal question, people ask: would the Cassiopeia project be some kind of step towards contact with extraterrestrial civilizations, what do you think?

Irina: Good question, thank you for it, dear friends. While this day that you lived was on Earth, in the Spiritual World Zaliatar introduced me to the egregor of "Cassiopeia". He showed me the curators of this egregor. I have already traveled in my spiritual body to the planet Burkhad. I was there during my lifetime, talking with my curators and specifically with the patrons of the egregor "Cassiopeia". Like lightning, everything I said about how the Earth would soon be in contact with aliens flashed through my memory. I said this for a reason, but my curators told me this. By the way, Archangel Gabriel told me this.

Maxim: Mirakh Count?

Irina: Yes, the one you call Mirakh Count. At that time I perceived him as Archangel Gabriel. I met him after leaving the incarnation. Today we met again, I visited him in Burkhad. I asked him about "Cassiopeia" and why he gave me such information about aliens.

He told me that this information was given, among other things, because the birth of Irina and Maxim, their path, was already visible in the Spiritual World. I did not know that. I was given their path, their contact and their opening of this topic to the world. Then I looked in the Time Tape at the likelihood of events associated with the egregor of "Cassiopeia".

I can see something that you yourself do not yet know. That other

people will come after you. Those Spirits who will develop this project in terms of contacts for the entire Earth have already incarnated.

Maxim: I wanted to say that I am sure that we are not alone. We are not the last who will position contacts with extraterrestrial civilizations. A lot of books have been written about this. This is evidenced by a very large number of contactees.

Our system is very difficult to comprehend what we are talking about. We decided on open contact, open perception, because we have Irina. She can transmit information through chips from the Spiritual world, from subtle worlds, from representatives of different galaxies. In principle, it is built for this. I am sure that there are many contactees on Earth who also transmit information at the level of their awareness.

Irina: Of course, there were contactees before me. I was also a contactee. I was in contact with Burkhad, and with the Pleiades, and with the Galactic Federation of Light, and with the Spiritual world. I also talked about this. I just didn't speak as openly as Irina, but I didn't hide it. I personally knew several other contactees. I had a girl I knew (shows a teenage girl) who also had contact with aliens. Indeed, there have always been quite a lot of such contactees or mediums, and now they exist, and in the future they will exist.

What is the difference between Irina, and you Maxim, and "Cassiopeia"? Because you came out to talk openly about this topic with people. This is the first. And second: you teach a person to consciously contact different entities that come. Zaliatar told me about this and Mirakh Count. You don't just help people by solving their problems, you teach them to solve their problems themselves.

Maxim: Thank you very much! You talked about the "five twos", about a specific date. Can you tell us in more detail what this date is and what these five twos are? Do you remember this?

Irina: We need a more specific question. There were many predictions, and to trigger a certain part of the memory, a more specific question is needed.

Maxim: Okay. I apologize, I personally do not have this information. I asked it the way I was asked.

Guys, we will definitely approach questions about what is happening on the planet now, let's call it "lockdown". I see your questions. I'll tell you a secret, Vanga came just to talk about this topic. Explain what is happening on a spiritual and material level. Don't worry, we will definitely touch on this topic, but a little later. Now I want to ask the questions you wrote.

34:45 Vanga's tasks on a spiritual level.

Maxim: What do you do in the Spiritual World?

Irina: First: I advise Spirits who want to incarnate not only on Earth, but also on other planets.

Second: I contact people, earthlings, like an Angel. I give them hints and answer their spiritual questions about the Spiritual world. I no longer make predictions, because the future has many options. Now I have another task - to talk about spiritual things.

35:28 Vanga about the special services.

Maxim: Vangelia, is it true that the military and intelligence services were watching you?

Irina: Of course, it's true. They were watching to see if I would say something against the state. There were people who introduced themselves as prophets and began to lead people with them. They said that power is not from God, you don't need to obey it. And they justified these actions by saying that God told them so. Naturally, they thought about me, they even came and asked questions about this.

Maxim: I want to remind everyone that the Cassiopeia project respects our state. The rulers of our state are worthy of the people that exist. We have no plans to be destructive, to get involved in politics or financial egregors. Our task is to transmit information from the point of view of love, from the point of view of awareness, for people to understand their spiritual nature. The Cassiopeia project does not have any curators from the West, from the East, from anywhere. The Cassiopeia project exists as a project that was formed in Russia. The project has no desire to engage in any nonsense, to carry any information that could interfere with the development of our

statehood or anything else.

Maxim: “Why did Vanga love Russia so much?”

Irina: I had love for all people. I never said that I love Russia specifically. I treated all people from any country with the same love. And from my own country, and from Russia, from Ukraine, and from others.

37:41 Vanga about his predictions.

Maxim: They ask: “Vanga, did you say that in 2050 Muslims will rule the world?”

Irina: When you come out of incarnation (I went through the experience of coming out of incarnation and connecting with my Spirit, with that disembodied part that I had in the Spiritual world), the personality (what is in the body, the incarnated part) merges with the Spirit. My memory connected with the memory of this Spirit. When they connect, there is access to all lives in general. For each specific prediction, you need to somehow strain to remember, because my memory is much more extensive than one incarnation.

You just said specifically about Muslims that in this earthly life I predicted that they would rule. Now I direct my consciousness to this area of \u200b\u200bmemory about Muslims. I want to say that from the Spiritual world everything is seen differently. In short, I am not the one you knew on Earth. I am already a whole Spirit, a disembodied part.

I can say that I can see from here that this was one of the probable events with a probability of occurring by 2050. Now, specifically in 2021, which is on Earth, no more than 30-32% of execution.

Maxim: They write: “Everything is clear, FSB office.”

Irina: Who wrote this?

Maxim: Guys, I'm interested. They look at us sometimes, what do they think about this? I know for sure that they are watching us. We are under surveillance. Let's probably ask them this question. What do

they think about us? I think they think completely differently.

40:02 Vanga about the quantum transition on Earth in 2020-2024.

Maxim: Vangelia, you said that a large number of people will die from diseases. Only people who are pure in soul, those who are pure in soul and heart, will survive. When it will be?

Irina: I talked about this with Irina today on the ship of Ashtar Sheran in relation to the events that are happening now. I came just to say this.

Maxim: We cannot say this word on YouTube, but now we are talking about the lockdown that was initiated by a certain bacterium.

“Soon a black funnel will drive up to the house...” Well, guys, let the “black funnel” drive up. What problems? I am always open and very easy to find. If I am somehow destructive, then I must definitely be punished for it, as the leader of the entire project. Therefore, I am not worried, I am not afraid, my conscience is absolutely clear. I know that we are not being destructive in any way. Our project was created for Love, for happiness, for joy, for people’s conscious perception of the Spiritual world and subtle civilizations. Do not worry. I think that if a “funnel” arrives, I will gladly sit in it, we will get there and talk. I would like to hear what kind of destructiveness I bring into this world with my project.

Yes, they really are watching. We are not going to carry out any provocations. I will openly say right away that there will never be any provocations in the Cassiopeia project. Our project was created for Love, I repeat again, for awareness, for perception and for working with psychology, which is very tied to esotericism. With our project we are trying to combine psychology and esotericism. We are not going to carry out any subversive activities against our state, against our Government. Let them watch. We are not doing anything bad and are not going to do anything in this life. And for everything that is said and done in the Cassiopeia project, for absolutely any actions, the leader in the form of me will be responsible. Don't worry or worry.

Irina: So, the question was specifically about deaths from the disease, right?

Maxim: Yes. Exactly. She said that diseases would begin, people would begin to die. Only those who are pure in Soul will remain alive. What did you mean when you said that?

Irina: I meant exactly what is happening in your world now, at this time, in this stream of time. This is one of the phases of obligatory events that are revealed during the transition to another level of awareness of the entire civilization. You call this the “quantum transition”. A very accurate name. Quanta raise their vibrations and move to another level. The physical body itself and all the physical nature surrounding it remain physical, but at a different level of vibration. The body cannot move alone without the nature surrounding it, because it is part of nature.

I looked at the probabilities of events from my life, when I was incarnated on Earth. I saw just the probability of events when people die from epidemics, from hunger, from wars with each other, from civil wars, unrest. This was visible from the Spiritual world. Now this is partially beginning to materialize. Therefore, I, together with Zaliatar, came to Irina and told her about this. Now I'll tell you what's happening.

One of the active phases of the quantum transition has now begun, as the Mother of God told you about through Irina on October 14. All contradictions on Earth have intensified. All disasters, epidemics, and so on are a sign that your civilization is not learning a spiritual lesson. And there is only one Spiritual lesson - the development of Love and tolerance for oneself, for all people.

And that disease, that microorganism that is now tormenting many earthlings, Zaliatar explained to me in scientific language what this microorganism is, I saw on a spiritual level, its mutations. He explained to me what mutations are. I want to say that the mutations that occur in this microorganism are only a consequence of the negative energies that emanate from your Souls. Condemnation, fear, anger, distrust of yourself, distrust of God, the world, etc.

Your scientists would have received the answer long ago as to what medicine to defeat this disease; this remedy exists. But the Spiritual world does not allow them to give this answer. Receiving an answer will not allow you to go through this lesson yourself, to unite with each other with your high pure vibrations in this situation for the

people when they are in distress. And defeat this disease ourselves.

In the Time Tape it is clear that by the new year 2024, those Spirits who could not remove the blocks from their Souls, negative beliefs that prevent them from remaining in the new reality that will be after 2024, will leave their incarnation. This is a quantum transition. And this virus, microorganism, and many diseases in general, including cancer, are a symbol of the fact that a person (if many people are sick, then the whole civilization) has a low level of awareness of reality.

Maxim: I'll say it again about our supervision. If you are interested, you better ask the structures you are writing about. I don't know them.

Vanga, please tell me, what recommendations would you give on how to correctly go through this quantum transition from your point of view?

Irina: Unite. If your people experience disasters, cataclysms of any kind, many people die, millions of people suffer, then the only advice during this period is to unite against what causes this condition.

Specifically, on Earth you have a very pressing issue right now with an epidemic of a certain disease. It has caused economic decline, in some areas of the Earth this is leading to famine and unrest. This is an even greater decrease in the vibrations of the Earth. Now the task of all earthlings is to unite in order to survive and continue the development of their civilization.

What do I need to do? The main danger is that the infectious origin of this disease is constantly changing, you call it mutations. To stop this, it is necessary for every conscious person on Earth to do everything possible to stop the variability of this infectious agent. Its variability on the physical plane, its mutations are only a reflection of hatred, anger and fear in the earthlings themselves, which they throw into the noosphere. From this, the microorganism begins to change, begins to adapt to you. You yourself give him strength.

What needs to be done? It is necessary to forgive, firstly, yourself, your neighbors, everyone who has offended you, be it your boss or your rulers, forgive everyone. Send the Light of Love to everyone. Forgive yourself for all negative feelings.

Now society is divided into those who are in favor of some measure to combat this disease, and those who are against it. This additionally breeds hatred and generates controversy.

Maxim: Those who did it and those who didn't?

Irina: And not only that. Various measures that are applied: restrictions and so on. Some are for them, while others are against them. This also generates a large tornado of negative energies in the noosphere. To stop this, everyone must work on their Soul. Stop judging someone for your troubles, turn to yourself, look into your Soul. Spend this time to dissolve blocks, remove all obstacles that limit beliefs for communication with God, with your, you call "superconsciousness", "Spiritual Self", you call "Higher Self". I understand your terminology through the contactee, through Irina. Do everything in your power, on a physical level and on a spiritual level, to stop these mutations. The faster you stop them, the faster your politics and your economy will be restored, the faster you can live harmoniously, calmly, without any shocks.

Maxim: I read the comment and remember how we were on Malakhov's program. To a question like: "What is the reason, how to defeat this virus?" We started saying that these are spiritual reasons. They told us: "You're talking nonsense, what are the spiritual reasons?"

Irina: Now I'll explain to them. For a spiritual essence, dear friends (I say this, Irina), there are no other reasons other than spiritual ones. The physical world, where you and I are, is for them a temporary creation that comes from the Spiritual world.

Maxim: Irina, don't explain, don't, don't say anything. The more people are present on live broadcasts, the more negativity pours into these live broadcasts. People sometimes don't want to hear or see, they want to see only themselves and hear only themselves. Let's continue.

Irina: You want specific answers. When will the virus stop? They told you it depends on us. But there is no concrete answer.

(Spirit of Vanga) I can't deceive you, because I am an Angel. If I now

say the date of the end of this epidemic or the date of something else, or I specifically say whether China will take over Russia, as you ask, it all depends on you. If I give a specific answer, “yes” or “no,” I will deceive you in both cases. If I deceive you, I will lower my vibrations, I will not do this.

54:35 Vanga about the effectiveness of his predictions.

Maxim: Vanga, how did you make predictions for people? How often have these predictions come true?

Irina: This was one of the options for the future. That is why not all predictions came true. According to my estimates, more than half came true, became reality. More than 50%, maybe 60-65%, and not everything is as accurate as I said, there were differences, which is not surprising. In other cases, reality followed a different scenario, along a different branch of the Time Tape. Now, as I already said, already in the Spiritual world, I have moved away from my mission of predictions. Now I tell people about spiritual laws.

Maxim: For now, answer the questions they ask. They are already telling me that I am asking the wrong questions.

Irina: Which ones? Now I'll ask it myself.

55:55 Vanga about people and countries after 2024.

Irina: “What will happen to the remaining alcoholics and murderers after the 24th year?”

Some low vibration people will be given the chance to live in a new world and raise their vibration. How much they use it is, of course, their choice.

Irina: “What awaits Belarus?”

Belarus expects “what a man sows, that he will also reap.” What all the inhabitants of Belarus are now sowing is what awaits her. If they sow Love and peace, then they will receive Love and peace from all states, from their Government. If they sow hostility and anger towards themselves, the ruler, God, then this is what they will receive.

Irina: “Who is in charge of Bulgaria? Does Vanga miss Bulgaria?”

Bulgaria has several curators. These are representatives of the plasmoid worlds and representatives of the Spiritual world. Specifically, the egregor of Bulgaria is supervised by eight Angels. The entire territory of Bulgaria is supervised by fourteen subtle beings, plasmoids, over different regions and regions of Bulgaria.

Do I miss Bulgaria? The word “boredom” can be understood in different ways. I have fond memories of this country, its people and the whole Earth. But I don’t have boredom as a negative feeling.

Such interesting questions, specific ones.

Maxim: We have two minutes left until the end of the broadcast. If you want us to extend the broadcast, please like it. This will indicate that you are interested in the broadcast and are interested in extending it. I look forward to your “likes”. We collect two thousand “likes” and extend the broadcast for another 15-20 minutes.

Irina: Three asked questions: the first – “What awaits Ukraine?”, the second – “What awaits Russia?”, and the third – “What awaits Moldova?”

(Spirit of Vanga) What awaits all these three countries is what we are creating ourselves now. It is impossible to give a specific answer to this question, because people in these countries are very different. We create different energies. Our countries are waiting for what the prevailing energies will bring. It depends only on us.

I wish that only prosperity, Light and Love await your countries, that everyone be happy. But it is impossible to make a person happy who blames everyone. Only he himself can do this when he stops doing it.

59:27 Vanga about working with complaints.

Maxim: One more question: please tell me how you managed to adequately and competently communicate with people who came to you with a bunch of complaints? At first they thought that they would find out the future, maybe something didn’t work out for them. How

did you work with such people? What did you tell them, what edifying advice did you give them?

Irina: If a person had any complaints against me, I saw the block in their Soul that generated this. I saw what words to answer each person so that he would pay attention to himself. For example, if he had complaints: “Why didn’t what you predicted for me come true?” - or: “Why didn’t you warn me about a bad event, you’re a clairvoyant, you communicate with Angels?” - I answered that by his action he made it impossible to fulfill the bright future that I predicted. He himself knows about this, but in order to shift the blame onto me, he came to tell me about it so as not to feel remorse.

Maxim: From the point of view of Mental Healing and psychology, everything is absolutely correct.

1:01:07 Future incarnations of Vanga.

Maxim: Please tell me, will you have any more incarnations on Earth? Do you plan to incarnate at all?

Irina: I don’t plan yet, I haven’t thought about it yet. In the future, of course, I will plan, I don’t know if it’s on Earth. Probably no.

Maxim: I see. Another question: “How to remove fluid from the body?” Vanga, please tell me, how do you, as a representative of the Spiritual world, feel about the introduction of “liquid” into the body? Irina, translate what I asked.

Irina: What is “slurry”?

Maxim: Can you convey information to her without speaking out loud?

Irina: Now I’ll tell her mentally, I’ll show her the image.

(Spirit of Vanga) Got it. Some kind of medicine?

Not really.

Maxim: This is from the virus that makes the quantum transition. We are now injecting “slurry” from this virus.

Irina: “Zhizha” is a liquid medicine?

Maxim: We cannot say these words on air.

Irina: Why introduce it?

Maxim: So that the immune system can cope with this virus on its own.

Irina: For the immune system to cope with this virus, does this liquid, medicine prevent the immune system from coping with this virus?

Maxim: I won’t ask such questions live.

Irina: She doesn’t know. While in the Spiritual world, medical issues and the physical body are far away for her.

Maxim: Vanga, please tell me, can you give us some kind of prediction now, say, for 2024? How many people will die on the planet?

I know this word, guys, you just can’t talk about this word live. Our broadcast will be completely blocked.

Irina : Let’s tell her this word now: “how to get it out?” This will confuse her even more. Of course, she lived in the twentieth century, in Bulgaria, and, naturally, she knows this word, because they used it too. Now she will be even more perplexed.

Maxim: How to neutralize the antiviral drug that is now being injected into us?

Irina : Why neutralize? What does it do?

Maxim: I don’t know, the person wants to neutralize. Irina and I did it, we are not going to neutralize it.

Irina : (Spirit of Vanga) If it is harmful to your health, you need to understand what kind of substance it is. I didn't study medicine, but if something is harming your physical health, you need to find out what it is. Each substance has its own antidotes. This can be done with herbs or medications, depending on what you have taken into yourself.

She thinks it's about some kind of toxic substance.

Maxim: I'll do it differently now (I turned off the sound for a while and spoke without going on air). Question: why neutralize the effect of this liquid? She does not understand.

Irina : Maxim and I injected this "liquid" into our bodies. The question does not arise to us: why should we neutralize it? I can't understand. Please, a more specific question, what do you want to neutralize in it?

Maxim: What you are talking about, all sorts of chips and everything else does not exist in it. Watch the previous broadcast. We gave the "goo" to our interstellar friends for study. They didn't find any nanochips or destructive things there. Believe other people if you want, or believe the false doctors who speak out. We convey to you the information that the Interstellar Union transmits to us. Believe it or not. If you want, call us an ambulance, as Dima wants. If you want, adjust the "black funnels". We will not say what does not exist, what we cannot tell you.

Irina: Dima, if you call an ambulance to take the contactee to a psychiatric hospital, you yourself need to look out the window.

Maxim: Irina, let's not react, these are haters.

Irina: I'm kidding. Imagine: you are a psychiatrist, they call you: "Pick up the contactee, he's live," what will you think?

1:06:53 Vanga about the likely population losses from coronavirus.

Maxim: How many people will die by 2024?

Irina: The most likely?

Maxim: What population losses will there be? Most likely.

Irina: She shows the number, I'll tell you what she says.

Maxim: Speak as she speaks.

Irina: 800 million.

Maxim: 800 million?

Irina: No. She showed me the zeros. From eight hundred thousand to eight million. Most likely.

Maxim: Precisely from this infection?

Irina: Yes.

1:07:58 Vanga about the world governance system and the tasks of incarnating rulers.

Maxim: Vangelia, do you think that the whole world on Earth is controlled by a certain number of people? And in general, who rules the world? How do you think?

Irina: Egregors. Political egregors. The world is ruled by their proteges, those whom they placed in physical positions.

Each egregor has its own hierarchical structure, which leads to the power of a ruler physically desired by them. Usually they are incarnated specifically for this purpose. The political egregor sends his Spirit for incarnation, I tell you, as a consultant. When the Spirit comes to incarnation, he says: "My purpose for incarnation is such and such." I look through his karmic activities and find out where he could incarnate. I offer him several options. One of the options, he says: "I was sent from the political egregor of such and such a country on such and such a planet (and not only on planet Earth) as the future ruler."

Then we consider whether he has any contraindications to rule due to his personal tasks, and to what extent his energy corresponds to the energy of the egregor. We are talking with him about the tasks that he

must solve during his reign for himself personally, for his family and for the territory where he rules. He must have three tasks - personal, social and tribal. We solve them.

Naturally, the ruler, like any of the people, of the embodied Spirits, may not follow the path of completing tasks. There are even Spirits who could not come to power, although they had such a task. They simply turned aside and did not complete it.

1:10:20 The influence of people on the virus.

Maxim: Are they asking for advice, recommendations on how to spiritually support Russia, how to get rid of this virus? “Unite” is a very general word for us. What specific actions should each person take? Not everyone, but every person in order to try to rid the world of this virus?

Irina: Make it impossible for him to mutate.

Maxim: Don’t project pain, resentment, hatred, anger and everything else?

Irina: Spiritually cleanse yourself, cleanse your spiritual heart in order to make it impossible for this virus to mutate if it suddenly gets into your body. The virus can have mutations in your body if it finds physical nutrition for itself, and the Soul of the virus finds energy nutrition, that is, there will be compatibility.

In order for it to stop functioning altogether, it is necessary to take actions that interrupt the transmission from one to another. It’s better to talk to doctors and physiologists. I told it from a spiritual point of view.

Maxim: Guys, if someone is preparing an expose of “Cassiopeia”, I will gladly accept them. It is desirable, with facts, for us to be definitely exposed, so that they understand that we are being destructive in some way, and it is imperative to explain why those who “expose us” are being “constructive.” Or at least some positive.

1:12:19 Vanga about mass contact with aliens.

Maxim: Vangelia, when will there be contact with extraterrestrial civilizations? Your predictions.

Irina: Do you mean open, mass?

Maxim: Yes, open, mass contacts. Not the same contact as now, but open, mass contact. There are many contactees, but there is no mass contact. They can't feel it, they can't touch it.

Irina: According to my estimates, if you go through the period of quantum transition with positive energy, with positive energy, if by 2024 the Earth's energy levels out, and your civilization has accumulated experience in solving the problems that you are solving now, then mass contact is possible in the next eighty years.

1:13:09 Vanga about the crisis on Earth and in Russia.

Maxim: Yes, not close. I wish I could live until that time. Will there be any serious financial crisis on the planet in the near future?

Irina: Serious, how serious is that?

Maxim: So that the economies of many countries collapse.

Irina: This is already happening now. There are already countries where famine has begun, people are already without work.

Maxim: Already? Will Russia survive this crisis or will it also fall?

Irina: There is a possibility that in Russia there will not be such a decline in the economy as, for example, in the south-eastern countries. But there is a possibility that there will be a great decline in the economy, and it will be necessary to restore it, as it was in the nineties.

Maxim: Guys, I'm not contradicting myself, but trying to ask your questions that you asked at the beginning of the broadcast. I have them written down. I'm trying to support you.

1:14:45 Vanga about the dangers of 5G towers.

Maxim: Last question: are 5G towers dangerous? I understand that now I asked you a very incorrect question in the Spiritual World.

Irina: They are not visible from there. (Spirit of Vanga) I understand what you mean. (Zaliatar quickly relayed our conversation about 5G to her.) Are 5G towers dangerous for what?

Maxim: For the human body, for its existence, for its vital activity, in order to live peacefully and not suffer from various diseases and much more.

Irina: No more than eating from the microwave or sitting in front of the computer. These are all the same waves, of the same nature.

1:15:45 Vanga's parting words to earthlings.

Maxim: I want to ask you, if you were now embodied on Earth, what parting words would you give to us, earthlings, on how to live further? What to do? I clearly understand that we are in a transition period. Many contactees say that we have almost four to six years left.

Irina: We, as a civilization?

Maxim: Four to six years, and there will be some kind of collapse, passions will begin here, faces.

Irina: There are chances of such events, but they are small. Those who talk about it simply see them.

Everyone sees in the Spiritual world what is closest to their heart. He is so tuned in, his spiritual heart is like that same 5G antenna, no matter how you configure it. An antenna that tunes to a specific channel of information associated with the likelihood of a particular scenario.

If they only see a negative scenario, it means there is a lot of negativity and fear in them. If they see only a positive scenario, there is only bright hope. If they see both, it means they take both sides into account.

Maxim: You have lived on Earth for a long time. What would you recommend to us, earthlings, seeing everything that is happening from spiritual reality? What should we do, how should we live further?

Irina: Dear friends, my brothers and sisters in the Spirit of the one Father who loves us all! I ask you to communicate more often with your conscience, with your spiritual heart, with your intuition and follow only bright goals. If you see or feel that trouble is happening to your neighbor, do not remain indifferent. Don't pass by. Do not reproach a person that he received this misfortune because of his sins. The one who does this will himself bear no less burden. Getting rid of a person's suffering is the path to getting rid of one's own spiritual suffering; this is a real manifestation of Love.

My recommendation, my advice: if you see that the fate of another person depends on you, or you have been asked for help in something, listen only to your heart. If your spiritual heart says one thing and your fears say another, always choose the path of the heart. If other people scare you with various events, exit from incarnation, always put Love first.

The goal of any Spirit when it comes into incarnation (including yours when you came into this incarnation) is not to preserve your life, your incarnation in any way, but to develop spiritually. Complete as many of your tasks as possible during this time. Your tasks on Earth are to develop in yourself Love, tolerance and patience for other people, other ideas, to develop faith, trust in God, in the Spiritual world and in yourself. I wish you all to walk this path in the power of God's Spirit and in the Light of His Love.

Maxim: Thank you, Vangelia! I thank Zaliathar for supporting the astral body of Vangelia, who is present here from the Spiritual World.

1:21:30 Vanga's unfulfilled wish on Earth.

Maxim: I still have one last question: do you have unfulfilled desires on this planet?

Irina: Yes.

Maxim: What is it?

Irina: When I lived with my husband, I wished that during his lifetime he would come to God, to the Light. This desire remained unfulfilled at that time in life.

Maxim: You couldn’t explain to your husband that the Spiritual World exists?

Irina: I explained, but he had his own way. By not understanding this path, by condemning it, I accumulated energy in myself that caused illness in me. When I came out of incarnation, I realized that, among other things, this was why this wish did not come true. To give me a lesson that only the Spirit itself decides what desires to fulfill, even if someone doesn’t like them.

Maxim : Thank you very much, Vangelia! Thank you, Zaliatar! I have another question for you: if we form a group of certain questions (they ask Vladimir Goldstein to formulate questions for you), can you come on some broadcast or on the record so that we can communicate and talk? Can Irina continue to contact you? Haven't you come once?

Irina: Of course, she can contact me. She has curators in the Spiritual World, I know them.

I want to express my request. If questions arise for me about my life (after all, I have already merged with my Spirit, and my memory has become more complete), in order to make it easier for me to find an answer to a question about some kind of prediction, ask them more specifically. What it was made about, specifically. Not just some twos or Muslims, or something else, but more specifically. It will be easier for me to answer it, and it will be easier for the contactee to translate it into words.

Maxim: Dear friends, write all questions to Vanga to Vladimir Golshtein. He is here, find him on social networks. Send him all your positivity, all your Love in these matters. I really want Volodya to compose these questions, and we go on air with specific questions. Today everything happened very spontaneously. At 14:00 we did the Interstellar Union practice - this is astral travel on a ship to Ashtar, links to this practice are under the video, you can find it, and not only under this.

Plus, I wanted to tell you some news. We are opening a project called

“Cassiopeia Tour”. We will talk about this interesting project in more detail later.

Thank you all very much for this live broadcast, for the questions you asked, for the constructive positivity and negativity that you carried on this broadcast.

Hugged everyone, goodbye everyone. Vanga, I hug you very tightly with all my spiritual heart, I tell you: “Thank you for finally coming to us!”

Irina: And I thank you!

October 17, 2021

Conference participants:

Irina Podzorova – contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

Zaliatar is a representative of the planet Raom-Li from the Pleiades star cluster, a specialist in healing practices, the study of the Spiritual world and the study of time lines along the Time Tape, bioenergeticist, futurologist, mentor of the Cassiopeia project, curator of Irina Podzorova;

The Spirit of Vanga is a disembodied Spirit, embodied on Earth by the Bulgarian soothsayer Vanga (Vangelia).

#363 Live broadcast. Communication with the Spirit of Vladimir Ilyich Lenin (Ulyanov). Answers on questions.

https://blog.cassiopeia.center/obshchenie-s-duhom-vladimira-ilicha-lenina

https://www.youtube.com/watch?v=kcOHtXdRFcA

00:08 Introduction of the participants.

Irina: Hello, dear friends! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Today I congratulate you on Revolution Day, November 7th. For many people, this is a holiday that existed for many decades on the territory of the USSR, it was celebrated and loved.

How can you hear us?

Maxim: Yes, how can you hear us? I welcome everyone! Today we have a very interesting representative from the fifth spiritual level. If you know, according to the theory of the Interstellar Union, there are 24 levels. Levels one through six are considered demonic levels. Our guest today is the Spirit who was embodied in the body of Vladimir Ilyich Lenin.

Irina: Our curators are present with us here: Raom Tiyan from the planet Burkhad, LiShioni from the planet Shimor and MidgasKaus from the planet Esler. All of them will help the Spirit of Vladimir Ilyich Lenin answer your questions through me. He now says that he did not communicate with a person after the death of the physical body. He was on the fifth level. Now our curators, with his consent, helped him come. He greets you all.

(Spirit of Lenin) I send you greetings to the 21st century.

At the beginning of the 20th century, he left his body and lives on the memories he has left. My supervisors will help both him and me tune

in to each other. He has never spoken consciously with a person, namely with a person embodied by the Spirit, so he will be tuned in.

So, he greets and says that he came to me because today is November 7th. This is the Day of the revolution that he organized. They also explained to him about the Cassiopeia project. He wants to answer questions on television, he considers the Internet to be television and came to answer questions. He believes that he is in a studio where they are filming answers to questions. He heard from other Spirits who came to him on the fifth level that there was television on Earth and they were filming programs.

Maxim: Irisha, you said that he didn't come to people. What about the channelings of other contactees who said they communicated with his Spirit?

Irina: He felt that he was called, but did not have the strength and ability to come. There were no curators who would bring him. (Spirit of Lenin) Therefore, if they communicated with someone, it is quite possible that these were some other disembodied Spirits similar to me, or, as you call them, subtle entities that took my image. I didn't have the strength or ability to get there and answer the questions. Now Irina's spiritual channel and I are being set up so that I can answer questions.

03:58 Spiritual level of the Spirit of Lenin.

Maxim: People write that many contactees and some people say that you are in hell, is this true?

Irina: (Spirit of Lenin) Compared to the level from which I incarnated (I remembered everything when I united with myself in the Spiritual World), this is truly hell. There is very little light and very little happiness.

Let me remind you that he incarnated from the 18th level.

Maxim: Oh! From the level of Guardian Angels?

Irina: Yes. And I got to the fifth. Strong reduction in vibrations for him.

04:49 Lenin about the results of his incarnation.

Maxim: They ask: Vladimir, are you satisfied with the results of your activities, the revolution?

Irina: (Spirit of Lenin) No. I had enough time to analyze my work and the tasks of incarnation on Earth. I didn't fulfill them, I ignored them, although I always felt them. But I did not believe in my conscience and drowned it out.

He is not happy with the results of his incarnation.

(Spirit of Lenin) I have not completed the task of my incarnation.

05:43 Lenin about the execution of the Romanov royal family.

Maxim: Tell me, please, did you give the order to execute the royal family?

Irina: (Spirit of Lenin) Yes, naturally, I did not want the uprising of the monarchists, their return and the overthrow of my system. Foreign interventionists could take advantage of these royal descendants and create a counter-revolution, even by their descendants: grandchildren, great-grandchildren.

Maxim: So it was necessary to shoot everyone, even the children?

Irina: (Spirit of Lenin) It was necessary to destroy this blood. She was royal, at that time they believed in it and gave it sacred significance. It was the blood of monarchs.

06:42 Lenin on financing the revolution.

Maxim: Tell me, please, where does the funding for all revolutionary actions come from? Who gave money, who helped revolutionary actions? It was impossible to do this without money.

Irina: (Spirit of Lenin) I had friends, comrades-in-arms, party members in other countries. I lived in Switzerland, I was also in the

UK, in Germany. There were several people from America (shows three people, an American flag, he communicates in both images and words, he has his own memories). They were rich people.

Why did they help me? Their interests were that when I came to power, I would carry out their will and carry out their policies. They didn't care whether I was bringing communism or something else. For example, for Germany. We agreed in a cafe in Munich that when I came to power, I would end Germany's war with Russia, although many in Russia were against this.

08:20 Lenin about the Federal Reserve Fund.

Maxim: Are your activities related to the Federal Reserve Fund? Is there a connection between the execution of the royal family and the Federal Reserve Service?

Irina: (Spirit of Lenin) This happened later, after we made the revolution. Before I and I could get to this royal fund, we had to come to power. It wasn't that easy. This required a lot of funds. There was a lot of need to hire agitators and distribute leaflets.

Maxim: Was there an idea to get to the tsar's money in the Federal Reserve Fund?

Irina: They automatically came to us when we established ourselves in Petrograd. We inherited them when we came to power. They took it from Kerensky, the Provisional Government.

09:29 Lenin's sex life.

Maxim: There is an opinion (of course, sorry for such frankness) that Krupskaya was a wife, but you did not have any carnal relations with her. This is true?

Irina: I did. Why didn't he? We lived with her as husband and wife.

Maxim: They say that you had sex with boys, is this true?

Irina: No, I despised such people. I've heard about them. I only had

relationships with women, although not with Nadya alone, I also had relationships with others. I cheated on her. It was abroad, in exile, when he escaped from the tsarist government and hid there.

Maxim: Thank you.

10:35 Lenin about the Mausoleum.

Maxim: They ask: how do you feel about the fact that your body lies in the Mausoleum?

Irina: Actually, I feel great about it. People remember me. The energy of honoring and worshiping me, which comes from people, helps me so that my flower of the Soul always remains open, so that I do not completely fall into despondency. If they bury my body, people will quickly forget about me. This is on the one hand. On the other hand, I understand what kind of memory I left for those who followed me and their descendants. But at the time I acted with the best intentions.

11:30 Lenin on the role of religions in the revolution.

Maxim: Tell me, please, why were orders given to destroy churches and destroy religion? What did they want to achieve with this?

Irina: Priests and priests destroyed us morally. They went against us, led the people to the king, returned them to the form of government that we fought against and overthrew. The clergy were one of the main drivers of the counter-revolution. And not only Orthodox, but from different religions. They all sanctified royal power, made it holy. She couldn't even be criticized. For this, they could be anathematized and cursed at the Synod.

Therefore, when we began to fight for the people, for their rights, so that the land belonged to those who work on it, and so that the factories belonged to the workers, naturally, the churchmen were the first to be against it. This destroyed their centuries-old way of life.

When we came to power, so that there would be no counter-revolution, we naturally solved problems in the simplest way. And not only I did this, they did it during the French Revolution, for example, with their priests. This is a known fact.

13:20 Attempt on V.I. Lenin.

Maxim: Please tell me, did they really shoot you with a poisoned bullet?

Irina: She was not poisoned. I carried it with me for many years. One of them was pulled out of me.

Maxim: How many bullets did you have?

Irina: Two.

Maxim: Why didn't they pull out the other one?

Irina: She was in a place where the carotid artery is close. The doctors were afraid that they would hurt it and I would die.

Maxim: It turns out that the bullet was not poisoned. Is it just that the lead that was in the pool began to slowly affect you?

Irina: Why such a question? I didn't die from a bullet.

Maxim: What caused the disease you suffered from at the end of your life?

Irina: I was in a lot of pain and dizzy. Then I suffered paralysis, recovered, took baths, and had a massage. The best doctors came and said that I work a lot, worry a lot and am nervous.

When, after the death of my body, I united with my Spirit and realized that I was immortal, I realized that all this was because I hated a lot. My brain vessels could not withstand this energy of hatred. At first I didn't understand that I myself had destroyed my body. The vessels ruptured.

15:22 Lenin and faith.

Maxim: People are wondering, did you really not believe in God and were a materialist?

Irina: Yes, of course. I was a materialist, but not always; as a child I believed in God.

Maxim: What stopped you from continuing to believe?

Irina: I remember well the time when I first doubted the existence of God. My father had a large library. I was about fourteen years old. I read a book about the abolition of serfdom in Russia. There was a historical chronicle, a story about events, about what serfdom was like. I read how unfair it was that those who deserved a better life, who did good, were the most humiliated. Those who humiliated them, on the contrary, were rich and went to church. God didn't even drive them out of there. If he had, he would not have let these people into the church after they beat a man to death with whips in the stables, and then went to church.

He means the owners of serfs, many of whom were believers, nobles.

(Spirit of Lenin) And I thought when I read that if God were in the church, he saw what the person came with, he would simply not let him there if he did not repent. And they walked and then repeated everything again. Then I realized that all this was fiction. The rest of my life only confirmed this. I saw so much cruelty, humiliation and injustice. I realized that our fate is in our hands, not in the hands of some God. If people hide behind God and commit injustice, then it is my job to correct it. I wanted all people to live happily. They did not destroy each other, did not exploit each other. I even thought that if there is a God, and he failed, then I will take his place and do it.

Maxim: Seriously.

18:31 Lenin and Krupskaya.

Maxim: They are interested: why didn't you marry Krupskaya?

Irina: We lived together, and that was enough for us. We didn't have to go through any formal rituals. We just loved each other. Neither she nor I needed it.

Maxim: Was there no other reason?

Irina: There was simply no need.

Maxim: They write that when you took a steam bath, you howled and screamed, did that really happen?

Irina: He is now searching in his memory. There is no positive answer. I don't remember this.

Maxim: I understand.

19:30 V.I. Lenin and Nicholas II.

Maxim: During your lifetime, did you meet Nicholas II personally?

Irina: No, we haven't met in person. After a failed attempt at revolution, I had to leave for another country. When the bourgeois revolution took place (the first revolution, when the Mensheviks and Socialist-Revolutionaries, the social revolutionaries whom you call Socialist-Revolutionaries, came to power), the Socialist-Revolutionaries took the tsar to Siberia.

When I came to power after the Socialist Revolutionaries, I took power, Nicholas II and his family were no longer in St. Petersburg. He was far away.

I personally saw him during speeches; he could go out into the square and speak to the people. I was in this crowd that listened to him. But we didn't communicate in person.

Maxim: You didn't know him personally, but you gave the order to shoot him.

Irina: But he was a monarch, and I overthrew the government. Even this issue was not discussed here. And Kerensky did not shoot him only because he was not a real revolutionary in Spirit. Why did he keep him in prison? What did he promise him?

Maxim: Have you met the Spirit of Nicholas II in the Spiritual World?

Irina: Yes. I met him several times in the Spiritual World. He came to

me.

Maxim: And what were you talking about?

Irina: We talked about a lot. He asked me how I felt about the results of my revolution, how I felt about Stalin, for example. He asked how I felt about his execution, whether I personally gave the order. He was higher level than me, came to me, came down.

Maxim: Did he come to talk?

Irina: His family also came to talk, his wife came.

22:14 Lenin about his children.

Maxim: Do you have any children left on planet Earth?

Irina: No, but I wanted children.

22:27 Lenin and Stalin.

Maxim: How do you feel about Stalin?

Irina: I have a rather positive attitude towards Stalin. He, of course, also made mistakes, like all of us. But in revolutionary activities he was a faithful revolutionary, and did not deviate from his principles after my death. As a revolutionary I approve. As a person, he is just like me. We communicated with him in the Spiritual world.

23:15 Lenin about the execution of his brother.

Maxim: Can the revolution be called revenge for your brother Alexander?

Irina: This is not revenge. Alexander's execution played only a small role in the revolution. Even before Alexander’s execution, I dreamed of overthrowing the tsarist regime. Not only that, my sisters wanted it too. They were also Marxists, our family was into this. When Alexander was executed, I was convinced that this had to be done.

Because the execution was unfair, his crimes were not proven. At that time I was already studying the laws.

24:12 Lenin and Trotsky.

Maxim: How do you feel about Trotsky? What do you think of him?

Irina: To Leo? Leon Trotsky? Leon Trotsky is a revolutionary. Together with him we captured Petrograd. We are almost on the same level with him. He is a level below me.

Maxim: Trotsky on the 4th level?

Irina: I don't know your gradations.

Maxim: I understand. Lower level.

Irina: He is one step below me. I treat him worse than Stalin, more negatively or with rejection. After my death, he brought discord into the communist society, did not listen to the true things that Stalin said about the nationalization of the revolution. He was of the opinion that we should leave Russia and carry out terrorist operations in other countries.

Maxim: For what?

Irina: To bring the proletariat to power there. This would have been impossible without terrorism. Who will give you power? Without executions and explosions of gendarmes in tsarist Russia, police stations in other countries, without contract killings of governors, for example, ministers of old Russia, this could not be achieved.

The best revolutionaries are always the best executioners, or those who knew how to find killers. Again, this required money if he could not do it himself. It is clear that no one would give us power voluntarily. This had to be taken in blood. Many revolutionaries died for their ideas. They were hanged or rotted in hard labor, in the mines. Some died on the way to hard labor. Some ran away, got lost and froze in the forests.

27:11 Lenin about violence in power.

Maxim: Now you are in the Spiritual World, how do you feel about the revolution? Is it necessary to achieve power through revolutionary means?

Irina: I realized that this only interferes with fulfilling my task, developing spiritually. I've dropped my level a lot. I remembered my life on the 18th level, when I came to the state of Spirit.

The first thing I realized when I left my body was that I was looking at him, but I was alive. Then two bright figures came. It turned out that these were Angels. They invited me to go with them. And when I remembered everything, I realized that I had wasted my life. Reduced, as you call it, energy vibrations in a large number of people. When I fought for the revolution, I didn't think about it. I thought I was destroying counter-revolutionary dogs.

Maxim: How would you act now if, say, you could incarnate again and do something differently?

Irina: This is exactly how I would act. If I had incarnated under the same conditions as then, I would have received the same information. I went exactly the same way.

I would still have everything blocked, even if I had incarnated and with my understanding that I have now. I know very well that during incarnation, memory is blocked. I remembered that I was also blocked before incarnation.

Maxim: Guys, he already answered the question about Lenin's homosexuality. He despised it.

Irina: He says that he was disgusted by this.

29:48 The task of implementing V.I. Lenin.

Maxim: What was your task of implementation?

Irina: I remember her well. My incarnation task was to develop my

business to protect the violated rights of people, to defend their rights. It was a matter for the defense. I was at the level of Guardian Angels. By the way, I was incarnated there after living not on Earth.

Maxim: Where were you incarnated?

Irina: I don't know what these creatures are called, in your opinion, now I'll show them to Irina.

He shows me a white Disney guy with black eyes.

(Spirit of Lenin) I don't know whether you think it's Disnit or not, but I was embodied in the body of this creature. It was there that I reached level 18. When I was there, I healed other beings, healed.

Maxim: Did you have contact when you were incarnated here, like Ulyanov-Lenin?

Irina: Unconsciously.

Maxim: Did you have contacts?

Irina: There were, but they were unconscious. They were with creatures that feed on anger and malice.

Maxim: With demons?

Irina: Yes, they are like demons, at the same time they are embodied in a thin shell.

31:52 Lenin about syphilis.

Maxim: They still ask, what disease did you die from? Have you had syphilis?

Irina: No, what kind of syphilis. I had sexual intercourse with Nadya, and she lived much longer than me. She was in poor health. She constantly went to doctors and took tests, including after my death. I felt her condition, we were very connected with her on a spiritual

level, although she was on a level higher than me. And nothing was ever found on her. If I were sick, I would give her this disease. I knew it existed, but if I was sick, I would have infected it. She constantly underwent tests and was treated by the best doctors in Germany, Austria, and Russia.

Maxim: I understand.

33:00 Lenin about family. Muses of Lenin.

Maxim: Please tell us who you loved most in your family? Or tell us about your relatives, maybe you didn't love someone, on the contrary?

Irina: (Spirit of Lenin) Maria, my mother.

He shows his childhood, his mother, she feeds him, he is four years old. He loved to sit in her arms.

(Spirit of Lenin) I was very attached to her as a child, I loved my sisters.

His greatest love was for the family into which he was born.

Maxim: They ask: do you remember your muse, Inessa Armand?

Irina: I remember that I also had a connection with her, as with a woman.

Maxim: Did this connection inspire you? Why did you call her your muse?

Irina: She, like Nadya (I also called her my muse), were close to me not only physically, but they carried the cause of the revolution and inspired me to continue it. When I was persecuted, and my party split into two (we, one might say, had a fight, and a smaller part of the socialists, Marxists, there was a Marxist circle) separated from us, Inessa and Nadezhda, as well as my sisters, still supported me, so they everyone was my muses.

When Kerensky and his gang came to power, instead of distributing

land to the peasants, they introduced a new economy, which further worsened the situation of the peasants. They began to starve, and the queues for bread lined up even longer than before the revolution. Kerensky and his people did not take any steps to really improve the affairs of the peasantry and the proletariat, the working people.

I have already said that it was a petty-bourgeois revolution, they were for further exploitation. Leon Trotsky and Stalin and I tried to overthrow them, but we failed. I was hiding in St. Petersburg. Sometimes, in order to escape from the cadets, I had to live in a tent near St. Petersburg. My muses supported me, that is, even when my comrades began to doubt, who said that nothing would work out, I had to bow to Kerensky so that he would give at least some kind of post. And they supported me.

Maxim: Interesting, women were supportive.

37:00 Lenin about doubles.

Maxim: They say that you had doubles and you used them, is that really true?

Irina: What do doubles mean?

Maxim: Instead of you, someone spoke, for example, before the proletariat, before the people. Or instead of you, someone very similar to you went somewhere. Or were you present everywhere yourself?

Irina: No, there were no such doubles. It's just that when the cadets and gendarmes were hunting me, I often had to change my appearance.

(Shows himself without a beard, and did makeup so that he would not be recognized).

Maxim: Wow, full encryption?

Irina: So that he doesn't look like himself. And he had a lot of documents that were not his.

Maxim: I understand.

37:47 Lenin about attempts on his life.

Maxim: They say that Stalin ordered your murder, is this true?

Irina: No, what are you saying, Yoska loved me, Joseph. He always stood up for me. Are you talking about murder now, about bullets?

Maxim: Yes. Or at the end of life, or these bullets.

Irina: It was a political struggle with anarchists, with monarchists, this is not surprising, I myself have repeatedly eliminated my rivals. He hired killers and shot and blew up, and we put explosives in the cars. There was nothing surprising in this.

When these bullets flew at me, I immediately realized what was happening. This is for political affairs, for those political ideas that someone does not like. I crossed the path of many people. First of all, to the generals, who wanted to continue the war and suck the last juice out of the people for their weapons. I crossed their path first, because I promised everyone that when I came to power, the war with Germany would immediately end. Kornilov, for example, was against it. He could very well hire someone. He had many officers who were on his side.

Maxim: No, Kaplan did not shoot Lenin with a poisoned bullet. We've already gone through this. You can watch from the very beginning of the broadcast.

Irina: There was not only a woman there. There were two of them: a man and a woman.

Maxim: Did they shoot from different weapons?

Irina: They shot from different ones, only one hit, and the other didn’t. It hit a man who was standing nearby.

Maxim: He hit it. Did Kaplan hit you with two bullets?

Irina: The man got hit.

Maxim: Not Kaplan, it turns out she was hit by bullets?

Irina: No. It hit a man who was standing nearby. It was also a woman, but she did not kill her, but wounded her. There was not another death.

It was dark, cloudy, and lightly drizzling. There were lanterns that burned very dimly. It was not so easy to aim at me and kill me. When the bullets hit me in the shoulder and back, I fell, I was still conscious, and to be honest, I was surprised. Why didn't they shoot you in the head? It would be much more likely to kill. Personally, that's what I would do. Why did they shoot in the upper body? When I fell, I had time to think: “Ha ha, they don’t understand anything about this.” The man is standing, you want to kill him and you shoot him somewhere in the arm. He also criticized.

Maxim: I understand.

41:20 Lenin about the authorship of his works.

Maxim: You have written a lot of works that we have in our libraries. Were all the works written by you? Are they all yours, or did someone write them for you too?

Irina: They didn’t write directly, but they helped. They wrote down what I said. I didn't write everything by hand. There were people who recorded my speech. Naturally, these were my works. Assistants, secretaries. Naturally, everything was published under my name.

41:58 Lenin about personal sacrifices.

Maxim: Personally, did you kill a lot of people?

Irina: If you take into account the terrorist operations that I did (helped carry out explosions), somewhere around fifty people.

42:19 Lenin about the collapse of the Soviet Union. Lenin's advice to incarnate Spirits.

Maxim: Now 5,000 people are watching and listening to you. What would you like to tell them now, being there and understanding the depth of what is happening, what happened?

Irina: I understand that a lot of people are watching me. Irina's curators told me that they would watch even more.

I, being on the 5th level, want to address you. I would like to say, as always, "my dear comrades," but I will refrain from this farce.

The place I ended up in is not a fun ride. This is being in a state of constant memories of the pain that you have caused to yourself and others. Moreover, with the full understanding that this did not lead to anything. My Angel Consultants who came to me, who selected an incarnation for me (including in the body of Vladimir, whom you know), informed me that the Union that I was building was destroyed. They said the reason why it was destroyed, they named a spiritual reason. They said that it was I who planted the bomb under the Soviet Union, thanks to which it collapsed. I laid down aggression towards dissidents, towards those who do not recognize the idea of communism, and so on. They told me all this, they didn't tell me in words, they showed me on a spiritual screen. This became clear to me immediately. In the Spiritual world there are no boundaries for communication. You immediately understand the interlocutor, what he wants, you understand the deep movements of his Soul.

Being at this level now, I want to appeal to you so that you always remember. Even if you are lucky, even if you have success at the expense of other people's misfortunes, it will end along with your life on Earth. You are not eternal on Earth. When you leave Earth, you will not die forever. You will enter the Spiritual World. Death does not exist.

When I killed people and called on other people, peasants, workers to murder, to pogroms, to cut off heads and hang kulaks (yes, I called to do this and I consider the deaths of these people on my conscience, although I did not kill them with my own hands), I did this I did it because I considered myself temporary. I thought that I would die, I would be gone, but my affairs would remain. I believed that destroying evil, all blackness, all selfish people who are ready to sell their neighbor for gold, is a good deed. I believed that my descendants would remember me because they would build a fair society. I

thought so then. I didn't think I wouldn't die. If I had known about this then, if I had known that I was eternal, I would not have spent my incarnation in this way. I ask you: remember that you are eternal, you are truly eternal.

I was an atheist, I was a communist. I consider communism to be the correct system, I was not mistaken in that. I was wrong about atheism, it's not true.

God exists, the Spiritual world exists. I am Spirit. Before you raise your hand against your neighbor, think that you will always remember this. Always, at all times. A state without time is all times unfolding in front of you at the same time.

Maxim: Thank you.

47:40 Lenin about his pseudonym.

Maxim: Tell me, please, why was the pseudonym Lenin taken?

Irina: I didn’t only have this pseudonym. There were many of them, even now I don’t remember them all. There was such a surname - Lenin. One of the fake documents was in the name of a friend of Nikolai Lenin, he helped me make it. This was not the only pseudonym, because under my name they were looking for a person to put in prison. I already sat there twice, so I hid.

Maxim: Lenin remains that way?

Irina: I decided to leave this one of my pseudonyms after the revolution. I liked him, I liked this friend Nikolai, but I was always Ulyanov.

Maxim: People write to us here that we work according to Zyuganov’s training manual. Dear friends, we do not belong to any political party. We didn't read any manuals. If you're not interested, listen to other people. We can only convey what we can convey. We do not force you to believe it, we do not convince you of anything. We transmit the information that comes from our curators.

There was an opportunity to invite Vladimir Ilyich. We have been

asking for a long time. Due to the fact that his Spirit is at a very low level, we have not done this before. Now we have decided to do this at the request of many people. And there were a lot of questions.

They ask: do you know Zyuganov?

Irina: Personally, no, but I saw his image. A cloud in which my teaching is reflected? Egregor.

He does not know this word (the image shows).

Maxim: Let's not get involved in politics. Don't say anything, otherwise they will say that someone bought us so that we would tell something about someone.

In the last live broadcast you asked about the war with Ukraine. They heard from me about the war in Ukraine supposedly with ridicule. I have a very bad attitude towards any military conflicts and actions. My condolences go out to all the mothers, wives and many people who are involved in such hostilities. It's really difficult for me to call this a war, because there is no war on Russian territory. Russia is not officially at war with Ukraine, so I asked: "What, is there a war with Russia?" But I really condemn such actions, I express my regret to all those who died, all the mothers, all the children. I root for Ukraine with all my soul. I was born there. Hold on, these are someone's games that make people die. I regret this situation; in no case did I make any ridicule about this. About Zelensky. How does he know Zelensky?

Irina: I'll also say it on my own behalf. We very much regret the conflict that is taking place in Ukraine. Our interstellar friends also regret this. The war that is happening is a form of civil war.

Lenin shows me: after he came to power, there was also a civil war with his people. What he said about the executions was before he came to power. After coming to power, nothing calmed down. Pressure has increased from all sides on our state, the desire to take advantage of the moment of weakness after the revolution and seize power. Many anarchist and monarchist groups were generously supplied from abroad. (Spirit of Lenin) I didn't see anything special in this. I knew these propaganda technologies very well, I used similar ones myself. But you understand that when I came to power, I could

not allow the same thing to happen to myself (as I did to Kerensky). And if he allowed me to overthrow him, then this is his weakness.

53:20 Lenin about the Brest Peace.

Maxim: Please tell me why the lands of the Armenians were transferred to Turkey?

Irina: Because without this, Germany did not stop the war. There was no truce.

Maxim: Why was the Treaty of Brest-Litovsk necessary?

Irina: This is one of the main conditions that we - I, Plekhanov and other revolutionaries - promised Germany to fulfill when we came to power. This is the first. The second is what we promised to the people who no longer wanted to fight. Indeed, a lot of people died in the First World War. Wives, mothers, children of the common people, workers and peasants responded to our call that we would stop the war. And when we came to power, we had to fulfill our promises to both the people and the German government. Naturally, we agreed to this the very first time after coming to power. When we calmed all our opponents, imprisoned all the junkers and those who wanted to overthrow us, we immediately entered into negotiations. Before the Brest Peace Treaty, we had other negotiations. First there was correspondence, and then we met.

55:12 Lenin about Trotsky's ideas.

Maxim: For what purpose was it necessary to spread the revolution to Central Asia?

Irina: (He was surprised). Revolution had to be spread to Central Asia to free the peasants who worked for the rich. The goal was always the same - to achieve justice.

Leon Trotsky, for example, said that we should act this way not only in Central Asia, but also in those countries that gave us money for revolutionary activities before victory, that is, in Germany, in Switzerland. He told me that although we take money from their intelligence services and military, we must still conduct activities

against them, among their people. Take advantage of the money, but at the same time undermine their power.

Maxim: It turns out that you were paid money by foreign states in order to undermine power in Russia?

Irina: Yes, we received money. The king did not pay us to overthrow him. In fact, the revolution that took place in February 1917 (when Kerensky came to power and imagined that he did it) was prepared by all of us. Including me, and other Bolsheviks, and groups of revolutionary people, there were a lot of those who gathered under Alexander III, although this was prohibited. There was a very long agitation of the people. There were explanations that they live in an unjust state, that the king needs to be overthrown in order to determine their own destiny.

It was a long process. Funds were needed for it. Of course, those who came from the nobles to our party cell shared their property. Some of these people came, some, for example, robbed banks, some won some trades, and so on. But this was not enough.

Maxim: Where does such a large amount of funding come from? England, Great Britain, USA?

Irina: Germany and Switzerland.

Maxim: Were you an official agent of Great Britain and Germany?

Irina: No. It wasn't official.

Maxim: What about unofficial?

Irina: What do you mean official? I didn't qualify as an agent on their papers. At least I don't know anything about it. They said that this was help specifically so that I would stop (when I come to power) the war, among other things. I agreed to this because it was for the benefit of my people. How long could it be possible to fight and send ordinary soldiers to fight? The same Kornilov sat in a trench while people died for him. And Nicholas II was in no hurry to appear at the front, especially on the front line. And Brusilov was not there, no one.

59:30 Lenin's past incarnation on Earth.

Maxim: Have you ever been incarnated on Earth?

Irina: Yes.

Maxim: And when was this, in what century?

Irina: I was incarnated in the 14th century on the territory of the Scandinavian countries. There were no borders then, but somewhere around Sweden.

Maxim: XIV century, Sweden?

Irina: Yes. I was incarnated on Earth as a man. This was before Disnit. I lived there for about 30 years, was a fisherman and drowned in the sea when the boat capsized in a storm.

Maxim: Would you like to incarnate on Earth again?

Irina: Yes, I would like to. The time and place for my incarnation have not yet been chosen. My mentors and consultants and I are resolving this issue.

Maxim: Let's go to the last question, the most interesting one. Guys, give us a like if you liked the broadcast.

Irina: What does "Not devoted to the Earth" have to do with it? This does not matter for the Spiritual world.

Maxim: People, you see, think differently. They generally think that I am intimidated by some special services or something else. These are their personal fears. They think that we work for someone, for some special services. These are people, and fortunately my life is full of people.

Irina: "Tell Lenin, thank you." Thank you! We have already congratulated you on your holiday. Now I'll tell you what his image is. I see him, he is here. The image he now adopted is the same as during life. A man of average height, with a beard, as I remember him in the

picture, in the photograph.

1:01:35 Lenin about his politics.

Maxim: Who came up with the idea of the Octobrists, the pioneers? What was this for? To create some kind of hierarchy, subordination?

Irina: This did not happen during the revolution. This is already under Stalin.

First it was necessary to introduce education. I was for girls and boys to receive education together, so that it was equal, so that there was no division, so that everyone participated in governing the country.

I understand you. You consider me a simple killer who killed for the sake of an idea, almost a maniac. It's not like that at all. I was not cruel, I did this for the sake of the idea that society would be perfect. I read from Marx and Plekhanov “so that society is perfect.” At our party meetings (before and after the revolution) we argued a lot about what society should be like? They put forward different ideas. Those who resisted the society we were building were enemies. Naturally, they had to be destroyed. They did harm. If you don't kill the enemy, he kills you. Even if he doesn’t kill right away, he will raise that child, who will then conduct subversive activities and instill distrust in Soviet power. We destroyed or removed everyone who did not believe us.

Maxim: Sergei writes for the twentieth time: “What was the first Decree adopted by the Soviet government?” I personally don't know. Which one was accepted, do you remember, Vladimir Ilyich? What was the first Decree adopted by the Soviet government?

Irina: I took them one after another. I accepted “About Earth”, “About Education”, “About Peace”, one after another. “About peace” I mean with Germany.

Maxim: Have you thought about people? Even though you were a revolutionary and destroyed the Mensheviks, did you still think about people and want to build a good society?

Irina: Yes. I wanted to build a good society. And we argued for a very

long time, a lot, even sat up at night. (He shows a meeting, many men, a room full of tobacco smoke, someone is cracking sunflower seeds, they are arguing). How can we make a good society? How to make sure that all access to exploitation is blocked? I knew that man is an animal. As Darwin said, man came from an animal, which means he is an animal. A mortal animal, an animal that will still figure out how to ride on the back of its neighbor.

Maxim: I agree with you absolutely. One hundred percent.

How do you feel about Marx and Engels? Could Marxism-Leninism be promoted in principle to create society?

Irina: I'm fine.

His attitude is rather neutral. He is now more busy thinking about the incarnation.

(Spirit of Lenin) Good idea, but I already said what methods I used. Marx himself did not write about such methods; I myself included this in this teaching.

1:05:58 The spiritual cause of Lenin's death.

Maxim: What is the spiritual cause of your illness, which led to death?

Irina: Hatred of other people, their condemnation.

He didn't just overthrow the tsars, tsarism, Kerensky, he condemned them, hated them. This energy (he now understood) led to the destruction of the blood vessels of the brain. They tore apart.

1:06:25 Lenin on the reasons for the destruction of socialism.

Maxim: What do you think, who destroyed the socialist system and why?

Irina: This was a natural process. The socialist system was a strong state, whose policies were not liked by everyone in this state. There

were always people in it (like me, revolutionaries in Spirit) who began to act against this state. I have already said that they also wanted the best. They destroyed this great power because they wanted a better future, without the Soviet Union.

Despite the fact that I do not support their ideas (capitalism, the desire for oligarchy, and so on), I perfectly understand their Soul, their aspirations. I was like that myself. Of course, I cannot change in the Spiritual world as an entity, but I believe that my thoughts have already changed. At least I realized that I am immortal.

1:07:42 Lenin about gold and finances of young Russia.

Maxim: Regarding Russian gold, we already said this at the beginning of the program. Indeed, the Federal Reserve handed over to them control of the gold that Nicholas II was accumulating.

Irina: Yes, we got it, of course. But it was not enough, it was not enough. Our country at the time of the overthrow of Nicholas was a gold-poor country.

Maxim: Or they told you that she was poor.

Irina: We collected the money that was not enough to build a new society (to eliminate hunger, to create new means of production, etc.) from people, confiscated it from banks and merchants.

Maxim: Is it true that Germany helped build various factories and enterprises in Russia and gave money for this?

Irina: All this is not free. After we made the revolution and concluded the Treaty of Brest-Litovsk, there was no longer any free help. It was for a fee.

Maxim: For payment, did you take money from peasants and workers?

Irina: From banks. There were private banks that were owned by individuals. It shows how they came and arrested the owner of the bank if he did not repay (most often, of course, he did not repay). This was the first stage.

The second stage was when there was still not enough money. We began to take away church treasures. There was gold and precious stones. We started taxation. To the people who worked in the cities, for example, sewing boots, clothes, and treating (there were millions of them), we said: “Either you pay a large tax, or we take everything away from you in favor of the state that we built.” We believed that we had to give everything for the future.

Maxim: I understand. Regarding the execution of the royal family, look at the beginning of the video, we have already said everything there.

Is it true that there is some kind of secret room under the Mausoleum where some documents are kept?

Irina: I was not there either physically or energetically. I came into the material world for the first time accompanied by curators LiSioni and MidgasCaus, who now support me with energy and give me the opportunity to speak.

Maxim: I thank our curators, I thank you for this wonderful broadcast, I thank you for agreeing to come and answer our questions.

Irina: They are holding him.

Maxim: I feel it.

Dear friends, a very interesting broadcast, many things have come together and fallen into place for me. I now understand exactly what happened and why. Thank you all very much for supporting us, bringing the Light with us, and coming to study.

I would like to add that we will soon have a New Year's retreat. It will take place in Abkhazia, in Pitsunda, in one of the coolest hotels. I won't indicate anything for now. We will make a presentation of the retreat next week, somewhere from Thursday to Friday, you can all apply to register for participation in this retreat, which will be aimed at moving into 2022.

Irina: Yes, it’s already 2022. It was a hundred years ago.

Maxim: Many thanks to all our curators!

Irina: Thank you, Raom Tiyan!

Maxim: We thank Raom Tiyan, MidgasKaus, LiShioni. Of course, I thank you, former Vladimir Ilyich Lenin!

Irina: Thank you, Vladimir, we wish you bright, favorable incarnations in any of the divine worlds. We let you go and wish that your next incarnation will bring you a way out of this level where you are.

Maxim: Guys, bye everyone, see you again! See you at our retreat in the New Year!

November 7, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

LiShioni - representative of the planet Shimor, sociologist, specialist in the astral world and its interactions with the material world;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

Raom Tiyan - representative of the planet Burhad, a specialist in energy interactions in the environment of the material world;

Spirit of Vladimir Ilyich Lenin (Ulyanov).

May 31, 2023

#366 Live broadcast with the Spirit of Nicholas II. Emperor of All Russia. Answers to questions from viewers.

---

https://www.youtube.com/watch?v=abLbcLKap6Q

00:00 Start of video.

Maxim: Dear friends, hello everyone! I won't be in the picture for long, don't worry. We have a very interesting broadcast today. We have been waiting for this meeting for a very long time too. Our curators and mentors gave us the opportunity to communicate with the Spirit of Nicholas II. This is a very famous person, the last Russian emperor, autocrat. Is that right, Irin?

Irina: Yes, an autocrat.

Maxim: I would like to tell you about the retreat. Many people write to me: how will our new New Year's retreat differ from those other retreats that took place in Belarus, on Lake Baikal. I'll tell you a secret - the difference will be very serious. There will be no such boring educational program. They won't tell you all day long about the history of the Universe, about what the Spirit is, what its nature is. This retreat will be dedicated to a huge number of new and interesting practices that were conveyed by representatives of the Interstellar Union through Irina.

A huge number of contactee practices with the Galactic Federation of Light. We will have new masters, there will be a great opportunity to communicate more closely with Irina. You will spend two whole days at the conference together with Irina and interstellar friends. She will personally answer absolutely all your questions. This will be especially relevant for those who have already completed our retreats and who have questions about practice, about the structure of the Universe, about working with entities, with subtle civilizations, about establishing contact.

This retreat will not only focus on the educational program. It will be filled with a huge number of energy practices, new contactees with whom you will be able to meet. Irina will have more time to pay special attention to each of you. She will be busy with all of you and the questions that you have accumulated over this year during training, practices, and when visiting our retreats. This retreat is not like all the others.

This will truly be a New Year's retreat in the large Cassiopeia family, where you can gain new practices and new knowledge. You will be able to get enough of a circle of like-minded people. I invite you all to a New Year’s retreat with our large Cassiopeia family. The link on how to sign up for the retreat is below, under this video. You can follow it and immediately register for the retreat. If you want to come there with relatives, friends, children, we have the opportunity not only to accommodate you in the hotel itself at the cost of one person. We can find places nearby for you where you can stay comfortably with a large number of people who will not participate in the retreat, but will be able to very comfortably celebrate the New Year and spend the New Year holidays in Abkhazia.

If anyone thinks that this next retreat will be exactly the same as all the others, then you are mistaken. This will be a bomb retreat. The program is rich, there are so many different interesting practices, excursions, and conferences. You will receive knowledge directly on your questions. This retreat will be dedicated to the team of the Cassiopeia group, which is already engaged in practices, energy practitioners, cosmoenergetics, and cosmohealing. We have added a new direction - slats. You will also be able to take small seminars and initiations on them. The Cassiopeia family is growing. We have cosmoenergetics, cosmohealing, and reiki. We are now hiring a group of teachers who will practice qigong and other physical and bodily practices.

Come join us for a New Year's retreat with our large family. You will receive the entire list of esoteric practices, knowledge, masters and feedback on how to master it, how to manage it. Irina will definitely host personal receptions. We allocate seven whole days for Irina’s personal appointments.

I think that she is capable of receiving a huge number of people during these seven days. Plus, Cassandra is coming with us - the person brought to us by the curators. Here and now she can help you

review different situations regarding business, family, personal issues and more. Waiting for you.

Ladushka will be at the New Year's retreat. She will be completely involved with you. He will answer all your questions through curators, mentors, through subtle civilizations, through the Spiritual world.

I want to remind everyone that the work of all the masters and everything else is your gift to the master after your heart. Everything is based on the donation structure. I have already talked about other conditions in the video. You can watch the video again (link below this video) and understand what will happen at the New Year's retreat.

And a great New Year's program: prizes, gifts, competitions, various kinds of relay races. Come to the retreat. They gave me the program. I think that we will spend these nine days in a chic environment of comfort, Love, and practice. Let's try to unite in a single impulse. Our task is to unite all contactees, to unite religions in a single impulse in the Light of Love of our Creator.

Guys, I'm not saying goodbye to you. I'll sit next to you, I'll read your questions from the YouTube chat, and I'll try to choose ones that are really interesting and quite polyphonic. I am not a historian, but simply a lawyer, economist, psychologist, I will try to choose those questions that will directly relate to the most pressing life topics of Nicholas II himself, his family, his history and more.

Guys, see you all! I'm near.

Irina: Yes, he also enjoyed hearing about the retreat.

Maxim: Nicholas II also enjoyed hearing about the retreat?

08:27 Introduction of participants.

Irina: Yes. Hello, dear friends!

Maxim: Come on, sit down normally. I'll correct you a little now to make it better.

Irina: Hello! Good evening! The spirit of the last Russian emperor is now with us.

(Speaks the Spirit of Nicholas II) I listened with great pleasure to the information about your event. I don't know the word "retreat," but I know that we are talking about a gathering of people who will learn to go to God, to the Light. I understood from Maxim's thought forms, although he spoke many words unfamiliar to me. By the word "retreat" I mean learning and purifying my heart, developing goodness in myself.

I greet you all! Irina told me that you will ask me questions at a distance, through means of communication. Irina's curators are also present here. I have now met them too. These are Alien Spirits, they are in spiritual form.

He just doesn't know the word "Astral". The words "astral world" and "astral body" were rarely used then, they were rare words.

(Speaks the Spirit of Nicholas II) When I lived, then the exploration of the astral world was just beginning, but I know that we are talking about a spiritual journey. Irina's mentors are present here. They introduced themselves to me here: MidgasKaus from the planet Esler, LiShioni from the planet Shimor.

(MidgasCaus speaks) We welcome you too! And let's also listen to his answers. We are also interested in his personality.

Maxim: We will start asking questions. I salute you, Nikolai! For me this is an expensive meeting; it is not always possible in this life to communicate with Nicholas II himself, much less with his Spirit.

11:12 The spiritual level of the Spirit of Nicholas II, his incarnation.

Maxim: Please tell me, are you now in the Spiritual World?

Irina: (Speaks the Spirit of Nicholas II) I am now in the Spiritual world, but after two earthly years, which will pass on Earth, I will go to incarnation. I'm waiting my turn. It will be Russia again, on the territory of the Pskov region, Pskov. I'm waiting for the moment when my future parents meet, get to know each other, and I can incarnate

through them.

Maxim: Great!

Irina: I already selected them and looked through the Timeline of Events. They will give me the opportunity to incarnate in a body in two years.

Maxim: Thank you! Tell me, please, at what spiritual level are you now?

Irina: Representatives of alien civilizations told me what your spiritual levels are. I am now at the sixteenth level of spiritual development.

Maxim: Level sixteen. From what level did you come to incarnation?

Irina: According to the scale given by representatives of aliens, I came from the third level.

Maxim: From the third level?

Irina: Yes.

Maxim: Please tell me what incarnation brought you to the third level? Was this on Earth or somewhere else?

Irina: (speaks the Spirit of Nicholas II) No, it was not on Earth. It was on another planet. Irina doesn't have it in her memory, now I'll show her the image.

(He shows the planet). I would call them reptilians, only with shells like turtles, but they are lizards.

I was embodied there. It was in that area of the sky (he shows) where the constellation Ursa Major is, in that direction.

(Speaks the Spirit of Nicholas II) I was also a ruler there. A war began between states, between countries, I left my people and went over to

the side of the enemies. Because of me, many intelligent beings died, I led an army that acted against its own people. This happened in a previous life, but not on Earth. That's why I had the third level.

Maxim: Thank you! Guys, the Cassandra project is already open. You can see all the information on our website. The link is also below, in the “Our Projects” section. You can look there.

14:30 The spirit of Nicholas II about the death of the family. Spiritual levels of members of the family of Nicholas II.

Maxim: The most pressing question that many want to ask is: were you really shot along with your family?

Irina: Yes. I was the first to be killed. One of the first. Several people shot at me at the same time (shows).

Maxim: Were you the first to be shot?

Irina: (Speaking the Spirit of Nicholas II) Yes. My children and wife were wounded and finished off with a bayonet. I didn’t see this, I was already in the Spiritual World, but when they left their bodies, they told me about it. We are all at different levels. At first we ended up together, and then we were divided into levels in the Spiritual World.

Maxim: I see. And at what level, who is now?

Irina: Two are embodied: my son and my wife.

Maxim: Have they already been embodied on planet Earth or somewhere else?

Irina: Yes, they are embodied on Earth. The rest are at different levels (shows the image). All four of my daughters are not incarnated. Two are on the eighteenth and nineteenth levels, Nastya on the thirteenth, Maria on the fifteenth, on the average, Olga on the eighteenth, Tanya on the nineteenth. They are taller than me. And my wife also ended up on the eighteenth, but she was embodied.

Maxim: I see. Was everyone from the royal family shot, or was there

anyone left?

Irina: All at once. Nobody stayed. We left our bodies.

17:06 The spirit of Nicholas II about Russian gold in the Federal Reserve Fund.

Maxim: Please tell me, was Russian gold really organized by the Federal Reserve Fund? Did you participate in the organization of a large financial structure in the States?

Irina: Not in the States. If you are talking about the transfer to the Entente, yes, I transferred several hundred tons of gold. This was necessary for the war in order to provide weapons and pay the soldiers of the Entente countries with whom we had an agreement. This is not the USA, but the UK. England. They could then, of course, hand it over to the United States.

When I died, they and my heirs, naturally, could. I was not interested in the fate of this money, because I am in the Spiritual world and was busy selecting the next incarnation. I can assume that when I and the Russian Empire in general disappeared, those responsible in those countries could have transferred it to themselves (their rulers, officials). This could have happened.

18:46 Canonization of Nicholas II. Spirit of Nicholas II about abdication of the throne.

Maxim: Please tell me, did your canonization help you in the Spiritual World? You were canonized as a Saint.

Irina: I know that I was canonized as a Saint. Did she help me? It didn't (as you say) raise my vibration, but it did help me realize that I was doing something right. At first I thought that because of me such a misfortune befell the Russian Empire: revolution. When I was canonized by the church that I loved, I felt it as a recognition of my purity in what I did, that there was no blood on my hands. I was accused of having people's blood on my hands. I took the canonization as a recognition that I was innocent of this.

Maxim: I see. Do you think it was right that you renounced the throne

before being executed?

Irina: This happened before, long before the execution. Yes, I refused for several reasons. Are you interested in the reasons?

Maxim: Yes, what are the reasons for giving up the throne?

Irina: (Remembers that time). This was a year (even more) before the execution. The first reason: it became clear to me that the people from the army did not support my reign. They wanted me to leave, I felt betrayed. They sent me messages, letters and verbally told me that I had to hand over the throne. I realized that they don't need me. Confidence emerged: let them then look for a ruler for themselves. I realized that no one would obey my laws if I stayed.

Maxim: I understand.

21:46 Spirit of Nicholas II on Bloody Sunday.

Maxim: People ask: did you give the order to be executed on Bloody Sunday 1905?

Irina: This is exactly what I said when I said that I was accused of the death of people. No. I found out later, when it had already happened. I was in another place (shows that people went to see him in one place, and he was in another). I didn’t give the order to execute, I couldn’t even do it, there was no instant communication. This decision was made by the military who were there, carrying out police tasks.

They had the task of not letting people into the palace (the building shows) where I was. Before this there were many murders of officials and ministers. I gave the order not to let people into the palace. They might have had guns, and they might have used the opportunity of meeting me as cover to commit some kind of murder. For this reason, I gave an order to the military that I would meet with people in a different environment so that they would disperse. There was shooting because they continued to move on. But I didn’t give the order specifically to shoot.

Maxim: I see.

23:55 The spirit of Nicholas II about the mood of society at the beginning of the 20th century.

Maxim: Question: why didn't you take your family and children abroad to avoid the obvious execution?

Irina: At first I wanted to go, but those who invited me changed their minds.

Maxim: They refused to accept your family abroad?

Irina: They understood that if they accepted me, it could bring revolution upon them. Their people were also determined that I would kill and destroy. They were advised not to do this.

Maxim: Why were you so loyal to the revolutionaries?

Irina: What is loyalty?

Maxim: I allowed them to gather, hold some meetings, debates. Loyal enough. I did not stop the activities of these circles.

Irina: At first there were no clubs. This appeared after we gave half of Sakhalin to the Japanese. Even my close associates, some of my family and close associates said that I was a negligent ruler, because of me this happened, so many people died in the fight against Japan, which was very small and unequipped for war. Since this happened, then I must give freedom of speech, as an inexperienced ruler. They will give me hints. If I had not given them freedom of speech, I would have been overthrown earlier. There was (shows) indignation among the people.

Maxim: I understand.

26:31 The spirit of Nicholas II about the place of his birth and burial.

Maxim: What was your origin? Are you of Russian origin or something else?

Irina: What does it mean - Russian origin?

Maxim: Were you born in Russia?

Irina: Yes, in the city of Petra, as you call it now - Petersburg.

Maxim: In St. Petersburg, right?

Irina: Yes.

Maxim: The question is this: there are very different rumors about where you and your family were buried. Can you tell us where you were buried?

Irina: Where is the body?

Maxim: Yes, where is the body?

Irina: According to the feelings (me and my family after leaving their bodies), they were not moved far from the place of the murder, but they tried to disfigure their appearance so that they would not be recognized.

(He shows fire). They tried to burn it and hide the remains. Not just bury them, but do something with them. This was given to us in an image. The bodies were not taken far. We only saw in the image that they were in the same city. Our bodies are changed, severely damaged.

Maxim: Thank you!

28:09 The spirit of Nicholas II about the descendants of the Romanovs.

Maxim: We have one of the former Presidents who is very similar to you. This is Dmitry Anatolyevich. Do you have relatives in the circles that now rule the country?

Irina: No. Those relatives who are more distant, indirect descendants, live abroad. There are quite a lot of them there. My father's blood, but these are not my children.

Maxim: Do you have blood relatives who are now running the country?

Irina: (speaks the Spirit of Nicholas II) They do not rule, but simply live in different countries. They are descendants of my sisters. There are quite a lot of them there.

Maxim: They manage in different countries?

Irina: They don’t manage, they just live. (He shows). France, Africa, Algeria or Egypt.

(Says the Spirit of Nicholas II) I didn’t research it myself, my Angel Consultants told me when I asked them about it. They said that my father’s descendants are in different countries, but they just live there and are not among the ruling ones. These are the descendants of those who left Russia before the revolution.

Maxim: I understand. We didn't receive a specific answer, okay. This is a question I don’t know how you will answer.

Irina: About Medvedev, you have to show the photo, he doesn’t know.

Maxim: I should type it on the Internet, maybe he’ll look it up?

Irina: What question? Is he a descendant?

Maxim: Yes, a relative on some line.

Irina: (He says) A photograph will not help, you need to ask his Soul. There may be similar people, or, on the contrary, dissimilar people may be relatives.

Maxim: I’ll ask a very tricky question: where did the amber room go during the war?

Irina: What war?

Maxim: There was an “amber room”.

Irina: Civilian?

Maxim: Yes.

Irina: If it was after I left, then you need to ask those who ruled then. What do you call the “amber room”? Ivan the Terrible also had one made from amber.

Maxim: Okay, I understand.

31:28 The attitude of the Spirit of Nicholas II to the execution of the family.

Maxim: The question is: what were the last words you said to your son Alexei before you were shot? Do you remember this?

Irina: Last words?

Maxim: Yes. Assuming you all get killed.

Irina: Of course, I can’t remember all the words with accuracy. It was a shock for me. I said that everything was God’s Will, and reassured me that it was God’s will. I knew (I remember my feelings) that this was inevitable. I knew about the execution several days in advance, I had a presentiment. I even told my wife about this.

Maxim: What did you think at that moment when you already felt it, assumed it, but could not do anything?

Irina: That this is God’s Will. I am a believer (both then and now) and I understood perfectly well that my life is in the hands of God. If it were not for the Will of God, then these people, the guards who protected us, would have been prevented by something, they would not have been able to do this.

Maxim: Do you know who gave the order for the execution?

Irina: I talked about this with Lenin. He said that this was an agreement between him and those who were in Siberia: next to me, he guarded me. When I was taken from Tobolsk to Yekaterinburg, this agreement was already in place, it just took time so that the people would not suspect anything.

Maxim: Yes, guys, I want to add to your comments that we really are not historians, we don’t know history. I didn't even have time to prepare. As soon as I finished all my business at the Center, I immediately came to the live broadcast. If I ask something wrong, please correct me live. I treat any criticism absolutely adequately. Especially for those moments in which I can be corrected.

34:15 The spirit of Nicholas II about Grigory Rasputin.

Maxim: Another question. They ask a lot about Grigory Rasputin. Did you know such a person?

Irina: Yes. I still know him. He is in the Spiritual world. He was one of those who met me there because his body was killed earlier.

Maxim: What level is he at in the terminology of the Interstellar Union?

Irina: Twenty.

Maxim: Is he at level twenty?

Irina: Yes. He met me along with other Angels and welcomed me. I saw his image. He met me, my wife and children.

Maxim: I see. Please tell us a little about Grigory Rasputin. There are a lot of different legends about him.

Irina: He was a healer and one who speaks to a person to calm him down. In your opinion (that's what MidgasCaus is called) a psychologist. He was a believer. Well, by the way, he understood politics. He could answer any question quite intelligently, although he did not study this.

Maxim: I see. How did he even get into your family? Who brought him, or how did he appear in the family?

Irina: He was introduced to me by my wife, whom he met at one of the events. (It shows a ball or feast). There are many people from the city of St. Petersburg present there. At this event, one of my wife's friends, she had quite a few friends - one of the friends, with whom I personally did not communicate much, introduced her to Grisha, then he met me. At first we just talked, and then he began to visit us often.

Maxim: Are the rumors true that Rasputin drank a lot and spent a lot of time with women?

Irina: (speaks the Spirit of Nicholas II) No. I didn't see this. It was just a slander. He didn't drink much. I kept the posts. He was a believer, even closer to a monk.

Maxim: Everything that they say about him, that he hung out with girls in bathhouses and drank – is that all slander?

Irina: (speaks the Spirit of Nicholas II) What I saw, and how I know this Spirit now (he can talk to you and answer your questions, if you want, I can convey this to him), I can say that he I prayed a lot for the health of Alyosha and our entire family. And even for the Russian Empire. He held posts. As far as I saw, he did not go out with women, did not get drunk, and was strict with such people. He was an ascetic.

Maxim: I see. Why did they kill Rasputin, do you think?

Irina: I believe that Rasputin was killed out of envy that he was friends with me and my wife. I believe that the decision was made by people very close to me, whom I trusted.

Maxim: Why did Yusupov hate Rasputin?

Irina: Not only Yusupov (shows several more). A rumor was spread that he was advising me on something, because of which I was making decisions that led to Russia's defeat in the second war, with the Germans. But that was not the case. They were engaged in slander. They even came up to me and told me about his meetings with my daughters, as if he was doing bad things to them. I knew that this was

not so, that it was all because of envy. There were several such people, they themselves wanted me to trust them so much.

Maxim: Oh, how interesting!

Irina: He says that this is a bright Spirit who was simply slandered out of envy from all sides. Because he was of simple origin, they laughed at him. (He shows). They laughed and said: “He’s a dirty man, he smells bad.”

Maxim: Listen.

40:10 The spirit of Nicholas II about love for his wife and the current incarnations of his son and wife.

Maxim: Nikolay, I’ll ask this very personal question: did you have any illegitimate children?

Irina: No. I loved my wife and would never have dreamed of such a thing. This was the only love he had.

Maxim: Very interesting. Tell me, please, is Tsarevich Alexei now embodied in Russia?

Irina: Yes.

Maxim: And in what body? In men's or women's? Do not you know?

Irina: Woman.

Maxim: That's it, no more questions. Where is your wife embodied now?

Irina: Not in Russia. It is implemented in Germany. There she must take her lesson. She has some negative attitude towards the country that fought with the Russian Empire. She believes that because of the war with Germany, we were all killed.

Maxim: Do you think that you were killed because of the war with

Germany?

Irina: Not only because of this. When my wife Sasha and I were under house arrest after abdication, she told me many times that it was all because of the alliance with the Entente. Because of the Entente we went to war, we began to lose battles, and our people began to die. She said that everything was blamed on me. This was her belief. She told me this personally in a conversation.

Maxim: I understand. Thank you

42:15 The spirit of Nicholas II on connections with the subtle material at the beginning of the 20th century.

Maxim: Is it true that during the training of Russian officers they were given knowledge about alien civilizations? Did you know anything about aliens?

Irina: No about aliens. We were given knowledge about natural sciences. We did not have astronomy separately. This was part of physics. Physics, chemistry, we were told about biological laws. Story. As they teach (you now call it higher schools, educational) at the institute, they gave us such knowledge. About natural sciences too. But they didn’t talk specifically about aliens or that they exist. They simply said that there are stars, what they are made of, that there are constellations, that there is a Sun. They said scientific data about what it consists of. The physicist gave such a lecture. Scientist. Moreover, he was the main teacher at the university. (MidgasCaus speaks) It's like the Academy of Sciences.

Maxim: I see. Another question: Grigory Rasputin did not say, did not say that he was in contact with someone, communicating?

Irina: He said that he communicates with the Holy Spirits: with Archangel Michael, with Archangel Gabriel and with St. George the Victorious. He said that he sees them in his dreams. He said that they come to him in visions. He told us this when we were sitting in our palace. We talked to him, communicated. My wife asked him about it, he told it, and I sat and listened.

Maxim: I see.

44:39 The spirit of Nicholas II about the results of his incarnation.

Maxim: Tell me, please, what was your original plan for implementation on this planet?

Irina: I understood the question, thank you. I incarnated into the emperor's family to come to power in Russia. I specifically chose to be born in this body. My task of implementation was to develop my country and to prevent revolution. There was a chance that it wouldn't happen.

Since I did not complete this task, after the revolution occurred, my task changed. My personal task became to forgive those who committed evil against my entire country. I considered her mine. And I considered the Russian people mine. I completed this task, so I left the level I reached in my last incarnation.

He partially completed it, so he did not get to the level of Angels. (Speaks the Spirit of Nicholas II) If I had made different decisions, there would be no revolution. If only I had made the decisions on time that, for example, Pyotr Stolypin told me about. I was slow to accept them, I believed that the introduction of these laws would shake my power. If I had accepted them on time, there would have been no reason to rebel and overthrow me, and then drown the workers and peasants, who were promised a better life, in blood. They promised the best, but carried out terror and destruction a hundred times greater than all the emperors of the Romanov dynasty.

Maxim: Tell me, please, did you kill people or animals yourself?

Irina: Animals?

Maxim: Yes, animals. They say you could shoot crows for fun.

Irina: Why in the raven? No, I hunted deer, sometimes hares. This was in order to maintain shooting skills in peacetime, and so that wild animals could be eaten.

He talks about hunting, his father went, then he. (Says the Spirit of Nicholas II) And about people, I fought, I was at the front in the first (you call it the First World War). It was a war involving several

countries, the first in the world. I actually took part there, in battles too. Of course, my soldiers protected me from being at the forefront of the attack. However, I shot. Perhaps, of course, my bullets killed someone.

Maxim: And on purpose? Did you kill for fun? Animals. Not animals, people.

Irina: Entertainment?

Maxim: Yes. They ask questions like this.

Irina: No. This is not entertainment. It's either war or protecting your life. I even tried to justify the criminals and not execute them; in the most extreme cases, I sent them to hard labor. My ministers reproached me for being too soft.

Maxim: I see.

49:36 The spirit of Nicholas II about the next incarnation.

Maxim: Tell me, please, in general, what goal have you chosen for your future incarnation?

Irina: The goal of my future incarnation is to be born a boy in a simple family, so that I can develop in myself (shows) purposefulness, activity and the ability to insist on my position, because I lacked this in my past life. Even the right decisions that I made, with the resistance of the people or officials, I postponed. He didn't insist on his own.

My task for the future incarnation, which we selected with my mentors, is to develop in myself the ability to say "no", the ability to follow my path to the end, to defend my interests. I will be born a boy.

Maxim: What would you say to people who say that you are already incarnate and you are nine years old?

Irina: No, I am not incarnate. I don't know who said this. I am

preparing for incarnation in two years. Maybe someone similar to me is incarnated?

Maxim: Yes, indeed, his family was shot. Guys, watch the video from the very beginning. There is some interesting useful information there at the beginning.

51:25 The spirit of Nicholas II about the prophecy of Abel.

Maxim: Did Nicholas II read the prophecy of Abel, which Paul I left?

Irina: Yes, I read it. This was at the very beginning, after the death of my father. My wife and I opened Abel's message. This (he shows) was a seer, about the same as Rasputin, but at the beginning of the nineteenth century. The end of the eighteenth century - the beginning of the nineteenth. They also had their own seers. My wife and I read this message. It was truly sealed to us and written by the hand of that seer Abel. And there was a prediction of the future for each emperor.

The meaning of this prophecy was that when such and such an emperor came from Paul (this sign was pointed at me), then the entire Empire would face the threat of war, and he could end his life by execution. There was such a prediction about me. Then I got upset. I was perplexed: why was this predicted? I didn't fully believe in him.

Maxim: Has it come true?

Irina: Yes. I have already communicated with my mentors. Monk Abel has already been incarnated. However, I communicated with his Spirit. He actually saw one of the versions of events that came true, and he wrote this to warn.

53:54 The spirit of Nicholas II about contactees in the royal family.

Maxim: Please tell me, I know that during your life you consulted with the Spirit of some ancestor about your royal affairs. Tell me, please, with whom did you consult from the Spirits of your ancestors? Maybe through Grigory Rasputin, maybe through some other Holy personalities. Was there such a situation that you consulted with the Spirit of your ancestors?

Irina: If you are talking about my conversation with the creator of the Romanov dynasty - Alexei, then it was really with the help of Gregory.

(He shows another woman). The Spirit came to us, just as I came to you. This was before the war with Germany. I wouldn't call it advice, it was a conversation where I asked just one question: should I go to war with Germany? The answer was no. But I could not break the agreement with the allies and let down those who relied on me.

The Spirits themselves often came to Gregory: Archangel Michael, Seraphim of Sarov, Sergei of Radonezh, and we communicated with them. He said that Sergei Radonezhsky is with him now, and we can ask him. At first we were surprised, but then we got used to it.

Maxim: Next to you in the royal family there was a contactee with the Spiritual world who could constantly transmit information. I understand correctly?

Irina: Yes. But he was not alone. We also had Dmitry. (Shows a short man, young). Dmitry from the suburbs of St. Petersburg. He, too, could talk to the Spirits, but he did not talk like Gregory. He needed to lie down. He fell asleep, and then came to his senses and told who he was communicating with.

Maxim: Well, of course, through the Astral.

56:48 Family connection between Nicholas I and Nicholas II. The spirit of Nicholas II about the revolution.

Maxim: A question that viewers repeatedly ask: who was Nicholas I like to you?

Irina: Nicholas I?

Maxim: Yes.

Irina: I understand who you are asking about. He was the father of my grandfather, Alexander II, who was killed.

Maxim: Please tell me what you would like to do, but did not have

time during your reign?

Irina: I would like to prevent the revolution, even if I abdicate the throne. I wouldn't want it to happen. If I went back, I would have made different decisions. I see where they should be adopted, what decrees should be signed. Even if it’s not my power, but any other of the royal ones (not even from my blood), or even just the assembly that adopted the Constitution, but so that there would not be this redistribution of property and the murder of many people, including churchmen. Let this power leave my family. It was still possible to make sure that this massacre did not happen (he says). Many people were destroyed simply because they got in the way.

Maxim: Thank you.

59:05 Help of the Spirit of Nicholas II to praying people.

Maxim: I have your icon, which I bought in the church. Tell me, please, people also want to know: you were canonized and they pray for you, do you somehow pay attention to this? Do you help them somehow?

Irina: I feel them. An icon is an image into which the one who drew it, wrote it, puts the energy of my image. When he starts drawing me, he thinks about me. These thoughts connect him with me, my strength (you say “energy”) transfers to this image. My icon is connected to me.

When a person prays to me, it means that he loves me. Prayer is a form of Love, of reverence. I also pray to God for such a person. We in the Spiritual world can pray. Any Spirit can do this. When I feel that energy is coming to me, a stream of light energy, charged with the words that I am a Saint, they recognize the Light in me, in gratitude for this I pray to God.

Maxim: I see.

Irina: About the needs of this person. I feel them like the thoughts of a person who is praying for me. I ask Heavenly Father to help with his needs.

1:00:55 The spirit of Nicholas II on governance in the world. Brothers of Nicholas II.

Maxim: Please tell me, it's not often that you have to communicate with monarchs. As a monarch, who do you think rules the world? Or did you manage at the time when you were in power? England, Great Britain, Germany, who really really runs all these countries?

Irina: Rules all countries?

Maxim: Yes. Or in countries it controls all movements.

Irina: I will only express my understanding.

Maxim: Yes, tell me please.

Irina: I believe that both then and now all countries are ruled by human sin, which lives in the heart. He pushes people down the path of war. In my time, many people had such an understanding (now I don't know whether they do or not) that the world is ruled by the devil. The devil is human sin, which makes it possible for dark demons, dark Spirits to control. People themselves let them in. And he will rule until all people come to God, to goodness, to the Light. Then these problems will be reduced. Revolutions, wars, riots, murders and so on.

Maxim: Did you believe in Christ?

Irina: Yes.

Maxim: Please tell me how in the Spiritual world they could allow the Spirit from the third level to begin to rule the country?

Irina: This is exactly what the lesson was for me. A series of lessons, several tasks, with the help of which I could get out of it, because I got to the third level precisely because of improper management.

Maxim: Please tell me, did you have a brother, a twin, or a person similar to you who could act instead of you?

Irina: Instead of me? For what? Where to perform? No. What are you talking about? Where to perform? For what?

Maxim: In front of the people, let’s say. Fearing for your life, maybe you sent someone like you.

Irina: No. Didn't send it.

Maxim: Have you been everywhere yourself?

Irina: Yes. Didn't send it. I had three brothers. Two died of disease before the revolution. And Misha was also shot. We communicate with him.

1:04:01 Circle of communication of the Spirit of Nicholas II in the Spiritual world.

Maxim: Who do you communicate with in the Spiritual world among the famous people who changed the course of history on our planet?

Irina: I turned to many, especially after I got into the Spiritual World. I also went to Vladimir Ilyich Lenin, to my father. He communicated very closely with his mother, with her Spirit, both when she was still alive (he came to her), and after she came to the Spiritual world. Met with Peter I, with his Spirit. Then he left for incarnation.

Maxim: Guys, I ask you, if you really like our broadcasts, give it a like. I don’t understand from the comments whether they like our broadcasts or don’t like them. Who says what?

Now let's continue for about five minutes. Still, such a person, I would have a lot of questions about such a person. I'm trying to ask your questions. In addition to reading, I try to select questions that could be asked in a cultural manner. Let's have a couple more questions and we'll end the broadcast (I'm already sitting next to you all wet).

1:05:55 The Spirit of Nicholas II about Matilda Kshesinskaya.

Maxim: This is the question. Forgive me for people's questions. They say that you had some strange relationship with the ballerina. I'll tell

you with whom now. It was Matilda Kshesinskaya.

Irina: What do you mean - incomprehensible?

Maxim: What kind of relationship did you have?

Irina: Patronizing. I gave her gifts and patronized her spiritually, gave her advice. It was an unequal relationship, one might say, like father and daughter.

Maxim: You didn’t have any intimate relationships?

Irina: No. For me, this would be a worse sin than, for example, abdication of the throne. It was already a sin that I agreed to do this (renunciation). But it was so that someone else would rule. If I desecrated my body with lust for another woman, then I would destroy my love for Sasha and her love for me.

Maxim: People say that you called her Alex, not Sasha.

Irina: Sasha is Alexandra. Alex, Sasha, what's the difference? Alexandra was there.

1:07:24 Wishes of the Spirit of Nicholas II.

Maxim: What could you wish now for the people who remained in this country, who survived the revolution, who moved to democracy? Are you from the Spiritual world so that you can wish for us? I understand that asking about the future is incorrect. What would you like or could you wish for us Russians now? What should we do next? How can we continue to live?

Irina: I am in the Spiritual world and I feel that now there is more Divine Light coming from Russia than at the time when I ruled. This is understandable. Then there was a war. First. There was a second war. There was a shortage of food and many troublemakers.

I would like to wish you that you continue to develop the Light that has been in your country over the past hundred or so years since I was taken out of incarnation. I want to say that I had already forgiven

them all in advance, before the bullets flew at me, because they were driven by anger. In this anger they themselves were unhappy.

Therefore, I want to wish you, advise you that you learn to forgive your personal enemies and never take revenge. This only leads to violence and destruction of your family and the country where you live.

Maxim: I thank you, Nikolai. I thank you for coming to us. This is a very big event for me.

People who have a history education, physicists, historians, chemists, guys, we cannot reach you. We are ready to organize conferences on absolutely any topic. I understand that many of you think we are crazy. What I see, I'll tell you honestly, is not madness. This is all so real that sometimes I then check the broadcasts from books, on the Internet, from textbooks, and you know, many moments become a discovery for me. Especially those answers that come on live broadcasts.

Guys, we have all the coordinates: telephones, mail. Write. If you are a scientist, if you have some knowledge, but cannot fully understand something, write. We will find that spiritual personality, or a subtle-material civilization, or our dense-material curators-mentors, who will answer many questions that you yourself cannot find.

We are especially interested in scientists. Scientists who are developing alternative energy. Scientists are historians who analyze various historical events. Guys, we are waiting for you! We are ready to harmonize. We're not crazy. This is not a farce. This is not a show off. This is all reality. If you are real scientists, write to us.

I have a feeling that it's not us who are starting to force things and show off, but they're just writing that we can't answer some questions. We can answer questions if you trust us and trust us. Write, call. I thank you all for your support, for your help. For those views, for the likes you give. For the reviews you write. For the knowledge that you gain during our training at retreats.

Guys, we are waiting for you all! We are ready to harmonize, answer questions, even slippery questions. You write that we are working according to some YouTube template. No. We work from the Soul.

From the Love that we can bring to this project.

Irina: Now Emperor Nicholas II, his Spirit, was listening to Maxim. I listened not to his sounds, but to his and my thoughts.

(Speaks the Spirit of Nicholas II) I am waiting for incarnation in your time. I am very glad that now there is so much Light coming from people, that there are projects like yours. This is a chance to defeat all evil, wars, including the evil that led to his murder. It is still maturing in some people. But every year it will become less if there are more projects like yours.

Maxim: Thank you very much everyone! Guys, if you doubt that this is reality, come to our new Center. Here you will personally get to know Irina and the reality that you watch on our channel.

See you all again. See you at the retreat in Abkhazia. It will be just a bomb! You will not be tormented by training, they will give you a lot of practices, a charge of energy, and Love. See you at the retreat in Abkhazia! That's it, bye everyone!

November 14, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan – head of the Cassiopeia project and the Center for Spiritual and Physical Development;

The spirit of Nicholas II - the last Russian emperor;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

LiShioni is a representative of the planet Shimor, a sociologist, a specialist in the astral world and its interactions with the material world.

Video in text

June 2, 2023

#369 Live broadcast with the Spirit of Rasputin Grigory Efimovich.

https://blog.cassiopeia.center/pryamoj-ehfir-s-duhom-rasputina-grigoriya-efimovic

https://www.youtube.com/watch?v=QPt5LMEP0JQ

00:03 Greetings.

Irina : Hello, dear friends! Good evening!

Maxim : Hello everyone! We have a lot of interesting news. The first question, as always, how can we be heard?

Irina : Yes.

Maxim : Guys, 824 people, great. Good evening! How can you hear? Greetings from Latvia. Hello Latvia. Hello Penza. Great!

01:38 Cassiopeia channel on Yandex Zen.

Maxim: Dear friends, I will make a short introduction. Once again I want to remind everyone. I once again invite everyone who wants to spend a very interesting New Year in a circle of like-minded people, in a circle of contactees, channelers, energy practitioners, clairaudients, clairvoyants, and clairvoyants to Abkhazia for the New Year. The link to sign up for the New Year is below this video. You can go there and sign up for our New Year's retreat.

I also have a huge request to everyone. We are currently developing Yandex Zen. This is a very interesting direction, through which we will carry out various promotions. There will be prizes, gifts related to bifidobacteria, with our T-shirts, with our abbreviation. Plus, there we will be giving away one place for retreats. Therefore, you can follow the link under this video and subscribe to Yandex Zen. I ask all of our people who are with us to subscribe to Yandex Zen using this link so that we can continue to conduct live broadcasts through Yandex, give

articles and newsletters.

Friends, I hug everyone tightly. Please subscribe to Yandex Zen. This is very important to us. This is another channel and means so that we can carry the information that representatives of the Interstellar Union transmit to us.

Plus, below there is a link to sign up for training at the School of Contactees, where you can learn contacteeism, channeling, clairvoyance, clairaudience, and claircognizance. Irina Podzorova will personally handle your training together with class psychologist and contactee Ilya Alexandrov. The link is also below this video.

And the most important information: today is Archangel Michael's day, guys, happy holiday to everyone!

03:08 Introduction of participants.

Maxim: Today we have a very interesting guest, we were really looking forward to him. This is a very controversial person in history, a very ambiguous person. "Rasputin is waiting for Maxim to tell."

Irina : He is interested in finding out what happens a hundred years after his life. This is news to him.

Maxim : I think Gregory is interested in this too. And he is also interested in our project, so he came to us with pleasure.

Irina : (Spirit of Rasputin) I learned a lot.

Maxim : Did you learn a lot of new things?

Irina: About the situation in Russia and on Earth. Much has changed since I left life on Earth.

He listens to it, not as you write "advertising," but as a description of the life that happens here. He is in the Spiritual world and listens with interest about our affairs.

Maxim : There is no sound, Ira. How is there no sound when there is

sound.

Irina : How is there no sound?

Maxim : So, we need to look at the recording. “There’s a broadcast, I don’t have it.” No, the broadcast is on, it’s just probably something with the Internet.

Irina : You write on air.

Maxim : Yes, you write on air.

Irina : There is sound. Some write that there is sound, others - not. Equipment, technology.

Maxim : I would just like to clarify: Gregory, how can I contact you?

Irina : You can call me by name or just a spiritual brother, or Spirit - it doesn’t matter.

Maxim : Can I just contact you, Grigory? In a simple way?

Irina : You can address yourself as “Gregory”. I remember that everyone wrote about Lenin, about Nicholas II, about the “you” address. All Spirits welcome the use of “you,” because we even address God with “you.” All these conventions of the earthly plane had already left his mind.

Maxim : Thank you, Gregory! Let's probably start our broadcast.

Irina : (Spirit of Rasputin) I greet you!

Dear friends, hello! My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations. Thanks to the chips that Esler’s representatives installed for me in May 2019, I became a contactee with the Spiritual World. I can consciously make contact with disembodied Spirits and subtle-material civilizations. Previously, for this I needed to go to the Astral and tune in more complexly. And now, thanks to these chips and thanks to the fact that I constantly communicate with my Higher Self, I am constantly in a state of

communication with myself. These contacts with disembodied Spirits - also a unique opportunity - are given to me and all of us so that we can ask about the lives of various important figures of the past. For example, what we decided to do on live broadcasts.

Today we have with us a representative from the 20th level of Healing Angels, who in his last life was known as Grigory Efimovich Rasputin. He is now showing me an image, like a photograph of him, only a glow is spreading around it.

Also present with us is a representative of the planet Shimor - LiShioni. He is a specialist in contacts with the astral and spiritual worlds.

As soon as Grigory Rasputin arrived, he immediately congratulated us on the holiday of Archangel Michael - one of his mentors and curators. He conveys his greetings and congratulations to you. He says that he is very glad that he was invited to talk. (Spirit of Rasputin) I will be happy to answer your questions.

Maxim : Dear friends, I want to clarify that a large number of videos are being shot about “Cassiopeia”. On those channels that supposedly bring light, “Cassiopeia” is simply thrown with mud.

Guys, thank you very much for advertising. Due to the fact that you throw mud at us, many people come and are simply interested. Ultimately, they themselves determine how important it is, what information we give. If it seems to someone that demons appear to be the Spirits of people, this is your personal perception. We cannot stop you from accepting this perception as it is for you.

Irina : Yes, indeed, I will talk about what I feel, what I see. Of course, this is my vision. I am human. I will naturally speak my vision, my hearing of this contact. I’ll just tell you that now many people are making videos on how to distinguish demons from Angels and how to do this on a YouTube channel. For some reason, many people believe that “if I like this information, then it’s an Angel, if I don’t like the information, then it’s a demon.” Many people measure everything by themselves. In fact, it's even easier to distinguish.

09:37 Differences between an angel and a demon.

Irina : We are all different people. We have different ideas about good and evil, about what is Light and what is darkness. Therefore, naturally, one person will say: “For me this is an Angel,” and another will say: “For me this is a demon.” Is there any universal objective ability to distinguish? Yes, I have. And it lies beyond the opinions of people.

How to distinguish a demon from an Angel? If the Spirit who was invited speaks of love for everyone, of increasing vibration, if he is devoid of aggression and condemnation of anyone, including himself, for any actions, then this Spirit cannot in any way be a demon. Because for the demon, love is like a burning fire.

Maxim : Yes. I don't want to miss it. We will probably report news from the Interstellar Union within a week. Maybe LiSioni?

Irina : Yes, and just like Gregory.

Maxim : Maybe Grigory will tell us news from the Spiritual World? Gregory, is there any news at all from the Spiritual world? Maybe there are some perturbations there too, or some interesting movements or plans.

11:03 Increase in Earth vibrations in November 2021.

Irina : Yes, indeed, it will be especially interesting to hear news from the Spiritual world on the Day of Archangel Michael, who lives in the Spiritual world and, by the way, is the highest hierarch responsible for planet Earth. It is Archangel Michael who is the patron of the Earth in the Spiritual world. What's the news in the Spiritual world?

(Spirit of Rasputin) What could be news for us in the Spiritual world? For example, it was news to me what the Spirit of Emperor Nicholas told you: he was about to incarnate. Personally, this was news to me because I didn’t know about it.

Regarding news in the Spiritual world. Over the past two weeks that have passed on Earth, the Earth has raised its vibrations. Her spiritual Light became brighter. This is manifested by the fact that many on Earth read prayers. This is also facilitated by reading the moods of those planets that were transmitted through Irina Podzorova. Many

people are already doing this at the same time.

Maxim : Yes. And me personally every morning.

Irina : I asked LiShioni what they do in your movement. He told me about the practices that Irina and her friends do on Earth. I looked at the images of these practices and what happens in them. Healing and meditative practices, as you call them, communication with yourself, with your Spirit, with God - this also increases the vibrations of the Earth. This is truly news for the entire Spiritual world. Because the negativity that has been spreading for the last, perhaps, year is starting to go away.

The black mass of energy that came out of the earthlings was visible on a spiritual level; it had been spreading for almost the last year and was already beginning to go away. The earth becomes lighter.

Maxim : Is this related to the quantum transition?

Irina : This helps the quantum transition, it will pass much faster and bring more positive light fruits.

14:14 Rasputin about his incarnations.

Maxim : Grigory, please tell me, have you ever incarnated somewhere on Earth?

Irina : Incarnated.

Maxim : Where and when?

Irina : I only had fifteen lives on Earth.

Maxim : It was on Earth that there were fifteen?

Irina : Out of one thousand six hundred and twenty-five incarnations that I have.

Maxim : One thousand six hundred twenty-five incarnations. In this

manvantara?

Irina : Yes, but this includes the subtle worlds that you call plasmoids, and I called light civilizations. One thousand six hundred twenty-five, including these worlds.

Maxim : What were your previous incarnations on Earth before Grigory Rasputin?

Irina : On Earth before Grigory Rasputin, I lived at the end of the third century, I was the ruler of the city of Alexandria in Egypt. At the end of his life he converted to Christianity. At first I was the rich ruler of the city of Andreapolis (I do not know such a thing).

Maxim : And I don't know that.

Irina : At first I lived a life that is usually called dissolute, and at the end of my life I converted to Christianity. I have devoted the last ten years to solitude and renounced my wealth. This was the last life on Earth before I incarnated as Gregory. But since I was not completely cleansed of all my passions, in that previous life I reached the sixteenth level according to your teaching. I did not reach the level of an Angel then.

Maxim : Interesting.

Irina : If I had not become a monk, I would be much lower. This helped me get out of the illusion that I live once and my life means nothing.

Maxim : Thank you. Can you tell us about any other previous incarnations on Earth?

Irina : I was a priest in Egypt, but that was before. He was one of the Brahmins of India, he was one of those warriors who fought against Arjuna during the time of Krishna.

Maxim : Interesting.

Irina : It was five thousand years ago. Basically, my incarnations on

Earth were connected with the Spiritual world, with religions.

Maxim : Tell me, please, was your incarnation as an illiterate village guy planned that way?

Irina : Yes. It was planned because I had to be born into that family to gain the experience of humility. He helped me later reunite with the Christian egregor in this life.

18:09 The process of reincarnation of Spirits.

Maxim : Gregory, I'll ask you a question, it may seem incorrect to you, but I would like to hear the answer. People consider reincarnation on Earth to be slavery. How to stop reincarnating on Earth? How to free yourself from slavery?

Irina : This is not slavery, this is an opportunity to bring your love to Earth. It depends on what level you are at. This is perceived as slavery if a person is in a state of selfish narcissism. He does not want to manifest his Light through matter. You can get rid of reincarnation without turning to the Archangels and Angels with this request. Nobody will ask for this. That's your decision. Just say, "I want to live on this level." But, if you find yourself at a lower level than you left the incarnation, then the state there may cause you more suffering than you experienced in matter. You don't have to incarnate.

If you are at a high level, where there is happiness and love, you are unlikely to stay here forever, because your love will tell you that in the material world many Spirits suffer without Light. And it will give rise to a desire in you to incarnate again.

20:07 Date and place of birth of Rasputin. Rasputin about his last name.

Maxim : Thank you very much, Gregory. Let's start with a little history. Your date and place of birth is very contradictory. Could you now tell us your date and place of birth, like Grigory Rasputin?

Irina : January ninth, one thousand eight hundred and sixty-nine.

Maxim : One thousand eight hundred and sixty-nine?

Irina : One thousand eight hundred and sixty-nine.

Maxim : January ninth, one thousand eight hundred and sixty-nine?

Irina : Yes.

Maxim : And the place?

Irina : Pokrovskoye village. Siberia.

Maxim : Siberia. Tell me, please, is your real name Rasputin? Or is this an acquired surname that you took? There is a version that your last name is Novykh.

Irina : No. It was the other way around. It was I who asked the tsar to give me the surname of Novykh. Because I had such suspicions that all the rumors about my fornication stemmed from my last name, and people laughed at it.

21:31 Rasputin about his fornication, drunkenness and healing.

Maxim : Since you clarified this topic, were you really lascivious? Because many historians write that you loved women very much. I spent a lot of time with them in debauchery and drunkenness, excuse me, of course.

Irina : (Spirit of Rasputin) And they said about Christ that he drinks and lives with harlots. When I first heard this, I was very surprised (he had mixed feelings with resentment). Because Praskovya, my wife, was a very pure woman. I was scared that these rumors would reach her, she would believe them, as Hilarion, the monk, believed, and would leave me. But she said she didn't believe it. If I were a fornicator and remained married, God would turn away from me because of the deception, and my prayers would not be healing for everyone. Therefore, I was clean before God and my conscience.

They said that I like to spend time with women. And I healed them and their children and prayed for them. In addition to prayers, I had various healing methods, such as herbal treatment. I treated them by having them go to the bathhouse, then drink tea with honey and

herbs. I also used what you call folk conspiracies. But I only did this when I needed a quick effect. My energy was enough to create a thought form, in your opinion. Such strong thoughts.

Regarding drinking, I will say this. I was an Orthodox person. Most days of the year he kept fasts, when all Orthodox Christians kept fasts. You know, dear friends, that in the year of an Orthodox person there are more fast days than fast days. And wine is allowed during Lent only in small quantities and on special days. And on other days there should be only simple, modest food. And I adhered to this, because I believed in Orthodoxy and followed the rules of egregor.

Maxim : There is such a moment in historical facts. When they said that you were fornicating, your wife answered: “He is enough for everyone.” What did she mean?

Irina : There are words taken out of what she said. She said that my attention was enough. Because people actually came to me. Many people.

When I lived in St. Petersburg, my daughters and son were also there. My wife, however, being busy with her own business, visited me only once. But children came often. She saw how many people were coming (they were standing in line). That’s why they told her: “He doesn’t pay attention to you.” This is precisely about attention “there is enough for everyone.”

I actually received patients, treated them and gave advice on changing their lifestyle and diet. He also gave advice on prayers, so that they would go to church, repent of their sins, not despair that they were sinning, but ask God for forgiveness, so that they would not blame themselves, and so that they would observe the rules of the faith in which they were born. My daughters were next to me very often in my house where I lived in St. Petersburg. Would I really allow myself to show obscene behavior and lust towards women in front of them, knowing that they would definitely tell their mother.

Maxim : Thank you, Grigory. Once again I apologize for these questions, there are a lot of them.

26:49 Rasputin about the reason for the rumors about himself. Rasputin about the conflict with Yusupov.

Irina : I can tell where these rumors come from.

Maxim : Where from?

Irina : I don’t want to blame anyone for these rumors, but a situation arose when the emperor did not listen to me. I asked him not to start a war with either Japan or Germany. But he listened to other people. I have already seen the most likely future, that Russia will not cope with this, and many people will die.

When this began to happen, many at the emperor’s court remembered that I had dissuaded them from war. And they got the idea in their heads that since I dissuaded them from war, it means that I wish defeat for Russia, and that the Germans paid me. At court they considered me a traitor. When this was said to the emperor and his wife, they angrily rejected these speculations. But the hearts of these people were not calm, they decided to remove me first by slander. It got to the point that they hired actors who dressed like me, similar in appearance to me and, introducing themselves as Grishka Rasputin, caroused in taverns.

Maxim : Even so.

Irina : I stopped several such whorehouses, set up very close to my house on the banks of the Neva, and reported this to the emperor. Those who were arrested by the tsarist police, the gendarmes, did not admit who hired them. But I knew, I felt that these were from the highest-ranking houses. This happened several times. This is the first.

Second. I take responsibility for myself; I myself acted thoughtlessly in relationships, for example, with the murderer Yusupov. I quarreled with him. This quarrel occurred long before one thousand nine hundred and sixteen. He also spread rumors about me that I drank in taverns and restaurants. And there was such a nasty rumor that I was stripping naked and showing my genitals to people. They wrote about it in the newspapers and brought it to me. I know where this rumor came from. If you're interested, I can tell you.

Maxim : Please tell me, I think it will be interesting for all our viewers to know where this rumor came from.

Irina : It was at the beginning of the twelfth year, not at the beginning, but in May. Yusupov, naturally, knew me from the time his father introduced us. He treated me well, but I felt that there was a struggle between good and evil in him. Once he invited me to a very large, fashionable restaurant. It was after Easter, when everyone was celebrating. We sat, ate rich food and drank noble drinks. Yes, there were alcoholic drinks, it was a holiday, a feast. During this feast, I got carried away and could no longer control myself, and said everything I thought. And Felix Yusupov also lost control. Suddenly he offers me the same dirty business that he did with Dmitry Pavlovich - my second killer.

Maxim : Sodomy?

Irina : Yes. He offered it to me in a restaurant. Moreover, he suggested that I...

Maxim : I understand. Let's not go any further.

Irina : I answered him rudely. He was intoxicated and became angry. I answered him rudely, as Russian people respond to this (sent).

Maxim : I would probably answer the same way.

Irina : But Felix did not let up. He looked at me and said: “I don’t know where you sent me, show me this place.” And I, being in a state of drunkenness, temporary loss of control, I showed him where. He was very offended and then spread a rumor that I had undressed and showed it to everyone. He has been harboring this evil for a long time. At our next meeting, about six months later, he accused me of telling the emperor about this. Although this did not happen, I was silent about it.

34:42 Rasputin about the appearance of the Mother of God in childhood.

Maxim : Grigory, thank you very much for such a revelation. We will probably remove this topic further. Let's continue the theme of history. I know that you were a very sick child as a child. They wrote about it. Was it really like that?

Irina : Not very painful, I was just sick. I was a teenager. You're sick, you have (points to your stomach) something like dysentery or typhoid. Infection. I had a high temperature, fever, lack of appetite, and my stomach hurt very badly. I was losing weight and couldn't eat.

Maxim : How long have you been sick?

Irina : For several months I could not recover. My mother invited a priest to come to me. And she herself told me to pray to the Mother of God. I started doing this, and she came to me in the morning. I saw her coming in through the window. She told me: "It's not time for you to leave. You must do great things for the empire. Stop the king from killing his own kind of brothers, people." She ran her hand over my stomach, which glowed. After that I fell asleep. When I woke up, the first thing I felt was hunger. I started eating. From that time on I began to slowly recover. Then I became very strong and healthy and was no longer sick.

36:47 Rasputin about his abilities.

Maxim : Tell me, please, when did you begin to discover your healing abilities, the ability to contact the Spiritual world?

Irina : After this contact I continued to pray. Other Spirits began to come to me: Seraphim of Sarov, Sergius of Radonezh, Panteleimon the Healer, all the Spirits. I even saw the image of Christ and communicated with him.

The spirits told me to learn to heal people. First, I began to travel to nearby villages to look for healers and learn from their treatment experience. Then Christ told me to go to his city. I went to Jerusalem. There is a very special land there, it is saturated with his power. I went to visit monks in monasteries. At one time I even wanted to take monastic vows. My Guardian Angel dissuaded me, saying that this was not my path.

Maxim : Where did you want to take monastic vows? Forgive me please.

Irina : It was Kazan. I was in Kazan, there was a monastery there.

Maxim : After that, accordingly, you developed healing abilities and began to heal people?

Irina : I noticed that if I pray for a person, he gets better, or it becomes easier for him. Many people told me about this. Then they asked me about it. I understood that I still had to study herbs and healing.

The healers with whom I communicated, including Orthodox healers, they were also in monasteries, they told me. When I told them about my visions, everyone was very happy about it and told me about it and answered my questions.

Then I met Hermogenes and came to St. Petersburg. There were a lot of suffering people there. Although they are rich, they are also suffering. I helped them to the best of my ability.

40:14 Rasputin about the treatment of Tsarevich Alexei.

Irina: Two of the rich princesses were close friends of the Empress. They introduced me to her. At first I was very shy, embarrassed, and didn't want to go to her. I was told that her son, the only heir to the throne, was sick, and I agreed to try to help him.

Maxim : And how did it work out?

Irina : Yes. I prayed for him. I also asked Nikolai and Alexandra to love him more, love each other more, worry less, think less about their state affairs, and think more about family and children. They already had girls. Because these experiences were reflected on the child. Even when he was little, he felt it, and it got worse.

I learned that during times of pain and fever, when the baby could not sleep, his doctors or those who looked after him for some reason give him aspirin powder. It was killing him. I felt it. Naturally, I canceled it. I just prayed for him. When he got older, I began to give him herbal decoctions that restore blood. Both the empress and the emperor were convinced that the boy got better when I was next to him. I couldn't always be there, I went to my family. The Empress even wrote to me and sent me a letter from her post office asking me to come back.

43:00 Rasputin about the Khlysty sect.

Maxim : Thank you very much. They say that you belonged to the Khlysty sect. Is this really true?

Irina : No. I did not belong to any “Khlysty” sect. My enemies investigated twice. It was a serious investigation involving prosecutors, the Holy Synod and the church. There were two cases opened, and they all ended in nothing. They haven't proven anything. I'll tell you now. Do you know what "Whips" are?

Maxim : I heard about it briefly.

Irina : This is a sect in which people take whips and beat themselves. They beat to punish their flesh for its desires. And when they hit, they have a special state of Soul. They no longer feel the blows of the whip, and lose their temper.

Maxim : Do you go to the Astral through pain?

Irina : They not only beat themselves, but they also pray. They have such a belief that this is how you can come to God. Active members of this sect are very easily recognized by the marks from the whip. They cannot, in this state of consciousness, hit themselves so carefully as not to leave marks. Therefore, I was examined several times by church representatives and doctors. They didn't find anything on me. If I had been a whip, it would have been proven quickly. There were no marks on me.

45:07 Rasputin about the Freemasons.

Maxim: Thank you, Grigory. Tell me, please, do you know who the “Masons” are?

Irina : Yes.

Maxim : Did you relate to them?

Irina : No. This is a group of people from France, like revolutionaries, in the Spiritual World. Among them were churchmen. Their goal is to

remake the faith and the state.

45:44 Rasputin about his meeting with Yusupov in the Spiritual World.

Maxim : Thank you. Tell me, please, did you meet Yusupov in the Spiritual World?

Irina : Yes.

Maxim : Have you talked to him? I mean, exchanged information with him?

Irina : Yes, I came to him, asked him about the night when my body was killed. He regretted it.

Maxim : And at what spiritual level is he, according to our terminology?

Irina : Eighth.

Maxim : I didn’t fall to the demonic level.

Irina : After what happened, he lived for many more years and died in old age. I know his body was old when it died. He had time to repent of this. I didn't see much regret in him, but he still had a rethinking of what he had done.

46:53 Rasputin about his contactees.

Maxim : I understand. Thank you. There is information that you are now embodied on planet Earth. Is it true?

Irina : I have not yet been embodied and I don’t intend to yet. I am in the Spiritual world. I am a healing angel, I come to my contactees, as you call it, through them I heal people, teach them to heal people, to direct their energies.

Maxim : How many of your contacts do you have?

Irina : On Earth?

Maxim : Yes.

Irina : More or less permanent two hundred and fifty.

Maxim : Wow! How do you introduce yourself to them? How do they see you from the Spiritual world? Or do they understand? You don't introduce yourself to them as Grigory Rasputin, do you?

Irina : I introduce myself as a healing angel. It didn't matter who I was. When I talk about my life, I talk like an actor about one of my roles. Now my essence is different. These pictures are now floating in front of me, but I no longer have the same attitude towards them as I had in life.

48:08 Rasputin about killing his physical body.

Maxim : Thank you, Grigory. Tell me, please, were you killed in one thousand nine hundred and sixteen?

Irina : At the end of the year.

Maxim : There are rumors that you were shot many times. You came to life and ran away again. This is true?

Irina : Tell me how the murder happened?

Maxim : Yes, how the murder was committed. And why are there so many rumors? Guys, I don’t ask pre-prepared questions, I write out questions on tape. You can watch the live broadcast, all these questions are there. Carry on, Irisha.

Irina : Then, in December of one thousand nine hundred and sixteen, Felix Yusupov began communicating with me again after a long break. He said that he repented of his thoughts and words that he said to me in that restaurant. He said that he was drunk, that’s why he said that, and that he regrets it and is ready to be friends and help me in my affairs. I answered him that God forgives all sinners.

Maxim : People ask you to give you some water. Christina, I am very pleased that you come to our channel to laugh. It's already nice that you are on our channel.

Irina : Oh, hi.

Maxim : No, this is some kind of Christina.

Irina : Anyway, hello.

Maxim : It’s just that for some reason all Christinas react negatively to our channel.

Irina : “Neighing” is probably a positive emotion?

Maxim : Yes, I’m saying that I’m very glad that she has a positive emotion from our channel.

Irina: We are very happy to raise your vibrations.

Maxim: Let's continue, Irish. Let's not pay attention to the haters.

Irina: I told Felix that any sin can be forgiven by God, and that God loves everyone. He said that around mid-December his wife fell ill and was in serious condition. He said that she really wanted to see me, because I knew her too, I was familiar with her. When I found out about this, I said that I would go right away. He said that doctors would be with her before evening. She wouldn't want them to know she was seeing a healer. He agreed to take me to her in the evening.

My friend said he felt something was wrong. He asked me not to go to Felix’s house. I also felt something dark, like an essence, in his eyes. I didn’t pay much attention to this, because he always had a struggle between Light and Darkness. He was not an evil person. So I didn't pay attention to the dark energy around him and naturally agreed to go to his wife. He came to pick me up by car, and we went to his house. It was in the evening, it was already dark. My daughters stayed in the house.

When we arrived, Felix led me into a room downstairs. I asked where

Irina, his wife, was. He said that she was sleeping after the procedures that the doctor performed on her. He said he would go up and take a look. He got up, came back, and said that we needed to sit a little and wait. He treated me to tea and wine. (Shows wine, which they take with spoons and pour into tea). And there were brownies with chocolate spread inside. I ate them and thanked them. He looked at me with a very strange look: anger mixed with fear. I didn't understand what was going on. Only later did I find out from him that he thought he poisoned me. But that was not the case. There was no poison there. He was deceived. He later told me about this in the Spiritual World.

Maxim : There was no poison in this? Was he deceived that the food was poisoned?

Irina : In the Spiritual World, Felix told me that the doctor deceived him. He didn't know how to prepare himself. He had a personal doctor, but I didn’t know him, who told him that he had added some kind of poison.

Felix told me already in the Spiritual world that that doctor, after this happened to me, after the revolution took place, a few years later admitted that he could not step over the doctors’ oath “not to harm people,” so that God would not deprive him of his ability doctor He deceived, but hid it.

Maxim : So, what happened next?

Irina : He looked at me with a very strange look. I didn't know what was the matter and asked him about it. He looked as if he was waiting for something. I chalked it up to worrying about my wife. Felix said that he would be right back and went upstairs again. I thought that he went to look at Irina. But, having gone back down, he stood near the stairs. I stood and looked at the cross. Felix had a cross, made not of metal or wood, but of glass, like crystal. It was a stone bowl with a crystal cross. I approached this cross and began to look at it. When Felix came in, I turned around and said: “What a beautiful cross you have!” - began to express admiration. He smiled and said - these were his last words: “Then pray for me and for yourself.” With these words, he pulled a pistol out of his pocket and shot at me. He hit me in the stomach, on the right side.

I didn't have time to understand what happened. He fell and lost consciousness for a short time. Then I came to my senses from the pain. I saw that there were a lot of people in the room. I didn't count how many there were. I realized that he was killing me, taking my life. I was angry with him for deceiving me. And at the same time with this anger, there is pity for him that he has sunk to the level of an animal because of the anger that was many years ago. I immediately understood why he did it, because of that incident in the restaurant. There were no more major quarrels with him. Only this one.

Maxim : So, what next?

Irina : I got up. He was leaning towards me, I took him not by the throat, but by the collar and tried to get up, pull myself up. I wanted to ask: “For what?” - but there was wheezing and terrible pain. When I opened my eyes and took Felix by the collar, I felt that he was very scared and was shaking all over. Bounced away from me. Behind him stood his friend, Dmitry Pavlovich, who was with Nikolai instead of his son. His relative. And I saw such anger in Dmitry Romanov’s eyes, even greater than Felix’s. I know what this anger is for. I learned about his connection with Felix while visiting Nikolai, where Felix also came, I saw them in an understandable situation.

Maxim : They engaged in sodomy?

Irina : No, but they showed each other such feelings and such actions as a man and a woman. And I saw that they had feelings, and I told them about it. I had to tell the Empress, because Empress Alexandra had already decided to marry her daughter Olga with this Dmitry. I told him that he should not communicate with Felix because he was seducing him. Felix was older. I told about this case because the emperor’s daughter Olga was already involved. I loved her very much, and she should not be unhappy with a husband who deals with men. The emperor then became very angry. He forbade Olga to think about Dmitry, refused Dmitry’s request to send him to serve as an officer in one of the regiments. Since they saw that I had caught them, naturally Dmitry understood that I had told everything to the emperor.

Maxim : They had some kind of LGBT extras there. Gay extras.

Irina : Look what they write.

Maxim : Let them write. It's OK. They also ask questions. They are also interested. And I'm interested. I didn't even know anything like that. What I hear now causes me a creative shock. If someone at school had told me that Yusupov was this, I might not even have believed it. Please tell me, then they shot at you, where did they take you?

Irina : No, I was able to get up. Blood was pouring out of me. The thought came to me: “I need to run outside, people there will protect me.” But when I saw Dmitry, it became clear to me that they were together. I already said why he could be angry with me. At this moment the mind works very quickly. I had one thought: run.

I wake up. I was sure the door was closed. To my surprise, the door opened with a push. It seemed to me that I walked very slowly towards the gate, because as soon as I went outside the gate, there were people there. This is the city center, I would shout out to someone.

But as I was leaving, I saw another man standing in the shadow of the stairs. I didn't know him. Only later did Felix tell me that it was one of the Duma deputies, and I had seen him before. Everything happened very quickly, then I didn’t recognize him. I saw the three of them. Maybe there was someone else there, I saw them when I left.

When I went to the gate, the frosty air gave me strength, and I walked faster (shows that he is holding his stomach, trying to stop the blood so that it remains in it, walking, moving his legs). And suddenly I heard two shots from behind, but they didn’t hit. I walked faster. At that moment another shot sounded, but there was a different sound. And at the same time I felt like a sword pierced my back. I fell into a snowdrift, but still tried to crawl. Then I heard footsteps. I wheezed something like: “Help.” I was in a state of shock from the pain and the understanding that now everything would end.

I turned over, looked up and saw Dmitry approaching me. And a little further away stood the man I saw under the stairs and Felix. They didn’t come, they stood near the door. Dmitry came up to me and leaned over, he had a smile like a winner. I saw Satan himself in his eyes. He put the gun almost to my forehead and shot again. And after that I felt that the ground was collapsing beneath me, I was falling into an endless abyss. Then the Light appeared, and I realized that I was in the world of Spirits.

01:06:45 Rasputin about his prophecies.

Maxim : Thank you very much, Gregory, for such a detailed story. There are a lot of questions from our viewers. Many of them relate to your healing, your gift, work in this direction. Is it true that you gave predictions to both the royal family and ordinary people?

Irina : I said what I felt. I was given prophecies from the Spiritual world, from where the future is visible. Angels. I passed this on to people.

Maxim : You saw a more probable future. Yes?

Irina : Yes, I saw a probable future that if there is no war, then there will be no overthrow of the tsar. I told him about this and told the empress about it. Because of this, everyone who was for the war rebelled against me.

1:07:54 Rasputin about the attitude of Nicholas II towards Russia.

Maxim : Our question was: did the emperor love the country and the people?

Irina : Yes. I loved the country and loved the people.

Maxim : I loved? Or the emperor?

Irina : Did the emperor love the country and the people? I think so. He was concerned about both the people and the country. But he listened too much to those of his deputies who insisted on war and at the same time stopped some of the transformations that were necessary for the country. He was very passionate, for example, about his daughters and their affairs. They could tell him something about their affairs, experiences, and dreams. At the meeting with deputies, this was all he thought about. And he was bored listening to reports.

Maxim : He moved a little away from governing the country.

Irina : Yes. He came, for example, to the Duma, listened to the denunciation of the deputies and was very tired of it. He was bored.

When a deputy reported to him about something serious, he was distracted by his thoughts, then hurried him: “Yes, yes, I understand.” This made him make a lot of mistakes.

Maxim : Guys, we do not force you to believe in this information. You can believe what you want. Immerse yourself with regressologists, tarologists, and ufologists. We can only share information that we can. Therefore, if you don’t like something, you need to find other channels.

1:09:50 Rasputin about his prediction of the future of Russia.

Maxim: Our people ask us, is it true that you predicted the reign of Vladimir Vladimirovich Putin? Have you seen our ruler who now rules in Russia?

Irina : There is no ruler. I didn’t see what the surname or image would be. I saw such a version of the future that the king would be overthrown, and this would happen after my death. By the way, in the last days before my physical death, I felt that I did not have long to live. But I didn't know exactly how much.

Maxim : Is that why you said that “when I’m gone, you won’t be either”?

Irina : Yes, I saw a version of the future, what if I was killed or something happened to me. An accident, not a murder, but something will happen. I didn't feel like I was going to die from the disease because I was healthy. I felt that if I left this world, the entire three-hundred-year Romanov empire, the dynasty that they built, and after it the empire would collapse. There was such an option, and it was very close in the future. And then there will be great devastation, a terrible war. A lot of people will die. I saw rivers of blood. I saw a map of Russia, and red paint was spilling all over it.

Then I saw that this period would be followed by a period when everything would calm down. Flowers will sprout from this blood, the earth will bloom again. And there will be those rulers who will lead her to peace. In Russia now you don’t have such wars in which millions of people die. This means that now is a period of peace. When I lived there was a period of war. I asked Nicholas not to join it, then there would be such a possibility that he would remain on the throne.

He was very worried about his son Alyosha. He said that he would not live to adulthood, which means there would be no one to inherit the throne. Only Mikhail, his brother, will have to, and he wanted to pass the throne to his son. I said, since Alexey has lived for so long - already twelve years, his body has become stronger. Now you can give him special herbs, and he can live and reign for a long time.

1:13:18 Rasputin about the resurrection of the dead.

Maxim : People have a question: have you raised the dead?

Irina : No. I prayed for people who were seriously ill and they came back to life, they got better, but they were not dead.

Maxim : People who were in a coma?

Irina : We couldn't get up, couldn't speak, we were sick with something. He prayed for them for several months. He shows a woman. (Spirit of Rasputin) People recovered, came to their senses, although no one gave them any hope. When I prayed, I didn't just pray, I imagined this person, how Angels stood around him and healed him, sending Light. I mentally sent my Light. This prayer of mine was charged with my energy, like a thought that helped a person get out of a state of illness. But, if his life span was over, he would still die.

Maxim : I understand. Please tell me if you know if parts of your body are preserved somewhere in museums in Russia?

Irina : No, I don't know anything about it. I disconnected from the body, no longer felt it and went to the Spiritual world. I was no longer interested in him. But my Angels-mentors, consultants, told me that it was destroyed because of envy.

Maxim : Dear friends, if you like our broadcasts, please like and subscribe to our channel so as not to miss the next broadcasts. Press the bell and like. If we get a large number of likes now, I promise that we will continue broadcasting. I will try to ask all the questions you ask in the chat. There are a lot of questions, and I don't have time to record everything, because I, too, am in some strange state. I'm already all wet. Now they will say that my low vibrations did not survive the vibrations of Grigory Rasputin.

Irina : Who reacts to him how.

Maxim : I thank those who have already delivered, honestly. Thank you for your support. The likes you give give the opportunity to see us on air and other people to watch us. This is the task of the project, no matter what they say about us, no matter what they write about us, no matter who hates us, to bring Light and give awareness in the form of perception in which we can do this. We have no other goal in the project. We do not engage in deception or any incomprehensible issues that we ourselves do not understand. I repeat once again, we are not the ultimate truth. You don't have to believe us unquestioningly, we don't say that. So trust your heart.

1:16:56 Rasputin about Covid.

Maxim: Gregory, do you know about the current situation with the virus on our planet?

Irina : Yes, contactors told me and passed it on to me.

Maxim : What do you think about this?

Irina : I think that this test was allowed by God to test faith in God and trust in God, faith in Him and getting rid of fears and anger. This is another test. Such tests have happened before. Now people live in an age where they believe that they have conquered all diseases. But that's not true. If you defeat one disease with medicines, physically, without eliminating what leads to the destruction of your Souls, then your bodies will be destroyed by any virus, even the most harmless one, and from any bacteria, as you call it. It is impossible to come up with cures for all diseases. They must be inside you. This epidemic, as you call it, the spread of the disease, is another test for people so that, having passed it, they become stronger and have more faith in God, in themselves and the possibility of healing.

Maxim : Please tell me what prayers you recommend reading to people sick with this virus?

Irina : Prayer? Specifically for Christians? God?

Maxim : God, let's start with this. Maybe a prayer, maybe some spells,

conspiracies. You have been involved in various types of healing. Maybe you can recommend some set of herbs so that the body can cope with this virus.

Irina : Yes. You can pray to God in your own words. Be sure to believe that you are immortal Souls. Because the fear of death only provokes such diseases. Believe that you are immortal Souls, and pray to God for healing, pray to the Mother of God, St. Nicholas the Pleasant and Panteleimon the Healer. You can read Akathists to them, or you can simply turn to God in your own words with a request for healing.

And be sure to thank. After each prayer, thank God for giving you life, peace, food and the opportunity to live and bring good to people.

About herbs. For this disease, it will be very good to drink an infusion of thyme and add milk to it. Also an infusion of licorice root. These herbs have a calming effect on the lungs.

Maxim : In what proportion?

Irina : It is better to drink herbs separately.

Maxim : Where's the milk?

Irina : You can add here and there.

Maxim : Drink it with milk.

Irina : You can also use natural honey.

Maxim : Can you put honey in thyme or there?

Irina : You can have honey with plain tea. Just don’t put it in tea, just eat it. Honey is very good at removing all excess dirt from the lungs. In addition to these two herbs, it is also useful to drink black currant leaves for this disease. They also strengthen the body’s defenses and prevent the development of blood clots, which, as contactees told me, develop in such people.

Maxim : Yes, indeed, now there is practically very little real milk, so

take village milk. We even ferment our bifidobacteria and Bulgarian bacillus only with natural milk. Store-bought milk is not fermented; it is not natural.

Irina : He just asked me: “Where did the real milk go?” I'll answer him now.

Maxim : Where did the real milk go? Gregory asks?

Irina : There was a lot of milk then. Then, please, if you think that there is no real milk, either take it from the villagers or get a cow. In the country. A dacha is a village house.

Maxim : Guys, we don’t make excuses, we just sometimes raise a topic in which they are trying to spread rot on us. There are no excuses, and we do not justify ourselves. We're talking about it believe it or not. Under no circumstances is anyone making excuses.

We said prayers, gave recommendations on the virus that is currently circulating.

1:23:14 Rasputin about the future of Russia for 2022-2025.

Maxim: Grigory, I have a big request for you: can you look at the future of Russia for the next year, two, three. Can I ask you to do this?

Irina : Yes.

Maxim : Give a prediction.

Irina : You need to tune in to the Time Tape. I see the future of Russia as bright, brighter than it is now. The most likely future of the many options that present themselves. I see that you will recover from the disaster that has befallen your people. I see in the near future the abolition of all those restrictions that are now oppressing the people, the cessation of the diseases that people are talking about. In the energy I see a decrease in fear (says he sees a bright future). This will be facilitated, among other things, by the church, all religious organizations in Russia, all bright spiritual people, and, among other things, Irina’s project. Because those people who come to her tell their friends and family that there is Light, goodness, and that there is no

need to live in fear.

1:25:18 Rasputin about the likelihood of war between Russia and Ukraine in November 2021.

Maxim : Then I will ask this question, people ask: will there be a war with Ukraine?

Irina : I don’t see such a possibility.

Maxim : There is no such probability.

Irina : Straight out war?

Maxim : They ask about the war.

Irina : I don’t see such a possibility of military action, but the conflict on the borders will continue to exist for a long time. This is not a war. He does not see a full-scale war.

Maxim : What about wars with other countries?

Irina : I don’t see war in the next ten years.

Maxim : Then what?

Irina : Then there are too many probabilities. It's hard to look there. It depends a lot on the choice of different countries.

Maxim : In the next ten years we will restore our Russia.

Irina : Yes, I have a feeling that Russia will be actively recovering in the next two to three years. All these fears will be a thing of the past.

Maxim : Guys, to answer all other questions about predictions we can use our project “Cassandra”. By the way, when we go to Abkhazia, we will take Cassandra with us. You will have a unique opportunity to ask her questions throughout the retreat. Not only Cassandra is going there, very interesting people are going there, new masters, new

healers, new energy practitioners.

Therefore, we are waiting for you at this enchanting, it's hard to call it a retreat. It will be something so interesting, a performance with trips, not even with teaching moments, but with conferences, with energy practitioners, with working on stage with people. I promise you and say that definitely no one will be left out of work at this retreat. To sign up for it, you can follow the retreat link below.

Once again I ask you to subscribe to Yandex Zen. We will have cool events, articles, and giveaways there. Yandex Zen - link under this video.

Gregory, thank you very much. I thank you with all my heart. I send you the Light of my Love.

I thank you for paying attention to our project. Thank you for making your prediction and frankly, in your own form, telling me what happened to you.

Irisha, thank you, too, of course. You are great and smart. With each broadcast, I admire more and more your abilities and capabilities in such a simple form to transmit information from the Spiritual world. And not only.

Irina : Thank you. And I thank you, dear viewers, too. Thank you for your support of the project. Thank you for your support of all bright projects on Earth. Thank you for walking the path of Light. I thank all the people who are developing, for raising the vibrations of the entire Earth, increasing the likelihood of the future that Gregory has now predicted.

Maxim : And I thank even all those haters, those channels that are trying to denigrate us. Guys, Light and Love to you. If on the channel you say that you bring the Light, please continue to carry it. Don't engage in nonsense and don't engage in nonsense. That's it, guys, bye to everyone, and until new live broadcasts.

Irina : Bye!

November 21, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

LiShioni – representative of the planet Shimor, sociologist, specialist in the astral world and its interactions with the material world;

Spirit of Grigory Rasputin.

#373 Live broadcast. Communication with the Spirit of Peter the Great

https://blog.cassiopeia.center/pryamoj-ehfir-obshchenie-s-duhom-petra-pervogo

https://www.youtube.com/watch?v=7LnH7oSoDAs

00:02 Introduction of participants.

Maxim: Dear friends, hello everyone! I'm starting the broadcast, I need to make an introduction. I understand that the broadcast that will now take place and the person we invited will not fit into a certain understanding a little.

Hello Stavropol! Good evening!

At the request of people, we decided to make contact with Peter the Great, or rather with the Spirit, who was embodied in Peter the Great.

We have very interesting news on this matter. I can't imagine what will happen next. Any historical community that will view these broadcasts in the future will probably simply try to tear us apart. I understand that there will be mixed reviews from this broadcast. I'm starting it.

Our curators and I agreed to find the Spirit of Peter the Great. They found him. We have information that after Peter the Great came out of incarnation, by the way, he entered at the twelfth spiritual level, came out at the thirteenth level - he increased his level, he incarnated into the man we know as the son of Joseph Vissarionovich Stalin - Vasily Stalin.

Therefore, today's broadcast will be with the Spirit, which was incarnated in Peter the Great, and then incarnated in Vasily Stalin, who also came out of incarnation at the sixth level, the level of the archons. I can't imagine what will happen next, what information he will give next. But I will ask everyone to treat this meeting more or less loyally and adequately.

Irina, let's continue, I made the introduction.

Irina: Special situation.

Maxim: Now I'll tell Irina. Yes, a special situation, which, of course, develops in my world order. In the world order of other people, it will probably not add up a little. The spirit with which we will now communicate, you should immediately understand, is the demonic level of the archons. They are quite interesting, and can make strange jokes. In principle, he remembers both the incarnation of Peter the Great and the incarnation of Vasily Stalin, who disincarnated on the sixth level.

I would like to remind everyone that we are having a New Year's retreat. The set is still available. You can go to the Cassiopeia website and find where to sign up for the New Year's retreat. You can watch the previous live broadcast, there are links there.

People ask me why we don't post links to bifidobacteria. They are also located below if you want to order bifidobacteria. Have a good broadcast everyone!

Yes, this is the level where Lucifer is. Everything is correct, Vladimir.

I will be nearby, I will read our questions and write them down. I will try to ask these questions competently and correctly. Irisha, have a seat.

Irina: Good evening, dear friends! Hi all! Hello!

Maxim: Lucifer is not incarnate. He is on the sixth level of archons.

Irina: Now I'll tell you what happened. We invited the Spirit, who was embodied in Peter the Great. It turned out that he was already incarnated once again as Vasily Stalin. I talked to him before the broadcast.

I'll introduce myself. My name is Irina Podzorova. I am a contactee with extraterrestrial civilizations, with plasmoid civilizations, with spiritual entities. We have a series of live broadcasts dedicated to meetings with figures of the past who have disincarnated.

Our curator LiShioni from the planet Shimor, a specialist in astral interactions and communication with Spirits, is present here. He will observe the meeting.

There is a Spirit present here, an archon, from the sixth level. He asked not to call him either Peter or Vasily. These are his earthly names. The name he asked to be told was his spiritual name. His name is Pakhrun. He is a disembodied Spirit located on the sixth level. He says he remembers himself. Closer to him are the memories, of course, of Vasily, since they were the last. He analyzed them, and remembers the incarnation in Peter. He remembered the main points that were important for his development. He agreed to come and answer questions because he understands very well that people are interested in the past.

So, dear friends, I greet everyone! I will pass on whatever answer he gives.

07:28 The spirit of Peter I about succession to the throne.

Maxim: First question: was Peter the Great the heir of the Romanovs?

Irina: Yes. One of the heirs. When I was Peter, I was not the only heir, unfortunately. My brother Ivan also ruled with me. Sonya also got involved, a woman was not supposed to rule at all, but the boyars insisted on it. Then, when I had already grown up, I had difficulty dislodging it. I was little then. I had to inherit power in the body of Peter.

It will probably transmit slowly. He is a disembodied Spirit. They have their own peculiarity.

Maxim: Got it.

08:37 Life of the Spirit of Peter I in the Spiritual World.

Maxim: Irina, you went to get acquainted with the Spiritual World. What does he look like there? Tell me please. It is very interesting to me.

Irina: He mentally built himself a huge castle there with eight turrets, he lives alone. These towers look like medieval ones that used to be shot at with bows.

Maxim: With gunmen.

Irina: Open areas. He lives alone. A lot of rooms. In the middle of the largest room there is a throne, he invented it. He was sitting there, and I talked to him.

He is now the prince of demons. This is the archon. Sixth level. He looked like a man. It differed from people in that it had black wings at the back, like those of a bat, quite large. There were horns on the head, like those of a bull, slightly forward.

I asked how to convert his height to earthly size, he said: “About eight meters.” But I emphasize that this is not physical growth, but the size of his astral body, his Spirit, his energy. This determines the strength of his energy. There is no physical body for him to be that tall.

Now he has come in a different form; he is here with us in the form of Vasily. I see him in the form of a young guy in military uniform, just

like he was in the war.

Now he is slowly taking on the image of Peter, as in the portraits. With a mustache. He can change his image.

Maxim: “ It’s a pity for Irina. Maxim makes money from it.” Guys, come here to the Center. Meet me personally, Irina. When you don't know people personally, your judgment may be wrong.

Irina: It seemed to me that the person wanted to write: “It’s a pity that I don’t make money from it.”

Maxim: It’s really a pity that she’s not the one making money from you. Yes?

Irina: Yes.

Maxim: It's okay. I'm already used to everything. I understand what will happen after this broadcast. Guys, I want to remind you once again that we are now talking with the Spirit of Peter the Great, who was embodied on Earth immediately after his incarnation as Peter the Great in Vasily Stalin, Stalin’s son. Therefore, he associates himself with both Peter the Great and Vasily Stalin. No matter how ambiguous this may sound now.

12:07 The spirit of Peter I about the reasons for the decline in his spiritual level.

Maxim: Please tell me why you fell to the sixth level? What brought you to this? When you left the incarnation of Peter the Great, you had the thirteenth level. How did you fall from thirteenth to sixth? What led to this?

Irina: (Spirit of Vasily Stalin) I hated everyone, the top authorities, who sent me to prison for seven years for nothing. I fought. My squadron was the first at the front. When I fought, when my father was alive, it means I was good, I was awarded (shows orders).

Then suddenly I became a embezzler of public funds for just one question: “What happened to my father? Why didn't you help him? They locked me up for seven years, forgetting about my merits, the

fact that I fought and never hid on Earth (the plane shows). Although I could sit behind their backs. I had the right to do this, moreover, dad insisted on it, asked me. This is precisely why I hated them and burned my Soul with hatred (the fire shows). It still burns inside me.

Maxim: I understand. Now I will address you as the Spirit of Peter.

13:43 The spirit of Peter I about his training in Europe.

Maxim: You were sent to Europe for training. Was there such a moment?

Irina: I went myself.

Maxim: Did you go yourself?

Irina: Yes.

Maxim: They say that after Europe it was no longer Peter the Great who returned, but you were replaced. This is true?

Irina: Internally, yes, they replaced me (shows that my brain was turned upside down, my worldview was turned upside down). But the body, if that's what you mean, was the same. My actions and ideas about life completely changed after what I saw and compared (shows another image, as if standing in front of a screen: black on one side and white on the other). Where black is Russia and white is Europe (he wants to combine them).

Maxim: Listen.

Irina: For him, the comparison of life was like this. (Spirit of Peter the Great) Yes, those who said that they replaced me accurately guessed internally. My energy, then I said Soul, became completely different. It was after I saw the gap between life in Europe and the life they lived in Russia due to oppression. It was not someone outwardly who oppressed, but internal prejudices. When I saw this, I decided to change everything.

Maxim: Tell me, please, did anyone in Europe influence you to change

Russia? Perhaps you have joined the Masonic Order. Was there such a thing?

Irina: No. (Spirit of Peter the Great) I knew, but did not join.

Are you asking me why I decided to change Russia? I wanted everyone to live and feel free and happy, like in Holland, for example. Not like in Russia, where everyone was only waiting for handouts from the tsar, including the boyars. They didn't do anything themselves. And there everyone themselves sought to create a better life. They built cities, factories and ships. They did this without direction from above. They themselves knew what would benefit the state.

Maxim: Do I understand you correctly, there was no physical substitution, but did you change internally?

Irina: Yes, internally yes.

Maxim: Have you changed a lot internally?

Irina: Yes (shows a revolution of one hundred and eighty degrees - this is how the worldview has turned upside down). This change is like waking up in the morning and not recognizing yourself. Are you familiar with this condition?

Maxim: Just such a state - no.

Irina: Everything around became alien. Especially when I came back to Russia. Due to the fact that Sonya again began to raise the archers to illegally seize power. And I believed her. Because of this, I had to interrupt my studies. Believe me, I felt humiliated and disgraced when I, the king of a great power, learned from simple carpenters how to properly make the shape of a ship. However, I was forced to do this because we didn’t know how to do it.

Maxim: Tatyana Mironova, listen carefully to the broadcast. Not from the thirteenth level, he fell to the sixth. He entered like Peter the Great on the twelfth level. And he came out like Peter the Great on the thirteenth level. And then he incarnated into the son of Joseph Stalin - Vasily. Therefore, for you, when you do not watch the

broadcast correctly, there may indeed be some kind of nonsense.

18:40 Spirit of Peter I about his first wife.

Maxim: Please tell me why you put your wife in a monastery? What was the reason for hiding her?

Irina: Dunya, or what? My mother forced it on me. I offered to marry her, because I had to rule the country, and I did not have an official marriage. I didn't like her, I couldn't stand some of her antics.

(Peter wanted to change the country, carry out reforms. But she said to leave it as it was, she was against it. Because of this, they did not understand each other, he never loved her.)

(Spirit of Peter the Great) Even when I lived with her in Russia, I had other women. And when I returned from Europe, I didn't want to go to her. I realized that we cannot live together.

Why did I send her to a monastery? Then it was a better option for her than just divorcing her. She would then be rejected by the king. My enemies could take advantage of this situation. She had a son from me, Alexey. They could have plotted together. It was better for her to live in a monastery. Moreover, I did not immediately send her there. At first I offered her to live in the city. She refused, and I was forced to send her there.

20:58 Spirit of Peter I about other incarnations on Earth.

Maxim: Did you have other incarnations on Earth before Peter the Great?

Irina: Yes.

Maxim: Do you remember them? Can you tell us?

Irina: (Spirit of Peter the Great) I was an official in China, an assistant to one of the emperors (he says a non-Russian name). Qing Dynasty. A little earlier, I was incarnated as a preacher of Christianity who lived somewhere in the fourth century. This is one of Arius' students.

Maxim: Thank you!

22:10 Spirit of Peter I about the death of his son Alexei.

Maxim: I am addressing Peter the Great. Why did you kill your son?

Irina: I didn't kill. The whole point is that he wanted to enter into an alliance with my enemies from another country - with the Swedes, not the special services, but the servants of their king. I wanted to sit on the throne before I die. They found letters he wrote.

He traveled to different cities, made friends with priests who supported him. I didn’t choose the patriarch. Because of this, all the priests turned against me, he was friends with them, with his mother, whom I sent to the monastery, he constantly went to see her. Found evidence.

My second wife, Martha, whom you know as Catherine, her friend and distant relative found these letters. My son, under the guise of a business trip, left (shows a city on the border) and wrote letters to priests and major military leaders about getting everyone together and overthrowing me. Allegedly, I am doing harm with my reforms.

I called him to my place and talked to him, but he began to deny everything. I showed these letters, and in order to protect myself, I put him in prison. There he died. I didn't touch it myself. I was officially informed that he died during the escape. But to this day I think he committed suicide. By the way, in the Spiritual World, when I arrived there, he did not want to see me.

Maxim: Interesting.

Is it true that Mikhail Vasilyevich Lomonosov is your illegitimate son?

Irina: No. I didn't have this. I know who you're talking about.

25:26 The spirit of Peter I about the construction of St. Petersburg.

Maxim: Another very important question. They say that the city of St. Petersburg was built by you. And there is a version that these are the

ruins of some old city that you restored. This is true?

Irina: This was not a city. In the place where the Neva flowed into the sea, there were several Swedish fortresses and fortifications. (Shows round wooden turrets with a wooden wall between them). At this place with fortifications, a little to the southeast, I began to build the first fortress.

Maxim: Guys, regarding the replacement of Peter, he has already answered that internally he has changed a lot. I'll tell you: they write one thing, they give us information - that's another. They say that Vladimir Vladimirovich was also replaced. You can say whatever you want. The goals of this hex can be completely different.

It turns out that there were no ancient megalithic structures? Were there only wooden structures where you built the city?

Irina: Perhaps they were, but deep in the swamp. There was an area where stone buildings could not stand for a long time without support; they needed to be strengthened. (Shows how sticks are driven in.) I liked the place not only because it was an “exit”.

Maxim: There were some kind of walls, fortifications in the swamp, it turns out?

Irina: They weren’t made of stone (shows wooden ones, they stood on a hill). There was a forest around them (pine trees also showed a swamp).

Maxim: Why was this particular place chosen?

Irina: I immediately liked it, not only because it was an outlet to the Baltic Sea, as many told me, for which I fought for a long time with the Swedes and lost many people. Yes, and this, too, of course, was one of the reasons why I chose this place.

When I landed (shows the ship, landed on the shore, stands on the seashore and looks to the west), I immediately decided that the capital would not be in Moscow, but here. Here in this place where there was nothing yet. I already saw the city here in my mind.

Maxim: Our viewers ask another question: what did you use to saw the granite then?

Irina: St. Petersburg was not built in a few years, and not all of it was built during his reign. He doesn’t even understand that different stones were used there. To do this, he called many people from all over the country. There were also stonecutters who cut out such blocks and stones and carried them. There were special metal tools for this. I don't know if it was granite. It shows something else, light in color. Maybe later, because the city was built over several centuries. It didn't all happen right away. Not all of it was built under Peter.

29:58 Spirit of Peter I o kunstkamere.

Maxim: Please tell me, why did you make the cabinets of curiosities?

Irina: What do you call that? (We need to explain to him.) Where were the exhibits?

Maxim: Yes. What attracted you to collecting freaks?

Irina: (Spirit of Peter the Great) I was always interested in the structure of people, medicine, and at one time I wanted to become a doctor. Not a ruler, but at one time a doctor. I saw something similar in Holland. They had a warehouse, a collection of these dead, unborn children who had various developmental disorders. I found this interesting. I decided to show it. (He saw it and decided to repeat it, especially since he was interested in medicine. It was just interest.)

31:16 The spirit of Peter I about boyars and beards.

Maxim: Please tell me why you started cutting off the beards of the boyars, completely denying our old Vedic tradition? What was this for? They say that you got people drunk on alcohol, that a lot of people got drunk in your presence. This is true? Let's start with the beard. Why did the boyars need to shave their beards?

Irina: There were not only beards. So that they would quickly enter into European culture, the work to which I wanted to belong. The beard was a symbol not of savagery, but of backwardness, like the peasants. (He wanted to make nobles. For him, as I understand it, it

was high society that looked after itself like a European.)

Maxim: He takes care of himself, right?

Irina: Yes. An unkempt peasant or priest is a person who does not take care of himself, and his appearance is not important to him. It was more beautiful in Europe. He liked it. He didn't have a beard. (Spirit of Peter the Great) I wanted them to be like me.

Maxim: I understand. Why are there decrees regarding vodka in taverns, so that there is vodka? What was this for?

Irina: I liked to drink vodka and alcoholic drinks. I wanted everyone to feel this, to have this opportunity. This is the first.

Second. I quickly realized that all the changes I was introducing required funds. Including for the construction of St. Petersburg, and not only St. Petersburg. For the construction and development of Voronezh, for example, the development of Voronezh shipyards. For the construction of many factories for processing the same, for example, metal, iron, coal and so on. I raised taxes, introduced tax payments, and became as sophisticated as I could. The introduction of smoking and alcohol quite quickly replenished my coffers for these transformations. My European and Dutch friends did not give me a single bag of gold. I obtained them from my people.

Maxim: I understand. You were not a member of any group of Freemasons; you came from Europe as Peter the Great, the same as when you left. They say you shrunk in stature and had some sort of accent. This is true?

Irina: (The spirit of Peter the Great) Has not diminished. I was always taller than two meters, taller than others.

Maxim: Did you really have an accent in your speech after Europe? Or didn't you notice?

Irina: Perhaps this is because I was in Europe for two years and spoke a different language. But I also spoke Russian with my associates. People talked because they didn't recognize me.

Maxim: Natalya Kargapolova, you are asking a question that we have already answered more than once. Nobody replaced Peter the Great. Watch the broadcast carefully from the very beginning.

Irina: He says that he himself has changed very much, that's why they told him that. Precisely after Europe. (Spirit of Peter the Great) I went there twice.

Maxim: I went for the second time. Maybe they replaced you after the second time?

Irina: No. The second time he (shows some paintings) went to museums more. In Paris I examined the paintings. (Spirit of Peter the Great) I went more for treatment. I was already sick at that time and went for treatment to a foreign resort (shows doctors wearing glasses, drinking mineral water).

Maxim: I understand.

Have you issued decrees to kill elders who are over two hundred years old? Were there such decrees?

Irina: Why do I need this? No. Why should I kill the elders? I had the death penalty only for state crimes, high treason, murder, robbery.

36:50 The spirit of Peter I about the reasons for his death.

Maxim: Please tell me how you died? Were you poisoned or something else?

Irina: No, I was not poisoned. I died of illness. I realized this later. After leaving incarnation, when I reached the thirteenth level (he is now recalling these events in his memory), I also asked my Consulting Angels why I died. They told me that I was putting a lot of strain on my body.

It was at Epiphany (shows him standing near an ice hole, the wind blew through him). He has hypothermia. Then he started taking alcohol and took it for several days. My Angels told me that I had an infectious disease that began to spread throughout the body when the body's defenses were gone. I didn't take care of myself. The last few

days there was a very strong pain in the lower abdomen, as if being cut with a knife, I could not go to the toilet. The doctors inserted tubes and drained everything.

Maxim: There is a version that you died of syphilis. This is true?

Irina: He doesn't know. He says it is an infectious disease, but the disease was not defined at the time.

(LiScioni speaks) I also spoke with his Angels-mentors (he does not know the cause of his death, he does not know these microorganisms, because he was not interested in this). Based on the vibrations of his physical body, it was determined that he died not from syphilis, but from complications of chronic gonorrhea, which was not treated.

At that time there were no antibiotics, and he constantly weakened his immunity with alcohol and camp life. Constantly on a horse, he could sleep in the forest. This lifestyle has weakened the immune system. There was also constant stress, he was constantly nervous and worried that the boyars were not listening to him, that the reforms were going too slowly, he was rushing everyone.

All this together led to the fact that these gonococci became aggressive and created something like sepsis for him. High temperature, at the junction of the urethra and the bladder there is a formation filled with pus. As a result, the kidneys could no longer excrete fluid, resulting in poisoning and an additional infection. He had been suffering from this disease for more than twenty years at the time of his death.

There is a good chance that his vibration changed when this microbe entered his body during his first trip to Europe. As you understand, he went without his wife, and he has never been an abstinent person regarding sexual intercourse. Since there were no antibiotics, they could not cure him, although he had the best doctors.

Maxim: I understand. Thank you

41:35 The spirit of Peter I about the change of chronology.

Maxim: Please tell me, in Russia we had the year seven thousand two

hundred and eight. You said to recognize it as the year one thousand seven hundred. Was it really like that?

Irina: Yes.

Maxim: You changed the calendar. Why did you do this? What were the motives for this? Why didn't you like the old calendar?

Irina: It was inconvenient to communicate with Europe. They had long been counting from the birth of Christ, and not from the creation of the world, where there were more than seven thousand years. I wanted to switch to the European calendar, it was more convenient and accumulated fewer errors. This was done to coincide in trade and relations with Europe.

Maxim: Was this done in order to open a window to Europe? Right?

Irina: Communicate more. I didn't just communicate. I invited them to come to us, European specialists. I entrusted the Germans, Danes, representatives of Denmark from their army, their officers to teach their soldiers, to form an army. This is inconvenient when the calendar is different.

Maxim: I understand.

42:58 Spirit of Peter I on the construction of St. Isaac's Cathedral.

Maxim: Who built St. Isaac's Cathedral? You know?

Irina: If you look at how many people built it, it was probably more than two thousand people. They drove us to this place. Not he, but the specific builders who developed this plan. He just watched. The cathedral took quite a long time to build, and it was rebuilt and changed.

Maxim: How were such large megaliths erected in St. Isaac's Cathedral? What equipment did you use?

Irina: Did they take you to a height?

Maxim: Yes.

Irina: As usual, they tied him with ropes and lifted him up. Some pulled, others pushed with something. The wooden platforms had already been folded, and they received him on this rope, somehow installing those that were pulling. It was a well-coordinated group of people. It could be that a stone could fall from this fixed loop, they could be tied poorly, and crush someone.

44:30 Spirit of Peter I about other civilizations.

Maxim: Please tell me, when you were Peter the Great, did you hear anything about aliens? About extraterrestrial civilizations, maybe?

Irina: About aliens? Do you mean your employee LiSioni?

Maxim: About races that were not on Earth. Have you heard anything? Maybe they flew to you? Have we talked to you?

Irina: Not deliberately. I didn't communicate. It was about aliens that I had not heard. I heard that there are Spirits who live in the sea, in the forest, in the house.

Maxim: Did you have people who communicated with these Spirits?

Irina: Have you talked? Sorcerers, or what?

Maxim: Sorcerers. Were you at your court? Have you used the services of sorcerers?

Irina: No. This is, rather, my wife, Sonya, Dunya and mother. It was a woman's job to believe in it. I was a practitioner. On the contrary, I laughed: “Conjure a spell so that we don’t have to build a ship, but so that it builds itself.” Treated it with humor.

Maxim: I understand.

46:02 Spirit of Peter I about the flag of the Russian fleet.

Maxim: Why did you transfer our fleet to the St. Andrew's flag? Why didn't the fleet fly the Russian flag? What contributed to this? The entire Russian fleet sailed under the St. Andrew's flag. Why not under the Russian flag?

Irina: This is in honor of the Apostle Andrew. He was also in Rus'. This was also a Russian flag. In honor of him, the event that he also preached in Rus', if we mean the First-Called. He was also a navigator. Andrew the First-Called sailed first from the Mediterranean, then from the Black Sea, along the Dnieper and rivers by ship. (Shows a long wooden ship). There were a lot of people.

47:10 The spirit of Peter I about his contacts with earthlings.

Maxim: Please tell me, have you come into contact with any contactees yet? Has anyone requested contact with you on Earth?

Irina: Who?

Maxim: People who wanted to communicate with you, get information from you. We have many people who want and can communicate with Spirits.

Irina: Do you mean when I was already in the Spiritual World?

Maxim: Yes. When you were the Spirit.

Irina: Yes, of course, they asked me. They called. A long time ago, there were no electric lamps on Earth then. It was by candlelight. They called me. I talked to them. This was before the incarnation of Vasily.

Maxim: Before Vasily’s incarnation.

Irina: Yes.

Maxim: And after you left the incarnation of Vasily, were you called as a Spirit for communication?

Irina: Yes. They called me too. I came from the sixth level. I remember

well. After Vasily's incarnation, I was called to Earth fifteen to twenty times. This is not the first contact.

Maxim: I understand.

48:35 Spirit of Peter I about the Tatar-Mongol yoke.

Maxim: Please tell me, do you have the blood of Genghis Khan in you?

Irina: Yes, a third of Russia has it, if by Genghis Khan we mean the Asians who attacked.

Maxim: Was there a Tatar-Mongol yoke?

Irina: Yes, but before me. I was not there.

Maxim: Indeed, the Tatars captured and owned large territories and collected tribute?

Irina: You call Genghis Khan and ask him. He'll be more precise.

Maxim: Call Genghis Khan? The idea is very good.

Irina: You can Dmitry Donskoy. He will probably want to talk to you.

Maxim: Dmitry Donskoy, I'll write it down now.

Irina: He saved Russia.

Maxim: Yes, he saved Russia from the Tatar-Mongol yoke.

Irina: Haven't you talked to Sergius of Radonezh yet?

Maxim: No. What's happened?

Irina: He also helped to rid Russia. I heard about him, about the legend that he was taken to heaven on a flying chariot.

Maxim: Sergius of Radonezh?

Irina: Yes. I was told this as a child. Mom or one of the teachers. You can ask him. Maybe these are your aliens.

Maxim: I understand. Fine. Sergius of Radonezh, Dmitry Donskoy or Genghis Khan. Guys, write in the comments who is better to invite: Sergius of Radonezh, Dmitry Donskoy or Genghis Khan.

Irina: They are already writing, Vladimir is asking a question.

Maxim: Okay, let's ask now.

Irina: They wrote that Nikola Tesla.

50:24 Spirit of Peter I about potatoes in Russia.

Maxim: Please tell me, did you bring potatoes to Russia and start positioning them?

Irina: Traders brought them before. I popularized it to be imprisoned. But people did not understand then what to do with it, especially the peasants. When we bought it and grew it, we tried to eat the berry.

Maxim: They are poisonous.

Irina: There were even poisonings. And then people were indignant that I was bullying them. (Shows there were disturbances).

Maxim: It turns out that you killed the spread of turnips. They started planting potatoes and stopped planting turnips.

Irina: It was probably later. When I introduced it, turnips were also planted. There weren't enough potatoes.

Maxim: Not enough?

Irina: “ Thank you for the potatoes!” He says: “Please.” Nikola Tesla, they write, should be invited.

Maxim: If the audience is really interested, we will gradually invite you.

51:53 The spirit of Vasily Stalin about his disincarnation.

Maxim: Please tell me where you are, in what world? Do you know Lucifer? He is on your level, on the sixth.

Irina: I am next to my father, who gave birth to me, like Vasily.

Maxim: Next to Stalin on the sixth level?

Irina: Joseph. Yes, he is also on the sixth level. He came for me when I left my body.

When I turn to the memories in the body of Peter, I understand that I was a believer (icon, Peter himself praying). Although I didn't like all these ceremonies, all these rituals, anointings and so on. But I prayed myself.

When I was in Vasily's body, I was an atheist. Non-believers (shows the last day, he is very worried). Okay, I'll tell you now.

Shortly before my death, as the son of Joseph Stalin, my last body, I had to change my surname. Remove the name Stalin at the insistence of Khrushchev. I felt like a traitor who did this for a handout in the form of a pension. At that time I was sure that Stalin's death was not accidental. I didn't think he was poisoned, they just didn't provide help. I was next to him at the time of his death in Moscow at the dacha. I saw that the doctors did not come to him for a long time and were whispering in the next office. I was sure that this was an order from Khrushchev, Malenkov and everyone else.

When I was released from prison because I was in poor health, where I ended up, as I already said, unfairly, Khrushchev himself summoned me. I spent half an hour with Stalin's son (smiles). He told me to go to Kazan and not stick my head out anywhere. He said that I had annoyed the entire party leadership with my drinking and riotous lifestyle with women. He himself was not a saint either. I knew a lot about him. I decided to leave.

Then Masha - my last woman in the earthly world - nevertheless suggested that I change my last name, sign with her in order to live in peace, receive a pension, and so on. I was already sick. After I did this, I felt like a traitor to my father. Only alcohol saved me from these thoughts. I remember my last, maybe two or three days (shows some friend).

Maxim: Guys, while Irina is drinking, I'll tell you that we are not the ultimate truth. If you like the information of some other contactees, you can listen to them. We do not claim to be the truth. We can only transmit information that is given to us by those who come to transmit it. And who to believe, not to believe, is up to you to decide. We do this not for the sake of show, but in order to tell you that this is all real, that this all exists. And for us, what is happening now (for me personally) is phenomenal things.

If five years ago someone had said that I would do this, I would have twirled my finger at my temple and definitely wouldn't have believed it. Therefore, I ask you to be more loyal to the project and broadcasts. In general, it is very difficult to fight windmills. There are a thousand people, there are a thousand opinions. You are always free to choose and listen to whoever you want.

Irina: I spent the last two or three days before my death intoxicated (shows how a friend brought him wine).

(He drinks constantly. Another brought vodka and drank it too.) I don't remember how long. I ended up in the hospital. There, my heart felt bad (shows that I am unconscious). After this hospital I continued the same lifestyle. I scolded myself, and Khrushchev, and my whole life.

At that moment I lowered my vibrations, my qualities to the sixth level. But I didn't know about this before, but then I found out all this. It was on the last day that I drank a lot. It was already difficult for me to walk, my legs hurt. In my intoxication, it seemed to me that the pain had gone away. I walked around the room, then I remember (like having a heart attack), I began to choke and fell on the bed. My wife came up, I was drunk, I didn't understand what was happening. The first thing I saw later was that I was standing next to my wife, and my body was lying on the bed. At first I thought it was a dream. Then the whole room began to be surrounded by very strange, scary creatures

that usually come to alcoholics in jokes.

Maxim: Demons, devils?

Irina: I thought that I had been drinking too long, I finished drinking. But they grabbed me by the arms and dragged me into the darkness. Then I saw a very tall, handsome young man. He was all glowing. He turned out to be my Guardian Angel, who told me that I had come to my friends, with whom I had been friends lately, on the sixth level, and that I was a Spirit. At first I thought that I was in a hospital and that this was Earth.

Maxim: Don’t you understand that you have entered the Spiritual World?

Irina: Yes, he had an eclipse of consciousness. He didn't understand where he was. It was like this for some time, he can't say how long. It dragged on endlessly.

I took this young man for a doctor. He explained to me that I was in the Spiritual world. I swore at him and said that he was lying to me.

Maxim: Please tell me why demons love to swear so much? What does this have to do with?

Irina: What do demons have to do with it?

Maxim: If I remember correctly, at first you introduced yourself with obscenities. We didn’t talk on air about how you introduced yourself, and we won’t broadcast your words, because there’s swearing.

Irina: Yes, indeed, I told Irina what my first and last name was. I consider this an expression of my essence. What you heard is the main action.

Maxim: Just broadcast that word that is bad, just say that it is a genital organ, say how he introduced himself, so that people understand.

Irina: Now. His name, as an archon, in our opinion, is a first name, a

surname, only this is his personal name, and the second, as an expression of his belonging to the vibrational family. For us it is genus, but for them it is quality. Initially he introduced himself...

“Maxim, please invite Andrew the First-Called.”

Maxim: We cannot personally invite the Spirit of St. Andrew the First-Called, he is now embodied on planet Earth, we can only communicate with his phantom.

How did he introduce himself?

Irina: He introduced himself that his name was Pakhom. His surname, his belonging to a certain family of archons, consisted of two words. The word “shove” and the second word swearing are the male sexual organ.

Maxim: Pakhom Kick and continue.

Irina: Swearing, yes.

Maxim: And then from three letters “soul”. Shove the shower, right?

Irina: We agreed with him that he would introduce himself differently, since this is a live broadcast: people are watching, children. You can't pretend like that. He understood me and said: “Then call me Pakhrun.” Here's a compromise I found. (Spirit of Vasily Stalin) What's wrong with that, if that's really the case? If I did it, what's wrong with that? Why shouldn't I introduce myself like that?

1:04:24 Life of the Spirit of Peter I and Vasily Stalin in the Spiritual World.

Maxim: Please tell me, do you somehow interact with our real world, maybe as a succubus, incubus? Do you come to people? Maybe you take energy from them? There are also beliefs that demons come to people.

Irina: Are you interested in the life that I now lead in the Spiritual world?

Maxim: Yes.

Irina: I have about two hundred and fifty demons under my command.

Maxim: Under your command are two hundred and fifty demons?

Irina: Like the prince, when I realized that I was in the Spiritual world, like an archon, when I believed that my body had died, that I was not in the body. By the way, I felt it to be quite dense and opaque.

Maxim: Tell me, please, can you influence people who watch this broadcast without consent?

Irina: How to interact without consent? I am now next to you and talking to you.

Maxim: Thank you!

Irina: I don’t see people writing. I don't connect to the contactee to read messages. Only her curators can do this. I have different vibrations. I am not attuned to the contactee field, as your alien LiShioni explained to me, I asked him. He said that her chip was tuned only to Spirits of a certain vibration. It is impossible for me, as an archon, to connect to her consciousness. You can only communicate mentally, but you cannot read anything through your eyes.

Maxim: Tell me, what is it like to be on the sixth level? What are you doing there?

Irina: When I believed that I was Spirit, I was given a task. At first, I led a squad of one hundred and twenty-five demons. They came to me and asked different questions. How can they connect with different people to convey their ideas to them? I told them about this.

Why have I now been put in charge of a community of two hundred and fifty demons? After all, in my last life I had the skills of a military leader. I use them in my activities. These demons are on the fifth level. I lead them, give them tasks on what to do in their world, with whom to communicate.

Maxim: It turns out that Joseph Vissarionovich Stalin is now leading an entire armada of demons?

Irina: He himself says that he leads two hundred and fifty.

Maxim: And Stalin, who is on the sixth level, our great leader, is now leading a huge armada of demons, it turns out?

Irina: Are you talking about your father?

Maxim: Yes.

Irina: My father has about five hundred, the number varies. I haven't seen him for quite a long time, in your opinion. It's like a series of events. I only know one thing. Although our Angels asked us about incarnation, his incarnation has not yet been selected. And I was offered embodiment, by the way, on another planet. I was told that this is the planet Esler. They said that this was the female body of an alien so that I could raise my vibrations on this particular planet. My Consulting Angels - I have four of them - said that this is impossible on Earth now. I talked to them, they told me that I had too painful memories associated with all earthly life. We need a change of scenery.

Maxim: Why not incarnate into thin-material plasmoid civilizations? Why in dense matter?

Irina: I understand why you ask. They told me that I needed to go through and work out my qualities in the dense world, but the Earth was not suitable.

I talked to them about it and agreed to this option. I was shown an option by my parents, and I liked them. Now they will be able to conceive my body in about two months, if you look at earthly time. I will go into embodiment. By the way, my ex-father does not approve of this. He wants me to stay with him.

Maxim: On a demonic level?

Irina: So that I can stay with him for now.

Maxim: How does he justify this? Why do you need to stay there?

Irina: He wants to communicate with me, he wants us to also lead the demons. He believes that this is useful for them, so that there is no chaos.

Maxim: Should Soviet power be built there?

Irina: Communism.

Maxim: Now we need to build the demons, put them in place. "Demons are people too." Yes, demons are people too. And people are demons too, guys.

I say again, please do not be reprehensible about this broadcast. We can only give what we can.

Irina: He writes a question, already many times.

Maxim: Guys, unfortunately, we are running out of time. We're on the air at eleven o'clock.

Irina: Vladimir’s question is probably necessary anyway.

Maxim: Are you communicating with Lucifer now?

Irina: Not at the moment. I communicated with him, maybe a couple of times after disincarnation, he leads many tens of thousands of demons. It's like the president.

I communicated with him at the general gatherings of the archons. Now my task, as an archon (before incarnation), is to lead the demons that come to me as a boss. They are the ones who, among other things, come into contact with people and through them receive the feeling of sexual intercourse. Since they asked me about my first and last name, it’s easier to say that I lead that group of demons who also like to do this. I myself, when sometimes the Souls of women who have already disincarnated come to me... I do not come into contact with those who are embodied. I'm just telling demons how to do it.

Maxim: Please tell me, can you lie to us, deceive us?

Irina: As I remember, that's how I tell it. I don't need to do this. I came myself.

1:13:24 The spirit of Peter I about the results of his incarnation.

Maxim: Please tell me, like Peter the Great, do you think you were able to raise Russia to a new level?

Irina: I think I could. If I took care of my body, I would live longer. Left the incarnation ahead of time. I still had about twelve years left. I destroyed it with my lifestyle and only realized it later, when I was at the thirteenth level.

1:14:02 The spirit of Peter I about his next incarnation.

Irina: Then I decided to go to Stalin's family. For what reason did I decide to join Stalin's family, his youngest son? For the reason that I had a grudge against my son when I disincarnated, although I got to the thirteenth level. I got there because I was merciful to the poor, always helped them, built churches. Before I died, I confessed and took communion. It raised my vibration. But I still felt resentment towards my son. I decided to incarnate with Stalin, just as the Spirit of my son incarnated with me, as a ruler. Try to be in his place.

Maxim: Have you been?

Irina: Yes. But I never thought of overthrowing my father. On the contrary, I defended him.

1:15:14 Spirit of Peter I about doubles.

Maxim: There is a lot of information about doubles. Did you have any doubles? Have you used doubles?

Irina: I used it, but not in Russia. I changed my surname and appearance in order to get to Europe, so that I could communicate with ordinary people there as an equal. I didn't want ordinary carpenters, joiners, shipbuilders, and soldiers to recognize me like

Peter. They then started bowing to me and doing all this sickening etiquette that I couldn't stand. So I introduced myself as a different person and communicated with them. They took me for a simple person. Precisely in front of them, not in front of the Russians.

Maxim: Did you have doubles in Russia? Have you used it? Did you hold any meetings, sent you to any feasts in your place?

Irina: I personally didn't send anyone. They reported to me that there were impostors who called themselves by my name in cities in order to take power, to raise a rebellion, for such a purpose. But abroad I presented myself differently.

Maxim: I thank you! I send you the Light of my Love so that you enter a new incarnation, and in the new incarnation raise your level to Angelic.

Irina: (He smiles). I also want this. I am grateful to you, Maxim, for calling me like Peter the Great. I also thank contactee Irina. This meeting gave a lot. She made it possible to compare her life, to a greater extent to compare the lives of Peter and Vasily. You and the people with whom you communicate asked questions to both Peter and Vasily.

(This helped him to combine them. Complete the analysis.)

Maxim: Thank you! Guys, you write: "Peter rotted in a French prison in an iron mask." I am one hundred percent sure that you sat next to him in this prison and rotted in this mask, since you speak so confidently.

We are not saying that we are the ultimate truth. We're talking about what you can think about how this might be. We are just offering an option that we can pass on to you. We are not saying that this is the only way and no other way. Maybe something different exists in this world.

Irina: I can tell you why I lowered my level to level six. This happened precisely because of hatred. Instead of forgiving and reconciling, I drowned it out with vodka.

Dear friends, you can never drown out hatred and anger with vodka. This is a lie. This will lead to a lower level of evil people like you who will treat you very cruelly. The path to the Light is only through love and acceptance. What the clergy and priests tell you, what seems funny to you, there is a lot of truth in it.

1:18:56 Wishes of the Spirit of Peter I and Vasily Stalin.

Maxim: What would you wish now for the new Russia and those people who live here?

Irina: Never want to get into power. There's a lot of dirt there. Moreover, never want to get into power where they rule over money. There's even more dirt there. This can greatly lower your vibration. As advice.

Maxim: Don’t meddle in power.

Irina: Getting there is a temptation. You need to be a very strong internally person who believes in God in order to remain pure there. For example, I didn’t stay.

Maxim: Thank you very much! Dear friends, I thank you! Once again I ask, please do not judge this broadcast harshly. We understand that there are other contactees who provide different information. We only provide information that we can provide. I myself was very surprised about Peter the Great and Vasily Stalin. In general, how to compare. But after the broadcast, many things fall into place for me. Guys, high levels to everyone! High vibrations to everyone!

Irina: Thank you!

Maxim: See you again! See you again at the retreat in Abkhazia! It will be very interesting. This will not be a teaching retreat. These will be very interesting conferences and meetings. Working from the stage. Conferences with our interstellar friends, with the Spirits. Everything will be at the request of people who come to Abkhazia. Guys, we are waiting for everyone! There are already one hundred and fifty of us. I hope we will still reach two hundred people. Bye everyone! See you all!

Irina: Bye!

November 28, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

The spirit of Peter the Great and Vasily Stalin - the last Tsar of All Rus' (since 1682) and the first All-Russian Emperor (since 1721); youngest son of the General Secretary of the Central Committee of the RCP (b) Joseph Stalin;

LiShioni is a representative of the planet Shimor, a sociologist, a specialist in the astral world and its interactions with the material world.

https://www.youtube.com/watch?v=SF3RArSnX3I

00:00 Start of video.

Maxim: Dear friends, hello everyone! Let's start the live broadcast. Today we have a very interesting contact with Joseph Vissarionovich Dzhugashvili (Stalin). Therefore, prepare your questions. I also prepared for this broadcast. I prepared some questions in advance so

that I could conduct this broadcast with you. How can you hear me? Great.

So, I'll start the broadcast with good news. The first good news: we have expanded the geography of shipment of our probiotics. Now we can ship to Belarus, Kazakhstan and some other countries. You can find out about this at the link below this video.

Plus now we have a New Year's promotion. We decided to give all of you the opportunity to purchase these probiotics and try them for yourself. We have a lot of reviews, and they are all positive. There are reviews even from my mother, who took these probiotics, she really has serious improvements and changes.

There is one more good news. The hotel in Abkhazia, where we are going, is preparing a grand show for us, fireworks, surprises. Plus, the summer pool opens up for us. Therefore, take swimming trunks and swimsuits with you. On New Year's Day we will swim in the summer pool. We will have retreats and events not only in hot springs, but also in a nice summer pool.

Of the most interesting news, this is probably all. We are in Abkhazia, our retreat is expanding. There are few places left, about 10-12. And we are closing reception for the New Year’s retreat, because the hotel will not be able to accommodate us in such numbers.

I give the floor to Irishka. Irish, have a seat.

02:58 Introduction of participants.

Irina: Hello everyone! Dear friends, I congratulate you all on Constitution Day!

Maxim: Yes, thank you, Irish. Happy Constitution Day to all lawyers too!

Irina: On this day we have a very interesting contact on the topic of a slightly different Constitution, which was accepted by the Spirit who is now next to me. The Constitution he signed was somewhat different from the modern one. The very word “Constitution” says that the most important thing is that there must be order in the country, there must

be a uniform law for everyone. For the people and for the rulers. We have the phrase “Constitutional Monarchy”. There are countries where even monarchs (kings, czars and emperors) must obey the Constitution.

Today, on Constitution Day (this is not at all accidental), we have contact with the Spirit of Joseph Vissarionovich Stalin. This is his pseudonym, which he took after joining the ranks of the revolutionaries. Real name Dzhugashvili. His Spirit is with us now.

Our curators are also here: LiShioni from the planet Shimor and MidgasKaus from the planet Esler, who helped him arrive on time. In the Spiritual world, where he is, time does not exist. He came at the suggestion of his curators that it was time.

04:40 Spiritual level of Stalin.

Maxim: Great. Then I will ask the most pressing questions that people have sent me. What spiritual level are you at now?

Irina: Sixth.

Maxim: At the level of the Archons?

Irina: Yes. His vibration level is slightly different, and I adapt to accept his mental images.

(Spirit of Stalin) I greet you, inhabitants of this planet. I understand that through Irina I am now addressing not only the residents of Russia, but also the residents of the whole world. This is what those beings whom she calls her curators, these embodied Spirits, told me. And they told me that this program would be watched by people all over the world. I salute you!

Maxim: Just a question. The microphone crackles again. No, we won't change anything. Guys, this is already some kind of nonsense. Every time we communicate with the Spirit at a low or high vibrational level, something necessarily happens to our equipment. Before this everything was fine.

Irina: Yes, interesting, finally.

Maxim: What do you think brought you to this sixth level?

Irina: Politics, which I was engaged in as a matter of my Soul, the whole meaning of my life brought me to this level. It is my own because I live this way, I feel this way.

Maxim: Please tell me, what are you doing now in the Spiritual World?

Irina: In the Spiritual world, I communicate with people like myself and with other Spirits who are on lower levels, I tell them about my life, I answer the questions that they ask me.

Maxim: Do you know the one we call Lucifer?

Irina: Yes.

Maxim: Do you communicate with him?

Irina: I'm communicating. As I understand it, you understand Archon by this word?

Maxim: Yes.

Irina: Because there are several other entities that are called that. Archon, as I understand it, you are interested in that Spirit, which in Christianity is called Satan?

Maxim: Yes.

Irina: This is Archon Lucifer. Yes, we communicate with him from time to time, as needed, when he agrees to accept. He has his own space, he appoints, calls to him. Sends mental signals, and one or another Archon comes to him.

08:02 Stalin on ideologies Archontov.

Maxim: We recently had a conversation with your son.

Irina: Yes, I know.

Maxim: Is he now at the same level as you are, or lower?

Irina: On the same one, on the sixth.

Maxim: He said that he controls an army of demons. What are you doing?

Irina: I wouldn’t call it management in the political sense. These are more like advice and answers to questions. It’s not like in politics: he issued a law, and it must be followed. It's different there.

Maxim: How is it there?

Irina: Like answers to questions, advice. There is almost no directive form of management there. Archons and other demons are very freedom-loving and do not tolerate being forced.

Maxim: You have a large number of demons under your control. I understand correctly?

Irina: You can say that I am their teacher. I now have more than one and a half thousand of them.

Maxim: What do you teach them?

Irina: Various. There are not only those who are going to incarnate. But also those who come to embodied Spirits not only on Earth. I teach them how to contact incarnate Spirits. How to contact and talk to them about our ideas. About the fact that freedom is most valuable. I teach them our ideology of the Archons.

Maxim: What is the ideology of the Archons?

Irina: The ideology of the Archons is that we have the right to any choice. And that's a good thing, even if the choice seems bad. This is good.

10:35 Stalin about his incarnations.

Maxim: Please tell me, before you incarnated here on Earth, where were you incarnated?

Irina: I was also incarnated on Earth, in Peter III.

Maxim: In Peter III?

Irina: The grandson of that Peter, who later incarnated in the body of Vasily, became my son.

Maxim: Very interesting.

Irina: During my life, I was in contact with the Spiritual world, but it was unconscious. And now, when I came to my spiritual level, and the Angels met with me, they told me that I got to the sixth level because I went the wrong way twice. Not for the purpose of its incarnation. I dodged her.

Maxim: What were your goals for implementation?

Irina: When I left the body and connected with my Spirit, I regained the memory that I had lost. And I remembered my tasks, what I wanted to do before the incarnation. Before my last incarnation, I was level twelve. And there I set the goal to reach level seventeen, as I remembered. For this I had to not be a ruler. Initially this task was not there.

My initial task is to be a priest, get married, have children and develop Love in myself. I incarnated in the body of Peter III from the eighteenth level, before that I was an Angel. And there I also did not fulfill my task, because it was also not my task to rule Russia. But the circumstances developed so that there were no more contenders for the throne. And in this case I began to rule. This did not meet my goals. I shouldn't have done this. And even more so, I should not rule the way I began to do so. Because I avoided it. When there was no one left to lead the country, I did not take it upon myself. And because of this, when I left, my level was no longer level eighteen, but level twelve.

And all this happened because I did not love either myself or the people. And therefore, I had a task before incarnating as Joseph - to love my family, my wife, my children. Just learn to love family. But I didn't fulfill it, I went into power. That's why I went to the sixth level.

But I don't regret it, because now I have different beliefs. Not the same as they were before the incarnation.

Maxim: What are your beliefs now?

Irina: I am convinced that I did everything right, for justice. I have already said that I have the right to any choice. Even the one that you consider bad. I believe that being free and free to do what you call evil brings more happiness than doing good out of fear of being punished.

14:50 Origin of Stalin.

Maxim: Interesting. I understand. Tell me please, is your origin Georgian or Ossetian? What are your roots?

Irina: Who is my father?

Maxim: Yes.

Irina: This is not Vissarion.

Maxim: What does this mean?

Irina: Vissarion simply raised me. But he is not my father by blood.

Maxim: Who is your father?

Irina: He shows me a man with a beard.

Maxim: What is his origin - Georgian or Ossetian?

Irina: Georgian.

Maxim: Father of Georgians, right? Real father?

Irina: Yakov or Yasha (shows a picture). He sells wine and has a rich house. My mother worked for him, they had an affair, love.

My mother was a beautiful, courteous girl who always took care of herself. The landowner liked her. He was rich, from an ancient Georgian family.

A fairly old man (shows), maybe not old, but with a beard. More than forty years, that's obvious. Yakov or Yasha, something like that.

16:28 Stalin and esotericism.

Maxim: Please tell me, have you ever engaged in esoteric practices, any shamanic practices? Has anyone taught you this? Was this somehow connected with esotericism?

Irina: I studied literature and talked with people who do this. I myself was interested in this, not as a hobby, but I was interested in knowing myself, my Soul. But I haven't practiced anything like that. I was just studying it from the outside.

I read literature, including on theosophy and occultism. I talked to many people who do this. But I myself was busy with something else.

17:13 War with Germany.

Maxim: I see. Here is a burning question: did you really want to be the first to attack Germany?

Irina: No. Why do I need it? Did not want. I didn’t even have enough troops on the border.

Maxim: Did you know that Germany would attack?

Irina: I expected it, but I didn’t think it would be so fast. They had wars in Europe with other states. I didn’t think that Hitler was such a fool that he would attack several countries at once.

Maxim: I understand.

Irina: I assumed, but I thought that he wouldn’t dare. I felt that he had evil plans against the Soviet people. Although, when I talked to him (shows phone), we talked quite peacefully even before the war. It even seemed to me that he supported the ideas of communism, Marxism and also wanted good for the people. But I felt that he was being disingenuous.

18:40 Stalin and Messing.

Maxim: Did you know Wolf Messing?

Irina: Of course.

Maxim: Have you talked?

Irina: I talked.

Maxim: Have you met?

Irina: Yes, more than once. I also talked to him on the phone. We met either at his apartment, I went there, or in a special, rented apartment. They brought me there in the evening to meet him without witnesses.

Maxim: Is it true that Wolf Messing predicted your death?

Irina: He said that it was possible, but not directly. He didn't dare tell me that. He warned me to be careful, but no, he didn’t say it directly.

Maxim: How did he warn you? Did you warn me before each time or something?

Irina: He warned me that an assassination attempt was being prepared on me. For example, when I was getting ready to go to another holiday, someone’s birthday. I had quite a few employees, friends, their wives, children and so on. And we celebrated birthdays, New Year, Revolution Day. They could celebrate a holiday and have a feast. He could have called (he knew my phone number) and warned me not to go there.

I asked: “Why?” He said that they would serve you food or wine there, it would be poisoned, he even named the brand. I didn’t believe him at first because I had friends around me. I didn’t believe that they were capable of this, they supported me.

I didn’t go, but on my order they gave this particular bottle - it was the only one there with this brand of wine (shows it) for examination. And they actually found harmful substances that shouldn’t have been there.

Wolf himself had a rather poor understanding of chemistry. He just told me “poison”, he didn’t name it specifically. Nevertheless, after that I began to listen to him. Several times he warned me not to go somewhere, because they might shoot me there. I just didn't go there. There have been attempts on my life.

21:28 Stalin about his death.

Maxim: Please tell us about your death. How did you die?

Irina: I was not alone (shows), with my children, Sveta and Vasily, but I was in another room. My head hurt a lot, and I realized that I couldn’t move. I was very thirsty, but I couldn’t even call, ask for a drink. Everything was closed. I wanted to get up, but I couldn’t. At first I didn't understand what was happening. He began to scream, as it seemed to me, loudly. In fact, I was only wheezing because my tongue wasn't working.

I waited for one of my guards to come in because they must have been worried that I was gone. But no one came in during the day or most of the night. In the morning I felt and realized that they were afraid to come in to me. Then they knocked on my door, and when I didn’t answer, Vasily came in. I fell into an unconscious state (the pit shows that I don’t remember anything). Then the doctors appeared. They said I had a brain stroke. I was already old, I had lived my life.

Maxim: Was it poisoning or a stroke, what was it?

Irina: It was not poisoning. It was a natural illness, a way out of the incarnation. By the way, when I came out and connected with Spirit, I realized that I had planned to leave six years early. They extended my

incarnation period by six years so that during this time I would make attempts to get out of the sixth level to which I fell. But I didn't take any action and went there.

Maxim: Thank you.

24:06 Stalin and Saint-Germain.

Maxim: Dear friends, I'm taking note of your questions that you write and will definitely ask them. But at the moment I am interested in the question: have you had contacts with extraterrestrial civilizations?

Irina: (He smiles). One person approached me who called himself an alien. It was in the south, I was relaxing at my dacha, not far from Ritsa. He said that his race, his people live on another planet.

(Shows an image. This is Saint Germain, who came to me). We talked to him. I believed him because he was very sincere. My instinct told me that it was true, that he really was from another planet. I really felt when I was being lied to.

Maxim: What did you talk to him about?

Irina: About my politics (remembers). I remember that he reproached me for giving orders to shoot priests, for persecuting the faith, for being too cruel to the peasants. And I also remember he said that he knew about conspiracies around me. And I remember he said that pursuing such a policy is dangerous for me.

At the same time, I reminded him that thanks to the people that I rallied in a single impulse of revolutionary struggle, it was the war with Hitler that you asked about that was victorious for the Soviet people. I never took credit for it. But if I had not destroyed the internal party differences and disagreements among the peasantry, the result would have been different.

He told me that I arouse hatred among the people with these measures: long prison sentences, severe punishments in the form of execution for the slightest deviations from the Soviet line of power and ideology. The relatives and children of these executed criminals will hate me. By doing this I will increase the number of anti-Soviet

elements. He told me that no one is shot on his planet. I asked: “How do you fight those who are pulling the state, for example, in different directions?” I remember we stopped at Lake Ritsa and talked about it.

He said that in order to avoid the need for such measures, it is important to cultivate an understanding of the sense of duty and fatherland from childhood. I agreed with him and said: “Yes, it is effective.” From that time on, I began to pay more attention to this issue in schools. This happened before, but from that moment on I began to introduce these methods into widespread practice, to demand that the Central Committee bodies constantly work with the Ministry of Education and work in schools. He constantly demanded reports on how political and labor educational work was being done with children.

28:28 Stalin about his personal life. Stalin and Zhukov.

Maxim: People are interested in: did you have mistresses, and did you love any of them?

Irina: (He smiles). Sometimes it happened. But this is only when we are apart, when my wife is not around. They knew about it, our mutual friends told them. It wasn't serious, just an affair on the side. I didn’t feel any feelings for them, what’s so special about that?

Maxim: I understand. What's special here?

Maxim: Were you familiar with Marshal Zhukov?

Irina: Yes, we were friends. For work and just met in person.

Maxim: And what is your relationship to him?

Irina: Closer to neutral. He is a good military leader who supported communism and defended the Motherland.

Maxim: Did you meet him in the Spiritual World?

Irina: No, I haven’t. There was no need. I don't even know where he is. At least he didn't come to me.

29:53 Stalin about Lenin.

Maxim: Do you meet V.I. in the Spiritual World? Lenin?

Irina: We met with him several times. He cannot come to me like other Archons. He's lower. And so I went down to him. And not only to him, in general to the level where he is. I saw him as part of a group of other demons. We talked to him.

By the way, I was surprised where he was, that he was shorter than me. Because, if you look from the position of God, as you like to say, goodness, morality, there is much more blood on me, if you look at it on this basis. Which is not surprising, because Vladimir Ilyich left the earthly world long before the events that I began to actually implement the idea into which he captivated everyone. With this idea he pulled many people away. Forced them to engage not physically, but morally, in the revolution. He wrote books and spoke from the stands, and I embodied it. And he embodied it after his death.

What did it cost me? It cost me more than a million of those communists he raised. I had to drown them in blood in order to grow from the state of the state that he handed over to me what I handed over to Khrushchev.

32:06 Stalin about the Gulag.

Maxim: Why were such a large number of Gulags made?

Irina: Do you mean camps in general?

Maxim: Yes, camps.

Irina: The Gulag is like hard labor, right? (Shows they are working there).

Maxim: Yes. It turns out that not all people were killed. Were they sent to hard labor, to the Gulags?

Irina: Yes, there were people who were sent to hard labor. Through their work they had to prove their loyalty to the authorities and

repent. Then they had a chance to return. There were cases when someone who served many years showed that he had a good attitude towards Soviet power, returned and again occupied his previous post, or even higher than he was before his arrest. There have been such cases (shows photos of several people).

33:15 Spiritual levels of Beria, Trotsky, Hitler.

Maxim: Please tell me which of your loved ones you met at your level? Is there someone else on the sixth level, say Beria, someone else? Which of your loved ones who supported you and the state are now at this level?

Irina: Beria is not on my level, he is also on the fifth.

Maxim: Beria on fifth?

Irina: Yes. Trotsky is in fourth. Along with Hitler, by the way. No wonder he got there. They were somewhat similar in their beliefs. By the way, they are friends there.

Maxim: Were you friends with Hitler in your incarnation?

Irina: No, I met him once and talked on the phone several times. This can't be called friendship. It's like a temporary truce between two wolves or two lions who are ready to tear each other apart.

34:27 Stalin about Nadezhda Alliluyeva.

Maxim: Please tell me what happened to your wife?

Irina: Which one?

Maxim: How many wives did you have?

Irina: Two.

Maxim: From the second then.

Irina: With Nadya?

Maxim: Yes. Alliluyeva.

Irina: She was jealous of one actress (shows images). We celebrated the holiday. She was jealous of one actress with whom I sat, talked, touched her. She looked at me like that, I thought that she would make a scene of jealousy right in front of everyone. And he said, “Have a drink with us.” She got offended and left because I said it in this form: “Stop looking at me like that, have a drink with us.”

(Shows how he swore at her). She said: “I will not allow myself to be treated like this.” She left and went home. Then, when I was already at home in another room, I found out that because of this scandal she committed suicide (shows a gun). She shot herself. I realized that this was the last straw for her. We argued with her quite often, especially after she went to college, but I didn’t want that.

She didn't want to deal with children at all. I asked: “Why don’t you want to take care of the children?” She says: “I want to study.” I let her go there, fool. And she found out that eight of her friends were imprisoned by Yagoda (the NKVD shows me) for their counter-revolutionary activities. She called him and threw a tantrum. Then she attacked me with the words that I am a despot, a tyrant, I cannot raise children. We had a fight. Then she reproached me for this.

When I found out that she had shot herself, I found her last note addressed to me. After I read it (it was full of dirt and attacks on me personally), I realized that she was not just an enemy, but someone who supported my enemies. I didn’t even feel comfortable going to bury her because of what I read there.

Maxim: And what was written there?

Irina: That I am destroying Russia. That she can't bear to see this anymore and hopes that my children will never call me father.

38:27 Meeting between Stalin and Hitler.

Maxim: Please tell me, where did you have a personal meeting with Hitler? This information is nowhere to be found in the historical data.

Irina: This is not in Moscow. I went for this. Even before the war.

(Shows map). Crimea. (Shows the train. Stalin rested there, Hitler came there too.) But why will this be written about? We didn't plan to disclose this. We just sat and talked and that’s it.

Maxim: I understand, thank you.

Guys, we really agree on the lie detector. If some channel invites us so that we don’t just talk to someone, but so that people actually see us. And if someone has the opportunity to invite us to a lie detector test on any of the channels, on air, we are ready. We have nothing to be ashamed of.

Tell me, please, where is the marble room now? Do you know about this?

Irina: I don't know. I haven't been back on Earth since I left. I was no longer in the material world. And I wasn't interested. Or rather, I came to contact when they called me, but not in order to see where everything was.

The point is that you have some people who summon Spirits. And they called me too. I heard them and came to them. (Attraction shows).

Maxim: How many people called you?

Irina: Yes, quite a lot. I don't even remember everyone. More than two hundred, that's for sure. (Shows the number two hundred).

41:10 Alliluyeva’s spiritual level.

Maxim: They ask: at what spiritual level is your ex-wife, who committed suicide, now?

Irina: I haven't met her. The angel who comes to me from time to time asks me if I would like to be incarnated. I once asked him: “Where is she?” He told me that she was on the eleventh. I haven't seen her.

41:44 Stalin about the death of Lenin. Stalin about the mausoleum.

Maxim: The question is such a tricky one: they say that you poisoned Lenin.

Irina: (He grinned). Why did I need this? His death was disadvantageous, first of all, to me. If anyone poisoned him, it was Trotsky, he wanted to take power. But I don't think he poisoned him. Lenin had been ill for several years.

Maxim: Whose decision was it to place Lenin in the mausoleum? Why was this done?

Irina: Joint with the Central Committee. For people to see. The people always need a visible image to worship so that they can follow someone. Lenin was a symbol of the revolution. We decided to leave it so that everyone could come and look at it. This strengthened our power.

Maxim: Just for this?

Irina: It was a joint decision. For memory.

Maxim: Isn't this related to the transfer of Earth?

Irina: She doesn't understand the question.

42:57 Stalin about "enemies of the people."

Maxim: Why did so many people become "enemies of the people" during your reign?

Irina: Steel?

Maxim: Or they were. Why weren't there so many "enemies of the people" before this?

Irina: You probably want to ask why they were declared "enemies of the people"?

Maxim: Yes.

Irina: I have already said that after Lenin died, he left the country with many problems. He thought his economic policies would solve everything. She didn't decide anything. When he allowed private property among peasants, many of them began to acquire wealth and property. We all saw that under the Tsar and now, nothing has changed. Again some gentlemen, rich and poor. Why did we make this revolution then?

The revolutionaries shed so much blood, and suddenly we return to the same tsarism, only in a different shell. Naturally, I advocated the decisive abolition of private property. The peasants are already accustomed to the fact that they own their own property. These grabbers simply refused to grow grain, other products and livestock for the city, for those who produced tractors, cars, built houses, for themselves. They have wanted to ride horses for hundreds of years. Why do they need a tractor?

And then I had a question before the Central Committee of the party: “What are we going to do?” There was a lot of controversy. Some said that it was necessary to continue the economic policy adopted by Lenin. To do this, you need to leave the peasants alone and buy everything they need abroad, paying crazy amounts of money to those who wanted to take advantage of the situation, the imperialists. Our Russian gold. For the grain that will be grown for us when these fat peasants exploit their brothers.

How would we differ from tsarism? Naturally, I did not agree to this. And there was a very big discussion. I convinced everyone. Not only me, I had supporters: Kirov, for example, Dzerzhinsky, Kalinin and others. We must continue the work of the revolution. Trotsky tried to say that we should look for support in other countries.

(Shows the meeting). I laughed in his face and said: “Other countries only need you if you send them your soldiers (he led the army) to overthrow their capitalists. And then they will kick you out of their country. You better create a fair society in your country.”

He had nothing to answer to this. And my supporters and I proposed such a document to deprive the peasants of private property. From private property, individual owners, to make it collective. This

decision was made four years later. After Lenin's death, we had to do this because bread prices were constantly rising. And for other products, of course, too. The peasants raised them.

When I forbade raising prices, they simply refused to supply bread. There was a threat of famine. There was already famine in some areas of our country, but there was a threat of general famine, including in Moscow. Of course, I couldn't agree to this. And the rebellious, those who did not want to unite into collective farms, had to take their grain and livestock with them to the grave.

Maxim: This process of dispossession was underway. I understand correctly?

Irina: At first it was voluntary. Dispossession comes later. The kulaks did not want to voluntarily unite and obey the law.

There was a law that if you do not hand over your property to the Soviet government and do not go to work on a collective farm, then you are an exploiter. There were a lot of people who tried to resist us. And even foreign agents were brought in for this. (Shows narrow-eyed people like Mongols). Then there were also from the West who supported these movements. And we, the whole party, had to act very harshly: in order to stop the famine, it was necessary to reduce the prices of bread and other products that were transported from the villages to the cities, only in this way the cities could begin to build cars, planes, and weapons. Restore everything that was destroyed after the king, and build something new that has not yet existed. This required strength. The peasants did not want to give voluntarily. They said: "Pay. This is ours".

When I released a communist document that this was "not ours, but common," they said that I was worse than the tsar. There were individual leaders. "You are even worse than the king, we lived better under him. This is not why we supported the revolution." Why not for this? And Lenin, and Plekhanov, and I, and Trotsky - everyone said that, indeed, everything should be common. Still, we went for it. And when it came down to it, no one was in a hurry to share.

Maxim: As always. Why was the mausoleum built in the form of a ziggurat, such an esoteric structure? Who built the mausoleum, and why was it built in this form?

Irina: It was the architects who made the decision, not him. To attract people.

51:45 Stalin about orders to kill.

Maxim: Did you give the order to kill Kuibyshev?

Irina: No. He doesn't confirm.

Maxim: I understand. I just don’t know who Kuibyshev is, to my regret. Have you killed people yourself? And how many orders have you given to kill?

Irina: Have I killed people myself? This attack took place in Tiflis. (He shows some carriage where the money is being taken). They attacked with weapons to rob and take this money. There were casualties there. But he was not alone, but with other people. This was when I was directly involved in the murders.

Signed. I tell you that the first thing was to unite the peasants so that they could voluntarily support the development of our industry, our entire industry, and collectively raise livestock, vegetables, and fruits. Because individually (private farmsteads) they wanted to raise prices and get a lot of money. The urban ones did not yet have them, since everything was destroyed, there was no industry.

In order to unite, I signed orders to execute those who disagreed on the spot for disobedience. Also for the call to go against Soviet power. If a person himself, voluntarily, wanted to give his property to the collective farm, go to work and called on others, no one killed him. On the contrary, he moved upward.

Maxim: Have you met Matrona of Moscow in person?

Irina: No. No response.

Maxim: Is it true that before the attack there was a flight around Moscow with the icon?

Irina: Where do such rumors come from? Why do I need this? No.

Why fly around the icon? (Surprised).

54:54 Stalin about Lenin’s burial.

Maxim: Do you think it is necessary to remove Lenin from the mausoleum and bury him?

Irina: I don’t know. Should I tell you what he said?

Maxim: Yes, just carefully, I know how they can convey it from this level.

Irina: Okay, I'll tell you. (He chuckled). Get him the hell out of there.

Maxim: I understand. Where it is, that’s where it needs to be thrown.

Irina: Yes. I won't pass it on. This is not a curse, but impartial statements addressed to him.

55:47 Stalin about the murder of his son.

Maxim: How did you feel when your son was killed?

Irina: Disappointment. It’s not just what I felt, I knew that he would be killed. I felt disappointed when he was captured. I knew that they would first want to exchange him, so that I would give in, for several, for example, prisoners important for the Reich, that they would want to use my son so that I could sign a peace treaty with them. They hoped so. Not in favor of our Union.

I didn't go for it. In fact, I was very angry with him then that he allowed this situation to happen, allowed himself to be captured and manipulated by me, knowing full well that he was the son of a ruler. Personally, if I were him, I would find any opportunity to shoot myself, if I found myself in a dangerous situation of captivity, so as not to expose my father.

Maxim: I understand. In general, you did not make concessions because of your son.

Irina: Yes. I was angry at him for allowing this situation to happen. He himself went to fight, he understood perfectly well that he could be killed there. Why didn't you understand, when you were in danger of being captured, that you would be manipulated? Why then did you have to go to war? I didn't force you.

Maxim: Was he killed or did he shoot himself?

Irina: Shows an execution, several people are aiming at him.

58:10 Stalin about the famine in Ukraine.

Maxim: Why was the Holodomor necessary in Ukraine?

Irina: I said that in Ukraine, in central Russia, in Kazakhstan, peasants who did not want to unite into collective farms caused a famine. When they began to unite them by force, through dictatorship, no one hid it. Even in our constitutional law it was written that we have a dictatorship. When they refused to carry out the orders of our dictatorship, and when they began to be forcibly united, they simply ran away, leaving entire villages.

It used to be that our commissars came and in the village they found just mountains of corpses of cows and goats, which were already covered in flies. And there was a poster: “Here, take this, choke on the red ones (and some bad word).” There were no people there. They slaughtered the cattle on purpose so as not to give them away.

Maxim: Guys, please ask a correct question about Polish officers. I don't understand what to ask. Honestly. Was there an execution of Polish officers in 1941? What question should I ask? Sorry, I studied history well at school, but I don’t know about the Polish officers what happened there. Therefore, please ask the question correctly so that I can ask it.

It’s clear about politics, we’ll talk about it later. The question is: did you know that experiments are being conducted on crossing humans and primates?

Irina: Where are they held?

Maxim: Under your rule, experiments were carried out on crossing humans and primates. Did you know about this?

Irina: They reported. It wasn't like that at all. I was informed that experiments on crossing humans and primates are impossible, they are different. There were experiments, like medical experiments, but these were not based on crossing. It's like compatibility. For example, they investigated how possible transplants of various organs and blood transfusions were. I didn't go into details. This is what scientists did.

1:00:51 Stalin about the execution in Katyn.

Maxim: Tell me, please, who shot the Polish officers in 1941?

Irina: Where?

Maxim: Why were two thousand captured Poles shot, among whom were Belarusians, by the way? I can `t get it.

Irina: But they write, this is in Katyn?

Maxim: In Katyn, yes. About the Katyn massacre. Was this a provocation by the fascists or the NKVD? Polish officers were shot.

Irina: Ah, in Katyn in 1941. The communists did not shoot. (Shows that when the Red Army arrived there, there were already mountains of corpses.) I understand what you are talking about, but the Soviet troops have nothing to do with it.

Maxim: Got it. The NKVD did not participate in the execution of Polish officers.

Irina: No, they came when there were corpses there.

1:02:19 Stalin on the death of Hitler.

Maxim: Tell me, please, did you personally see Hitler’s corpse?

Irina: No.

Maxim: How do you know that he was dead? Who reported this to you?

Irina: The generals brought a photograph. Personally, I was not there. I saw the photos.

Maxim: I see. How was he killed?

Irina: Nobody killed him. He committed suicide. I got scared. There was my personal order not to kill, but to take prisoner and take him to Moscow to arrange a trial.

Maxim: Yes, guys, I don't communicate rudely with Irina at all. I'm not with Irina, I wanted to raise a question. This is me with those who ask the question.

Irina: How does he talk to me?

Maxim: They are worried about you, that I am talking to you in a rude manner.

Irina: So it's him and Joseph. And he talks to him well compared to what I now hear from Joseph.

1:03:46 Stalin about his rule.

Maxim: Please tell me, are you satisfied with your reign and what you have done?

Irina: Yes, I am very pleased with my reign. Even though I got to the sixth level and you think I'm unhappy, I'm actually not. I put my Soul into this state. At the mere mention of my name my enemies trembled and, like pitiful jackals, hid under the beds. This satisfies me.

I believe that a person who lacks an inner core, who lacks strength, will not be able to do this. And strength, in fact, is the most important thing in this world. Do you, dear believers, honor the omnipotence of God? But it was he who allowed me too. This means that I am also part of Him.

Maxim: Did you know that Hitler was interested in various occult sciences?

Irina: Yes, of course, I knew. My close associates told me about this.

Maxim: Were you afraid that he might attract some otherworldly forces?

Irina: (Laughs). Let me try to attract you. No, I wasn't afraid.

Maxim: If we get two thousand likes within 5 minutes, we will definitely extend the broadcast. There aren't even any questions here. Likes make it possible to further project the channel so that other people can see it.

1:05:46 Stalin on faith in God. Stalin's appeal to the oligarchs.

Maxim: They gave you such an opportunity to change something in your reign. What would you change?

Irina: What would I change about my board?

Maxim: Yes. Either he may have corrected something or added something.

Irina: If I were there now, I would still, from the position where I am now, not touch the believers for their faith. I didn’t realize then that there is God, that there is an immortal Spirit. I didn't believe it. I just remember myself, I considered it a deception.

Maxim: You didn’t believe in God?

Irina: I assumed that He exists, but as believers, no. I assumed that there is a certain force that controls us, but, as I was taught in the seminary, there is no such kind God who is ready to forgive and save everyone. He didn’t save me when my loved one, whom I called dad, beat off my kidneys at the age of five (shows a little boy).

Maxim: Were you beaten?

Irina: Yes, he kicked me and spoke rudely. He suspected, knew within himself that I was not his son, and he hated me. He hit me while I was lying on the floor. I then went to the toilet in a small way, my urine was red. I didn't understand what it was, so I showed it to my mom. I then lay for a long time with a high fever. Your God-Love didn't save me?

And I saved many from such monsters who abused children like that. I just shot them. Who then is God? Who then is Love?

Maxim: I know that you are speaking from your level about this.

Irina: He's just asking a question.

Maxim: What would you like to wish for the ruling power that now exists in Russia. Do you have any wish?

Irina: What can I wish to the oligarchs who came to power? They won't listen to me anyway. These are simply capitalist elements who decided that the people are so downtrodden that they will not get anything for it.

What can I wish for them? I can only tell them that everything exists for the time being, while the people are scattered. But if they unite, it will be the same as a hundred years ago.

1:09:16 Stalin about his parents.

Maxim: They ask: did you kill your father?

Irina: No, I didn't kill him. I didn't know where he was after he left mom. She did not kick him out and always prayed for his Soul. This is truly a blessed Soul. She comes to me. My mother, by the way, is at level eighteen. She's like a Guardian Angel.

She and I talk about this often. By the way, I only found out who my father is now, in the Spiritual World. I then suspected that this was not my own person, but my mother and I did not talk about it. I learned about this for sure from my mother only when I entered the Spiritual World. I even suspected who it was, and my suspicions were justified.

1:10:30 Stalin to the ruler of Russia.

Maxim: Please tell me what you would wish for the ruling elite that we now have. Or I would recommend it.

Irina: To stay in power? Forever?

Maxim: No. What would you wish for the current government?

Irina: For what? For what purpose?

Maxim: In order for the authorities to listen to the people.

Irina: Okay. I wish those who now rule in your country to realize (addresses the ruler) that you are the head that is on the body of the people. Without the people you are nothing. In order for you to rule effectively, you need to share with the people not only in the form of money, but to adopt laws that would contribute to their happiness. Not the happiness of individual proteges whom you place in cities, but of the entire people. From a simple peasant to a doctor, teacher.

Of course, you will ask me whether I made the peasants happy. Yes, when he killed everyone who exploited them, including themselves. They thanked me later. They became happier than under the king. To do this, we had to take measures such as murder. But I want to tell you, dear friends, that God also kills. After all, who invented death? I figured it out? Did Lucifer come up with it? No. You yourself know who.

Maxim: I see. The policy is clear to me from your level. I have already communicated with Spirits of your level many times. Everything seems very clear, but in fact there are nuances.

We have two thousand likes, so we are extending the broadcast by fifteen minutes. Thank you guys for watching our channel. We thank you for giving others the opportunity to see our channel by liking and subscribing to our channel. At the end of the broadcast we will definitely give galactic news.

1:13:30 Stalin about the collapse of the USSR.

Maxim: Did you know about the plan for the collapse of the USSR?

Irina: I didn’t know, but I assumed that it would lead to this. When I found out what year this happened, I will tell you honestly and frankly, I didn’t think it would be so fast. I thought it would be in a few centuries. But everything fell apart sooner than I expected.

When the same Kamenevs and Zinovievs came to power, only in a different guise, whom I eliminated and destroyed so that they would not destroy me, they led the Soviet Union to disaster by again introducing inequality.

Maxim: Are you planning to implement it somewhere in the near future?

Irina: No. There is no need for now. I do what I love at my level: I pass on my experience, solve various problems. An Archon or a demon comes, asks me something, and I answer the question.

Maxim: Did you know Nikola Tesla?

Irina: I’ve heard about him, but not personally.

Maxim: There is a version that you bought some equipment from him. This is true?

Irina: No. I just heard that there is a scientist. He didn't live in my country.

Maxim: I will ask a question because they ask him: they say that you had schizophrenia. This is true? Mental disorder.

Irina: (He smiles). I would like to see a psychiatrist who would give me this diagnosis.

Maxim: I understood the answer, I appreciated the humor.

Irina: Yes, we would like to see him too.

Maxim: Why was the parade of Red Army troops on Moscow's Red Square on June 24, 1945 hosted by Georgy Zhukov, and not you yourself?

Irina: Such details. He just has a lot of events in his memory. It was just that there was a parade that he took part in. He is now showing the parade he attended.

This means that I was either at some meeting, or sick, or I was away.

1:16:36 Stalin about shame and fear.

Maxim: Do you have any moments that you were really ashamed of when you were ruling?

Irina: Shame is a feeling of the weak, I knew that I was doing everything right. And if I had doubted myself, I would have been destroyed long ago. Shame is the feeling of those who are afraid. Shame and fear are those feelings that arise in a weak Soul from lack of self-confidence.

And I believed that my cause was correct and fair. I really tried to have fewer casualties. But not out of pity for them, but because it was stupid to destroy one's own people. They were supposed to restore the country.

I have already said that if I had stopped the unification, the shooting of the kulaks and those rebels who arose among the peasants, there would have been no collectivization. This means that there would again be private property, Nepmen, and so on. And why then did I come to this party? Why did many of our revolutionaries die? Why did Dzerzhinsky, Shchors, and so on shed their blood?

1:18:23 Stalin about the execution of Tukhachevsky.

Maxim: Why was Tukhachevsky shot?

Irina: He shows me that they showed the document, and how he talked to someone to overthrow Stalin.

Maxim: Did he want to overthrow you?

Irina: I didn’t participate myself, but talked to someone about it and supported it. There was a conspiracy. There were many of them. (Several dozen people are shown in close proximity). They didn't like what I was doing.

Maxim: Guys, you are now asking a lot of questions that were at the beginning of the broadcast. Rewatch the broadcast in the recording. There is something about Saint-Germain and Messing. He knew about the Ahnenerbe project, this is also at the beginning of the broadcast.

Irina: He said the name - Yakov. Last name, something in Shvili. Some kind of Ingianshvili, I don’t understand. He shows me Georgian letters, I don’t understand. I just hear thoughts - shvili. In short, there was some Georgian.

1:20:13 Stalin about his incarnations.

Maxim: If you were incarnated on Earth, what would you do to change something for the better for people?

Irina: I didn't think about it. To change something for the better for people?

Maxim: Yes.

Irina: To change something for the better for people, it is necessary for people, not capitalists, to determine how they should live. But to do this, you need to start all over again. You know, I'm already tired. I wouldn't want to do this. I want to already be in the Spiritual world.

Maxim : Have you ever incarnated in a reptilian civilization?

Irina: Yes. I had incarnations there.

Maxim: How long ago?

Irina: Yes, for a long time. Not a previous life, I was also on Earth before.

Maxim: Guys, this year we are finishing broadcasts with famous people who have come out of incarnation, with representatives of the Spiritual world. Next year we will start new broadcasts with representatives of various civilizations. And the first broadcast after the New Year will be with representatives of the reptilian civilization. Moreover, we will do this at your request. We will invite a representative who will answer your questions live. You can personally ask any questions.

The questions are repeated. Give us the Galactic News.

How many incarnations have you had in total?

Irina: Six hundred eighty seven.

Maxim: The answer about Stalin's father was given, watch this broadcast.

1:22:25 Stalin about the war with Finland.

Maxim: Was the war with Finland in 1938-1940 a mistake?

Irina: No, he doesn't consider it a mistake. Just war. There was something to do with division. Finland belonged to Russia, was its region, but began to separate. There was an attempt to return.

Maxim: Grandfather Maharashvili, maybe he was Stalin's father?

Irina: No. His last name starts with "i" or "e". Some kind of Endoroshvili, not with an "m". I just don't know such sounds.

1:23:21 Stalin to the Georgian people.

Maxim: What wishes does Stalin want to convey to the Georgian people? He actually helped Georgia. What does he want to convey to the Georgian people?

Irina: Good question. I want to betray the Georgian people. I am your son, a descendant of your people. Now I am in the Spiritual world,

you are on Earth. But I want to convey to you that you should be independent and always value yourself. For me, you still remain one of the best nations. Your traditions, language, cuisine. Stay as you are.

Maxim: I thank you for this broadcast. I thank you for the humor that you have from this level. For the performance that you presented to our viewers from this level.

I would like to hear now the Galactic news that we promised to all our viewers. MidgasCaus, LiSioni, can I have some Galactic news?

Irina: Thank you, Joseph! I send you the Light of my Love! You can send Light to the Spirit from any level.

MidgasKaus and LiSioni listened to him with interest.

1:25:22 Alien base under the Black Sea. Tunnel to the base in the Crimea region.

Irina: So, Galactic news that arrived just recently.

Representatives of the planet Lisaora, which is located in the Pleiades cluster and is part of the Galactic Federation of Light, began active efforts to build a base under the bottom of the Black Sea. They are now actively flying there on their ships.

Maxim: In the depths of the Black Sea?

Irina: They are building bases there. They fly into space and back under a cloaking field.

Maxim: Is it true that there is a huge amount of accumulated gases in the Black Sea?

Irina: It's not under the bottom, but above it. They build underneath. They fly through.

This is the news: there will be a new base for the Galactic Federation of Light.

Another news is that under this base of the Galactic Federation of Light, which he and Lisaora are building, there will be a tunnel to the Burkhada base in the Crimea region.

Maxim: Underground?

Irina: Yes, underground. Or rather, under the sea, in the earth's crust.

Maxim: I understand, thank you. Why are they building this base? What will she give?

Irina: This will be another base of the Galactic Federation of Light. They will work on the Earth to raise its vibrations. They will install special devices that will reflect negative thoughts from the outside that can enter the noosphere, and will protect against negativity.

1:27:29 Stalin about tunnels near Moscow.

Maxim: I would like to ask one more question before Joseph leaves. Was it really true that in Moscow, when they built the metro, they simply dug it up and didn't make it new? There is such a version: it already existed there, and you just dug it out, like a tunnel.

Irina: I wouldn't call it a metro. There were very ancient, medieval tunnels there. I didn't see it myself, I went down, but not deep. They told me. (Shows wooden boards as fortifications). It was not a metro, but transitions between monasteries, some buildings, under the Kremlin. People walked and hid there when enemies attacked Moscow. This happened in many cities.

Many tunnels had to be dug by those who built them. (Shows the map. But I want to say that now there are many more lines on the metro map. Shows short ones, there weren't many of them when they were built).

Maxim: Yes, I understand that you want to communicate with the Spirit of Hitler. Maybe we can try to invite and communicate with his Spirit?

Irina: Yes. Will we continue after the New Year with different Spirits?

Maxim: Let's do a survey. Dear friends, please write in the comments who you would like to chat with on the next broadcast. And next year should we continue to alternate communication with the Spiritual world and with civilizations? Hitler, Makhno, Yahweh, Adam and Eve, Pushkin, Prince Vladimir, Zhukov. When you find out who was embodied in Marshal Zhukov, you will be very surprised.

Irina: Continue to alternate. Hermes, Messing.

Maxim: Indeed, it would be very interesting to talk with Messing. Juna, Roerichs, Genghis Khan, Tamerlane, Dracula, Sergius of Radonezh.

I realized that we still have a lot to alternate between.

With Lucifer. Guys, I'll be honest, I don't really like broadcasts with Spirits from low levels. Very heavy energy. They provide such information for thought that many people, of course, can be turned away from the Light, from God. They do this in a very reasonable manner. I've encountered this more than once. They give quite compelling arguments. But then, when you begin to understand what it is for, and how it looks from their side, you begin to understand why this is all being done.

Guys, thank you very much for the broadcast. Thank you very much for the likes. Thank you very much for the help you provide us, because it allows us to develop. It gives us the opportunity to complete the construction of centers and go on retreats.

Irina: Thank you, dear friends! Although Lenin was at the fifth level, he was aware. And with Joseph Stalin, the energy is, one might say, oppressive.

Maxim: Yes, it's heavy. Too confident energy.

Irina: I'm already used to communicating with the Archons in the Astral. Without a body, when I went into the Astral, I had to talk to them. For example, some contact of theirs came, they had to ask what they wanted from him, and so on. But Maxim is sensitive, he feels uneasy now.

Maxim: I won't even show myself on camera. I'm probably sitting there red as a lobster, my blood pressure has risen seriously.

Guys, we are waiting for you at our chic New Year's corporate party. It's hard to call it a retreat; there will be something grand in Abkhazia. You will see a lot of contactees there. There are a lot of different directions: GFS, Pleiades, cosmohealing, cosmoenergetics. We have new specialists, the "Cassandra" project has appeared. Everything will happen at this retreat in Abkhazia.

Irina: I'll now explain about Hitler. The fact is that we had Stalin's son, his Spirit was at the sixth level. Stalin is in sixth, Lenin is in fifth. Let me remind you, Hitler is generally on the fourth level, his vibrations are even lower. If you want, I don't mind communicating, but maybe with some higher vibrational Spirit? What can they teach us?

Maxim: Let's do a poll about who you want to talk to. Thank you very much, see you again!

Irina: Thank you!

December 12, 2021

Conference participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

LiShioni - representative of the planet Shimor, sociologist, specialist in the astral world and its interactions with the material world;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms;

Spirit of Joseph Stalin.

#386 Live broadcast. Communication with the Spirit of Wolf Messing.

https://blog.cassiopeia.center/obshchenie-s-duhom-volfa-messinga

https://www.youtube.com/watch?v=tsNOsoY_qww

00:04 Probiotics “Cassiopeia”.

Maxim: Dear friends, hello everyone! As always, I’ll start this live broadcast and add a little intrigue. Today we have the Spirit of Wolf Messing on contact. I have already talked a little with this Spirit and learned very interesting, shocking news. I think a lot of people will have a little revolution in their consciousness.

Congratulations to everyone on a wonderful holiday - the day of St. Nicholas the Wonderworker! I wish everyone all the best! I also congratulate part of the Spirit of St. Nicholas the Wonderworker embodied on this planet. This man asked not to name him, he is very modest. I am sure that he will bring a lot of love and goodness to the world.

The main news is that in order to rid our live broadcasts of haters, only those people who are subscribed to our channel can now write comments and ask questions.

New Year is coming soon, our long-awaited retreat in Abkhazia. Many interesting people are joining us, the program is expanding and becoming very exciting! A wonderful journey awaits you into the world of real esotericism, into the world of drive, into the world of raising vibrations. During the retreat, at any time you will be able to attend various practices of our masters on the terms of a gift according to your heart.

Guys, when we are in Abkhazia, please do not order probiotics from us, as we will be able to process orders only after January 9th. We gave probiotics to our interstellar friends for research. Then we held a conference where our curators told how these probiotics work, how

they affect the body's biogeocenosis and much more. After the retreat ends, we will show this conference. You will hear the opinion of our interstellar friends about the product that they recommended us to make.

I give the floor to Irina.

04:55 Introduction of participants.

Irina: Dear friends, hello! Good evening! Congratulations on the day of St. Nicholas the Wonderworker! I also congratulate him, his incarnate and non-incarnated parts!

Today we communicate with the Spirit of Wolf Messing.

I hear our curators MidgasCaus and LiShioni talking to him, telling him about our project, and he asking them questions.

Maxim: We have specially prepared a number of questions for our conversation with Wolf Messing. Therefore, we will ask these questions first, and then we will address your questions in the chat.

Irina: The Spirit of a man who was known on Earth in his last incarnation as Wolf Messing is present with us. He is not embodied. Also present are his mentors from the Spiritual World - Hilarion, who was his curator, and Artemy, his Consulting Angel and Guardian Angel. Hilarion and Artemy are disembodied Spirits, they are patrons, curators of the Spirit of Wolf Messing, he asked them to come with him.

Also our curators: LiShioni - representative of the planet Shimor, sociologist, specialist in astral interactions and MidgasKaus from the planet Esler, biologist, psychologist, specialist in alien life forms.

Maxim: Thank you. I'll start asking our questions, which one of our students helped me write.

Irina: (spoken by Wolf Messing) I greet everyone, dear friends! I am glad to be in contact with the audience again, with you through the medium Irina!

He calls mediums those people through whom Spirits speak. That's what they called them in those days.

Maxim: Can I just call you Wolf?

Irina: Yes.

08:55 Messing: spiritual levels, incarnations, curators.

Maxim: Dear Wolf, please tell me from what level did you incarnate on planet Earth and to what level did you go?

Irina: I incarnated on planet Earth from the 13th level, and left on the 18th.

Maxim: To the level of Guardian Angels?

Irina: Yes. Now Artemy, the Guardian Angel who protected me, and I are on the same level. And Hilarion is a level 22 Consulting Spirit, he tracked my last 153 incarnations out of the 677 that I went through.

Maxim: Do I understand correctly: 677 - how many incarnations are there in this Manvantara?

Irina: Yes. I have two mentors, one of them has changed, Hilarion has been with me for the last 153 incarnations.

Maxim: Are you not embodied now?

Irina: No.

Maxim: Are you going to incarnate somewhere?

Irina: No. Now I am waiting for the birth of a person, and not on planet Earth. This planet you call Disaru, there is also a human race there. I will be the boy’s Guardian Angel, he should be incarnated in two of your (earthly) years.

Maxim: I see. Thank you.

10:29 Messing about incarnations and time.

Maxim: Tell me, please, when you were Wolf Messing, where did your knowledge about the future come from? Were your abilities planned in incarnation? How did they appear?

Irina: Are you talking about my spiritual abilities, about foreseeing the future, or about influencing a person's thoughts?

Maxim: About all this. Tell us about your spiritual abilities and abilities of suggestion.

Irina: I saw the future (you call it a prophecy) from the Spiritual world for a reason. The fact is that my previous incarnation, before my incarnation as Wolf, was also on Earth. I incarnated on Earth in that year, which is the future for you. From the point of view of that body, that person in which I was embodied as Wolf, I found myself in my past. When significant events for the entire country occurred, in my memory they caused déjà vu (as you call it), the replay of memories that arose from studying at school. And in the future I incarnated as a girl.

Maxim: What year was your previous incarnation?

Irina: It was in 2213 from the Nativity of Christ.

Maxim: How is this possible? Although I know that you can incarnate into the past.

Irina: Yes, I incarnated in the past.

Maxim: Have you incarnated from the future into the past, into Wolf Messing?

Irina: Yes. In a previous incarnation, I was born in the suburbs of Paris, my name was Ellen. In Wolf I embodied my past.

Maxim: Is there Paris in 2213?

Irina: Yes, it’s a big city. But I did not live in Paris, but in the suburbs, on the outskirts, in a private house.

Maxim: But the future has many options. How can one become a variant of something that has many variants?

Irina: I embodied in the version of the future that came true for you.

Maxim: How did it come true when there is no future for us yet?

Irina: For you, no, but for me it was, I lived there.

Maxim: Can you influence the future by incarnating yourself in the past?

Irina: How do you mean “influence”?

Maxim: Change some events.

Irina: Change it so that they don’t happen?

Maxim: Yes.

Irina: No, it's impossible. Mentors select the incarnation in such a way that there is no coincidence of these events, that is, in a family where it is impossible to influence anything. For example, I was not made a ruler so that I could change history.

15:14 Messing about Russia in 2213.

Maxim: Since such an opportunity has arisen, please tell me what is happening to Russia in 2213?

Irina: I lived in the European Union. Came out of incarnation (she came out, this girl) quite early. Regarding Russia and other things, I studied history at school. I saw your present and near future as my past, just as it was written in history books. At that time, there was a lot of talk about Russia in the news and on the Internet. It became a very large state, including all the Slavic states (shows the political

map of the world that they studied at school). Ellen finished high school at school, where they studied the political situation in the world.

In general, I didn't listen very carefully to my lessons at school because I was busy with my relationships with my parents.

I can tell you what generally happened on Earth. For several decades now, everyone has known about the Interstellar Union (IC), and open contact has taken place. Preparations were underway for joining the MS. This caused contradictions and conflicts on Earth. Some wanted to join the MS, political parties were formed. I remember the rally in which my dad participated. By the way, he was against joining the MS, because the demands that the aliens put forward were incompatible with his understanding. They demanded, for example, to abolish abortion, but my dad did not agree with this. I remember this rally well. After him, we had a conflict with my dad, and I ran away from home. Then I lived on the street for several months. It was autumn, I came out of incarnation due to pneumonia, which resulted from hypothermia. I was 16 years old.

18:22 Messing about his predictions.

Maxim: In the chat they say: it's too bad that the girl didn't study history at school.

Irina: Wolf shows me that Ellen went to school, but she was more worried about the experiences that she had in her family.

Maxim: When did this girl come out of incarnation?

Irina: I came out of incarnation at the age of 16.

Maxim: How?

Irina: She got caught in the rain (shows), her temperature rose, and pneumonia began. A girl at some abandoned construction site, in some unequipped building, with ruins all around. She was without help, she was in shock, so she left the incarnation earlier.

Maxim: Got it.

Irina: Regarding the Great Patriotic War: I knew about it because at that time everyone still remembered this war and Victory Day in World War II.

When I incarnated as Wolf, I found myself in a situation where Hitler attacked Poland, and it came to my mind that it was already like déjà vu. Moreover, I did not understand what was happening. Then dates emerged that the war would end in 1945. But then it partially emerged; I did not know the month and day of the end of the war. And when I ended up in the USSR, and the war was actually going on, my premonitions were confirmed. At first I didn’t really believe in them myself when these thoughts came. Then, when everything was confirmed, I began to believe in myself more. Then I didn’t know that these thoughts were coming from a past life, I thought that God had revealed this to me as a prophet.

20:45 Messing about the consequences of coronavirus and global warming on Earth in 2213.

Maxim: Since this has happened, I will take advantage of the situation. Tell me, please, do you know that there is a coronavirus on the planet right now?

Irina: I heard about this from people who disembodied and came to my level, as well as from those Guardian Angels located at my level who are protecting your people now.

Maxim: In 2213, this virus was no longer on the planet?

Irina: There were no mentions (Messing says). I haven't heard such a name.

Maxim: How did we survive global warming? Now many people say that due to global warming, glaciers will melt and water will flood the continents.

Irina: I lived in Europe, and there were no floods.

Maxim: How interesting everything is, thank you very much, Wolf.

22:03 The connection between memory and body sensations. Wars on Earth after 2022.

Maxim: When you say “she,” are you entering into the character of Ellen, or how does that happen?

Irina: When he talks about her, he remembers himself as a woman, feels her feelings. (Mead says) Memory cannot come without the sensation of the body, because the Spirit in it experienced various events. Therefore, he speaks of himself first in the feminine gender, and then in the masculine gender.

Maxim: When was the last major war on Earth after 2022?

Irina: There were several wars, I remember their dates. But the Angels who are next to me now do not advise telling exact dates. They tell me that if I tell you, it could affect your future.

Maxim: Thank you, it didn’t work. It's clear.

Irina: The Angels allowed me to talk about the Interstellar Union, since this is positive information, and war is a negative image and can lead to a decrease in vibrations. I will only say that there were several of these major wars, and they were associated with the attitude towards France in the East. But by the time I was born, there were no more wars.

Maxim: Got it. Thanks for at least this tip.

24:05 Messing about the source of your knowledge.

Maxim: Where did your knowledge about the future come from? Did your Guardian Angels help you?

Irina: Knowledge came from memory. (Shows that some event is happening, and a picture pops up for him.) Pictures about the Great Patriotic War (World War II) were like a film I watched when I was a girl in France. Moreover, this film was Russian with a translation into French. The words “Patriotic War” were mentioned there. When Hitler was there and he started the war, the first thing I remembered were scenes from the film, as it turned out later.

This already became clear when I disembodied, united with my Spirit and remembered the full picture. Before that, I didn't understand everything that was happening.

Maxim: Tell me, have they already found a cure for cancer and AIDS?

Irina: There were a lot of medications, but they still didn't always help. People could die from these diseases. To a greater extent, it depended on whether the implementation period had expired or not.

Maxim: Why did the Consulting Spirits and you yourself choose to incarnate in the past? What influenced this?

Irina: What were my lessons?

Maxim: Yes.

Irina: I incarnated in the past in order to play for people the role of a prophet, restoring people's faith in the Spiritual world, in God. At the same time, I had to go through the path of believing in myself and the path of serving people through art. Thanks to my ability to foresee the future, I began to study these abilities. I acquired the ability not only to guess thoughts, but rather to read a person's aura, his mood, thought forms, mental messages. I saw what a person was thinking about, but only with his consent. Without a person's consent, his Angel erected a wall and forbade it.

But I didn't learn this right away. When I realized that I was not like everyone else and that I could see pictures of the future, I became more interested in this and developed myself in this direction. This was also my lesson.

Maxim: Got it.

27:45 Messing about drinking water and ecology in 2213. The message is about mass contact with aliens.

Maxim: Tell me, please, in 2213 there were problems with drinking water and the environment?

Irina: Yes, they were. But spaceships from the Union of Space Civilizations (that's what we called it) have already flown to Earth quite often. They were shown on television (shows on a large TV). They spoke our language quite well. They said that they had flown from the Cygnus Constellation and promised that they would solve our environmental problems if we joined their community.

Maxim: In what year did contact with aliens take place? When did they start showing themselves openly? When did mass contact occur?

Irina: Contact between aliens and governments?

Maxim: Yes.

Irina: In our earthly history, which I studied, mass contact occurred in May 2183. But before that, they had already appeared in front of people many times, and then there was open contact with governments.

Maxim: Wolf, thank you. Have you had contact with extraterrestrial civilizations?

Irina: In Wolf's life?

Maxim: Yes.

Irina: There was, but only in a dream, astral contact. I left my body, and they showed me the planet on which I lived before my incarnation as Ellen. Before incarnating as Ellen, I lived on another planet.

Maxim: Which one?

Irina: Esler. I was a man there and, by the way, reached level 20. Over the 16 years of my life, I lowered my spiritual level to 13, because there were blocks in relation to my mom and dad.

He has some kind of "swing": 20th, 13th, 18th levels. Many people (says) have such swings.

Maxim: Is such a “swing” normal for the Spirit?

Irina: What standard of norm will you take?

Maxim: There are no more questions. I understand.

Irina: If you take my experience, then for me this is normal.

31:07 Messing about your faith. Energy resources in 2213. Messing's sexual orientation.

Maxim: Did you believe in God and did you consider your gift divine?

Irina: Yes, I believed in God, but I didn’t tell everyone that. Sometimes I emphasized that I was a materialist, the materialism of my gift, so as not to raise unnecessary questions. He believed in the Torah, in the traditions of Judaism. After all, I was born into a Jewish family, so I adhered to the Jewish faith, I believed in Yahweh.

And Jesus Christ was a prophet for me. Despite the fact that many of my fellow people did not think so, I still saw in him a man who carried the truth from God.

Maxim: They asked a good question: are they still producing oil and gas in 2213?

Irina: I understand your desire to know your future, it’s interesting to you (smiles).

Oil and gas production is still ongoing, but it is already fraught with great difficulties. Many factories and vehicles operate on solar energy or on the energy of electromagnetic fields (space energy). They also took the energy of the Earth itself, there were already technologies.

For example (he says), my dad had a car. Because its wheels were spinning and touching the ground (there was a special tire material), some kind of charge accumulated. Dad, I think he called it electrostatic or something like that. The charge was accumulated in a special battery, which was in the middle of the car. This energy was also spent on driving the car.

He had a combined vehicle, with a fuel tank, but most of the power came from the wheels.

Maxim: Got it, thank you. Is it true that you were of a non-traditional sexual orientation, that you liked men?

Irina: Who said such nonsense?! I liked women, or rather, only one woman - my wife Aida. (Shows the image of a plump woman, tall, with a kind face.)

Maxim: Thank you.

35:57 Messing about demonstrating your abilities. Messing about religion in 2213.

Maxim: When did you first manifest these abilities? At what age?

Irina: I was six or seven years old, I had not yet gone to school (shows images). My mother was still alive then, and she and I went to the barn to feed the cow.

I felt death approaching the cow. I saw the life leaving her. I saw a thin stream of vitality flowing away from her stomach. I didn't yet know what it was, but I knew it was life. I saw inside myself how a stream flowed from it, I got scared, I felt sorry for the cow. I told my mother that I needed to help the cow. Mom said that everything was fine with the cow, she was eating grass. I answered: "No, she might die at night." Mom scolded me for saying such bad things.

Early in the morning (I was still sleeping), my mother went to milk the cow and saw the dead animal. Mom ran into the house, woke up my father and me, and began to tell my father that I had seen this in advance, but he did not believe her. She holds (shows) me by the shoulders and asks (not in Russian, but I understand the thought forms): "How did you know?" I felt it for the first time and was very surprised why my mother didn't see it either, asking her: "Didn't you know?"

While playing with the guys, I felt in their eyes, in their facial expressions, for example, who liked or disliked who, who wanted to hit whom. I was surprised by this too. And when one of the guys

asked: “Why don’t you love him? Why do you want to hit him? - then everyone reacted with fear and did not communicate with me. Realizing that they didn’t see it, didn’t feel it, I began to ask the question: “What is this?”

Maxim: Tell me, will there be one religion for everyone in the future?

Irina: No, there is no positive answer. In those years when I lived, there was a very strong influence of the Muslim world. Muslim countries are practically the only ones who still had an accessible supply of oil, they had not yet exhausted it, so they became very rich and influential, even richer than Western countries.

Maxim: Got it, thank you.

40:10 Messing about Dr. Abele.

Maxim: Please tell me, did Abel (I don’t know who Abel is) conduct experiments on you and what kind?

Irina: Probably (remembers), meaning the doctor. I understood what Maxim was asking.

These are not experiments. I was still a teenager when I went to see Dr. Abel in the hospital. I ended up in his hospital because at that time I had no means of subsistence, I had nothing to eat. From exhaustion I entered a coma-like state, a prolonged loss of consciousness. When they brought me to his hospital, they at first thought that I was dead, but then they found out that I was still alive and put me in a ward. The doctor looked after me.

Once I asked him (focuses on the past) about his affairs, about what happened at his home. I couldn’t know this, and the doctor suspected that I was reading his thoughts. I felt it in his changed aura. This was not direct mind reading, but observation of the aura, it became darker. I asked: “What happened to you? Maybe someone is sick?” And indeed, his wife fell ill. He asked: “How do you know?” I said I felt it.

Then he started thinking about something and asking me what he was thinking about. Since I received permission from him, I saw his

thought forms, although not clearly, I was often mistaken, I could see one object instead of another. I was wrong maybe four times out of ten. But the doctor said that I still need to study. For example, we conducted an experiment: he imagined in his imagination an envelope, a letter, and I could see a notebook or pen, that is, something related to writing. I didn't have a clear understanding.

Maxim: But you still carried out some experiments.

Irina: It was like games. He played. I don't call this experimentation, it's like training and games.

Maxim: Thank you very much.

43:37 Messing about the Berlin panopticon.

Maxim: How did you manage to lie in a glass cube for several days in the Berlin panopticon?

Irina: This happened after Abel. I did not lie down for several days, but only during the day, when visitors came and looked at me as if I were a person who lives without food. And I really looked like someone who had spent quite a long period of time without food. My body was so exhausted that people poked me with needles (shows). People paid money, came to see me, to have fun, like going to a circus. The rich came to see how well they lived compared to someone like me. When the museum was closed for the night, Abel and some woman came there and brought me food.

Maxim: Guys, Messing is on the 18th level. He talked about this at the beginning of the broadcast.

45:13 Messing about Einstein and Freud.

Maxim: Please tell me, were you familiar with Albert Einstein and Sigmund Freud?

Irina: Yes.

Maxim: They tell me that you even studied with them.

Irina: You could say so. Rather, I learned a lot from their explanations of what was happening to me. I came to them, demonstrated my abilities, asked them to explain what was happening to me. They told me that this is a special power in a person, which manifests itself in such a way through the body that I feel it, that is, I have increased sensitivity.

And they gave me exercises to develop these abilities. I had to constantly train, constantly work at it. They also conducted exercises and communication sessions with me. They gave me various tasks, for example, to find something. I remember Sigmund told me that you can pick up someone's thing and try to imagine who it belonged to. A person's energy, his vitality, remains on things. A person seems to charge his things with himself. At first I didn't succeed: I could see not the previous owner of the thing, but, for example, the one to whom it belonged the very first time. I was told that I was mistaken, and then it turned out that this was not so.

47:22 Messing about the digital world in 2213

Maxim: Did all sorts of digital "things" exist in 2213: digital government, some kind of digital worlds, etc.?

Irina: There were quite a lot of computers at that time. I had my own computer. They introduced special devices that (shows) were put on the hand, like a bracelet, and documents were recorded in them. But they were just starting to introduce it, they were conducting experiments. The government was not digital then, we had President Alfred.

Maxim: Tell me, in 2213 there were many people from the LGBT community? These are people of unconventional orientation.

Irina: I heard something about them. But due to Islamic influence in France there were few such people, they hid. Our President Alfred, despite his European name, was one of the grandchildren of some Arab sheikh, he came from an ancient Sultanic family that lived in France.

Maxim: Thank you for the interesting answer.

49:44 Messing about fees and depression.

Maxim: Why did you organize tours in different countries? What was the goal? I know that you refused money and lived quite ascetically.

Irina: Because I was invited. They wanted to show people that a person has such abilities. However, I would not say that I completely refused money; there were fees, but they were collected in my account. I'm not used to spending on myself, the money was saving up.

Maxim: Where did the money go then?

Irina: Where, according to Soviet laws, the money that no one inherited should have gone. I didn't bequeath them to anyone, I didn't have children. According to Soviet laws, the money went to the state.

Maxim: They say that you suffered from your gift and wanted it to go away. This is true?

Irina: You know, I wouldn't say that I suffered from my gift. If this was said by me, it was in a state of depression. I had depression after the death of my wife Aida, despondency, but then I dealt with it. Hilarion, the Angel Mentor, came to me in a dream and said that if I did not get rid of my depression, I would fall to a low spiritual level. He also said that Aida was feeling well. By the way, she incarnated from the 9th level, and after the death of her body she ended up on the 11th level because of her grievances against those who killed her first husband. I've already talked to her.

Maxim: Thank you.

52:13 Messing about population and money in 2213

Maxim: What was the population on Earth in 2213?

Irina: (shows) A little more than 14 billion.

Maxim: Was there paper money at that time or did everyone use electronic money?

Irina: There were paper and electronic money. In our family, greater preference was given to bills and coins, but we also used electronic money.

Maxim: Thank you.

52:48 Messing about his escape from the Gestapo.

Maxim: There is a well-known story that you were captured in Poland. How did you manage to escape from the cell in which the police were later found locked?

Irina: It was not exactly as Misha described in the book. This is, one might say, an artistic exaggeration.

Maxim: What was it really like?

Irina: (Smiles) I was put in a prison cell for speaking out against Hitler. I saw it as déjà vu, it flashed into my mind that he was going to lose the war. I said this automatically, without thinking at that moment what could happen to me for this. After all, I was not in the world from which I had incarnated, where this girl was, but in a completely different one. My words were heard and passed on to the Gestapo, and there they decided to isolate me so that I would not cause trouble (shows how they arrived, a fight, he resists).

They beat me and put me in a cell where I spent seven days. They were busy with some of their own political affairs and forgot about me. I knew and felt that if I didn't escape, they would shoot me, so I decided to stage suicide. On one of my walks, I picked up a piece of glass and hid it in my pocket. I knew how to cut my hand safely so that there would be a lot of blood and to scare the Gestapo. In the cell I sat near the door; at the bottom there was a gap through which blood flowed out. When the Nazis saw this, they ran into the cell and thought that I wanted to commit suicide. They wanted to execute me. From their thoughts I understood: they were afraid, afraid of punishment. I sat near the door, pretended that I had lost consciousness, although I didn't, I felt everything.

They bandaged my hand. Then they carried me on a stretcher to the doctor's office. And when they carried me past the window, I jumped

off the stretcher and jumped out the window. It was without bars, I broke the glass with my elbow, jumped out and ran away. The Gestapo didn't find me. I hurt my knees when I fell because I was jumping from the second floor.

Maxim: We get 2213 likes and continue the broadcast for another half an hour.

It's all a metaphorical story, right?

Wolf, when 2213 comes, will you be the same girl again? Good question!

Irina: For you, yes, it will be so, but for myself I will no longer be that. Only for you this life will repeat itself. You are now looking from your time, and I am from the Spiritual world, and for me this is already the past.

58:15 Messing about the transition to the Spiritual world.

Maxim: Please tell me where your diamond ring is now?

Irina: The one who was with me in the hospital?

Maxim: Yes.

Irina: If the nurse didn't hand it over to the state, then probably she or her relatives did. I didn't keep track of this point. When I disembodied, I immediately went into the Light (shows a very old man lying on the bed).

Despite the fact that the doctors treated me well (there is nothing to complain about), the period of my incarnation came to an end, and the organs of the physical body began to fail. The doctors began running along the corridor. The last thing I heard was a very high-pitched nurse's voice: "What's going on? I can not understand! Everything was fine!" Then I lost consciousness, fell into a black hole, and the first thing I saw was a very bright yellow Sun in which I found myself, and then a white light. Then I realized that I was being held by the hands of two very handsome men who introduced themselves as Guide Angels. During my unconsciousness, it turns out that they

had already ascended with me to the Spiritual World, led me through the astral world, and I found myself at my level. I was no longer interested in anything earthly, I immediately met with the Creator to review my life, and then connected with my Higher Self.

Maxim: Got it, the ring went to the doctors.

1:00:23 Messing about the flights of earthlings into space in 2213.

Maxim: In 2213, will humanity explore other planets or not yet?

Irina: I know, I heard. (He again switches to the perception of the girl Ellen.)

She heard that about 150 years before she was born, manned flights to the Moon and Mars were carried out, but then they stopped. The official version is lack of funding. And when contact with the Interstellar Union took place, the aliens said that the reason for the cessation of flights was a conflict on Mars between earthlings and some representatives of the alien base. After this, earthlings were banned from visiting Mars. They wanted to set up something like a nuclear test site there.

Maxim: Earthlings got to Mars and wanted to set up a nuclear test site there?

Irina: They brought nuclear weapons there, as we were told. This happened shortly before I ran away from home. They talked about it on the news, I remember it well.

A representative of the Cygnus Constellation, a Burkhadian (shows a picture on the screen: a Burkhadian speaks an incomprehensible language, his words are translated into the main languages of the world) says that for 85 years earthlings had their own base on Mars. At one time, people lived there; they wanted to explore Mars, but they didn't succeed. Then they flew away and the base was abandoned.

After some time, earthlings flew there again, brought a nuclear bomb and wanted to conduct tests. These were representatives of the Arabs (shows the Arabian Peninsula, Arabs).

At that time, the Arabs united into one country, a union, with common laws, like the European Union. Western countries wanted to attack the Arabs in order to take away oil, gas, and some other minerals, because they were raising prices. I know about this from news, programs, historical chronicles that were shown on television.

The Arab countries decided to create a large nuclear bomb to defeat the Western countries. At that time, a ban on the creation of nuclear bombs was already in force, and disarmament was underway. The Arabs flew on their space rockets to an abandoned base of earthlings on Mars, ostensibly for research. Under the guise of a payload, they took with them components for creating a nuclear bomb and conducting experiments, since on Earth they would have been noticed and punished. And when they tried to do this, representatives of the Selbetites, reptilians (shows), who at that time were at their base on Mars, underground, and were not far from the base of earthlings, came into contact with them. When Selbet's instruments detected radiation at the former earth base, they flew there and confiscated everything from the earthlings (shows how they take out the boxes and tell them to fly away).

Maxim: The Reptilians disarmed the Arabs.

Irina: When the Arab cosmonauts returned to Earth, they told their government everything, and the information was classified.

Maxim: Irina, they see a ring on your hand. Please tell me where you got it from? What reptilian brought it to you?

Irina: My friend, a retreat participant, gave this to me. Her name is Daria, she lives in the USA. Daria, if you are watching us, hello to you! Thank you again!

Maxim: There are rumors that we took money from someone, I ran into someone. Don't believe any rumors. Anyone who needs a refund, please call. We'll return everything.

Irina: You just need to provide checks in order to transfer something.

Maxim: We got likes, thank you for supporting us, this is an opportunity for people to know about us.

We won't talk about bitcoins. We do not interfere with financial structures. The question about the cost of Bitcoin in 2213 need not be asked.

1:07:55 Messing about Stalin.

Maxim: Please tell me, do you know Joseph Vissarionovich Stalin?

Irina: Yes. But Wolf experiences an unpleasant feeling of control, as if Stalin was controlling him. Wolf lived as if under a hood and felt his life was in danger.

Maxim: Did Stalin contact you personally with questions and how often?

Irina: Yes, about 15 times. He asked me various questions and called me on the phone. Sometimes I called him, I had his phone number.

Maxim: "Is Putin the sponsor of your project?" Honestly, I would be happy with a sponsor, but we don't have one. Everyone who helps the project is our sponsor. The project is built only on gifts from people who want to do this.

Did Stalin often turn to you with personal questions?

Irina: Yes, he only addressed personal questions. Pyotr Kravchenko, some investigator from the NKVD, dealt with social and public issues and crimes.

Maxim: Help solve crimes?

Irina: Yes, I helped solve crimes. And it was only because I did this that I was allowed to perform tricks. I felt that there was danger coming from the authorities.

Maxim: Did you really show tricks?

Irina: For them it was magic tricks. I explained to them this way so that they would not ban it because of the propaganda of the existence of the Spiritual World. They could do this because I showed people

that God and the Spiritual world exist, that thoughts exist outside the human brain, that they can be read.

Maxim: Did you work for the intelligence service of any state?

Irina: No.

Maxim: Can you tell us what personal questions Stalin approached you with?

Irina: He asked me about his past. For example, he asked me to contact the Spirit of his wife. He believed that I could contact the Spirit of his wife and ask what happened to her. When the war began, he was interested in its outcome, asked about the battle in a particular city, how many Soviet soldiers would die. However, the answer did not always come to me, and it might not come at all, then I said that there was no information. Sometimes I immediately remembered (later I realized that I was remembering) and told him. The answer came suddenly, I had no control over it. Stalin also asked about his son, when he was captured, whether he would be released. I felt no. And already in the Spiritual World I realized that I remembered the death in captivity of one of Stalin's sons from the course on the history of my incarnation in the future. But then I didn't understand it.

Maxim: Got it.

1:13:30 Messing about the theft of money from the State Bank.

Maxim: Tell me, was there really such a case when, during Stalin's check, you hypnotized the State Bank cashier and received 100 thousand rubles?

Irina: This is again from a book, I know which one. This was written in order to strengthen people's faith in me as a hypnotist. But it wasn't like that. I was brought to a Moscow bank to investigate the theft of money by the employees themselves. Money was missing from the bank, a little less than one hundred thousand. They were no longer listed on the bank's balance sheet. At that time this was a large amount. The investigative authorities could not catch the one who did it. They searched the houses of all bank employees and found nothing. Then they brought me to meet and talk with people. This investigation

was carried out secretly from the people, so as not to discredit the Soviet government, and so that people would not lose confidence in this bank.

Maxim: Was the investigation successful? Did you find the one who stole the money?

Irina: Yes. I met with all the employees (shows), looked at their auras. I had to feel their thoughts, who was hiding what. They did not believe in my abilities, they were afraid that I would point to an innocent person and he would be shot. They were very afraid of this. It was difficult for me to figure it out, because when there is such confusion in thoughts due to fear, then everyone seems guilty. If you are innocent, what are you afraid of?

I approached everyone and looked into their eyes, because thought forms are visible in the energy of the eyes. These people did not give permission to have their thoughts read. But when fear intensifies, a person begins to think in such a way that I see pictures even without his consent. When people are on low vibrations (that's what you call it), I begin to pick up very clearly, feel their thoughts almost physically, like with my skin.

I went up to the bank deputy (shows a tall, plump man, his last name is Bobrov or Bobov), looked at him and saw what he wanted to hide: the money was kept in a box, which was hidden in the cellar at his dacha with provisions for the winter.

I didn't talk about it in front of everyone. In a separate office, NKVD workers asked who had the money, I pointed them to a photograph of a bank deputy. He told me where he hides the money. The police found out from his relatives where the dacha was located, they went and found the money in the place I indicated.

Maxim: Cool! Thank you.

Irina: It was in his thoughts. He thought about it, and I saw it.

This man later said that this was not the money that was planted on him, but the numbers on the bills coincided with those that were missing.

1:18:29 Messing about spiritualistic seances.

Maxim: You conducted spiritualistic seances, and then claimed that it was a hoax. Why did you say that?

Irina : I did not claim that this was a hoax. The fact is that when spiritualistic sessions were held (in your opinion, this is contacting, the work of a medium), I was not always able to contact the Spirit due to the fact that he himself did not want to make contact. Or the Angels did not bring him if the Spirit could, for example, reveal information that would harm this person or another. And then people said that I was cheating.

But I did not call these sessions spiritualistic. These were contacts with dead Spirits, as Irina roughly does. Now I asked her supervisors how she perceives information. They told me it was through chips. I didn't have chips; I perceived information through a channel that went into the Spiritual World.

Maxim: Thank you. Did Brezhnev approach you with a request to change the fate of his daughter Galina?

Irina: No. There is no response about Brezhnev.

Maxim: Thank you.

1:20:09 Messing about the spiritual cause of your illness.

Maxim: What is the real spiritual reason for your illness before death?

Irina: I injured my legs when I jumped from the second floor of the prison where the Germans were holding me. Then I hit my feet hard. Then I traveled a lot and didn't take care of my health for the rest of my life. And after my wife's death I missed her so much, I felt so sorry for her. I scolded myself, blamed myself for not helping her in time, not giving her any advice, although I felt that she would soon go to the Spiritual World. Thus, I formed a necrotic attachment to her, as you call it. This was the reason that for a long time my energy, my life force, went through my legs into the ground, so the tissues did not recover from this.

Maxim: Atrophied, right?

Irina: Yes, there was an exacerbation of the disease.

Maxim: One of our subscribers writes that Abel is a scout. When we asked about Abel, you talked about the doctor.

Irina: I talked about Doctor Abel, who found me on the street in an unconscious state, I was a teenager then (shows a man in a white coat, he is about 30 years old with white hair).

Maxim: Dear subscriber, please clarify who you are asking the question about.

Wolf, despite your fame, between 1921 and 1939 there is not a single record of you in the archives of the Imperial Chancellery, the Secret Police Office, or Polish magazines. How could this happen?

Irina: No records, in what capacity?

Maxim: Probably as an esotericist (that’s what we call it).

Irina: I wasn’t involved in esotericism then, I was a simple circus worker, entertaining people (shows). At that time, all employees were not included in the register. I was just beginning to develop my abilities. In general, I did different things: helped feed the horses, cleaned the premises where they were. At the same time, he developed his abilities so that he could go out in public, for example, with a performance where a person pierces his skin with a needle without feeling pain. I did such tricks.

1:24:11 Messing about the task of your incarnation.

Maxim: Tell me, please, do you have any relatives left after your death?

Irina: No, there is no one left. I didn't have children. Parents, sisters, brothers were shot in Poland during the war.

Maxim: So you don’t have anyone who could continue your family

line?

Irina: No.

Maxim: Isn’t this connected with the fact that you have incarnated from the future into the past?

Irina: Are you asking why I didn’t continue my family line?

Maxim: Yes.

Irina: Because having children was not included in my life goal. I had to travel around cities and show people the existence of the Spiritual world in an atheistic state. I didn't have the task of taking care of children. I realized this only after connecting with my Spirit, after disincarnation, and before that, of course, I wanted children. After connecting with my Spirit, I realized why I met exactly such a woman who could not conceive a child. She could not do this due to her illnesses caused by her blocks.

Maxim: Got it.

1:25:55 Messing about the USA and Russia in 2213.

Maxim: There is a prediction by Edgar Cayce that the United States of America will be flooded. Is there such information in 2213?

Irina: During my lifetime, the United States still exists, but due to the conflict with Arab countries, it became a poorer country and broke many agreements that connected it with Europe. This is a small independent state (shows on the map), it is smaller on the map.

Maxim: Has the USA become smaller due to flooding or separation of territories?

Irina: The territories were separated and became independent. No information about flooding.

Maxim: Messing will not incarnate on Earth. In 2 years he will incarnate on the planet Disaru, he already said this at the beginning of

the broadcast.

Irina: This is not an incarnation, but accompanying the incarnating boy as a Guardian Angel.

Maxim: Yes. About Russia there too.

Irina: Russia is quite economically strong. She has an alliance with Muslim states, at least before my exit from incarnation. The union is about mutual assistance, the exchange of information, the exchange of employees and scientists. The Arab Caliphate (says) sells oil to Russia at lower contract prices than to Europeans. Russia has advantages because of this.

Maxim: Wolf, can you make predictions from the Spiritual world?

Irina: What do predictions mean?

Maxim: Let's say, can you say whether any interesting global event will happen on our planet in the next ten years?

Irina: According to the history textbook, the first decades of the 21st century are remembered for clashes and confrontations over Ukraine (shows Ukraine, Kiev). There were battles for Ukraine between the leading countries of that time.

I understand perfectly well that this time is relevant for you now. Indeed, there is mention of a certain epidemic that caused great economic shocks, due to which countries then took a long time to recover.

But he doesn’t remember anything global.

Maxim: Thank you, Wolf, for this broadcast, for agreeing. I'll ask the last question.

1:30:14 Messing about the mention of the Cassiopeia project in 2213.

Maxim: Is there any mention of the Cassiopeia project in 2213? What can our project lead to?

Irina: Yes, indeed, there is a mention of the Cassiopeia project. When representatives of the Interstellar Union came to us, they said that this contact became possible thanks to the changes that were started by some people at the beginning of the 21st century. These people created the Cassiopeia project, and thanks to them, many became more interested in extraterrestrial life and strive to make contact with alien civilizations. We were told on television that the demands of the Interstellar Union were first communicated through these people at the beginning of the 21st century.

Representatives of the Interstellar Union did not arouse noticeable interest on a planetary scale at that time, but later they attracted the attention of all inhabitants of the Earth. Many sought to get in touch with them. Disarmament began, they began to look for alien bases on the planet. Then they began to fly to Earth more openly. Massive contact occurred because there had been no military conflict on Earth for over 15 years. All the inhabitants of the Earth began to broadcast into space the desire to make contact, so it happened.

But the appearance of representatives of the Interstellar Union led to contradictions in religion and issues of freedom for many people. Some said: “Let them live their lives, and we will live ours, because this is contrary to our freedom.” My father thought the same. I remember their conversation with my mother.

The aliens said that they would take us into the Interstellar Union if we abolished the death penalty and abortion throughout the planet. Abortions still remained with us, but were already possible only with the permission of a psychologist. Psychologists had to talk to the woman and try to dissuade her. At least in France there was such a law (abolition of abortion) by this time.

I remember protests, people walked around with posters (shows the square) with the following inscriptions: “Get back to the stars!”

When my father came home, I asked him why he was against aliens, because it would be interesting to connect with the Interstellar Union. And he replied: “Why should we listen to them? Why does your mother have to take birth control pills or anything else because we can't give birth and raise as many children as we can through sexual intercourse? I love her. Why should she take these pills to avoid having an abortion? After all, what's so special about it? Why are they

telling us?” That's what he said.

Maxim: Wolf, this broadcast changed my inner understanding of many things. Some points are being completed. I received answers to questions that I did not understand before.

Thank you for agreeing to talk with us and for passing on the information in the form in which you could do it!

I thank Irina, our clever girl, who was able to convey all this!

Thank you to everyone who supports our project!

Our task is to combine esotericism and psychology, which is what we do.

Goodbye everyone! See you on the next broadcast!

Irina: Thank you all!

December 19, 2021

Participants:

Irina Podzorova - contactor with extraterrestrial civilizations;

Maxim Rusan - head of the Cassiopeia project and the Center for Spiritual and Physical Development;

LiShioni - representative of the planet Shimor, sociologist, specialist in the astral world and its interactions with the material world;

MidgasKaus - representative of the planet Esler, biologist, psychologist, microbiologist, specialist in alien life forms and space civilizations, xenobiologist;

Spirit of Wolf Messing;

Hilarion - curator, mentor of the Spirit of Wolf Messing;

Artemy is a Consulting Angel and Guardian Angel of the Spirit of Wolf Messing.

July 14, 2023

#424 Live broadcast. Communication with the Spirit of Sergius of Radonezh.

---

https://blog.cassiopeia.center/obshchenie-s-duhom-sergiya-radonezhskogo

https://www.youtube.com/watch?v=Aexzzx9lnis

00:03 Introduction of participants.

Maxim: Friends, hello everyone!

Irina: Good evening!

Maxim: Today is most likely our last broadcast, because YouTube will be closed in Russia. Most likely, next Sunday the broadcast will take place on another platform. Which one, we will definitely inform you in our chats, in our information channels, on all our resources.

Under this video there is information about the information channel where we will report about all our projects, what kind of movement we have, where we are going, how we are moving, what projects are opening, what links, chats. We will have a full Telegram information channel. You can subscribe to this channel so as not to lose us.

We have a very interesting guest today as Spirit. Is he not incarnate?

Irina: Unincarnate.

Maxim: While we were setting up the broadcast, he came not alone, but with his best friend at that time of his incarnation. Our guest is Sergius of Radonezh. Irisha, tell me something about him, who did he come with?

Irina: Hello, dear friends! It is very interesting that today we are talking with you on the eve of the Spring Equinox, on which the next stage of the quantum transition will also begin after a period of calm, which began on January 15 of this year.

Today we are present with: the disembodied Spirit, who is known as a man on Earth - Sergius of Radonezh, his good friend is also present, he is now in the form of Seraphim of Sarov, but this is one of the incarnations of Archangel Michael. He has now created such a phantom in order to be recognizable precisely in the image of Seraphim of Sarov. He greets us.

(Seraphim of Sarov) When I was in incarnation, the Spirit of Sergius of Radonezh was not in incarnation, and he was one of my curators.

Maxim: Did you see Archangel Michael, like Sergius of Radonezh, at the moment when he supervised you? Do I understand you correctly?

Irina: Yes. There is also a representative of the planet Shimor, LiShioni, present here; he is familiar with Sergius of Radonezh, because Sergius of Radonezh was incarnated as one of LiShioni's ancestors on the planet Shimor. More specifically, it was his grandfather's father, that is, his great-grandfather.

Maxim: His grandfather's father? LiShioni's grandfathers?

Irina: Yes. He held a post on Shimora, and they communicated. On Shimora there is a practice of communicating with one's ancestors, and there they communicated.

Maxim: I am more and more convinced that it turns out to be some kind of one big star family.

Irina: Yes. (Sergius of Radonezh) You can call me Bartholomew, you can Sergei or Sergius - these are all my names.

Maxim: Why Bartholomew?

Irina: Because they called me that when I was born during the life of Sergius of Radonezh.

04:49 Incarnations and activities of Sergius of Radonezh and Archangel Michael.

Maxim: I'll start now with simple questions. Are you embodied now or not?

Irina: No. I came out of incarnation 24 years ago, but I was incarnated not on Earth, but in the Ashtar civilization.

Maxim: That is, in the civilization of Sirius?

Irina: Yes.

Maxim: How many years did you live there?

Irina: Now he will convert to earthly years.

(Sergius of Radonezh) About 400-420 years.

Maxim: Seraphim of Sarov is one of the incarnations of Archangel Michael. Therefore, the spiritual channel that is being contacted is most likely the channel of Archangel Michael. It's just that Archangel Michael has different images that open channels.

Irina: He now clarifies that when Seraphim of Sarov was in incarnation, Sergei of Radonezh was also in incarnation, but in a different body, which was incarnated by Ashtar Sheran.

Maxim: Was he incarnated in the Sirius civilization?

Irina: Yes. But he was still in contact with him, he was his curator.

Maxim: And in that incarnation where they live for 420 years, what percentage of the Spirit is incarnated into the body?

Irina: What percentage of the Spirit is embodied in the body? He shows me 24-25%.

Maxim: I thought that the lifespan depends on the percentage of the Spirit embodied in the body. It turns out not. I understand.

Is it true that Archangel Michael is the spiritual protector of Kyiv? Since Archangel Michael is present here, we will ask him a question. He, like Seraphim of Sarov, will answer.

Irina: Spiritual protector of Kiev?

(Archangel Michael) In the Spiritual world, I am the Highest Hierarch, fully responsible for planet Earth. In your opinion, I head the department where the Arhats and Consulting Angels are located, who send all Spirits at any density levels to incarnate on Earth, not only to Kyiv or some other city.

08:08 Spirit of Sergius about his childhood.

Maxim: Please tell me, Bartholomew, with whom have you been in contact since childhood and have you flown on flying saucers?

Irina: (Sergius of Radonezh) Yes, I had contacts, they flew to me. There was real physical contact. But I perceived it as the appearance of Angels. And their, as you call it, spaceship was not like what I saw in everyday life, and therefore for me it was a miracle. I was not 11 years old when I lived in the body.

Maxim: Where did you live then, in what area, in what family were you born?

Irina: Shows a man, a woman, they also have a boy and two more children.

(Sergius of Radonezh) In total, there were four children in the family. It was a peasant family (shows a place on the map - north of Moscow). This is now the Yaroslavl region, somewhere near Yaroslavl.

Maxim: They write: “Warrior monks were raised in his monasteries.”

This is true?

Irina: It was they who later became warriors themselves. What is a monk?

(Sergius of Radonezh) Dear friends, greetings, I am now in the Spiritual world next to my dear friend and teacher Archangel Michael. Of course, there was a little confusion about who was supervising whom when he or I were in embodiment.

Now I am next to him in the Spiritual world. There are patrons of planet Earth in subtle-material civilizations, and there are in the Spiritual world. Archangel Michael is the patron saint of the entire Earth in the Spiritual world. And I am one of the patrons of the egregor of the Russian people, that is, in your earthly language, I am his subordinate.

We are both, in your opinion, at the 24th level - you do not know the gradation above, you cannot explain this in earthly language. And therefore, our relationship is not like that of a boss and a subordinate, but purely spiritual, like that of a spiritual father and son, that is, not physical.

You just asked me: “Were monks raised as warriors?” There was no special training for soldiers. But when foreign people, opponents attacked our Motherland, Rus', some monks also went to defend our prince, children, women, so that they would not be taken prisoner, so that our land would not be captured. It was the good will of the monks. I blessed them. But there was no special education as such.

Maxim: Please tell me, Bartholomew, there is information that you were having trouble with your studies, someone came to you, and you began to study well. This is true?

Irina: Yes. I had contact with Archangel Gabriel.

Maxim: And how did Archangel Gabriel help you study well?

Irina: He was in a physical body, but unlike the earthly one. He gave me some medicine, which I took internally (some kind of liquid shows), and it activated my memory.

Maxim: Why did you have a closed memory?

Irina: Because I was born in a family where the genetic characteristics of the body did not allow my brain to absorb a large amount of information.

Maxim: And did he give you this liquid on what level: physical or energetic?

Irina: Physically. I met him next to his chariot.

Maxim: Is this Archangel Gabriel - Mirakh Count?

Irina: Now I know his name, but then I didn't know his name on his planet.

Maxim: Did he introduce himself to you as Archangel Gabriel?

Irina: Yes, he said that he is Archangel Gabriel. It's just that in his physical body he lives in a different world.

Maxim: People write that they also want such a liquid. Where can I get such a liquid to drink, and my memory will become normal?

Irina: Perhaps we should turn to Archangel Gabriel.

Maxim: That is, pray to him so that he will fly here on a flying saucer? Tell me, please, did you grow up in a poor family?

Irina: Yes. I grew up in a poor family. When I was about 8 years old, we kept cattle (shows the hayloft). I climbed into the hayloft to get hay for the cattle. I was careless because I was sleepy. It was early morning. I fell from there and injured my head and lost consciousness. This also contributed to memory loss.

At that time there were no funds or doctors. They simply prayed for me when my mother found me (shows a picture of me lying in this barn), took me into the house and called a healer, who came with herbs, which she applied to my head. Dad called the priest, who

prayed for me (shows how he anointed him with something). At first I didn't remember anything, and then I saw white Angels, they were without wings, but with very white faces.

Maxim: In our opinion, these are Burkhadians.

Irina: He's showing me now how he's lying on the bed, early morning. Several days have passed, but he cannot fully recover. And they came to him and began to direct the Light at him.

(Sergius of Radonezh) And after that, I was able to get up and walk. They told me (not in words, but the thought came) that in the evening I should come to my village alone. I came there and saw (shows a large plate - a spaceship). I am speaking now as part of my memory. I stopped, this spaceship (I didn't even know that it was called that) was very large, five times taller than me. From there came the very creatures that came to me in my dreams, as I thought then. They invited me inside, where they put plates on my head, and after that I became completely healthy.

Maxim: So our interstellar friends intervened in your healing so that you would recover?

Irina: Yes, because I had a mission. In your opinion, I embodied the life of Sergius of Radonezh from the 21st level. I had a mission to study faith, to use it to gather a united people, and for this I needed to be healthy. And when I fell, my program was disrupted. And they came to restore me.

Maxim: Got it. Interesting.

18:43 Spirit of Sergius about El Morya.

Maxim: According to Blavatsky's theosophy, Sergius of Radonezh is the teacher of El Morya. Is this really true? Have you incarnated as El Morya?

Irina: I understand who you are talking about. El Morya was incarnated at that time on the planet Esler, we met when I was in the Ashtar civilization. They met with Helena Blavatsky and Helena Roerich, I came with him - these were contacts.

Maxim: Is this, like now, contact?

Irina: Yes. I wasn't, but I know him well. He is also not embodied now.

19:40 Spirit of Sergius on prayer and the church.

Maxim: People ask: “Is it necessary to go to church or can you just pray at home?”

Irina: Necessarily for what?

Maxim: The question was asked: “Is it necessary to go to church and is it possible to pray at home?”

Irina: You can pray everywhere: in the house, in church, on the road, anywhere you are. The Apostle bequeathed to all Christians the words: “Pray continually!” You can't be in church all the time, can you? This means that you can pray anywhere. They go to church not only to pray, but in order to be cleansed from those sinful ulcers that appear in worldly life. And not only in the mundane. Even in the life of a monk, any thought not in the Light of the Creator’s Love leaves a wound. The church heals her.

Maxim: Tell me, why does the church heal wounds? Is it located in some specific places, or, on the contrary, is it placed so that this place arises? Why in general, and how is a church formed in a certain place?

Irina: My dear divine Spirit, what you called is a temple. The church is something more. This is a gathering of all people who love Christ and follow His commandments as best they can from their level of awareness. Coming to church means coming to people. And not only to people, but also to the one whom they worship, giving their Love, faith, time, and whom they want to become like. To whom? You will find his name in the very name of this church - Christian.

Maxim: I understand, thank you.

21:48 Spirit of Sergius about the Battle of Kulikovo.

Maxim: They ask you: “Was there a Battle of Kulikovo?” I don't know

why they ask you?

Irina: Yes, it was. The answer is yes (shows riders on horses knocking each other off their horses with something very similar to spears). And Sergius of Radonezh is already old, he himself does not participate, but watches from the side.

Maxim: The battle was with you, it turns out, that's why they ask?

Irina: Yes, he shows that he looks with his own eyes.

Maxim: Thank you.

22:28 Spirit of Sergius on the relationship with Christianity.

Maxim: Please tell me, they say that you did not immediately become an adherent of the Christian religious egregor, our church. That you were a sorcerer before. That is, he studied Vedic culture, pre-Christian. This is true?

Irina: I know why they say this, because I was in contact with the Spirits of nature, but this did not interfere with my Christianity. As I already said, the church is an Assembly. I have been a part of it since childhood, because my parents were believers. And they, despite their poverty, sent me to study as a priest, because that was their mission, so that the priest could teach me the basics of the Law of God in childhood.

Because of this trauma that I spoke about, and because of the genetic characteristics of the body, which I could not yet overcome with the Light of my Spirit due to my youth, I could not memorize the letters so successfully to read the same Holy Scripture.

A little over two years after the first physical contact with aliens, when they restored my head, my brain, this put my life out of danger. But when my mentors and curators saw that I myself could not cope with this problem, Archangel Gabriel additionally gave me a sacred liquid, which allowed me to completely restore my brain. This was, as I said, still two years after the first contact. And after that I became the first among the students.

Maxim: How interesting everything is. We need to ask the aliens for some brain fluid. I've been forgetting something lately.

Irina: You retain a lot of information, and your brain function is much above average. You have a lot of information and think strategically.

Maxim: Yes, sometimes there is too much information, and you have to think strategically. This is the time.

Irina: But I didn't have such an opportunity due to brain damage.

Maxim: I understand, I heard you, thank you for your answer.

25:18 Spirit of Sergius about healing around relics and miracles.

Maxim: They say that people get better at your relics? This is true?

Irina: To each according to his faith.

Maxim: How is the recovery process going? Is it you who help, or is it the person's faith in you that helps him recover? How does this even happen?

Irina: Synergy.

Maxim: Yeah, that is, this is his faith, desire, opportunity to turn to you, believe in you. Are you from the Spiritual World helping him to recover on his dense material body?

Irina: My Light of Love is unconditional. It is directed to everyone without exception. But each vessel is capable of receiving it into the body and changing its quality according to its ability to receive it.

Maxim: I understand, thank you. They say that you showed very interesting miracles of healing and resurrection when you were alive?

Irina: I prayed. There were no special practices or techniques. They brought to me the sick and those who were already considered dead, but their thread of life was not broken. They were unconscious, in a

coma. Then a person could fall into a coma from a wound, for example, he was working in the field, the horse was walking too fast, he was holding on to a plow, could not stay on his feet, slipped and injured his leg with the plow. After 10-14 days, he began to feel ill, his temperature rose, he was on fire and began to talk to invisible entities. If he did not receive help, he could die or fall into a coma.

Maxim: Guys, you ask questions about other contactees, for example, about the same Sophoos, and ask who he talked to. I'll tell you this: we greatly respect the work of any contactee. Only with his consent can we give you information that we hold. Without the consent of a living person, especially a contactee who builds his egregorial moments, who gives information to people, we will not speak. So don't ask, don't torment us. We will respect the chain of command. Our task is to unite contactees, but there is no way to create some kind of contradiction due to the fact that we see something differently than the contactee himself.

Irina: Seeing differently is absolutely normal. Even a book, a completely earthly book, that we hold in our hands, we will read and understand in completely different ways.

28:16 The Spirit of Sergius about the curators of the financial egregor of the Earth.

Maxim: Tell me, please, they say that you supervise the financial egregor of the Earth? This is true?

Irina: This is not my task.

Maxim: Whose?

Irina: In the Spiritual World?

Maxim: Yes. Who in the Spiritual World oversees the financial egregor of the planet?

Irina: In the Spiritual world, the financial egregor of the planet is supervised by Archangel Jophiel (shows an image). In the subtle world, it is supervised by the one with whom you recently communicated - the plasmoid Ganesh.

Maxim: That is, in the Spiritual world - Archangel Jophiel, and in the subtle world - Ganesha, who is now embodied in the subtle worlds?

Irina: Yes, this is one of the curators of the financial egregor of the entire planet.

29:15 Spirit of Sergius about the life of a hermit.

Maxim: Tell me, please, did you go to live in the forest and didn't live with people? Why did you do this?

Irina: To build a monastery for people, a monastery, to build a temple for people who wanted to follow the path of monasticism. And this was a very ancient custom dating back to the Syrian and Greek monks. All monks have tasks in this world - to pray for the whole world, to teach the faith, to teach others. So that there would be more such people, I set an example for them (shows that he built a temple and housing with his own hands even for other monks).

31:15 Spirit of Sergius about the Tatar-Mongol yoke.

Maxim: Tell me, please, was there a Tatar-Mongol yoke?

Irina: Yoke, if by it we mean the complete seizure of our state by the tribes, then there was no complete seizure. There were simply separate principalities, princes who did not fall under this yoke, that is, not captured cities, but most of the Russian land was levied as tribute in favor of the Tatar-Mongols (shows the khan, an oriental man, dressed in oriental clothes, he is very rich). He raided other countries not in order to rule, but in order to be paid tribute. The yoke was most likely financial.

Maxim: They came, captured, forced to pay taxes, and those who were captured paid. I understand correctly?

Irina: Yes. For example, they did not persecute the Orthodox faith, although they were of a different faith. They didn't need it. They wanted to collect tribute, and for the Russian princes to rule, but with their permission. Since the tribute was quite large (shows gold coins), this did not allow our state to develop.

And further. When a new khan came, this tribute could increase because he had expenses, for example, on military campaigns against some other peoples (shows those who lived on the shores of the Caspian Sea). The new khan compensated for the costs of these campaigns by increasing tribute from the lands he had already captured. So we were dependent on his will and his arbitrariness.

33:28 Spirit of Sergius about phantoms and multidimensional consciousness.

Maxim: Please tell me, you are in the Spiritual world, a lot of people pray to you. They come to your body in order to repent, get rid of sins, and be restored. How can the Spirit even cope with such a huge number of requests?

Irina: I have many images. You call it a phantom. I separate part of the spiritual energy from my Spirit. This is not the energy that you know in the material world and even in the plasmoid world. This clot of spiritual energy takes on my image and the task that I set for it. This is, in your opinion, my continuation or avatar, and I am sending this to the believers. Since I am in the Spiritual world, where I am outside of time, in eternity, therefore, I hear all the prayers addressed to me at the same time, since there is no time there. I have a spiritual multidimensional consciousness, and I still see and hear everyone.

34:41 The spirit of Sergius about his incarnations. Spirit of Sergius about antediluvian life on Earth.

Maxim: Please tell me, how many times have you been incarnated on Earth?

Irina: On Earth? If we take the entire history of the Earth, starting with its intelligent life, I was incarnated 15 times.

Maxim: Tell me, when was your very first incarnation?

Irina: On Earth?

Maxim: Yes.

Irina: This was back when there was antediluvian humanity. My first

incarnation on Earth was 300 years after the creation of people.

Maxim: Did you witness the war 12,000 years ago? Have you been in this incarnation?

Irina: I was not in this incarnation. My next incarnation on Earth ended around 750 years before the war.

Maxim: Who were you embodied in during your first incarnation? 300 years after the creation of humanity - these are the origins.

Irina: Shows a woman.

Maxim: What were you doing? How did people live after their creation 300 years later?

Irina: It was warm everywhere (shows the jungle, large trees).

Maxim: Were there dinosaurs?

Irina: Yes. We had a separate family, I wouldn't even call it a tribe, and there were several other families. We called this family clan. Several of these clans made up a small tribe (shows a forest clearing, wooden poles were placed there and covered with something similar to leaves, it was warm, they lived as if in the tropics). We ate fruits from the trees, and we mentally communicated with animals or birds, we could tell them something, and they could fulfill our wishes.

Maxim: So on a mental level you were in contact with animals?

Irina: Yes. Since childhood, subtle-material entities have come to us and taught us how to replace an animal's own instinct.

Maxim: Don't you remember from what level you incarnated into this woman?

Irina: From level 15 (turns to her memory cell, shows me).

Maxim: What else was interesting, how did you get food, where did

you hunt?

Irina: We could eat fruits, ate a little milk (shows animals that looked like yaks, which came on their own, they called them mentally, did not keep them).

Maxim: Did you mentally call for the yaks, the yaks came, and they milked them?

Irina: Yes (shows jug).

Maxim: Ira, we at the Center now really need these yaks, we need to get them. I sent it to them mentally, invited them, they came, milked them, and that's it, sent them on their way. We have cool, flooded fields down there.

Irina: They had more than fields there. It shows that they lived in the jungle, shows big leaves.

Maxim: Were you vegetarians?

Irina: (Sergius of Radonezh) Yes, but we could eat milk. That person among us who came into contact with, as you call it, a plasmoid, this plasmoid could offer to try the flesh of either a fish or a bird, and if he obeyed him, he could get sick from it or even die after eating a lot. We had such people. We called them corpse eaters. A corpse is the carcass of an animal.

Maxim: It turns out that you could talk to fish then if you communicated with plasmoids?

Irina: There is nothing complicated about this.

39:43 Spirit of Sergius about meeting Jesus Christ.

Irina: By the way, when Jesus Christ was, I was also incarnated.

Maxim: And who?

Irina: Nazariy. I was the father of Apostle Mark.

Maxim: Were you the father of the Apostle Mark? Guys, if someone suddenly finds out who Nazarius is, or the name of the father of the Apostle Mark, write in the comments. Because this is an important point. In general, I consider this one of the proofs of contact.

Irina: That's what I heard.

Maxim: Guys, I repeat once again that this is most likely our last broadcast, and so that you don't lose us, there is a link below the video, there is our website, a group on Telegram, there we will inform you about our trips and retreats , events, training.

I won't talk about probiotics, because they write that I do advertising.

So, you were the father of the Apostle Mark. So you personally knew Jesus Christ?

Irina: Yes, I knew him (shows that they went together). But I was not among the Apostles. I knew him, I turned to him (shows the village, he was fishing). I have repeatedly heard stories from other fishermen about how Jesus Christ did this for his Apostles. But then I didn't understand how he did it, and when I had already become the Spirit and was reunited, I then compared everything.

Jesus Christ addressed the mind of a school of fish, the instinctive in the Soul. He did the same thing that I told you about: about the first incarnation, when I was in the body of a woman who milked these yaks. I mentally beckoned them, and my message was delivered to the Yak Soul faster through the world ether than your message through electronic networks.

I was a merchant when I spoke to fishermen (one step up). They told me and my son Mark, who was then still a child, a youth, more than once how Jesus Christ helped his Apostles, his disciples, to catch fish both for food and for sale. He either approached the shore, first looked at the water for a long time, or sat in the boat, and there stood up to his full height, and also looked at the water for a long time, and then told the Apostles where they should fish (shows the net).

When they obeyed him, a large fish was caught in almost every cell of the net. At first they thought he could sense where the fish were. But I understood when I was already in the Spiritual World. I came from the Spiritual world to Jesus Christ, and we talked about it. After all, he did not feel where the fish was, he called for it. I'll tell you how it's done.

In order for this to work for you, there is nothing complicated about it, for this...

Maxim: Wait. Now all fishermen will use this, and instead of catching fish, they will begin to lure fish into nets. Let them sit with a fishing rod and imagine how it bites.

Eleanor, I read your message. I say “last ether” not because I don’t understand the use of words, but because for me the word “last” cuts like a knife.

We won't talk about fish.

I understand that you want to ask burning questions about events in Ukraine. We will definitely ask these questions at the end.

We want to ask who Sergius of Radonezh is. What was he doing? Who did he incarnate into?

46:50 Spirit of Sergius on communication with fish.

Maxim: Okay, let's talk about fish. Sergius, tell me how Christ did this?

Irina: In order for this to work for each of you, there is nothing complicated about it, all you need is your belief that there is a Soul in every living creature, and that you can communicate with this Soul at a distance. When I was incarnated 300 years after the creation of people, everyone knew it as two and two making four. You don’t believe it, but you know it. But you don't know things that are more important for your survival. For example, how to communicate with the animal world. And then they didn’t know the multiplication table, but they knew the things necessary in nature.

So, you need to believe at the level of knowledge that every living creature, and therefore a fish, has a Soul that will definitely hear you. This is the first condition. The second condition: you must be able to concentrate your thoughts in a stream of mental images, to imagine.

When you come to the shore of the reservoir, close your eyes and try to feel the space with your Soul, with your heart. That space that is hidden in the depths of water. Try scanning the surface of the water with your heart. Turn to your consciousness, to God, to your Higher Self with a request to give you spiritual energy for spiritual vision and concentration. It could be like a prayer. Be sure to mentally contact the subtle-material guardian of the reservoir so that he allows you to catch this fish, and immediately tell him for what purposes. Because if you don’t do this and send a mental order, which is similar to a hypnotic suggestion, if you send this fish an order to gather, then the keeper of this reservoir will hear it too, because it will be like a flash in the Astral. If he doesn't agree, he'll simply cancel it. Or he may, depending on his character, concoct intrigues against you.

Therefore, first, we turn with prayer to God, with greetings to the Spirit of the reservoir. Thank him for observing and creating this space, filling it with his energies. Ask him to help you catch fish, tell him for what purposes: for food, for yourself or other people, for example. This goal will do just fine. Your Soul must be pure, that is, you must not be a predator, you must be human. You should not take too many fish, which will harm the ecological system of this reservoir. And only in this case will you feel in your mind that the Spirit of the reservoir has heard you. After this, imagine the type of fish that you want to catch, and which is exactly found in this body of water. You can imagine several. With your eyes closed, imagine a certain place in this pond where you will cast your net, that there is a lot of food there. It is advisable that they want to sail there because you speak their language. Don’t just say “come here,” but speak their language. They will perceive your signal and, under hypnotic suggestion, will swim there.

Maxim: This is in the summer. Should I pray to the hole in winter?

Irina: Yes, rather imagine that the fish are there, imagine that you threw a lot of worms into the hole.

53:11 Spirit of Sergius about the stages of the quantum transition.

Maxim: Let's move on to your most pressing questions. I understand that we cannot answer the questions you ask us. Sergius, Bartholomew, do you know what is happening on our planet now, what events are taking place?

Irina: Of course. I am the keeper of the egregor of Russia from the Spiritual world.

Maxim: Do many people pray to you for an end to these events?

Irina: Yes, very much. Many wives, mothers and children shed many tears secret from the world, but I feel them.

Maxim: How do you generally see this situation? How long will it last, and how quickly will it stop?

Irina: The spiritual seeds of what is happening now were sown a long time ago. Now they have sprouted, sprouted and given fruit during the period when there was a stage of rest between two active stages of the quantum transition. This situation should have happened at the moment it began. There was a high probability that by the time of the next stage of the quantum transition it would be harmonized.

Maxim: When is the next stage of the quantum transition?

Irina: Starts tomorrow (03/21/2022).

Maxim: When does it end?

Irina: It will last 96 days.

Maxim: Is this one of the stages of transition?

Irina: Yes. Do you remember that stage of transition when you prayed to the Mother of God?

Maxim: Until January 14, 2022, I remember.

Irina: Yes. The Mother of God is also one of the guardians and leader

of the Russian egregor. The stage that she supervised was relatively calm. She covered the entire Russian land with her Veil. And this conflict did not break out earlier. As you remember, this stage of the quantum transition, which she personally supervised, ended on the Day of the Lord's Circumcision - January 14, 2022. Circumcision is dedication to God. On the last day of her son's circumcision, she removed the Veil from the Russian land (the Veil is like energy) so that the entire planet, including Russia, could adapt to the vibrations that were given by all civilizations at all levels of density, by all Spiritual worlds.

A lot depended on how your planet, represented by all its inhabitants at all levels of density, could adapt and adapt to these energies. A little over a month passed, and what happened happened. The black negative force that was accumulated in the egregors of the Slavic peoples, as you call it, Slavic-speaking peoples who speak similar languages, descended from the same root, broke through to the physical plane with very real destruction and death. And at that moment there was a high probability (about 80%) that the situation on the physical plane would be harmonized by March 21 of this year. Everything was in your hands. Not only in yours, but in the hands of all earthlings.

But there were some conditions for this situation to be harmonized; all earthlings in all countries had to undergo spiritual lessons, which consisted of mercy and compassion for all participants in the conflict and prompt assistance in resolving it. But many countries around the world have taken a different path. Through condemnation and prohibitions. And the indignation of the people about all this began to further reduce the vibrations of the egregors, which resulted in increased actions leading to destruction on the physical plane. That is why this situation is still in the active phase.

Maxim: By the way, today is the full moon, tomorrow is the spring equinox. These are interesting points.

Irina: But tomorrow, on the day of the spring equinox, the next stage of the quantum transition, necessary for the Earth's transition to a new reality, will enter into an active phase, where there will be more light vibrations, and where even the vibration of the DNA of your body will change. Since the situation with negative energies has not been cleared until this time, the stage of the quantum transition starts under these conditions, and it will not increase its energy potential so

quickly.

I want to say that I will be the leader of this quantum transition. I will oversee it, lead this quantum transition, which begins on March 21, 2022, and it will last 96 days. Naturally, this is planned, but it can either be delayed or reduced.

During this period, I and my collaborators Angels set the task of completely clearing the noosphere of the egregors of the Slavic peoples from everything incompatible with the Light of love. What will this say? This will indicate that the bearers of these ideas, incompatible with Love in any egregor, will undergo tests or lessons, which, if they fail, may be followed by a premature exit from incarnation.

Planet Earth increases its energy potential, and the vibrations of quanta also begin to increase. And this plan should not be slowed down, because the Earth is still part of the Solar System, and the Solar System is part of the Galaxy. Therefore, if one of the people does not keep up with the quantum transition and does not raise their vibrations, by doing this he puts (shows a wheel and an obstacle) “pokes in the wheels” of the Earth, and ultimately the entire Milky Way Galaxy, which must harmoniously make quantum transitions in cyclical accordance with its different parts.

Maxim: I personally think that we started on February 23, and we’ll finish on May 9. Somewhere in May we will find ourselves in a situation where we will unite with our brothers and sisters.

1:04:47 Appeal of the Spirit of Sergius to the inhabitants of Russia.

Irina: The option that Maxim said is also possible. An earlier option is possible. There may be an option later. At the moment, before the quantum transition, all these options are equally probable.

Now I am addressing all residents of the country that I supervise, Russia. Dear friends! Now the fate of your planet, like your own, depends on you, as well as (equally) on the inhabitants of the rest of the world. I encourage you every day to send the Light of your Love and gratitude equally to the leaders of the conflicting states, to everyone. I ask you to do this sincerely. And after this mini meditation, I ask you to maintain peace, tranquility and harmony in

your families. Now our egregor must be cleansed. This is very important for each of you and for the entire Galaxy as a whole.
